

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

This book is in every respect and detail new. Its object is to supply the practitioner with trustworthy definitions of such medical words and terms as he may need in his reading of standard medical text-books, monographic or journalistic literature. All of us, editor, assistants, and publisher, have sought to avoid the incompleteness and limitations of dictionaries too small to meet the needs of the active educated physician, while at the same time comprising what is essential in the largest collections. The first class of works necessarily fail to include the brand new coinages, those most unknown to the practitioner, while the larger are frequently too much un-bridged and at least are expensive, heavy, and bulky. We have here striven for the fortunate in *medio tutissimus*. The inclusion of the best of the new and probably enduring words that have been minted in the last ten or twelve years, while at the same time keeping the old lists complete, has been a hard task. This has been made possible only by the generous cooperation of the publisher. Not a little of the modern publishing business consists in selling at an enormous profit a vast amount of book-paper of poor quality, large extent, and useless thickness, upon which is sprawled a correspondingly exiguous text. With due attention to optic and artistic demands the choice of the reverse plan has been adopted.

We have retained all the old and acceptable features of the previous lexicons, the chief being the simple method, easily understood at a glance, of indicating the pronunciation and accentuation of words. The tabulation and systematic classification of correlated terms which has previously so well demonstrated its usefulness has also been continued. To this one exception has been made,—the distribution in alphabetic order of eponymic terms. Since the publication of earlier volumes these lists have grown so amazingly that it has seemed labor-saving in ease of reference to scatter these throughout the alphabet. In no other work will so many be found as in this. We may criticize and object to the making of these thousands of words called after men's names, but as the lexicographer is primarily a historian, they may not be excluded, and especially if the purchaser's interests are duly considered.

Several valuable and important novelties have been adopted in order to make the work meet all the latest requirements: The metric system of weights and measurements in doses, etc., has been added in order to furnish the necessary equivalents to those who may prefer these to the older and more common forms; the additions and changes of the new *Pharmacopœia* have been inserted; and the recommendations

50810

of the new [BNA] anatomic nomenclature have been noted. Concerning this reform Professor Lewellys F. Barker says:

"This nomenclature has practically reduced the anatomical terms by many thousands. It has omitted many which were ambiguous and obsolete, and has resulted in the establishment of certain general particulars regarding formation and use of anatomical terms which will simplify and make uniform the nomenclature as it is to-day, and new terms which may have to be added as investigation continues."

Without wasting space and making "a picture book" we have endeavored to keep the most valuable and helpful illustrations of former volumes, and have added a considerable number of new ones, distributing them where they will be most conveniently consulted.

To those previously thanked who have so ably and unselfishly aided in the compilations of the numerous styles and revisions of previous lexicons I have edited, as well as to many others, unnamed, who have been interested in perfecting those which should follow, I can only now express in this general way my obligations and gratitude. But in the arduous and painstaking assistance rendered the subscribers to the present volume, full and especial thanks are due E. Raiguel and G. C. C. Howard.

I have a feeling of gladness in learning from my publishers that, despite many old and many more new rivals, over 200,000 copies of my medical dictionaries have been scattered among the profession in many parts of the world. That evidences something of usefulness in the great cause of medical science and progress.

GEORGE M. GOULD.

NOTES CONCERNING THE HISTORY OF LEXICOGRAPHY *

Nomina si nescis perit cognitio rerum, said Coke with the acumen of the legal mind, and it is generally true that the knowledge of things depends upon the knowledge of their names. Discoveries of new facts, or new standpoints for viewing old facts, demand new tags or "nicking" symbols whereby their status may be fixed and their recognition insured and made more clear for distant or future students. Few philosophic and scientific minds may exhibit an aloofness and a freedom from the tyranny of words to enable them to study things without the aid of words and namings. But nothing, it is admitted, is more blundering in a personal sense, and more harmful to the progress of science, than the exhaustion of interest so soon as a classification and nomenclature have been made. The ridiculous is only needed to end in the absurd, and this is generally supplied by their wrong pigeon-holing and false ticketing. A diagnosis once made, a mere word, long, mysterious, and meaningless, pinned upon the bunched symptoms, and further study of etiology, prophylaxis, or therapeutics is with too many at an end. Over 200 years ago Dr. South tried to check this "fatal imposture and force of words" by showing how "the generality of mankind is governed

* From the preface to the author's "A Dictionary of New Medical Terms."

by words and names," not by things as they are, but as they are called—in a word, by "verbal magic."

And yet in a groping science like medicine, one that inductively, slowly, and tentatively is feeling its way toward the truth, this need of naming every step forward is peculiarly necessary. It is the condition of securing the step in itself, and of guiding the aftercomers. It is the blazing of trails into the wilderness of the unknown. Of course no one can tell what lines of research may finally prove the best and true, and none, therefore, what blazes will be useful or useless. New trails, shorter, easier, and better, may indeed be discovered, and when the wilderness country is settled, all trails will either be abandoned or become well-known roads. But even then good sign-posts and pointing index-fingers will be helpful for strangers, and some of the old names will never be discarded. None can surely foretell what words may die and what ones become a part of the language. Hence the lexicographer may not too recklessly exclude.

The history of lexicography finds its first data about 700 or 800 A. D., in glosses, or the more common explanatory words annexed or superposed over "hard" terms, and made either in Latin or in the glossator's own vernacular. A list of such glosses was called a *glossarium*, or as we say, a glossary. It soon became the custom for children and students to learn by heart the classified lists of the names of things, such as those of the parts of the body, of animals, trades, tools, virtues and vices, diseases, etc. Such a list constituted a *vocabularium* or vocabulary. These glosses and vocabularies were in time thrown together in bundles, at first without any order, and as lists, without losing their individuality. Then came the "first letter order," in which all words and terms beginning with the letter a were bundled together, still without discrimination, so that the entire list of words beginning with a, or b, had to be scanned in order to find a special word. The classification proceeded to an arrangement of the items also according to the second letter, then the third, etc., until after hundreds of years complete alphabetization came into use. At first the aim had been to explain difficult Latin words by easier Latin ones; then by English ones, and in the tenth and eleventh centuries the English equivalents were the rule, and the glossaries were Latin-English. The first book of this kind to be called a *dictionary*, that is a repository of *dictiones* or sayings, was that of Sir Thomas Elyot in 1538, and from that time the word *dictionary* has supplanted all others; so much so that it is now the title of any alphabetic gathering not only of words but of any kind of knowledge whatsoever.

Our modern language of medicine is unique in that it is made up of the unchanged and undigested materials and relics used or contributed during its entire history. The persisting substratum is Latin, upon which has been placed a mass of pseudogreek words not physiologically created nor grown by natural philologic methods, but springing Minervalike from the brains of thousands of modern Jupiters. These largely bear the marks of their parentage in characteristics that do not, or should not, begot a spontaneous pride of lineage. From a highly variegated medievalism that has, indeed, never ended, we have taken over another unassimilable conglomerate, and superadded are thousands of dissimilar terms derived from modern chemistry, biology,

bacteriology, and many other sciences. Each single group of contemporaneous nationalities contributes to the others its share of names, and is itself hard at work endeavoring to fuse the whole heritage into homogeneity and unity with the amalgam of the spirit of the general language dominant among its people. The result is a strange hodge-podge of the medical language of two or more thousand years and of many special national tongues, in mechanic, not chemic mixture, with modern sounds and symbols, the whole amazingly heterogeneous and cacophonous. The thirtieth century medical student will probably be compelled to memorize *iter a tertio ad quartum ventriculum*, etc., and to write his orders for drugs in a sad mixture of sorry Latin so far as his knowledge will carry, and then to end it in despair in the vulgar manner of speech of his contemporaries. In general biology the law holds that the ontogeny epitomizes and repeats the phylogeny; but only at the different successive stages of its individual development. In medical language the phylum is always present, and there are no successive stages; there has been no rebirth or inheritance; the ontogeny goes on preserving all the old origins and accretions, and simply adding the new to them. For this sort of evolution there is no name (unless Weissmann's immortality theory is applicable), and its study may be commended to the Darwins and Spencers of the future as a noteworthy exception to hitherto formulated laws. The result is before us: a huge and unassimilated philologic mass, many times greater than it should be, the despair of medical students and of the makers of dictionaries. These word-books, of course, reproduce the phylogenetic history in the same way, and there is no escape from the republication of all the methods and most all the words gathered and found useful in the course of ages. Here with some modifications of detail must be repeated the glosses and vocabularies of a thousand years ago, the foiled attempts together with the partial successes at alphabetic arrangement, and lastly the addition of the modern encyclopedia.

The functions of the dictionary-maker have thus become multiplied and varied. As the gloss-lists and vocable-lists grew into dictionariums and as alphabetization became thoroughgoing, as one after another subject was added to the word-gatherer's work so our technical dictionary has at last become in part encyclopedic and expository, its plan and outworking still somewhat subject to the personality, scholarship, and judgment of the author. It will always remain an open question how far the author should or may go in giving individual color to his dictionary. Johnson's famous definitions of *excise*, *lexicographer*, *ouls*, *pension*, *pensioner*, *tory*, *whig*, etc.; Webster's "Americanism" in spelling; the Century's seconding in various ways the obvious trending of philologic progress,—these, and many such illustrate the lexicographer's belief in his own, at least, "limited" free-will.

"Johnson's great work," says Dr. Murray, "raised English lexicography altogether to a higher level. In his hands it became a department of literature." The technical dictionary of to-day may indeed claim a higher office than that, because no monograph or text-book comes near the far-reaching and lasting influence of modern encyclopedic dictionaries. They help more than teacher or text book to bring order into the student's forming mind, and to systematize and make definite his knowledge. In postgraduate life and practice there is no book that is so frequently consulted, and

the teachings of which are so clearly kept in memory. This is because of the validity of the maxim of Coke.

Solely upon condition, however, that the author has put heart, intellect, and labor into his work! If he has been content to repeat, copy, and adopt, it will not be so. And even then only if other repeaters, copiers, and adopters "do not break through and steal." As has often happened since, dictionary-theft is an ancient story. As long as 250 years ago Phillips plagiarized the *glossographia* of Blount. The robbed author indignantly exposed the shamelessness of the cribber, even of misprints and errors. But he was not ashamed! *More suo* the thief, having no defense, made none, and instead proceeded to correct all the errors pointed out by Blount, and, in many subsequent editions, the quack-lexicographer reaped the reward given by a too careless public.

The ancient injustice would be much manifolded in modern times, with an intensely progressing science which demands that, if to be of the best service, new editions of its word-books shall be made every few years. The system must become systematic and the professing truly professional. No spasmodic, incidental, or amateur methods will nowadays avail. Revisions are required, and continuous labor, not only of one but of many, so that helpers, a large corps of them, must be organized, and paid. Over 300 years ago a great worker in this field, one who "contrived and wrought not onelie for our owne private use, but for the common profet of others," even with the patronage of great men "who encouraged in this wearie worke" was grieved that "the charges were so great and the losse of time" so much that he came near having "never bene able alone to have wrestled against so manie troubles." Finding that "his spiritual substance had vanished," old Simon Browne "took to an employment which did not require a soul, and so became a dictionary-maker," piously adding that we should "thank God for everything and therefore for dictionary makers."

PUBLISHERS' NOTE

SECOND EDITION

Experience has shown that revisions generally add to the size and weight of books and, if the work is of a special nature and intended for a particular class, it becomes too large and so loses its *raison d'être* for that class. This edition of the Practitioner's Dictionary has been kept down to its original size by mechanical means despite the inclusion of a number of new words—new in the science of medicine and necessary to the physician.

ABBREVIATIONS

ABBREVIATIONS USED IN GENERAL MEDICINE

ad	ad	Of each
A c	Ante cibum	Before meals.
Abdom	Abdomen	The belly
Abs. feb.	Absente febre	When fever is absent.
Abstr	Abstractum	Abstract.
Ad	Adde	Add.
Ad lib.	Ad libitum	At pleasure, as desired.
Ad. mov	Admoveatur	Let it be applied
Ad. pond. om.	Ad pondus omnium	To the weight of the whole.
Adv.	Adversum	Against.
Aggr. feb.	Aggrediente febre	While fever is coming on.
Al.	Aluminum	Aluminum.
Alt. dieb.	Alternis diebus	Every other day.
Alt. hor.	Altra hora	Every other hour
Alv. adstrict.	Alvi adstricta	The bowels being con-
Alv. deject.	Alvi defectiones	finet.
		The intestinal evacu-
		ation.
Anat.	Anatomi	Anatomy.
Aq.	Aqua	Water
Aq. astr.	Aqua astricta	Ice
Aq. bull.	Aqua bulliens	Boiling water.
Aq. com.	Aqua communis	Common water.
Aq. dest.	Aqua destillata	Distilled water.
Aq. ferv.	Aqua fervens	Hot water
Aq. font.	Aqua fontana	Spring water.
Aq. mar.	Aqua marina	Ocean water.
Aq. pur.	Aqua pura	Pure water.
As	Arsenic	Arsenic
At wt.	Alumne wright.	Alumne wright.
Av.	Avunculupus	Avunculupus.
B.	Bilem	Bilem.
Ba	Barium	Barium.
B. A. or B. S.	Balneum arena	Sand bath.
Bala.	Baluminum	Balsam.
Be	Beribium	Beribium.
Bi	Bismuth.	Bismuth.
Bb	Bile	Drank.
Bol	Biology	Biology.
B. d.	Biologie	Twice daily
B. M.	Balneum maris	Sea water bath
Bol.	Bolus	A large pill
B. p.	Bolus	Boiling point.
B.	Bromin	Bromin
Bull	Bullit	Let it boil
B. v.	Balneum vapor	Vapor bath
C	Congius, Centi-	Carbon; Cubic; A
	grate	gallon; Centi-
		grate.
Ca	Calcium	Calcium
Cap	Caplat	Let him take
Cc	Cubic centimeter.	Cubic centimeter.
Cd	Cadmium	Cadmium
Ce	Cerium	Cerium
Col.	Celium	Celium
Cent.	Centigrade	Centigrade
Cg	Centigram	Centigram
C. m.	Cras mane	To-morrow morning.
cm.	Centimeter	Centimeter.
C. m. a.	Cras mane sumen	To be taken to-
		day
C. n.	Cras nocte	To-morrow night
Co	Cohalt	Cohalt.
Cochl.	Cochlear	Spoonful
Cochl. ampl.	Cochlear amplum	A tablespoonful
" infant.	" infantis	A teaspoonful
" mag.	" magnum	A tablespoonful.

Cochl. med.	Cochlear medium	A dessertspoonful.
" parv.	" parvum	A teaspoonful
Col.	Cola	Strain
Colat.	Colatus	Strained.
Colet.	Colatur	Let it be strained
Color.	Coloratur	Let it be colored.
Comp.	Compositus	Compound
Cong.	Congius	A gallon.
Cons.	Conserva	Keep
Contin.	Continuatur	Let it be continued
Cont. rem.	Continetur	Let the medicine be
	remedium	continued.
Coq.	Coque	Boil
Cort.	Cortex	Bark.
Crast.	Crastinus	For to-morrow.
Crys.	Crystal	Crystal
Cs.	Cesium	Cesium.
Cu.	Cuprum	Copper
Cuj.	Cujus	Of which.
C. v.	Cras vespere	To-morrow evening.
Cyath.	Cyathus	A glassful.
D.	Dosis; Da	A dose; Give.
Decub.	Decubitus	Lying down.
De d. in d.	De die in diem	From day to day.
Deg.	Degre	Degree, degeneration.
De R.	Reaction	Reaction of degenera-
		tion.
Destil.	Destilla	Distil
Det.	Detur	Let it be given
Dieb. alt.	Diebus alternis	On alternate days.
" tert.	" tertius	Every third day
Dil.	Dilue	Let it be dissolved
Dilut.	Dilutus	Dilute.
Dim.	Dimidius	One half.
Dist.	Distilla	Distill.
Div	Divide	Divide
D. in p. eq.	Divide in partes	Divide into equal
	equales	parts
Donec alv. sol.	Donec alvus so-	Until the bowels
luerit	luta fuerit	are opened.
D. P.	Directione propria	With a proper direc-
		tion
E.	Embryum	Embryum
Eb.	Embryum	Embryum
E. j.	Embryum	Embryum
Ejusd.	Ejusdem	Of the same
Elec.	Electuarium	An electuary; Elec-
		trary.
Emb.	Embryology	Embryology.
Enem.	Enema	Enema
Er.	Erythrum	Erythrum.
Exhib.	Exhibetur	Let it be given
Ext.	Extractum	Extract
F.	Fabernheit	Fabernheit, Fahrenheit
Faf.	Faradic	Faradic.
Fe.	Ferrum	Iron
Feb. dur.	Febre durante	The fever continuing
F. Ft.	Far, Fiat	Make
Filt.	Filter	Filter.
Flid.	Fludus	Fluid.
Flor.	Floris	Flowers
F. m.	Fiat mistura	Make a mixture.
Fol.	Folia	Leaves.
F. p.	Fiat potio	Make a potion.
F. pil.	Fiat pillula	Make a pill.
F. s. a.	Fiat secundum artem	Prepare skillfully.
Galv.	Galvanic	Galvanic
Gl.	Glycerium	Glycerium.
Gm.	Gram	Gram.

V	M	Volt-meter.	<	Less than.
W	Work; Weight; Watt.			

- Az- indicates the group NH_2 .
- Azo-, diazo-, and hydrazo- indicate compounds in which nitrogen atoms are linked in various ways.
- Di- is applied as a prefix to signify *two*.
- Im- indicates the group NH .
- Ket- indicates the molecule CO in certain structural relations.
- Mon- is employed as a prefix to signify *one*.
- Nitro- indicates the group NO_2 .
- Pent- is applied as a prefix to signify *five*.
- per- denotes in a rather vague sense an indefinitely large amount of the body to which it is prefixed, or to which it is referred.
- Sesqui- indicates the proportion of *two to three*.
- Sub- is employed in a rather vague sense to indicate deficiency of the body to which it is prefixed.
- Tetr- is applied as a prefix to signify *four*.
- Thio- indicates sulphur, especially replacing oxygen.
- Tri- (sometimes "ter-") is applied as a prefix to signify *three*.
- al indicates aldehydic structure.
- an is applied to a class of bodies related to the starch and sugar group.
- ane indicates a saturated hydrocarbon.
- ase indicates an enzyme, or non-organized ferment, e. g., diastase. This termination is at present restricted generally to enzymes of vegetable origin, but it should also be used with animal enzymes—which, however, usually end in "in." It would thus be better to say *pepsase* and *trypsinase*, rather than *pepsin* and *trypsin*.
- ite. A suffix to nouns in chemistry signifying any salt formed by an acid acting on a base; e. g., sulphate, phosphate.
- ic denotes the higher of two valencies assumed by an element, and incidentally in many cases a larger amount of oxygen.

-in is of no precise significance, and is mostly applied to bodies the structure of which is not yet known.

-yl, **-ene**, **-oyl**, and **-ine** indicate hydrocarbons. According to the American system of orthography, the only case in which "ine" is used is as a termination for a series of hydrocarbons, beginning with Ethine, C₂H₂. English writers and some American chemists use it to signify basic properties, regarding **-ine** as the proper term for non-acid bodies. They thus distinguish between saltern, which forms no salts with acids, and morphin (which under such system is spelled "morphine"), which does. It must be noted that such methods are not in accordance with the tendency of modern chemie nomenclature, which seeks to express structure, not properties. The organic bases or alkaloids are not all of the same type, and when their structure is elucidated systematic names will be found for them. Until then there is no particular gain in indicating them as a group.

-id is similar to "in."

-ol indicates alcoholic structure, i. e., presence of the group HO (hydroxyl), e. g., alcohol, glycerol, phenol.

-one is applied to bodies related to the starches and sugars. It is, however, not used with this significance in "p-
tone," which word is not formed according to any e-established system.

-ose indicates a carbohydrate, e. g., glucose, although it is also occasionally applied to the results of digestion of proteins, e. g., albumose.

-ous denotes the lower of two degrees of valency assumed by an element and incidentally indicates, in many cases, a small amount of oxygen.

The word **sulphonic** indicates the group HSO₂.

0	Feet.
1	Inches.
2	Lines; each one-twelfth of an inch or about two millimeters.
3	A mark of affirmation or authentication.
4	A mark of doubt
5	Figures or words separated by a short dash indicate the extremes of variation, as 5-10" long few-many flowered; i. e., varying from 5 to 10 lines in length, and with few to many flowers.
Cc.	Cubic centimeter.
cm.	Centimeter.
mm.	Millimeter.
μ	The μm., Micromillimeter, or unit of Microscopic Measurement. For convenience of reference, the following table of comparative measurements is given:—

μ	Inches.	μ	Inches.	Inches	μ
1....	0.000030	6....	0.000226	12120	2.5300
2....	0.000070	7....	0.000276	12120	25.3007
3....	0.000118	8....	0.000315	12120	253.0078
4....	0.000157	9....	0.000354	12120	2530.078
5....	0.000197	10....	0.000404	12120	25300.78
				One Meter	10,170,432 in.

X..... Used to express magnification, thus X1000 indicates a magnification of 1000 diameters. The improper fraction $\frac{1}{1000}$ indicates the same thing, but is rarely used.

☉..... An annual Herb.

☿..... A biennial Herb.

♋..... A perennial Herb.

♊..... An Undershrub, deciduous

♏..... An Undershrub, evergreen.

♍..... A Shrub, deciduous.

♌..... A Shrub, evergreen

♎..... A Tree, deciduous.

♏..... A Tree, evergreen.

♊..... An herbaceous Vine, annual or biennial.

♋..... A woody Vine, deciduous.

♌..... A woody Vine, evergreen.

♍..... A trailing Herb, annual or biennial.

♎..... A trailing Herb, perennial.

♏..... An aquatic plant.

☿..... Flowers perfect.

ABBREVIATIONS

xv

- A male animal, or a plant or flower bearing only stamens or antheridia.
- A female animal, or a plant or flower bearing only pistils or archegonia.
- A young animal of undetermined sex, thus *♂*, young male, or *♀* (juvenile, young).
- A monocarpic plant.
- Cotyledons accumbent.
- Cotyledons incumbent.
- A plant introduced and naturalized.
- A plant cultivated for ornament.
- A plant cultivated for use.
- Monerious.
- Diccious.
- Poligamus.
- Wanting or none.
- Numerous or indefinite; more than twenty when applied to stamens.
- The microsecond represents .001 second or the unit of time in experiments or psychophysic reactions.

Author's names are abbreviated in the following manner:—
Ait., Aiton. Bech., Borchstein. Cham., Chamisso. Dum., Dumort. etc.

Nupt., signifies in ornithology, breeding plumage.
bornot., means a bird of the year.

-*ace*, a suffix used in botany to designate a family, the name chosen being one of the principal genera. E. g., *Rosaceae*, *Ranunculaceae*, *Ranunculaceae*. Cf. *Icon. Stir. Eur. ex.*

-*ana*, preferably used as a suffix to the name of a species around which others naturally cluster, in the naming of subsections or groups of species; e. g., the group of species of *Helix* related to *H. pomatia* may be indicated by the term *Pomatiana*.

-*ensis*, a termination given to the names of species only when derived from the name of their habitat; e. g., *Taraxacum mongolicumensis*, *Daphne chinensis*, *Drosera rotundifolia*.

-*eu*-, employed as a prefix in forming the names of genera, subgenera, or sections of genera before a Greek derivative.

Excl. gen., excludit genus.
Excl. sp., excludit species.

Excl. var., excludit varietas, when following an onym, indicates that the group has undergone revision, and the name does not cover the original ground to the extent indicated.

-*ia*, -*ius*, -*ica*, -*icus*, -*ina*, -*inus*, -*ita*, -*itus*, terminations used in making specific names which are derived from the name of a river or other body of water, a province, a country, or a kingdom; e. g., *arabicus*.

-*ace*, -*ide*, -*ine*, suffixes used in botany to designate a family when the name taken ends in Latin -*is* or *is* (genitive case, *id est*, *id est*); e. g., *Silvaceae* from *Silva*, *Berberaceae* from *Berberis*, *Tamariscineae* from *Tamarix*.

-*ae*, as a rule, these suffixes, together with *es*, are employed to designate botanic sub-families, tribes, and sub-tribes; e. g., *Roseae* from *Rosa*.

-*ide*, -*ina*, the suffixes added to the name of the earliest known or most characteristic genus to designate

zoologic families or sub-families; e. g., *Strax*, *Straxia*, *Straxidae*, *Bucerotidae*, *Bucerotidae*.

-*ites*, -*itis*, frequently employed to designate fossil organisms analogous to the living forms whose generic name is the radical to which *ites* is appended. They are rarely used with specific names.

Mutatis char., *mutatis characteribus*, when following a specific name signifies a change in the diagnostic characters of a species.

-*astrum*, -*oidea* or -*oides*, -*oidalis*, -*oideum*, -*opsis*, terminations employed in forming generic, sub-generic or specific names after a Greek derivative. Bourguinat suggests that *astrum* be reserved to be appended to the name of a genus to indicate its typical sub-division. *Opsis* and *oides* should be reserved for sub-divisions of a genus which resemble another genus, by adding them to the name of that other genus when it is of Greek origin.

-*oides* is preferably reserved for specific names of Greek or barbarous (never Latin) origin.

(a) When the radical of the specific name is the name of a genus which it resembles; e. g., *Salix myrsinoides*, *Bupleurum ranunculoides*, *Malva abutiloides*, *Thuja cupressoides*.

(b) When the radical is the name of another species which the new one resembles. *Helix caraculoides*, a species like *H. caraculensis*.

(c) When the radical of the specific name is a Greek word signifying an animal, organ, part, object, as *Potentilla arachnoides*, *Frenanthes dentoides*, *Jungermannia coarctata*, *Withynodes rhomboides*, *Sterigmodes pyramuloides*, *Dendroideus*.

Only one apparent exception to the compounding of Greek and Latin has been conserved by usage; viz. *aroides* from *arum* and *aroides*; this has arisen from the absence of euphony in the correct form, *aroides* (*arum* and *aroides*).

pro-parte, for a part, when following a specific name indicates that since its first application the group has been revised.

Pseudo-, a prefix employed in forming specific names before a Greek derivative.

-*pteria*, a termination frequently employed in the generic names of ferns, for the purpose of recalling the affinities of the genus.

sp. (i) In zoology, abbreviation of species, written when the specific name is not known or is wanting, or if placed after the name of the authority, as *Crania cranioides*, Linné sp., and cases that Linné is only to be credited with the specific name.

(a) In botany, species or specimen.

Sub-, a prefix employed in forming specific names before a Latin derivative. It may also be used in designating a new species before the name of another with which the first was in intimate relation. It is also used in the sense of nearly, *ie*, somewhat slightly. It has, moreover, a few legitimate Latin compounds which may be used for specific names, e. g., *subterraneus*, *subalpinus*, *subarcticus*, *subatlanticus*, *subdimidiatus*, *subjectus*, *submersus*, *subrotundus*, *substratus*.

Sub-sp., subspecies.

gen., genus.

var., variety, placed before the name of a plant or an animal indicates that it is a hybrid of doubtful origin.

THE PRACTITIONERS' MEDICAL DICTIONARY

A

A [*ā, āu, or āu, without*]. 1. The Greek letter *alpha*, called *alpha privative*, equivalent to the prefix *un-* or *in-*. It denotes absence or want of the thing or quality expressed by the root of the word. 2. Symbol of *argon*.

Aa [*ā-ā, of each*]. An abbreviation, written *aa*, used in prescriptions to denote repetition of the same quantity for each item.

Ab [*ab, from*]. A Latin preposition signifying *from*.

Abaca (*ab'-ak-ah*; Sp. pron., *ah-zah-kah'*). Manila hemp; also *Musa textilis*, the plant which produces it. See *Hemp*.

Abadie's Sign. Spasm of the levator palpebræ superiors in exophthalmic goiter.

Abaptistron (*ah-bap-tis'-ton*) [*ā, priv.; baptizō, immersed*]. A trephine so shaped that penetration of the brain is impossible.

Abarthrosis (*ah-ar-thro'-sis*) [*ab, from; arthrosis, a joint*]. Same as *Diarthrosis* or *Articulation*.

Abarticular (*ab-ar-tik'-u-lar*) [*ab, from; articulus, joint*]. Not connected with or not situated near a joint.

Abarticulation (*ah-ar-tik'-u-lā'-shun*) [*ab, from; articulus, joint*]. 1. Same as *Diarthrosis*; sometimes also a synonym of *Synarthrosis*. 2. A luxation.

Abasia (*ah-bā'-ze-ah*) [*ā, priv.; βάσις, a step*]. Motor incoordination in walking. See *Ataxia*. **A. atactica**, a form marked by awkwardness and uncertainty of movement. **A., Choreic**, that due to choreic cramps in the legs. **A., Paralytic**, that form in which the legs give way under the weight of the body and walking is impossible. **A., Paroxysmal Trepidant**, a form of *astasia-abasia* (*q. v.*) in which trepidation similar to that of spastic paraplegia stiffens the legs and prevents walking. **A., Trembling**, incapacity to walk on account of trembling of the legs.

Abasic (*ah-bā'-sik*) [see *Abasic*]. Pertaining to, or affected with, *abasia*.

Abaxial (*ah-ak'-se-ah*) [*ab, from; axis, an axle*]. Not situated in the line of the axis.

Abbé's Catgut Rings. Rings composed of 8 or 10 turns of heavy catgut in the shape of an oval, with inside diameter of two inches,

for use in intestinal anastomosis. **A.'s Condenser**, **A.'s Illuminator**, a system of lenses attached to a microscope for condensing the light upon an object. **A.'s, Lenses, Apochromatic**. See *Apochromatic Lens*. **A.'s Operation**, lateral anastomosis of intestine with catgut rings. **A.'s Test-plate**, an instrument for testing microscopic objectives for spheric and chromatic aberration, composed of a microscopic slide with 6 cover-glasses ranging from 0.06 to 0.024 mm. thick, silvered on one side. Delicate, parallel, ruled lines are cut through the silver film, thus making a kind of micrometer with transparent rulings.

Abdomen (*ab-do'-men*) [*abdere, to hide*]. The large inferior cavity of the trunk, extending from the brim of the pelvis to the diaphragm, and bounded in front and at the sides by the lower ribs and abdominal muscles, and behind by the vertebral column, the psoas and the quadratus lumborum muscles. It is artificially divided into 9 regions by two circular lines, the upper parallel with the cartilages of the ninth ribs, the lower with the iliac crests, and by two lines from the cartilages of the eighth rib to the center of Poupart's ligament. The regions thus formed are, above, the right hypochondriac, the epigastric, and the left hypochondriac; in the middle, the right lumbar, umbilical, and left lumbar; and below, the right inguinal, the hypogastric, and the left inguinal. **A., Accordion**, Kaplan's term for a swelling of the abdomen attended with flattening of the arch of the diaphragm and increased respiration. It is not due to the presence of gas nor to tumor, and disappears under anesthesia; nervous pseudotympany. **A., Boat-shaped**, **A., Carinate**. See under *Scaphoid*. **A. obstipum**, congenital shortening of the rectus abdominis muscle. **A., Pendulous**, a relaxed condition of the abdominal walls in which the latter hang down over the pubis. **A., Scaphoid**. See under *Scaphoid*. **A., Uncinate**, one in which the terminal segments and those next to them are turned under the others.

Abdominal (*ab-dom'-in-al*) [*abdomen*]. Pertaining to or connected with the abdomen. **A. Aneurysm.** See *Aneurysm*. **A. Aorta,** the part of the aorta below the diaphragm. **A. Aponeurosis.** See *Aponeurosis*. **A. Bandage.** See *A. Binder*. **A. Binder,** a broad bandage of muslin or flannel applied to the abdomen for making pressure after delivery or after an operation. Sometimes a many-tailed bandage is used. **A. Brain,** the solar plexus. **A. Breathing.** See *A. Respiration*. **A. Cavity,** the cavity within the peritoneum. **A. Compress,** a form of local pack, made by forming folds of a coarse linen towel of sufficient breadth to reach from the ensiform cartilage to the pubis; one of the folds is then wrung out of cold water, applied, and the remainder is rolled around the body so as to retain it in position. **A. Dropsy,** ascites. **A. Gestation.** See *Pregnancy*. **Extrauterine.** **A. Hysteria,** a hysterical condition simulating peritonitis, in which the abdomen becomes extremely painful to the touch, swollen, and distended with gas. **A. Line,** the linea alba. **A. Muscles,** the internal and external obliques, the transversalis, rectus, pyramidalis, and quadratus lumborum. **A. Press.** See *Prelum abdominale*. **A. Reflex.** See *Reflexes*. **A.**

ABDOMINAL REGIONS.

Regions. See *Abdomen*. **A. Respiration,** respiration carried on chiefly by the diaphragm and abdominal muscles. **A. Ring, External,** a triangular opening in the fibers of the aponeurosis of the external oblique muscle, transmitting the spermatic cord of the male and the round ligament of the female. **A. Ring, Internal,** an oval aperture in the fascia transversalis that transmits the spermatic cord of the male and the round ligament of the female. **A. Section.** See *Celiotomy*. **A. Surgery,** the branch of surgery that deals with the lesions of the abdominal viscera and the operations performed upon them through incisions in the abdominal walls. **A. Typhus,** enteric fever.

Abdominoanterior (*ab-dom-in-o-an-te'-re-or*). Having the belly forward (used of the fetus in the womb).

Abdominogenital (*ab-dom-in-o-jen'-it-al*). Relating to the abdomen and the genitalia. **A. Nerve, Inferior,** the ilioinguinal nerve. **A. Nerve, Superior,** the iliohypogastric nerve.

Abdominoposterior (*ab-dom-in-o-pos-te'-re-or*). Having the belly toward the mother's back (used of the fetus in the womb).

Abdominoscrotal (*ab-dom-in-o-skro'-tal*). Relating to the abdomen and the scrotum. **A. Muscle,** the cremaster muscle.

Abdominothoracic (*ab-dom-in-o-tho-ras'-ik*). Relating to the abdomen and thorax.

Abdominovescinal (*ab-dom-in-o-ves'-ik-al*). Relating to the abdomen and the urinary bladder. **A. Pouch,** a fold of the peritoneum in which are comprised the urachal fossas.

Abducens (*ab-duk'-sens*) [L., "leading away"]. A term applied to certain muscles, or their nerves, that draw the related part from the median line of the body. Also, the sixth pair of nerves supplying the external recti of the eyes. **A. oculi,** the external rectus muscle of the eye.

Abduct (*ab-duk'*) [*abducere*, to lead away]. To draw away from the median line.

Abduction (*ab-duk'-shun*) [*ab*, from; *ducere*, to lead]. 1. The withdrawal of a part from the axis of the body. 2. The recession or separation from each other of the parts of a fractured bone.

Abductor (*ab-duk'-tor*). See *Abducens*. **A. digiti** (*dij'-it-i*) *quin'ti*, *hallu'cis*, *in'dicis*, *min'im'i digiti*, *pol'licis*. See *Muscles*, *Table of*.

Abernethy's Fascia. The subperitoneal areolar tissue that separates the external iliac artery from the iliac fascia overlying the psoas. **A.'s Sarcoma,** a circumscribed fatty tumor found chiefly on the trunk.

Aberrant (*ab-er'-ant*) [*ab*, from; *errare*, to wander]. Deviating from the normal or regular type in appearance, structure, course, etc., as the *aberrant* duct of the testis or liver, *aberrant* arteries, etc.

Aberration (*ab-er-a'-shun*) [see *Aberrant*]. Deviation from the normal; mental derangement; fetal malformation; vicarious menstruation; escape of the fluids of the body by an unnatural channel. In optics, any imperfection of focalization or refraction of a lens. **A., Chromatic,** the dispersion arising from unequal refraction of light of different parts of the spectrum. The violet rays, being more refrangible than the red rays, are brought to a focus nearer the lens, and the image is surrounded by a halo of colors. **A., Dioptric.** See *A., Spheric*. **A., Distastial,** indistinct vision due to distance. **A., Lateral,** a deviation of a ray in any direction from the axis measured in the focal plane perpendicularly to the axis. **A., Longitudinal,** a deviation of a ray from the focus, measured along the axis above or be-

sensitiveness. 3. A remedy or agent that allays irritation.

Abirritation (*ab-ir-ri-ta'-shun*) [see *Abirritant*]. Diminished tissue-irritability, atony or asthenia.

Ablactation (*ab-lak-ta'-shun*) [*ab.* from; *lactare*, to give suck]. The weaning of a child. The end of the suckling period.

Ablate (*ab-lā't*) [*ab.* from; *latum*, from *ferre*, to bear]. To remove, to cut off.

Ablation (*ab-la'-shun*) [see *Ablate*]. Removal of a part, as a tumor, by amputation, excision, etc.

Ablatio retinæ (*ab-lā' she-o ret-in'-e*). Detachment of the retina.

Ablepharia (*an-blef'-a'-re-ah*) [*ā*, priv.; *βλέφω*, the eyelid]. A congenital condition in which there is a total absence either of eyelids or of the interpalpebral fissure. **A.**, **Partial**, a congenital defect in one or more of the eyelids.

Ablepharon (*an-blef'-ar-on*) [see *Ablepharia*]. Absence of the eyelids.

Ablepharous (*an-blef'-ar-us*) [see *Ablepharia*]. Without eyelids.

Ablepsia (*an-blep'-se-ah*) [*βλέψω*, without sight]. 1. Blindness. 2. Dulness of perception.

Abluent (*ab'-yu-ent*) [*abluerē*, to wash away]. Detergent. That which cleanses or washes away.

Ablution (*ab-lū'-shun*) [see *Abluent*]. Washing or cleansing the body. Separation of chemi-impurities by washing.

Abnormal (*ab-nor'-mal*) [*ab.* away from; *norma*, a law]. Not normal, not conformable with nature or with the general rule.

Abnormity, Abnormality (*ab-nor'-mit-ē*, *ab-nor'-mal-ī-tē*). The quality of being abnormal, a deformity or malformation.

Abomasum (*ab-o-mā'-sum*) [*ab.* away; *omāsum*, paunch]. The first or proper digestive stomach of ruminating mammals, also called "fourth," or "true," stomach.

Aboral (*ab-ō'-ral*) [*ab.* away from; *os*, the mouth]. Opposite to, or remote from, the mouth.

Abort (*ab-or'*) [*ab.* from; *ortus*, from *oriri*, to grow]. 1. To miscarry; to expel the fetus before it is viable. 2. To prevent full development, as of a disease. 3. To come short of full development.

Abortient (*ab-or'-shent*) [see *Abori*]. Abortive; abortifacient.

Abortifacient (*ab-or-te-fā'-shent*) [*abortus*; *facere*, to make]. 1. Causing abortion. 2. A drug or agent inducing the expulsion of the fetus.

Abortion (*ab-or'-shun*) [*abortus*, a miscarriage]. The expulsion of the ovum before the child is viable, that is, any time before the end of the sixth month. By some authors expulsion of the ovum during the first 3 months is termed *abortion*; from this time to viability it is termed *imature delivery*, or *miscarriage*, and from the period of viability to that of maturity, *premature delivery*. **A.**, **Accidental**,

See **A.**, **Spontaneous**. **A.**, **Artificial**, that produced intentionally. **A.**, **Criminal**, that not demanded for therapeutic reasons. **A.**, **Epidemic**, the occurrence of many cases at about the same time, due to wide-spread distress, excitement, or privation, or to some form of poisoning, such as ergotism. **A.**, **Habitual**, repeated abortion in successive pregnancies, usually due to syphilis. **A.**, **Incomplete**, when the membranes or the placenta is retained. **A.**, **Induced**. See **A.**, **Artificial**. **A.**, **Inevitable**, when the embryo or fetus is dead, or when there is an extensive detachment or rupture of the ovum. **A.**, **Missed**, the death of the fetus and not followed within two weeks by its expulsion. **A.**, **Partial**, the premature loss of one fetus in a case of multiple gestation. **A.**, **Spontaneous**, that not induced by artificial means. **A.**, **Therapeutic**, induced abortion to save the mother's life. **A.**, **Tubal**, the escape of a fertilized ovum through the abnormal opening of the oviduct into the peritoneal cavity.

Abortionist (*ab-or'-shun-ist*) [see *Abortion*]. One who criminally produces abortions, especially one who follows the business of producing abortions.

Abortive (*ab-or'-iv*) [see *Abortion*]. Prematurely born, coming to an untimely end, incompletely developed, cutting short the course of a disease; abortifacient.

Abortus (*ab-or'-tus*) [L.]. An aborted fetus, abortion.

Aboulia (*ah-boū'-le-ah*). See *Abulia*.

Aboulomania (*ah-boū'-lo-mā'-ne-ah*). See *Aboulomania*.

Abrachia (*ah-brā'-ke-ah*) [*ā*, priv.; *βραχία*, arm]. The condition of an armless monster.

Abrachiocephalia (*ah-brā'-ke-o-sef'-ā'-le-ah*) [*abrachius*, wingless, head]. Headless and armless.

Abrachius (*ah-brā'-ke-us*). See *Abrachia*.

Abrasio (*ah-brā'-ze-o*) [L.]. An abrasion. **A.**, **corneæ**, a scraping off of the superficial epithelium of the cornea.

Abrasion (*ah-brā'-shun*) [*ab.* from; *radere*, to rub]. The rubbing off of the cutaneous or mucous surface by an injury.

Abrin (*ah'-brin*). The chemie ferment or poisonous principle of jequirity. It has been employed in the study of immunity.

Abrotanum (*ab-rof'-an-um*) [*ἀβροτάνος*, an aromatic plant]. The plant called southernwood, *Artemisia abrotanum*.

Abrus (*ah'-brus*) [*αβρός*, pretty]. Jequirity; Indian licorice. The seeds of *A. precatorius*, or wild licorice. Its properties are thought to be due to the presence of certain ferments. See *Abrin*. Infusions applied to the conjunctiva or to any mucous surface induce violent purulent inflammation with growth of false membrane. It is used in producing artificial conjunctivitis.

Abscess, Abscessus (*ab'-ses*, *ah-ses'-us*) [*ab-cessus*, a departure or separation]. A localized collection of pus surrounded by a wall of

lymph. Syn., *Epyema*; *Gathering*. According to location abscesses are named *dorsal*, *mammary*, *ischioanal*, *perityphlitic*, *retropharyngeal*, etc. **A.**, *Acute*, one resulting from an acute inflammation of the part in which it is formed. Syn., *Abscessus per fluxum*. **A.**, *Alveolar*, abscess in the gum or alveolus. **A.**, *Amebic*, a variety of abscess found in the liver and lung and containing amebas. **A.**, *Anorectal*, one of the celluloadipose tissue near the anus. **A.**, *Arthrifluent*, a wandering abscess having its origin in a diseased joint. **Abscessus arthriticus**, Musgrave's term for intestinal abscesses due to "gouty dysentery." **A.**, *Atheromatous*, an area of softening in the wall of a vessel the result of sclerotic endarteritis. **A.**, *Bicameral*, one with two pockets. **A.**, *Biliary*, one connected with the gallbladder or a bile-duct. **A.**, *Brodie's*, chronic abscess of bone, most frequently of the head of the tibia. **A.**, *Bursal*, abscess in the bursae. **A.**, *Canalicular*, mammary abscess that communicates with a milk-duct. **Abscessus carniformis**, Severinus' name for a hard sarcoma of the joints. **A.**, *Chronic*. **A.**, *Cold*, one of slow and apparently non-inflammatory development, generally about a bone, joint, or gland. It is usually tuberculous and contains cheesy material. **A.**, *Circumscribed*, one that is limited by an exudation of lymph. **A.**, *Cold*. See *A.*, *Chronic*. **A.**, *Congestive*, one in which the pus appears at a point distant from where it is formed. **A.**, *Embolic*, one formed at the seat of a septic embolus. **A.**, *Fixation*, an abscess produced by the subcutaneous injection of an irritant as a treatment of grave septicemia. **A.**, *Glandular*, one formed about a lymph-gland. **A.**, *Gravitation*, one in which pus formed in one part of the body tends to migrate, usually to portions deeper or lower down, in the direction gravity would take it. **A.**, *Hematic*, one due to an extravasated blood-clot. **A.**, *Hemorrhagic*, one containing blood. **A.**, *Idiopathic*, one not attributable to any disease. **A.**, *Iliac*, a wandering abscess of the iliac region. **A.**, *Infecting Mitral*, one due to a lymph embolus caused by endocarditis. **A.**, *Intramastoid*, one of the mastoid process of the temporal bone. **A.**, *Lumbar*, a wandering abscess of the lumbar region. **A.**, *Lymphatic*. 1. The suppuration of a lymphatic gland. 2. An enlarged bursa mucosa. **A.**, *Marginal*, one located near the anal orifice. **A.**, *Mastoid*, suppuration occurring in the cells of the mastoid portion of the temporal bone. **A.**, *Metastatic*, an abscess secondary to pyemia and ulcerative endocarditis, but not occurring through septicemia. It is usually of embolic origin and generally located in the lungs and liver. **A.**, *Miliary*, a small embolic abscess. **A.**, *Otic Cerebral*, **A.**, *Otitic Cerebral*, an abscess of the brain following a purulent disease of the inner ear. **A.**, *Page's*. See *A.*, *Residual*. **A.**, *Parametric*, **A.**, *Parametric*, a form occurring

frequently between the folds of the broad ligament of the uterus or in the neighboring cellular tissue. **A.**, *Paranephric*, one occurring in the tissues about the kidney. **A.**, *Perimetric*, **A.**, *Perimetritic*, pus within the peritoneum originating from inflammation of the peritoneal covering of the uterus. **A.**, *Perinephric*, one occurring in the region immediately surrounding the kidney. **A.**, *Peripleuritic*, one that occurs beneath the parietal pleura as the result of pleurisy, a diseased rib, or an injury. **A.**, *Periproctitic*, one in the loose areolar tissue surrounding the lower part of the rectum. **A.**, *Peritoneal*, a collection of softened exudate which has become encysted in cases of peritonitis. **A.**, *Peritonsillar*, one that forms in acute tonsillitis around one or both tonsils. **Abscessus pneumococcalis**, one due to infection by pneumococci. **A.**, *Postcecal*, one located back of the cecum. **A.**, *Posttyphoid*, chronic abscess following typhoid. **A.**, *Pre-lacrimal*, an abscess due to caries of the lacrimal or the ethmoid bone, producing a swelling at the inner canthus immediately below the upper margin of the orbit. **A.**, *Primary*, one formed at the seat of pyogenic infection. **A.**, *Psoas*, one arising from disease of the lumbar or lower dorsal vertebrae, the pus descending in the sheath of the muscle, and usually pointing beneath Poupart's ligament. **A.**, *Pyemic*. See *Pyemia*. **A.**, *Residual*, one formed in or about the residues of former inflammation. **A.**, *Septicemic*, one resulting from septic infection or accompanying septicemia. **A.**, *Spermatic*, one involving the seminiferous tubules. **A.**, *Spinal*, one due to necrosis or disease of a vertebra. **A.**, *Spirillar*, Verneuil's name for an abscess containing spirilla from the saliva. **A.**, *Stitch*, one formed about a stitch or suture. **A.**, *Subaponeurotic*, one beneath an aponeurosis or fascia. **A.**, *Subareolar*, one beneath the alveolar epithelium of the nipple. **A.**, *Subfascial*, one beneath a fascia, *profascial abscess*. **A.**, *Submammary*, one lying between the mammary gland and the chest-wall. Syn., *Postmammary abscess*, *Retromammary abscess*. **A.**, *Subpectoral*, one beneath the chest muscles. **A.**, *Subperitoneal*, one arising between the parietal peritoneum and the abdominal wall. Syn., *Preperitoneal abscess*. **A.**, *Subphrenic*, one located beneath the diaphragm. **A.**, *Sudoriparous*, an abscess due to inflammation of obstructed sweat-glands. **A.**, *Sympathetic*, a secondary or metastatic abscess at a distance from the part at which the exciting cause has acted (e.g., a bubo). **A.**, *Tuberculous*. See *A.*, *Chronic*. **A.**, *Tympanitic*, one containing gas generated by putrefaction. Syn., *Abscessus flatuosus*; *Gas abscess*. **A.**, *Urethral*. 1. Suppuration of a urethral lacuna, a *lacunar abscess*. 2. One involving the circumurethral tissue. **A.**, *Urinary*, one resulting from ext

urine. **A., Urinous**, one containing urine mingled with the pus. **A., Verminous, A., Worm**, one containing intestinal worms, from communication with the intestine. **A., Wandering**, one in which the pus has traveled along the connective-tissue spaces and points at some locality distant from its origin. Syn., *Hypostatic abscess*, *Abscessus per congestum*; *Abscessus per decubitum*.

Abscissæ (ab-sis'-sæ) [ab, away; scindere, to cut]. The transverse lines cutting vertical ones at right angles, to show by a diagram the relations of two series of facts, as, e. g., the number of pulse-beats or the temperature record in given periods of time.

Abscission (ab-sish'-un) [see *Abscissor*]. Removal of a part by cutting.

Absinthe (ab'-sinth). See under *Abrinthum*.

Absinthiate (ab-sin'-the-ät). A salt of absinthic acid.

Absinthiated (ab-sin'-the-ät). 1. Mixed with absinthe. 2. Containing wormwood.

Absinthin (ab-sin'-thin) [*absinthium*]. A bitter crystalline principle obtainable from wormwood. See *Absinthium*.

Absinthism (ab-sin'-thizm). A disease similar to alcoholism, the result of the excessive use of absinthe. It is characterized by general muscular debility and mental disturbances, that may proceed to convulsions, acute mania, or general paralysis.

Absinthium (ab-sin'-the-um) [L.]. Wormwood. The leaves and tops of *Artemisia absinthium*. Absinthium contains a volatile oil and an intensely bitter principle, *absinthin*, $C_{20}H_{32}O_6$, which is a narcotic poison. Absinthium increases cardiac action and produces tremor and epileptiform convulsions. Dose 20-40 gr. (1-2 g.) in infusion. It is used as a stomachic tonic. Unoff. *Absinthe*, a French liqueur, is an alcoholic solution of the oil exhibited with oils of anise, marjoram, and other aromatic oils.

Absinthol (ab-sin'-thol), $C_{15}H_{24}O$. The principal constituent of oil of wormwood, it is isomeric with ordinary camphor.

Absorb (ab-sorb') [*absorbere*, to suck up]. To suck up or imbibe, to take within one's self.

Absorbe-facient (ab-sorb-e-fä'-sient) [*absorptio*, absorption; *facere*, to make]. Favoring or teaching to produce absorption.

Absorbent (ab-sor'-bent) [see *Absorb*]. 1. Absorbing, capable of absorbing. 2. An organ or part that absorbs. 3. A term applied to the lacteal and lymphatics. 4. In materia medica, a drug or medicine that produces absorption of diseased tissue. **A. Glands**. See *Lymphatics*. **A. System**, the lacteals and lymphatics with their associated glands.

Absorptiometer (ab-sorp'-she-om'-e-ter) [*absorptio*, absorption; *metron*, a measure]. A device for measuring the thickness of the layer of liquid that is taken up between two glass plates by capillary attraction. Used in conjunction with a spectrophotometer, it serves as a *beam-photometer*.

Absorption (ab-sorp'-shun) [see *Absorb*]. The permeation or imbibition of one body by another. **A., Chylous**, the act or process of the entrance of the end-globules of the chyle into the central canals of the intestinal villi. **A., Coefficient of**, that number which represents the volume of a gas absorbed by a unit volume of water at 0° C. and at a barometric pressure of 760 mm. **A., Excrementitial**. 1. The absorption of fluid excretions by the mucosa. 2. The absorption of excretions or morbid products (bile, pus) by the blood. Syn., *Pathologic absorption*, *Absorptio morbo-sa*. **A., External**, the taking up by the skin or mucous surfaces of pabulum or medication applied to the exterior of the body or of an organ. **A., Internal**. 1. The absorption of waste-products by the tissues; absorption of decomposition of disassimilation. 2. The taking up of pabulum by the tissues, absorption of nutritive, molecular, nutritive, organic absorption. **A., Interstitial**, the removal by the absorbed system of effete matter. **A. Lines, A. Bands**, dark lines of the spectrum, called Fraunhofer's lines, caused by the arrest or absorption of the ethereal waves of certain lengths and rapidities, mainly by vapors of the sun's atmosphere. **A., Lymphatic**, that which occurs in lymphatic vessels. **A., Physiologic**, a phenomenon forming an important part of the digestive process, caused in part by the vital activity of the epithelial cells and in part by the physical laws of imbibition, diffusion, and osmosis. Syn., *Absorptio sana*. **A., Ulcerative**, that by which an ulcer forms or extends its area.

Absorptive (ab-sorp'-tiv) [see *Absorb*]. Having the power or function of absorbing.

Abstergent (ab-ster'-gent) [ab, from; *tergere*, to cleanse]. Cleansing; detergent. See *Detergent*.

Abstersive (ab-ster'-serv) [*absterreus*]. Abstergent.

Abstract (ab'-strakt) [*abstrahere*, to draw away]. In pharmacy, a solid preparation in which two parts of the drug are represented by one part of the abstract (which is compounded with sack-sugar). Abstracts are double the strength of the fluid extracts.

Abterminal (ab-ter'-min-al) [ab, from; *terminus*, end]. Passing from terminus into muscular tissue (used of electric currents).

Abulia (ab-bu'-le-ah) [a, priv.; *voluntas*, will]. Loss or defect of will-power.

Abulic (ab-bu'-lik) [see *Abulia*]. Characterized by or affected with abulia.

Abulomania (ab-bu'-le-mä'-ne-ah) [*abuliea*, *mania*, madness]. A disease of the mind characterized by imperfect or lost will-power.

Abuse (ab-us') [*abusus*, a using up]. Rape. **A., Self-**, masturbation.

Acacia (ah-ka'-she-ah) [L.]. A large genus of leguminous trees, shrubs, and herbs, many of them Australian or African. A number of the species are medicinal, and some are

poisonous. The bark is usually very astringent. Gum-arabic is produced by various species—*A. kobeek*, *A. nilotica*, *A. vera*, and *A. verck*. *A. senegal* also furnishes gum-arabic, a nearly white, transparent gum, soluble in water. It is used in the manufacture of mucilage, and contains *arabin*, $C_{12}H_{22}O_{11}$, identical in composition with cane-sugar. *A. anthelmintica*. See *Mussanin*. *A. catechu*. See *Catechu*. *A.*, **Mucilage of** (*mucilago acacie*, U.S.P.), *acacia*, 34; water, to make 100 parts; incompatible with alcoholic tinctures. *A.*, **Syrup of** (*syrupus acacie*, U.S.P.), mucilage, 25, simple syrup, 75. It is used in various mixtures as a demulcent and to suspend insoluble powders.

Acalypha (*ah-kal'-i'-ah*) [*ἀκαλῖφις*, unveiled]. A genus of euphorbiaceous plants. *A. fruticosa*, of India, is useful in dyspepsia and diarrhea, and is tonic and alterant. *A. hispida* has similar uses. *A. indica* is a plant common in India. The leaves are expectorant, emetic, laxative. *A. virginica*, of North America, is diuretic and expectorant. Dose of the *fluid-extract* 10 min.-1 dr. (0.6-4.0 Cc.); of the *juice* (from *acalypha*), for an infant, 1 dr. (4 Cc.).

Acanthion (*ah-an'-the-on*) [*ἀκανθίων*]. Pertaining to the acanthion.

Acanthion (*ah-an'-the-on*) [*ἀκανθίων*, a little thorn]. A point at the base of the nasal spine.

Acanthoma (*ah-an'-tho'-mah*) [*ἀκανθώ*, a spine]. A localized excessive growth in any part of the prickly-cell layer of the skin.

Acanthosis (*ah-an'-tho'-sis*) [*ἀκανθώ*, a spine]. Any skin disease marked by abnormalities in the prickly-cell layer. *A. nigricans*, a general pigmentation of the skin, with papillary, mole-like growths.

Acapnia (*ah-kap'-ne-ah*). A condition of diminished carbon dioxide in the blood.

Acardia (*ah-kar'-de-ah*) [*ἀ*, priv.; *καρδία*, heart]. Congenital absence of the heart.

Acardiac (*ah-kar'-de-ah*). 1. Having no heart. 2. A fetus with no heart.

Acardiacus (*ah-kar'-di'-ak-us*) [see *Acardia*]. A synonym employed by German writers for cephalosite. *A. acephalus*, one in which the head is wanting, the thorax rudimentary, the pelvis and contiguous parts perfectly formed. *A. amorphus*, a shapeless lump with only rudiments of organs.

Acardius (*ah-kar'-de-us*). Congenital absence of the heart. An acardiac monster.

Acariasis (*ah-ar'-i'-as-is*). See *Mange*.

Acarid, **Acaridan** (*ah-ar'-id*, *ah-ar'-id-on*) [*ἀκαρίς*, small, tiny]. Pertaining to *Acarus*.

Acarinosis (*ah-ar'-in'-o'-sis*) [*acarus*, a mite]. Any disease, as the itch, produced by a mite or acarid.

Acarodermatitis (*ah-ar'-o'-der-mat-i'-tis*) [*acarus*, a mite; *dermatitis*]. Dermatitis caused by acari, or mites.

Acaroid (*ah-ar'-oid*) [*acarus*; *είδος*, like]. Mite-like. *A. Gum*, Botany Bay gum, resinolite. An aromatic resin used in Australia as a remedy for gastric troubles, intestinal catarrhs, diarrheas, etc. Dose 8-16 gr.

(0.5-1.0 Gm.) in alcoholic solution. Unof. Benzoic acid is prepared from it, and it is said to have the properties of storax and balsam of Peru. *A. Resin*. See *A. Gum*.

Acarpia (*ah-karp'-e-ah*) [*ἀκαρπία*]. Sterility; barrenness; unfruitfulness.

Acarus (*ah'-ar-us*) [*ἀ*, priv.; *κατείνω*, to cut (because so small)]. The mite, or tick, a parasite of man and animals. *A. scabiei*, *Sarcoptes scabiei*, the itch-mite, a small parasite with numerous sharp tubercles, spines, and hairs on the dorsal surface. See *Scabies*.

Acataphasia (*ah-kat'-af'-e-ah*) [*ἀ*, priv.; *ἀντά*, after, *φῶσις*, utterance]. A disorder in the syntactical arrangement of uttered speech, due to some central lesion.

Acathectic (*ah-kat'-hek'-tik*) [*ἀκαθεκτός*, unrestrained]. A term applied by Liebermeister to that form of icterus caused by pathologic changes in the liver-cells, through which they become unable to retain their secretion.

Acaudal, **Acaudate** (*ah-kaw'-dal*, *ah-kaw'-dat*) [*ἀ*, priv.; *cauda*, a tail]. Tailless.

Acceleration (*ah-sel'-er-a'-shun*) [*accelerare*, to hasten]. Quickening, as of the rate of the pulse or of the respiration.

Accelerator (*ah-sel'-er-a'-tor*) [see *Acceleration*].

1. That which accelerates. 2. A muscle which hastens a physiologic discharge. *A. Nerves*, nerves passing from the medulla to the heart and conducting stimuli that cause acceleration of the heart's action. *A. partus*, an abortifacient or ecbolic agent. *A. urinæ*, a muscle of the penis the function of which is to expel the last drops in urination, to expel the semen, and to assist erection. The sphincter vaginae is its analog in the female.

Accentuation (*ah-sen-tu-a'-shun*) [*accentuare*]. Increased loudness or distinctness.

Accessory (*ah'-ses-o-re* or *ah'-ses'-o-re*) [*accessorius*]. A term applied to certain glands, muscles, ducts, nerves, arteries, etc., that are auxiliary in function, course, etc., to the principal. Certain small muscles, as the lumbricals, are regarded as accessory to more important muscles.

Accidental (*ah-se-dent'-al*) [*accidentalis*]. 1. Due to, or caused by, an accident. 2. Intercurrent; having no essential connection with other conditions or symptoms.

Accipiter (*ah-sip'-it-er*) [L., "a hawk"]. A facial bandage with tails radiating like the claws of a hawk. *A. quinceps*, a five-headed accipiter bandage. *A. triceps*, a three-headed accipiter bandage.

Acclimatation, **Acclimation**, **Acclimatization** (*ah-kli-mat-a'-shun*, *ah-kli-mat'-shun*, *ah-kli-mat-iz-a'-shun*) [*ad*, to; *clima*, climate]. The process of becoming accustomed to the climate, soil, water, etc., of a country to which a plant, animal, person, or a people has removed.

Accommodation (*ah-em-o-dat'-shun*) [*accommodare*, to adjust]. Adaptation or adjustment, particularly the adjustment of the eye for different distances. *A.*

commodation of either eye separately. **A.**, **Asthenopia** of, subnormal power of the function of accommodation, or the pain or discomfort from accommodative effort. **A.**, **Binocular**, the combined accommodation of the two eyes. **A.**, **Histologic**, the occurrence of changes in the morphology and function of cells following changed conditions. **A.**, **Negative**, the opposite of positive accommodation, the refractive power of the eye being lessened. **A. of the Eye**, that

THE LEFT HALF REPRESENTS THE EYE AT REST; THE RIGHT, DURING ACCOMMODATION

function of the ciliary muscle and lens whereby objects at different distances are clearly seen. It depends upon the inherent elasticity of the lens, which when the ciliary muscle of an emmetropic eye is at rest, is adapted to the proper focalization of theoretically parallel rays of light. Objects nearer, to be clearly seen, require a greater refracting power on the part of the eye because the rays from such objects are more divergent. This additional refracting power is gained by an increased anteroposterior diameter of the lens, brought about by the contraction of the ciliary muscle, which occasions a loosening of the suspensory ligament and a thickening of the lens by its own elasticity. **A.** **Phosphenes**, the peripheral light streak seen in the dark after the act of accommodation. **A.**, **Positive**, that when the eye being focused for a more distant object is required for fixation upon a nearer point. **A.**, **Range of Relative**, the range of accommodation at the command of the eye for any particular degree of convergence. **A.**, **Region of**, the extent controlled by the eye within which it distinguishes objects clearly from the state of rest to that of maximum accommodation. **A.**, **Spasm of**, a term used to express excessive or persistent contraction of the ciliary muscle, following the attempt to overcome error of refraction. It stimulates myopia. **A.**, **Subnormal**, deficient power of accommodation. **A.**, **Supernormal**, excessive power of accommodation. **A.**, **Theory of, Helmholtz's**, that the increased convexity of the lens is produced by a relaxation of the suspensory ligament, thus removing the influence which tends to flatten the lens and permitting the latter by its elasticity to become more convex. **A.**, **Theory of, Schoen's**, that the contraction of the ciliary muscle produces the same effect on the lens as is produced upon a rubber ball when held in both hands and compressed

with the fingers. **A.**, **Theory of, Tscherning's**, by the contraction of the anterior part of both the radiating and circular fibers of the ciliary muscle the ciliary processes are drawn backward, and the suspensory ligament pulled backward and outward, pressure of the anterior portion of the muscle causes increased convexity of the lens.

Accouchement (a-koo-shu-men) [Fr.]. The French term for childbirth. **A. forcé**, rapid and forcible delivery with the hand.

Accoucheur (a-koo-shur) [Fr.]. A professional male assistant at childbirth.

Accoucheuse (a-koo-shu) [Fr.]. A midwife.

Accretion (ak-re'-shun) [ad. to, *crecere*, to increase]. 1. A term denoting the manner by which crystalline and certain organic forms increase their material substance. 2. The adherence of parts normally separate. 3. An accumulation of foreign matter in any cavity.

Accumulation (ak-u-mu-la'-shun) [accumulate, to heap up]. An amassing or collecting together. **A.**, **Fecal**, an excessive aggregation of feces in the large intestine, coprostasis.

Accumulator (ak-u'-mu-la-tor) [accumulate, to heap up]. An apparatus to store electricity.

A. C. E. Mixture. An anesthetic mixture composed of alcohol, 1 part; chloroform, 2 parts; ether, 3 parts. See *Anesthetic*.

Acelia, **Acœlia** (ah-se'-le-ah) [d. priv.; *kœlia*, a cavity]. The absence of a natural cavity. Syn., *Acelusis*.

Acentric (ah-sen'-trik) [d. priv.; *akron*, center]. Not eccentric, not originating in, or pertaining to, a nerve-center, peripheric.

Acephalia (ah-se'-a'-le-ah) [d. priv.; *akphalē*, head]. Absence of the head.

Acephalism (ah-sef'-al-izm). See *Acephalia*.

Acephalobrachia (ah-sef'-al-o-bra'-ke-ah) [d. priv.; *akphalē*, head; *brachion*, arm]. Absence of the head and arms.

Acephalobrachius (ah-sef'-al-o-bra'-ke-us). A monster with neither head nor arms.

Acephalocardia (ah-sef'-al-o-kar'-de-ah) [d. priv.; *akphalē*, head; *kardia*, heart]. Absence of the head and heart.

Acephalocardius (ah-sef'-al-o-kar'-de-us). A monster with neither head nor heart.

Acephalocheiria, **Acephalochiria** (ah-sef'-al-o-ki'-re-ah) [d. priv.; *akphalē*, head; *cheir*, hand]. Absence of the head and hands.

Acephalocheirus, **Acephalochirus** (ah-sef'-al-o-ki'-rus) [see *Acephalocheiria*]. A monster with neither head nor hands.

Acephalocyst, **Acephalocystis** (ah-sef'-al-o-sist, ah-sef'-al-o-sist'-is) [d. priv.; *akphalē*, head; *kistis*, a bladder]. The bladderworm. A headless, sterile hydatid, found in the liver and other organs. **Acephalocystis plana**, Laverne's name for certain concretions found in the sheaths of tendons and in muscles. **Acephalocystis racemosa**, the hydatid mole of the uterus.

Acephalogaster (ah-sef'-al-o-gas'-ter) [d. priv.; *gaster*, belly]. A monster with neither head nor belly.

Acephalogasteria (ah-sef'-al-o-gas-te'-re-ah) [*ee* *Acephalogaster*]. Absence of the head and belly.

Acephalophorous (ah-sef'-al-oh'-or-us) [*ah*, priv.; *cephalus*, head; *phero*, to bear]. Destitute of a distinct head.

Acephalopodia (ah-sef'-al-o-po'-de-ah) [*ah*, priv.; *cephalus*, head; *podis*, foot]. Absence of the head and feet.

Acephalopodius (ah-sef'-al-o-po'-de-us) [see *Acephalopodia*]. A monster with neither head nor feet.

Acephalorachia, Acephalorrhachia (ah-sef'-al-or-ah'-ra-ah) [*ah*, priv.; *cephalus*, head; *rachis*, spine]. Absence of the head and vertebral column.

Acephalostomia (ah-sef'-al-o-sto'-me-ah) [*ah*, priv.; *cephalus*, head; *stoma*, mouth]. Absence of the head, with a mouth-like opening on the superior aspect.

Acephalostomus (ah-sef'-al-o-sto'-mu-s) [see *Acephalostomia*]. A monster without a head, but with a mouth-like aperture.

Acephalous (ah-sef'-al-us) [*akēphalos*, headless]. Headless.

Acephalus (ah-sef'-al-us) [see *Acephalia*]. A species of omphalositic monsters characterized by complete absence of the head and usually of the upper extremities. It is the commonest condition among the omphalositic.

A. dibrachius, an acephalus with two upper limbs in a more or less rudimentary state.

A. dipus, an acephalus with two more or less developed lower extremities. **A. monobrachius**, one with one upper extremity, a cervical vertebra, and one or two more or less developed lower extremities. **A. monopus**, one with only one lower extremity, more or less developed. See *Acephalopodius*. **A. sympus**, one in which the trunk ends in a long conic point at the end of which are attached one or two feet.

Acercus (ah-ser'-kus) [*akēpaug*, without a tail]. A monstrosity without a tail or the coccygeal vertebra.

Acerdol (ah'-er-dol), MnO_2 , K_2O , KOH . An oxidation-product of potassium and manganese. It is used as an oxidizer and disinfectant.

Acerculus, A. cerebri (ah-ser'-yu-lus ser'-e-bri). Concrete matter near the base of the pineal gland, consisting of alkaline phosphates and carbonates with amyloid matter. Syn., *Brain-sand*.

Acescence (ah-se'-ens) [*acescere*, to grow sour]. 1. The process of becoming sour; the quality of being somewhat sour. 2. A disease of warts, whereby they become sour, owing to the agency of *Mycoderma aceti*.

Acesodyne, Acesodynous (ah-sef'-o-din, ah-sef'-od'-in-us) [*akērodynous*]. Allaying pain; anodyne.

Acetoma (ah-sef'-to-mah) [*akētoros*, curable]. The mass of young granulation tissue which later forms the cicatrix.

Acetabular (ah-sef'-ah'-u-lar) [*acetabulum*, a cup]. Pertaining to the acetabulum.

Acetabulum (ah-sef'-ah'-u-lum) [see *Acetabular*]. A cup-shaped depression on the outer aspect of the innominate bone for the reception of

the head of the femur. **A. cotyle**, the articular cavity of the innominate bone. **A. uterina**, a placental cotyledon.

Acetal (ah'-et-al) [*acetum*, vinegar]. 1. $C_6H_5O_2$. Ethidene diethylate, a colorless liquid with an ethereal odor, produced by the imperfect oxidation of alcohol under the influence of platinum black. It is sparingly soluble in water; boils at $104^\circ C$; sp. gr. at 20° is 0.8304. Its action is that of a soporific. Dose 1 dr. (4 Gm.). 2. A mixture said to consist of acetic ether and oils of cloves, bergamot, lavender, lemon, menthol, orange, rosemary, thyme, and absolute alcohol. **A., Dimethyl.** See *Methylal*.

Acetaldehyd (ah-sef'-al'-de-hid). The normal aldehyd; ethaldehyd. See *Aldehyd*.

Acetamid (ah-sef'-am-id), C_8H_9NO . A white, crystalline solid produced by distilling ammonium acetate, or by heating ethyl acetate with strong aqueous ammonia. It combines with both acids and metals to form unstable compounds.

Acetaminol (ah-sef'-am'-in-ol), $C_{10}H_{11}NO$. A reaction-product of paranitrobenzoyl chloride with eugenol-sodium, followed by reduction and acetylation. It occurs as white scales or crystalline powder, soluble in alcohol and insoluble in water, and melting at $166^\circ C$. It is used in pulmonary tuberculosis. Syn., *Para-acetamido-benzoyl-eugenol*; *Acetamido-benzoyl*.

Acetanilid (ah-sef'-an'-il-id), C_6H_5NO . Phenyl-acetamid. A white, crystalline solid, produced by boiling aniline and glacial acetic acid together for several hours, the crystalline mass being then distilled. It melts at 114° and boils at 259° . It is soluble in hot water, alcohol, and ether. Under the name *antifebrin* it is prescribed as an antipyretic. Dose 2-10 gr. (0.13-0.65 Gm.), not exceeding 30 gr. (2 Gm.) in the 24 hours; of the compound powder (*pulvis acetanilidi compositus*, U. S. P.) 7½ gr. (0.5 Gm.). **A., Ammoniated**, a mixture of acetanilid, 25 parts; ammonium carbonate, 10 parts; sodium bicarbonate, 5 parts; sugar of milk, 60 parts. It is recommended as causing less depression than acetanilid alone. **A., Monobromated.** See *Antiseptin*.

Acetate (ah'-et-ah) [see *Acetic*]. Any salt of acetic acid.

Acetic (ah'-et-ik) [*acetum*, vinegar]. Pertaining to *acetum* or vinegar; sour. See *Acid, Acetic*. **A. Acid Amid.** See *Acetamid*. **A. Acid Esters.** See *Methyl Acetate* and *Ether, Acetic*. **A. Acid Salts.** 1. Readily soluble crystalline salts formed from the bases. 2. Basic salts formed from iron, aluminium, lead, and copper; sparingly soluble in water. 3. Alkali salts, which have the property of combining with a molecule of acetic acid to produce acid salts. **A. Aldehyd.** See under *Aldehyd*. **A. Anhydrid**, $C_2H_2O_3$, a colorless, mobile liquid, highly refractive, and with an odor of acetic acid. Sp. gr. 1.080 at $15^\circ C$; boils at 136° - $138^\circ C$. Syn., *Acetyl oxid*; *Acetic oxid*; so-called *Anhydrous acetic acid*.

A. Ether. See under *Ether*. **A. Fermentation,** the development of acetic acid by the activity of the *Mycoderma aceti*. **A. Fungus,** any one of several minute fungoid organisms capable of imitating and maintaining acetic fermentation, as first proved by Pasteur in 1864.

Acetin (*as'-et-in*) [*acetum*, vinegar]. $C_2H_5 \cdot (C_2H_5O_2)_2$. A chemie compound formed by the union of glycerol and acetic acid.

Acetoacetic Acid (*as-et-o-as-e'-tik*). A monobasic acid formed from acetic acid by replacing one of the hydrogen atoms of the acid radicle with the acetic-acid radicle, acetyl. See *Gierhardt*. **A. Esters,** $CH_3 \cdot CO \cdot CH_2 \cdot CO_2R$, liquids possessing an ethereal odor, produced by the action of metallic sodium upon acetic esters, they dissolve with difficulty in water and can be distilled without decomposition.

Acetoarsenite (*as-et-o-as'-sen-ite*). A salt composed of an acetate and an arsenite of the same base.

Acetobromid (*as-et-o-bro-mid*). An acetic-acid salt in which part of the hydrogen of the acid radicle has been replaced by bromin.

Acetoglycocoll (*as-et-o-gl'-ko-kol*), $CH_3 \cdot NH \cdot C_2H_5O$. A substance resembling a monobasic acid, obtained from the action of acetyl chlorid on glycoxyl silver and of acetamid on monochloroacetic acid; it is soluble in alcohol, melts at $206^\circ C$. Syn., *Acetamidoglycolic acid*; *Aceturic acid*.

Acetoioidid (*as-et-o-ioid-ide*). A double salt containing the acetate and ioidid of the same radicle.

Acetol (*as'-et-ol*). 1. See *Acetyl Carbinol*. 2. A remedy for toothache, said to consist of acetic acid, 8.46%; alum, 3.07%; water, 88.5%, with a small proportion of essential oils of sage, clove, and peppermint.

Acetoluid (*as-e-toil'-u-ide*), $C_6H_5NH \cdot C_2H_5O$. Acetoortholuid. An antipyretic resembling acetamid. The dose is not accurately determined.

Acetometer (*as-et-om'-et-er*) [*acetum*, vinegar; *utrum*, a measure]. An instrument used in the quantitative determination of acetic acid.

Acetonasthma (*as-et-on-as'-mah*) [*acetone*, *asthma*]. Attacks of dyspnea similar to uræmic asthma, accompanied with restlessness, headache, nausea, vomiting, transient amaurosis, and acetouria.

Acetone, Aceton (*as'-et-on*) [*acetum*, vinegar]. C_3H_6O . Dimethylketone. A colorless, mobile liquid, of peculiar odor and burning taste, present in crude wood-spirit. It occurs in small quantities in the blood and in normal urine, and in considerable quantities at times in the urine of diabetic patients. It is miscible with ether, alcohol, and water. It is used as an anæsthetic and anthelmintic. Dose 15-20 min. (0.9-1.2 Gm.). Syn., *Methyl alcohol*, *Methyl alcohol*; *Methyl acetyl*, *Acetyl methyl*. See *Chambers*, *Gunning*, *Leyal*, *Lieber*, *Makreba*, *le Nobel*, *Penzoldt*, *Reynolds*.

A. Chloroform, $HO \cdot C(CH_3)_2CCl_3$, a compound formed by the addition of potash to equal weights of acetone and chloroform. It occurs as white crystals, sparingly soluble in water, more freely in alcohol and glycerol. Its 1% aqueous solution is called *Anæsthesin*. It is used as a hypnotic and anæsthetic. Dose 15-20 gr. (1.0-1.3 Gm.). Syn., *Chloroform*, *Trichloromethyl alcohol*, *Trichloropseudo-butyl alcohol*. **A. Diethylsulfone.** See *Sulfonal*. **A., Monochlorated**, C_3H_5ClO , a colorless liquid having a pungent odor, obtained by chlorinating acetone. **A. Phenylhydrazine**, $(CH_3)_2C \cdot NH \cdot C_6H_5$, one of the nitrogen derivatives of ketone. **A. Resorcinol**, $C_6H_4O_2 + H_2O$, a combination of resorcinol with acetone and fuming hydrochloric acid added hot. It occurs in small anhydrous prisms, soluble in alkaline solutions, insoluble in water, alcohol, ether, and chloroform. It melts at $212^\circ-213^\circ C$. It is used in the same manner as resorcinol.

Acetonemia (*as-et-on-e'-me-ah*) [*acetone*, *aima*, blood]. The presence of acetone in the blood.

Acetones (*as'-et-onz*). A class of compounds that may be regarded as consisting of two alcoholic radicles united by the group CO , or as aldehyds in which hydrogen of the group CHO has been replaced by an alcoholic radicle.

Acetonin (*as-et-on-in*). 1. A body produced by the action of ammonia on acetone. 2. Dihydrotriacetamin.

Acetonitril (*as-et-on-i'-tril*), CH_3CN or C_2H_3N . Methyl cyanid. It is a colorless liquid, having an agreeable odor, and is prepared by distilling acetamid with P_2O_5 . It may also be produced from prussic acid and diazomethane. It melts at $-41^\circ C$, boils at $81.6^\circ C$, and has a sp. gr. of 0.789 at $15^\circ C$. Syn., *Carbamin*.

Acetonoresorcinol. See *Acetone Resorcinol*.

Acetonuria (*as-et-on-ur'-ee-ah*) [*acetone*, *urine*]. The presence of acetone in the urine.

Acetonyl (*as-et-on-il*), $CH_3-CO-CH_2$. A univalent radicle obtained from acetone by taking away one atom of hydrogen.

Acetophenone (*as-et-o'-e'-non*), $C_6H_5(CO) \cdot (CH_3)$. Hypnone; a hypnotic and antiseptic. It results from the action of zinc methyl upon benzoyl chlorid and crystallizes in large plates, melts at 20.5° and boils at 203° . It is without satisfactory action. Dose 4-15 min. (0.26-1.0 Gm.).

Acetophenoneorthoxyquinolin (*as-et-o'-fe-non-or-tho-aks-e-kuin'-al-in*), $C_{12}H_9NO \cdot CH_3$. $CO \cdot C_6H_5$. A base obtained by interaction between a halogen compound of acetophenone and orthoquinolin in the presence of solvents and an alkali. It forms well-defined salts, is soluble in volatile solvents, and melts at $130^\circ C$. It is said to have hypnotic and antineuralgic properties; is odorless, tasteless, and nonirritating.

Acetophenonephenetidin (*as-et-o'-fe-non-fen-et-id-in*). A condensation-product of aceto-

phenone and paraphenetidin. **A. Citrate**, $C_6H_5 \cdot N \cdot OC_2H_5$.

lemon-yellow needles, soluble in ether and hot alcohol, insoluble in water. It melts at $88^\circ C$; is antipyretic and antineuralgic. Dose 8-15 gr. (0.5-1.0 Gm.). Syn., *Malaria*.

Acetopyrin, Acetopyrina (*as-et-o-pi'-rin, -ah*).

A mixture of antipyrin and acetyl salicylic acid, occurring as a whitish, crystalline powder, soluble with difficulty in cold water, ether, and petroleum ether, readily soluble in warm water, alcohol, chloroform, and warm toluol. It is antipyretic. Dose 7 gr. (0.4 Gm.) 6 times daily. Syn., *Antipyrin acetosalicylate*. **A. Acetosalicylate**, antipyretic, analgesic, sedative; employed in influenza, bronchitis, rheumatic headache, sciatica, hemiparesis, and acute articular rheumatism.

Acetous (*as-et'-us*) [*acetum*, vinegar]. Resembling vinegar; pertaining to or charged with vinegar or acetic acid.

Acetozone (*as-et'-o-zon*). See *Benzoylacetyl-peroxide*.

Acetparatoluid (*as-et-par-ah-tol'-u-id*), $C_9H_{11}NO$. Antipyretic, colorless crystals, slightly soluble in water, moderately soluble in alcohol; it melts at $140^\circ C$. Dose 15-30 gr. (1-2 Gm.). Syn., *Acetparamidoluid*; *Paratolylacetamid*.

Acetphenetidin (*as-et-je-nell'-id-in*) [*acetum*; *phenol*]. A compound derived from phenol, having antipyretic and antineuralgic properties. It is crystalline, tasteless, and almost insoluble in water. Dose 3-30 gr. (0.26-2.0 Gm.). Syn., *Phenacetin*.

Acetum (*as-et'-um*) [*ac*; gen., *aceti*; pl., *aceta*]. Vinegar. An impure, dilute acetic acid produced by acetous fermentation of wine, cider, or other fruit-juice. In pharmacy, a solution of the active principles of certain drugs in dilute acetic acid. **A. aromaticum** (N. F.) ["aromatic vinegar"], a mixture of alcohol, water, and acetic acid, aromatized with the oils of rosemary, lavender, juniper, peppermint, cassia, lemon, and cloves. **A. britannicum**, an aromatic vinegar consisting of glacial acetic acid, 600; camphor, 60; oil of cloves, 2; oil of cinnamon, 10; oil of lavender, 0.5.

Acetyl (*as-et'-il*) [*acetum*, vinegar], C_2H_3O . A univalent radicle supposed to exist in acetic acid and its derivatives. Aldehyd may be regarded as the hydrid, and acetic acid as the hydrate, of acetyl. Syn., *Acetosyl*; *Acetyl*; *Acetoxyl*; *Olehy*. **A. Anhydrid**. See *Acetic Anhydrid*. **A. Benzene**. See *Acetophenone*.

A. Bixydamid. See *Acetamid*. **A. Bromid**, C_2H_3BrO , a reaction-product of acetic acid with phosphorus pentabromid; it is a fuming liquid which turns yellow in the air; it boils at $81^\circ C$. It is used as a reagent.

A. Carbinol, $CH_3 \cdot CO \cdot CH_2OH$, a saturated ketol produced by the action of water and barium carbonate upon chloroacetone, also by heating cane-sugar and grape-sugar with caustic potash. It is a colorless oil

with a feeble, peculiar odor; boils at 145° - $150^\circ C$. Syn., *Pyracetemic alcohol*; *Acetone alcohol*; *Oxyacetone*; *Methyl ketol*; *Acetol*.

A. Chlorid, C_2H_3ClO , a reaction-product of acetic acid with phosphorus trichlorid, it is a colorless, highly refracting, fuming liquid; sp. gr. 1.1305 at $0^\circ C$; boils at $55^\circ C$. It is used as a reagent. **A. Ethylphenylhydrazin**, $C_{14}H_{19}N_2O_2$, colorless needles obtained by heating a solution of ethylenephénylhydrazin with an excess of acetic anhydrid. It is recommended as an antipyretic. Syn., *Phenylhydrazinacetyl*.

A. Formyl. See *Aldehyde*, *Pyracetemic*. **A. Hydrate**, acetic acid. **A. Hydrid**. Same as *Acetic Aldehyd*. See under *Aldehyd*. **A. Iodid**, C_2H_3OI , a reaction-product of acetic acid with iodine and phosphorus; it is a brown, fuming liquid; sp. gr. 1.98 at $17^\circ C$; boils at 105° - $108^\circ C$. **A. Isocyanid**, $(C_2H_3O) \cdot N \equiv C$, a liquid in its simple form, but capable of polymerization as a crystalline solid. It boils at $93^\circ C$. Syn., *Acetic isocyanid*; *Cyanacetyl*.

A. Isoeugenol, the direct antecedent of vanillin in the manufacture of the synthetic product, and is used as a substitute for vanillin. **A. Leukomethylene-blue**, a colorless form of methylene-blue for internal use. **A. Methyl**. See *Acetone*.

A. Oxid. Same as *Acetic Anhydrid*. **A. paraamidophenylsalicylate**. See *Salophen*.

A. Peroxid, $(C_2H_3O)_2O_2$, a thick liquid, insoluble in water, but readily dissolved by ether and alcohol. It is a powerful oxidizing agent. It is decomposed in sunlight and explodes violently when heated. **A. Phenylhydrazid**, **A. Phenylhydrazin**. Same as *Hydrazin* and *Pyridin*.

A. Tannin, a grayish-yellow, slightly hygroscopic, odorless, tasteless powder, soluble in alcohol, dilute sodium phosphate, sodium carbonate, or sodium borate; slightly soluble in hot water and ether; insoluble in cold water; melting at $190^\circ C$. It is an astringent and is used internally in chronic diarrhea. Externally, it is used in chronic pharyngitis. Dose 3-7½ gr. (0.2-0.5 Gm.). Application, 3% solution in 5% sodium phosphate. Maximum dose 60 gr. (4 Gm.) daily. Syn., *Tannigen*.

A. Thymol, $C_{10}H_{14}O$, a colorless antiseptic liquid with a pungent taste having a specific gravity of 1.000 at $0^\circ C$ and boiling at $244.4^\circ C$. Syn., *Thymol acetate*.

A. Tribromsalol, fine, white acicular crystals which melt at 108.5° ; insoluble in water; soluble in alcohol. Syn., *Cordyl*.

A. Urethane. See *Urethane*.

Acetylene (*as-et'-il-en*) [*acetum*, vinegar], C_2H_2 . A colorless gas, with a characteristic, unpleasant odor, burning with a luminous, smoky flame. It is formed by the imperfect combustion of illuminating gas and other hydrocarbons. The *acetylene series* of hydrocarbons has the general formula C_nH_{2n-2} .

Acetylation (*as-et-il-ee-ah-shun*). The act of combining with or producing compounds of acetic acid or acetyl.

Ache (*ák*) [*AS.*, *acan*, to ache]. Any continuous or throbbing pain.

Acheilia (ah-ki'-le-ah) [*ā*, priv.; *χείλος*, a lip]. The congenital absence of lips.

Acheilous (ah-ki'-lūs) [see *Acheilia*]. Lipless.

Acheiria (ah-ki'-re-ah) [*ā*, priv.; *χείρ*, a hand]. The congenital absence of hands.

Acheirous (ah-ki'-rūs) [see *Acheiria*]. Affected with acheiria.

Achilia (ah-ki'-le-ah). See *Acheilia*.

Achillea (ak-d'-ē-ah) [*Achilles*, its reputed discoverer]. Milfoil, yarrow. The herb *A. millefolium*. Its properties are due to a bitter, aromatic, astringent, tonic extractive, *achillein*, and a volatile oil. It has long been used as a vulnerary, and has been highly recommended for intermittent and low exanthematous fevers. Dose 1 oz. 1 pint infusion *ad lib.* of the extractive, 13 dr. (3-12 Gm.); of the volatile oil, 5-15 min. (0.3-1.0 Cc.). Unof. To the genus *Achillea* belong various other unofficial medicinal plants, as *A. moschata*, of the Alps, used in preparing cordials and a diaphoretic medicine, and *A. pharica*, or sneezewort, a strong sialogogue.

Achillein, Achilleinum (ak-d'-ē-in, -ē-num), $C_{22}H_{34}N_2O_{11}$. A glucosid obtained from *Achillea millefolium* and *A. moschata*. Occurs as a brownish-red, amorphous mass, of a strongly bitter taste, soluble in water, less soluble in alcohol, insoluble in ether. It is stated that divided doses up to 30-75 gr. (2-5 Gm.) cause marked irregularity of the pulse.

Achilles Tendon (ak-d'-ē-tēn-dōn). The tendon of the gastrocnemius and soleus muscles, inserted into the back of the heel.

Achillobursitis (ak-d'-ē-bur-sī-tis) [*achilles tendon*, *bursitis*]. Inflammation of the bursa lying adjacent to the achilles tendon.

Achillodynia (ak-d'-ē-dōn'-ē-ah) [*achilles tendon*, *dynia*, pain]. Pain referred to the insertion of the achilles tendon.

Achillorrhaphy (ak-d'-ē-rā-ē) [*achilles tendon*, *rhaphe*, suture]. Suture of the achilles tendon, practised by C. Beyer instead of achillotomy for the sake of lengthening the tendon. This is exposed, the length divided in half, the upper end of one side, the lower end of the other, cut across, and both the cut surfaces united by a suture.

Achillotomy (ak-d'-ē-ō-mē) [*achilles tendon*; *tomē*, a cutting]. The subcutaneous division of the achilles tendon.

Achlorhydria (ah-kler-hī-dre-ah) [*ā*, priv.; *χρῆμα*, green (color, water)]. Absence of free hydrochloric acid from the gastric juice.

Achloropsia (ah-klor-ōp'-ē-ah) [*ā*, priv.; *χρῆμα*, green, vision]. Green blindness.

Acholia (ah-kō'-lē-ah) [*ā*, priv.; *χολή*, bile]. 1. Absence of biliary secretion. 2. Any condition obstructing the escape of the bile into the small intestine. 3. Asiatic cholera. 4. A mild temperament. **A., Pigmentary**, that in which there is deficiency of bile and lack of color in the feces, but no jaundice.

Acholoria (ah-kō'-lē-ah) [*ā*, priv.; *χολή*, bile; *ουρα*, urine]. The absence of bile-pigment in the urine.

Achondroplasia (ah-kon-dro-plā'-ze-ah). [*ektē*, rickets].

Achor (ā'-kor) [*άχωρ*, chaff, scurf, or dandruff]. Crusta lactea, a small pustule, followed by a scab, upon the heads of infants, milk-crust.

Achoresis (ah-kor'-ē-sis) [*ā*, priv.; *χωρῶν*, to make room, pl., *achoreses*]. Grossé's term for the diminished capacity of a hollow organ, as of the bladder. Syn., *Achuria*. Cf. *Stenochoria*.

Achorion (ā-kō'-re-on) [dim of *άχωρ*, chaff]. A genus of fungous organisms, including several species possibly modified forms of *Penicillium glaucum* found in the skin, especially the hair-follicles. **A. keratophagus**, the form causing *Oncychomycosis*. **A. lebertii**, the parasite of *Tinea tonsurans*. **A. schönleinii**, the species occurring in ring-worm, or *Tinea furfur*.

Achras (ak'-ras) [*άχρας*, the wild pear]. A genus of woody plants of the order Sapotaceae. **A. sapota** [*achitzapōtl*, Mea], the sapotilla plum; a species indigenous to South America. The fruit is edible, sweet, cloying, said to be beneficial in strangury. The seeds are laxative and diuretic; they are exhibited in emulsion in cases of gravel and renal colic. The bitter astringent bark (*cortex jamaicensis*) has been used as a substitute for cinchona bark. The bark and seeds yield the glucosid *sapoten*. The seeds yield chicle-gum.

Achroma (ah-kro'-mah) [*ā*, priv.; *χρῶμα*, color]. Absence of color, albinism. Syn., *Achromasia*, *Achromatia*; *Achromatosis*; *Achromoderma*, *Vitiligo*. **A., Congenital**. See *Albinism*. **A. cutis**. See *Leukoderma*.

Achromacyte (ah-kro'-mas-ē) [*ā*, priv.; *χρῶμα*, color, *κύτος*, cell]. A degenerated, decolorized erythrocyte, a "phantom" or shadow corpuscle. Syn., *Poivy's shadow corpuscle*; *Razzeres's blood-platelet*; *Hayem's corpuscle* or *hematoblast*.

Achromatic (ah-kro'-mat-ik) [*ā*, priv.; *χρῶμα*, color]. Without color. **A. Lens**, one the dispersing power of which is exactly neutralized by another lens with the same curvature, but having a different refractive index.

Achromatin (ah-kro'-mat-in) [*ā*, priv.; *χρῶμα*, color]. The groundwork of the nucleus of a cell, it is so called because it is not readily stained by coloring agents.

Achromatism (ah-kro'-mat-izm) [*ā*, priv.; *χρῶμα*, color]. Absence of chromatic aberration.

Achromatophil (ah-kro'-mat-ō-fil) [*ā*, priv.; *χρῶμα*, color; *φιλέω*, to love]. 1. Showing no affinity for stains. 2. A microbe or histologic element which does not stain readily.

Achromatopsia (ah-kro'-mat-ōp'-ē-ah) [*ā*, priv.; *χρῶμα*, color; *ὄψις*, sight]. Color-blindness, daltonism. **A., Partial**, a form in which only one pair of colors, which to the normal eye are complementary, appear gray or white. **A., Total**, that in which all the colors appear as white or gray.

Achromatosis (ah-kro'-mat-ō-sis) [*ā*, priv.; *χρῶμα*, color]. Any disease characterized by

deficiency of pigmentation in the integumentary tissues.

Achromia (*ah-kro'-me-ah*). See *Achroma*.

Achromodermia (*ah-kro-mo-der'-me-ah*) [*d*, priv.; *χρῶμα*, color; *δέρμα*, skin]. An albinotic or colorless state of the skin.

Achromotrichia (*ah-kro-mo-trik'-e-ah*) [*i*, priv.; *χρῶμα*, color; *τρίχis*, hair]. Absence of pigment from the hair.

Achronzoic (*ah-kron-e-zo'-ik*) [*d*, priv.; *χρονίζω*, to hold out]. A term applied to drugs which are incapable of remaining unchanged for any length of time.

Achrotychous (*ah-kron'-ik-us*). See *Achrotychous*.

Achroodextrin (*ah-kro-o-dek's'-trin*) [*i*, priv.; *χρῶμα*, color; *δextrin*, dexter, right]. A reducing dextrin formed by the action of the diastatic ferment of saliva upon starch. It is a modification of dextrin and may be precipitated by alcohol; it is not converted into sugar by ptyalin, nor colored by iodine.

Achylia (*ah-ki'-le-ah*) [*i*, priv.; *χῆλη*, juice]. Absence of chyle. Syn., *Achylia*. **A. gastrica**, Eberlein's term for a condition of the stomach marked by destruction of the glandular structures with resulting absence of chyme ferment, and even mucus, called *gastritis gastrica* by Ewald.

Achylous (*ah-ki'-lus*) [See *Achylia*]. Deficient in chyle.

Achymosis (*ah-ki-mo'-sis*) [*i*, priv.; *χῆλη*, juice]. Deficient formation of chyme.

Achymous (*ah-ki'-mus*). Deficient in chyme.

Acicular (*as-ik'-u-lar*) [*acus*, a needle]. Needle-like.

Acid, Acidum (*as'id, -um*) [*acere*, to be sour]. 1. A name applied to any substance having a sour taste. 2. A compound of an electronegative element with one or more atoms of hydrogen which can be replaced by electropositive or basic atoms. The majority of acids contain oxygen, and are known as *oxyacids*; those not containing oxygen are termed *hydrogen acids*. Acids vary in their terminations according to the quantity of oxygen or other electronegative constituent. Those having the maximum of oxygen end in *-ic*; those of a lower degree, in *-ous*. When there are more than two combinations, the prefix *hypo-* is joined to the highest, and *hypo-* to the lowest. Acids that end in *-ic*, as sulfuric acid, form salts terminating in *-ate*; those ending in *-ous* form salts terminating in *-ite*. **A.**, **Abietic**. See *Abietic*. **A.**, **Abrie**, $C_{15}H_{24}N_2O_4$, a crystallizable acid, said to exist in jessiquity. **A.**, **Absinthic**, an acid obtained from wormwood; said to be identical with succinic acid. **A.**, **Acetic**, an acid solution composed of 36 parts of absolute acetic acid, $C_2H_4O_2$, and 64 parts of water. It has strongly acid properties. **A.**, **Acetic, Dilute**, contains 6% of absolute acid. Dose 1-2 dr. (4-8 Cc.). An impure form, obtained by the destructive distillation of wood, is known as wood-vinegar, or pyroigneous acid. **A.**, **Acetic, Glacial**, the anhydrous acid occurring in crystals melting at

22.5° C. It is an escharotic. **A.**, **Aconitic**, $C_6H_8O_6$, occurs in different plants, as *Aconitum napellus*, sugar-cane, and beet-root. It crystallizes in small plates that dissolve readily in alcohol, ether, and water, and melt at 186°-187°. **A.**, **Acrylic**. 1. $CH_2=CH-CO.OH=C_3H_4O_2$. A monobasic acid which may be considered as the acid of acrolein, a colorless liquid. 2. A general term for organic acids of the group $C_nH_{2n-2}O_n$, comprising two groups, the normal acrylic and the isoacrylic acids. Normal acrylic acids occur in vegetable or animal organisms or are derived from natural products. Isoacrylic acids are formed synthetically by the abstraction of the elements of water from certain acid ethers, which in turn are derived from oxalic acid by substituting 2 molecules of an alcohol radicle of the series C_nH_{2n-1} for an atom of hydrogen. **A.**, **Adipic**, $C_6H_{10}O_4$, obtained by oxidizing fats with nitric acid. It crystallizes in shining leaflets or prisms; is soluble in 12 parts of cold water; melts at 148°. It is dibasic. **A.**, **Agaric**, **A.**, **Agaricic**, $C_{16}H_{20}O_3 + H_2O$, a resin acid obtained from the fungus *Polyporus officinalis*, growing on larch trees. The acid has been recommended for checking night-sweats. It also checks the other excretions and diminishes thirst. It is mildly cathartic. **A.s**, **Alcohol**, $C_nH_{2n-1}OH$, monobasic acids having the properties of the monohydric alcohols. They are distinguished as primary, secondary, and tertiary, according as they contain, in addition to the carboxyl group, the group $-CH_2OH$, the radicle $-CHOH$, or the group $\equiv C.OH$. Syn., *Oxyacids*; *Hydroxy-fatty acids*. Cf. **A.**, *Glycollic*. **A.s**, **Aldehyd**, bodies which combine the properties of a carboxylic acid and of an aldehyd. **A.**, **Aldepalmitic**, $C_{16}H_{32}O_8$, the chief component of the butter of the cow. **A.**, **Alloxanic**, $C_4H_4N_2O_6$, a crystalline acid obtained by treating alloxan with alkalis. **A.**, **Alloxypro'teic**, a neutral sulphur compound found in the urine. **A.**, **Amidoacetic**. See *Glycin*. **A.**, **Amidobenzoic**, $C_7H_7NO_3$, occasionally found in the urine. **A.**, **Amidosuccinamic**. Same as *Asparagin*. **A.**, **Anacardic**, $C_{15}H_{22}O_8$, a tetratomic acid obtained by Städler from the cashew-nut. It is used as an anthelmintic in the form of ammonium anacardate. **A.**, **Angelic**, $C_9H_{10}O_3$, a crystalline monobasic acid. It exists free along with valeric and acetic acids in the roots of *Angelica archangelica*, and as butyl and amyl esters in Roman oil of cumin. It crystallizes in shining prisms, melts at 45°, and boils at 185°. It has a peculiar odor and taste. **A.**, **Anisic**, $C_9H_{10}O_3$, obtained by oxidizing anisol and anethol with HNO_3 , and from aniseed by the action of oxidizing substances. It is antiseptic and antipyrretic, and is used in the treatment of wounds and acute articular rheumatism. Dose of the sodium salt 15 gr. (1 Gm.). Syn., *Methylparaoxybenzoic acid*.

A., Anisuric, $C_{10}H_{11}NO_2$, an acid formed by the action of anisyl chlorid on the silver compound of glycolic acid, it also occurs in the urine after the ingestion of anise. **A., Anticyclic**, a white, fragrant powder with pleasant, acid taste, readily soluble in water, alcohol, and glycerol, it is used as an antipyretic. Dose 13 gr (0.0006 Gm.). **A., Apocrenic**, Berzelius' term for a brown, amorphous substance obtained from the sediment of chalybeate waters. **A., Arabic**. See *Arabin*. **A., Arachic**, **A., Arachidic**, **A., Arachinic**, $C_{26}H_{52}O_2 = C_{26}H_{50} \cdot COOH$, a monobasic fatty acid obtained from oil of peanut, *Arachis hypogaea*. **A., Argentie**, silver monoxid. **A., Aromatic**, a name applied to certain organic acids occurring in the balsams, resins, and other odoriferous principles. Also, in pharmacy, a dilute mineral acid reinforced by aromatic substances in order to modify its flavor. **A., Arsenic**, **A., Arsenous**. See *Arsenic Tri-oxid*. **A., Arsinic**, any one of a class of acids formed by the oxidation of arsine or arsenium compounds. **A., Aseptic**, an antiseptic solution consisting of an aqueous solution of 5 Gm. of boric acid in 1000 Gm. of hydrogen dioxid (1.5 %). 4 Gm. of salicylic acid may be added. **A., Asparagic**, **A., Asparaginic**, **A., Asparamic**. Same as *A., Aspartic*. **A., Aspartic**, $C_4H_7NO_4$, occurs in the vinasse obtained from the beet root, and is procured from albuminous bodies in various reactions. It is prepared by boiling asparagin with alkalis and acids; crystallizes in rhombic dibasic prisms or leaflets, and dissolves with difficulty in water. **A., Aspartic**, **Inactive**, $NH_4C_4H_7CO_3H$, formed by heating aspartic acid with water or with alcoholic ammonia to $140^\circ-150^\circ C$, or with HCl to $170^\circ-185^\circ C$. Syn. *Asparagamic acid*. **A., Atrolactic**, $C_{10}H_{16}O_2$, a monobasic acid obtained from acetophenone by means of prussic acid and H_2SO_4 or dilute HCl. **A., Auric**, $Au(OH)_3$, gold trihydroxid. **A., Azelaic**, **A., Azelainic**, $C_9H_{16}O_4$, an oxidation product of oleic acid, Chinese wax, castor oil, or coconut oil, soluble in water, alcohol, and ether, melts at $107^\circ-107^\circ C$, and boils at $305^\circ C$. Syn. *Anchonic acid*; *Levazulic acid*; *Azelic acid*; *Azelainic acid*. **A., Benzamic**. See *A., Amidobenzoic*. **A., Benzoic**, $C_6H_5O_2$, occurs free in some resins, chiefly in gum benzoïn and in coal-tar. It crystallizes in white, shining needles or leaflets, melts at 120° , and distills at 250° . It volatilizes readily, its vapor possessing a peculiar odor. **A., Blattic**. See *Antihydratum*. **A., Boric**, **A., Boracic**. See *Boron*. **A. of Borax**, orthoboric acid. **A., Borocitric**, a combination of boric and citric acid forming a white powder which is used as a solvent for urates and phosphates in urinary calculi, gout, etc. Dose 5-20 gr. to 1-4 Gm.). **A., Borophenylic**, $C_6H_5BO_2$, obtained by the action of phosphorus oxychlorid upon a mixture of boric acid and phenol. It is an antiseptic white powder with a mild aromatic taste, not easily soluble in water, melting at $304^\circ C$.

It is fatal to lower forms of life, but does not affect the higher forms. Syn. *Phenyliboric acid*. **A., Borosalicylic**, $H(OH)(OC_6H_5)(CO_2H)$, a combination of boric and salicylic acids in molecular proportion. It is used externally instead of salicylic acid. **A., Brom-**, one in which bromin has replaced one or more atoms of hydrogen in the acid radicle. **A., Brom-acetic**. See *A., Monobromacetic*. **A., Brom-hydric**, hydrobromic acid. **A., Bursic**, **A., Bursinic**, a yellow, hygroscopic mass obtained from an aqueous extract of *Capella bursa pastoris* by the action of lead acetate and ammonia and evaporating. Its aqueous solution is used in the same manner as ergotin hypodermatically and also internally. **A., Butic**, **A., Butinic**. See *A., Arachic*. **A., Butyric**, $C_4H_7O_2$, an acid having a rancid appearance and rancid smell. It is obtained commercially by the fermentation of a mixture of sugar and butter or cheese in the presence of an alkaline carbonate, but occurs in various plants, in cod-liver oil, in the juice of meats, and in the perspiration. Combined with glycerol as glyceryl butyrate, it is essentially butter. **A., Cacodylic**. See *A., Dimethylarsinic*. **A., Caffeic**, $C_8H_6O_4$, obtained when the tannin of coffee is boiled with potassium hydroxid. **A., Camphoric**, $C_{10}H_{16}O_4$, a dibasic acid, obtained by boiling camphor with HNO_3 . It crystallizes from hot water in colorless leaflets, melts at 178° , and decomposes into water and its anhydrid, $C_{10}H_{14}O_3$. It is used in night sweats of phthisis. Dose 10-30 gr. (0.05-1.0 Gm.). **A., Capric**, $C_{10}H_{20}CO_2H$, occurs in small quantity as a glycerid in cow's butter. It crystallizes in fine needles, melting at $30^\circ C$, and is very insoluble in boiling water. **A., Caproic**, $C_6H_{12}O_2$, the sixth in the series of fatty acids, a clear, mobile oil, colorless, inflammable, and with a very acid and penetrating taste. **A., Caprylic**, $C_8H_{16}CO_2H$, an acid combined with glycerol, forming a glycerid existing in various animal fats; it is found at ordinary temperatures. **A., Carbamic**, $H_2N.CO_2H$, carbonic acid in which NH_2 replaces OH , it is not known in the free state, its ammonium salt is contained in commercial ammonium carbonate. The esters of carbamic acid are called urethanes. **A., Carbazotic**. See *A., Phenic*. **A., Carbolie**, C_6H_5OH , phenol, the official designation of this substance is procured from coal-tar by fractional distillation. It has a very peculiar and characteristic odor, a burning taste, is poisonous and has antiseptic properties. The 34 gr. at the melting point is 1.060-1.066, it crystallizes in colorless rhombic needles that melt at about $40^\circ C$, boiling at about 180° , and it is not decomposed upon distillation. At ordinary temperatures it dissolves in water with difficulty (1:10.6 at $25^\circ C$), but is soluble in alcohol, ether, glacial acetic acid, and glycerol in all proportions. It unites with bases to form salts, known as *carbates*. Upon exposure to

light and air it deliquesces and acquires a pinkish color. It is used in the manufacture of many of the artificial coloring-matters, e. g., punic acid. It is a powerful antiseptic and germicide. Internally it is useful in vomiting, fermentation in the stomach, and as an intestinal antiseptic; locally, as a caustic. Dose, internally, $\frac{1}{2}$ -2 gr. (0.03-0.13 Gm.). **A., Carbolic, Camphorated**, a mixture of phenol 1 part and camphor 3 parts. **A., Carbolic, Chlorinated**. See *Trichlorphenol*. **A., Carbolic, Iodized**, a solution of 20 parts of iodine in 76 parts of phenol with the addition of 4 parts of glycerol. It is used as an antiseptic and escharotic. **A. Carbolic. Liquefactum** (B. P.). Dose 1-2 min. (0.06-0.13 Cc.). **A., Carboisulfuric**, a mixture of equal parts of phenol and concentrated sulfuric acid. It is used as a disinfectant in 2 to 3 % solution. **A., Carbonaceous**. See *Carbon Dioxid*. **A., Carbonic**, CO_2 , carbon dioxide, an ultimate product of the combustion of carbon compounds, a colorless, odorless gas, heavier than air, incapable of sustaining respiration. **A., Carminic**, $\text{C}_{17}\text{H}_{16}\text{O}_{10}$, a coloring-matter found in the buds of certain plants, and especially in cochineal, an insect inhabiting different varieties of cactus. It is an amorphous, purple-red mass, readily soluble in water and alcohol, and yields red salts with the alkalis. **A., Caseic**, lactic acid (q. v.). **A., Cathartic**, **A., Cathartinic**, an active principle from several species of *Cassia*. **A., Cerotic**, $\text{C}_{27}\text{H}_{48}\text{O}_2$, a fatty acid existing in beeswax and in Chinese wax. **A.-characteristic**, the replaceable hydrogen and the elements immediately bound to it in the molecule of an acid, as the $\text{CO} \cdot \text{OH}$ of organic acids. **A., Chloracetic** (*chlorin and acetic*), an acid, called also *monochloroacetic acid* produced by the substitution of chlorine for the hydrogen of the radicle in acetic acid. It is sometimes used as a caustic. **A., Chloric**, HClO_3 , an acid known only in its compounds (*chlorates*) and its aqueous solution. **A., Cholic**. See **A., Choleic**. **A., Cholesteric**, $\text{C}_{26}\text{H}_{46}\text{O}_7$, an acid obtained by Tappeiner from the oxidation of cholic acid with potassium dichromate and sulfuric acid. This must not be confounded with cholesterinic acid. **A., Cholesterinic**, $\text{C}_{26}\text{H}_{46}\text{O}_8$, a dibasic acid obtained from cholesterol and from cholic acid by action of nitric acid; it occurs as a gum-like, yellow, hygroscopic body with an acrid taste. **A., Cholic**, **A., Cholalic**, $\text{C}_{26}\text{H}_{46}\text{O}_8$, from glycocholic and taurocholic acids; it crystallizes from out of a hot solution in small anhydrous prisms, sparingly soluble in water, and melting at 175° . **A., Chromic** (*chromii trioxidum*, U. S. P.), strictly, the compound H_2CrO_4 ; it forms salts called chromates. It is a crystalline solid; escharotic. **A., Chrysophanic**, $\text{C}_{15}\text{H}_{10}\text{O}_5$, exists in the lichen, *Paraselia parietina*, in senna leaves, and in the rhubarb root. It crystallizes in golden-yellow needles or prisms, melting at 162° . Syn.,

Rheinic acid. See *Chrysarubin*. **A., Cincho-tannic**. See *Cinchotannin*. **A., Cinnamic**, $\text{C}_9\text{H}_8\text{O}_2$, occurs in peru and tolu balsams, in storax, and in some benzoin resins. It has been used in tuberculosis, both internally and externally. Dose 1-10 min. (0.06-0.65 Cc.) hypodermatically. **A., Citric**, $\text{C}_6\text{H}_8\text{O}_7$, occurs free in lemons, black currants, bilberries, beets, and in various other acid fruits. It crystallizes with one molecule of water in large rhombic prisms that melt at 100° , are colorless, inodorous, and extremely sharp in taste. It is refrigerant, antiseptic, and diuretic. **A., Colopholic**, **A., Colophonic**, an acid obtained from turpentine; it is used in plasters. **A., Copahuvic**, **A., Copaivic**, $\text{C}_{20}\text{H}_{30}\text{O}_2$, an almost colorless, coarsely crystalline powder, obtained from copaiba; it is soluble in alcohol, ether, and benzene. Sometimes written *Copaibic*. **A., Cresolsulfuric**, $\text{C}_7\text{H}_7\text{O} \cdot \text{SO}_3\text{OH}$, exists in the urine in small traces. **A., Cresotic**, **A., Cresotinic**, $\text{C}_7\text{H}_7\text{O}_2$, an aromatic hydroxy acid of which 3 isomeric compounds may be formed by the action of sodium and carbonic anhydride on the 3 modifications of cresol. They all occur in acicular crystals. The para compound, melting at 151°C , is used as an antipyretic in the form of sodium cresolate. Dose 2-20 gr. (0.13-1.3 Gm.); maximum dose 60 gr. (4 Gm.). Syn., *Oxytoluic acid*; *Homosalicylic acid*. **A., Cresylic**. See *Cresol*. **A., Cubebic**, $\text{C}_{11}\text{H}_{14}\text{O}_2$ (?), a white, waxy mass, turning brown on exposure, obtained from cubeb berries, the unripe fruit of *Piper cubeba*, soluble in alcohol, ether, and alkaline solutions, and used as a diuretic. Dose 5-10 gr. (0.3-0.6 Gm.) in pills several times daily. **A., Cumic**, $\text{C}_{10}\text{H}_{12}\text{O}_2$, produced by the oxidation of cuminic alcohol with dilute HNO_3 . Very soluble in water and alcohol; crystallizes in colorless needles or leaflets; melts at 116° and boils at about 200° . **A., Cyanic**, CONH , obtained by heating polymeric cyanuric acid. **A., Cyanuric**. See **A., Tricyanic**. **A., Diacetic**, $\text{C}_4\text{H}_6\text{O}_3$, an acid present in the urine in certain stages of diabetes and other diseased conditions. **A., Dichloracetic**, $\text{CHCl}_2 \cdot \text{CO}_2\text{H}$, produced when hydrated chloral is heated with CNK or potassium ferrocyanid and water. At ordinary temperature it occurs as a caustic, colorless liquid, but crystallizes at a low temperature. Sp. gr. 1.522 at 15°C ; boils at 180° - 191°C ; soluble in water and alcohol. It is used as an escharotic in skin diseases. **A., Diiodosalicylic**, $\text{C}_7\text{H}_4\text{I}_2\text{O}_3$, a white, crystalline powder, soluble in alcohol and ether, slightly soluble in water, and melting at 226° - 230°C . It is antipyretic, analgesic, and antiseptic, and is used in rheumatism and gout. Dose 8-20 gr. (0.5-1.3 Gm.) 3 or 4 times daily in waters; maximum dose 30 gr. (2 Gm.). **A., Dimethylarsenic**, $\text{As}(\text{CH}_3)_2\text{OOH}$, a substance formed by the oxidation of cacodyl, occurring in large, permanent prisms, odorless and slightly sour. It is soluble in water

and alcohol and melts at 200°C . It is considered not to be toxic, and because of its solubility is easily absorbed. *Syn.* *Cacodylic acid*. **A.**, *Dithiochloresalicylic*, $\text{SC}_6\text{H}_4\text{Cl}(\text{OH})\text{COOH}$, a reddish yellow powder obtained by heating a mixture of salicylic acid and sulfur chlorid heated to 150°C . and existing in two modifications differing in the solubility of their salts. It is an antiseptic, analgesic, antipyretic, yellowish-gray powder, partly soluble in water. Its lithium and sodium salts only are used in medicine as substitutes for salicylic acid. **A.**, *Doeglic*, $\text{C}_{10}\text{H}_{16}\text{O}_6$, a crystalline monobasic acid obtained from the oil of the doegling, or bottle-nosed whale. **A.**, *Dracic*, **A.**, *Draconic*, **A.**, *Draconylic*. See *A.* *Antisc*. **A.**, *Ethylenelactic*, $\text{CH}_2(\text{OH})\text{CH}_2\text{CO}_2\text{H} = \text{C}_2\text{H}_4\text{O}_3$, an acid isomeric with ethylene lactic acid or the lactic acid of fermentation, is obtained from acrylic acid by heating with aqueous sodium hydroxid to 100°C . and in various other ways. It is a thick, uncrystallizable syrup, on heating it loses water and is converted into acrylic acid. *Syn.* *Hydroacetic acid*, *p-Oxopropionic acid*, *3-Hydroxypropionic acid*. **A.**, *Ethylenephénylhydrazinacetic*, $\text{C}_{10}\text{H}_{12}\text{N}_2\text{O}_3$, an acid obtained from an alcoholic solution of ethylenephénylhydrazin and succinic anhydrid by boiling. It occurs in acicular crystals, soluble in water. It is used as an antipyretic. **A.**, *Ethylidenelactic*, *lactic acid*. **A.**, *Fatty*, a monobasic acid formed by the oxidation of a primary alcohol. The fatty acids have a general formula of $\text{C}_n\text{H}_{2n}\text{O}_2$. *Syn.* *Aliphatic acid*. **A.**, *Fellic*, $\text{C}_{27}\text{H}_{45}\text{O}_6$, a crystalline cholic acid obtained by Scovotten from human bile, it is due to admixture with this acid that cholic acid from human bile differs in appearance from that obtained from other sources. **A.**, *Fluoric*, hydrofluoric acid in aqueous solution, a strong escharotic. **A.**, *Formic*, CH_2O_2 , an acid obtained from a fluid emitted by ants when irritated, it is also found in stinging nettles, in shoots of the pine, and in various animal secretions. It is prepared by heating oxalic acid and glycerol. It is a colorless, mobile fluid, with a pungent odor, it is a vesicant. **A.**, *Gallic*, $\text{C}_6\text{H}_3\text{O}_6$, occurs free in nutgalls, in tea, and in the fruit of various other plants. It is obtained from ordinary tannic acid by boiling it with dilute acids. It crystallizes in fine, silky needles containing one molecule of water. It dissolves slowly in water and readily in alcohol and ether, has a faintly acid, astringent taste, melts at near 220° . It is astringent and disinfectant, useful in night sweats, diabetes, and chronic diarrhea. **A.**, *Gaultheric*. See *Method Salicylate*. **A.**, *Gluconic*, $\text{C}_6\text{H}_{12}\text{O}_7$, formed by the oxidation of dextrose, cane-sugar, dextrin, starch, and maltose with chloro- or bromine water. Most readily obtained

from glucose. It is dextrorotatory, but does not reduce Fehling's solution. Melts at 200° . **A.**, *Glycerinophosphoric*, **A.**, *Glycerinophosphoric*, $\text{C}_3\text{H}_5\text{PO}_4$, a dibasic acid in combination with the fatty acids and cholin, as lecithin in the yolk of eggs, in bile, in the brain, and in the nervous tissue. It is formed by mixing glycerol with metaphosphoric acid. It is a pale yellow, oily liquid, without odor, having a sour taste; soluble in water and alcohol; is used in the treatment of neurasthenia, tabes, etc. Dose $1\frac{1}{2}$ gr (0.1 c.c. (Gm)) 3 times daily. **A.**, *Glycerinsulfuric*, $\text{C}_3\text{H}_5\text{SO}_4$, a monobasic body forming a series of salts called glycerosulfates. *Syn.* *Sulfo-glyceric acid*. **A.**, *Glycerosulfuric*. See *A.* *Glycerinsulfuric*. **A.**, *Glycocholic*, $\text{C}_{27}\text{H}_{45}\text{NO}_6$, a monobasic acid found in bile, sparingly soluble in water and crystallizing in minute needles. **A.**, *Glycollic*, $\text{C}_2\text{H}_2\text{O}_3$, oxalic acid, produced by the action of nascent hydrogen upon oxalic acid. It is a thick syrup that gradually crystallizes on standing over sulfuric acid, the crystals melt at 86° and deliquesce in the air. It dissolves readily in alcohol, water, or ether. **A.**, *Glyconic*, $\text{C}_6\text{H}_8\text{O}_7$. This acid has been found in urine; it probably does not exist there normally, but appears after taking certain drugs, as benzol, indol, nitrobenzol and the quinolin derivatives. **A.**, *Guaiacolicarbonic*, **A.**, *Guaiacolicarboxylic*, $\text{C}_{11}\text{H}_{10}\text{O}_6$, a monobasic crystalline acid, melting at 150°C . It is antiseptic and antipyretic. **A.**, *Gummic*. See *Arabin*. **A.**, *Gymnemic*, $\text{C}_{27}\text{H}_{44}\text{O}_{12}$, a greenish-white, amorphous powder with a harsh acid taste, soluble in alcohol and chloroform and slightly soluble in water and ether. It is obtained from the leaves of *Gymnema sylvestre*, and obviates the taste for bitter or sweet things, but not for sour, pungent, or astringent ones. It is used as a mouth wash in 12 % hydroalcoholic solution before taking nauseous medicines. **A.**, *Helvellaic*, an acid which destroys red blood-corpuscles, obtained by Böhm from juice of the mushrooms belonging to the genus *Helvella*. **A.**, *Helvellic*, $\text{C}_{12}\text{H}_{16}\text{O}_6$, an acid obtained from fresh belladonna, occurring as a yellow, transparent, syrupy liquid of strong acid reaction. **A.**, *Hippuric*, $\text{C}_9\text{H}_8\text{NO}_4$, occurs in considerable amount in the urine of herbivorous animals, sometimes in that of man. It crystallizes in rhombic prisms, and dissolves readily in hot water and alcohol. *Syn.* *Benzoyl glycocoll*. **A.**, *Hydra-*. See *Hydrogen Acids under Acid*. **A.**, *Hydracrylic*, $\text{C}_2\text{H}_3\text{O}_3$, an acid isomeric with lactic acid. See *A.* *Ethylenelactic*. **A.**, *Hydriodic*, *HI*, a gaseous acid. Its solution *acidum hydriodicum dilutum*, (U. S. P.) and a syrup prepared from it, *syrupus acidi hydriodici* (U. S. P.), are used as alternatives, with the general effects of iodine. Dose of the syrup 1-4 dr (4-16 Cc.). **A.**, *Hydriodic, Dilute*, a 10 % solution of hydriodic acid in 90 % of water, an alternative of especial value

in scrofulosis of children. **A., Hydrobromic**, HBr ; the dilute acid, which is the chief form used, consists of 10 parts acid and 90 parts water. It is a solvent for quinin, is useful in hysteria, congestive headaches, and neuralgia, and is recommended as a substitute for potassium and sodium bromide. Dose 20 min.-2 dr. (1.3-8.0 Cc.). **A., Hydrochloric**, HCl , a liquid consisting of 31.9% by weight of HCl gas in 68.1% of water. It is colorless, pungent and intensely acid. Syn., *Muriatic acid*. **A., Hydrochloric, Dilute**, a 10% solution of absolute acid in water. Valuable as an aid to digestion. Dose 3-10 min. (0.19-0.65 Cc.). **A., Hydrocyanic, Aqueous**, the hydrocyanic acid obtained by distillation, which contains a certain percentage of water before removal by fractional distillation and desiccation. **A., Hydrocyanic, Dilute**, HCN , a liquid consisting of 2% of the acid with 98% of water and alcohol. It possesses an odor like that of bitter almonds. Prussic acid is found in the bitter almond, the leaves of the peach, and in the cherry-laurel, from the leaves of which it is distilled. It is one of the most active poisons known, death from complete asphyxia being almost instantaneous. It is valuable for its sedative effects in vomiting, whooping-cough, and spasmodic affections. Dose 1-2 min. (0.06-0.2 Cc.). Syn., *Prussic acid*. **A., Hydrocyanic, Vapor**, 1 part of dilute acid in 4-6 parts of water, warmed, and the vapor inhaled to relieve irritable coughs. **A., Hydrofluoric**, HF , a compound of hydrogen and fluorine, powerfully corrosive, used for etching on glass. **A., Hydrosulfuric**, H_2S , a gas formed during the putrefaction of albuminous substances; it occurs in sulfur mineral waters, and is produced by the action of mineral acids on metallic sulfides. It has the odor of rotten eggs. Syn., *Hydrogen sulfid*; *Sulfureted hydrogen*; *Sulfhydryl acid*. **A., Hypochlorous**, HClO , an unstable compound, important as a disinfecting and bleaching agent. **A., Hypogeic**, **A., Hypogeic**, $\text{C}_{16}\text{H}_{32}\text{O}_2$, a monobasic acid found in peanut (*Arachis hypogaea*) oil, occurring as fine, colorless, stellate groups of needles which melt at 33°C . and solidify again at $28^\circ\text{-}30^\circ\text{C}$., soluble in alcohol and ether, insoluble in water. **A., Hypophosphorous**, H_3PO_2 ; its salts (hypophosphites), also the dilute acid, and a syrup prepared from it, are used as remedial agents. **A., Ichthyolsulfonic**, $\text{C}_{25}\text{H}_{32}\text{S}_2\text{O}_6$, an acid produced from Tyrolean bituminous mineral by the action of sulfuric acid; it is strongly acid and contains about 16.4% of sulfur. It is antiphlogistic and astringent, and is used in the form of its salts, chiefly "ichthol," the ammonium salt. **A., Indoxylsulfuric**, an acid that, combined with potassium, occurs in the urine as indican. **A., Inorganic**, a mineral acid or one in which the carboxyl group $\text{CO}.\text{OH}$ is ab-

sent. **A., Iodic**, HIO_3 , a monobasic acid. Its solution (2%) has been recommended as an alterative by subcutaneous injection. **A., Iodosobenzoic**, $\text{C}_6\text{H}_4.\text{OI}.\text{COOH}$, a compound analogous in action to iodoform. **A., Isobutylcarbonic**, **A., Isobutylcarboxylic**. See *A., Valeric, Normal*. **A., Isobutylformic**, **A., Isopropylacetic**. See *A., Isovaleric*. **A., Isovaleric**, $(\text{CH}_3)_2.\text{CH}.\text{CH}_2.\text{CO}_2\text{H}$, an isomer of valeric acid, obtained from oil of valerian or from oxidation of amyl-alcohol; occurs as a transparent, colorless, oily liquid with odor of valerian and old cheese; melts at 51°C .; boils at 174°C . Sp. gr., 0.9470 at 0°C . Used in nervous affections. Maximum dose 10 drops; a day, 40 drops. Syn., *Monohydrated valerianic acid*; *Valerianic acid*; *Primary pantoic acid*; *Isobutyl carboxyl*; *Isopropylacetic acid*. **A., Jecoleic**, an acid forming one of the essential constituents of cod-liver oil and isomeric with doeglic acid. **A., Kombic**, a compound obtained by Fraser in the lead precipitate from an aqueous solution of alcoholic extract of strophanthin. It is freely soluble in water and of strongly acid reaction. **A., Lactic**, $\text{HC}_2\text{H}_3\text{O}_2$, a liquid containing 75% of absolute acid in 25% of water, produced in the fermentation of milk. It is useful in aiding digestion, in dialelcs, in tuberculosis of the larynx, and as a solvent of false membrane in diphtheria. Dose $\frac{1}{2}$ dr.- $\frac{3}{4}$ oz. (2-16 Cc.) in the 24 hours. **A., Lactic, Diluted** (B. P.), lactic acid, 3 oz., distilled water, sufficient to make one pint. Dose $\frac{1}{2}$ -2 dr. (2-8 Cc.). **A., Lactolactic**, **A., Lactylolactic**, $\text{C}_4\text{H}_7\text{O}_2$, a monobasic acid obtained from a solution of lactic acid heated to 130° to 140°C . Syn., *Lactyl lactate*; *Lactic anhydrid*; *Lactyl anhydrid*. **A., Lanoceric**, $\text{C}_{25}\text{H}_{48}\text{O}_2$, an acid resulting from the saponification of lanolin; it melts at 104°C . **A., Lanopalmitic**, $\text{C}_{26}\text{H}_{50}\text{O}_2$, resulting from the saponification of lanolin. It melts at 87°C . **A., Leucamic**. See *Leucin*. **A., Levulinic**, $\text{C}_5\text{H}_8\text{O}_3$, obtained from levulose, cellulose, cane-sugar, etc.; a very hygroscopic crystalline substance, soluble in water, ether, or alcohol, and melting at 33.5°C . **A., Linoleic**, $\text{C}_{18}\text{H}_{32}\text{O}_2$, occurs as a glycerid in drying oils, such as linseed oil, hemp oil, poppy oil, and nut oil. **A., Lupamaric**, the bitter acid of hops. **A., Lysuric**, $\text{C}_9\text{H}_{11}(\text{COC}_6\text{H}_4)_2\text{N}_2\text{O}_2$, a substance obtained by Drechsel from lysin by action of benzoyl chlorid. **A., Maleic**, **A., Maleinic**, $\text{C}_4\text{H}_4\text{O}_4$, obtained from malic acid by distillation; it occurs in prisms, soluble in water, alcohol, and ether, melting at 130°C ., boiling at 160°C . **A., Malic**, $\text{C}_4\text{H}_6\text{O}_5$, a dibasic acid, occurring free or in the form of salts in many plant-juices, in unripe apples, in grapes, and in mountain-ash berries. It forms deliquescent crystals that dissolve readily in alcohol, slightly in ether, and melt at 100° ; it has a pleasant acid taste. **A., Malonic**, $\text{C}_3\text{H}_4\text{O}_4$, occurs in the deposit found

in the vacuum pans employed in beet-sugar manufacture; it may be obtained by the oxidation of malic acid with chromium trioxid. **A., Mandelic**, $C_6H_5CH(OH)CO_2H$, formed from benzaldehyd by the action of prussic acid and HCl . **A., Margaric**, **A., Margaric**, $C_{37}H_{74}O_8$, a monobasic acid existing in nearly all animal fats and occurring as a solid substance melting at about $60^\circ C$. It is believed by some to be a mere mixture of palmitic and stearic acids. **A., Marine**, hydrochloric acid. **A., Meconic**, $C_7H_6O_4$, a tribasic acid, occurring in opium in union with morphin. It crystallizes with $3\frac{1}{2}H_2O$ in white laminae. **A., Mephitic**, carbon dioxide. **A., Mesotartaric**, inactive tartaric acid obtained by heating 30 parts of tartaric acid with 4 parts of water for 2 hours to $165^\circ C$. **A., Metaphosphoric**, HPO_3 , a glassy solid, freely soluble in cold water, and converted by boiling into orthophosphoric acid. It is used as a test for albumin in the urine. **A., Mineral**. See **A., Inorganic**. **A., Monobromacetic**, $C_2H_3BrO_2$, produced by heating acetic acid with bromin, it is esentia and antiseptic. Syn. **Bromacetic acid**. **A., Monoiodosalicylic**, $C_7H_5IO_3$, produced by boiling salicylic acid with iodin and alcohol. It is used in acute articular rheumatism. Dose 15-25 gr (1-3 Gm.) a day. **A., Mononitrosalicylic**, $C_7H_5(NO_2)O_3$, an acid obtained by action of nitric acid on indigo or on salicylic acid. Syn. **Indigotin acid**; **Nitrosalicylic acid**; **Nitrosalicylic acid**; **Indigo acid**. **A., Morphoxylacetic**, $C_7H_5NO_5$, $C_7H_5CO_2H$, a narcotic similar to morphin but weaker. **A., Muriatic**. See **A., Hydrochloric**. **A., Muriatic**, Dephlogisticated, **A., Muriatic**, Oxygenated, album. **A., Muriatic**, Superoxygenated, chloric acid. **A., Myocetonic**, an acid obtained from *Palmetto myocetonic*, occurring as a yellowish, oily, narcotic and extremely poisonous liquid. **A., Myronic**, $C_7H_5NS_2O_3$, an acid that occurs as a potassium salt in the seeds of black mustard. **A., α -Naphthalinsulfonic**, $C_{10}H_7SO_3H$, an acid occurring in white, opalescent zones with generally a tinge of red, freely soluble in water and alcohol, slightly in ether. It is a sensitive reagent for albumin. **A., Naphthionic**, $C_{10}H_7NH_2SO_3H$, an acid obtained from naphthylamin by action of ammonium sulfate. It is recommended as an antidote for nitrate poisoning; also in the treatment of urticaria and in troubles of the bladder originating in the alkaliescence of the urine. Dose 3-60 gr. (2-4 Gm.) daily. Syn. **α -Naphthylaminisulfonic acid**. **A., Naphthoic**, $C_{10}H_7O_2$, a crystalline substance of which 2 isomeric compounds may be formed by saponification of the 2 modifications of naphthionit. **A., Narcotic**. See **Narcotin**. **A., Nitric**, HNO_3 , a liquid consisting of 68% absolute acid in 32% of water. The pure acid is colorless, fuming, and highly caustic. It is used in cau-

terization of chancres and phagedenic ulcers and as a reagent. **A., Nitric**, Anhydrous, nitrogen pentoxid. **A., Nitric**, Dilute, contains 10% absolute acid. It is used internally to aid digestion, to stimulate the hepatic function, etc. Dose 1-15 min (2-10 Cc.), well diluted. **A., Nitric**, Monohydrated, pure nitric acid. **A., Nitro-**, an acid produced from another acid by replacing the hydrogen with nitryl (NO_2). **A., Nitroanilic**. Same as **A., Mononitrosalicylic**. **A., Nitrohydrochloric**, **A., Nitromuriatic**, a golden yellow, fuming mixture of 4 parts of nitric and 15 of hydrochloric acid. It is a solvent of gold, it is valuable in affections of the liver. Dose 1-7 min. (2-6 Cc.), very dilute. Syn. **Aqua regia**. **A., Nitrohydrochloric**, Dilute, consists of 4 parts nitric acid, 18 parts hydrochloric acid, and 75 parts water. Dose 5-25 min (2-3-13 Cc.), well diluted. **A., Nitrosenitric**, fuming nitric acid. **A., Nitrospiroylic**. See **A., Mononitrosalicylic**. **A., Nordhausen**, brown, fuming sulfuric acid, first manufactured at Nordhausen. **A., Nucleic**, **A., Nucleinic**, any one of a group of organic acids containing C , H , O , N , and a large proportion of P . The nucleic bases are present in the nucleic acid radicals as organic compounds. The nucleic acids occur in nature, free or in combination with albumin, when they are called primary acids. On decomposition they yield nucleic bases, and according to their origin are termed *sperma-nucleic acid*, *thymus-nucleic acid*, *yeast-nucleic acid*, etc. According to Kossel, there are in reality only 4 true nucleic acids, viz., *adenic acid*, *guanylic acid*, *sarcolic* (thymosanthonic) acid, and *xanthylic acid*. On decomposition the primary acids give rise to secondary acids which contain more phosphorus than the primary acids, and may or may not give rise to xanthin bases on further decomposition; according to Simon, they may be divided into acids of the type of *thymic acid* and of *thymine acid* respectively. **A., Oleic**, $C_{18}H_{34}O_2$, an acid present in many fats and oils. It is a colorless oil, crystallizing on cooling, soluble in alcohol, benzol, and the essential oils, insoluble in water. It saponifies when heated with alkaline bases. It is used in making the oleates. **A., Organic**, an acid characterized by the presence of the carboxyl group (CO_2OH). **A., Orthoamidosalicylic**, $C_7H_5NH_2COOH$, a gray, amorphous, slightly sweet, inodorous powder obtained by reduction of orthonitrosalicylic acid and insoluble in water, alcohol, and ether. It is employed in chronic rheumatism. Dose 3-7 gr. (2-25-0-5 Gm.). **A., Orthoboric**. See **Boron**. **A., Orthophosphoric**, H_3PO_4 , ordinary phosphoric acid, as distinguished from metaphosphoric and pyrophosphoric acids. **A., Oxmic**, OsO_3 , the oxid of osmium, one of the rarer elements; it occurs as yellow, acid,

burning crystals, yielding an intensely irritating vapor, has been recommended for hyperdermatic use in scabies, strumous glands, and cancer; is used in histology as a fixing agent and stain for fat. **A., Oxalic**, $C_2H_2O_4$, a colorless, crystalline solid, obtained by treating sawdust with caustic soda and potash. Occurs in many plants, chiefly as potassium oxalate; with 2 parts of water it crystallizes in fine, transparent monoclinic prisms. Is soluble in 9 parts of water at moderate temperature and quite easily in alcohol. Has been recommended in amenorrhea. In large doses it is a violent poison. **A., Oxuric**, Vauquelin's name for impure alloxanic acid. **A., Oxybutyric**. See *Oxybutyric*. **A., Oxygen**, an acid containing more oxygen than is requisite for saturation. **A., Oxymuriatic**. 1. Hydrochloric acid. 2. Chloric acid. 3. Chloric. **A., 3-Oxynaphthoic**, $C_{11}H_7O_3$, obtained from sodium betanaphthol by the action of carbon dioxide with heat. It is a surgical antiseptic. Syn., *β-Naphthol-carboxylic acid*, *3-Carbonaphthoic acid*. **A., Oxypropionic**, lactic acid. **A., Oxyproteic**, a neutral sulphur compound found in the urine. **A., Palmitic**, $C_{16}H_{32}O_2$, an acid existing as a glycerol ether in palm-oil and in most solid fats. **A., Parafumaric**. See *A. Maleic*. **A., Paralactic**. See *Sarcocollatic*. **A. of Pearls**, acid phosphate of sodium. **A., Periodic**, $HI O_3 + 2H_2O$, an acid obtained from iodine by the action of concentrated perchloric acid, is soluble in water and alcohol, slightly in ether, and melts at $130^\circ-133^\circ C$. Is a powerful oxidizer. Syn., *Hephioidic acid*. **A., Phenacetic**, found in the urine of herbivorous animals, sometimes in human urine. **A., Phenolsulfonic**. See *A. Sulfocarboxylic*. **A., Phenyllic**, phenol. **A., Phenylsalicylic**, $C_{12}H_{10}O_3$, a white, antiseptic powder, soluble in alcohol, ether, and glycerol, but very slowly in water; is used as a surgical dressing like *iodoform*. Syn., *Orthoxydiphenyl-carboxylic acid*, *Phenoxycarboxylic acid*. **A., Phenylsulfuric**. See *A. Sulfocarboxylic*. **A., Phocenic**. See *A. Valeric*. **A., Phosphoantimonic**, a yellowish, very acid substance, obtained from antimonium pentachlorid by the action of concentrated aqueous solution of sodium phosphate. Used as an alkaloid reagent. **A., Phosphocetic**, $C_{10}H_{17}N_3O_6$, a nitrogenous extraction of muscle. **A., Phosphoric**, H_3PO_4 , contains 50% each of acid and of water; is obtained from bones or by oxidation of phosphorus. Syn., *Orthophosphoric acid*. **A., Phosphoric, Anhydrous**, P_2O_5 , obtained from phosphorus by complete combustion, occurring as a bulky, light, white, transparent powder, soluble in water. Is used as a germicidal agent. **A., Phosphoric, Dilute**, contains 10% of absolute acid. Employed in digestive disturbances, in strumous diseases, and to dissolve phosphatic deposits. Dose 5-30 min. (0.32-2.0 Gm.). **A., Phosphoric, Glacial**. **A., Phosphoric, Monobasic**. See *A. Metaphosphoric*. **A., Phos-**

phorous, H_2PO_3 , a dibasic oxyacid of phosphorus, containing one atom of oxygen less than phosphoric acid. **A., Picric**, $C_6H_3(NO_2)_3OH$, obtained by the nitration of phenol. Forms pale yellow, shining, prismatic, laminar, or columnar crystals, which possess a very bitter taste. Is readily soluble in hot water; its solution dyes silk and wool a beautiful yellow color. It is recommended as an antiperiodic and anthelmintic. Used as a test for albumin and sugar. Dose 5-15 gr. (0.32-1.0 Gm.) a day. Syn., *Carbazotic acid*; *Trinitrophenol*. **A., Pimentic**. See *Eugenol*. **A., Pipitzahic**, **A., Pipitzahoinic**, $C_{19}H_{29}O_8$, a purgative principle discovered by Rio de la Loza in species of *Peregrina*, and also obtained from *Trixis radiale*. Used as a mild drastic. Dose 3-5 gr. (0.2-0.3 Gm.). **A., Pivalic**. See *A. Valeric*, *Tertiary*. **A., Plasminic**, a secondary nucleic acid obtainable from yeast. Is soluble in water and precipitates albumins in acid solution. Its phosphoric acid radicle is capable of forming a true organic iron compound containing 1% of iron. On decomposition with mineral acids by boiling it yields nucleic bases and phosphoric acid. **A., Polybasic**, acids containing several carboxyl groups. **A., Polychromic**. See *A. Aloetic*. **A., Propionic**, $C_3H_7O_2$, an oxidation-product of propyl alcohol; it is a clear, colorless liquid, with an odor like butyric and acetic acids, and a specific gravity of 1.013 at $0^\circ C$; is miscible with water and boils at $141^\circ C$. **A., Propionylsalicylic**, a compound obtained from salicylic acid by action of anhydrous propionic acid. Used in gout and rheumatism. **A., Prussic**. See *A. Hydrocyanic*. **A., Pyridintricarboxylic**, **A., Pyridintricarboxylic**, $C_8H_5NO_4$, an oxidation-product of cinchona alkaloids; it is a white, crystalline powder, soluble in water and alcohol, and melting at $250^\circ C$. Is antipyretic, antiseptic, and antiperiodic; used in whooping-cough, typhoid and intermittent fevers, etc., and externally as an injection in urethral inflammation. Dose 10 gr. (0.6 Gm.) 5 times daily. Syn., *Carbo-cinchomeronic acid*. **A., Pyro-**, an acid formed from another acid by action of heat. **A., Pyrogalllic**, $C_6H_6O_3$, pyrogallol, formed by heating gallic acid with water to 210° . It forms white leaflets or needles, is readily soluble in water, less so in alcohol and ether. Useful in the treatment of certain skin diseases; is poisonous and must be used with caution. **A., Pyroligneous**, crude acid obtained in the destructive distillation of wood. It is a clear liquid, of reddish-brown color and strong acid taste, with a peculiar penetrating odor described as empyreumatic, due largely to the furfural it contains. It contains from 4 to 7% of real acetic acid. **A., Pyrophosphoric**, the dihydric phosphate, $2H_2O \cdot P_2O_5$, one of the forms of phosphoric acid. It is poisonous. Its iron salt is used in medicine. The pure acid is a soft, glassy mass. **A., Pyrosorbic**. See *A. Maleic*. **A., Rheinic**.

See *A.*, *Chrysophanic*. **A.**, *Salicylacetic*, **A.**, *Salicyloacetic*, $C_9H_8O_4$, a reaction-product of sodium salicylate in a soda solution with sodium monochloroacetate, soluble in boiling water and alcohol, slightly in cold water, ether, chloroform, and benzene. It is antiseptic and used in the same manner as salicylic acid. Syn., *Acetomethylic acid*, *Salicyloxyacetic acid*, *Salicylhydroxyacetic acid*. **A.**, *Salicylic*, $C_7H_6O_3$, occurs in the buds of *Spiraea ulmaria*, in the oil of wintergreen, and in other varieties of gaultheria. It forms either a white crystalline powder, or white prismatic and acicular prisms without odor or taste. It is soluble in water and in chloroform, and is antiseptic; it is used in the treatment of acute articular rheumatism and myalgia. Dose 5-20 gr. (0.3-1.3 Gm.), not exceeding 1 dr. (4 Gm.) daily. Syn., *Ortho-phenzoic acid*. **A.**, *Salicylsulfonic*, **A.**, *Salicylsulfuric*. See *A.*, *Sulfosalicylic*. **A.** of *Salts*, hydrochloric acid. **A.**, *Sarcolactic*, $C_7H_8O_4$, occurs in blood and in muscles, to which it gives their acid reaction, especially after the muscles have been in a state of activity. It is also found in urine in phosphorus-poisoning. **A.**, *Sclerotonic*, an acid found in ergot, of which it is one of the active principles. **A.** of *Sea-salt*, hydrochloric acid. **A.**, *Septic*, nitric acid. **A.**, *Sphacelinic*, an acid, regarded as the constituent of ergot, which causes gangrene and develops the cachexia of that disease. **A.**, *Stearic*, $C_{18}H_{36}O_2$, associated with palmitic and oleic acids as a mixed ether, in solid animal fats, the tallow. **A.**, *Stibious*, SO_3 , a colorless, transparent mass, soluble in alcohol and carbon disulfide, and melting at $73.2^\circ C$. It is a caustic. Syn., *Antimonyous oxide of antimony*, *Antimony trisulfide*. **A.**, *Stibous*, $C_8H_8O_3$ (Gmelin), a crystalline substance obtained from oil of bitter almonds by action of fuming sulfuric acid. **A.**, *Succinic*, $C_4H_4O_4$, an acid obtained in the distillation of amber, and also prepared artificially. **A.**, *Sulfamic*, $(H_2N)_2SO_2H$, obtained by heating aniline (1 part) with fuming H_2SO_4 (2 parts) to 180° until SO_2 appears. It crystallizes in rhombic plates which effloresce in the air. It is used as a reagent. **A.**, *Sulfazotized*, a class of acids formed from potassium nitrate by action of sulfurous acid. **A.**, *Sulfocarbolic*, $C_6H_5HSO_3$, phenyl bisulfate, formed by the union of phenol and sulfuric acid. Its salts, the sulfocarbonates, are used in medicine as intestinal antiseptics, etc. **A.s**, *Sulfonic*, a class of acids of the general formula $Rn(SO_3 OH)_n$, when Rn is a radical whose valivalence is n . Such acids are derived from sulfuric acid by the substitution of a radical for hydroxyl, or they may be regarded as acid sulfites derived from sulfurous acid, H_2SO_3 , by the replacement of half its hydrogen by a basic radical. **A.**, *Sulfonic*. See *A.*, *Sulfanilic*. **A.**, *Sulfophenic*. See *A.*, *Sulfocarbolic*. **A.**, *Sulfophenolic*. Same as *Phenolsulfonic Acid*.

A., *Sulfosalicylic*, $C_7H_6SO_4$, an acid obtained from salicylic acid by the action of sulfuric anhydride, occurring as white crystals, soluble in water and alcohol, melting at $120^\circ C$, and colored an intense violet-red by ferric chlorid. It is used as a test for albumin in urine. Syn., *Salicylsulfonic acid*. **A.**, *Sulfothiocarbonic*. See *A.*, *Xanthogenic*. **A.**, *Sulfuric*, H_2SO_4 , a heavy, oily, corrosive acid, consisting of not less than 92.5 % sulfuric anhydride and 7.5 % of water. It is used as a reagent and as a caustic. Syn., *Oil of vitrol*. **A.**, *Sulfuric Aromatic*, contains 20 % acid, diluted with alcohol and flavored with cinnamon and ginger. It is used as an astringent in dysentery and in night-sweats; also in hemorrhoids. Dose 5-15 min. (0.32-1.0 Cc.). **A.**, *Sulfuric, Dilute*, contains 10 % strong acid to 90 % of water. It is used as an astringent. Dose 10-15 min. (0.65-1.0 Cc.), well diluted. **A.**, *Sulfuric, Fuming*, $H_2SO_4 \cdot SO_3$, an oily liquid, fuming in the air, obtained by reacting ferrous sulfate. Syn., *Nordhausen oil of vitrol*; *Nordhausen acid*. **A.**, *Sulfurous*, H_2SO_3 , a colorless acid containing about 64 % of sulfurous anhydride in 93.6 % of water. The gas, SO_2 , is a valuable disinfectant. The acid is used as a spray or lotion in dysentery, stomatitis, and as a wash for indolent and syphilitic ulcers. The various hyposulfites are mainly valuable in that they decompose and give off sulfur dioxide. Dose 5 min.-1 dr. (0.32-4.0 Cc.). **A.**, *Sulfhydric*. See *A.*, *Hydro-sulfuric*. **A.**, *Sumbulic*, **A.**, *Sumbulolic*. See *A.*, *Angelic*. **A.**, *Tannic*, $C_{12}H_8O_7$, an astringent acid obtained from nutgalls, and occurring in yellowish, sandy crystals. It is soluble in water and alcohol. It is an antidote in poisoning by alkalis and tartar emetic, and is used as an astringent in catarrh of mucous membranes, and externally in many skin diseases. Dose 100 gr. (0.005-1.3 Gm.). Syn., *Tannin*. (For preparations of *Tannic Acid* see respective headings.) **A.**, *Tanningenic*, **A.**, *Tanningic*. See *Catechin*. **A.**, *Tartaric*, $H_2C_4H_4O_6$, an astringent acid widely distributed in the vegetable world, occurring principally in the juice of the grape, from which it deposits after fermentation in the form of acid potassium tartrate (argol). It is chiefly employed in refrigerant drinks and in baking powders. 20 grains neutralize 27 of potassium bicarbonate, 22 of sodium bicarbonate, and 154 of ammonium carbonate. Dose 10-30 gr. (0.65-2.0 Gm.). **A.**, *Tartaric, Inactive*. See *A.*, *Mesotartaric*. **A.**, *Taurocholic*, $C_{26}H_{48}NSO_4$, occurs in bile; it is very soluble in water and alcohol and crystallizes in fine needles. **A.**, *Tetraboric*, $H_2B_4O_7$, forms a wax heated to $160^\circ C$, forming a glassy mass. Syn., *Pyroboric acid*. **A.**, *Tetrathiodichlorosalicylic*, $S_4C_7H_4Cl_2O_6$, obtained from salicylic acid by the action of carbon tetrachlorid and heat; it occurs as a reddish-yellow powder, soluble in aqueous alkali.

It is antiseptic and used as a dusting-powder. **A.**, **Thiacetylenic**. See **A.**, **Thioacetic**. **A.**, **Thio-**, an acid in which sulfur is substituted for oxygen. **A.**, **Thioacetic**, C_2H_3OS , a clear, pungent, sour liquid with a sulfureted hydrogen odor, obtained from glacial acetic acid and phosphorus pentasulfide. It is used as a substitute for sulfureted hydrogen in analysis. Syn., *Ethane-dithioic acid*, *Thiacetylenic acid*; *Thiacetic acid*, *Acetisulfuric acid*. **A.**, **Thiolinic**, a dark mass, consisting of linseed oil and sulfur (bixid), used in skin diseases. Syn., *Sulfurated linseed oil*; *Thiolin*. **A.**, **Thioncarbohydriol**. See **A.**, **Xanthogenic**. **A.**, **Thio-salicylic**, $C_7H_5SO_3$, a brownish-yellow mass obtained from amidobenzoic acid by the successive action of nitrous acid and sulfureted hydrogen, a surgical antiseptic. **A.**, **Trichloracetic**, $HC_2Cl_3O_2$, an acid formed from acetic acid, 3 atoms of the hydrogen of which are, in the new acid, replaced by chlorine. It is used as a reagent for the detection of albumin in the urine and as a caustic. **A.**, **Trichlorcarboic**, **A.**, **Trichlorphenic**. See *Trichlorphenol*. **A.**, **Tricyanic**, $H_4C_3N_4O_2$, obtained from tricyanogen chloride by boiling it with water and alkalis. It crystallizes from aqueous solution with two molecules of water in large rhombic prisms; soluble in 40 parts of cold water; easily soluble in hot water and in alcohol. Syn., *Cyanuric acid*. **A.**, **Trimethacetic**, **A.**, **Trimethylacetic**, **A.**, **Trimethylcarbincarbonic**. See **A.**, **Valeric**, **Tertiary**. **A.**, **Tumenolsulfonic**, a substance obtained from tannol by action of fuming sulfuric acid, used as a dusting-powder. **A.s**, **Uramic**, a series of carbamid (CONH)—compounds occurring in the urine after the ingestion of amido-acids. They comprise methylhydantoinic acid, taurocarbamie acid, uramidobenzoic acid, and tyrosinhydantoinic acid or hydantoin hydroparaeumaric acid. They are found after the ingestion of sarcosine or methylglycocoll, of taurin, amidobenzoic acid, and tyrosin respectively. **A.**, **Ureous**. See *Xanthin*. **A.**, **Uric**, $C_4H_4N_2O_6$, an acid found in the urine of all animals, especially man and the carnivora, rarely in the herbivora, abundantly in the excrement of birds, reptiles, and mollusks. It exists usually in combination with the metals of the alkaline group. It is separated from urine by adding hydrochloric acid and allowing the crystals to settle. **A. of Urine**. 1. Phosphoric acid. 2. Uric acid. **A.**, **Urobenzoic**. See **A.**, **Hippuric**. **A.**, **Valeric**, $C_5H_{10}O_2$, is formed by oxidizing normal amyl alcohol. It is a mobile liquid with rancid acid taste and the pungent smell of old cheese. **A.**, **Valeric**, **Active**. See **A.**, **Metacetylenacetic**. **A.**, **Valeric**, **Normal**, $C_5H_{12}O_2$, $CH_3(CH_2)_3CO_2H$, an isomer of valeric acid, first prepared by Lieben and Rossi from pentanitril (C_5H_7CN), it is a liquid with odor of normal butyric acid, boiling at $186^\circ C$,

melting at $59^\circ C$. Sp. gr., 0.9568 at $0^\circ C$.; Syn., *Pentonic acid*; *Normal propylacetic acid*, *Isobutyl carbonic acid*. **A.**, **Valeric**, **Tertiary**, $(CH_3)_3C \cdot CO_2H$, a fatty crystalline acid containing a tertiary alcohol radicle, discovered by Butlerow, who obtained it synthetically from tertiary butyl alcohol, melts at $35^\circ C$, boils at $173^\circ C$. Syn., *Pivalic acid*; *Trimethylacetic acid*, *Pseudovaleric acid*; *Trimethacetic acid*, *Pinalic acid*; *Trimethylcarbincarbonic acid*. **A.**, **Veratric**, $C_9H_8O_4$, occurs with veratrin in sabadilla seeds; soluble in water and alcohol. **A.**, **Viburnic**, ordinary valeric acid discovered in *Viburnum opulus*. **A.s**, **Vinic**, acids obtained from alcohol by action of acids. **A.**, **Vitriolic**, sulfuric acid. **A.**, **Xanthogenic**, $HO \cdot CS \cdot SH$, an acid not existing in the free state; the xanthates are obtained from it. Syn., *Sulfo-thiocarbamic acid*; *Thioncarbohydriol acid*. **A.s**, **Xanthoproteic**, nitrogenous substances obtained from solutions of proteids by action of nitric acid. **A.**, **Xanthylic**, a primary nucleic acid yielding xanthin on decomposition. **A.**, **Yeast-nucleic**, $C_{12}H_{16}N_4O_{13} \cdot 2P_2O_5$, a primary nucleic acid occurring in yeast; it contains a carbohydrate group, as Kossel was able to obtain from it a hexose and a pentose. **Acidalbumin** (*as-id-al-bu'-min*). A proteid acted upon or dissolved in the stronger acids, and yielding an acid reaction. **Acidemia** (*as-id-e'-me-ah*). A condition of decreased alkalinity of the blood. **Acidifiable** (*as-id-i-ji'-a-bl*) [*acidum*, acid; *feri*, to become]. Capable of becoming sour. **Acidifiant** (*as-id-i-ji'-i-ant*). See *Acidifiable*. **Acidification** (*as-id-i-ji'-ik-a-shun*) [*acidum*, acid; *facere*, to make]. Conversion into an acid; the process of becoming sour. **Acidimeter** (*as-id-im'-et-er*) [*acidum*, acid; *metron*, a measure]. An instrument for performing acidimetry. **Acidimetry** (*as-id-im'-et-er*) [see *Acidimeter*]. Determination of the free acid in a solution by an acidimeter or by chemie reactions. **Acidity** (*as-id-i-ty*) [*acidum*, acid]. The quality of being acid; sourness; excess of acid. **Acidophil**, **Acidophile** (*as-id-i-phi*) [*acidum*, acid; *philos*, loving]. 1. Susceptible of imbibing acid stains. 2. A substance having an affinity for acid stains. **Acidosis** (*as-id-i-sis*) [*acidum*, acid]. Acid conditions producing the comatogenous states of diabetes. **Acidoxyl** (*as-id-oks'-il*). A compound of an acidyl or acid radicle with oxygen. **Acidulated** (*as-id-i-ula-ted*) [*acidulare*, to make sour]. Somewhat sour or acid. **Acidulous** (*as-id-i-u-lus*) [see *Acidulated*]. Moderately sour. **Acidum** (*as-id-um*) [*L.*]. See *Acid*. **Acinesia** (*as-in-e'-ze-ah*). See *Akinesia*. **Acinetic** (*as-in-et-ik*). See *Actinic*. **Aciniform** (*as-in-i-orm*) [*acinus*, a grape]. Grape-like. **Acinose** (*as-in-oz*). See *Acinous*. **Acinotubular** (*as-in-o-tu'-lu-lar*) [*acinus*, 2.

grape, *tubulus*, a tube]. Applied to a gland or other structure having tubular acini or secreting sacs.

Acinous (ah'-in-us) [*acinus*, a grape]. 1. Relating to an acinus or having acini. 2. Resembling a grape or a cluster of grapes; composed of granular concretions.

Acinus (ah'-in-us) [*acinus*, a grape; pl., *acini*]. Any one of the smallest lobules of a compound gland, as an *acinus* of the liver.

Aclastic (ak'-le's-tik). Not refracting.

Acleidian (ah'-le'-de-an) [*a*, priv., *akleia*, the corlar bone]. Without clavicles.

Acme (ak'-me) [*akros*, a point]. The highest point. The crisis or critical stage of disease.

Acmon (ak'-mon) [*akros*, an anvil]. The incus.

Acne (ak'-ne) [*akros*, a point]. A common, usually chronic, inflammatory disease of the sebaceous glands, occurring mostly about the face, chest, and back. The lesions may be papular, pustular, or tubercular. It occurs usually between the ages of puberty and 24 years; is generally worse in winter, and is associated with menstrual and gastrointestinal troubles. The individual lesions consist of innate pink, acuminate papules or pimples, in the center of which is a black-tipped comedo (*A. punctata*, *A. papulosa*). Syn., *Acne vulgaris*; *Acne vulgaris*; *Warts*, *Stone pimp*, *Acne boutonneuse*, *Acne eruptiva*. **A., Adenoid.** See *Lupus*, *Disseminated*. **Follicular.** **A. adolescentium.** Synonym of *A. vulgaris*. **A. albid.** Synonym of *Milium*. **A., Arthritic,** a form common in adults, especially in women at the climacteric, and thought to be connected with the arthritic diathesis. **A. artificialis**, that form that disappears when the cause is removed. **A. atrophica.** Synonym of *A. varioliformis*. **A., Bromin.** See *A. coagminata*. **A. cachecticorum**, a form occurring in debilitated, cachectic persons after prolonged wasting diseases, as phthisis. The eruption occurs usually on the trunk or legs, and is characterized by flat, dull-red papules and pustules of the size of a pin-head to that of a lentil. **A. cheloidienne.** See *Dermatitis papularis capillata*. **A., Chlorin**, a form occurring among men engaged in manufacturing hydrochloric acid. The skin of the face is pigmented, comedones and pustules of varying size are thickly scattered over the face, brow, scalp, neck, back, upper thorax, genitals, and inner surface of the thighs. Athetosis and curious contortions resembling those of Darier's disease are present on the scalp. **A. ciliaris**, one at the edges of the eyelids. **A. coagminata**, a form in which the lesions occur in clusters. The name is generally applied to the acne due to the external use of bromin or its compounds, the groups of closely aggregated pustules form dark patches covered with scales of dried pus, presenting beneath a dusky red and often moist surface. **A., Concrete.** See *Scharrkraut*. **A. congestiva.** See *A. rosacea*. **A. contagiosa**, an infectious pustular disease of horses, said to differ from

horse-pox. **A. cornea**, conic, discolored outgrowths, grouped or solitary, consisting of hard plugs of sebaceous matter projecting from the follicles. Syn., *Lenthyosis follicularis*. **A. decalvans**, an inflammatory disease of hair-follicles with destruction of the hairs and atrophy or cicatrization of the skin. **A. disseminata.** Synonym of *A. vulgaris*. **A., Elephantiasic.** See *A. hypertrophica*. **A. erythematosa.** See *A. rosacea*. **A., Fluent.** See *Scharrkraut oleum*. **A. frontalis.** See *A. varioliformis*. **A. generalis**, acne that has become general over the surface of the body. **A. granulosa.** See *A. cachecticorum*. **A. hordeolans**, **A. hordeolaris**, a form with the pustules arranged in linear groups. **A. hypertrophica**, a stage of acne rosacea in which there is a permanent, intensely red, non-inflammatory, nodulated thickening of the tips and sides of the nose, expanding it both laterally and longitudinally. **A. indurata**, a variety of acne vulgaris characterized by chronic, livid indurations, the result of extensive perifollicular infiltration. It is especially seen in strumous subjects. **A. keratosa**, a rare form in which a horny plug takes the place of the comedo, and by its presence excites inflammation. **A. luposa.** See *A. telangiectodes*. **A. medicamentosa**, acne due to the internal administration of certain drugs—as iodine, bromin, etc. **A. mentagra.** See *Sycosis*. **A. miliaris.** 1. *Milium*. 2. A pustular variety of acne rosacea. **A., Miliary Arthritic.** See *A. cachecticorum*. **A., Miliary Scrofulous**, a variety of the disease usually occurring on the forehead, the pustules are small, discrete, or confluent, and often arranged in geometric figures. **A. molluscoidea**, **A. molluscum.** See *Molluscum contagiosum*. **A. necrotica.** See *A. varioliformis*. **A. pancreatica**, small cysts in the pancreas due to obstructions of the smaller ducts. **A. papulosa.** See *Acne*. **A., Penicilliform.** See *Tinea asbestina*. **A. picealis**, a form of dermatitis common in fiber dressers who work with paraffin and in persons otherwise brought in contact with tar or its vapor. It involves chiefly the extensor surfaces of the limbs. Syn., *Tar acne*. **A., Pilous**, a variety in which the pustules involve the hair-bulbs. **A., Pilous, Umbilicated**, a variety in which each pustule is umbilicated and pierced by a hair. **A. punctata**, a variety of acne vulgaris. **A. punctata albid.** See *Milium*. **A. pustulosa**, a variety of acne vulgaris characterized by abscesses. **A. rhinophyma.** Same as *A. hypertrophica*. **A. rodens.** Synonym of *A. varioliformis*. **A. rosacea**, a chronic hyperemic or inflammatory affection of the skin, situated usually upon the face, especially the nose, cheeks, forehead, and chin. Syn., *Rosacea*; *Telangiectasia faciei*, *Narvus araneus*, *Brandy nose*; *Warts nose*, *Spider nevus*, *Spider cancer*. **A. rosacea congestiva.** See *A. hypertrophica*. **A. scrofulosa**, a variety of acne cachecticorum, oc-

curring in strumous children. **A. sebacea.** Synonym of *Seborrhea*. **A. sebacea cornea.** See *Darier's Disease*. **A. sebacea molluscum.** See *Atheroma*. **A., Sebaceous, Crusty.** See *Seborrhoea sicca*. **A., Sebaceous, Dry, A. sebacea exsiccata.** See *Nevoides*. **A., Sebaceous, Fluent.** See *Seborrhoea oleosa*. **A. simplex,** a variety of *acne vulgaris*. **A. solaris,** a form due to exposure to the sun, marked by red papules that seldom suppurate, occurring on the nose, lower eyelids, and cheeks. **A. sycosiformis.** Same as *Sycosis non-parasitica*. **A., Syphilitic, A. syphilitica,** a form with inflammation in the follicles, appearing in scattered, pointed pustules with copper-colored base. Syn., *Acneiform syphiloderma*. **A. tarsi,** an inflammatory affection of the large sebaceous glands of the eyelashes (meibomian glands). **A. telangiectodes, A. teleangiectodes,** Kaposi's name for a nonpustular disease having its origin in the hair follicles and presenting smooth, shining, circumscribed, hemispheric nodules, pale-pink to brownish-red in color, from a pinhead to a cherry-stone in size. Epithelial cyst formation and degeneration of the hair-follicle attend it. Syn. *Disseminated follicular lupus simulating acne*; *Acne luposa*; *Lupus miliaris*; *Lupus follicularis acneiformis*; *Acute disseminated nodular tuberculous lupus*. **A. tubercata, A. tuberculosa.** See *A. indurata*. **A., Tuberculoïd, A., Tuberculous, Umbilicated, A. umbilicata.** See *Molluscum contagiosum*. **A., Varicose,** a form characterized by dilated superficial capillaries. **A. varioliformis,** a somewhat rare disease, situated chiefly about the forehead, at the junction with the hairy scalp, and extending into the hair. The pustules appear in groups. Its etiology is unknown. **A. vulgaris.** See *Acne*.

Acnemous (ak'-ne-mus) [i, priv.; *ak-nuz*, leg]. Having imperfect calves; having no legs.

Acocanthera (ak-o-kan-the'-ra) [akank, a point; *ak-tye*, blooming]. A genus of plants of the order *Apocynaceae*. *A. abyssinica* yields an African arrow-poison, *nshangu*, secured from a decoction of the branches, the toxic property being due to a crystalline glucosid, $C_{20}H_{32}O_8$. *A. deflexa* and *A. schimperi* are used as arrow-poisons in Africa. The poisonous principles are crystalline glucosids. *A. senegalensis* is a species indigenous to southern Africa; a decoction of the bark is used by the natives to poison arrows. The poisonous principle is a glucosid, *acocantherin*, similar to or identical with *ouabain*.

Acotin (ak'-o-in) Hydrochlorate of dipara-aminomonoparaphenylguanidin, a white powder, used in infiltration anesthesia by Schleich's method in a 1:1000 solution of 0.5% solution of sodium chlorid; also in 1% aqueous solution in ophthalmology.

Aconite (ak'-on-ite). See *Aconitum*.

Aconitic Acid (ak'-on-ite'-ik). See *Acid, Aconitic*.

Aconitin (ak'-on'-i'-in), $C_{33}H_{45}NO_{11}$, *aconitina* (U. S. P.). An intensely poisonous alkaloid from *Aconitum napellus* and other species; it occurs as white, flat crystals of slightly bitter taste. Dose $\frac{1}{10}$ gr. (0.0003 Gm.). Syn., *Aconiticum*; *Aconitinum*. **A., Amorphous,** a mixture of several bases found in the bulbs of *Aconitum napellus*. Its principal constituents are aconitin and picroaconitin. It is 15 or 20 times less poisonous than pure crystallized aconitin. **A., British,** $C_{33}H_{45}NO_{11}$ (Wright), the alkaloid prepared by Morson from *Aconitum jerox*. It is a yellowish white, crystalline powder. Dose $\frac{1}{10}$ gr. (0.0002 Gm.). Also called *English aconitin*; *Acraconitin*; *Morson's napellin* or *pure aconitin*; *Hubschmann's pseudoaconitin*; *Flückiger's nepalin*. **A., Duquesnel's.** See *A. Nitrate*. **A. Hydrobromate,** $C_{33}H_{45}NO_{11}HBr + 24H_2O$ (Jürgens), from crystalline aconitin, occurring as small white tablets, soluble in water and alcohol. Dose the same as the crystalline alkaloid. **A. Hydrochlorate,** $C_{33}H_{45}NO_{11}HCl + 3H_2O$ (Jürgens), a white, crystalline powder from crystalline aconitin, soluble in water and alcohol. Dose about the same as the alkaloid. Syn., *Aconitin chlorhydrate*; *Aconitin hydrochlorite*. **A. Nitrate,** $C_{33}H_{45}NO_{11}HNO_3$, fine white prisms or rhombic crystals, it is highly poisonous and is used in neuralgia and rheumatism. Dose about the same as the alkaloid. Syn., *Duquesnel's aconitin*. **A. Phosphate,** a salt of aconitin. It occurs as a white, crystalline powder or as a yellowish-white, amorphous powder. **A. Salicylate,** a salt of aconitin occurring as a white, crystalline powder or as a yellowish-white, amorphous powder. **A. Sulfate,** $(C_{33}H_{45}NO_{11})_2H_2SO_4$, a salt of aconitin occurring as a crystalline powder, in glass-like lumps, or as a yellowish-white, amorphous powder.

Aconitina (ak-on-ite'-nah). 1. See *Aconitin*. 2. An impure aconitin, or combination of principles obtained from the root of *Aconitum napellus*, as prepared by Morson. Its salts do not crystallize, but form gum-like masses.

Aconitum (ak-on-ite'-lum) [L]. The root of *Aconitum napellus*. It possesses a bitter, pungent taste, and produces numbness and persistent tingling in the tongue and lips. Is very poisonous. It depresses the heart, respiration, circulation, and paralyzes the sensory nerves. Is antipyretic, diaphoretic, and diuretic. The active principle is *aconitin*. As a diaphoretic and depressant to the circulation it is highly beneficial in fevers, acute throat affections, and inflammation of the respiratory organs. Dose $\frac{1}{2}$ gr. (0.02-0.13 Gm.). **Aconiti, Abstrac-tum,** has double the strength of the powdered drug or its fluidextract. Dose $\frac{1}{4}$ gr. (0.016-0.005 Gm.). **A., Extractum.** Dose $\frac{1}{4}$ gr. (0.011-0.022 Gm.). **A., Fluidextractum** (U. S. P.), has a strength of 1 drop to the grain of the powdered drug. Dose $\frac{1}{2}$ min. (0.023-0.13 Gm.). **A., Linimentum** (B. P.), aconite root, camphor, and rectified spirit. **A., Oleatum,**

- 2% solution of aconite in oleic acid. **A., Tinctura** (U. S. P.), contains aconite 35, alcohol and water each sufficient to make 100 parts. Dose 4-4 min to 0.3-0.26 Gm.). **A., Unguentum** (B. P.), 8 grains to the ounce.
- Acoprous** (ah-kop'-e-us) [ā, priv.; *akopos*, satisfaction]. Characterized by the absence of excrement in the bowels.
- Acorea** (ah-ko-re'-ah) [ā, priv.; *akopos*, pupil]. Absence of the pupil.
- Acoria** (ah-ko'-re-ah) [ā, priv.; *akopos*, satisfaction]. 1. A greedy or insatiable appetite. 2. Temperance in eating. 3. A nervous stomach affection characterized by a sense of fullness.
- Acormus** (ah-kor'-mus) [ā, priv.; *akopos*, the trunk]. A monster without a trunk or body.
- Acorus** (ak'-o-rus). See *Culpinus*.
- Acosmia** (ah-kos'-me-ah) [ā, priv.; *akopos*, order]. 1. Poor health. 2. Irregularity in the course of a disease. 3. Ataxia. 4. Baldness. 5. Any deformity causing irregularity of the features. Syn., *Acosmy*.
- Acoulaleon** (ah-koo-la'-le-on). An instrument used in teaching speech to deaf-mutes.
- Acoumeter, Acouometer** (ah-koo-me-ter, ah-koo-om'-e-ter) [*akouo*, to hear; *metron*, a measure]. 1. An instrument for measuring the acuteness of hearing. 2. An instrument arranged to give a typical sound of a vowel, which may be used as a standard to which other sounds may be referred.
- Acoumetric, Acoumometric** (ah-koo-met'-rik, ah-koo-mo-met'-rik). Pertaining to the auditory sense or to the power of estimating the relative distance of sounds. Syn., *Acusmetricus*; *Acusmometricus*.
- Acouphone** (ah'-koo-fon) [*akouo*, to hear; *phonē*, sound]. A mechanism to aid defective hearing.
- Acousia** (ah-koo'-se-ah) [*akousia*, constraint]. 1. Involuntary action. 2. The faculty of hearing audition.
- Acousmatagnosis** (ah-koo-sat-ag-no'-sis). Inability to memorize sounds.
- Acousmatamnesia** (ah-koo-sat-am-ne'-ze-ah). Inability to remember sounds.
- Acusmetric** (ah-koo-smet'-rik). See *Acoumetric*.
- Acoustic, Acoustics** (ah-koo-s'-tik or a-koo-s'-tik) [*akoustikos*]. Relating to the ear or science of sound. **A. Duct**, the external meatus of the ear. **A. Nerve**, the eighth cranial nerve.
- A. Tetanus**, the rapidity of the induction shock in a frog's nerve-muscle preparation, as measured by the pitch of a vibrating rod. **A. Tubercle**, a rounded elevation on either side of the floor of the fourth ventricle.
- Acousticon** (ah-koos'-tik-on). An ear-trumpet.
- Acononitin**. See *Pseudonitin*.
- Acrania, Acranial** (ah-kra'-ne-ah, ah-kra'-ne-al) [ā, priv.; *skranion*, skull]. The condition of a monster with partial or complete absence of the cranium.
- Acratutesis** (ah-kra'-u-re'-sis) [*akratutēs*, lack of strength; *akratē*, incontinence]. Inability to incontinence from atony of the bladder.
- Acree-Rosenheim Formaldehyd Reaction in Testing for Proteins**. Put a few drops of a solution of formaldehyd (1 : 5000) in a solution of protein and mix well. After 2-3 minutes allow a little concentrated sulphuric acid to flow into the test-tube slowly, so that the two solutions do not mix. A violet color appears at the line of contact.
- Acrid** (ak'-rid) [*acer*, sharp]. Pungent; irritating.
- Acridin** (ak'-rid-in) [*acrid*], $C_{10}H_8N$. A substance produced by heating anilin and salicylaldehyd to 260° with $ZnCl_2$. It dissolves in dilute acids with a beautiful green fluorescence, and has a very pungent odor.
- Acrinyl Sulphocyanate** (ak'-rin-il). An acrid and vesicating substance found in white mustard.
- Acritical** (ah-krit'-ik-al) [ā, priv.; *akros*, a crisis]. Without a crisis, not relating to a crisis.
- Acroesthesia**. See *Acrosthesia*.
- Acroanesthesia** (ak-ro-an-es-the'-ze-ah) [*akros*, extremity; *anesthesia*, want of feeling]. Anesthesia of the extremities.
- Acroarthritis** (ak-ro-ar-thrit'-tis). Arthritis of the extremities.
- Acroasphyxia** (ak-ro-as-fik'-e-ah) [*akros*, extremity; *ā*, priv.; *akros*, pulse]. Asphyxia of the extremities. Phenomenon of Raynaud.
- Acroblast** (ak'-ro-blast) [*akros*, extremity; *blastē*, a germ]. Kollmann's term for that part of the germinal membrane of the embryo which gives rise to blood-vessels filled with blood and probably connective tissue.
- Acrobystitis** (ak-ro-bis-ti'-tis). Inflammation of the prepuce.
- Acrocephalia** (ak-ro-sef'-a-le-ah) [*akros*, the summit; *kephalē*, the head]. Deformity of the head, the top of which is more or less pointed.
- Acrocephalic, Acrocephalous** (ak-ro-sef'-al-ah, ak-ro-sef'-al-us). See *Acrocephalia*.
- Acrocinesis, Acrocinetic**. See *Acrokinesis*.
- Acrocyanosis** (ak-ro-si-an-o'-sis) [*akros*, extremity; *kyanos*, blue]. Blueness of the extremities due to vasomotor disturbance.
- Acrodynia, Acrodynia** (ak-ro-din'-e-ah, ak'-ro-din'-e-ah) [*akros*, extremity; *dynē*, pain]. 1. Epidemic erythema; a disease closely allied to pellagra. Characterized mainly by pricking pains in the palm and soles, hyperesthesia followed by anesthesia of these parts, and an erythematous eruption, preceded by bullae, chiefly on hands and feet. Followed by exfoliation and dark-brown or black pigmentation. Syn., *Pedionitico epidemia*, *Erythema epidemicum*. 2. Clarus' term for a rheumatic disorder of the nerves.
- Acroesthesia** (ak-ro-es-the'-ze-ah) [*akros*, extreme; *esthesia*, sensation]. Exaggerated sensitiveness or sensibility.
- Acrokinesis** (ak-ro-kin'-e-sis) [*akros*, extreme; *kinēsis*, movement]. Abnormal freedom of action, as in certain cases of hysteria.
- Acrokinetic** (ak-ro-kin'-e-ik). See *Acrokinesis*.
- Acrolein** (ak-ro-le-in) [*acer*, sharp; *oleum*, oil]. C_2H_3O . Acrylic aldehyd. A colorless mobile liquid, of pungent odor, derived from the decomposition of glycerol.
- Acromania** (ak-ro-ma'-ne-ah) [*akros*, extreme; *mania*, madness]. Incurable insanity.
- Acromastitis** (ak-ro-mas-ti'-tis) [*akros*, extreme; *mastē*, nipple; *itis*, inflammation]. Inflammation of the nipple.
- Acromegalia** (ak-ro-meg-a'-le-ah). See *Acromegaly*.

Acromegaly (ak-ro-meg'-al-e). Abnormal development of the extremities associated with disease of the pituitary body or thyroid gland.

Acromial (ak-ro'-me-ah) [ἀκρος, the summit; ὤμος, the shoulder]. Relating to the acromion.

Acromioclavicular (ak-ro-me-o-kla-vik'-u-lor) [ἀκρομιαὶς clavicle]. Relating to the acromion and the clavicle.

Acromiocracoid (ak-ro-me-o-kor'-ak-oid). Pertaining to the acromion and the coracoid process.

Acromiohumeral (ak-ro-me-o-hu'-mer-al) [ἀκρομιαὶς, humerus]. Relating to the acromion and the humerus. **A. Muscle**, the deltoid.

Acromion (ak-ro'-me-on) [ἀκρος, the summit; ὤμος, the shoulder]. The triangular-shaped process at the summit of the scapula.

Acromi thoracic (ak-ro-me-o-tho-ras'-ik) [ἀκρομιαὶς, thorax]. Relating to the acromion and thorax.

Acromphalus (ak-rom'-fal-us) [ἀκρον, point; ὄμφη, the navel] 1. The center of the umbilicus, to which the cord is attached. 2. The first stage of umbilical hernia, marked by a pouting of the navel. 3. The remains of the umbilical cord attached to the child.

Acromyle (ak-rom'-il-e) [ἀκρον, point; μύη, patella]. The patella.

Acronarcotic (ak-ro-nar-kot'-ik) [acer, sharp; narcotic] 1. Both acid and narcotic. 2. An agent which combines an irritating and obtunding effect, acting directly upon the peripheral nerves when applied externally, or upon the brain and spinal cord, producing paralysis, convulsions, and narcosis.

Acronuerosis (ak-ro-nu-ro'-tis) [ἀκρον, extremity; νευρῶν, a nerve]. Any neurosis manifesting itself in the extremities.

Acronychous (ak-ron'-ik-us) [ἀκρόνυχος]. Having claws, nails, or hoofs, achronychous.

Acronyx (ak'-ro-niks) [ἀκρον, extremity; ὄνυξ, a nail]. Ingrowing of the nail.

Acroparalysis (ak-ro-par-ah'-is-is) [ἀκρον, extremity; παράλυσις, palsy]. Paralysis of the extremities.

Acroparesthesia (ak-ro-par-es-the'-ze-ah) [ἀκρον, extremity; παρᾶ, around; αἴσθησις, sensation]. Abnormal or perverted sensation in the extremities.

Acropathology (ak-ro-path-ah'-o-j-e) [ἀκρον, extremity; πάθος, disease; λόγος, treatise]. The pathology of the extremities.

Acropathy (ak-ro-p'-a-the) [ἀκρον, extremity; πάθος, disease]. Any disease of the extremities.

Acrophobia (ak-ro-f'-o-be-ah) [ἀκρον, a height; φόβος, fear]. Morbid dread of being at a great height.

Acroscleroderma (ak-ro-skler-a-der'-mah). See Sclerodactylia.

Acrose (ak'-rōz). A substance isolated from condensation-products of glycose (an oxidation-product of glycerol) and formaldehyd, forming the starting-point for the synthesis of fruit-sugar, grape-sugar, and mannose.

Acrosphacelus (ak-ro-sphas'-el-us). Gangrene of the digits.

Acrostichum (ak-rost'-tik-um) [ἀκρον, a point; στίχον, a line of writing]. A genus of ferns

of the order Polypodiaceae. *A. aureum*, a tropical species; the rhizome is used in decoction for dysentery and disease of the spleen. A salt prepared from the leaves is applied to ulcers. *A. dichotomum*, an Arabian species [medjebese or mejahese]; the leaves are applied to burns. *A. javens*, a South American species, used as a laxative. *A. jurcatum*, an Australian species having edible rhizomes. *A. huacaro*, a Peruvian species. It is said to be sudorific and anthelmintic. *A. sorbifolium*, a West Indian species. The juice is mixed with oil, ginger, and pepper, and used as a cataplasm in sick headache.

Acrotarsium (ak-ro-tar'-se-um) [ἀκρον, the summit; τάρσος, the tarsus]. The instep.

Acroteric (ak-ro-ter'-ik) [ἀκροτήριον, the extremities]. Relating to the extremities; applied to conditions in which the extremities are most affected.

Acrotic, Acrotism (ak-krot'-ik, ah'-krot-izm) [α, priv.; ἀκρῶς, a striking]. Any defective beating of the pulse, failure of the pulse.

Acrylaldehyd (ak-ril-al'-de-hud). See *Acrolein*.

Actæa (ak-te'-ah) [ἄκτῃ, the elder]. A genus of ranunculaceous plants having active medicinal qualities. *A. alba*, the white cohosh, has much the same qualities as *A. spicata*. *A. cimicifuga* and *A. racemosa* are more important. See *Cimicifuga*. *A. rubra*, red cohosh, and *A. spicata* are purgative and emetic.

Actinic (ak-tin'-ik) [ἄκτις, a ray]. Those rays of the spectrum capable of producing chemic changes; found in the violet and ultraviolet parts.

Actinism (ak'-tin-izm). Chemic quality of light.

Actinium (ak-tin'-e-um) [see Actinic]. A supposed element discovered by Phipson in 1881 in association with zinc. It is metallic and is said to resemble titanium.

Actinobolia (ak-tin-o-bo'-le-ah) [ἀκτινοβολία, to radiate]. 1. A term formerly used to express the process by which the impulses of the will are conveyed to the different parts of the body. 2. Van Helmont's term for the phenomena now included under hypnotism.

Actinocerate, Actinoceros (ak-tin-os'-er-at, -us) [ἄκτις, a ray; κέρας, a horn]. Having horn-like processes radiately arranged.

Actinochemistry (ak-tin-o-chem'-is-tree) [ἄκτις, a ray; χημεία, chemistry]. Chemistry dealing with decomposition of substances by light.

Actinodermatitis (ak-tin-a-der-mat'-itis) [ἄκτις, a ray, dermatitis]. Cutaneous lesions produced by application of the roentgen-rays. Syn., *Radiodermatitis*.

Actinogram (ak-tin'-o-gram) [ἄκτις, a ray; γραφῶν, to write]. The record made by the actinograph.

Actinograph (ak-tin'-o-graf). An apparatus to measure the actinism of sunlight.

Actinomyces (ak-tin-om'-i-s-es) [ἄκτις, a ray; μύκη, a fungus; pl., actinomyces]. A vegetable parasite, the cause of the disease actinomycosis. It is also called the ray-fungus. It probably belongs to the cladothrix group of schizomycetes. As seen in tissues it presents itself in the form of a roset of fine filaments

clubbed at their outer ends; in the center are numerous coccus-like bodies, the spores of the organism.

ACTINOMYCES.

Actinomycosis (*ak-tin-o-mi-ko'-sis*) [*da'ts*, a ray; *mykōs*, a fungus]. A parasitic, infectious, inoculable disease, first observed in cattle, and also occurring in man, and characterized by the manifestations of chronic inflammation, with or without suppuration, often resulting in the formation of granulation tumors, especially about the jaws. The disease is due to the presence of a parasite, the ray-fungus, or actinomycetes. Syn., *Lumpy-jaw*; *Holdfast*; *Wooden tongue*.

Actinomycotic (*ak-tin-o-mi-ko'-ik*). Pertaining to actinomycosis.

Actinotherapy (*ak-tin-o-ther'-ap-e*) [*da'ts*, a ray; *therapeia*, therapy]. The therapeutic use of actinic rays.

Action (*ak'-shun*) [*agere*, to do or perform]. A doing, a working; especially the performance of a function. **A.**, **After-**, the brief persistence of negative variation of the electric current in a tetanized muscle. **A.s**, **Animal**, voluntary movements. **A. of Arrest**. See *Inhibition*. **A.**, **Automatic**. See *A.*, *Reflex*. **A.**, **Capillary**. See *Attraction*, *Capillary*. **A.**, **Diastaltic**. See *A.*, *Reflex*. **A.**, **Electrocapillary**, electric phenomena resulting from chemic reaction between dissimilar fluids connected by a capillary medium. **A.**, **Inhibitory**. See *Inhibition*. **A.**, **Katalytic**, **A.**, **Contact**. See *Katalysis*. **A.**, **Local**, the production of currents between different parts of the same cell of a galvanic battery. **A.s**, **Natural**, the vegetative functions. **A.s**, **Pseudomotor**, Heidenhain's term for phenomena resulting from stimulation of the chorda tympani after section of the hypoglossal nerve; movements due to vascular or lymphatic engorgement. **A.**, **Reflex**, an involuntary movement of part of the body resulting from an impression carried by a sensory or afferent nerve to a center, and then sent back by an efferent nerve to the part, usually at or near the source of irritation. **A.**, **Safety-valve**, the incomplete closure of the tricuspid valve, especially in cases of resistance in the pulmonary circulation. **A.**, **Sexual**, functioning of the generative apparatus. **A.s**, **Vital**, those es-

sential to the continuance of vitality, as of the heart and lungs.

Active (*ak'-tiv*) [see *Action*]. 1. Energetic, decisive; as *active* treatment. 2. Due to an intrinsic force as distinguished from passive—e. g., *active* hyperemia.

Actol (*ak'-tol*). Trade name for silver lactate.

Actual (*ak'-chu-al*) [*agere*, to do or perform]. Real; effective. **A.**, **Cautery**. See *Cautery*.

Actuation (*ak'-chu-a'-shun*). The mental function that is exercised between the impulse of volition and its performance.

Acuclosure (*ak-u-klo'-zhur*) [*acus*, a needle, *cludere*, to close]. A method of arresting hemorrhage by the aid of a needle which holds the artery closed for a day. It embraces *acupressure* and *acutorsion*.

Acuition (*ak-u-ish'-un*) [*acuere*, to sharpen]. Increased effect of a drug's action by the addition of another drug.

Acuity (*ak-u'-it-e*) [see *Acuition*]. Acuteness or clearness, as *acuity* of vision.

Acumeter (*ak-u'-me-ter*). See *Acoumeter*.

Acuminate (*ak-u'-min-āt*) [*acuminatus*, pointed, acute]. Sharp-pointed.

Acupressure (*ak'-u-presh-ūr*) [*acus*, a needle; *pressura*, pressure]. The operation to stop hemorrhage by compressing the artery with a needle inserted into the tissues upon either side.

Acupuncture (*ak'-u-punk-chur*) [*acus*, a needle; *pungere*, to prick]. Puncture of the skin or tissue by one or more needles for the relief of pain, the exit of fluid, the coagulation of blood in an aneurysm, etc.

Acusia (*ah-koo'-ze-uh*). See *Acousia* (2).

Acute (*ak'-ūt*) [*acutus*, sharp]. Having a rapid onset, a short course, and pronounced symptoms and termination.

Acuticostal (*ak-ūt-i-kos'-tal*) [*acutus*, sharp; *costa*, a rib]. Having projecting ribs.

Acutorsion (*ak-u-tor'-shun*) [*acus*, a needle; *torsion*]. The twisting of an artery with a needle as a means of controlling hemorrhage.

Acyclia (*ah-sik'-le-ah*) [*ἀ*, priv.; *κύκλις*, to circulate]. Arrested circulation of body-fluids.

Acyesis (*ah-si'-el-sis*) [*ἀ*, priv.; *κύσις*, pregnancy]. 1. Sterility of the female. 2. Incapacity for natural delivery. Syn., *Aciesis*.

Ad [*ad*, to]. A Latin preposition signifying *to*, *toward*, *at*, etc.; as, *ad libitum*, at pleasure or according to discretion.

Adactylism (*ah-dak'-til-izm*) [*ἀ*, priv.; *δάκτυλος*, a finger]. The absence of the digits.

Adactylous (*ah-dak'-til-us*). See *Adactylism*.

Adamantoblast (*ad-am-an'-to-blast*). An enamel-cell; a columnar epithelial cell from which the enamel of the teeth is developed.

Adams-Stokes Syndrome or Disease. A symptom-complex consisting of bradycardia in association with epileptiform or apoplectiform seizures. Heart-block is often present.

Adam's Apple. See *Pomum adam*.

Adamkiewicz's Reaction for Proteids. To a mixture of 1 volume concentrated sulfuric

and 2 volumes glacial acetic acid add the product. At the ordinary temperature a reddish-violet color is obtained slowly, but more quickly on heating. The liquid has also a feeble fluorescence, and gives an absorption band between the lines B and I in the solar spectrum.

Adams' Disease. See *Adams-Stokes' Disease*.

Adams-Stokes' Disease. Permanent or recurrent bradycardia, combined with synopal or epileptoid attacks, dependent probably upon arteriosclerosis of the vertebral and basilar arteries.

Adansonia digitata (*ad-an-so'-ne-ah dij-it-a'-tata*). The baobab-tree, a native of Africa. The bark is used in the form of an infusion, used to treat, as a remedy for intermittent fever. Unif.

Adanto blaka. A malady common among the natives of the Gold Coast and of frequent prevalence in the tropic zone, it is due to an intestinal parasite.

Adapter (*ad-ep'-ter*) [*adaptare*, to adjust]. 1. Anything which serves the purpose of fitting one thing to another. An instrument by means of which the direct electric current may be adapted to the various forms of electrotherapeutic treatment. 2. A piece of wiring used to connect the neck of a retort with a receiver. 3. A microscope attachment for centering or de-centering the illuminating apparatus. 4. A collar used to fit an objective to a different nose-piece than that for which it was made.

Addiment (*ad'-im-ent*) [*addere*, to add]. Ehrlich and Morgenthau's term (1894) for an active thermolabile substance (destroyed by a temperature of 50° C.) contained in normal serum and capable of rendering active the anergic body of Ehrlich and setting up bacteriolysis and hemolysis. See *Complement*.

Addison's Anemia. Pernicious anemia. **A.'s Disease**, a disease of the suprarenal capsules, first described by Addison, and characterized by tuberculous infiltration of the capsules, discoloration of the skin, progressive anemia, and asthenia, ending in death from exhaustion. Bronzed skin may occur without disease of the suprarenal capsules, and the latter have been the seat of morbid processes without an accompanying change in the skin. See, *Melasma suprarenale*, *Dermatomelasma suprarenale*, *Cutis area*; *Bronzed skin*. **A.'s Keloid**, *morphea*.

Addition (*ad-i-ti-un*) [*addere*, to add]. The formation of a molecule by the direct union of two or more different molecules without decomposition. **A. Compound.** See under *Compound*. **A. Product.** See under *Product*. **A. Reaction.** See under *Reaction*.

Adducens (*ad-uk'-sens*) [*adducere*, to bring toward]. An adductor, a term applied to certain muscles. **A. oculi**, the internal rectus muscle of the eye.

Adduct (*ad-uk'-tent*) [see *Adducens*]. Pertaining to adduction.

Adduction (*ad-uk'-shun*) [see *Adducens*]. Any

movement whereby a part is brought toward another or toward the median line of the body.

Adductor (*ad-uk'-tor*). See *Adducens*.

Adelodermatous, Adelodermous (*ad-el-o-der'-mat-us*, *ad-el-o-der'-mus*) [*adēlōs*, not seen; *derma*, skin]. Having concealed integument, as invaginated tracts.

Adelomorphous (*ad-el-o-mor'-fus*) [*adēlōs*, not seen, *mōrphē*, form]. Not clearly defined; applied to certain cells in the gastric glands.

Adenase (*ad-en-ās*). An enzyme which converts adenin to hypoxanthin.

Adenasthenia (*ad-en-as-the'-ne-ah*) [*adēn*, a gland; *asthēnia*, weakness]. A disorder of the stomach characterized by diminished and enfeebled secretion without anatomic lesion.

Adenectomy (*ad-en-ek'-to-me*) [*adēn*, a gland; *ektomē*, excision]. The excision of a gland.

Adenia (*ad-e'-ne-ah*) [*adēn*, a gland]. A hyperplasia of the tissue of lymphatic glands leading to the formation of tumors. See *Lymphadenoma*. **A., Angibromic**, Pierry's term for diseases of the glandular adnexa of the digestive tract. **A., Leukemic**, adenia associated with a leukemic condition of the blood. **A., Simple**, that form which is unaccompanied by any increase in the number of the white blood-corpuscles. A synonym of *Hodgkin's disease*.

Adeniform (*ad-en'-e-form*) [*adēn*, a gland; *forma*, resemblance]. Shaped like a gland.

Adenin (*ad'-en-in*) [*adēn*, a gland]. $C_5H_5N_5$. The simplest member of the uric-acid group of leukomains, apparently formed by polymerization of hydrocyanic acid, first discovered in the pancreas. It occurs, with other bases, as a decomposition-product of nuclein, and may be obtained from all animal and vegetable tissues rich in nucleated cells. It crystallizes in leaflets with pearly luster. It exists abundantly in the liver and urine of leukocythemic patients. Adenin is not poisonous.

Adenitis (*ad-en-i'-tis*) [*adēn*, a gland; *itis*, inflammation]. Inflammation of a gland. Syn., *Phlegmasia adenosa*, *Phlegmasia glandulosa*. **A. cervicalis syphilitica**, an engorgement of the cervical lymphatic glands; a sign of syphilitic infection. **A. cubitalis**, Grunfeld's term for inflammation of the epitrochlear lymphatic gland. **A. hyperplastica**, Grunfeld's term for a bubo in which plastic exudation predominates. **A. pubica**, bubo of the pubic region, often accompanied by suppurative lymphangitis of the dorsum of the penis. **A., Syphilitic, Primitive.** See *Bubo, Syphilitic*. **A. universalis**, a widespread induration of the lymphatic glands accompanying primary syphilis.

Adeno- [*adēn*, a gland]. A prefix denoting relation to glands.

Adenoblast (*ad'-en-o-blast*) [*adēn*, a gland; *blasthē*, a germ]. 1. Any functionally active gland-cell, a cell that assists in the glandular action. 2. Haeckel's name for an embryonic cell which forms a gland.

Adenocarcinoma (*ad-en-o-kar-sin-o'-mah*)

[*adēp*, a gland; *carcinoma*]. Adenoma blended with carcinoma.

Adenocoele (*ad-en-o-sēl* or *ad-en-o-sē-le*) [*adēp*, a gland; *κῆλη*, a tumor]. A cystic tumor containing adenomatous elements.

Adenocellulitis (*ad-en-o-sēl-u-lī-tis*) [*adēp*, a gland; *cellulitis*]. Inflammation of a gland and the surrounding cellular tissue.

Adenocyst (*ad-en-o-sist*) [*adēp*, a gland; *κύστις*, a cyst]. A cystic lymphatic gland, a glandular cyst. Cf. *Adenocystoma*.

Adenocystoma (*ad-en-o-sis-to-mah*) [*adēp*, a gland; *κύστις*, a cyst; *δῆμα*, a tumor]. A cystic adenoma.

Adenofibroma (*ad-en-o-fībro-mah*) [*adēp*, a gland; *φίβρωμα*]. A combination of adenoma and fibroma.

Adenofibrosis (*ad-en-o-fībro-sis*) [*adēp*, a gland; *φίβρωσις*]. Fibroid degeneration of a gland, particularly the inflammatory neoplasms involving sudoriparous glands, due to infection with *Botryomyces*. Cf. *Botryomycosis*.

Adenography (*ad-en-og'ra-fee*) [*adēp*, a gland; *γραφία*, to write]. That part of descriptive anatomy which treats of the glandular system.

Adenohypersthenia (*ad-en-o-hi-per-sithē-ne-ah*) [*adēp*, a gland; *ὑπέρ*, over; *σθένος*, strength]. Excessive activity of the glands.

A. gastrica, a condition characterized by the secretion of gastric juice abnormally rich in hydrochloric acid or excessive in quantity.

Adenoid (*ad-en-oid*) [*adēp*, a gland; *εἶδος*, resemblance]. Resembling a gland. **A.**

Acne. See *Lupus, Disseminated Follicular*.

A. Body. 1. The prostate gland. 2. A

melanotic tumor. **A. Disease**. Synonym of *Hodgkin's disease*. **A. Muscle**. See *Thyroadenomus under Muscle*. **A. Tissue**, lymphadenoid tissue. **A. Tumor**. See *Adenoma*.

A. Vegetations, a term applied to a hypertrophy of the adenoid tissue that normally exists in the nasopharynx.

Adenolipoma (*ad-en-o-lip-o-mah*) [*adēp*, a gland; *λίπος*]. A combination of adenoma and lipoma.

Adenolipomatosis (*ad-en-o-lip-o-mat-o-sis*) [*adenolipoma*]. A diseased condition of the lymphatic system characterized by fatty deposits in the neighborhood of the neck, axilla, and groins. It is generally unattended with pain. Syn., *Multiple lipomas; Symmetric lipomas of nervous origin*.

Adenology (*ad-en-ol'ō-fee*) [*adēp*, a gland; *λογία*, a discourse]. The science of the glandular system.

Adenolymphoma (*ad-en-o-līm-fō-mah*) [*adēp*, a gland; *lymphoma*]. A combined adenoma and lymphoma. See *Lymphadenoma*.

Adenoma (*ad-eno-mah*) [*adēp*, a gland; *δῆμα*, a tumor]. 1. An epithelial tumor constructed after the type of a secreting gland. 2. Any tumor which has as its characteristic feature tubes or sacs lined with epithelium, whether or not it arises from or is connected with a gland. **A. carcinomatodes renis**, a renal neoplasm probably derived from aberrant adrenal tissue in the kidney. **A. destruens**,

a destructive form of adenoma. **A. diffusum**, hyperplasia of the mucous membrane with predominance of glandular elements. **A. fibrosum**, a fibrous growth in the stroma of a gland. **A., Heteropodous**, one arising from the metastasis of normal glandular tissue. **A., Lupiform**. See *Lupus erythematosus*. **A., Malignant**, an adenomatous carcinoma. **A., Papillary, A. papuliferum**, a form arising from either the alveolar or the tubular adenoma through stronger growth of the epithelium and the formation of papillas of connective tissue. **A., Racemose**, an adenoma after the type of a racemose gland. **A., Renal**, glandular carcinoma of the kidney. **A. simplex**, a tumor-like hyperplasia of a gland. **A. sudoriparum**, a cutaneous tumor involving hyperplasia of the sweat-glands. Cf. *Hidradenitis*. **A., Tubular**, an adenoma after the type of a tubular gland. **A., Umbilical**, a tumor at the navel originating through the coalescence of Meckel's diverticulum with the umbilical ring, through which the intestinal mucosa appears in the navel. Syn., *Intestinal ectopia*.

Adenomalacia (*ad-en-o-mat-a-she-ah*) [*adēp*, a gland; *μαλακία*, softening]. Abnormal softening of a gland.

Adenomatome (*ad-en-o-mat-ēm*) [*adenoma*, *τομή*, a cutting]. Cutting forceps or scissors used in the removal of adenomatous growths.

Adenomeningeal (*ad-en-o-men-in'je-ah*) [*adēp*, a gland; *μηνίμη*, a membrane]. Pertaining to or affecting the glands of a membrane.

Adenomyoma (*ad-en-o-mi-o-mah*) [*adēp*, a gland; *μῆμα*, a muscle; *δῆμα*, a tumor]. A tumor composed of glandular and muscular tissues. **A., Branchiogenic**, cyst formation in consequence of inflammation of the mucous bursa in the median line of the neck.

Adenomyxoma (*ad-en-o-mix-o-mah*) [*adēp*, a gland; *μῆμα*, mu-us; *δῆμα*, a tumor]. A growth having the characters of adenoma and myxoma.

Adenomyxosarcoma (*ad-en-o-mix-o-sar-kah-mah*). A rare combination of malignant tumor forms (observed in the cervix uteri) — a primary adenoma with secondary sarcoma and finally myxomatous degeneration of the stroma.

Adenopathy, Adenopathia (*ad-eno-pa-thē-ah*) [*adēp*, a gland; *πάθος*, disease]. Any disease of a gland. **A., Angiobromic**. See *Adenitis, Angiobroma*. **A., Primary**, the lymphadenitis resulting from primary syphilitic infection. **A., Syphilitic**, the enlarged and indurated cervical, inguinal, and cubital glands symptomatic of syphilitic infection. **A., Tracheobronchial, A., Tracheobronchic**, hypertrophy of the peribronchial lymphatic glands observed in the course of various diseases, causing spasmodic cough. **A., Tracheolaryngeal**, inflammation and hypertrophy of the tracheolaryngeal lymphatic glands.

Adenopharyngeal (*ad-en-o-far-in'je-ah*) [*adēp*,

a gland; φάρυγξ, pharynx]. Pertaining to the thyroid gland and the pharynx.

Adenopharyngitis (ad-en-o-far-in-jī-tis) [ἀδην, a gland; φάρυγξ, pharynx, -itis, inflammation]. Inflammation of the tonsils and pharynx.

Adenophthalmia (ad-en-of-thul'-me-ah) [ἀδην, a gland; ὀφθαλμία, the eye]. Inflammation of the meibomian glands.

Adenophyma (ad-e-no-fī'-ma) [ἀδην, a gland; φύμα, a tumor or growth]. A soft swelling of a gland.

Adenosarcoma (ad-en-o-sar-ko'-mah) [ἀδην, a gland; σάρcoma]. A tumor with the characters of adenoma and sarcoma.

Adenosarcorhabdomyoma (ad-en-o-sar-ko-rab-do-my-o'-mah). A neoplasm composed of the elements of sarcoma, adenoma, and rhabdomyoma.

Adenosychitonitis (ad-en-o-sin-ki-ton-i'-tis) [ἀδην, a gland; σιν, with; χιτών, a covering; -itis, inflammation]. 1. Inflammation of the meibomian glands. 2. Ophthalmia neonatorum.

Adenotome (ad'-en-o-tōm) [ἀδην, a gland; τμή, a cutting]. An instrument for incising a gland.

Adephagia (ad-e-fā'-je-ah) [ἀδὲφαγος, eating one's fill, gluttonous]. Voracious appetite; bulimia.

Adeps (ad'-ep-si) [L. gen., adipis]. 1. Lard. The fat obtained from the abdomen of the hog, composed of 88% stearin and margarin and 12% olein. It forms 70% of ceratum and 86% of unguentum. 2. Fatness. 3. Animal fat. **A. anserinus**, **A. anseris**, goose grease. **A. benzoïnatus** (U. S. P.), benzoïnated lard; contains 2% of benzoïn. **A. curatus**, a preparation of lard, 48 parts, and a part of peruvian balsam. **A. ex fele**, cat grease. **A. lanæ** (U. S. P.), lanolin. **A. lanæ hydrosus** (U. S. P.), hydrous wool-fat, the purified fat of the wool of the sheep. **A. ovillus**, **A. ovis**, mutton suet. A fixed oil (*adipis*) is expressed from lard. **A. preparatus** (B. P.), purified fat of the hog. **A. suillus**, hog's lard, adeps.

Adermia (ah-der'-me-ah) [ἀ, priv.; δέρμα, skin]. Absence of the skin.

Aderinogenesis (ah-der-mo-jen'-es-is) [ἀ, priv.; δέρμα, skin; γένεσις, generation]. Deficient cutaneous development.

Adgenic, **Adgenicus** (ad-jen'-ik, ad-jen'-ik-us) [ad- to; gena, the chin]. Attached to the genial tubercles or apophyses.

Adhatoda (ad-ha-to'-da) [from the Tamil name]. A genus of plants of the order *Acanthaceæ*. *A. hyssopifolia*, a species native of South Africa, the willow-leaved Malabar nut; bitter, aromatic. *A. vasica*, a species native of tropical Asia, the Malabar nut. The juice of the leaves is used as an expectorant. The leaves, flowers, and root are considered antispasmodic and are given in various intermittent fever, and rheumatism. The fresh flowers are bound over the eyes in cases of ophthalmia. In decoction the leaves with other remedies are used as an

anthelmintic. The nut is emmenagog and used to expel the dead fetus.

Adhesion (ad-he'-zhun) [adherere, to stick to].

1. The attractive force between two dissimilar bodies that are in contact. 2. Abnormal union of two surfaces as a result of inflammation, etc. **A., Primary**, called also *healing by first intention* and *by immediate union*, a method of healing of wounds by the production of lymph, followed by the vascularization and cicatrization of the exudate. **A., Secondary**, or *healing by second intention*, or *by granulation*, is that mode of healing attended by the production of pus and the formation of granulations.

Adhesive (ad-he'-siv) [see Adhesion]. Sticky; tenacious. **A. Inflammation**, inflammation accompanied by plastic exudation, and tending to the union of apposed surfaces. **A. Plaster**. See Resin and Emplastrum.

Adhesol (ad-he'-sol). A surgical dressing said to contain copal resin, 350 parts; benzoin, 30 parts, oil of thyme, 20 parts, alpha-naphthol, 3 parts; tolu balsam, 30 parts; ether, 1000 parts.

Adhyoid (ad-hi'-oid). Adherent to the hyoid bone.

Adiantum (ad-e-an'-tum) [ἀ, priv.; διατρέ, wettable]. A genus of ferns; the maiden-hair. *A. capillus-veneris* and *A. pedatum*, of North America, are serviceable in coughs and as demulcents.

Adiarthrosis (ah-di-ar-thro'-los) [ἀδάρθρωσις, not jointed]. 1. Without joints; unjointed. 2. Inarticulate (applied to speech).

Adiemorrhysis, **Adiæmorrhysis** (ah-di-e-mor'-e-sis) [ἀ, priv.; δειν, through; αἷμα, blood; ῥοις, flowing]. Failure of the circulation of the blood through the veins, due to some obstruction.

Adipatum (ad-ip'-a-tum). An ointment-base said to consist of lanolin, vaselin, paraffin, and water.

Adipic (ad-ip'-ik) [adepts, lard]. Of or belonging to fat. **A. Acid**. See Acid, Adipic.

Adipocèle (ad'-ip-o-sel) [adepts; κήλη, hernia]. A true hernia with hernia sac, containing only fatty tissue.

Adipocellular (ad-ip-o-sel'-u-lar). Made up of fat and connective tissue.

Adipocere (ad'-ip-o-ser) [adepts; cera, wax]. A wax-like substance formed by the exposure of fleshy tissue to moisture, with the exclusion of air, i. e., in the earth or under water. It consists of the fatty acids in combination with the alkaline earths and ammonium. Human bodies in moist burial places often undergo this change.

Adipofibroma (ad-ip-o-fi-bro'-mah) [adepts, fibroma]. A combined fatty and fibrous tumor.

Adipolysis (ad-ip-ol'-is-is) [adepts; λύσις, dissolution]. The cleavage or hydrolysis of fats in the process of digestion by the action of a fat-splitting enzyme.

Adipoma (ad-ip-ol'-mah) [adepts; ὄμα, a tumor]. A fatty tumor; lipoma.

Adipose (ad'-ip-ōs) [adeps]. Fatty. **A. Tissue**, fatty tissue distributed extensively through the

ADIPOSE TISSUE FROM A SECTION OF HUMAN SCALP (X 400). — (Stohr.)

a Fat cells in simple layer; b in superposed layers; c, fibrillar connective tissues.

fatty degeneration or infiltration of the liver.

Adipositas (ad-ip-ōs'-it-as) [L.]. Fatness; corpulency. **A. cordis**, a fatty condition of the heart. **A. universalis**, obesity.

Adiposity (ad-ip-ōs'-it-e). Fatness; corpulency.

Adipsa (ad-ip'-sah) [neut. pl. of *adipus*, without thirst]. 1. Remedies to allay thirst. 2. Foods which do not produce thirst.

Adipsia (ah-dep'-sah) [a, priv.; dipsa, thirst]. Absence of thirst.

Aditus (ad'-it-us) [adire, to go to]. In anatomy, an entrance. **A. ad antrum**, the outer side of the attic, opening upward, backward, and outward into the mastoid antrum. It gives lodgment to the head of the malleus and the greater part of the incus. **A. ad aquæductum sylvii**, the entrance to the ventricular aqueduct situated at the lower posterior angle of the third ventricle of the brain. **A. ad infundibulum**, a smaller canal extending from the third ventricle into the infundibulum; it is also called *callosa*. **A. ad laryngem**, **A. laryngis**, the entrance to the larynx.

Adjuster (ad-jus'-ter) [Fr., *adjuster*, to adjust]. 1. A device formerly used for forcible reduction of dislocations. 2. One for holding together the two ends of a silver wire suture, to secure approximation of the parts without strain on the tissues.

Adjuvant (ad'-ju-vant) [adjutare, to assist]. A medicine that assists the action of another to which it is added.

Adler's Benzidin Reaction for Blood. Mix equal parts of a saturated solution of benzidin in alcohol or glacial acetic acid and of hydrogen dioxide (1%). Add to this 1 cc. of an aqueous solution of blood; a green or blue color develops. The blood solution should be acid in reaction.

Admaxillary (ad-maks'-ul-sah-re). Pertaining to maxillary structures. Cf. *Gland*, *Admaxillary*.

Adminiculum lin'ea al'ba. See *Cooper's Ligament*.

Adnasal (ad-na'-sah) [ad, near to, *nasus*, the nose]. Pertaining to the nose.

Adnexa (ad-neks'-ah) [ad, to, *nectere*, to join]. Adjunct parts, as the *adnexa* of the uterus. **A. bulbi**, the appendages of the bulb of the eye. **A. uteri**, the fallopian tubes and the ovaries.

Adnexopexy (ad-neks'-o-peh-se). The operation of raising and fixing the uterine adnexa to the abdominal wall.

Adolescence (ad-o-les'-ens) [adolescere, to grow]. The period between puberty and maturity, commences from about 14 to 25 years, in females from 12 to 21 years.

Adonidin (ad-on'-id-in) [*Adonis*]. A glucoside derived from *Adonis vernalis*, a plant indigenous in Europe and Asia. It is recommended in cardiac dropsy. Dose 1-4 gr. (10-200 c. gr.) (Gm.). Unof. **A. Tannate**, a yellowish-brown powder; soluble in alcohol slightly soluble in water, it is used in the same manner as the glucoside.

Adonis (ad-o'-nis). A genus of European herbs belonging to the order *Ranunculaceæ*. **A. aestivalis**, a plant much used in Italy as a cardiac tonic. Dose of the fluidextract 1-2 min. to 20 min. (1-2 Cc.), of the tincture 10-30 min. (2-6-20-40 Cc.). **A. vernalis**, is used as a cardiac stimulant, antipyretic, and diuretic. Dose of the tincture 3-20 min. (5-2-1-3 Cc.).

Adorbital (ad-orb'-it-ah) [ad, near to, *orbita*, orbit]. Pertaining to the orbit. **A. Bone**. See *Lacrimal Bone*.

Adrenal (ad-re'-nah) [ad, near to, *ren*, the kidney]. 1. Adjacent to the kidney. 2. The suprarenal capsule.

Adrenalin (ad-re'-al-in), $C_{10}H_{17}NO_3$. The active principle of the suprarenal gland. **A. Chlorid**, used in solution of 1:10,000 to 1:1,000 in surgical operations on the eye, ear, nose, urethra, etc.; it is a powerful astringent, hemostatic, and heart tonic.

Adrenoxin (ad-re-nok'-sin) [adrenal, ox'-igen]. An organic compound or oxidizing substance formed in the lungs by the internal secretion of the adrenals combined with the atmospheric oxygen. This substance endows the blood-plasma with its oxidizing properties (see 120).

Adrue (ad-ru'-e). Antihelminthic root. The root of *Cyperus articulatus*, it is anthelmintic, arsenic, stoma-lic. Dose of the fluidextract 20-30 min. (1-3-2-6 Cc.). Unof.

Adsorption (ad-sorp'-shun). 1. The power possessed by certain substances of taking up fluids (apart from capillary attraction). 2. The process whereby a substance becomes a part of another and remains in a state midway between mechanical mixture and chemical combination.

Adsternal (ad-stern'-ah) [ad, near to, *sternum*]. Pertaining to or situated near the sternum.

Adstriction (ad-strik'-she-n) [adstringere, to draw together, pl. *adstrictiones*]. 1. The retention of any natural excretion. 2. The action of an astringent. 3. The ligation of a blood-vessel. **A. alvei**, constipation.

Advancement (ad-vans'-ment) [Fr., *avancer*, to

advance]. An operation to remedy strabismus, generally in conjunction with tenotomy, whereby the opposite tendon from the overacting one, having been cut, is brought forward, so that, growing fast in a more advanced position, it shall have more power to act upon the globe of the eye. **A., Capsular**, an operation similar to that on the tendon upon Tenon's capsule. It differs from advancement in that the tendon itself is not divided. **A. of the Round Ligaments**, an operation for replacement of the uterus by taking up "the slack of the round ligaments." See *Operation, Alexander's*. **A. of Tenon's Capsule**. See *A., Capsular*.

Adventitia (ad-ven-tish'-e-ah) [adventitius, foreign]. The external coat of a blood-vessel.

Adynamia, Adynamy (ah-din-a'-me-ah, ah-din'-a-me) [û, priv.; *δύναμις*, power]. Loss of vital or muscular power, prostration.

Adynamic (ah-din-am'-ik). See *Adynamia*.

Adynamicoatonic (ad-in-am-ik-a-at-aks'-ik). Pertaining to adynamia and ataxia.

E. See *E* for English words beginning with E.

Aeby, Plane of. In craniometry, one passing through the nasion and basion perpendicular to the median plane.

Aer (a'-er). See *Air*.

Aerated (a'-er-a-ted) [âp, atmosphere]. Charged with gas or air, arterialized.

Aeration (a'-er-a'-shun) [âp, air]. Charging with air or gas, such as carbon dioxide; the state of being supplied with air or gas.

Aerator (a'-er-a-tor). A machine for forcing gas or air into liquids.

Aerial (a'-er-e-ah). Pertaining to the air; as aerial conduction of sound-waves.

Aeriform (a'-er-re-form) [âp, air; *forma*, form]. Resembling air or gas.

Aeroanaerobic (a'-er-a-an-a-er-a'-bik). Applied to organisms which are both aerobic and anaerobic.

Aerobic (a'-er-a'-bik) [âp, air; *βίος*, life]. Requiring oxygen (air) in order to live. A term applied to bacteria requiring free oxygen. Those which do not grow in oxygen are called *anaerobic*. There are forms that are able to grow without oxygen under favorable conditions, though they make use of it when present, others that may grow in its presence, but flourish best without; these are called respectively *facultative aerobic* or *facultative anaerobic*, while those first mentioned are called *obligatory aerobic* or *obligatory anaerobic*.

Aerobioscope (a'-er-a-bi'-a-skôp) [âp, air; *βίος*, life; *σκοπεῖν*, to examine]. An apparatus for collecting and filtering bacteria from the air.

Aerobiotic (a'-er-a-bi-ol'-ik) [âp, air; *βιωτικός*, pertaining to life]. Thriving only in the presence of air.

Aerocele (a'-er-a-sil) [âp, air; *κῆλη*, tumor]. A tumor varying with respiration, found in the thyroid region, usually unilateral, with walls resembling mucosa and containing mu-

cous or mucopurulent matter. Sometimes congenital, but oftener the result of violent coughing or straining. When acquired, it may disappear spontaneously. Syn., *Aerial bronchocele*; *Aerial goiter*, *Pneumatocoele*; *Tracheocoele*; *Hernia of the trachea*; "Luft-kropf."

Aerocolpos (a'-er-a-kol'-pos). Distention of the vagina with air or gas.

Aeroductor (a'-er-a-duk'-tor) [âp, air; *ducere*, to lead]. An apparatus to prevent asphyxia of fetus if the after-coming head is retained.

Aerodynamics (a'-er-a-di-nam'-iks) [âp, air; *δύναμις*, power]. The branch of physics that deals with gases in motion.

Aerography (a'-er-og'-ra-fe) [âp, air; *γράφω*, a writing]. Description of air and its qualities.

Aerology (a'-er-ol'-o-je) [âp, air; *λόγος*, treatise]. The science of the air and its qualities.

Aerometer (a'-er-am'-et-er) [âp, air; *μέτρον*, a measure]. An instrument for ascertaining the density of gases.

Aeropathy (a'-er-op'-ath-e). Caisson disease, *q. v.*

Aerophagy (a'-er-af'-a-je) [âp, air; *φαγεῖν*, to eat]. The imbibing and swallowing of air, especially observed in hysterical patients.

Aerophil (a'-er'-o-fil) [âp, air; *φιλέω*, to love]. An open-air-loving person or creature.

Aerophobia (a'-er-a-fo'-be-ah) [âp, air; *φοβός*, fear]. Dread of a current of air.

Aerophone (a'-er-a-fôn) [âp, air; *φωνή*, sound]. An instrument for increasing the amplitude of sound-waves.

Aerophore (a'-er-a-fo-r) [âp, air; *φέρειν*, to carry]. 1. A device for inflating the lungs of a still-born child with air. 2. A breathing apparatus, used by firemen and others, to prevent the inhalation of noxious gases.

Aerophysis (a'-er-u-fis'-ik) [âp, air; *πνέω*, to inflate]. Inflated, distended with air; flatulent.

Aeroplethysmograph (a'-er-o-pleth-is'-mo-graf) [âp, air; *πληθυσμός*, an enlargement; *γράφω*, to write]. An apparatus for registering graphically the expired air; the latter raises a very light and carefully equipped box placed over water, and this moves a writing-style.

Aeroporotomy (a'-er-a-por-ot'-o-me) [âp, air; *πῶμα*, a pore; *τομή*, a cutting]. The operation of admitting air to the lungs, as by intubation or tracheotomy.

Aeroscope (a'-er-a-skôp) [âp, air; *σκοπεῖν*, to observe]. An instrument for estimating the purity of the air.

Aeroscopy (a'-er-as'-ka-pe) [see *Aeroscope*]. The investigation of atmospheric conditions.

Aerostatics (a'-er-a-stat'-iks) [âp, air; *στατικός*, standing]. The branch of physics that treats of the properties of gases at rest.

Aerotherapeutics, Aerotherapy (a'-er-a-ther-a-pu'-tiks, a'-er-a-ther'-ap-e) [âp, air; *θεραπεύω*, to heal]. A mode of treating disease by compressed or rarefied air or by other gases.

Aerothermotherapy (a'-er-a-ther-mo-ther'-ap-e) [âp, air; *θέρω*, heat; *θεραπεία*, therapy]. Treatment with hot air.

Aerothorax (a-er-o-tho'-raks). See *Pneumothorax*.

Aerotonometer (a-er-o-ton-om'-et-er) [aëp, air; ton, tension; pēpov, a measure]. An instrument for estimating the tension of gases in the blood.

Aerourethroscopy (a-er-o-u-re-thros'-ko-pe) [aëp, air; oip/pn, urethra; skopiv, to examine]. Urethroscopy combined with inflation of the urethra with air.

Aerazol (a'-er-o-zol) [aëp, air; aziv, to smell]. A mixture of essential oils said to contain 75% of ozone; it is used by inhalation in catarrhal affections.

Aerteriversion (a-er-ter-iv-er'-shun). See *Arteriversion*.

Aerterivorter (a-er-ter-iv-er'-ter). See *Arterivorter*.

Ærugo (e-ru'-go) [L., gen., æruginis]. 1. Rust of a metal. 2. Copper rust, verdigris. **Æ. ferri**, the subcarbonate of iron. **Æ. plumbi**, lead carbonate or subcarbonate.

Aerva (a-er'-va) [Ar.]. A genus of plants of the order *Amaranthaceæ*. **A. lanata**, a species native of tropical Asia and Arabia. It furnishes chaya root, which contains a mucilaginous principle and has been used as a diuretic, in strangury, and as a depurative.

Æsculus (æ'-ku-lus) [L.]. A genus of sapindaceous shrubs and trees; buckeye. **Æ. glabra**, Ohio buckeye. The bark is tonic, astringent, and antiperiodic. Dose of fluid-extract 10 to 30 min. (0.6 to 2 Cc.). **Æ. hippocastanum**, horse-chestnut. The bark is tonic, astringent, antiperiodic. Dose of fluid-extract 10 to 30 min. (1 to 3 Cc.). **Æ. pavia**, red buckeye. The bark has been used as a febrifuge. The fruit is said to be an active convulsant. All proof.

Æsthes (æ'-thes) [L., pl.]. Freckles or sunburn.

Ætas (e'-tas) [L.]. Age; a period of life. See *Age*.

Æthomma (eth-om'-ah) [aëth, of a burnt color; ōma, the eye]. 1. Paré's term for a pigmented condition of the humors and tunics of the eye. 2. Kuhn's term for a morbid condition marked by flashes of light and flame appearing before the eye.

Afebrile (æ'-fē'-ril) [i, priv., febrilis, feverish]. Without fever.

Affection (af'-ek'-shun) [afferre, to affect]. Disease. **A.**, **Parainfectious**, one in which the symptoms or conditions are only indirectly related to the disease named, a by-condition or necessary infection of certain diseases, but determined by the appearance of symptoms attributable to an intercurrent or secondary infection, as in the case of noma occurring in cases of measles and due to infection with diphtheria.

Affective (af'-ek'-tiv) [see *Affection*]. Exciting emotion. **A.** **Faculties**, the emotions and propensities, especially those peculiar to man. **A.** **Insanity**, emotional or impulsive insanity.

Afferent (af'-er-ent) [afferens, carrying to]. Carrying toward the center. Of nerves: con-

veying impulses toward the central nervous system; sensory; centripetal. Of *blood-vessels*: those, as the arteries, conveying blood to the tissues. Of *lymphatics*: those conveying lymph to a lymphatic gland.

Afferentia (af'-er-ent'-she-ah). See *Virus*.

Affiliation (af'-il-e-a'-shun) [ad, to; filius, son].

In medical jurisprudence, the act of imputing or affixing the paternity of a child in order to provide for its maintenance.

Affinity (af'-in'-it-e) [affinis, akin to]. 1. Relationship. 2. Attraction. 3. In biology, morphologic, physiologic, and phylogenetic relationship between organisms. **A.** of **Aggregation**, cohesive attraction, the mechanical affinity of similar molecules tending to the formation of masses. Syn. *Quiescent affinity*. *Affinitas quiescens*. **A.**, **Chemical**, the force, exerted at inappreciable distances, that unites atoms of different substances. **A.** of **Composition**, the tendency of substances to unite directly without previous decomposition. Syn. *Affinitas compositionis*, *Simple affinity*, *Single affinity*; *Compound affinity*, *Mixed affinity*. **A.**, **Developed**, that exhibited by compounds, but which is not possessed by the constituents separately. Syn. *Affinitas producta*, *Resulting affinity*; *Secondary affinity*. **A.**, **Divellent**, the tendency to form new compounds at the expense of decomposition of those previously existing. Syn. *Affinitas divellens*; *Separating affinity*. **A.**, **Elective**, the preference of one substance for another. **A.**, **Elementary**. 1. That which exists between the elements of two or more compounds. 2. Physicochemical relationship of elementary substances. **A.**, **Mediating**, that by virtue of which a substance lacking the power of combination with a certain substance secures it by preliminary combination with another. Syn. *Appropriate affinity*, *Imputed affinity*, *Intermediate affinity*, *Inducing affinity*, *Inductive affinity*; *Affinity of an intermediate*, *Affinitas adiuta*; *Affinitas appropriata*; *Affinitas approximata*. **A.**, **Morbid**, the tendency of certain affections to exist synchronously or as *sequela*. **A.**, **Reciprocal**, chemical attraction between the elements of a secondary compound, tending, under altered conditions, to the reformation of the primary compound. Syn. *Alternating elective affinity*, *Affinitas reciproca*. **A.**, **Simple Elective**, that exhibited by a simple body for a single element of a compound. Syn. *Single elective affinity*. **A.** of **Solution**, that existing between a dissolved substance and its solvent. **A.**, **Vital**, the selective action or chemotaxis exhibited by the several tissues of an organism for their peculiar nutrition.

Affion, **Affioni** [Turkish]. Crude opium, it contains regular amount of morphin. Syn. *Affion*.

Affixion (af'-ik'-shun) [affigere, to fasten]. Adhesion.

Afflux (af'-luks) [affluere, to flow toward]. The flow of the blood or other liquid to a part.

Affusio (af'-u'-sio) [L., pl., affusiones]. 1. An

affusion. 2. Suffusion. 3. Infusion. 4. Cata-ract.

Affusion (af-u'-zhun) [affundere, to pour upon]. The pouring of water upon an object, as upon the body in fever, to reduce temperature and calm nervous symptoms.

Afibroma (ah-fib'-mah) [ā, priv.; fibroma]. A mass of fibrous tissue which is not arranged so as to form a tendon or fascia.

African Arrow-poison. See *Strophanthus*. **A. Fever.** Synonym of *Dengue*. **A. Gum,** gum-arabic. **A. Lethargy,** a "sleeping-sickness" affecting west African coast negroes. Increasing somnolence is the characteristic symptom. It is very fatal, death from exhaustion follows in from 3 to 6 months. Syn., *Nelovan*.

Astannin (ast'-tan-in). An infusion of herbs with formaldehyd and glycerin used in veterinary practice.

After (af'-ter) [AS., after, back]. 1. The anus; the buttocks. 2. Next in succession. **A.-action,** the negative variation in an electric current continuing for a short time in a tetanized muscle. **A.-birth,** the popular designation of the placenta, cord, and membranes. **A.-brain.** See *Hind-brain* and *Met-enkephalon*. **A.-cataract,** an opacity of the media of the eye after operation for cataract; due to opacification of the capsule or to non-absorption of the remains of the lens-substance. Syn., *Cataracta secundaria*. **A.-gilding,** a term designating the process of treating nerve-fibres with salts of gold after fixation and hardening. **A.-hearing,** a condition in which sounds are heard after the wave-motion that produces them has ceased. **A.-images,** continued retinal impressions after the stimulus of the light or image has ceased to act. A *positive after-image* is a simple prolongation of the sensation; a *negative after-image* is the appearance of the image in complementary colors. **A.-pain.** See *Pain*. **A.-perception,** the perception of a sensation after the stimulus has passed away. **A.-production,** a newgrowth; neoplasm. **A.-sensation,** a sensation lasting longer than the stimulus producing it. **A.-sound,** an auditory sensation or impression remaining after the causative vibrations have ceased. **A.-taste,** a gustatory sensation produced some time after the stimulus has been removed.

Agalactia (ah-gal'-ah'-te-ah) [a, priv.; γάλα, milk]. Non-secretion of milk after childbirth.

Agar-agar (ah'-gar) [Ceylon]. A glue made from certain seaweeds, such as *Gracilaria lemaneoides* and *Gigartina speciosa*, used to make suppositories and bacteriologic culture-media.

Agaric (ag'-ar-ik). Toughwood; spunk; tinder, the product of different species of *Boletus*, a genus of mushrooms. *Boletus larici*, *Polyporus officinalis*—is the white or purging agaric. Agaric or agaricinic acid, in doses of 1-2 gr. (0.03-0.02 Gm.), is also useful in night-sweats. Dose of the extract 3-6 gr. (0.1-0.2 Gm.), of the tincture 3-20 min.

(0.18-1.2 Cc.). *Agaricus chirurgorum*, *Boletus chirurgorum*, surgeon's agaric, a parasitic fungus formerly used for *moxa*. Soaked in solution of potassium nitrate it forms *spunk*. *Agaricus muscarius*, fly agaric, poisonous mushroom, contains an alkaloid, *muscarin*. Dose of the alkaloid 1/2-2 gr. (0.008-0.13 Gm.). *Muscarin nitrate* is used hypodermatically. Dose 1/10-1/2 gr. (0.006-0.048 Gm.).

Agaricin (ag-ar'-is-in) [see *Agaricus*]. 1. $C_{12}H_{20}O_4 + H_2O$. A white, crystalline substance, the active principle of *Agaricus albus*. It has proved useful in the night-sweats of pulmonary tuberculosis. Dose 1/10-1/2 gr. (0.003-0.006 Gm.). Unof. 2. An alkaloid identical with amanitin.

Agaricus (ag-ar'-ik-us) [*dyapuly*, of Dioscorides, from *Agaria*, a former district of Poland or Sarmatia, whence the Greeks derived the larch agaric]. A large genus of hymenomycetous fungi; mushrooms and toadstools. Cf. *Polyporus amanita*. **A. chirurgorum.** See under *Agaric*. **A. rubra**, **A. sanguinea**, these species, indigenous to France, were formerly included under *A. rubra*. They yield the alkaloid *agarythrin*, and the rose-red coloring-matter *ruberrin*.

Agarythrin (ag-ar'-ith-rin). A yellowish-white alkaloid extracted by ether from *Agaricus rubra* and *A. sanguinea*. It has a bitter taste and leaves a burning sensation in the mouth.

Agaster (ah-gas'-ter) [d, priv.; γαστήρ, the stomach]. One without a stomach.

Agastric (ah-gas'-trik) [see *Agaster*]. Without an intestinal canal, as the tape-worms.

Agathin (ag'-ath-in) [ἀγνής, good]. $C_6H_5(OH).CH.N.N.(CH_3).C_6H_5$. A greenish-white, crystalline substance, obtained by the interaction of salicylic aldehyd and *n*-methyl-phenylhydrazin. It is used as an antineuralgic in doses of 8 gr. (0.50 Gm.) 2 or 3 times daily. Its action is cumulative. Unof.

Agave (a-ga'-ve) [ἀγανή, noble]. A large genus of amaryllidaceous plants, natives of North America. *A. americana*, American aloe, the leaves of a plant growing in North America. It is diuretic and antisyphilitic. Dose of the fluidextract 1/2-1 dr. (2-4 Cc.). The fresh juice is also similarly employed. The fermented juice, called *pulque*, is a moderately stimulant drink, very popular in Mexico. Unof.

Agnesia, Agensis (ah-jen'-e'-se-ah, ah-jen'-es-ix) [d, priv.; γένεσις, generation]. Imperfect development.

Agenosomus (ah-jen'-o-so'-mus) [d, priv.; γεννᾶν, to beget; σῶμα, body]. A variety of single autostitic monsters, of the species *Celosoma*, in which there is a lateral or median evagination occupying principally the lower portion of the abdomen, while the genital and urinary organs are either absent or very rudimentary.

Ageusia, Ageustia (ah-gu'-se-ah, ah-goust'-e-ah) [d, priv.; γένεσις, taste]. Abolition of the sense of taste. **A., Central,** that due to

- lesion of the cerebral centers of the gustatory nerves. **A., Conduction**, that due to lesion in the nerves between their origin and distribution. **A., Peripheral**, that due to disorder of the ends of the nerves of taste.
- Agglomerate** (ag-glom'-er-āt) [agglomerare, to wind into a ball]. Grouped or clustered.
- Agglutinant** (ag-glū'-tin-ant). See **Agglutinate**.
- Agglutinate** (ag-glū'-tin-āt) [see **Agglutinant**]. To glue together, to unite by adhesion.
- Agglutination** (ag-glū'-tin-ā'-shun) [see **Agglutinate**]. **A. maxillae inferioris, trismus**. **A. pilorum**, the replacement of ingrowing eyelashes by means of viscous matter on a probe.
- Agglutination** (ag-glū'-tin-ā'-shun) [agglutinate, to paste to]. 1. A joining together. 2. A cumulative phenomenon accompanying hemolysis or bacteriolysis, thought by Gruber to be due to some deleterious effect on the membrane of the bacteria or blood-corpuscles which makes it sticky.
- Agglutinative** (ag-glū'-tin-ā'-tiv) [see **Agglutination**]. 1. Favoring agglutination, adhesive. 2. Any substance with adhesive properties, fitted to retain the edges of wounds in apposition. 3. A remedy promoting the repair of wounds by favoring nutrition.
- Agglutinin** (ag-glū'-tin-in) [see **Agglutination**]. A specific principle occurring in the blood-serum of an animal affected with a disease of microbial origin and capable of causing the clumping of the bacteria peculiar to that disease, as exemplified in the Widal reaction. It was first described by Gruber and Durham in 1896.
- Agglutino** (ag-glū'-tin-ē) [ad, against, glutire, to swallow]. Difficult deglutition; an obstruction to swallowing.
- Aggregate** (ag'-re-gāt) [ad, to, gregare, to collect into a flock]. Grouped into a mass.
- Aggression** (ag-res'-i-in) [aggressio, an attack]. A hypothetical bacterial product which inhibits the protective action of phagocytes, largely by preventing their migration.
- Aglobulia** (ah-glob'-ū-le-ah) [d, priv.; globulus, a globule]. A decrease in the quantity of red blood-corpuscles.
- Aglossia** (ah-glos'-ē-ah) [d, priv.; glossa, the tongue]. 1. Absence of the tongue. 2. Dumbness, severe impairment of speech.
- Aglossostomia** (ah-glos'-ō-stō-me-ah) [d, priv.; glossa, the tongue, stoma, mouth]. The condition of a mouth without a tongue.
- Aglossus** (ah-glos'-us) [see **Aglossia**]. A person without a tongue.
- Agmatology** (ag-mat-ol'-ō-jē) [dynamis, a fracture, agma, a discourse]. The science or study of fractures.
- Agminate** (ag'-min-āt) [agmen, a multitude]. Aggregated, clustered. **A. Glands**. See **Glands, Peyer's**.
- Ag nail** (ag'-nail) [AS, ungnaf]. 1. Hangnail. 2. A whitlow. 3. A corn.
- Agnathia** (ah-ent'-the-ah) [d, priv.; gnathos, a jaw]. Absence or defective development of the jaws.
- Agnin** (ag'-nin) [agnus, a lamb]. A fatty substance derived from sheep's wool.
- Agnosia** (ah-gnō'-se-ah) [d, priv.; gnosco, a recognizing]. Loss of the perceptive faculty which gives recognition of persons and things.
- Agomphious** (ah-gom'-fo-ūs) [a, priv.; gomphos, a tooth]. Without teeth.
- Agomphosis** (ah-gom'-fo'-sis) [see **Agomphous**]. 1. Absence of the teeth. 2. A loosening of the teeth.
- Agonal** (ag'-m-āl) [agonia, a struggle]. Struggling; relating to the death-struggle.
- Agony** (ag'-ō-ne) [see **Agonal**]. Vident pain, extreme anguish; the death-struggle.
- Agoraphobia** (ag-ō-ra-fō'-be-ah) [a, priv.; agros, a market-place, assembly; phobos, fear]. A morbid fear of open places or spaces.
- Agostini's Reaction for Glucose**. To 5 drops of the urine add 5 drops of 0.5% solution of gold chlorid and 3 drops of 20% potassium solution, and heat gently. In the presence of glucose a red color will be produced.
- Agrammatism** (ah-gram'-at-izm) [d, priv.; grammā, a word]. A phenomenon of aphasia, consisting in the inability to form words grammatically, or the suppression of certain words of a phrase; a form of aphasia.
- Agraphia** (ah-grā'-fē-ah) [d, priv.; grapho, to write]. Inability to express ideas by writing.
- A., Absolute**, a variety in which no letters can be formed. Syn., *Literal agraphia*. **A., Acoustic**, loss of capacity to write from dictation. **A. amnemonica**, a form in which letters can be written, but without conveying any meaning. **A. atactica**, that form in which letters cannot be formed from lack of muscular coordination. **A., Literal**, **A. literalis**. See **A. Absolute**. **A., Optic**, inability to copy writing, but ability to write from dictation. **A., Verbal**, a variety in which a number of words without meaning can be written. Cf. *Paragraphia*.
- Agraphic** (ah-grā'-fik) [see **Agraphia**]. Affected with agraphia.
- Agria** (ag'-re-ah) [Agrios, wild]. A pustular eruption, malignant pustule, herpes.
- Agrimony** (ag'-rim-ō-ne) [Agros, a field, monos, alone]. The root of *Agrimonia eupatoria*, a mild astringent. Dose of fluidextract ʒ-ss dr (2-8 G.). Unof.
- Agriothymia** (ag-re-ō-thī'-me-ah) [Agros, wild, thymos, mind, will]. Maniacal fury.
- Agrippa** (ag-rīp'-ah) [L.]. One born with the feet foremost.
- Agromania** (ag-ro-mā'-ne-ah) [Agros, a field, mania, madness]. A mania for living in the country.
- Agroa** [East Indian]. A disease which occurs in India marked by roughening of the tongue, with fissures.
- Agrypnia** (ah-grīp'-ne-ah) [d, priv.; gnyo, sleep]. Loss of sleep, insomnia.
- Agrypnotic** (ah-grīp'-not'-ik) [see **Agrypnia**]. 1. Preventing sleep. 2. A medicine that prevents sleep.
- Ague** (ā'-gu) [acutus, sharp, acute, Fr., afebril]. Malarial or intermittent fever; characterized

by paroxysms consisting of chill, fever, and sweating, at regularly recurring times, and followed by an interval or intermission the length of which determines the epithets quotidian, tertian, etc. In some cases there is a double paroxysm, and hence these are called double quotidian, double tertian, etc. The duration of each paroxysm varies from 2 to 12 hours. Syn., *Fever and ague*; *Intermittent fever*; *Periodic fever*; *Malarial fever*, *Mare fever*, *Paludal fever*; *Miasmatic fever*. **A., Aden.** See *Dengue*. **A., Brass-founders',** a disease common among brass founders, characterized by symptoms somewhat resembling an imperfect attack of intermittent fever, the recurrence of the paroxysms, however, being irregular. The direct cause is generally thought to be the inhalation of the fumes of deslagrating zinc or "spelter." **A., Brow-,** intermittent neuralgia of the brow. **A.-cake,** chronic enlargement of the spleen in diseases of malarial origin. **A., Catenating,** ague associated with other diseases. **A.-drop.** See *Fowler's Solution*. **A., Dumb,** ague without well-marked chill, and with at most only partial or slight periodicity. Syn., *Dead ague*; *Irregular ague*; *Latent ague*; *Masked ague*. **A., Face,** *le douloureux*. **A., Partial,** ague attended with pain which is limited to some part or organ. **A.-tree,** common *Sassafras*. **A.-weed,** 1. See *Gentiana*. 2. *Impatiens perfoliatum*, or thoroughwort.

Agurin (ag'-urin). A compound of sodium thiosulfate and sodium acetate, it is recommended as a diuretic in doses of 24 gr. (1.5 Gm.).

Ahlfeld's Sign. Irregular tetanic contractions affecting localized areas of the uterus, observed after the third month of pregnancy.

All (al) (ME., cyle). 1. To be out of health. 2. A slight indisposition. 3. Garlic. **A., Wetherbee,** a popular name for progressive muscular atrophy, from the fact that several successive generations of a Massachusetts family of that name were affected with the disease.

Ailanthus (a-el-an'-thus). See *Ailantus*.

Ailantus (a-el-an'-tus) [Malacca, *ailanto*, "tree of heaven"]. The bark of *A. glandulosa*, commonly known as "tree of heaven." Its properties are due to an oleoresin and a volatile oil. It is a nauseant and drastic purgative and an excellent anthelmintic against tape-worm. Dose of *fluidextract* 10 min-1 dr. (0.6-4.0 Cc.); of *tincture* 10 min-2 dr. (0.6-8.0 Cc.).

Aliment (al'-ment) (ME., cyle). A disease of leprosy, complaint.

Alurophobia (a-luro-fo'-be-ah) [*aluropos*, a cat, *phobos*, fear]. A morbid fear of cats.

Ainhum (in'-hum) [negro word, meaning to rot]. A disease of Guinea and Hindustan, peculiar to negroes, in which the little toes are slowly and spontaneously amputated at about the distopoplantar fold. The process is very slow, is unaccompanied by any constitu-

tional symptoms, and its cause is unknown. It sometimes attacks the great toe.

Iodine (ah-i'-o-din). A preparation of the thyroid gland and tannin. It is a tasteless powder, of which each gram is said to represent 10 Gm. of the fresh glands and to contain 0.4% of iodine. It is used in myxedema.

Air (di'-a, from *āiv*, to blow or breathe.) The atmosphere. *Atmospheric air* consists of a mixture of 77 parts by weight, or 79.10 by volume, of nitrogen, and 23 parts by weight, or 20.81 by volume, of oxygen, with 3.7 to 6.2 parts by volume of CO₂ in 10,000 parts. It also contains traces of ammonia, argon, nitrites, and organic matter. By virtue of its oxygen it is able to sustain respiration. One hundred cubic inches weigh 30.935 grains. The pressure of the air at sea-level is about 14.7 pounds upon the square inch. **A., Alkaline,** free or volatile ammonia. **A., Azotic,** nitrogen. **A.-bag.** See *A.-cushion*. **A.-bath,** therapeutic exposure to air, which may be heated, condensed, or variously medicated. **A.-bed,** an air-tight rubber mattress, inflated with air, employed in conditions requiring prolonged confinement to bed. **A.-bladder.** See *A.-vesicles*. **A.-cell,** an air-sac; an air-vesicle of the lung. **A., Complemental,** the amount of air that can still be inhaled after an ordinary inspiration. **A. Conduction,** a method of testing the hearing power by means of a watch held at varying distances from the ear, or by the employment of a number of tuning forks of varying pitch. **A.-cure,** the therapeutic employment of air. **A.-cushion,** a cushion filled with air and usually made of soft india-rubber. **A., Dephlogisticated,** an old name for oxygen. **A.-douche,** the inflation of the middle ear through the nose. **A.-embolism,** the entrance of free air into the blood-vessels during life. **A., Expired,** that driven from the lungs in expiration. **A., Factitious,** carbon dioxide. **A., Fixed,** an old name for carbon dioxide. **A., Hepatic,** hydrogen sulfid. **A., Inspired,** that taken into the lungs on inspiration. **A., Mephitic,** carbon dioxide. **A.-passages,** the nares, mouth larynx, trachea, and bronchial tubes. **A.-pump,** an apparatus for exhausting or compressing air. **A., Reserve,** **A., Supplemental,** the air that can still be exhaled after an ordinary expiration. **A., Residual,** that remaining in the lungs after the most complete expiration possible. **A.-sac.** See *A.-vesicles*. **A., Solid,** of Hales, carbon dioxide; so called because of its property of forming solid carbonates with metallic oxides. **A., Stationary,** that remaining in the lungs during normal respiration. **A., Supplemental.** See *A., Reserve*. **A.-tester,** an instrument for testing the purity of the air. **A., Tidal,** that taken in and given out at each respiration. **A.-vesicles,** the alveoli of the lung, the ultimate division of the air-passages. **A., Vital,** an old name for oxygen.

Air-break Wheel, Air-breaking Wheel. An arrangement by means of which the sparks

may be promptly extinguished when using a 110 volt continuous current to excite a coil, the spark formed at the contact-brushes when the coil is energized is blown out instantaneously by the air blast.

Akanthion (*ak-an'the-on*). See *Acanthion*.

Akatamathesia (*ah kat am ath e'-ze ah*) [*d*, priv.; *kata-mathēsis*, understanding]. Inability to understand.

Akathisia (*ah kati-e'-ze-ah*) [*d*, priv.; *kathēsis*, to be seated]. A name given by Lad Haszkovec to a form of rhythmic chorea in which the patient is unable to remain seated; the affection resembles astasia-abasia.

Akinesia, Akinesis (*ah-kin-e'-ze-ah, ah-kin-e'-sis*) [*d*, priv.; *kinēsis*, motion]. Lack of or imperfect motion; motor paralysis. **A. algera**, an affection characterized by abstinence from voluntary movement on account of pain, which any active muscular effort causes. The condition is probably a form of neurasthenia. **A., Crossed**, a motor paralysis on the side opposite that in which the lesion exists. **A., Reflex**, impairment or loss of reflex action.

Akinetic (*ah ki-net'-ik*) [*akinesis*]. Relating to or affected with akinesia.

Akouphone (*ah' kou-fone*). See *Acauphone*.

Akromegaly, Akromegalia (*ak-ro-meg'-a-le, ak-ro-meg'-a-le-ah*) [*akros*, extremity; *megē*, large]. A disease characterized by an overgrowth of the extremities and of the face, including the bony as well as the soft parts. The etiology is unknown. In a number of cases the pituitary body has been enlarged, disease of the thyroid gland has also been found in some instances.

Al. 1. The Arabic definite article *the*, prefixed to many words to designate preeminence, etc., as *alkali*, *alcohol*. 2. A chemic suffix denoting similarity to or derivation from an aldehyd, as *chloral*, *butyral*, etc. 3. The symbol for *aluminum*.

Ala (*a'-lah*) [*L.* "a wing"]. 1. A wing. 2. The arm or shoulder, in animals, the shoulder-blade. **A. alba lateralis**, the nucleus of the glossopharyngeal nerve. **A. alba medialis**, the hypoglossal nucleus. **A. auris**, the pinna of the ear. **A. cinerea**, a triangular space of gray matter in the fourth ventricle of the brain, probably giving origin to the pneumogastric nerves. **A. descendens**, the pterygoid process of the sphenoid bone. **Alæ laterales**. 1. The great wings of the sphenoid bone. 2. Wing-like processes on each side of the nasal spine of the frontal bone. **Alæ majores**. 1. The greater wings of the sphenoid. 2. The external labia pudendi. **Alæ minores**. 1. The lesser wings of the sphenoid. 2. The labia minora pudendi. **A. nasi**, the lateral cartilage of the nose. **Alæ parvæ**, the lesser wings of the sphenoid. **A. pontis**. See *Punctulus*. **Alæ pulmonum**, the lobes of the lung. **A. of Sacrum**, the flat, triangular surface of bone extending outward from the base of the sacrum, supporting the *psoas magnus* muscle. **A. uvulæ**, a medullary layer running from the posterior

part of the uvula of the cerebellum to the amygdalas. **A. vespertilionis**, the broad ligament of the uterus. **Alæ vulvæ**, the labia of the pudendum.

Alalia (*al-a'-le-ah*) [*d*, priv.; *lalē*, talk]. Impairment of articulation from paralysis of the muscles of speech or from local laryngeal disease. **A., Mental**, a form observed in children, which consists in inability to speak through excessive stammering. Cf. *Dyslalia*, *Lalephobia*, *Mogilalia*, *Paralalia*. **A., Relative**. Same as *A., Mental*.

Alangin, Alanginum (*al-an'-jin, -nim*). An amorphous principle from *Alangium lamellatum*, soluble in alcohol, in ether, and in chloroform; it is used as a febrifuge and emetic.

Alanin (*al'-an-in*) [*L.*, *aldehyd*], $C_3H_7NO_2$. Lactic acid. An organic base obtained by heating aldehyd ammonia with hypochlorous acid in the presence of an excess of H_2O . It occurs in aggregated hard nodules with a sweetish taste. It is soluble in 5 parts of cold water, less soluble in alcohol, insoluble in ether.

Alantic (*al-an'-tik*) [*Ger.*, *Alant*, elecampane]. Pertaining to or derived from elecampane. **A. Anhydrid**, $C_{15}H_{22}O_2$, a crystalline substance derived from the root of elecampane, melting at $66^{\circ} C$.

Alantin (*al-an'-tin*). Same as *Inulin*.

Alantol (*al-an'-tol*), $C_{15}H_{22}O$. Inulol. An aromatic liquid obtained from elecampane, used in the same manner as creosote in pulmonary tuberculosis.

Alar (*a'-lar*) [*ala*, a wing]. Wing-like. **A. Ligaments**, lateral synovial folds of the ligament of the knee-joint. **A. Ligaments, Odontoid**, lateral ligaments of the odontoid process.

Alares [*pl. of alaris*]. 1. The pterygoid muscles. 2. The wings of the sphenoid.

Alaris (*al-a'-ris*) [*ala*, a wing]. Wing-shaped. See *Alar*.

Alate (*a'-lat*) [*ala*]. Winged.

Alatus (*al-a'-tus*). 1. Winged. 2. An individual in whom there is a marked backward projection of the scapulas.

Albaras, Albarras [*Ar.*]. A skin disease characterized by the formation of white scaling patches. Syn., *White leprosy*; *Babar*, *Barras*.

Albargin (*al-bar'-jin*). A compound of silver (15%) and gelatine (a transformation product of glue). A yellow powder, freely soluble in water, used in treatment of gonorrhea in injections of 0.2% solution 4 or 5 times daily.

Albedo (*al-be'-do*) [*L.*, "whiteness"]. Whiteness. **A. retinæ**, retinal edema. **A. unguis**, the lunula of the nail.

Albert's Disease. Achillobdymia, inflammation of the retrocalcaneal bursa, generally secondary to osteitis of the os calcis.

Albescent (*al-bes'-ent*) [*albescere*, to become white]. Whitish.

Albicans (*al'-be-kans*) [*albicare*, to grow white]. 1. One of the corpora albicantia of the brain. 2. White; whitish.

Albicantia (al-be-kan'-she-ah) [L.]. Plural of *Albicantia* (s).
Albini's Nodules. Small nodules found on the free edge of the auriculoventricular valves in some infants.

Albinism, Albinismus (al'-bin-izm, al-bin-iz'-mizm) [albus, white]. That condition of the skin in which there is a congenital absence of pigment involving its entire surface, including the hair and the choroid coats and irises of the eyes. It is usually associated with nystagmus, photophobia, and astigmatism. Syn., *Alphosis; Congenital achromia; Congenital leukoderma; Leukathiopia; Achromatosis; Leukopathia; Albitudo*. **A., Acquired, A. acquisita.** See *Vitiligo*. **A., Partial,** congenital absence of pigmentation in certain parts of the skin, appearing in irregular, white, sharply defined spots. Especially characteristic are the changes of color in the hair, often observed in negroes. The hairs are white and grow upon skin devoid of pigment, or normally colored. Syn., *Poikilosis circumscripta*.

Albino (al-be'-no) [Sp.]. A person affected with albinism.

Albinotic (al-bin-of'-ik). Affected with albinism.

Alboferria (al-bo-fer'-in). An odorless, light-brown powder, readily soluble in cold water. It is said to consist of albumin, 90.14%; iron, 0.68%; phosphorus, 0.324%; amido-nitrogen, 0.13%, and mineral substances, 95%. It is indicated in chlorosis, anemia, etc. Dose 15-45 gr. (1-3 Gm.) for children; 45-75 gr. (1-5 Gm.) for adults, a day.

Albolene (al'-bo-lin) [albus, white; oleum, oil]. A hydrocarbon oil, colorless, tasteless, odorless, used as an application to inflamed surfaces.

Albor (al'-bor) [albus]. 1. A whiteness. 2. Egg-albumen. 3. [*Ur. al. bil.*] Urine. **A. cutis, A. natus,** albinism. **A. ovi,** white of egg.

Albuginea (al-bu-jin'-e-ah) [albus]. 1. White or whitish. 2. A layer of white fibrous tissue investing an organ or part. Syn., *Tunica albuginea*. **A. oculi,** the sclerotic coat of the eye. **A. ovarii,** the tunica albuginea of the ovary. **A. testis,** the tunica albuginea of the testicle.

Albugineous (al-bu-jin'-e-us). Whitish.

Albukalin (al-bu'-kal-in), $C_8H_{17}N_3O_6$. A substance found in leukemic blood.

Albumen (al-bu'-men) [albus]. The white of an egg. See *Albumin*.

Albumimeter (al-bu-mim'-et-er) [albumin; pte-ron, a measure]. An instrument for the quantitative estimation of albumin in urine.

Albumin (al-bu'-min) [albus, white]. A proteid substance, the chief constituent of the animal tissues. Its molecule is highly complex. It is soluble in water and coagulable by heat. It contains the following elements: Carbon, 51.5 to 54.5; hydrogen, 6.9 to 7.3; nitrogen, 15.2 to 17.0; oxygen, 20.9 to 23.5; sulfur, 0.3 to 2.0. Its approximate formula is $C_{77}H_{122}N_{22}O_{48}S$. **Albumen,** white of egg,

often called albumin, is largely composed of it. Other varieties are called after their sources or characteristic reactions, as acid-albumin, alkali-albumin, muscle-albumin, serum-albumin, ovum-albumin, vegetable-albumin, etc. Syn., *Coagulable animal lymph; Coagulable lymph of the serum*. See *Axenfeld, Barral, Boedeker, Cohen, Furbringer, Heller, Heynsius, Hindenlang, Johnson, MacWilliam, Mohr, Milton, Olizer, Oxyphenylsulfonic Acid, Parum, Raabe, Rees, Roberts, Spiegler, Tanret, Zouchlos*. **A., Blood-**. See *Serum-albumin*. **A., Caseiform,** that variety not coagulated by heat, but precipitated by acids. **A., Circulating,** that found in the fluids of the body. **A., Derived,** a modification of albumin resulting from the action of certain chemicals upon native albumin. **A., Imperfect,** one which fails to give all the ordinary reactions. **A., Lacto-**. See *Lactalbumin*. **A., Muscle-**, a variety found in muscle-juice. **A., Native,** any albumin occurring normally in the tissues. **A., Organic,** that forming an integral part of the tissue. **A., Serum-**. See *Serum-albumin*. **A., Vegetable,** that found in various vegetable juices.

Albuminate (al-bu'-min-at). A compound of albumin and certain bases, as albuminate of iron.

Albuminid (al-bu'-min-id). Acidalbumin; syn-tonin.

Albuminiferous (al-bu-min-if'-er-us) [albumin, ferre, to bear]. Yielding albumin.

Albuminimeter (al-bu-min-im'-et-er). See *Albumimeter*.

Albuminimetry (al-bu-min-im'-et-re). The quantitative estimation of the albumin in a liquid.

Albuminofibrin (al-bu-min-o-fi'-brin). A compound of albumin and fibrin.

Albuminogenous (al-bu-min-og'-e-us) [albumin, γεννᾶν, to produce]. Producing albumin.

Albuminoid (al-bu'-min-oid) [albumin; εἶδος, likeness]. 1. Resembling albumin. Applied to certain compounds having many of the characteristics of albumin. 2. Any nitrogenous principle of the class of which normal albumin may be regarded as the type. **A. Disease.** See *Amylod Degeneration*.

Albuminometer (al-bu-min-m'-et-er). See *Albumimeter*.

Albuminone (al-bu'-min-on) [albumin]. A principle derived from certain albuminoids, it is soluble in alcohol and is not coagulable by heat.

Albuminorrhea (al-bu-min-or-e'-ah) [albumin; ροιᾶ, a flow]. Excessive discharge of albumins.

Albuminose (al-bu'-min-ös) [albumin]. 1. A product of the digestion of fibrin or of any albuminoid in very dilute hydrochloric acid;

ALBUMI-METER.

acidalbumin. 2. Albumose, or one of the products of the digestion of albumin by the gastric juice.

Albuminous (al-bu'-min-us) [albumin]. Containing, or of the nature of, albumin.

Albuminuria (al-bu'-min-u'-re-ah) [albumin; *urine*, urine]. The presence in the urine of albumin, usually serum albumin. Albumin in the urine may result from disease of the kidneys or from the admixture of blood or pus with the urine. Its presence is sometimes not accounted for by either of these causes. See *A., Cyclic*. **A., acetonica**, albuminuria due to asphyxia. Syn., *Anoxemic albuminuria*. **A. of Adolescence**. See *A., Cyclic*. **A., Adventitious**. See *A., Pseudo*. **A., Cardiac**, that due to chronic valvular disease. **A., Catarrhal**, albuminuria due to distribution of or changes in the renal epithelium. **A., Cicatricial**, a form in which epithelial desquamation is assumed to be replaced by tissue incapable of restraining the transudation of albumin from the blood. **A., Colliquative**, that due to great dissimulation of the blood-corpuscles or adipose tissue. **A., Consumptive**. See *A., Colliquative*. **A., Cyclic**, a condition, also known as physiologic, simple, functional, or transient albuminuria, or the albuminuria of adolescence, in which a small quantity of albumin appears in the urine, especially of the young, at stated times of the day; hence the term, "cyclic." The nature of this phenomenon is not positively known, but it is probably the result of some changes in the renal circulation. **A., Dietetic**, that due to the ingestion of certain forms of food. **A., Dys-trophic**, that dependent upon imperfect formation of the blood corpuscles. **A., Emulsion**, that in which the urine has a milky turbidity due to minute corpuscular elements. **A., Exudative**, Gubler's name for albuminuria partially due to the filtration of albumin through the membranes of the kidney and also to the presence in the urine of products of inflammation, as in cases of nephritis. **A., False**, a mixture of albumin with the urine during its transit through the urinary passages, where it may be derived from blood, pus, or special secretions that contain albumin. **A., Febrile**, that due to fever, or associated with acute infectious diseases, slight changes occurring in the glomerules without organic lesion. **A., Functional**. See *A., Cyclic*. **A., Globular**, that due to destruction of blood-corpuscles or dependent upon the presence of blood in the urine. **A., Gouty**, albumin in the urine of elderly persons, who secrete a rather dense urine containing an excess of urea. **A., Intrinsic**. See *A., True*. **A., Mixed**, the presence of a trace with a pseudoalbuminuria. **A., Nephrogenous**, that due to renal disease. **A., Orthostatic**, a form dependent upon an upright posture. **A., Partial**, a form in which it is assumed that only certain tubules are affected. Syn., *Albuminuria parcellaire*.

A., Physiologic, the presence of albumin in normal urine, without appreciable existing renal lesion or diseased condition of the system. **A., Pretuberculous**, a condition observed in young persons as a preliminary stage of tuberculosis, believed to be due to the congestive action of the tuberculous virus upon the renal structure. **A., Pseudo**, albuminuria dependent upon the presence of such fluids as blood, pus, lymph, spermatic fluid, or the contents of an abscess cavity, in the urine. Syn., *Adventitious albuminuria*. **A., Residual**, a form in which a small amount of albumin may persist following an attack of nephritis. **A., True**, that due to the excretion of a portion of the albuminous constituents of the blood with the water and salts of the urine. Syn., *Albumin albuminuria*.

Albuminuric (al-bu'-min-u'-rik) [see *Albuminuria*]. Associated with, of the nature of, or affected by, albuminuria.

Albumoscope (al-bu'-mo-skop) [albumin, *opsis*, to examine]. An apparatus for determining the presence and amount of albumin in urine.

Albumose (al' bu-mōs) [albumin]. Any albuminoid substance ranking among the first products of the splitting up of proteins by enzymes, and intermediate between the food albumins and the typical peptones. According to Kuhne, there are at least two albumoses, *antialbumose* and *hemialbumose*. Hemialbumose yields the following: *Promalbumose*, *denteroalbumose*, *heteroalbumose*, and *dysalbumose*.

Albumosuria (al bu-mōs-u'-re-ah) [albumose, *urine*, urine]. The presence of albumose in the urine. **A., Bence-Jones'**. See *A., Myelopathic*. **A., Myelopathic**, a condition marked by persistent occurrence of albumin in the urine, accompanied by softening of the bones, owing to multiple myelomas.

Alcarnose (al-kar'-nōs). A nutrient preparation containing maltose combined with albumoses.

Alchemy (al'-kem-ē) [Ar., of doubtful derivation]. The supposed art of the transmutation of metals (into gold) and of finding a remedy for all diseases.

Alcock's Canal. A canal formed by the separation of the layers of the obturator foramen for the transmission of the pudic nerve and vessels.

Alcogel (al'-ko-jel). A jelly-like combination of alcohol and silicic acid.

Alcohol (al'-ko-hol) [Ar., *al koh'l*, the fine powder for staining eyelids]. 1. Any compound of an organic hydrocarbon radical with hydroxyl. Alcohols are classed as *monarid* (monatomic), *diarid* (diatomic), and *triarid* (triatomic), according to the number of hydroxyl radicals present in the molecules. 2. Ethylalcohol, C_2H_5O . A liquid obtained by the distillation of fermented grain or starchy substance. It is inflammable, colorless, and possesses a pungent odor and burning taste. Internally, it is a cerebral

excitant and cardiac stimulant; in large doses a depressant, narcotic poison, producing muscular incoordination, delirium, and coma. It exists in wine, whisky, brandy, beer, etc., and gives to them their stimulant properties. Commercial alcohol contains 92.3% of absolute alcohol with 7.7% of water. It is valuable as a cardiac stimulant in acute failure of the heart's action and in adynamic conditions.

A., Absolute (*alcohol absolutum*, U. S. P.), ethyl-alcohol deprived of water. **A., Benzyl**, C_7H_7O , obtained from benzaldehyd by the action of sodium amalgam. **A., Caustic**, sodium ethylate. **A., Chlorethyl**, C_2H_5OCl , a substitution product of ethyl-alcohol in which 1 atom of hydrogen is replaced by 1 atom of chlorine. **A., Cinnamic**, **A., Cinnamyl**, **A., Cinnamyllic**, $C_{11}H_{10}O$, yellowish needles or crystalline masses obtained from the distillation of styracin. It is soluble in alcohol, ether, water, glycerol, and benzine; melts at 30° – 33° C.; boils at 150° C. It is antiseptic and is a deodorizer in a 12.5% glycerol solution. **Syn.** *Styrylic alcohol*, *Crystallized styrone*. **A., deodoratum**, ethyl-alcohol from which odorous and coloring-matters have been removed by filtration through charcoal. **A., Dilute** (*alcohol dilutum*, U. S. P.) contains 41.5%, by weight, of alcohol. **A., Ethyl-**. See *Alcohol* (2). **A., Fatty**, one obtained from a hydrocarbon of the fatty series. **A., Iso-**, an alcohol derived from a hydrocarbon containing carbon atoms which unite directly with more than two other carbon atoms. **A., Methyl-**, CH_3O , commonly known as "wood spirit." **A., Phenic**. Same as *Phenol*. **A., Primary**, **A., Secondary**, **A., Tertiary**, an alcohol produced by the replacement of 1, 2, or 3 hydrogen atoms in carbonol by alkyls. **A., Unsaturated**, that derived from the unsaturated alkylens in the same manner as the normal alcohols are obtained from their hydrocarbons. In addition to the general character of alcohols, they are also capable of directly binding two additional affinities. **A., Wood-**. See *A., Methyl*.

Alcoholate (*al'-ko-hol-at*). 1. A chemie compound, as a salt, into which an alcohol enters as a definite constituent. 2. A preparation made with alcohol.

Alcoholature (*al'-ko-hol'-at-cher*) [*Fr., alcoolature*]. An alcoholic tincture.

Alcoholic Radicle. The name applied to the hydrocarbon radicle that unites with hydrogen and oxygen to form an alcohol.

Alcoholica (*al'-ko-hol'-ik-ah*). In pharmacy, alcoholic preparations.

Alcoholimeter (*al'-ko-hol-im'-et-er*). See *Alcoholometer*.

Alcoholism (*al'-ko-hol-izm*). The morbid results of excessive or prolonged use of alcoholic liquors. The term *acute alcoholism* has been used as a synonym for inebriety. The *chronic* form is associated with severe disturbances of the digestive and nervous systems.

Alcoholization (*al'-ko-hol-iz-a'-shun*). The art

or process of alcoholizing; the state of being alcoholized; the product of the process of alcoholizing.

Alcoholize (*al'-ko-hol-iz*). 1. To impregnate with alcohol. 2. To convert into an alcohol.

Alcoholometer (*al'-ko-hol-om'-et-er*) [*alcohol; μέτρον, a measure*]. A hydrometer or other instrument used in determining the percentage of alcohol in any liquid.

Alcoholophilia (*al'-ko-hol-o-fil'-e-ah*) [*alcohol; φιλία, to love*]. The appetite for strong drink; a craving for intoxicants.

Alcometric (*al'-ko-met'-rik*). Relating to the estimation of the amount of alcohol in a liquid.

Aldehyd (*al'-de-hid*) [*al*, the first syllable of alcohol, *dehyd*, from *dehydratus*]. 1. A class of compounds intermediate between alcohols and acids, derived from their corresponding primary alcohols by the oxidation and removal of 2 atoms of hydrogen, and converted into acids by the addition of an atom of oxygen. They contain the group COH . 2. C_2H_4O . Alcohol deprived of 2 atoms of hydrogen, or *acetic aldehyd*. It is a colorless, limpid liquid with a characteristic odor. **A.-alcoholate**, C_2H_5O , an addition compound of acetic acid and ethyl-alcohol. **A.-ammonia**, $C_2H_5ONH_3$, obtained from aldehyd by action of dry ammonia; soluble in water, slightly soluble in ether. It was found by Doberiner, and named by Liebig. **Syn.**, *Ammoniated ethylic aldehyd*; *Acetylammonium*; *Ammonium aldehydate*; *Ethylene hydramin*. **A., Anisic**, $C_9H_9O_2$, results on oxidizing various essential oils (anise, fennel, etc.) with dilute HNO_3 . **A., Aromatic**, an aldehyd obtained as an oxidation-product of a primary aromatic alcohol and in turn giving rise by oxidation to a monobasic aromatic acid. **A., Benzoic**, $C_7H_5O_2$, the oil of bitter almonds. **Syn.**, *Benzaldehyd*. **A. Characteristic**, the univalent radicle, $C(H) = O$, common to the aldehyds. **A., Cinnamic**, $C_9H_7O_2$, the chief ingredient of the essential oil of cinnamon and cassia. **A., Collidin**, **A., Collinic**, an oxidation-product of albuminoids and gelatin; a colorless, viscid oil with odor like oil of cinnamon. **A., Formic**, CH_2O or $HCHO$ is microbicidal and antiseptic. **Syn.**, *Formaldehyd*. **A., Glycolyl**, $CH_2(OH) \cdot CHO$, an oxidation-product of tartaric acid when digested with water at 50° – 60° C. **A., Isobutylic**, **A., Isobutyryl**, C_4H_8O , a transparent, colorless, highly refractive, pungent liquid; sp. gr. 0.797 at 15° C.; soluble in alcohol, boils at 61° C. **A., Isovaleral**, **A., Isovaleric**, $C_5H_{10}O$, a pungent, oily liquid, with an odor of apples, obtained from oxidation of amyl-alcohol, sp. gr. 0.804 at 15° C.; miscible in alcohol and ether; boils at 92.5° C. **A., Pyroracemic**, $CH_3 \cdot CO \cdot CHO$, a yellow volatile oil obtained by boiling isonitrosoacetone with dilute sulfuric acid. **Syn.**, *Acetylformyl*; *Methylglyoxal*; *Propanalon*. **A., Thio-**, an aldehyd in which the oxygen in the aldehyd characteristic is

- replaced by sulfur. **A.**, Toluic, **A.**, Toluic, C_8H_7O , a substance occurring in 3 isomeric forms, all of which are liquids.
- Aldehydase** (al-de-hi'daz). An oxydase occurring in the liver, capable of oxidizing salicylic aldehyd to the corresponding acid and supposed to be closely concerned in the functions of that organ.
- Aldin** (al'din) [see *Aldehyd*]. An amorphous basic chem. substance, formed from an ammonia compound of aldehyd. Several aldins are known.
- Ale** (al) [AS., *calu*]. An alcoholic beverage brewed from malt and hops. It contains from 3 to 7 % of alcohol.
- Alecithal** (ah-les'-thi-al) [ä, priv.; *lecithos*, yolk]. A term applied to certain ovums having the food yolk absent, or present only in very small quantity.
- Aleipsis** (al-äp'-sis) [*aleipho*, an anointing]. Steatosis, fatty degeneration.
- Alembic** (al-em'-bik) [Ar., *al, the*; *ämbik*, a cup]. A vessel used for distillation.
- Alembroth** (al-em'-broth) [origin unknown]. An old name for a compound of the chlorids of ammonium and mercury. Its solution has been used as an antiseptic.
- Aleppo Boil**, **A. Button**, **A. Evil**, **A. Pustule**, **A. Ulcer**. See *Furunculus orientalis*.
- Alepton P** (al-ep'-ton). Colloidal ferromanganous peptonate.
- Alepton S**. Colloidal ferromanganese saccharate.
- Aletris** (al'-et-rit). Star-grass; unicorn-root; starwort, colic root. The root of *A. farinosum*. It is tonic, diuretic, and anthelmintic, and was formerly a popular domestic remedy in colic, dropsy, and chronic rheumatism. Dose of *fin. extract* 10-30 min (0.65-2.0 Gm.), of *tincture* (1 in 8 proof spirit) 1-2 dr (4 S Cc.), of *aletris*, the extractive, $\frac{1}{4}$ -4 gr. (0.016-0.26 Gm.)
- Alukemia** (ah-lu-ke'-me-ah) [ä, priv.; *leukos*, white, *aim*, blood]. Deficiency in the proportion of white cells in the blood.
- Alukocytosis** (ah-lu-ko-si-to'-sis) [ä, priv.; *leukos*, white, *kotos*, cell]. A diminished or insufficient formation of leukocytes.
- Aleurometer** (al-u-rom'-et-er) [*aleuron*; *metron*, a measure]. An instrument used for the examination of crude gluten as to its power of swelling under the influence of heat, as a means of judging of the value of a flour for bread-making.
- Aleuron** (ä-lu'-ron) [*aleuron*, flour]. 1. Wheat flour. 2. Small, round proteid particles found in seeds.
- Aleuronat** (al-u'-ro-nat) [*aleuron*]. A vegetable albumin used as a substitute for bread in cases of diabetes.
- Aleuroscope** (ä-lu'-ro-skop). See *Aleurometer*.
- Alexander's Operation**. A shortening of the uterine round ligaments through an inguinal incision, to cure retrodisplacement.
- Alexeterium** (al-eks-e-te'-re-um) [*alexeterion*, a defender]. An external defensive remedy against poison or infection, as distinguished from *alexipharmac*, an internal remedy. The plural *alexeteria* was formerly used to designate remedies in general, but applied later to those used against the poisonous bites of animals.
- Alexia** (ah-eks'-e-ah) [ä, priv.; *alexis*, words]. Word-blindness. A form of aphasia in which the patient is unable to recognize written or printed characters. **A.**, Cortical, a variety of Wernicke's sensory aphasia produced by lesions of the left gyrus angularis. **A.**, Motor, inability to read aloud what is written or printed, although it is comprehended. **A.**, Musical, loss of the ability to read music. **A.**, Optic, inability to comprehend written or printed words. **A.**, Subcortical, that due to interruption of the direct connection between the optic center and the gyrus angularis.
- Alexin** (al-eks'-in) [*alexis*, help]. A defensive proteid existing normally in the blood. See *Immunity*.
- Alexipharmac**, **Alexipharmic** (al-eks-e-jar'-mak, -mik) [*alexien*, to repel, *pharmacum*, a poison]. 1. A medicine neutralizing a poison. 2. Acting as an internal antidote.
- Alexipharmacon** (al-eks-e-jar'-mak-on) (see *Alexipharmac*). Any alexipharmac medicine.
- Alexiterium** (al-eks-it-e'-re-um) See *Alexeterium*.
- Alexocyte** (al-eks'-o-sit) [*alexien*, to ward off; *kytos*, a cell]. Hankin's name for an amorphous leukocyte.
- Alga** (al'-ga) [*alga*, seaweed, pl. *algae*]. A seaweed, one of a group of acotyledonous plants living mostly in the water.
- Algaroth** (al'-gar-oth). Antimony oxychlorid.
- Algisia** (al-je'-ze-ah) [*algos*, pain]. 1. Pain, suffering. 2. Hyperesthesia as regards the sensation of pain, also neuralgia.
- Algesimeter** (al-jez-am'-et-er) [*algosia*, pain, *metron*, a measure]. An instrument for determining the acuteness of the sense of pain. **A.**, Björnström's, one to test the sensibility of the skin. **A.**, Boas', an instrument consisting of a pad and spring, used to determine the relative sensitiveness over the epigastrium. The normal tolerance is 9 to 10 kilograms; in cases of gastric ulcer, 1 to 2 kilograms.
- Algesthesis** (al-jez-the'-sis) [*algos*, pain; *sthesis*, feeling]. The perception of pain, painful disease.
- Algid** (al'-jid) [*algidus*, cold]. Cold, chilly. **A.** Cholera, the cold stage of Asiatic cholera. **A.** Fever, a pernicious intermittent fever, with great coldness of the surface of the body. **A.** State, the cold stage of a disease.
- Algidism**, **Algidity** (al'-jid-izm, al'-jid-ite) [see *Algid*]. A marked sense of coldness, chilliness. **A.**, Progressive. See *Sclerema neonatorum*.
- Algiomotor** (al-je-o-mo'-tor) [*algos*, pain, *motus*, to move]. Causing movements attended with pain.
- Algogenic** (al-go-jen'-ik) [*algos*; *γεννω*, to

produce]. 1. Causing neuralgic pain. 2. [algidus, cold, *παῖδαν*, to produce.] Lowering the body-temperature below the normal.

Algolagnia (al-go-lag'-ne-ah) [algos; *αλγαια*, venter]. Sexual perversion in which pain en-joined or endured plays a part.

Algometer (al-gom'-et-er) [algos; *μέτρον*, a measure]. An instrument for testing the sensibility of a part to pain.

Algor (al'-gor) [L.]. A sense of chilliness or coldness.

Albert's Disease. Mycosis fungoides. A's Keloid, true keloid.

Alible (al'-ib-ib) [alibilis, nutritive]. Nutritive; absorbable and assimilable.

Alicyclic (al-i-si'-klik) [ἀλκυκλῆς, fat; κύκλος, a circle]. Pertaining to any hydroaromatic derivative having a ring-formation, carbocyclic, but approaching the aliphatic derivatives in chemic behavior. Syn., Aliphatic-cyclic.

Alienatio (al'-yen-a'-she-o). See Alienation. A. partis, gangrene.

Alienation (al'-yen-a'-shun) [alienus, stranger]. Mental derangement.

Alienist (al'-yen-ist) [see Alienation]. One who treats mental diseases.

Aliform (al'-i/-orm) [ala, wing; *μορφή*, shape]. Wing-shaped. A. Process, the wing of the sphenoid.

Alima (al-i'-mah) [ἀλμα, without hunger]. Alimentary substances.

Aliment (al'-im-ent) [alimentum, from *alimentare* to nourish]. Nourishment, food. A., Accessory, A., Adjective, a condiment. A., Substantive, a food with nutritive value as distinguished from a condiment.

Alimentary (al-im-en'-to-re) [see Aliment]. Nourishing. A. Bolus, the food after mastication and just prior to swallowing. A. Canal, A. Duct, A. System, A. Tract, A. Tube, the digestive tube, from the lips to the anus, with its accessory glands.

Alimentation (al-im-en-ta'-shun) [alimentare, to nourish]. The act of supplying with food. A., Rectal, the nourishing of a patient by the administration of small quantities of concentrated food through the rectum. There are many formulas for these nutritive enemas, the most important of which are the following: 1. *Leube's Pancreatic-meat Emulsion*.—"For rectal alimentation: chop 5 oz. of finely wrapped meat still finer, add to it 1 1/2 oz. of finely chopped pancreas free from fat, and then 3 oz. of lukewarm water, stir to the consistence of a thick pulp. Give at one time, care being taken to wash out the rectum with water about an hour before." 2. *Mayer's Formula*.—"Fresh ox-pancreas,

150 to 200 Gm.; lean meat, 400 to 500 Gm. Bruise the pancreas in a mortar with water at a temperature of 37° C., and strain through a cloth. Chop the meat and mix thoroughly with the strained fluid, after separating all the fat and tendinous portions. Add the yolk of one egg, let stand for 2 hours, and administer at the same temperature, after having cleansed the rectum with an injection

GENERAL SCHEME OF THE DIGESTIVE TRACT, WITH THE GLANDS OPENING INTO IT, TOGETHER WITH THE LACTEALS ARISING FROM THE INTESTINE AND JOINING THE THORACIC DUCT. (Lindbergh)

of oil. This quantity is sufficient for 24 hours' nourishment, and should be administered in 2 doses." 3. *Rennie's Formula*.—"Add to a bowl of good beef-tea one-half pound of lean, raw beefsteak pulled into shreds. At 90° F. add 1 dr. of fresh pepsin and 1/2 dr. of dilute HCl. Place the mixture before the fire and let it remain for 4 hours, stirring frequently. The heat must not be too great, or the artificial digestive process will be stopped altogether. It is better to have the mixture too cold than too hot. If alcohol is to be given, it should be added at the last moment. Eggs may also be added, but should be previously well beaten." 4. *Peaslee's Formula*.—"Crush or grind a

pound of beef-muscle fine; then add 1 pint of cold water; allow it to macerate 40 minutes, and then gradually raise it to the boiling-point; allow it to boil 2 minutes—no more—and then strain." 5 *Flint's Mixture*.

—"Milk, 2 oz.; whisky, $\frac{1}{2}$ oz., to which add half an egg."

Alinasal (*al-i-na'-sal*) [*ala*, a wing; *nasus*, the nose]. Pertaining to the *ala nasi*, or wing of the nose.

Aliphatic (*al-e-fat'-ik*) [*ἀλιφάτος*, fat]. Fatty. **A. Acid**. See *Acid*, Fatty. **A.-cyclic**. See *Alicyclic*.

Aliquot (*al-i'-kwot*) [*aliquot*, several]. A part of a number or quantity which will measure it without a remainder, as 4 is an aliquot of 12.

Alisphenoid (*al-is-jē'-noid*) [*ala*, a wing; *sphenoid*]. 1. Pertaining to the greater wing of the sphenoid bone. 2. The bone that in adult life forms the main portion of the greater wing of the sphenoid.

Alizaramid (*al-is-ar'-am-id*), $C_{14}H_8O_2 \cdot \left\{ \begin{array}{l} OH \\ NH_2 \end{array} \right.$. A brown, crystalline substance obtained from boiling a dilute solution of alizarin in ammonia. Syn., *Amidoanthraquinon*.

Alizarimid (*al-is-ar'-im-id*), $C_{14}H_7NO_2$. A violet-red substance obtained from flocculent precipitated alizarin by action of ammonia with heat; it becomes nearly black on drying. Syn., *Alizarin*.

Alizarin (*al-is-a'-rin*) [Ar., *al*, the; 'aḡrah, to extract], $C_{14}H_8O_4$. The red coloring principle occurring in *Rubia tinctorum* and in anthracene. It occurs in red, prismatic crystals, readily soluble in ether and alcohol. The alizarins form a group of the anthracene colors. **A.-blue**, a crystalline blue coloring-matter formed by heating nitroalizarin in combination with H_2SO_4 and glycerol.

Alkadermic (*al-ka-der'-mik*) [*alkali*; *ἀλπία*, skin]. Pertaining to or containing an alkalioid used in subcutaneous injection.

Alkalescence (*al-ka-les'-ens*) [Ar., *al-qalīy*, soda-ash]. Slight or commencing alkalinity.

Alkalescent (*al-ka-les'-ent*) [see *Alkalescence*]. Somewhat alkaline.

Alkali (*al'-ka-li*) [see *Alkalescence*]. The term includes the hydrated oxides of the alkali metals; these are electropositive, are strong bases, uniting with acids to form salts, turn red litmus blue, and saponify fats. **A.-albumin**, a derived albumin; a proteid that has been acted upon by dilute alkalis and yields an alkaline reaction. **A.-albuminate**, a soluble powder used as a culture-medium in bacteriology. **A., Cautic**, the solid hydroxide of potassium or sodium. **A., Fixed**, potassium or sodium hydrate. **A. Metals**, sodium, potassium, lithium, cesium, and rubidium. **A., Organic**, one forming an essential constituent of an organism. **A., Vegetal**, potash; also applied to the alkaloids. **A., Volatile**, ammonium hydrate, which is decomposed by

heat with the evolution of ammonia; also ammonium carbonate.

Alkalimeter (*al-ka-lim'-et-er*) [*alkali*; *μέτρον*, a measure]. An instrument for estimating the alkali in a substance.

Alkalimetry (*al-ka-lim'-et-re*) [see *Alkalimeter*]. The measurement of the amount of an alkali in a substance.

Alkaline (*al'-ka-lin*) [*alkali*]. Having the qualities of or pertaining to an alkali. **A. Earths**, the oxides of calcium, barium, strontium, and magnesium.

Alkalinity (*al-ka-lin'-i-te*) [*alkali*]. The quality of being alkaline.

Alkalinuria (*al-ka-lin-u'-re-ah*) [*alkali*; *οὐρον*, urine]. Alkalinity of the urine.

Alkalithia (*al-ka-lith'-e-ah*). An effervescent preparation used in rheumatism, said to contain 1 gr. (0.065 Gm.) caffeine, 5 gr. (0.3 Gm.) lithium bicarbonate, 10 gr. (0.65 Gm.) sodium bicarbonate, in each heaping teaspoonful. Dose 1 heaped teaspoonful 3 times daily in a large glass of water.

Alkalization (*al-ka-li-za'-shun*) [*alkali*]. The act of rendering a thing alkaline; the state or quality of being rendered alkaline.

Alkaloid (*al'-ka-loid*) [*alkali*; *εἶδος*, likeness]. Any one of the nitrogenous compounds occurring in plants, and resembling ammonia in being basic and capable of forming salts with acids. Alkaloids are believed to be substituted ammonias. Several of the important ones are related to piperidin and to quinolin. Alkaloids are, as a rule, the most active parts of plants; many are used in medicine. **A.s.**, **Animal**, substances chemically like alkaloids, formed in the decomposition of animal tissues. See *Leukamain*. **A., Artificial**, one produced synthetically. **A., Cadaveric**, **A., Putrefactive**. See *Plomain*. **A., Glucosid**, a substance which exhibits the characteristics of an alkaloid, but is capable of decomposition into sugar and another substance when acted upon by dilute acid.

Alkalometry (*al-ka-lom'-e-tre*). Administering alkaloids. See *Dosimetry*.

Alkamin (*al'-kam-in*). See *Alkine*.

Alkanet (*al'-kan-et*) [Sp., dim. of *alecāna*, henna]. The root of the herb, *Alkanna* (*Anchusa tinctoria*), yielding a red dye that is used in staining wood, coloring adulterated wines, and in pharmacy to give a red color to salves, etc.

Alkanin (*al'-kan-in*). See *Alkannin*.

Alkanna-red. See *Alkannin*.

Alkannin (*al'-kan-in*) [see *Alkanet*]. Alkanna-red, a valuable coloring-matter obtained from alkanet.

Alkapton (*al-kap'-ton*). A yellowish, resinous, nitrogenous body occasionally found in urine.

Alkaptonuria (*al-kap-ton-u'-re-ah*) [*alkapton*; *οὐρον*, urine]. The presence of alkapton in the urine. It has been found in cases of pulmonary tuberculosis and in other instances in which there were no local lesions or general disease. Urine containing alkapton turns dark on standing or on the addition of an alkali.

Alkargen (al-kar'-jen) [alkarsin; γαρῶν, to produce]. Dimethylarsenic acid, obtained from alkarsin by the action of water.

Alkarsin (al-kar'-in) [alcohol; arsenic]. "Cade's fuming liquid", an extremely poisonous liquid containing cacodyl. It is of a brown color, and on exposure to the air ignites spontaneously.

Alkies (al-ke-inz). A collective name for the ethers formed from the alkines.

Alkine (al'-kin). Any member of the acetylene series of hydrocarbons. Syn., *Alkamin*.

Alkyl (al'-kil) [alkali]. The name applied to any of the univalent alcohol radicals, C_1H_3 , C_2H_5 , methyl, ethyl, etc., are alkyls. **A.-sulfids**, thiethers, sulfur analogs of the ethers. They are colorless liquids, generally insoluble in water, and possessing a disagreeable odor resembling that of garlic.

Alkylamin (al-kil'-am-in). A body having the constitution of ammonia in which an alkyl replaces hydrogen; 1, 2, or 3 hydrogen atoms of the ammonia molecule may suffer this replacement, thus yielding *primary* or *mon-alkylamin*, having the general formula $NH_2(C_1H_3)_1$; *secondary* or *dialkylamins*, having the general formula $NH(C_1H_3)_2$; and *tertiary* or *trialkylamins*, of the general formula $N(C_1H_3)_3$.

Alkylate (al'-kil-at). A compound derived from a monatomic alcohol by replacement of the hydroxyl hydrogen by a metal.

Alkylation (al-kil'-a-shun). The exchange of hydroxyl hydrogen atoms for methyl groups.

Alkylen (al'-kil-en). See *O'efin*.

Allachesthesia (al-ah-ke'-the'-ze-ah) [ἀλλὰχῆ, in another place; αἰσθησις, sensation]. Erroneous localization of tactile impressions, differing from allocheiria in the respect that the sensation is felt on the same side of the body, but in a different place from that in which the irritation occurs.

Allantosis (al-an'-tō-sis) [ἀλλὰς, a sausage]. Stomach poisoning, due to the ingestion of sausage in which putrefactive changes have taken place.

Allantoic (al-an'-tō'-ik) [ἀλλὰς, a sausage, ribbed, resemblance]. Pertaining to the allantoids.

Allantoid (al-an'-tō'id) [see *Allantoic*]. 1. Resembling a sausage. 2. Relating to the allantoids. **A. Liquid**. See *Liquor amni spu-ris*.

Allantoides (al-an'-tō'-idēs). 1. Allantoid. 2. A sausage. 3. The great toe. 4. The allantoids.

Allantoin (al-an'-tō-in) [see *Allantoic*], $C_4H_6N_2O_3$. A crystalline substance occurring in traces in normal urine, and prepared from uric acid by oxidation. Also the characteristic constituent of the allantoic fluid, and likewise found in fetal urine and amniotic fluid.

Allantois (al-an'-tō-is) [see *Allantoic*]. One of the fetal membranes derived from the mesotheliotic and hypoblastic layers. Its function is to convey the blood-vessels to the chorion.

The lower part finally becomes the bladder, the upper, the urachus.

Allantotoxicon (al-an'-tō-tōks'-ik-on) [ἀλλὰς, a sausage; τοξικόν, a poison]. A poisonous substance, probably a ptomain, that develops during the putrefactive fermentation of sausage.

Allen's (Charles W.) Iodin Test. See under *Tinea versicolor*.

Allen's Reaction for Phenol. Add to one or two drops of the liquid to be tested a few drops of hydrochloric acid and then one drop of nitric acid. A cherry-red coloration is produced.

Allene (al'-ēn'), $CH_2=C=CH_2$. An isomer of allylene. Syn., *β-Allylene*; *Isallylene*.

Allesthesia (al-es-the'-ze-ah) [ἀλλος, other; αἰσθησις, feeling]. Synonym of *Allocheiria*.

Alleviator (al-el'-ve-a-tor) [allevare, to lighten].

A device for raising or lifting a sick person from the bed.

Alliaceous (al-e-a'-shus) [allium, garlic]. Resembling garlic, or pertaining to the

Allingham's Painful Ulcer. Anal fissure.

Allis' Sign. Relaxation of the fascia lata between the iliac crest and the trochanter major is indicative of fracture of the neck of the femur.

Alliteration (al-it-er-a'-shun) [ad, to; litera, letter]. A form of dysphrasia in which the patient arranges his words according to the sound.

Allium (al'-e-um) [L.]. Garlic. The undried bulb of *A. sativum*. It contains a pungent, volatile oil that is found also in the leek and the onion. In small amounts garlic acts as a condiment and aids in the digestion and absorption of food. In chronic bronchitis garlic applied as a poultice to the chest and internally in boiled milk is beneficial. Poultices of garlic applied to the spine are recommended in infantile convulsions and may be applied over the abdomen in gastrointestinal catarrh. *A. cepa*, the common onion, and *A. porrum*, the leek, have similar qualities. **A., Syrup of** (*syrupus allii*), contains fresh garlic, 20 Gm.; sugar, 80 Gm.; dilute acetic acid, a sufficient quantity to make 100 Cc. Dose 1-4 dr. (4-16 Cc.). Unof.

Allo-. A prefix used in chemistry to designate a body which has been rendered more stable by heat; also used to represent isomerism when there is "relative asymmetry."

Allocheiria, Allochiria (al-o-ki'-re-ah) [ἀλλος, other; χεῖρ, hand]. A peculiar disturbance of sensation in which, if one extremity is pricked, the patient locates the sensation in the corresponding part on the other side.

Allochesthesia (al-ok-es-the'-ze-ah). Same as *Allocheiria*.

Allochromism (al-ok'-ro-ism) [ἀλλος, other; χρώμα, color]. 1 Variation in color. 2 A change of color.

Allogotrophia (al-a-go-tro'-fe-ah) [allos, τρεφεῖν, to nourish]. The nourishment of one part

of the body at the expense of some other part.

Alloalalia (al-o-lá'-le-ah) [allos; λαλέειν, to speak]. Any perversion of the faculty of speech. See *Alalia*.

Allopathy (al-op'-a-the) [allos; πάθος, affection]. According to Hahnemann, the inventor of the term, that method of the treatment of disease consisting in the use of medicines the action of which upon the body in health produces morbid phenomena different from those of the disease treated; erroneously used of the regular medical profession; opposed to homeopathy.

Alloprhythmia (al-or-rith'-me-ah) [allos; ῥυθμός, rhythm]. Variation in intervals of the pulse.

Allotherm (al'-o-therm) [allos; θερμός, heat]. An organism whose temperature is directly dependent on its culture-medium.

Allo toxin (al-o-tox'-in) [allos; τοξικόν, poison]. Any substance, produced by tissue-metamorphosis within the organism, that tends to shield the body by destroying microorganisms or toxins that are inimical to it.

Allotriodontia (al-of-re-o-don'-she-ah) [dύλλο-τροπος, stranger; ὀδούς, tooth]. 1. The transplanting of teeth from one person to another. 2. The existence of teeth in abnormal situations, as in tumors.

Allotriogeusia (al-of-re-o-gú'-le-ah) [allotriox; γεύσις, taste]. Perversion of the sense of taste; abnormality of the appetite.

Allotriophagy (al-of-re-af'-a-je) [allotriox; φαγεῖν, to eat]. Depraved or unnatural appetite.

Allotropic (al-a-trap'-ih) [dύλλος, other; τροπος, turn]. 1. Characterized by allotropism. 2. Relating to or marked by isomerism.

Allotropism (al-of-rap'-izm) [see *Allotropic*]. 1. The term expresses the fact of certain elements existing in two or more conditions with differences of physical properties; thus, carbon illustrates allotropism by existing in the forms of charcoal, plumbago, and the diamond. 2. Appearance in an unusual or abnormal form.

Alloxamid (al-ok's-am-id) [alloxan; ammonia]. A substance, $C_4H_4N_2O_6$, obtained from alloxan by the action of ammonia.

Alloxan (al-ok's-an) [alintinn, oxalic]. $C_4H_2N_2O_6$. A crystalline substance produced by the oxidation of uric acid.

Alloxantin (al-ok's-an'-tin) [alloxan]. $C_4H_2N_2O_5$ + H_2O . A substance obtained by reducing alloxan with $SnCl_2$, zinc, and HCl , or H_2S in the cold. It occurs in small, hard, colorless prisms that turn red when treated with ammonia.

Alloxin (al-ok's-in) [allantoin]. Any of a series of oxidation bases, the result of the splitting-up of chromatin, and which on oxidation produce uric acid.

Alloxur, Alloxuric (al-ok's-ur, al-ok's-ur-ik) [ἀλλοξ, other; ὀξύς, sharp]. A term applied by Kossel and Krüger to the xanthin bases, from the fact that these, like uric acid, contain alloxan and urea groups. **A. Bases, A. Bodies,**

xanthin, hypoxanthin, guanin, paraxanthin, adenin.

Alloxuremia (al-ok's-ur'-me-ah) [alloxur, uræmia]. Toxemia due to the resorption of the xanthin or adoxur bases.

Alloxuria (al-ok's-ur'-ree-ah) [alloxur, ὀξύς, uræmia]. The pathologic secretion of alloxur bases (uric acid, xanthin, hypoxanthin, paraxanthin, adenin, carbin, etc.) in the urine.

Alloy (al-oi') [from the French *aloi*, a contraction of *à la loi*]. 1. A compound of two or more metals by fusion. 2. The least valuable of two or more metals that are fused together.

Allspice (al-spi'-s) [see *Pimenta*]. The fruit of *Isocoma pimenta*. **A., Carolina**, the leaves of *Calyptus floridus*, having the properties of an aromatic stimulant. See *Pimenta*.

Allus (al'-us) [L.]. The great toe. **A. pollex**, the thumb.

Allyl (al'-il) [allium, garlic]. C_3H_5 . A univalent alcohol radicle. Syn., *Allylum*, *Acetyl. A.*

Acetate. 1. $C_2H_3C_2H_3O_2$, an aromatic liquid with sharp taste, boiling at $104^\circ C$. 2. A salt of allylactic acid. **A.**

Alcohol, C_3H_5HO . A colorless, inflammable liquid, with pungent odor, boiling at $67^\circ C$. **A. Aldehyd**, C_3H_5O . A synonym of *Acrolein*.

A. Borate, $(C_3H_5)_3BO_3$, a liquid giving off pungent, irritating vapors which cause a flow of tears; it boils at $168-175^\circ C$. **A.**

Bromid, C_3H_5Br , a liquid with pungent odor, sp. gr. 1.336 at $15^\circ C$, soluble in alcohol and ether; boils at $70-71^\circ C$. Syn., *Bromopropylene*. **A. Carbamin**, $CN.C_3H_5$,

a liquid obtained by heating allyl iodid with silver cyanid, it has an extremely foul and penetrating odor, boils at $60-66^\circ C$. Syn., *Allyl cyanid*; *Allyl isocyanid*. **A. Carbamid**, $CO.NC_3H_5$, a foul liquid causing flow of tears, formed by the action of potassium pseudocyanate upon allyl iodid. Syn., *Allyl isocyanate*; *Allyl carboxylamin*; *Allyl pseudo-cyanate*. **A. Chlorid**, C_3H_5Cl , a pungent liquid, sp. gr. 0.937 at $20^\circ C$, boils at $45^\circ C$. Syn., *Chlorotriphenyl*. **A. Cyanamid**,

See *Sinamin*. **A. Dioxid**, $C_3H_5O_2$, a colorless liquid obtained from allyl alcohol by action of glycerol and oxalic acid, sp. gr. 1.16 at $16^\circ C$; boils at $171-172^\circ C$; soluble in water, alcohol, and chloroform. Syn., *Diallyl oxid*. **A. Iodid**, C_3H_5I , a pungent liquid, sp. gr. 1.518 at $17^\circ C$, soluble in alcohol, boils at $100-102^\circ C$. It is a reaction product of phosphorus, iodine, and allyl alcohol. **A. Mustard Oil**, $CS.N.C_3H_5$. The principal constituent of ordinary mustard oil. Syn., *Allyl pseudothiocyanate*; *Allyl pseudothiocyanate*; *Allyl thiocyanate*; *Allyl isothiocyanate*; *Allyl thiocarbamid*.

A. Nitrate, $C_3H_5.NO_3$, a mobile liquid of pungent odor, boiling at $106^\circ C$, formed from silver nitrate by action of allyl bromid. **A. Phenol**, C_6H_5O , a body obtained from anisic aldehyd by action of potash, it forms laminar crystals. **A. Sulfate**, $C_3H_5.HSO_4$, a substance acting as a monobasic acid and forming salts called allyl sulfates. Syn., *Allyl-*

sulfuric acid; *Allyl and hydrogen sulfate* **A.** Sulfid, C_3H_7S , the essential oil of garlic. It is stomachic and sedative. Dose 1 tablespoonful of a 1:600 mixture every $\frac{1}{2}$ hour. It is also used as an enema in cholera and subcutaneously in 0.5% solution in sterilized olive oil in tuberculosis. **A. Thiocyanate**, $NC_3S_2H_7$, a colorless, strongly refracting, oily liquid, with odor of garlic and hydrocyanic acid, isomeric with allyl mustard oil and producing headache, nervous excitement, and nausea when inhaled. Syn., *Artificial oil of mustard*; *Allyl sulfo-cyanid*. **A. Tribromid**, $C_3H_4Br_3$, a colorless liquid used as an antispasmodic. Dose 5 drops. Unal-

Allylamin (*al'-il'-am-in*) [*allium: ammonia*], $NH_2C_3H_7$. Ammonia in which a hydrogen atom is replaced by allyl. It is a caustic liquid.

Allylene (*al'-il-en*), $CH_2=C=CH_2$. A gas with strong odor, taking fire readily and burning with a smoky flame; was first obtained by Markownikow by heating propylene bromid with alcoholic potash. Syn., *Propylene*; *Methylacetylene*.

Almén's Reagent for Blood. A liquid containing blood or blood-coloring matters, if well shaken with a mixture of equal parts of mixture of guaiacum and oil of turpentine, becomes blue. **A.'s Test for Glucose**, heat the liquid with a solution of bismuth subnitrate dissolved in caustic soda and Rochelle salts, if it contains glucose, the liquid becomes cloudy, dark brown, or nearly black in color, and finally a black deposit appears.

Almond (*al'-mond*) [ME., *almonde*]. See *Amygdala*. **A.-bread**, a variety of bread made from almond flour, for use in diabetes as a substitute for ordinary bread. **A.-eyed**, applied to the Mongolian race on account of the peculiar elliptic form and slanting appearance of the eyelids. **A. of the Ear**, **A. of the Throat**, the tonsil. **A. Mixture**. See under *Amygdala*. **A. Oil**, oleum amygdale. See *Amygdala*. **A. Oil, Bitter**, oleum amygdalarum amara. See under *Amygdala*. **A.-paste**, a mixture of bitter almonds, alcohol, white of egg, and rose water, used to soften the skin and prevent the hands and lips from chapping.

Alnus (*al'-nus*) [L.]. 1. Alder-bark. 2. A genus of shrubs and trees of the order *Quadrifera*. *A. glutinosa*, common European alder, has astringent bark and leaves, which are used in intermittent fever and as an application in wounds and ulcers. *A. serrulata* contains tannic acid. The decoction of bark and leaves is astringent and used as a gargle and as a lotion for wounds and ulcers. Dose of powdered bark 10 gr. (0.65 Gm.); of the fluidextract 30-60 min. (2-4 Cc.). *A. incana* has qualities similar to *A. serrulata*. It is recommended as a hemostatic.

Alochia (*ah-l'-ke-ah*) [d. priv.; *lyxa*, the lochia]. Absence of the lochia.

Aloe (*al'-o*) A genus of liliaceous plants. See *Aloes*. **A. americana**. See *Agave*. **A.-**

resin, an amorphous resinous constituent of aloes obtained as a deposit from a hot aqueous solution of aloes on cooling.

Aloeretin (*al-o-e re'-tin*). See *Aloe-resin*.

Aloes (*al'-o-e*) [*aloy*, the aloë]. The inspissated juice of several species of aloë, of which *Aloe socotrina*, *A. barbadensis*, and *A. capensis* are most commonly used. Its properties are due to a glucosid, *aloin*, $C_{17}H_{19}O_7$. It is a tonic astringent, useful in amenorrhea, chronic constipation, and atonic dyspepsia. It is also an emmenagog and anthelmintic. Dose 2-5 gr. (0.13-0.32 Gm.). **A.-bitter**, a bitter principle obtained from aloes by evaporation of the aqueous extract from which the aloë-resin has been extracted. **A.-bitter**, **Artificial**, a body obtained from aloes by action of nitric acid. **A., Decoctum, Compositum** (B. P.), Socotrine aloes, myrrh, and saffron, of each, 2 parts; potassium carbonate, 4 parts; licorice-juice, 24 parts; water, 768 parts; reduce by boiling to 642 parts and add 102 parts of compound tincture of cardamom. Dose $\frac{1}{2}$ -2 gr. (0.032-0.13 Gm.).

A., Enema (B. P.), aloes, potassium carbonate, and mucilage of starch. **A. et Asafetidae**, **Pilulæ** (B. P.), aloes and asafetida, of each, 13 gr. (0.1 Gm.). **A. et Ferri, Pilulæ** (U. S. P., B. P.), contain 1 gr. (0.065 Gm.) each of aloes, ferrous sulfate, and aromatic powder, incorporated with confection of roses. **A. et Mastiches, Pilulæ** (U. S. P., B. P.), "Lady Webster's pills," contain aloes, 2 gr. (0.13 Gm.), mastic and red rose, 4 gr. (0.32 Gm.). **A. et Myrrhæ, Pilulæ** (U. S. P., B. P.), each contains aloes, 2 gr. (0.13 Gm.), myrrh, 1 gr. (0.065 Gm.), aromatic powder, 4 gr. (0.32 Gm.), mixed with syrup. **A. et Myrrhæ, Tinctura** (U. S. P., B. P.), aloes, 10; myrrh, 10, alcohol, 100 parts. Dose 4-2 dr. (2-8 Cc.). **A., Extractum** (U. S. P.), Dose 2 gr. (0.12 Gm.). **A., Extractum, Aquosum**, prepared by mixing aloes 1 part with 10 parts boiling water, straining and evaporating. Dose 4-5 gr. (0.032-0.32 Gm.). **A., Hepatic**, dark, liver-colored aloes, mostly Barbadian. **A., Pilulæ** (U. S. P., B. P.), aloes and soap, of each, 2 gr. (0.13 Gm.). **A. purificata** (U. S. P.), the common drug purified by solution in alcohol and evaporation. Dose 1-5 gr. (0.065-0.32 Gm.). **A. Socotrina**, **Pilula** (B. P.), contains Socotrine aloes, hard soap, oil of nutmeg, and confection of roses. Dose 5-10 gr. (0.32-0.65 Gm.). **A., Tinctura** (U. S. P., B. P.), consists of aloes, 10; licorice, 10; dilute alcohol, 100 parts. Dose 4-2 dr. (2-8 Cc.). **A., Vinum** (B. P.), has aloes, 6; cardamom, 1; ginger, 1; white wine, 100 parts. Dose 1-4 dr. (14-16 Cc.).

Aloetic (*al-o-e'-ik*) [*aloes*]. Containing or pertaining to aloes.

Aloetin (*al-o-e'-in*). 1. Aloe-resin. 2. A yellow, crystalline principle obtainable from aloes.

Aloin (*al'-o-in*) [*aloes*]. A bitter principle found in aloes. It forms fine needles, possesses a very bitter taste, and acts as a strong purgative. Several glucosids of this name

are described, as, *barbaloin*, *nataloin*, *zon-aloin*, *socaloin*. Dose $\frac{1}{2}$ -2 gr. (0.032-0.13 Gm.).

Alopecia (al-o-pe'-she-ah) [*ἀλωπεκία*, a disease of foxes resembling mange]. Deficient hair, baldness. It may be universal or partial, congenital or acquired. It follows a large number of systemic affections. Syn., *Lopus capillorum*, *Defluxio capillorum*, *Vulvas morbus*. **A. adnata**. See *A. Congenital*. **A. areata**, that condition in which, suddenly or slowly, one or several, usually asymmetrically distributed, patches of baldness appear upon the hairy regions of the body, more often upon the scalp and parts covered by the beard. Syn., *Area celsi*, *Tinea decalvans*, *Porriigo decalvans*, *Alopecia circumscripta*. **A. Cachectic**, that due to general malnutrition. **A. circumscripta**. See *A. areata*. **A. Congenital**, a rare form, seldom complete, due to absence of hair-bulbs. **A. furfuracea**, a form of baldness associated with a disorder of the scalp, marked by hyperemia, itching, and exfoliation of dry or fatty scales from its surface. It may be acute or chronic, and produce a dryness, brittleness, and lack of luster in the hair. Syn., *Alopecia pityroides capillitii*, *Pityria capitis*, *Schorrhoea capillitii*, *Pityriasis simplex*. **A. localis**, that form occurring in one or more patches at the site of an injury or in the course of a nerve. Syn., *Alopecia neuritica*. **A. neurotica**, a name given to baldness of trophic-neuritic origin. **A. orbicularis**. Same as *A. circumscripta*. **A. pityroides capillitii**. See *A. furfuracea*. **A. pityroides universalis**, a rapid and general denudation of hair occurring in debilitated states, preceded by abundant desquamation of fatty scales. **A. senilis**, that occurring in old age. **A. simplex**, the idiopathic premature baldness of young adults. It is most common in males, and is often associated with premature grayness. **A. syphilitica**, that due to syphilis. **A. unguis**, *A. unguium*, the falling-off of the nails. Syn., *Onychoprosis*. **A. universalis**, that in which there is a general falling out of the hairs of the body.

Aloxanthin (al-ok-sant'-thin), $C_{12}H_{10}O_4$. A yellow substance obtained from barbaloin and socaloin by the action of potassium dichromate.

Alpenstich (alp'-en-stik) [Ger.] A form of severe pleurisy or pleuropneumonia with typhoid symptoms peculiar to mountainous regions. It occurred as an epidemic in the Swiss Alps in 1771 and in North Germany in 1842.

Alpha (alf'-jah) [*ἄλφα*, the first letter of the Greek alphabet]. The Greek letter α, used in combination with many chemical terms to indicate the first of a series of isomeric bodies, as alphanaphthol. **A.-eigon**, a compound of iodine and albumin containing 25% of iodine and soluble in water. **A.-leukocyte**, one disintegrating during blood-coagulation.

Alphenols (alf'-je-nols). A class of compounds

having the characteristics of both alcohols and phenols.

Alphodopsoriasis (al-fo-de-o-so-si'-a-sis) [*ἀλφωδψία*, leprosy, *ψωρίασις*, psoriasis]. A form of psoriasis resembling leprosy.

Alphodermia (al-fo-der'-me-shi) [*ἀλφωδία*, white; *δέρμα*, the skin]. Achromatosis, any disease marked by lack of pigmentation.

Alphol (alf'-joh), $C_{10}H_8O$. The salicylic ether of alphanaphthol, a white, crystalline powder, soluble in alcohol, in ether, and in fatty oils, and insoluble in water, melts at 83° C. It is an internal antiseptic. Dose $\frac{1}{2}$ -15 gr. (0.52-1.0 Gm.) 3 times daily. Syn., *Betol*.

Alphas (alf'-joh) [*ἀλφός*, vitiligo] 1. An old name for leprosy. 2. Psoriasis.

Alphosis (alf'-joh-sis) [see *Alphus*]. Albinism, leukoderma.

Alphus (alf'-jus). 1. See *Alphas*. 2. A scrofulous pustular disease of the skin attended with the formation of white crusts. **A. confertus**, a scrofulous form of impetigo with clustered lesions attended with formation of white crusts.

A. leuce, Plenck's name for a skin disease marked by white spots, which penetrate the skin deeply and involve the hairs, and if pricked, a milky fluid exudes. Syn., *Vitiligo leuca*, *Leuca*. **A. simplex**, Plenck's name for a skin disease marked by white patches not involving the hairs and wandering from one part to the other, with roughening of the skin. **A. sparsus**, a scrofulous disseminated ecchyma attended with formation of white crusts.

Alpinia (al-pin'-e-ah) [*Alpinia*, an Italian botanist of the sixteenth century]. A genus of zingiberaceous tropical plants. *A. chinensis*, *A. officinarum*, and other species furnish galangal.

Alsace Gum (al-sas'). See *Dextrin*.

Alstonia (al-stoh'-ne-ah). A genus of apocynaceous trees and shrubs. *A. constricta*, the Australian fever-tree, yields the alkaloid *alstonin*. The bark is tonic, antiperiodic, and antipyretic, and is used in intermittent fevers. Dose of fluidextract 30-60 min (2-4 Cc.). *A. scholaris*, the devil tree, a native of the East Indies, furnishes dita bark, it is tonic, antiperiodic, antipyretic, and antileprotic.

Alstonidin (al-ston'-id-in). An amorphous substance contained in a variety of dita bark.

Alstonin (al-stoh'-nin). 1. An amorphous substance contained in a variety of dita bark. 2. A crystalline alkaloid, $C_{21}H_{29}N_3O_4$, obtained from *Alstonia constricta*.

Alter (al'-ter). To castrate or spay.

Alterant (al'-ter-and). Same as *Alterative*.

Alterative (al'-ter-a-tiv) [*alteratus*]. 1. A medicine that alters the processes of nutrition, restoring, in some unknown way, the normal functions of an organ or of the system. The most important alteratives are arsenic, iodine, the iodides, mercury, and gold. 2. Changing, alterant, reestablishing healthy nutritive processes.

Alternate (al'-ter-nat) [*alternare*, to do by

turns]. Occurring successively in space or time. **A. Hemiplegia.** See *Hemiplegia*.

Alternating (*awl' ter no-ling*) [see *Alternate*]. Occurring successively. **A. Currents**, electric currents the direction of which is constantly changing. **A. Insanity**, a form of insanity in which there are regular cycles of exaltation and depression.

Alternation (*awl' ter-na'-shun*) [see *Alternate*]. Repeated transition from one state to another.

Alternator (*awl' ter-na-tor*). An apparatus for converting the direct dynamo current into an alternating current.

Althaus' Oil. An oil made as follows: Metallic mercury, 1 part; pure lanolin, 4 parts; 2% phenol 5 parts. It is used in the treatment of syphilis in injections of 5 min. (0.3 Cc.) at a dose.

Althea, Althæa (*al-the'-ah*) [L.]. Marshmallow. The peeled root of *Althæa officinalis*, a plant of the mallow family. It consists of about one-third of vegetable mucus and starch, together with the alkaloids *asparagin* and *althæin* (latterly regarded as identical). Its decoction is employed as a mucilaginous drink. **A., Ointment of** (*unguentum althææ*), an ointment composed of marshmallow root, 2 parts, turmeric, flaxseed, and fenugreek, each, 1 part; water, 70 parts; lard, 44 parts, yellow wax, 6 parts. Unof **A., Syrup of** (*syrupus althææ*), contains 4% althea. Dose indefinite. *Asparagin* possesses sedative and diuretic properties, and is useful in scurvy and gout. Dose 2-3 gr. (0.13-0.19 Gm.).

Altitude (*al'-ti-tūd*) [*altitudo*, height]. The elevation of a place above the sea-level.

Altman's Granules. Round bodies staining readily with carbolfuchsin, and regarded as cell-derivatives which have grown through the assimilation of fat. They are probably allied to Russell's bodies.

Alum (*all'-um*) [*alumen*, alum]. Any one of a class of double sulfates formed by the union of one of the sulfates of certain non-alkaline metals with a sulfate of some alkaline metal. The standard (or common commercial) alum, the official *alumen* (U. S. P.), is the aluminium-and-potassium sulfate, $\text{AlK}(\text{SO}_4)_2 \cdot 12\text{H}_2\text{O}$. It is a powerful astringent and styptic, and is also extensively used in the arts. **A., Alumina-**, a mixture of alum and aluminium sulfate. **A., Aluminium-**, an alum composed of a double sulfate of aluminium and another radicle. **A., Ammonia**, the same as the standard, except that the potassium is replaced by ammonium. It is official in Great Britain, and is extensively used on account of its cheapness. What is known as *concentrated* or *patent* alum is the normal aluminium sulfate (*aluminium sulphas*, U. S. P.), which is not a true alum. **A., Ammonioferric** (*ferri et ammonii sulphas*, U. S. P.), is strongly styptic, and is useful in leukorrhæa. Dose 5-10 gr. (0.32-0.65 Gm.). **A., Burnt**, alum dried by heat, a spongy, pulverizable sub-

stance. It is used as an astringent and on fungous growths. Dose 5-30 gr. (0.333-2.0 Gm.). Syn., *Calcined alum*; *Alumen exsiccatum*; *Alumen ustum*. **A., Feather**, **A., Feathered**. 1. Alum occurring in a fibrous form. 2. Asbestos. **A.-hematoxylin**, a purple stain for tissues, obtained from an alcoholic solution of hematoxylin by addition of an aqueous solution of potash alum. **A., Potash**, **A., Potassa**, **A., Potassic**, **A., Potassium**, an alum containing potassium, particularly ordinary alum, or aluminium-and-potassium sulfate. **A., Potassioferric**, is similar to ammonioferric alum. **A., Soda**, double sulfate of sodium and aluminium; it is too soluble for ordinary uses. **A.-whey**, a preparation obtained by boiling 2 dr. of alum in a pint of milk and straining. It is used as an astringent and internal hemostatic in wineglassful doses.

Alumen (*al-u'-men*) [L., gen., *aluminis*]. See *Alum*. **A. exsiccatum** (U. S. P.), burnt or dehydrated alum. See *Alum*, *Burnt*.

Alumil (*al'-u-mil*). Alumina in combination with acids.

Alumina (*al-u'-min-ah*) [L.], Al_2O_3 . Aluminium oxide; the principal ingredient of clay and of many stones, earths, and minerals.

Aluminate (*al-u'-min-at*) [*alumina*]. A basic salt of alumina.

Aluminated Copper. See *Lapis divinus*.

Aluminic, Aluminicus (*al-u-min'-ik, -us*). Relating to or having the nature of alum.

Aluminiferous (*al-u-min-if'-er-us*) [*alum*; *ferre*, to bear]. Yielding alum.

Aluminium (*al-u-min'-i-um*) [L.], $\text{Al} = 27$. Quantivalence II, IV. A silver-white metal distinguished by its low sp. gr.—about 2.6. It is largely used in the arts and for certain surgical instruments. **A. Acetate**, $\text{Al}_2\text{O}_3 \cdot 4\text{C}_2\text{H}_3\text{O}_2 + 4\text{H}_2\text{O}$. Used as an internal and external disinfectant. Dose 5-10 gr. (0.3-0.6 Gm.) 3 times daily. **A. Acetoborate**, antiseptic and disinfectant. **A. Acetoglycerinate**, glycerite of aluminium acetate. It has one-fifth the strength of aluminium acetotartrate; used in 50% solution in diseases of the nose, throat, and ear. **A. Acetotartrate**, an energetic nontoxic disinfectant and astringent. It is applied in 0.5 to 2% solutions in diseases of the air-passages; for chilblains, in 50% solution. **A. Boroformate**, prepared from freshly precipitated aluminium hydroxide dissolved in 2 parts of formic acid, 1 part of boric acid, and 7 parts of water. It is used as an astringent and antiseptic. **A. Borotannate**, a reaction-product from tannic acid with borax and aluminium sulfate, containing 76% tannin, 13.23% alumina, 10.71% boric acid, used as a disinfectant and astringent in skin diseases, applied pure or attenuated in ointment or dusting-powder. Syn., *Cutal*; *Cutol*. **A. Borotannotartrate**, a compound of aluminium borotannate and tartaric acid; is used externally in skin diseases and in gonorrhæa in 0.5 to 10% solution. Syn.,

Soluble catal or **catal**. **A. Borotartrate**, an energetic, astringent, nonirritant antiseptic, used externally in inflammatory diseases of the throat and nose, and applied in substance or in solution with the addition of glycerol. **Syn.**, *Boral*. **A. Bromid**, Al_2Br_6 . In combination with aluminium chlorid it is used as a gargle in diphtheria or taken internally. **A. Caseinate**, an intestinal astringent. Dose 4-5 gr (0.25-0.3 Gm.). **A. Chlorid**, $AlCl_3$, colorless hexagonal plates which fume in moist air. It is astringent and antiseptic, and is also used in bleaching teeth. **A. Gallate**, **Basic**, a brown, antiseptic dusting-powder made by precipitating a solution of aluminium sulfate with a solution of gallic acid to which sodium hydroxid has been added. **A. Hydroxid** (*aluminum hydroxidum*, U. S. P.), $Al(OH)_3$, a tasteless white powder, feebly astringent. Dose 3-20 gr (0.2-1.3 Gm.). **Syn.**, *Aluminium hydrate*. **A. Oleate**, $Al(C_2H_5O)_2$, a yellowish mass, soluble in alcohol, in ether, in benzene, and in oleic acid. It is used as an antiseptic in skin diseases. **A.-and-potassium Sulfate**, $AlK(SO_4)_2 \cdot 12H_2O$, a valuable astringent, used in catarrh, leucorrhoea gonorrhoea. Dose 10-20 gr (0.65-1.3 Gm.). In teaspoonful doses it is an emetic. **Syn.**, *Alum*. **A.-and-potassium Sulfocarbonate**, $AlK(C_2H_3O)_4$, an antiseptic, astringent, and styptic; it is used externally in a 5 to 20% aqueous solution in cases of cancer and papular ulcerations, and as a mouth-wash. **A. Salicylate**, $Al(C_2H_3O)_3$, a reddish white antiseptic powder used in nasal catarrh and eczema. **Syn.**, *Salumin*. **A. Salicylate, Ammoniated**, a yellowish white powder used as an antiseptic and astringent in inflammation of the nose and throat by dry insufflation, or painting with a 20% solution in 50% of glycerol and 30% of water. **Syn.**, *Soluble salicin*. **A.-and-sodium Silicate**, $Na_2SiO_3 \cdot xSiO_2$, obtained by adding aluminium hydroxid to a boiling solution of sodium silicate and sodium hydroxid. It is used in surgical dressings. **A. Soroiodolate**, is used as an antiseptic wash in 2 to 3% solution. **A. Sulfate** (*aluminium sulfate*, U. S. P.), $Al_2(SO_4)_3$, an antiseptic and astringent used as a lotion in 5% solution. **A. Sulfocarbonate**, $Al_2(C_2H_3O)_6$, white crystals, soluble in water, in glycerol, and in alcohol. It is recommended as an antiseptic in cystitis and suppurating sores. **Syn.**, *Soral*. **A. Tannate**, a compound of aluminium and tannic acid. **A. Tannotartrate**, yellowish white plates or powder, soluble in water, used as an astringent and antiseptic insufflation or gargle in laryngeal or catarrhal troubles. **Syn.**, *Soluble tannal*. **A.-and-zinc Sulfate**, $Al_2(SO_4)_3 \cdot ZnSO_4$, a white, crystalline powder, soluble in water. It is used as a caustic.

Aluminol, *Aluminol* (*al-u'-min-ol*, *al-um'-ol*) [*aluminium*]. An astringent and antiseptic sulfur compound of aluminium, used in gonorrhoea, endometritis, and diseases of the ear, nose, skin, etc. *Unof.*

Aluminous (*al-u'-min-us*). Relating to or containing alum, alumina, or aluminium. **A. Chalybeate**, a term applied to mineral waters containing alum and iron.

Alumroot. The root of *Hescheria americana*. Its properties are due to gallic and tannic acids. It is very astringent. Dose of the fluidextract 10-20 min (0.65-1.3 Gm.). Also the root of *Ceranium maculatum*, a mild astringent.

Alveated (*al'-ve-a-ted*) [*alveatus*, hollowed out like a trough]. Honeycombed, channelled, vaulted like a beehive.

Alvegniat's Pump. A mercurial air-pump used in estimating the gaseous constituents of the blood.

Alveola (*al'-ve-o-lah*) [*alveolus*, a small hollow]. A little depression.

Alveolar (*al'-ve-o-lar*) [*see Alveola*]. Pertaining to an alveolus. **A. Abscess**, a gum boil. **A. Arch**, the alveolar surface of the jaw. **A. Artery**, a branch of the internal maxillary artery. **A. Border**, the margin of the jaws. **A. Index**, in craniometry, the gnathic index, the ratio of the distance between the basion and alveolar point, to the distance between the basion and the nasal point, multiplied by 100. (Sometimes the basilar index is called the alveolar index.) **A. Passages**, the ultimate division of the bronchi, emptying into the infundibula. **A. Points**. *See Craniometric Points*. **A. Process**, the border of the superior maxilla, in which the alveoli are placed. **A. Sarcoma**. *See Sarcoma*.

Alveolitis (*al'-ve-o-l'-tis*) [*alveolus*; *itis*, inflammation]. Inflammation of the alveolus of a tooth.

Alveolodental (*al'-ve-o-lu-den-tal*) [*alveolus*, *dens*, a tooth]. Pertaining to the teeth and their sockets.

Alveolomaxillary (*al'-ve-o-lo-max-il-lar-ey*). The buccinator muscle.

Alveolus (*al'-ve-o-lus*) [*L.*]. 1. The bony socket of a tooth. **Syn.**, *Phalve*, *Phalava*, *Phalvion*. 2. An air cell of the lung. 3. A cavity, depression, pit, cell, or recess. **A. of a Gland**, the terminal lobule of a racemose gland. **A. laryngeus**. *See Pauch Laryngeal*.

A. of the Stomach, one of the honeycomb-like depressions found in the stomach.

Alvine (*al'-vin* or *al'-vin*) [*alvus*, belly]. Pertaining to the belly. **A. Concretion**, an intestinal calculus. **A. Dejections**, **A. Discharges**, the feces. **A. Obstruction**, constipation.

Alvus (*al'-vus*) [*L.*, pl. and gen., *alvi*]. 1. The belly or its contained viscera. 2. Diarrhoea.

A. adstricta, **A. astricta**, an extreme degree of constipation. **A. dura**, constipation. **A. renis**, the pelvis of the kidney.

Alymphia (*al'-lim'-e-sh*) [*al* priv., *lymph*, lymph]. A deficiency of lymph.

Alyssus (*al'-is-us*) [*al* priv.; *lyssa*, madness]. Preventing or curing rabies.

Ama (*ah'-ma*) [*Am*, a water-pail]. An enlargement at the end opposite the ampulla of a

bony canal of the labyrinth of the internal ear.

Amacrine (am'-ak-rēn) [ā, priv.; μακρός, long; ἴς, a fiber]. Applied to nerve-cells entirely devoid of axis-cylinder processes.

Amadou (am'-a-doo) [Fr., amadou, to coax]. German tinder or touchwood; *Boletus igni-um*, a fungus found on old tree-trunks, used to staunch local hemorrhage and as a dressing for wounds, etc. **A. de Panamá**, a hemostatic prepared from the leaf-hairs of *Miconia macrantha*.

Amalgam (am-al'-gam) [μαλαγμῆ, a soft mass]. 1. A combination of mercury with any other metal. 2. Any soft alloy. **A., Dental**, compounds of a basal alloy of silver and tin with mercury, used for filling teeth. Gold, platinum, copper, zinc, or bismuth is frequently added as a third metal to the basal alloy.

Amalgamation (am-al-gam-a'-shun) [see *Amalgam*]. In metallurgy, the process of combining mercury with some other metal, as practiced in separating silver and gold from ores.

Amanitin (am-an'-it-in) [ἀμανίτιν, a kind of fungus]. 1. A principle identical with chondrin obtained from the fly-agaric. 2. A poisonous glycosid obtainable from various species of agaric.

Amar (am-a'-ra) [amarus, bitter]. 1. Bitters. 2. The bitter alkaloids. 3. [ἀμάρ, a trench.] A sewer, drain, or stream. In the plural, *amars*, the hollows of the outer ear.

Amaril (am'-ar-il) [Sp., amarillo, yellow]. The poison induced by *Bacillus typhoides*.

Amarin (am'-ar-in) [see *Amaral*], $C_{21}H_{19}N_3$, triphenylhydroglyoxalin. It results from boiling hydrobenzamide with caustic potash. It has a poisonous effect on animals.

Amaroids (am'-ah-roids). All distinctly bitter vegetable extractives of definite chemico-composition other than alkaloids and glucosids. Their names end in -in or -inum. Also called "bitter principles."

Amarum (am-a'-rum) [see *Amaral*]. 1. A bitter. 2. Magnesium sulfate. **A., Genuine**, magnesium sulfate. **A. purum**, any simple bitter.

Amaryllism (am'-ar-il-izm) [see *Amaril*]. Yellow fever.

Amasiasis (ah-mas'-e-sis) [ā, priv.; μάσας, mashing]. Inability to chew.

Amastia (ah-mas'-i-ah) [ā, priv.; μαστός, breast]. Absence of the mammas or nipples.

Amativeness (am'-at-iv-nes) [amare, to love]. The sexual passion.

Amaurosis (am-su-ro'-sis) [ἀμαυρωσις, to darken]. Blindness, especially that occurring without demonstrable lesion of the eye. Syn., *Propter amaurosis*, *Gutta serena*, *Cataracta serena*. **A., Albuminuric**, that due to renal disease. **A. atonica**, that due to physical debility. **A. centralis**, that due to disorder of the central nervous system. **A., Cerebral**, that due to disease of the brain. **A. compressionis**, cerebral amaurosis caused by

pressure upon the optic nerve. **A. congestiva**, that due to cerebral congestion. **A., Epileptiform**, **A., Epileptoid**, sudden blindness not confined to epileptics, but considered by some to be epileptic in its nature. Dilation of the retinal veins has been noted, but no changes in the retinal arteries have been observed. Syn., *Retinal epilepsy*, *Ophthalmemicrania*. **A. ex hemorrhagia**, **A. ex hyperopsia**, an incurable, inexplicable blindness occurring suddenly after hemorrhages, especially of the stomach. **A. intermittens larvata**, a blindness, often unilateral, occurring with mild intermittent fever, which is frequently followed by atrophy of the optic nerve. **A., Intermittent**, bilateral amaurosis occurring as a complication of intermittent fever. It usually begins with the chill and continues until the sweating stage. **A., Progressive**, the progressive atrophy of the intraocular optic nerve endings. **A., Reflex**, that resulting from a reflex action upon the optic nerve from some remote source of irritation. **A., Saburral**, sudden temporary blindness occurring in an attack of acute gastritis. **A., Spasmodic**, blindness due to convulsions. **A., Spinal**, that caused by atrophy of the optic nerve, due to lateral or multiple sclerosis. Syn., *Rachialgic amaurosis*. **A. sympathica**, **A., Sympathetic**, functional disorder of one eye from reflex transmission of disease of the other eye.

Amaurotic (am-au-ro'-ik) [see *Amaurosis*]. Relating to or affected with amaurosis. **A. Cat's-eye**, a light-reflex through the pupil in suppurative choroiditis.

Amazia (ah-ma'-ze-ah) [ā, priv.; μαστός, the breast]. Absence of the mammary gland.

Amber (am'-ber). See *Succinum*.

Ambergris (am'-ber-gris) [amber; Fr., gris, gray]. A substance excreted by the sperm-whale, *Physalus macrocephalus*. It is not known whether or not it is a pathologic product. It exhales a fragrant, musky odor when warmed, and is used in adynamic fevers, chronic catarrh, and nervous diseases. Dose 1-3 gr. (0.065-0.2 Gm.). Unof.

Ambidexter (am-bi-dek'-ter) [amba, both; dexter, the right hand]. An ambidextrous person.

Ambidextrous (am-bi-dek'-trus) [see *Ambidexter*]. Able to use both hands equally well.

Ambiopia (am-bi-a'-pe-ah). See *Diplopia*.

Ambitus (am'-bit-us) [ambire, to surround]. A circumference. **A. cerebelli**, Burdach's term for the cerebellum, pons, and oblongata taken together.

Amblotic (am-blot'-ik) [ἀμβλωτικός]. Abortifacient.

Amblyopia (am-ble-a'-pe-ah) [ἀμβλῶς, dulled, dim, eye]. Dimness of vision, especially that not due to refractive errors or organic disease of the eye. It may be congenital or acquired, the acquired being due to the use of tobacco (*amblyopia nicotinic*), alcohol, or other toxic influences; to traumatism; or it may be hysterical, *N. amblyopia*.

and *hemeralopia* are other forms; it may arise from *entoptic phenomena*, such as *musca volitantes*, *micropsia*, *megalopsia*, *metamorphopsia*, etc. It may take the form of *contracted fields of vision*, of *color-blindness*, or *anesthesia of the retina*. Syn., *Obfuscatio*; *Offuscatio*. **A.**, **Crossed**, **A. cruciata**, amblyopia occurring through lesion of the brain, in which a dimness of vision with contraction of the field of vision exists in the eye on the side opposite to the lesion. **A. ex anopsia**, amblyopia from disuse or from nouse.

Amboceptoid (*am-bo-sep'-toid*). A degenerated amboceptor which has lost its binding group (haptophore) on the one hand for the cell, or, on the other hand, for the complement.

Amboceptor (*am-bo-sep'-tor*) [*ambo*, both; *capere*, to receive]. In Ehrlich's lateral or side-chain theory, an immune body having two uniting processes. Syn., *Intermediary body* (Ehrlich); *Copula* (Müller); *Sensitizer*; *Substance sensibilisatrice* (Bordet); *Desmon* (London); *Phloxyase*; *Hemotoxic sensitizer* (Metchnikoff).

Ambra (*am'-bra*) [L.]. 1. Amber. 2. Ambergris. 3. Spermaceti. **A. alba**. 1. Spermaceti. 2. A light-colored amber obtained in Brazil. **A. atrum**. See **A. nigra**. **A. cineracea**, **A. cineraceus**, **A. cineria**, **A. cineritia**. See **Ambergris**. **A. flava**, **A. fulvum**. See **Succinum**. **A. nigra**, general name for any dark-colored amber or ambergris or dark, resinous substance; also lignite and jet.

Ambrosia (*am-bro'-she-ah*) [*ἀμβροσία*, the food of the gods]. A genus of composite-flowered herbs. **A. artemisiifolia**, common hogweed of North America; stimulant, tonic, antiperiodic, and astringent. **A. trifida** has properties similar to **A. artemisiifolia**. The pollen of these plants is by some regarded as a cause of hay-fever.

Ambulance (*am'-bu-lans*) [*ambulare*, to walk about]. In Europe the term is applied to the surgical staff and arrangements of an army in service. In the United States the word is restricted to a vehicle for the transference of the sick or wounded from one place to another.

Ambulant, Ambulating, Ambulatory (*am'-bu-lant*, *am'-bu-lā-ting*, *am'-bu-la-to-re*). Relating to walking or changing location; not confined to bed. **A. Blister**, a blister that changes its location. **A. Clinic**, a clinic for patients that can walk. **A. Erysipelas**, erysipelas that shifts from place to place. **A. Tumor**, a pseudotumor. **A. Typhoid**, walking typhoid; enteric fever in which the patient does not, or will not, take to his bed.

Ambustion (*am-bus'-chun*) [*ambustus*, a burn]. A burn or scald.

Ameba, Amœba (*am-e'-bah*) [*ἀμοιβή*, a change]. A colorless, single-celled, jelly-like, protoplasmic organism found in sea and

fresh waters, constantly undergoing changes of form and nourishing itself by engulfing surrounding objects. **Amœba coli**, the amœba of dysentery. This is a protoplasmic mass, resembling the water amœba, 20 to 30 μ m diameter, and composed of a nucleus and a highly granular protoplasm containing vacuoles. It is found in large numbers in the stools of certain forms of dysentery, in the intestinal mucous membrane, and at times in the so-called dysenteric abscess of the liver. Whether it is the real cause of the disease is not definitely established. **A.-enterus**, chronic enteritis due to invasion of **Amœba coli**.

Amebic (*am-e'-bik*) [see **Amœba**]. Pertaining to or characterized by amebas. **A. Dysentery**, dysentery associated with the presence in the bowel of **Amœba coli**.

Amebism, Amœbism, Amebaism, Amœbaism (*am-e'-bizm*, *am-e'-ba-izm*). A pathological condition due to the invasion of the system by amebas.

Ameboid (*am-e'-boid*) [*amœba*; *eidōs*, resemblance]. Resembling an amœba in form or in movement, as the white blood-cells.

Amebula, Amœbula (*am-e'-bu-lah*). E. Ray Lankester's name for the amœbitorm parasite which develops from the exospore of the malaria parasite.

Ameburia (*am-e-bu'-re-ah*). The occurrence of amebas in the urine.

Amelia (*ah-me'-le-ah*) [*ἀ*, priv.; *μέλος*, limb]. Absence of the limbs.

Amelioration (*am-el-yo-rā'-shun*) [*ad*, to melior, better]. Improvement.

Ameloblast (*am-el'-o-blast*) [Anglo-French *amel*, enamel; *πλαστός*, a germ]. An *amel-cell*, one of the cylindrical cells covering the papilla of the enamel organ of the teeth, and forming a beautifully regular epithelial layer that produces the enamel.

Amelus (*am'-el-us*) [*ἀ*, priv.; *μέλος*, limb]. A monstrosity without limbs.

Amenia (*ah-me'-ne-ah*). See **Amenorrhea**.

Amenorrhea (*ah-men-or-e'-ah*) [*ἀ*, priv.; *μήν*, month; *ρῆν*, to flow]. Abnormal absence of menstruation. Syn., **Paramenia obstructionis**; **Amenia**. **A.**, **Ovarian**, **A.**, **Radical**, that due to nonovulation. **A.**, **Physiologic**, absence of menstruation during pregnancy. **A.**, **Primitive**, a term applied to those cases in which the catamenia have not appeared at the proper time. **A.**, **Secondary**, that in which the discharge has been arrested after it has existed during the reproductive period.

Amenorrheal (*ah-men-or-e'-al*) [see **Amenorrhea**]. Pertaining to amenorrhea.

Amentia (*ah-men'-she-ah*) [*ἀ*, priv.; *μένος*, mind]. Defective intellect; idiocy.

Ameristic (*ah-mer-is'-tik*) [*ἀ*, priv.; *μέρος*, a part]. Not segmented.

Amesiality (*ah-me-se-al'-it-e*). The throwing of a part, as the pelvis, to one side of the mesial line of the figure.

Ametria (*ah-mel'-re-ah*) [*ἀ*, priv.; *μετρίω*, to measure].

womb) 1. Absence of the uterus. 2. [*ἀμετρον*, *amētron*, a measure.] Immoderation; immensity.

Ametrometer (*ah-met-rom'e-ter*) [*ἀμετρον*, *amētron*, a measure.] An instrument for measuring ametropia.

Ametropia (*ah-met-ro'pē-ah*) [*ἀμετροπία*, *amētropiā*, a measure, *metrōs*, sight]. The condition when an imperfect image is formed upon the retina, due to defective refractive power of the media or to abnormalities of form of the eye. In *myopia* the anteroposterior diameter is too great or the power of the refractive media is too great; *hyperopia* (or *hypermetropia*) is the exact reverse; *astigmatism* is due to imperfect curvature of the cornea or of the retina or to inequality of refracting power in different parts of the lens; *presbyopia* is due to inelasticity of the lens, producing insufficient accommodation; *aphakia*, or absence of the lens, produces both insufficient refracting power and loss of accommodation.

Ametropic (*ah-met-ro'pē-ik*) [see *Ametropia*]. Affected with or pertaining to ametropia.

Ametrous (*ah-met'rus*) [*ἀμετρον*, *amētron*, womb]. Lacking a uterus.

Aminanthinopsy (*am-i-an-thin-op'se*) [*ἀμινανθίνωσις*, *amīnanthīnōsis*, violet-colored, *ὄψις*, *opsis*, sight]. Violet-blindness; incapacity to distinguish violet rays.

Amita's Disc, A's Stria. See *Krause's Disc*.

Amid (*am'id*) [*ammonia*]. A chemie compound produced by the substitution of an amid radical for one or more of the hydrogen atoms of ammonia. The amids are primary, secondary or tertiary, according as 1, 2, or 3 hydrogen atoms have been so replaced. They are white, crystalline solids, often capable of combining with both acids and bases. **A. Bases.** See *Amin, Primary*.

Amidin (*am'id-in*) [*fr.*, *amidon*, starch]. 1. Starch altered by heat into a horny, transparent mass; soluble starch; the part of starch that is soluble in water. 2. [*ammonia*]. One of a class of monacid bases produced from the nitrites by heating with ammonium chloride. In the free condition they are quite unstable. They contain the group C. NH₂.

Amidoacetic Acid (*am-id-o-us'e-tik*). See *glycolic* and *Glycin*.

Amidoacetophenetidin (*am-id-o-as-et-o-jē-net'id-in*). See *Phenocoll*.

Amidoacid (*am-id-o-as'id*) [*ammonia*; *aceticum*, vinegar]. An acid containing the amido-group NH₂.

Amidocaffeine (*am-id-o-ka'fē-in*), C₈H₈(NH₂)₂N₄O. Fine acicular crystals obtained by heating bromocaffeine with alcoholic ammonia.

Amidogen (*am'id-o-jen*) [*amid*, *pevids*, to produce]. The hypothetical radical, NH₂, regarded as an essential part of all amids. See *amid*.

Amidogualacol (*am-id-o-guā'ak-ol*). A product of acetanilidin by nitration and reduction. It melts at 184° C. The salts are

employed in the preparation of colors and medicines.

Amidosuccinamic Acid (*am-id-o-suk-sin-am'ik*). Same as *Asparagin*.

Amidosulfonal (*am-id-o-sul'fon-al*). Amidoacetone ethyldisulfon, a sedative.

Amidulin (*am'id-u-lin*) [see *Amidin*]. Soluble starch; prepared by the action of H₂SO₄ on starch, thus removing the starch-cellulose.

Amimia (*ah-mim'i-ah*) [*ἀμμία*, *amīmia*, a mimic]. Loss of the power of imitation or of making gestures.

Amin (*am'in*) [*ammonia*]. The *amins* are chemie compounds produced by the substitution of a basic atom or radicle for one or more of the hydrogen atoms of ammonia; or basic derivatives of carbon, containing nitrogen and viewed as ammonia derivatives. In deportment they bear some similarity to ammonia. The lower members are gases with ammoniacal odor, and are readily soluble in water; they differ from ammonia in their combustibility. The highest members are liquids soluble in water; only the highest are sparingly soluble. They are called *monamins*, *diamins*, *triamins*, etc., according to the number of amidogen molecules, NH₂, substituted for H. **A., Primary**, an amin in which one hydrogen atom is replaced by a univalent alkyl. **A., Secondary**, an amin in which two hydrogen atoms are replaced by univalent alkyls. **A., Tertiary**, an amin in which three hydrogen atoms are replaced by univalent alkyls.

Aminol (*am'in-ol*) [*aminol*]. A gaseous substance derived from the methylamin of herring-brine mixed with milk of lime. It is disinfectant, and has been used in the purification of sewage.

Amitosis (*ah-mit'o-sis*) [*ἀμίτις*, *amītis*, a thread]. Cell-multiplication by direct division or simple cleavage.

Amitotic (*ah-mit'o-ik*) [see *Amitosis*]. Of the nature of, or characterized by, amitosis.

A. Cell-division, direct cell-division, as distinguished from karyokinesis.

Ammic (*am'ik*). See *Ammoniac*.

Ammonemia (*am-mo-nē-mē-ah*). The supposed presence of ammonium carbonate in the blood.

Ammonia (*am-o'-ni-ah*) [from the name of Jupiter *Ammon*, from the neighborhood of whose temple in Libya ammonium chlorid was obtained]. A colorless, pungent gas, NH₃, very soluble in water. The preparations of ammonia are used as antacids and as gastric and cardiac stimulants, in headache, hysteria, etc. It is a stimulant to the heart, and, in its elimination through the lungs, stimulates and liquefies the bronchial secretion. **Ammonia, Aqua** (U. S. P.), water of ammonia, a solution containing 10% of the gas in water. Dose 5 min. dr. (10 to 20 Cc.), well diluted. **Ammonia, Aqua, Fortior** (U. S. P.), contains 28% of the gas in solution. **Ammonia, Linimentum** (U. S. P.), ammonia-water, 35% sol.

ton-seed oil, 60; alcohol, 5%. **Ammonia**, **Spiritus** (U. S. P.), a 10% solution of ammonia-water in alcohol. Dose 10 min.-1 dr. (0.65-4.0 Cc.), diluted. **Ammonia**, **Spiritus**, **Aromaticus** (U. S. P.), aromatic spirit of ammonia, an alcoholic solution of ammonium carbonate flavored with lemon, lavender, and pimenta. Dose $\frac{1}{2}$ 2 dr. (2-8 Cc.).

Ammoniac (am-o'-ne-ak). See *Ammoniacum*.

Ammoniacal (am-o-ni'-ak-al) [ammonia]. Containing or relating to ammonia.

Ammoniacum (am-o-ni'-ak-am) [ammonia]. *Ammoniac*. A gum obtained from a Persian plant, *Dorema ammoniacum*. It is a stimulating expectorant and laxative, resembling asafetida, employed in chronic bronchial affections.

Dose 10-30 gr. (0.65-2.0 Gm.). Unof. **Ammoniaci cum Hydrargyro**, **Emplastrum**, ammoniac, 72; mercury, 18%, with sulfur, acetic acid, and oil, q. s. Unof. **Ammoniaci**, **Emplastrum**, 100 parts of ammoniac digested with 150 parts of acetic acid, diluted, strained, and evaporated. Unof. **Ammoniaci**, **Emulsum**, a 4% emulsion in water. Dose $\frac{1}{2}$ -1 oz. (15-30 Cc.). Unof.

Ammoniameter (am-o-ni-am'-et-er) [ammonia; μέτρον, a measure]. An instrument for testing the strength of ammonia solutions.

Ammoniated (am-o-ni-a-ted) [ammonia]. Combined with ammonia.

Ammonium (am-o-ni-am) [ammonia]. A hypothetical univalent alkaline base, having the composition NH_4 . It exists only in combination.

A. Acetate, **Liquor** of (*liquor ammonii acetatis*, U. S. P.), spirit of mindererus, dilute acetic acid neutralized with ammonia. Dose 1 dr.-1 oz. (3.75-30.0 Cc.).

A. Anacardate, an ammonium compound of the resinous acids of cashew-nut. It is a doughy mass, soluble in alcohol, and used as a hair-dye. **A. Arsenate**, $(\text{NH}_4)_3\text{HAsO}_4$. It is used as an alternative in skin diseases.

Dose $\frac{1}{2}$ gr. (0.03 Gm.), gradually increased, 3 times daily. **A. Benzoate** (*ammonii benzoas*, U. S. P.), $\text{NH}_4\text{C}_6\text{H}_5\text{O}_2$. Dose 5-15 gr. (0.32-1.0 Gm.).

A. Bisulfate, NH_4HSO_4 . Dose 10-30 gr. (0.65-2.0 Gm.).

A. Bisulfite, NH_4HSO_3 . It is antiseptic and used internally in fermentive dyspepsia, externally in skin diseases. Dose 10-30 gr. (0.65-2.0 Gm.).

A. Bitartrate, $\text{NH}_4\text{HC}_4\text{H}_4\text{O}_6$, a white, crystalline acid powder. It is used in the manufacture of baking-powder. **A. Borate**, $2(\text{NH}_4\text{H}_2\text{BO}_4) + 3\text{H}_2\text{O}$, used in renal colic; in combination with cod-liver oil it is used in tuberculosis of the lungs. Dose 10-20 gr. (0.65-1.3 Gm.) every hour in water with licorice.

A. Borobenzoate, an intestinal antiseptic. **A. Bromid** (*ammonii bromidum*, U. S. P.), NH_4Br , used in epilepsy, cough, and rheumatism. Dose 10 gr.- $\frac{1}{2}$ dr. (0.65-2.0 Gm.).

A. Carbamate, $\text{NH}_4\text{NH}_2\text{CO}_2$, a white, crystalline, volatile powder, stimulant, a reaction-product of carbon dioxide and ammonia gas. Syn. *Ammonium carbonate anhydrid*. **A. Carbazotate**. See *A. Picrate*. **A. Carbolate**, $\text{C}_6\text{H}_5\text{O} \cdot \text{NH}_4$, antiseptic and antipyretic.

Dose 2-6 gr. (0.13-0.4 Gm.). Syn., *Ammonium phenate*; *Ammonium phenylate*. **A. Carbonate** (*ammonii carbonas*, U. S. P.), NH_4CO_3 , a compound of ammonium and carbonic acid. It is a stimulant, expectorant, and cardiac stimulant. Dose 5-10 gr. (0.32-0.65 Gm.).

A. Chlorid (*ammonii chloras*, U. S. P.), NH_4Cl , sal ammoniac, is used in bronchitis, rheumatism, and liver disease. Dose 1-20 gr. (0.065-1.3 Gm.).

A. Chlorid, **Troches** of (*trochisci ammonii chloras*, U. S. P.), each lozenge contains 2 gr. (0.13 Gm.) of the salt. **A. Embelate**, the ammonium salt of embelliac acid, $\text{NH}_4\text{C}_8\text{H}_7\text{O}_2$. It is a teniaicide. Dose for children $\frac{1}{2}$ gr. (0.2 Gm.); for adults 6 gr. (0.4 Gm.).

A. Fluorid, used in enlargement of the spleen. Dose $\frac{1}{4}$ - $\frac{1}{2}$ gr. (0.005-0.032 Gm.). It is recommended in dyspeptic flatulence. $\frac{1}{2}$ gr. (1 Gm.) dissolved in 10 oz. (300 Cc.) of distilled water, 1 tablespoonful after each meal.

A. Formate, NH_4CHO_2 , used in chronic paralysis. Dose 5 gr. to 1 Gm. **A. Glycerinophosphate**, $(\text{NH}_4)_2\text{H}_2\text{PO}_4 \cdot 3\text{H}_2\text{O}$, soluble in water. It is used in neurasthenia, Addison's disease, etc. Dose 3-4 gr. (0.2-0.26 Gm.) several times daily.

A. Glycyrrhizate, an expectorant. Unof. **A. Hypophosphite**, $\text{NH}_4\text{PH}_2\text{O}_2 + \text{H}_2\text{O}$, white, laminate crystals, soluble in water. Dose 10-30 gr. (0.65-2.0 Gm.) 3 times daily. **A. Iodid** (*ammonii iodidum*, U. S. P.), NH_4I . Dose 2-10 gr. (0.13-0.65 Gm.).

A. Nitrate, NH_4NO_3 , used in preparing nitrous oxide. **A. Persulfate**, $(\text{NH}_4)_2\text{S}_2\text{O}_8$, colorless crystals, soluble in water with turbidity. It is a disinfectant and deodorizer. Application 0.5 to 2% solution. **A. Phosphate**, $(\text{NH}_4)_2\text{HPO}_4$. Dose 5-20 gr. (0.32-1.3 Gm.).

A. Phosphate, Dibasic, $(\text{NH}_4)_2\text{HPO}_4$. Used in rheumatism and gout. Dose 5-20 gr. (0.32-1.3 Gm.) 3 or 4 times daily in $\frac{1}{2}$ oz. water. **A. Picrate**, $\text{C}_6\text{H}_3\text{NH}_4(\text{NO}_2)_3\text{O}$, a salt in yellow needles, of bitter taste; like other picrates, it is explosive, and must be handled with care. It is antipyretic and antiperiodic, and tends to correct gastric disturbances. Dose 5 gr. to 1 Gm. in 24 hours. Syn., *Ammonium carbazotate*.

A. Salicylate (*ammonii salicylas*, U. S. P.), $\text{NH}_4\text{C}_7\text{H}_5\text{O}_2$, an antirheumatic, antipyretic, germicide, and expectorant. Dose 2-10 gr. (0.13-0.65 Gm.).

A. Silicofluorid, $2\text{NH}_4\text{F} \cdot \text{SiF}_6$, an energetic antiseptic and reconstituent. It is used by inhalation in diseases of the nose and throat.

A. Succinate, $(\text{NH}_4)_2\text{C}_4\text{H}_4\text{O}_4$; recommended, 1 part in 120 parts of water as a specific in colic. Dose 1 tablespoonful every 15 minutes. **A. Sulfate**, $(\text{NH}_4)_2\text{SO}_4$, used in the preparation of other ammonium salts.

A. Sulfite, $(\text{NH}_4)_2\text{SO}_3$, an antiseptic used in fermentive dyspepsia. Dose 5-20 gr. (0.3-1.3 Gm.). Applied externally in skin diseases, 1 part in 10 parts of water. **A. Sulfocarbonate**, $\text{NH}_4\text{C}_6\text{H}_5\text{HSO}_4$, antiseptic. Dose 1-5 gr. (0.06-0.3 Gm.).

A. Sulfocinate, brown, ointment-like masses, soluble in water.

in alcohol and water. It is antiseptic and disinfectant, and applied in 20% solution in skin diseases or on ulcerated mucous membranes. **A. Tartrate**, $(\text{NH}_4)_2\text{C}_4\text{H}_4\text{O}_6$, clear crystals, soluble in water. It is an expectorant. Dose 5-30 gr. (0.3-2.0 Gm.). **A. Thiosulfate**, $(\text{NH}_4)_2\text{S}_2\text{O}_3$, soluble in water; antiseptic. Dose 5-10 gr. (0.3-2.0 Gm.) in water. **A. Tungstate**, fine white crystalline powder or needles, soluble in water. **A. Urate**, $(\text{NH}_4)_2\text{C}_4\text{H}_4\text{N}_4\text{O}_6$, white crystalline powder, slightly soluble in water. It is antiseptic and used in 4% ointment in chronic eczema. Ammonium urate occurs in alkaline urine and at times in urinary calculi. **A. Valerate**, $\text{NH}_4\text{C}_4\text{H}_7\text{O}_2$, is used as a sedative in hysteria. Dose 1-5 gr. (0.05-0.32 Gm.).

Ammonuria (*am-mo-ni-ur-eh*) [*ammonia*; *ammon*, urine]. A condition marked by excess of ammonia in the urine.

Ammonol (*am-mo-nol*), $\text{C}_6\text{H}_5\text{NH}_2$. A proprietary remedy said to be ammoniated phenylacetamide, pale-yellow crystals, said to be analgesic and antipyretic. Dose 5-20 gr. (0.3-1.4 Gm.). **A. Salicylate**, a remedy for headache. Dose 8 gr. (0.5 Gm.).

Ammonotherapy (*am-mo-ther-a-pe*) [*ammon*, sand; *therapeia*, to heal]. The use of sand baths in the treatment of disease.

Amnesia (*am-ne-si-ah*) [*amnēsis*, forgetfulness]. Loss of memory, especially of the ideas represented by words. **A., Auditory**, word-deafness. **A., Retroantegrade**, a perversion of memory in which recent events are referred to a far-removed past, while the occurrences of the remote past seem recent. **A., Retrograde**, loss of memory for incidents and events which occurred a shorter or longer time before the attack of the disease. Besides that which may result from severe infectious disease or from epilepsy, it may be due to trauma or to hysteria. **A., Visual**, word-blindness, or inability to recognize printed or written words.

Amnesic (*am-ne-sik*). Relating to amnesia. **A. Aphasia**. See *Amnesia*.

Amniochorial (*am-ne-o-ko-re-al*) [*amnion*; *chorion*, a membrane]. Pertaining to both amnion and chorion.

Amniocleptic, **Amnioclepticous** (*am-ne-o-klēp-tik*, *-ous*) [*amnion*; *kleptēs*, to steal away]. Relating to the unmarked escape of the liquor amnii.

Amnion (*am-ne-on*) [*amion*, a young lamb]. The innermost of the fetal membranes; it is continuous with the fetal epidermis at the umbilicus, forming a complete sheath for the umbilical cord and a sac or bag in which the fetus is included. It contains one or two parts of liquor amnii. It is a double, non-vascular membrane, the inner layer or sac derived from the epiblast, the outer from the amnioblast. The cavity of the inner folds is called the *true amnion*, that of the outer, the *false*. See *Aguina membrana*, *Aguina pellucida*, *Membrana agguina*, *Aguina tunica*, *Albugo Agguina*. **A., Dropsy of**, excessive secretion of liquor amnii.

Amnionic (*am-ne-on-ik*) [*amnion*]. Relating to the amnion.

Amniorrhea (*am-ne-o-re-ah*) [*amnion*; *rhē*, a flow]. The discharge of the liquor amnii.

Amniotic (*am-ne-ot-ik*) [*amnion*]. Relating to the amnion. **A. Cavity**, the sac of the amnion. **A. Fluid**, the liquor amnii. See *Amnion*.

Amœba (*am-e-bah*). See *Amœba*.

Amœboid (*am-e-boid*). See *Amœboid*.

Amomum (*am-o'-mum*) [*āmapa*, an Eastern spice plant]. A genus of scitamineaceous plants to which the cardamom (*A. cardamomum*) and "grains of paradise" (*A. granum paradisi*) belong.

Amor (*am'-er*) [L.]. Love. **A. insanus**. See *Eratomania*. **A. sui**, love of self, vanity.

A. veneris, Columbus' term for the clitoris.

Amorpha (*ah-mor'-ah*) [*ā*, priv.; *morphē*, shape]. 1. A cutaneous eruption having no definite form. 2. A macula. 3. Apparent diseases in which no lesions can be discovered. 4. Intertrigo. **A. infantilis**, **A. lactantium**, infantile intertrigo. **A. vulgaris**, intertrigo.

Amorphia (*ah-mor'-fe-ah*) [see *Amorpha*]. Shapeless condition.

Amorphism (*ah-mor'-fiz-m*) [see *Amorpha*]. The state of being amorphous or without shape; want of crystalline structure.

Amorphous (*ah-mor'-fus*) [see *Amorpha*]. Formless; shapeless; not crystalline.

Ampelotherapy (*am-pel-o-ther-a-pe*) [*ampēlos*, a grape-vine; *therapeia*, to heal]. The grape-cure (q. v.).

Amperage (*am-pār-ahj*) [*Ampère*, a French physicist]. The number of amperes passing in a given circuit.

Ampere (*am'-pār*) [see *Amperage*]. A unit of measurement of an electric current. It is the electromotive force of one volt produced in a circuit having one ohm of resistance.

Amperemeter (*am-pār-me-ter*) [*ampere*, *mētrōs*, a measure]. An instrument for estimating the strength of the current of an electric circuit in amperes.

Amphemerus, **Amphemerus** (*am-fem'-er-os*, *-us*). 1. Quotidian. 2. A quotidian fever.

Amphiarkyochrome (*am-fe-ar'-ke-o-krom*) [*amphi*, both; *arkyōs*, net; *chroma*, color]. A term applied by Nissl to a nerve-cell the stainable portion of whose cell-body is in the form of a pale network, the nodal points of which are joined by an intensely staining network.

Amphiarthrosis (*am-fe-ar-thro'-sis*) [*amphi*; *arthrōs*, a joint]. A form of mixed articulation in which the surfaces of the bones are connected by broad discs of fibrocartilage or else are covered with fibrocartilage and connected by external ligaments. It is distinguished by limited flexion in every direction, as, e. g., between the vertebrae.

Amphiaster (*am'-fe-as-ter*) [*amphi*; *astēr*, a star]. The figure formed in indirect cell-division by the

AMPHIASTER OF AN OVARIAN EGG.

figure formed in indirect cell-division by the

achromatin threads and chromatin granules united to form the so-called nuclear spindle, together with the threads of cell-protoplasm radiating from a rounded clear space at each end of the spindle, known as the stars or suns.

Amphibia (*am-fī'e-ah*) [*amphi*; *biōs*, life]. A class of the *Vertebrata* living both in the water and upon the land, as the frog, newt, etc.

Amphibious (*am-fī'e-us*) [see *Amphibia*]. Living both on land and in water.

Amphiblastic (*am-fī'e-las'tik*) [*amphi*; *βλαστικός*, a germ]. Pertaining to that form of complete segmentation that gives rise to an amphiblastula.

Amphiblastula (*am-fī'e-blas'tu-lah*) [*amphi*; *blastula*, dim. of *βλαστός*, a germ]. The mulberry-mass or morula-stage in the development of a holo-

AMPHIBLASTULA. (After Pallas.)
a. Embryonic cells which will form the pole. b. Cells which will become incorporated to form the hypoblast.

blastula egg. It follows the stage known as *amphimorula*.

Amphibolia (*am-fī'e-bō'le-ah*) [*dyspholia*, uncertainty]. The vacillating period of a fever or disease.

Amphibolic (*am-fī'e-bō'lik*) [see *Amphibolia*]. [uncertain; doubtful]. Applied to a period in the female process occurring between the *fastagium* and the *depression*, and marked by exaltations and tensions.

Amphicrania (*am-fī'e-kra'nī-ah*) [*amphi*; *κρανίον*, the skull]. Headache affecting both sides of the head.

Amphicreatin (*am-fī'e-kre-ā'tīn*) [*amphi*; *σπράγ*, flesh]. $C_7H_{12}N_2O_4$. One of the muscle-leukomains. It crystallizes in brilliant oblique prisms of a yellowish-white color, and is fairly hard.

Amphicreatinin (*am-fī'e-kre-ā'tīn-in*) [see *Amphicreatin*]. $C_7H_{12}N_2O_4$. A member of the creatinin group of leukomains derived from muscle.

Amphicroic (*am-fī'e-kro'ik*) [*amphi*; *σπρος*, to moist]. Having the power to turn blue litmus-paper red and red litmus-paper blue.

Amphidiarthrosis (*am-fī'e-dī-arth-rō'sis*) [*amphi*; *διάρθρωσις*, articulation]. The articulation of the lower jaw, as it partakes of the nature both of ginglymus and of arthrodia.

Amphigony (*am-fī'e-jō-nē*) [*amphi*; *φύσις*, offspring]. The sexual process in its broadest sense, generation.

Amphimicrobial (*am-fī'e-mī-kro'bi-ō-l*) [*amphi*; *μικροβίον*, small, being life]. Both *aërobian* and *anaërobian*.

Amphimixis (*am-fī-miks'is*) [*amphi*; *μίξις*, mixing]. The mingling of two individuals or their germs; sexual reproduction.

Amphimorula (*am-fī'e-mor'ū-lah*) [*amphi*; *morula*, a mulberry]. The morula, or globular mass of cleavage cells resulting from unequal segmentation, the cells of the hemispheres being unlike in size.

Amphistoma (*am-fī'e-to-mah*) [*amphi*; *στόμα*, mouth]. A genus of trematode worms, named from the mouth-like apparatus at either end. One species, *A. hominis*, has been found in the large intestine of man.

Amphitrichous (*am-fī'e-trib-us*) [*amphi*; *τριχίς*, a hair]. Applied to the type of flagellation in bacteria in which there is a single flagellum at each pole.

Amphodiplopia (*am-fō-dip-lō'pō-ah*) [*amphi*; *διπλός*, both, *δρᾶσις*, double, *ὄψις*, eye]. Double vision affecting each of the eyes.

Amphophil, Amphophilous (*am-fī'e-fīl am-fī'e-fīl-us*) [*amphi*; *φιλος*, both, *φραίνω*, to love]. Readily stainable alike with acid and with basic dyes.

Amphoric (*am-fōr'ik*) [*amphora*, a vase with two handles]. Resembling the sound produced by blowing across the mouth of a bottle. **A. Breathing**, breath-sounds with musical quality heard in diseased conditions of the lung, especially in pulmonary tuberculosis with cavity-formation. **A. Resonance**, in auscultation, a metallic sound like that of blowing into a bottle, caused by the reverberation of sound in a cavity of the lung. **A. Respiration**. See *A. Breathing*.

Amphorophony (*am-fōr-ōf'ō-nē*) [*amphora*; *φώνη*, a sound]. An amphoric resonance or sound.

Amphoteric, Amphoteros (*am-fō-ter'ē am-fō-ter-us*) [*ἀμφότεροι*, both of two]. Double-sided, having the power of altering the color of both red and blue litmus test-paper; a condition sometimes presented by the urine.

Amplification (*am-plē-ik-ō'shun*) [*amplifacio*, to enlarge]. In microscopy, increase of the visual area.

Amplifier (*am-plē-fī-er*) [see *Amplification*]. An apparatus used in microscopy for increasing the magnification. It consists of a diverging lens or combination placed between the objective and the ocular, and gives to the image-forming rays from the objective an increased divergence.

Amplitude (*am-plē-tūd*) [*amplitudo*, broad]. The range or extent, as of vibrations and undulations, the pulse-wave, etc.

Ampulla (*am-pul'ah*) [L., "a Roman wine-jug"]. 1. The trumpet-mouthed or dilated extremity of a canal, as of the lacrimal canal, the receptaculum chyl, the fallopian tubes, mammary ducts, semicircular canals, vas deferens, etc. 2. A bulb or bladder. **A. chyla**, the receptaculum chyl. **A., Galen's**, a dilatation of the vena magna galeni, occurring in the middle of Bichat's fissure, between

the splenium and the quadrigeminal bodies. It receives the two basilar and several small cerebral and cerebellar veins. **A., Henle's.** 1. The fusiform dilation of the vas deferens near its junction with the seminal vesicle. 2. The expanded outer half of the fallopian tube. **A., Lieberkühn's,** the cecal terminus of one of the lacteals in the villi of the intestine. **A. Lorenzini,** the dilated internal end of Lorenzini's tubes. **A. of Rectum,** the portion above the perineal flexure. **A. of Vater,** a depression in the internal and posterior wall of the descending portion of the duodenum, into which the ductus communis choledochus and the pancreatic duct open.

Ampullaceous (am-pul-s'-shus). 1. Flask-shaped; big-bellied; gibbous. 2. Relating to an ampulla. 3. Attended with the formation of bullas or blebs.

Amputation (am-pu-ta'-shun) [amputare, to cut away] The removal of a limb or any projecting part of the body. Amputation may be by the knife, ligature, or other means, or it may be the result of pathologic processes, as gangrene, constriction (e. g., of the cord in the fetus). **A., Accidental,** the separation of a limb by some form of accident. **A., Bloodless,** one in which there is but slight loss of blood, on account of the circulation being controlled by mechanic means. **A., Central,** one in which the scar is situated at or near the center of the stump. **A., Circular,** that performed by making a single flap, by circular sweeps of a long knife, through skin and muscles, in a direction vertical to the long axis of the limb. **A., Circular Skin-flap,** a modification of the circular, in which the skin-flap is dissected up, and the muscles divided at a higher level. **A., Coat-sleeve,** a modification of the circular, in which the cutaneous flap is made very long, the end being closed by being gathered together by means of a tape. **A., Congenital,** amputation of fetal portions, due to constriction by bands of lymph. **A., Consecutive,** an amputation during the period of suppuration or later. **A. in the Contiguity,** amputation at a joint. **A. in the Continuity,** amputation of a limb elsewhere than at a joint. **A., Cutaneous,** one in which the flaps are composed exclusively of the integuments. **A., Dielastie,** one in which the bone is broken with an osteoclast and the soft tissues divided by means of an écarateur. Its object is to avoid hemorrhage and purulent infection. **A., Double Flap,** one in which two flaps are formed from the soft tissues. **A., Dry.** See **A., Bloodless.** **A., Eccentric,** one in which the scar is situated away from the center of the stump. **A., Elliptic,** one that may be performed by a single sweep, as in the circular method; the wound, however, having an elliptic outline, on account of the oblique direction of the incision. **A. of Expediency,** one performed for cosmetic effect. **A., Flap,** one in which

one or more flaps are made from the soft tissues, the division being made obliquely. **A., Flapless,** one in which, on account of destruction of the soft parts, flaps cannot be formed, the wound healing by granulation. **A., Galvanocautie,** one in which the soft parts are divided with the galvanocautery, followed by division of the bone by the saw. **A., Immediate,** one done within 12 hours after the injury, during the period of shock. **A., Intermediary, A., Intermediate, A., Intrapretic,** one performed during the period of reaction and before suppuration. **A., Intrauterine.** See **A., Congenital.** **A., Major,** amputation of an extremity above the wrist or ankle-joint. **A., Mediate.** See **A., Intermediary.** **A., Mediotarsal.** 1. Chopart's amputation. See **Operation, Chopart's.** 2. An amputation through the tarsus, preserving the scaphoid bone. **A., Minor,** amputation of a small part, as a finger. **A., Mixed,** a combination of the circular and flap methods. **A., Multiple,** amputation of two or more members at the same time. **A., Musculocutaneous,** one in which the flaps consist of skin and muscle. **A., Musculotegumentary.** See **A., Musculocutaneous.** **A., Natural.** See **A., Congenital.** **A., Oblique.** See **A., Oval.** **A., Osteoplastic,** one in which there are section and apposition of portions of bone in addition to the amputation. **A., Oval,** a modification of the elliptic, in which the incision consists of two reversed spirals instead of the one oblique. **A., Partial.** 1. One in which but a portion of the extremity is removed. 2. An incomplete congenital amputation. **A., Pathologic,** one done for tumor or other diseased condition. **A., Primary,** one done after the period of shock and before the occurrence of inflammation. **A., Racket,** a variety of the oval amputation in which there is a single longitudinal incision continuous below with a spiral incision on either side of the limb. **A., Secondary,** one performed during the period of suppuration. **A., Spontaneous.** See **A., Congenital.** It also occurs in the disease, ainhum. **A., Subastragalar,** a partial amputation of the foot, leaving only the astragalus. **A., Subperiosteal,** one in the continuity, the cut end of the bone being covered by periosteal flaps. **A., Supracondylar.** See **Operation, Grille's.** **A., Synchronous.** See **A., Multiple.** **A., Tertiary,** that performed after the inflammatory reaction stage has passed. **A. by Transfixion,** one done by thrusting a long knife completely through a limb and cutting the flaps from within out.

Amusia (ah-mu'-se-ah) [d. priv.; *μουσα*, muse]. Loss of the ability to produce or comprehend music or musical sounds; an abnormality as regards music analogous to aphasia as regards the faculty of speech. **A., Motor,** that in which music is understood, but the power of singing or otherwise reproducing music is lost. **A., Sensory,** musical deaf-

ness, or the loss of the power of comprehension of musical sounds.

Amussat's Valves. See *Heister's Valves*.

Amussis (*am-us-sis*) [*am-*, "a carpenter's rule or level", pl., *amusses*]. One of two portions into which a median fissure divides the posterior commissure of the brain.

Amycetic (*am-ik'et-ik*) [*am-*, "mangling". 1. Cautic, irritating. 2. A caustic or corrosive drug.

Amyelencephalia (*ah-mi-el-en-sej-s'le-ah*) [*d.* priv., *myelos*, marrow, *kephalē*, the head]. Absence of both brain and spinal cord.

Amyelia (*ah-mi-el-ah*) [*d.* priv., *myelos*, marrow]. Absence of the spinal cord.

Amyelic (*ah-mi-el-ik*) [see *Amyelia*]. Relating to amyelia.

Amyelinic (*ah-mi-el-in'ik*). Without myelin.

Amyelonic (*ah-mi-el-on'ik*). 1. Amyelic. 2. Without marrow.

Amyelotrophy (*ah-mi-el-of-ro-fe*) [*d.* priv., *myelos*, marrow, *trophē*, nourishment]. Atrophy of the spinal cord.

Amyelus (*ah-mi-el-us*) [*d.* priv., *myelos*, marrow]. A fetal monstrosity with partial or complete absence of the spinal cord.

Amygdala (*am-ig-dal-ah*) [*am-*, almond].

1. The tonsil. 2. A small lobule on the lower surface of each cerebellar hemisphere, projecting into the fourth ventricle. 3. Almond. The seeds of *A. amara* and *A. dulcis*, containing the principle *emulsin*. The former contains *amygdalin*. The expressed oil of the sweet almond is a demulcent and is useful in skin affections; in doses of 1-2 dr. (1-8 Gm.), a mild laxative, that of *A. amara* is used in cosmetics. **A. amara** (U. S. P.), the bitter almond. **A. dulcis** (U. S. P.), the sweet almond. **Amygdalæ amare, Aqua** (U. S. P.), a 1:1000 solution of the oil of bitter almonds in water. Dose 1 dr. (1 Cc.).

Amygdalæ amare, Oleum (U. S. P.), contains 3-11% of hydrocyanic acid and has similar uses. Dose 1-1 min. (0.016-0.065 Cc.). **Amygdalæ amare, Spiritus** (U. S. P.), the spirit of bitter almonds. **Amygdalæ, Emulsum** (U. S. P.), oil of sweet almonds 6%; sugar, water, and alcohol 95. **Amygdalæ Expressum, Oleum** (U. S. P.), expressed oil of almonds. Dose 1 oz. (30 Cc.). **Amygdalæ, Syrupus** (U. S. P.), syrup of almond; demulcent and slightly sedative. Dose 1-2 dr. (1-8 Cc.).

Amygdalectomy (*am-ig-dal-ek'to-me*) [*am-*, *dala*, *tatou*, a cutting out]. Excision of a tonsil.

Amygdalin (*am-ig-dal-in*) [see *Amygdala*], $C_{20}H_{27}NO_{11}$ + (H_2O) . A glucosid formed in bitter almonds, in various plants, and in the leaves of the cherry-laurel. Under the influence of emulsin, contained in the almond, it splits up into glucose and hydrocyanic acid.

Amygdaline (*am-ig-dal-in*) [see *Amygdala*]. 1. Almond-like. 2. Pertaining to the tonsil.

Amygdalitis (*am-ig-dal-i'tis*) [*am-*, *gdala*, *itis*, inflammation]. Tonsillitis.

Amygdaloid (*am-ig-dal-oid*) [*am-*, *gdala*, *oid*, form]. Resembling an almond. **A. Fossa**, the depression for the lodgment of the tonsil. **A. Tubercle**, a projection of gray matter at the end of the descending cornu of the lateral ventricle of the brain. It is attached to the temporal lobe, and appears to be nearly isolated by white substance.

Amygdalolith (*am-ig-dal-o-lith*) [*am-*, *gdala*, *lithos*, a stone]. A concretion or calculus found in the tonsil.

Amygdalopathy (*am-ig-dal-op'ath-e*) [*am-*, *gdala*, *pathos*, a disease]. Any disease of the tonsils.

Amygdalotome (*am-ig-dal-o-tōm*) [*am-*, *gdala*, *tomē*, to cut]. An instrument used in cutting the tonsils.

Amygdalotomy (*am-ig-dal-o-to-me*) [see *Amygdalotome*]. Tonsillotomy.

Amygdophenin (*am-ig-dof'en-in*) [*am-*, *gdala*, *phenin*], $C_{12}H_{11}OC_2H_5NH_2 \cdot OC_2H_5 \cdot CH(OH)C_6H_5$. A grayish-white, crystalline powder, derived from par-aminophenol. It is antirheumatic. Dose 15 gr. (1 Gm.) from 1 to 6 times daily in powder. Syn., *Phenylethylphenol*.

Amygmus (*am-ig-mus*) [*am-*, *gmus*]. Scarification.

Amyl (*am'il*) [*am-*, *ylon*, starch]. The radicle.

C_5H_{11} , of amylic alcohol, the fifth member of the series of alcohol radicles, C_nH_{2n+1} . **A.-alcohol**. See *Amylic Alcohol*. **A. Bromid**, $C_5H_{11}Br$, a transparent, colorless liquid, soluble in alcohol. It is antiseptic and germicidal. **A. Colloid**, a fluid preparation consisting of amyl hydrid, 480 parts; acetonin, 1 part; veratrin, 6 parts; colloidion to 960 parts. It is painted on the skin in neuralgia, sciatica, etc. Syn., *Analysin colloid*. **A. Hydrate**. See *Amylic Alcohol*. **A. Hydrid**, a fractional product of petroleum ether, it is an antiseptic. Syn., *Hydramid*. **Pentylene**, *Pentahydrid*. **A. Iodid**, $C_5H_{11}I$, the reaction-product of isomyl alcohol, iodine, and phosphorus. It is sedative and antiseptic, and is used as an inhalation in dyspnea. **A. Nitrite**, $C_5H_{11}NO_2$, a clear, yellowish, volatile liquid, of a penetrating odor. It produces vascular dilation and stimulates the heart's action, and is useful in angina pectoris, respiratory neuroses, etc. Dose, *internally*, $\frac{1}{4}$ min. (0.25-0.065 Cc.) dissolved in alcohol, by *inhalation*, 2-3 min. (0.12-0.3 Cc.). **A. Nitrite, Carbureted**, amyl nitrite saturated with carbon monoxid. It is suggested as a substitute for pure amyl nitrite, to obviate pressure in the head and other secondary objectionable properties. **A. Salicylate**, a compound obtained from the action of chloroform on a saturated solution of salicylic acid in amylic alcohol. It is said to have the sedative properties of the amylic derivatives as well as antirheumatic qualities. Dose in acute rheumatism 10 capsules of 3 gr. (0.3

Gm.) each, daily. **A. Valerate, A. Valerianate**, $C_{10}H_{20}O_2$. It is a cholesterol solvent and is used as a sedative in gall-stone colic. Dose 2-3 gr. (0.13-0.2 Gm.). Syn., *Apple oil*.

Amylaceous (*am-il-a'-se-us*) [see *Amyl*]. Containing starch, starch-like.

Amylamin (*am-il'-am-in*). See *Isoamylamin*. **A. Hydrochlorate**, $C_5H_{11}NCl$, a reaction-product of amyl cyanate, potassium hydrate, and hydrochloric acid, occurring as deliquescent scales or crystals. It is an antipyretic. Dose 7-15 gr. (0.45-1.0 Gm.).

Amylate (*am-il'-at*). 1. A combination formed by the replacement of the hydrogen of the hydroxyl molecule in amylic alcohol with a metal or basic radicle. 2. A compound of starch with a radicle.

Amylene (*am-il'-en*) [see *Amyl*], C_5H_{10} . A liquid hydrocarbon having anesthetic properties. See *Anesthetic*. **A.-chloral**, $CCl_4 \cdot CH_3OH \cdot O \cdot C(CH_3)_2C_2H_5$, dimethyl-ethyl-carbinol-chloral. It is hypnotic. Syn., *Dormiol*. **A. Hydrate**, $C_5H_{12}O$, a tertiary alcohol used as a hypnotic. Dose 30 min.-1 dr. (2-3 Cc.). Unot.

Amylic (*am-il'-ik*) [see *Amyl*]. Pertaining to amyl. **A. Alcohol**, fusel oil; potato-starch alcohol; amyl hydrate. An alcohol having the composition $C_5H_{12}O$, produced in the continued distillation of fermented grain. It was formerly used to adulterate whisky. It is a solvent and reagent.

Amylin (*am-il'-in*) [see *Amyl*]. The insoluble wall of the starch-grain.

Amyloform (*am-il'-o-form*). An odorless white powder produced by the chemie combination of starch with formaldehyd. It is non-toxic, quite insoluble, and is not decomposed under 180° C. It is recommended as a surgical antiseptic.

Amylogenic (*am-il-o-jen'-ik*) [*amylon*; γεννῶν, producing]. Starch-producing.

Amyloid (*am-il'-oid*) [*amylon*; εἶδος, form]. 1. Starch-like. 2. A starchy substance. 3. Glycogen. 4. Virchow's name for a waxy body found in animal tissue as a result of disease and resembling starch only in the one particular that it was stained by iodine. Cf. *Amyloid Degeneration*. **A. Bodies**, bodies resembling starch-grains, found in the nervous system, the prostate, etc. They are the result of a localized amyloid degeneration. **A. Degeneration**, waxy or lardaceous degeneration. A degeneration characterized by the formation of an albuminous substance, resembling starch in its chemie reactions. The process affects primarily the connective tissue of the blood-vessels of various organs, and is connected with or due to chronic suppuration in the body. Amyloid substance gives a brown color with iodine, a red color with gentian-violet, and turns blue on being treated with sodium and sulfuric acid. **A. Kidney**. See *Bright's Disease*.

Amylolysis (*am-il-al'-is*) [*amylon*; λύσις, so-

lution]. The digestion of starch, or its conversion into sugar.

Amylolytic (*am-il-a-lit'-ik*) [see *Amylolysis*]. Pertaining to or effecting the digestion of starch, as the ferments in the saliva and pancreatic juice that convert starch into sugar.

Amylon (*am-il-on*) [L.]. 1. Starch. 2. Glycogen. 3. A principle found in grape-juice.

Amylophosphin (*am-il-a-jos'-fin*). A phosphin in which the hydrogen is replaced by amyl.

Amylopsin (*am-il-op'-sin*) [*amylon*; ὥψις, appearance]. A ferment found in the pancreatic juice which changes starch into sugar.

Amylose (*am-il-ōs*) [*amylon*]. Any one of the group of carbohydrates, comprising starch, glycogen, dextrin, inulin, gum, cellulose, and tunicin.

Amylum (*am-il-um*) [L.], $C_6H_{10}O_5$. Starch. **Amyli, Glyceritum** (U. S. P.), contains starch, 10, water, 10, glycerol, 80%, used for external application. **A. iodatum**, contains starch, 95%; iodine, 5% triturated with distilled water and dried. Dose 1 dr.-4 oz. (4-16 Gm.).

Amyli, Mucilago (B. P.), used in making enemas.

Amyocardia (*am-i-o-kar'-de-ah*) [*d*, priv.; καρ, muscle; καρδιά, the heart]. Lack of muscular power in the heart's contractions.

Amyostasia (*am-i-os-ta'-ze-ah*) [*d*, priv.; μῦς, muscle; στάσις, standing]. An abnormal trembling of the muscles while in use, often seen in locomotor ataxia.

Amyosthenia (*am-i-os-the'-ne-ah*) [*d*, priv.; μῦς, muscle, σθένος, force]. Deficient muscular power.

Amyotrophia (*am-i-o-tro'-je-ah*) [*d*, priv.; μῦς, muscle; τροφή, nourishment]. Atrophy of a muscle.

Amyotrophic (*am-i-o-tro'-fik*) [see *Amyotrophia*]. Characterized by muscular atrophy.

A. Lateral Sclerosis, lateral sclerosis combined with muscular atrophy. The lesion is in the pyramidal tracts and in the ganglion-cells of the anterior gray horns of the spinal cord. The disease has a marked tendency to involve the medulla. **A. Paralysis**, that due to muscular atrophy.

Amyxia (*am-iks'-i-ah*) [*d*, priv.; μύξα, mucus]. Absence or deficiency of mucous secretion.

Amyxis (*ah-miks'-is*) [*ἀμύασις*, to scurify]. Scarification.

Amyxodes (*ah-miks-o'-dez*). 1. Deficient in mucus; relating to amyxia. 2. Scarified; relating to amyxis.

Anabasis (*an-ab'-is*) [*ἀναβάσις*, to go up]. The increasing stage of acute disease.

Anabatic (*an-ab-at'-ik*) [see *Anabasis*]. Increasing; growing more intense, as the anabatic stage of a fever.

Anabiosis (*an-ab-i-o'-is*) [*ἀναβίσις*, to come to life again]. The reappearance of vitality in an apparently lifeless organism.

Anabolergy (*an-ab-ol'-er-je*) [*ἀναβολή*, to throw up; ἔργον, work]. The force ex-

- pendent or work performed in anabolism or in anabolic processes.
- Anabolic** (*an-ab-ol'ik*) [*anabállōn*, to throw up]. Pertaining to or characterized by anabolism.
- Anabolin** (*an-ab'-o-lin*) [see *Anabolic*]. Any substance formed during the anabolic process.
- Anabolism** (*an-ab'-o-lizm*) [see *Anabolic*]. Synthetic or constructive metabolism. Activity and repair of function, opposed to katabolism.
- Anacampsis** (*an-ah-kamp'-sis*) [*anákampsis*, to bend back]. A flexure.
- Anacamptic** (*an-ah-kamp'-tik*) [see *Anacampsis*]. Reflected, as sound or light; pertaining to or causing a reflection.
- Anacamptometer** (*an-ah-kamp'-tom'-et-er*) [*anákampsis*, to bend back, *metron*, a measure]. An apparatus for measuring reflexes.
- Anacardium** (*an-ah-kar'-de-um*) [*ana*, up, *cardia*, the heart, from its heart-shaped seeds]. 1. A genus of tropical trees. *A. occidentale* yields cashew gum and the cashew nut. 2. The oil of the pericarp of the cashew-nut, known as cardol, and used as an escharotic. It is said to be of value in leprosy. **A.**, Ointment of, 1 part of the fat to 8 of lard or vaselin, used as a blistering ointment. **Usof.** **A.**, Tincture of, 1 to 10 of rectified spirit. Dose 2-10 min. (0.12-0.6 G.).
- Anachlorhydria** (*an-ah-klor-hi'-dre-ah*). The lack of hydrochloric acid in the gastric juice.
- Anaclasis** (*an-ah'-las-is*) [*anáklasis*, a breaking off or back]. 1. Reflection or refraction of light or sound. 2. A fracture, forcible flexion of a stiff joint.
- Anacrotic** (*an-ah-rot'-ik*) [*aná*, up; *apōros*, a stroke]. Relating to or characterized by anacrotism.
- Anacrotism** (*an-ah-rot'-izm*) [see *Anacrotic*]. The condition in which there is one or more notches on the ascending limb of the pulse-wave.
- Anacusia** (*an-ah-oot'-se-ah*) [*án*, priv., *akouē*, to hear]. Complete deafness.
- Anadenia** (*an-ah'-e-ne-ah*) [*án*, priv.; *dēpē*, gland]. Insufficiency of glandular function. **A. gastrica**, Edward's name for achylia gastrica. **A. ventriculi**. See *Achylia gastrica*.
- Anadesma** (*an-ah-dez'-mah*) [*anadesma*, a fillet]. A band or fascia.
- Anadicrotic** (*an-ah-di-krot'-ik*) [*aná*, up; *dikro*, twice; *apōros*, a stroke]. Characterized by anadicrotism.
- Anadicrotism** (*an-ah-di-krot'-izm*) [see *Anadicrotic*]. Dicrotism of the pulse-wave occurring in the upward stroke.
- Anadidymous** (*an-ah-id'-im-us*) [*aná*, up; *didi-mos*, a twin]. Cleft upward into two, while single below—said of certain joined twins.
- Anadidyms** (*an-ah-id'-im-us*) [see *Anadidymus*]. An anadidymous monster.
- Anadipsia** (*an-ah-dip'-se-ah*) [*aná*, intensive; *dipsa*, thirst]. Intense thirst.
- Anadrome** (*an-ah'-ro-me*) [*anádrōmē*, a running up]. 1. An upward determination of the

blood. 2. A pain ascending from the lower to the higher portion of the body. 3. The ascent of sap in plants. 4. See *Glōbos hystericus*.

Anæmia (*an-eh'-me-ah*) [see *Anemia*].

Anaerobe (*an-ah'-er-oh*) [see *Anaerobion*].

Anaerobia (*an-ah'-er-oh'-be-ah*) [*án*, priv., *aēr*, air, *biōs*, life]. Plural of *anaerobion*. Micro-organisms having the power of living without air or free oxygen. **A.**, Facultative, applied to organisms normally or usually living in the presence of oxygen, but capable of becoming anaerobic.

Anaerobic (*an-ah'-er-oh'-fik*) [see *Anaerobion*]. Living in the absence of the oxygen or air. See *Aerobic*.

Anaerobion (*an-ah'-er-oh'-be-on*) [see *Anaerobia*].

Anaerobiosis (*an-ah'-er-oh'-be-ō-sis*) [see *Anaerobion*]. Life sustained in the absence of free oxygen; the power of living where there is no free oxygen.

Anaerobiotic, Anaerobious (*an-ah'-er-oh'-be-oh'-ik*, *an-ah'-er-oh'-be-us*) [see *Anaerobion*]. Capable of existing without free oxygen.

Anæsthesia (*an-es-thē'-ze-ah*) [see *Anesthesia*].

Anæsthetic (*an-es-thē'-tik*) [see *Anesthesia*].

Anagoge, Anagogia (*an-ah'-go'-je*, *an-ah'-go'-je-ah*) [*anagōgē*, a bringing up]. Vomiting. **A. hæmatis, A. sanguinis**, a rush of blood to the head.

Anagraph (*an'-a-graf*) [*anagraphe*, a writing out]. A physician's prescription or recipe.

Anakusis (*an-ah-oot'-is*) [see *Anacusia*].

Anal (*ah'-nah*) [*ana*, the fundament]. Pertaining to the anus.

Analdis (*anal'-de-ah*) [see *Murasmus*].

Analepsia (*anal-ep'-se-ah*) [see *Analeptic*].

Analeptic (*anal-ep'-tik*) [see *Analepsia*]. 1. Recovery of strength after disease. 2. Suspension, as in a swing. 3. Epilepsy with gastric aura.

Analeptic (*anal-ep'-tik*) [*ἀναλεπτικός*, restorative]. 1. Restorative. 2. Any agent restoring health after illness.

Analgen (*anal'-jen*) [*án*, priv., *algos*, pain]. $C_8H_8N_2O_2$. A white, tasteless, crystalline powder, almost insoluble in water, soluble with difficulty in cold alcohol, but more readily in hot alcohol and dilute acids. It melts at 406.3° F. It is employed as an analgesic, antirheumatic, and antipyretic. Dose 10-30 gr. (0.65-2.0 Gm.).

Analgesia (*anal-jē'-ze-ah*) [see *Analgen*]. Insensitivity to or absence of pain. **A. panaria**. Synonym of *Morvan's disease*.

Analgesic (*anal-jē'-sik*) [see *Analgen*]. 1. Anodyne, relieving pain. 2. Affected with analgesia. 3. A remedy that relieves pain.

Analgesin (*anal'-je-sin*) [see *Antipyrin*].

Analgetic (*anal'-jek*) [see *Analgen*]. Analgesic.

Analgin (*anal'-jin*) [see *Analgen*]. Synonym of *Cresdin*.

Analog (*an'-al-og*) [*análogos*, conformable].

A part or organ having the same function as another, but with a difference of structure. The correlative term, *homolog*, denotes identity of structure with difference of function. The wing of the butterfly and that

of the bird are *analogous*, but the wing of a bird and the arm of a man are *homologous*.

Analogous (*an-ah'-o-gus*) [see *Analog*]. Corresponding to, proportionate, answering to.

Analysis (*an-ah'-is-is*) [*ánalyssis*, to unloose].

The resolution of a compound body into its constituent parts. **A.**, **Absorptiometric**, the determination of the composition of gaseous bodies by observation of the amount of absorption which occurs on exposure to a liquid in which the coefficient of absorption of different gases is already known. **A.**, **Gasometric**, the determination of the constituents of gaseous compounds, especially the determination of the amount of oxygen in specimens of atmospheric air. **A.**, **Gravimetric**, the quantitative determination, by weight, of the elements of a body. **A.**, **Indirect**, a quantitative estimation of the elements of a compound obtained not by isolating them, but by using them to form new combinations and observing the relation of the molecular weight of these to that of the original body. **A.**, **Organic**, the determination of the elements of matter formed under the influence of life. The analysis of animal and vegetable tissues. **A.**, **Proximate**, the determination of the simpler compound into which a substance may be resolved. **A.**, **Qualitative**, the determination of the nature of the elements that compose a body. **A.**, **Quantitative**, the determination of the proportionate parts of the various elements of a compound. **A.**, **Radiation**, a method of analysis based upon discoveries of Becquerel and taking advantage of the comparative radioactivity of various metals. **A.**, **Spectral**, the determination of the composition of a body by means of the spectroscopic. **A.**, **Ultimate**, the resolution of a compound into its ultimate elements. **A.**, **Volumetric**, the quantitative determination of a constituent by volume. **A.**, **Wet**, analysis conducted by means of solutions and precipitations.

Analyzer (*an-ah'-i-zer*) [see *analysis*]. 1. An analyzer. 2. In microscopy, the Nicol prism, which exhibits the properties of light after polarization. 3. An apparatus for recording the variations of tremor movements.

Anamid (*an-ah'-mid*) [*án*, priv.; *amid*]. A compound formed from an amid by abstracting the ammonia.

Anemirta (*an-ah'-m-er'-ta*). A genus of *Menispermaceae*. 1. *punculata*, or *Menispermum punctata*, is the source of *corallus indicus*.

Anamnesis (*an-ah'-m-eh'-sis*) [*ánamnēsis*, a recalling to mind]. 1. The faculty of memory, recollection. 2. That which is remembered, information gained from the patient regarding the past history of a case.

Anamnestic (*an-ah'-m-eh'-stik*) [see *Anamnesis*]. 1. Remembering. 2. Restorative of the memory.

Anamnestic (*an-ah'-m-eh'-stik*) [*án*, priv.; *ánamnēsis*, to recall]. Without an anamion.

Ananabasis (*an-ah'-m-eh'-stik*) [*án*, priv.;

ánabasis, an ascending]. A form of abulia manifested by incapacity to ascend heights.

Ananastasia (*an-ah'-m-eh'-stia*) [*án*, priv.; *ánabasis*, a rising up]. A form of abulia characterized by inability to rise from a sitting posture.

Anandria (*an-ah'-dri-ah*) [*án*, priv.; *ánandria*, man]. Lack of virility; impotence.

Anapeiratic (*an-ah'-p-er'-atik*) [*ánapeiratikos*, to do again]. A condition due to excessive use of certain parts, or of certain muscles, as in writers' and in telegraphers' cramp.

Anaphases (*an-ah'-p-eh'-sēz*) [*án*, up, *phasis*, a phase]. The phenomena of karyokinesis immediately preceding the formation of the daughter-stars, and up to the formation of the resting daughter-nuclei.

Anaphia (*an-ah'-feh-ah*) [*án*, priv.; *ánaphia*, touch]. 1. Defective sense of touch. 2. A state of abnormal sensitiveness to touch. 3. A state in which nothing is learned by palpation.

Anaphora (*an-ah'-p-eh'-ah*) [*ánaphora*, a bringing up]. 1. A bringing up, as by coughing. 2. Recovery from illness. 3. Rush of blood to the head. 4. A violent inspiration or respiration.

Anaphoresis (*an-ah'-p-eh'-ah*) [*án*, priv.; *ánaphora*, to carry]. A diminution in the activity of the sweat-glands.

Anaphoria (*an-ah'-p-eh'-ah*) [see *Anaphoresis*]. An upward tendency of the eyes and of the visual axes.

Anaphrodisia (*an-ah'-p-eh'-ah*) [*án*, priv.; *ánaphrodisia*, Venus]. Absence or impairment of sexual appetite.

Anaphrodisiac (*an-ah'-p-eh'-ah*) [see *Anaphrodisia*]. 1. Relating to, affected by, or causing anaphrodisia. 2. An agent that allays the sexual desire.

Anaphylactic (*an-ah'-fil-ah'-tik*) [*án*, priv.; *ánaphylaxis*, a guardian]. 1. Having the property of diminishing immunity instead of reinforcing it. 2. A serum which diminishes immunity.

Anaphylaxis (*an-ah'-fil-ah'-tik*) [see *Anaphylaxis*].

Anaphylaxy (*an-ah'-fil-ah'-tik*) [see *Anaphylaxis*]. Induction of disease, specifically, an intoxication resulting from the union of a foreign substance with antibodies produced by previous introduction of the same substance, opposed to prophylaxy.

Anaplasia (*an-ah'-plah'-ah*). The tendency of certain tissues toward reversion to an earlier or embryonal type.

Anaplastic (*an-ah'-plah'-ah*) [*án*, up, *ánaplastos*, to build up]. 1. Relating to anaplasty, restoring a lost or defective part. 2. Agent that facilitates repair.

Anaplasty (*an-ah'-plah'-ah*) [see *Anaplasty*]. An operation for the restoration of lost parts; plastic surgery.

Anapnograph (*an-ah'-p-eh'-ah*) [*ánapnōgraphos*, respiration, *graphein*, to write]. An apparatus registering the movements of (1) inspiration and expiration, (2) the quantity of air inhaled.

Anapnoic (*an-ah'-p-eh'-ah*) [*án*, against, *ánapnoia*, want of breath]. Relieving dyspnea.

Anapophysis (*an-ah'-p-eh'-ah*) [*án*, back; *ánapophysis*, an offshoot]. An accessory process of a lumbar or dorsal vertebra, corresponding to

the inferior tubercle of the transverse process of a typical dorsal vertebra.

Anarthria (*an-ar'-thre-ah*) [*dv*, priv.; *ἀρθρον*, articulation]. 1. Defective articulation. 2. Absence of vigor. **A. centralis**, partial aphasia due to central lesion. **A. literalis**, stammering.

Anasarca (*an-ah-sar'-kah*) [*ἀνά*, through; *σάρξ*, the flesh]. An accumulation of serum in the subcutaneous areolar tissues of the body. Syn., *Catasarca*; *Episarcidium*; *Hydrodermus*; *Intercus*; *Hydrops cellularis*. **A.**,

Acute, a form in which the flesh preserves its normal color and the depression made by the finger disappears quickly. **A. a fluxu**, that due to loss of body-fluids, as in diarrhea or diabetes. **A. americana**, a South American disease marked by sleepiness, headache, debility, and swelling of the abdomen, said to be due to the ingestion of sea-crabs. **A., Essential**, that due to malnutrition. **A. exanthematica**, that attributed to the suppression of an exanthem, especially erysipelas. **A. urinosa**, that due to suppression of urine. Syn., *Urinary leukophlegmasia*.

Anasarcin (*an-ah-sar'-sin*). A remedy for dropsy, said to consist of the active principles of *Oxydendron arboreum*, *Sambucus nigra*, and *Urginea scilla*.

Anasarcous (*an-ah-sar'-kus*) [see *Anasarca*]. Affected with anasarca.

Anaspadias (*an-as-pa'-de-as*) [*ἀνά*, up; *σπάειν*, to draw]. A urethral opening upon the upper surface of the penis.

Anaspasis (*an-ah-spa'-sis*) [see *Anaspadias*]. 1. A contraction. 2. Revulsion.

Anastaltic (*an-as-tal'-tik*) [*ἀνασταλτικός*, checking; putting back]. 1. Strongly astringent. 2. Centripetal; afferent.

Anastasis (*an-as'-tas-is*) [*ἀνάστασις*, a setting up]. 1. Recovery; convalescence. 2. An upward afflux of the body humors. 3. Resuscitation of one apparently dead.

Anastatic (*an-as-tat'-ik*) [see *Anastasis*]. Tending to recovery, restorative.

Anastigmatic (*an-ah-stig-mat'-ik*). Free from astigmatism; said especially of photographic objectives which are corrected for astigmatism as well as for spheric and chromatic aberration.

Anastole (*an-as'-to-le*) [*ἀνατολή*, retracted]. Retraction; shrinking away, as of the lips of a wound.

Anastomosis (*an-as-to-mo'-sis*) [*ἀναστροφή*, to bring to a mouth]. 1. The intercommunication of blood-vessels. 2. The establishment of a communication between two hollow parts or between two distinct portions of the same organ. See **A., Intestinal**. 3. A whetting of the appetite. **A., Crucial**, an arterial anastomosis in the upper part of the thigh, formed by the anastomotic branch of the sciatic, the first perforating, the internal circumflex, and the transverse branch of the external circumflex arteries. **A., Entero-**. See *Enteroanastomosis*. **A., Hyrtl's**, the

transection of two arteries. Syn., *Dehiscencia decussantium*. **A., Intestinal**, an operation consisting in establishing a communication between two parts of the intestine. **A., Jacobson's**, the tympanic plexus.

Anastomotic (*an-as-to-mo'-ik*) [see *Anastomosis*]. 1. Pertaining to anastomosis. 2. Sharpening the appetite. 3. Aperient. 4. Causing dilation of the peripheral blood-vessels. 5. A communicating artery or vein. See under *Artery* and under *Vein*.

Anastomotica (*an-as-to-mo'-ik-ah*). 1. A communicating artery or vein. 2. Tonic, aperient, or deobstruent medicines. **A. magna**. See under *Artery*.

Anastomotris (*an-as-to-mo'-tris*) [L., pl. *anastomatrides*]. Any kind of a dilating instrument.

Anastrophe (*an-as'-tro-fe*) [*ἀναστρέφειν*, to turn upside down]. Inversion, particularly of the viscera.

Anatherapeusis (*an-ath-er-a-p-u'-sis*) [*ἀνά*, up; *θεραπεύω*, medical treatment]. Treatment by increasing doses.

Anatomic (*an-at-om'-ik*) [*anatomy*]. Pertaining to anatomy. **A. Tubercle**. See *Tubercus necrogenica*.

Anatomicopathologic, Anatomopathologic (*an-at-om-ik-a-path-o-loj'-ik*, *an-at-om-a-path-o-loj'-ik*). Pertaining to anatomy and pathology.

Anatomist (*an-at-om-ist*) [see *anatomy*]. One who is skilled in anatomy.

Anatomy (*an-at'-o-me*) [*ἀνατομή*]. The science of the structure of organs or of organic bodies. **A., Applied**, anatomy as concerned in the diagnosis and treatment of pathologic conditions. **A., Comparative**, the investigation and comparison of the anatomy of different orders of animals or of plants, one with another. **A., Descriptive**, a study of the separate and individual portions of the body, apart from their relationship to surrounding parts. **A., Gross**, anatomy dealing with the naked-eye appearance of tissues. **A., Homologic**, the study of the correlations of the several parts of the body. **A., Medical**, the application of anatomy to a study of the causation and symptomatology of non-surgical diseases. **A., Microscopic**, **A., Minute**, that studied under the microscope. **A., Morbid**, **A., Pathologic**, a study of diseased structures. **A., Physiognomonic**, the study of expressions depicted upon the exterior of the body, especially upon the face. **A., Practical**, dissection. **A., Regional**, a study of limited parts or regions of the body, the divisions of which are collectively or peculiarly affected by disease, injury, operations, etc. **A., Surgical**, the application of anatomy to surgery. **A., Topographic**, the anatomy of a part in its relation to other parts. **A., Veterinary**, the anatomy of domestic animals.

Anatresis (*an-at-re'-sis*) [*ἀνατρέφω*, to bore through]. Perforation; trephining.

Anatrispsis (*an-at-rip'-sis*) [*ἀνατριψέω*, a rubbing]. 1. Rubbing; the removal of a part,

or growth by scraping or rubbing; inunction. 2. An upward or centripetal movement in massage. 3. A crushing, as of calculi. 4. Rubbing, scratching to allay itching.

Anatriptic (*an-at-rip'tik*) [see *Anatripsis*]. A medicine to be applied by rubbing.

Anaxon, Anaxone (*an-ak'-on*) [*ax*, priv.; *axis*]. A neuron devoid of axis-cylinder processes. See *Anaxone cell*.

Anazotic (*an-azot'-ik*) [*az*, priv.; *azotum*, nitrogen]. Without azote or nitrogen.

Anazoturia (*an-azot-ur'-e-ah*) [*az*, priv.; *azotum*, nitrogen; *ur*, urine]. A condition of deficient excretion of nitrogen in the urine, the urea being chiefly diminished.

Anchone (*ang'-kone*) [*an*, priv.; *to strangle*]. A spasmodic constriction of the throat observed in hysteria.

Anchoralis (*an-ko-ra'-lis*) [*ancora*, an anchor]. The articular process of the ulna.

Anchusin (*ang'-kustin*) [*dykama*, alkanet], *C₂₂H₁₆O₄*. The red coloring-matter found in alkanet root. See *Alkanet*.

Anchyloglossia (*ang-kil-o-glos'-e-ah*). See *Anchyloglossum*.

Anchylosis (*ang-kil-o'-sis*). See *Ankylosis*.

Anchylostomiasis (*ang-kil-o-sto-mi'-as-is*). See *Anchylostomum*.

Anchylostomum (*ang-kil-o-sto-mum*). See *Anchylostoma*.

Antipital (*an-tip'-it-al*) [*anteps*, double]. Two-sided.

Antistrum (*an-tis'trum*) [*dykastrov*, a fish-hook]. A surgical hook.

Anconagra (*ang-kon-a'-grah*) [*dykron*, the elbow; *agra*, a suture]. Arthritic pain at the elbow.

Anconal, Anconéal (*ang-kon-al*, *ang-ko'-ne-al*) [*ancon*, the elbow]. Pertaining to the elbow.

Anconeus (*ang-kone'-us*). See under *Muscle*.

Anceyroid (*an-ey-roid*) [*dykrovi*, anchor; *eidōs*, to a]. Shaped like an anchor.

Andernach's Ossicles. See *Wormian Bones*.

Andersch's Ganglion. The petrosal ganglion.

A's Nerve. See *Isaiah's Nerve*.

Anderson's Pill. The compound gamboge pill. **A's Reaction for Distinguishing between Quinolin and Pyridin Salts**, the color-reactions of the latter, when boiled with water, are changed into insoluble double salts with the elimination of hydrogen chlorid, whereas the former remain in solution.

Andral's Decubitus. The position usually assumed in the early stage of pleurisy by the patient, who seeks to alleviate the pain by lying on the sound side.

Andreasch's Reaction for Cystein. To the hydrochloric acid solution add a few drops of dilute ferric chlorid solution and then ammonium. The liquid will become a dark purplish red.

Androgallactozemia (*an-dro-gal-ak-to-ze'-me-ah*) [*an*, priv.; *man*, *gala*, milk; *zēma*, loss]. The oozing of milk from the male mamma.

Androgyna (*an-dro'-in-ah*) [*aner*, *gynē*, woman]. A hermaphrodite; a female in

whom the genital organs are similar to those of the male.

Androgyneity (*an-dro'-in-e-it-e*) [see *Androgyna*]. Hermaphroditism.

Androgynus (*an-dro'-in-us*) [see *Androgyna*]. A hermaphrodite. A male with genital organs similar to those of the female.

Androlepsia (*an-dro-lep'-si-ah*) [*dydpatēsin*, a seizure of men]. The process of fecundation in the female.

Andrology (*an-dro'-o-je*) [*an*, priv.; *man*, *λόγος*, science]. 1. The science of man, especially of the male sex. 2. The science of the diseases of the male genitourinary organs.

Andromania (*an-dro-ma'-ne-ah*) [*aner*; *mania*, madness]. Nymphomania.

Androphobia (*an-dro-fa'-be-ah*) [*aner*; *phobos*, fear]. Fear or dislike of the male sex.

Androsymphysis, Androsymphysis (*an-dro-sim'-e-ah*, *an-dro-sim'-e-ah*) [*aner*, *syn*, together; *phēv*, to grow]. 1. A monstrosity formed by the fusion of two male fetuses. 2. The growing together of the male genitalia.

Anecpyetous (*an-ek-pi-e'-tus*) [*dyekpētous*]. 1. Not suppurating. 2. Preventing suppuration; insuppurable.

Aneceus (*an-e'-de-us*) [*an*, priv.; *aideia*, the genitals]. Lacking genital organs.

Anel's Operation for Aneurysm. Ligation on the cardiac side close to the aneurysm.

A's Probe, A's Sound, a fine probe used in operations upon the lacrimal passages.

A's Syringe, a syringe used in injecting fluids into the lacrimal passages.

Anelectrode (*an-el-ek'-trōd*) [*an*, upward; *electrode*]. The positive pole of a galvanic battery.

Anelectrotonic (*an-el-ek-tro-ton'-ik*) [*an*, priv.; *dyektron*, electricity; *tonos*, tension]. Relating to anelectrotonus.

Anelectrotonus (*an-el-ek-tro'-o-nus*) [see *Anelectrotonic*]. The decreased irritability that is present in a nerve in the neighborhood of the anode.

Anemia (*an-e'-me-ah*) [*an*, priv.; *aima*, blood]. Deficiency of blood as a whole, or deficiency of the number of the red corpuscles or of the hemoglobin. It may be *general* or *local*. Local anemia, or *ischemia*, is the result of mechanic interference with the circulation of the affected part. General anemia is either idiopathic or symptomatic. **A.**, **Addison's**, **A.**, **Biermer's**. See *Pernicious Anemia*. **A.**, **Cytogenic**. Synonym of *A.*, *Idiopathic*. **A.**, **Essential**. Synonym of *A.*, *Idiopathic*. **A.**, **Idiopathic**, a form in which the lesion is in the blood or in the blood-making organs. **A.**, **Lymphatic**. Synonym of *Hodgkin's disease*. See *Lymphadenoma*. **A.**, **Malignant**. See *Pernicious Anemia*. **A.**, **Myelogenous**, anemia attended with hyperplasia of myelogenous tissue. **A.**, **Paludal**, anemia associated with or caused by malaria. **A.**, **Pernicious**. See *Pernicious Anemia*. **A.**, **Primary**. See *A.*, *Idiopathic*. **A.**, **Secondary**, that due to a distinct cause, as hemorrhage, cancer, wast-

ing discharges, poisons, etc. Syn., *Symptomatic anemia*. **A., Splenic**, chronic anemia with enlarged spleen, blood-changes, chloranemia, leukopenia, hemorrhages from the stomach, and pigmentation of the skin.

Anemic (*an-em'ik*) [see *Anemia*]. Pertaining to anemia. **A. Infarct**, a wedge-shaped area of coagulation-necrosis occurring in organs possessing terminal arteries. It is the result of the sudden stopping of such an artery by a thrombus or an embolus. **A. Murmur**, a murmur heard in anemic conditions, soft and blowing in character, and disappearing with the anemia. It is generally heard over the base of the heart. **A. Necrosis**, the coagulation-necrosis of tissues resulting from the sudden stoppage of the supplying artery.

Anemone (*an-em'-o-ne*) [*ἀνέμων*, the wind-flower]. A genus of ranunculaceous herbs, most of which have active medicinal and poisonous qualities. See *Pulsatilla*.

Anemonin (*an-em'-o-nin*) [see *Anemone*]. $C_6H_8O_3$. The active principle of the anemone. It is given in bronchitis, asthma, and spasmodic cough. Dose $\frac{1}{2}$ gr. (0.016-0.048 Gm.) twice daily.

Anemopathy (*an-em-op'-ath-e*) [*ἀνέμος*, wind, pathos, disease]. Therapeutic treatment by inhalation.

Anemidria, Anæmydria (*an-em'id'-re-ah*) [*ἀν*, priv.; *αἷμα*, blood; *ἵδω*, water]. Insufficiency of the watery element in blood.

Anencephalia (*an-en-sef'-al'-de-ah*). **Anencephalic** (*an-en-sef'-al'-ik*) [*αν*, priv.; *ἐγκεφαλον*, brain]. Absence of the brain.

Anencephalus (*an-en-sef'-al-us*) [see *Anencephalia*]. A species of single autositic monsters in which there is no trace of the brain.

Anergia (*an-er'-je-ah*) [*ἀν*, priv.; *ἐργον*, work]. Sluggishness; inactivity.

Anergic (*an-er'-jik*) [see *Anergia*]. Characterized by sluggishness; as, *anergic dementia*.

Aneroid (*an'-er-oid*) [*ἀν*, priv.; *υγρός*, wet; *εἶδος*, form]. Working without a fluid. **A. Barometer**. See *Barometer*.

Anerythroptia (*an-er'-ith-rof'-se-ah*) [*ἀν*, priv.; *ἐρυθρός*, red; *ὄψις*, sight]. Impaired color-perception of red.

Aneson (*an-es-on*). See *Acetone Chloroform*.

Anæsthesia, Anæsthesia (*an-es-the'-sin'-e'-sis*) [*ἀν*, priv.; *αἰσθάναι*, feeling; *κίνησις*, movement]. A condition marked by loss of sensibility and motor capacity.

Anesthesia, Anæsthesia (*an-es-the'-ze-ah*) [*ἀναίσθητος*, want of feeling]. A condition of total or partial insensibility, particularly to touch. **A. angiospas'tica**, loss of sensibility due to spasm of blood-vessels. **A., Bul'bar**, that due to a lesion in the medulla oblongata. **A., Central**, due to disease in the nerve-centers. **A., Cerebral**, that due to disease of the cerebrum. **A., Crossed**, anesthesia on one side of the body, due to a central lesion of the other side. **A., Disso'ciated**, loss of pain and temperature sensations, the tactile sense being still present. **A. dolorosa**, severe pain

experienced after the occurrence of complete motor and sensory paralysis, a symptom observed in certain diseases of the spinal cord.

A., Dolorous (of Liebreich), the transient but painful anesthesia produced by the injection of water in sufficient quantity to celeratize the papillary layer of the derm and subjacent layers. The pain is due to the inhibitory swelling of the cells. **A., Efferent**, that due to disorder of the nerve-terminations, disturbing their conductivity. **A., Electric**, anesthesia caused by the passage of an electric current through a part. **A., Facial**, anesthesia of those parts to which the sensory branches of the fifth cranial nerve are distributed.

A., General, anesthesia of the entire body, including the abolition of all perceptive power with consequent loss of consciousness. **A., Girdle**, a zone of anesthesia encircling the body, due to circumscribed disease of the spinal cord. **A., Infiltration-**, local anesthesia effected by subcutaneous injections.

A., Javanese, that produced by pressure upon the carotids. **A., Korff's**. See under *Anesthetic*. **A., Local**, that limited to a part of the body. **A., Mixed**, that partially produced and prolonged by the administration of morphin or other cerebral anodyne before the anesthetic is given. **A., Muscular**, loss of the muscular sense. **A., Peripheral**, that depending upon changes in the peripheral nerves. **A., Primary**, a temporary insensibility to slight pain occurring in the beginning of anesthesia and during which minor operations can be performed. **A., Surgical**, that induced by the surgeon by means of anesthetics for the purpose of preventing pain, producing relaxation of muscles, or for diagnostic purposes.

Anesthesin (*an-es-the'-sin*),

$C_6H_4(COOCH_3)_2$. E. Riiser's name for

paramidobenzoic acid ester, it is used as a local anesthetic.

Anesthetic (*an-es-the'-ik*) [see *Anesthesia*].

1. Without feeling, insensible to touch or pain.

2. A substance that produces insensibility to touch or to pain, diminished muscular action, and other phenomena. Anesthetics may be general, local, partial, and complete. **A., General**, one used for securing general anesthesia. The following substances have been used for this purpose: AMYLENE, C_6H_{10} (*pen-tal*), a thin, colorless, translucent liquid, action rapid, producing partial anesthesia. It should not be brought near a flame. CARBON TETRACHLORIDE, not so irritating to the organs of respiration, but far more dangerous than chloroform. CHLORAL HYDRATE, action indirect and incomplete, and now rarely, if ever, used. CHLOROFORM, by inhalation. Largely employed in general surgery. It seems to have a selective action upon the nervous system, and also exercises a direct influence upon the muscular tissues of the heart. It paralyzes the vasomotor system, and death results from cardiac

paralysis. Chloroform should always be administered freely mixed with air. The *Edinburgh Method* of administering chloroform consists in giving as little of the anæsthetic as will bring about rapid and complete narcosis, as evinced by lack of reflexes and muscular excitability. *Frank-Rosenberg's Method*, the preliminary cocaineization of the nares before the use of chloroform, same as *Gerster's Method*. The *Lister Method*, also known as the *Scotch or Open Method*, consists in pouring a small amount of the anæsthetic upon a common towel arranged in a square of 6 folds, and holding this as near to the face as can be borne without inconvenience. *Wohlgemuth's Method*, the use of oxygen combined with chloroform by means of a special apparatus; also called the *chloroform-oxygen method*. **ETHYLENE CHLORID**, formerly called *ethylene chlorid*, *Dutch liquid*, *chloric ether*, closely resembles chloroform, but is less depressant on the heart, and is considered safer than chloroform. Death results from paralysis of the respiratory centers. **ETHER**, by inhalation, is probably the safest known agent for the production of prolonged narcosis. Its action is directed largely to the nervous system, which becomes profoundly affected. It frequently causes spasmodic action and suspension of respiration. Death results from paralysis of respiration. It may be administered alone or in combination with various acid gas, in which case the patient is more rapidly narcotized. In *Cole's Method* of administering ether the anæsthetic is preceded by inhalation of nitrous oxide gas. *Kocher's Method*; *Poitou-Duplessy's Method*; the use of ethyl bromid as a preliminary to etherization. The *Schleich Method* for general anesthesia consists in the administration of small doses of chloroform, petroleum ether, and sulfuric ether. **ETHYLENE CHLORID** is similar in its action to chloroform. Patients take a longer time to recover consciousness than when chloroform is used, but they experience fewer after-effects. Anæsthetization occurs in from 3 to 5 minutes. **HYDROBROMIC ETHER** (*ethyl bromid*) produces unconsciousness and anesthesia in one minute, and complete muscular relaxation in 2 or 3 minutes. The heart's action is somewhat weakened. Return to consciousness after withdrawal of the ether is very prompt. Its use may be followed by vomiting. According to some observers, death results from cardiac failure, while others believe it kills by direct action upon the respiratory center. It is best administered by an Allis inhaler, and is of most service in minor surgery for short operations. **NITROUS OXID**, by inhalation, is much used by dentists as an anæsthetic in the extraction of teeth. The symptoms resemble those of asphyxia, hence it is more important to watch the respiration than the pulse. It may be employed in minor surgical

operations. There are but few after-effects, those most often observed being headache and malaise. **A. (General) Mixtures**, contain combinations of substances for producing anesthesia. The following are the most important: **A. C. E. MIXTURE**: Alcohol, sp. gr. 0.838, 1 part; chloroform, sp. gr. 1.497, 2 parts; ether, sp. gr. 0.735, 3 parts. **BILLROTH'S**: Chloroform, 3 parts; alcohol and ether, each, 1 part. **LINHART'S**: Alcohol, 1; chloroform, 4. It is administered similarly to chloroform. **MARTINDALE'S**: A volumetric mixture, the ingredients of which evaporate almost uniformly; it consists of absolute alcohol, sp. gr. 0.795, 1 volume; chloroform, sp. gr. 1.498, 2 volumes; pure ether, sp. gr. 0.720, 3 volumes. **MEDICO-CHIRURGICAL SOCIETY OF LONDON**: Ether, 3; chloroform, 2; alcohol, 1. **METHYLENE or METHYLENE BICHLORID**: A mixture of methylic alcohol 30% and chloroform 70%. The so-called "*liquid of Régnault*" consisted of 80% chloroform, 20% methylic alcohol. Methylene is not much used, several deaths from cardiac paralysis having occurred from its employment. **M. S. MIXTURE**: Ether, 57 parts; chloroform, 43 parts. **NUSSBAUM'S**: Ether, 3; chloroform, 1; alcohol, 1. **RICHARDSON'S**: Alcohol, 2; chloroform, 1, ether, 3. **SANFORD'S**: The so-called "*chlaramyl*" is a mixture of chloroform and amyl nitrite in the proportion of 2 drams of the nitrite to the pound of chloroform. It is a dangerous mixture, both drugs depressing the heart. **VIENNA GENERAL HOSPITAL**: Ether, 9; chloroform, 30; alcohol, 9. **VIENNA MIXTURE**: Ether, 3; chloroform, 1. **VON MERING'S**: Chloroform, 1 volume; dimethylacetal, 2 volumes. It is said not to produce failure of respiration or of heart nor lowering of the blood-pressure. **WACHMUTH'S**: One-fifth part of oil of turpentine is added to the chloroform. It is said to prevent any danger of heart-failure. **A., Local**, an anæsthetic that, locally applied, produces absence of sensation in the organ or tissue so treated. **ALCOHOL**, locally, removes sensation to pain, while tactile sense persists. Cool the alcohol to about 10° below the freezing-point, by placing it in ice and salt, and place the part to be numbed in it. **CHLOROETHYL**, in vapor form, is useful in minor and dental surgery. **CHLORID OF METHYL**, CH_3Cl , allowing the liquid chlorid to drop on the skin or mucous membrane. Unless kept carefully under control, the vitality of the tissues may be affected by the substance. **COCAIN** is used in subcutaneous injections by painting over mucous or cutaneous surfaces, or, in the case of the eye, by instillation. As a paint, a 20% solution is used, weaker preparations being of little value over cutaneous surfaces, several coats are necessary. A 10% solution should be used on mucous surfaces; for the eye, a 2 to 4% solution will answer, and this solution is strong enough when

cocain is employed as a spray. Hypodermatically, 2-5 min. (0.12-0.3 Cc.) of a 10 to 20% solution are usually injected, and this may be repeated 2 or 3 times during the operation. **DISULFID OF CARBON**, by spray or irrigation, is a local anesthetic, but has a disgusting odor and is a powerful poison. **ETHER**, in spray, is also a local anesthetic. The anesthesia thus produced is confined to the skin and is very transient. It may produce a slough from excessive freezing. **HYDROGEN DIOXID** injected under the epidermis is recommended for complete and immediate anesthesia. **ISOTONIC SOLUTION**, in anesthesia, any solution of the same specific gravity and the same freezing-point as the normal tissue, it can be employed without causing pain from osmotic disturbances. **PAINON** painted over the skin—its action, however, is caustic. **RIBBOLINE**, in spray, is used in a manner similar to that of ether. **Bernard's Method** of local anesthesia. Same as **Nussbaum's Method**. In **Cocci's Mixed Morphin-cocain Method** the local anesthetic action of an analgesic drug is preceded or supplemented by the action of morphin or other cerebral anodyne. The **Corning-Bier Method** consists in the injection of a solution of cocain hydrochlorid into the subarachnoid space through a puncture made in the lumbar or lumbosacral region. **Crois's Blocking Method** is identical in principle and technic with the Corning-Bier method, except that it is applied at a higher level, by injecting the brachial plexus in the supraclavicular space. **Cushing's Method**, the morphin-cocain-chloroform anesthesia, in addition to a preliminary hypodermatic injection of morphin the local anesthetic action of cocain or other local analgesic is preceded or supplemented by the effects of a general inhalation anesthetic, such as chloroform. **Implantation, Neural Method**, preliminary infiltration of the derm precedes the cocainization of the nerve-fibers which supply the area of the operation. **Intraneural Method**, after preliminary anesthesia of the skin the large nerve trunks that supply the region are brought to view by dissection and directly injected with the needle. **Korff's Method**, a modification of Schneiderlin's, in that the use of hypodermatic injections of neopolum hydrobromid, $\frac{1}{2}$ gr. to 1 mg., and morphin, $\frac{1}{2}$ gr. to 0.9 gr., is followed by the administration of a few drops of chloroform by the mask. **Krogin's Method**. Same as **Oberst's Method**. **Kummer's Method**, the application of an elastic constriction to intensify the action of ether spray. **Oberst's Method**, the injection of a weak solution of cocain along the nerve-trunks supplying the parts. **Paraneural Method**, the anesthetizing solution is injected in the vicinity of the nerve-trunk, or as closely as possible to the nerve supplying the area of operation. **Schleich Infiltration Method**, is produced by the hypodermatic

injection of cocain combined with a weak salt solution, and by the addition of a little morphin the anesthetic action is prolonged. (Cocain hydrochlorid, 14 gr. (0.007 Gm.), morphin hydrochlorid, $\frac{1}{2}$ gr. (0.02 Gm.), common salt, 3 gr. to 10 Gm.), dissolved in 3 cc. and 3 dr. (100 Cc.) of sterilized water.) **Schneiderlin's Method**, the use of a combination of neopolum hydrobromid (thymon hydrobromid) $\frac{1}{2}$ gr. (0.005 mg.), and morphin, $\frac{1}{2}$ gr. (0.005 gr.). To be administered hypodermatically and repeated after 1 or 2 hours. It is asserted to be absolutely free from danger to life. **Scopolamin-morphin**. See **Korff's Method**. **Spinal Subarachnoid Method**. See **Corning-Bier Method**. **Tait and Cagliari's Method**, spinal cocainization by injection of cocain into the sixth cervical intervertebral space. **Tufter's Method**. See **Corning-Bier Method**. **A. (Local Mixtures):** **BAGOT'S MIXTURE**, contains cocain hydrochlorid, 0.04; spartein sulfate, 0.05; this is dissolved in 1 or 2 Cc. of boiled water. **BONAIN'S MIXTURE**, for anesthesia of the external surface of the tympanic membrane. Phenol, menthol, cocain hydrochlorid, of each, 1.0; or phenol, 2.4; menthol, 0.5; cocain hydrochlorid, 1.0. **HEINZE AND BRAUN'S SOLUTION** for general infiltration. β -eucain, 0.1; sodium chlorid, 0.8; distilled water, 100. **LOHMANN'S (W.) SOLUTION**, 4% β -eucain solution with 8% of sodium chlorid. **LUTENBERGER'S SOLUTION**, a 2.5% solution of nivanin. **RECLUS' SOLUTION**, a 2% β -eucain solution.

Anesthetization (an-es-the-ti-zay-shun) [*anesthetize*, *anesthesia*]. The act of placing under the influence of an anesthetic.

Anesthetize (an-es-the-tize) [see *Anesthetization*]. To put under the influence of an anesthetic.

Anesthetizer (an-es-the-tizer) [see *Anesthetization*]. One who administers an anesthetic.

Anesthyl (an-es-thyl). A local anesthetic said to consist of ethyl chlorid, 5 parts, methyl chlorid, 1 part.

Anethol (an'-eth-ol) [*anethum; oleum, oil*], $C_{10}H_{16}$. The chief constituent of the essential oils of anise and fennel. It is employed in preparing the *elixir anethi* (N. F.), being more fragrant and agreeable than the anise oil. **A., Liquid**, an isomeric modification of anethol, it is an antiseptic, on like liquid. **Syn., Isanethol**.

Anethum (an'-eth-um) [*anē, up, anētho, to burn, from the paucity of the seeds*]. Dill, the dried fruit of *Pencedonum graveolens*, indigenous to southern Europe. It is aromatic, carminative, and stimulant. Dose of the oil *oleum anethi* (B. P.) 1-4 min. (0.06-0.24 Cc.); of the water (*aqua anethi*, B. P.) 1-2 oz. (30-60 Cc.).

Anetodermia (an-et-o-der'-me-ah) [*anērēs, relaxed, flaccid, skin*]. Relaxation of the skin.

Aneuria (ah-nū'-re-ah) [*anē, priv.; νεῖρον, a nerve*]. Lack of nervous power.

Aneuric (ah-nū'-rik) [see *Aneuria*]. Characterized by aneuria.

Aneurysm (an'-u-rizm) [*ἀνεῤυσμα*, a widening] A circumscribed dilation of the walls of an artery. The symptoms of aneurysm depend upon the location of the aneurysmal tumor. Expansive pulsation and a bruit are important, very significant are the so-called pressure symptoms, which vary with the organ or part pressed upon. Syn., *Abscessus spiritus*.

A., Abdominal, an aneurysm of the abdominal aorta.

A., Active, cardiac dilation with hypertrophy.

A., Acute, an ulceration of the heart-wall which, by communicating with one of the

chambers of the heart, forms an aneurysmal pouch. **A., Ampullary**, a small saccular aneurysm, it is most common in the arteries of the brain. **A. by Anastomosis**, a dilation of a large number of vessels, small arteries, veins, and capillaries, the whole forming a pulsating tumor under the skin. This form of aneurysm is especially seen upon

the scalp. **A., Arteriovenous**, the simultaneous rupture of an artery and a vein, the blood from both being poured out into the cellular tissue and forming a false aneurysm. A *varicose aneurysm* is produced by the rupture of an aneurysm into a vein. An *aneurysmal varix* results from the establishment of a communication between an artery and a vein, the latter becoming dilated and pulsating. **A., Bell's**, aneurysmal varix. **A., Bérard's**, a varicose aneurysm with the sac in

ANEURYSMAL VARIX.—(Moul.)

the tissues immediately around the vein. **A., Cardiac**, an aneurysm of the heart. **A., Circumscribed**, an aneurysm, either true or false, in which the contents are still within the artery though there may be rupture of one or two of its coats. **A., Cirroid**, a tortuous

lengthening and dilation of a part of an artery. **A., Compound**, one in which one or several of the coats of the artery are ruptured and the others merely dilated. **A., Consecutive**, **A., Diffused**, follows rupture of all the arterial coats, with infiltration of surrounding tissues with blood. **A., Dissecting**, one in which the blood forces its way between the coats of an artery. **A., Ectatic**, an expansion of a portion of an artery due to yielding of all the coats. **A., Endogenous**, one formed by disease of the vessel-walls. **A., Exogenous**, one due to traumatism. **A., External**. 1. One remote from the great body-cavities. 2. One in which the cavity of the tumor is entirely or chiefly outside of the inner coat of the artery. **A., False**, **A., Spurious**, one due to a rupture of all the coats of an artery.

ANEURYSM LAID OPEN.—(Moulin.)

CIRROID ANEURYSM OF SCALP.—(Moulin.)

the effused blood being retained by the surrounding tissues. **A., Fusiform**, a spindle-shaped dilation of an artery. **A., Hernial**, one in which the internal coat of the artery, with or without the middle coat, forms the aneurysmal sac which has forced its way through an opening in the outer coat. **A., Lateral**, an aneurysm projecting on one side of a vessel, the rest of the circumference being intact. **A., Miliary**, a sac-like dilation of an arteriole, often the size of a pin's head. **A., Mycotic**, one due to the growth of bacteria in the vessel-wall. **A., Osteoid**, a pulsating tumor of a bone. **A., Park's**, a variety of arteriovenous aneurysm in which the arterial dilation communicates with two contiguous veins. **A., Partial**. 1. See *A., Lateral*. 2. An aneurysmal dilation of a portion of the heart. **A., Passive**, **A., Passive Cardiac**, cardiac dilation with thinning of

the heart-wall. **A., Peripheral, A.,** Peripheric, one involving the whole circumference of an artery. **A., Pott's.** Same as *Aneurysmal Varix*. **A., Racemose.** See *A., Circoal*. **A., Rasmussen's,** dilation of an artery in a tuberculous cavity, its rupture is a frequent cause of hemorrhage. **A., Rodrigues',** a varicose aneurysm in which the sac is immediately contiguous to the artery. **A., Sacculated,** a sac-like dilation of an artery communicating with the main arterial trunk by an opening that is relatively small. **A., Spurious.** See *A., Pulse*. **A., Subclavicular,** an aneurysm of the axillary artery at a point too high to admit of ligation below the clavicle. **A., Surgical.** See *A., External*. **A., True,** one in which the sac is formed of one, two, or all of the arterial coats. **A., Varicose.** See under *A., Arterioscious*.

Aneurysmal (an-u-riz'-mal) [see *Aneurysm*]. Of the nature of or pertaining to an aneurysm. **A. Varix.** See under *Aneurysm, Arterioscious*.

Anex (an'-eks) An abbreviation of *anode excitation*.

Angio- (an-je-o-). See *Angio-*.

Angelica (an-jel'-ik-ah) [L.]. The seeds and root of *Angelica archangelica*. It is an aromatic stimulant and emmenagogue. Dose of the seeds or roots 30 grs.-1 dr. (2-3 Gm.).

Angel's Wing (an'-jels wing) A deformity of the scapula in which it turns forward and then backward, giving the shoulder a peculiar dorsal bulge.

Angi- (an-je-). Inguinal buboes.

Angiectasia (an-je-ek'-taz-i-ah) [*dysicov*, a vessel; *ectasis*, dilation]. Abnormal dilation of a vessel.

Angiitis, Angieitis (an-je-ist'-tis) [*dysicov*, a vessel, *itis*, inflammation]. Inflammation of a lymph vessel or of a blood vessel.

Angina (an'-jin-ah or an'-ji' nah) [*angere*, to strangle]. Any disease attended by a sense of choking or suffocation, particularly an affection of the fauces or pharynx presenting such symptoms. **A. acuta**, simple sore throat. See *Angina simplex*. **A. aphthosa, A., Aphthous**, a form attended with the formation of aphthas in some part of the throat.

A., Cardiac, angina pectoris. **A. cruris**, intermittent lameness. **A. exsudativa**, croup. **A. externa.** Synonym of *Mumps*. **A., Fibrinous**, a noninfectious disease of the throat simulating diphtheria, marked by the formation of a layer of fibrinous exudation which is chiefly confined to the tonsils. The constitutional symptoms are slight. **A., Follicular**, clergymen's sore throat. See *Pharyngitis, Granular*. **A., Herpetic**, angina observed in connection with smallpox and herpes, marked by formation of vesicles in the throat which may be attended with patches of exudation. **A. laryngea.** Synonym of *Laryngitis*. **A. lingualis.** Same as *Glossitis*. **A. ludovici, A., Ludwig's,** acute suppurative inflammation of the con-

nective tissue surrounding the submaxillary glands. **A. maxillaris**, mumps. **A. membranacea.** Synonym of *Diphtheria*. **A. parotidea**, the mumps, or parotitis. **A. pectoris**, a paroxysmal neurosis with intense pain and oppression about the heart. It usually occurs in the male after 40 years of age, and is generally associated with diseased conditions of the heart and aorta. There is a sense of impending death, and frequently there is a fatal termination. **A. pectoris vasomotoria**, a term given by Nothnagel and Lannon to an angina associated with vasomotor disturbances, coldness of the surface, etc. **A., Phlegmonous.**

1. An inflammation of the mucous and submucous tissues of the throat, with a tendency to extend more deeply, attended by edematous swelling. 2. Acute inflammation of the deep-seated structures of the throat, with a tendency to pus-formation. **A., Pseudo-**, a neurosis occurring in anemic females, simulating angina pectoris, but characterized by a less grave set of symptoms and never resulting fatally. **A., Pultaceous**, an affection of the throat marked by the presence of whitish or grayish patches which are easily detached, as they are not true exudations. **A., Rheumatic**, a form of catarrhal angina in rheumatic persons, marked by sudden onset of intense pain on swallowing. **A. serosa, A., Serous.** 1. Catarrhal angina. 2. Edema of the glottis. **A. simplex.** See *A. acuta*. **A., Thymic.** 1. Laryngismus stridulus. 2. Bronchial asthma. **A. tonsillans**, quinsy. **A. trachealis**, croup. **A., Ulceromembranous.** See *Tonsillitis, Herpetic*. **A. varicosa**, dyspnea due to enlarged tonsillar vessels. **A. vera, A. vera et legitima**, quinsy. **A., Vincent's**, diphtheroid angina (ulceromembranous angina) due to *Bacillus pseudodiphtheriae*.

Anginoid (an'-jin-oid) [see *Angina*]. Resembling angina.

Anginose (an'-jin-oh) [see *Angina*]. Pertaining to angina, characterized by symptoms of suffocation.

Angio- (an-je-o-). A prefix signifying relating to a vessel.

Angioataxia (an-je-o-at-aks'-e ah's) [*angio*, *ataxia*, want of order]. An irregularity in the tension of the blood vessels.

Angioblast (an'-je-o-blast) [*angio*, *blast*, a germ]. An embryonic cell developing into vascular tissue.

Angiocardiokinetic (an-je-o-kar-de-o kin'-e ah's) [*angio*, *cardia*, heart, *kinetic*, to move]. 1. Stimulating or affecting the action or movements of the heart and blood vessels. 2. A drug which stimulates or affects the movements of the heart and blood vessels.

Angiocavernous (an-je-o-kar'-er-nus) Relating to cavernous angioma.

Angioceratodeitis. See *Angiokeratodermis*.

Angiocheiloscope (an-je-o-ki'-lo-skop) [*angio*, *cheilos*, a lip; *scopein*, to look]. An instrument by means of which the blood-circulation

in the capillaries of the mucosa of the lips is magnified for observation.

Angiocholitis (an-je-o-kol-i'tis) [angio-; *χολή*, bile, *-itis*, inflammation]. Inflammation of the biliary ducts.

Angioderma pigmentosum (an-je-o-der'-mah pig-men-ti'-sum). See *Atrophoderma*.

Angiofibroma (an-je-o-fi-brō'-mah). A fibrous degenerating angioma.

Angiogenesis, Angiogeny (an-je-o-jen'-es-is, an-je-og'-en-e) [angio-; *γεννᾶν*, to produce]. The development of the vessels.

Angioglioma (an-je-o-gli-o'-mah) [angio-; *glioma*]. A glioma rich in blood vessels.

Angiograph (an-je-o-graf) [angio-; *γράφειν*, to write]. A variety of sphygmograph.

Angiography (an-je-og'-ra-fee) [see *Angiograph*]. A description of the vessels, angiology.

Angiokeratoditis (an-je-o-ker-at-o-dī'-i-tis) [angio-; *αίμαξ*, cornea; *-itis*, inflammation]. Vascular keratitis.

Angiokeratoma (an-je-o-ker-at-o'-mah) [angio-; *αίμαξ*, horn, *άμα*, tumor]. Lymphangiectasis, telangiectatic wart, a very rare disease of the extremities, characterized by wart-like growths that develop on dilated vessels in persons with chilblains, etc. Dark vascular spots the size of pin-points or pin-heads develop as an attack of chilblains is subsiding. The disease is peculiar to children.

Angiokinesis (an-je-o-kin-e'-sis) [angio-; *κινῆν*, to move]. Excitation or action of the blood-vessels.

Angioleucitis (an-je-o-lu-sī'-tis) [angio-; *λευκή*, white, *-itis*, inflammation]. Inflammation of the lymphatic vessels.

Angioleukasia (an-je-o-lu-ka'-zhe-ah) [angio-; *λευκός*, white, *λάζωσις*, dilation]. Dilation of the lymphatics.

Angiolithic (an-je-o-lith'-ik) [angio-; *λίθος*, a stone]. A term applied to neoplasms in which crystalline or mineral deposits take place, with hyaline degeneration of the coats of the vessels.

Angiology (an-je-o-lō-je) [angio-; *λογία*, science]. The science of the blood-vessels and lymphatics.

Angiolymphitis (an-je-o-lim-jī'-tis). Same as *Angioleucitis*.

Angiolymphoma (an-je-o-lim-jō'-mah) [angio-; *λύμφα*, lymph, *άμα*, tumor]. A tumor formed of lymphatic vessels.

Angioma (an-je-o'-mah) [angio-; *άμα*, a tumor].

A tumor formed of blood-vessels. **A.**, **Cavernous**, an angioma with communicating blood spaces, like the cavernous tissue of the penis, originating chiefly from the distended veins. **Syn.**, *Angioma cavernosum*; *Angioma circumscriptum*. **A.**, **Fissural**, Virchow's name for a nevus which he judged, from its location, corresponding to that of a fetal fissure, might be due to a disposition to form anomalies on the part of the region adjacent to the fissures. **A.**, **Plexiform**, one consisting of enlarged, tortuous capillaries forming a patch varying in color

from claret to steel-blue; if there is great increase of blood-vessels, the growth has the character of a tumor, and large examples of this variety are lobular in structure. **A.**, **Telangiectatic**, an angioma composed of dilated blood-vessels. **A.**, **Tuberosa**, **A.**, **Tuberous**, one occurring in subcutaneous tissue and presenting the appearance of a lipoma as it gradually replaces the adipose tissue, or it may be accompanied by a true fatty growth.

Angiomalacia (an-je-o-mal-a'-che-ah) [angio-; *μαλακία*, a softening]. Softening of the blood-vessels.

Angiometer (an-je-om'-et-er). See *Sphygmograph*.

Angiomyces (an-je-o-mī'-sēs) [angio-; *μύκης*, a fungus; an excrescence]. A fungoid or spongy dilation of the capillaries.

Angiomyocardiac (an-je-o-mī-o-kar'-de-ak) [angio-; *μύς*, muscle; *καρδία*, the heart]. Pertaining to the muscles of the vessels of the heart.

Angiomyopathy (an-je-o-mī-op'-a-the) [angio-; *μύς*, muscle; *πάθος*, disease]. Any affection of the vessels involving the musculature.

Angiomyosarcoma (an-je-o-mī-o-sar-ko'-mah). A tumor containing elements of angioma, myoma, and sarcoma.

Angioneurectomy (an-je-o-nu-ek'-tō-mē) [angio-; *νεύρον*, nerve, *εκτομή*, excision]. Resection of all the cord-elements of the prostate except the vas, with its artery and vein.

Angioneuroedema (an-je-o-nu-ro-e-de'-mah). See *Angioneurotic Edema*.

Angioneurosis (an-je-o-nu-ro'-sis) [angio-; *νεύρσις*]. A neurosis of the blood-vessels; a disturbance of the vasomotor system, either of the nature of a spasm of the blood-vessels (*angiospasm*) or of paralysis (*angio-paralysis*).

Angioneurotic (an-je-o-nu-ro'-tik) [see *Angioneurosis*]. Pertaining to angioneurosis. **A.**, **Edema**, an acute circumscribed swelling of the subcutaneous or submucous tissues, probably due to vasomotor lesion. The disease often runs in families. It is at times periodic, and is associated with colic and gastric disturbances.

Angiopancratis (an-je-o-pān-kre-at-i'-tis). Inflammation of the vascular tissue of the pancreas.

Angioparalysis (an-je-o-par-al'-is-is) [angio-; *παράλυσις*, paralysis]. Vasomotor paralysis.

Angioparalytic (an-je-o-par-al-it'-ik) [see *Angioparalysis*]. Relating to or characterized by angioparalysis.

Angioparesis (an-je-o-par-es-is) [angio-; *πάρσις*, paresis]. Partial paralysis of the vasomotor apparatus.

Angiopathy (an-je-op'-a-the) [angio-; *πάθος*, disease]. Any disease of the vascular system.

Angiophorous (an-je-op'-ar-us) [angio-; *φορέω*, to bear]. Applied to tissue which accompanies and supports vessels.

Angioplerosis (an-je-o-pler-o'-sis) [angio-;

πληρωσις, a filling-up]. Engorgement of the vessels.

Angiopressure (*an-je-o-presh'-ur*). The production of hemostasis by means of angiostribe and forceps without ligation.

Angiorhigosis (*an-je-o-ri-go'-sis*) [*angio-*; *ρήγσις*, cold]. Rigidity of the vessels.

Angiorrhesis (*an-je-or-eks'-is*) [*angio-*; *ρήξις*, a bursting]. Rupture of a blood-vessel.

Angiosarcoma (*an-je-o-sar-ko'-mah*) [*angio-*; *σάρξ*, flesh; *δῆμα*, a tumor]. A vascular sarcoma.

Angiosclerosis (*an-je-o-skle-ro'-sis*) [*angio-*; *σκληρόσις*, hard]. The induration and thickening of the walls of the blood-vessels.

Angiosialitis (*an-je-o-si-al-i'-tis*) [*angio-*; *σάλιον*, saliva; *εἰσις*, inflammation]. Inflammation of the duct of a salivary gland.

Angiosis (*an-je-o'-sis*) [*ἀγγίσις*, a vessel]. Any disease of blood-vessels or of lymphatics.

Angiospasm (*an-je-o-spazm*) [*angio-*; *σπασμός*, a spasm]. A vasomotor spasm.

Angiospastic (*an-je-o-spas'-tik*) [see *Angiospasm*]. Characterized by or of the nature of angiospasm.

Angiostenosis (*an-je-o-sten-o'-sis*) [*angio-*; *στενωσις*, a narrowing]. Narrowing of a vessel.

Angiosteogenic, Angiosteogenous (*an-je-o-ste-oj'-en-ik, -us*) [*angio-*; *ὀστέον*, a bone; *γενᾶν*, to produce]. Relating to, producing, or produced by calcification of the vessels.

Angiosymphysis (*an-je-o-sim'-fz-is*) [*angio-*; *σύνψυσις*, a growing together]. The growing together of vessels.

Angiosynizesis (*an-je-o-sin-e-se'-sis*) [*angio-*; *συνίημι*, to collapse]. The collapse of the walls of a vessel and subsequent growing together.

Angiectectasia, Angiectectasis (*an-je-o-tel-ek-tā'-ze-ah, an-je-o-tel-ek'-ta-sis*). See *Telectectasis*.

Angiotenic (*an-je-o-ten'-ik*) [*angio-*; *τείνειν*, to stretch]. Due to or marked by distention of the blood-vessels.

Angioteria (*an-je-o-te'-re-ah*) [*angio-*; *τέρας*, a wonder]. An abnormal development of the vascular system.

Angiothlipsis (*an-je-o-thlip'-sis*) [*angio-*; *θλίβειν*, to rub; to gall]. The abrasion of a vessel.

Angiotitis (*an-je-o-ti'-tis*) [*angio-*; *otitis*]. Inflammation of the blood-vessels of the ear.

Angiotome (*an-je-o-tām*) [*angio-*; *τομή*, a cutting]. The vascular tissue of an embryonic metamere.

Angiotomy (*an-je-o-tō-me*) [see *Angiotome*]. 1. Incision into a vessel. 2. That branch of anatomy relating to the vascular system.

Angiotribe (*an-je-o-trib*) [*angio-*; *τριβειν*, to grind or bruise]. A clamp furnished with powerful jaws used by Tuffier to occlude arteries in vaginal hysterectomy.

Angiotripsy (*an-je-o-trip'-sē*) [see *Angiotribe*]. Vascular torsion and compression by means of the angiotribe.

Angle, Angulus (*ang'-gl, ang'-gu-lus*) [*an-*

gulus, an angle]. 1. A corner. 2. The degree of divergence of two lines or planes that meet each other; the space between two such lines. **A. of Aberration**. See *A. of Deviation*. **A., Acromial**, that formed between the head of the humerus and the clavicle. **A., Alpha**, in optics, that formed by the intersection of the visual line and optical axis. **A., Alveolar**, that formed between a line passing through a spot beneath the nose, spine and the most prominent point of the lower edge of the alveolar process of the superior maxilla and the cephalic horizontal line. **A. of Aperture**, in optics, that included between two lines joining the opposite points of the periphery of a lens and the focus. **A., Biorbital**, in optics, that formed by the intersection of the axes of the orbits. **A., Costal**, the angle formed by the meeting of ribs at the ensiform cartilage. **A., Critical**, that made by a beam of light passing from a rarer to a denser medium, with the perpendicular, without being entirely reflected. **A. of Deviation**. 1. In magnetism, the angle traversed by the needle when disturbed by some magnetic force. 2. In optics, that formed by a refracted ray and the prolongation of the incident ray. **A. of Elevation**, in optics, that made by the visual plane with its primary position when moved upward or downward. **A. of Incidence**, in optics, the angle at which a ray of light strikes a denser medium and undergoes reflection or refraction. **A. of Inclination (of Pelvic Canal)**, in obstetrics, that formed by the anterior wall of the pelvis with the conjugate diameter. **A. of Inclination (of Pelvis)**, in obstetrics, that formed by the pelvis with the general line of the trunk, or that formed by the plane of the inferior strait with the horizon. **A. of Jaw**, the junction of the lower border of the ramus of the mandible with its posterior border. **A., Limiting**. See *A., Critical*. **A. of the Lips**, that formed by the union of the lips at each extremity of the mouth. **A., Louis'**, that between the manubrium and gladiolus of the sternum. **A., Ludwig's**. See *A., Louis'*. **A., Meter**, in optics, the degree of convergence of the eyes when centered on an object one meter distant from each. **A., Optic**, that included between lines joining the extremities of an object and the nodal point. The smallest is about 30 seconds. **A. of Polarization**, in optics, that which a reflected ray of light makes with a line drawn perpendicular to the point of incidence. **A. of Refraction**, in optics, that which exists between a refracted ray of light and a line drawn perpendicular to the point of incidence. **A., Rolandic**, the acute angle formed by the fissure of Rolando with the superior

of the cerebral hemisphere. **A., vertebral**, that which the sacrum forms the last lumbar vertebra. **A., Sternolar**, that existing between the clavicle and sternum. **A., Subcostal**. See **A., A., Subpubic**, that formed at the umbilicus. **A., Sylvian**, the angle formed by the posterior limb of the sylvian fissure and line perpendicular to the superior surface of the hemisphere. **A., Visual**. See **A., Xiphoid**, that formed by the tip of the xiphoid notch.

Leg (*an'-gle-se*) [so called after the arch of Anglesey]. An artificial limb made from a solid piece of wood hollowed out to receive the stump and provided with a steel joint at the knee. The limb was made of wood, to which was communicated by strong catgut strings posteriorly and a spiral spring anteriorly.

Lalia (*an-go-jer'-ze-ah*) [*ἀλλαν*, to speak, utterance]. A speech defect consisting of a choking, drawing utterance, as in paralytic dementia.

Lig'gar [*angor*, a strangling]. Syn. **A. animi**, a sense of imminent danger.

A. pectoris, angina pectoris.

A. (an-gel'-u-lah) [dim. of *anguilla*]. A genus of parasitic roundworms. **laralis**. See *Threadworm*.

an'-gu-lar [*angulus*, an angle]. Pertaining to an angle.

A. Artery, the terminal part of the facial artery. **A. Gyrus**, **A. tion**, a convolution of the brain.

rotation. **A. Movement**, the movement between two bones that may take place forward and backward or inward and outward. **A. Processes**, the external and internal processes of the orbital arch of the bone.

in (*an-qu-la'-shun*). The formation of loops in the intestine.

an'-gu-lus [L.]. See *Angle*.

A. (an-gus-tu'-rah) [Sp. *Angostura*, a town]. *Cusparia* bark. The bark of *Cusparia*. It is a stimulant tonic and is used in malignant bilious fever, intermittent fever, and dysentery. In large doses is emetic. Dose of fluid extract 10 to 30 (6-20 Cc.); of the bark 10-40 gr. (0.6-3 Gm.), of the infusion (*infusum cuspariae*) 2-2 oz. (30-60 Cc.).

A. (an-hal'-o'-nin) [*Anhalonium*, a name]. $C_{12}H_{15}NO_4$. A poisonous alkaloid from *Anhalonium lewinii*. It forms with the ordinary acids. **A. Hydrochloric**, $C_{12}H_{15}NO_4HCl$, is a caustic and very stimulant and is used as is in angina pectoris, asthma, and thorax.

A. (an-hed'-o'-ne-ah). Complete loss of sensation of pleasure.

A. (an-hel'-a'-shun) [*anhelare*, to pant]. Lack of breath, dyspnea.

A. (an-hel'-o'-us) [L.]. 1. *Respiration*. 2. *Respiration*; asthma.

Anhematosis (*an-hem-at'-o'-sis*) [*ἀν*, priv.; *μαίωσις*, to make bloody]. Defective formation of the blood.

Anhidrosis (*an-hid-ro'-sis*) [*ἀν*, priv.; *ἵδρωσις*, sweat]. Partial or complete absence of sweat secretion.

Anhidrotic (*an-hid-ro'-tik*) [see *Anhidrosis*]. 1. Tending to check sweating. 2. An agent that checks sweating.

Anhydremia (*an-hi-dee'-me-ah*) [*ἀν*, priv.; *ἵδρωσις*, water; *αἷμα*, blood]. The opposite of hydremia. A diminution of the watery constituents of the blood.

Anhydrid (*an-hi'-drid*) [*ἀν*, priv.; *ἵδρωσις*, water]. A chemically compound, particularly an acid, formed by the withdrawal of a molecule of water. Carbon dioxide and sulfur dioxide are examples.

Anhydrite (*an-hi'-drit*). Anhydrous calcium sulfate.

Anhydrous (*an-hi'-dru-s*) [see *Anhydrid*]. In chemistry, a term used to denote the absence of water.

Anianthinops (*an-e-an-thin-op'-se*). See *Amianthinops*.

Anideus (*an-id'-e-us*) [*ἀν*, priv.; *εἶδος*, form]. The lowest form of omphalosite, in which the parasitic fetus is reduced to a shapeless mass of flesh covered with skin.

Anidrosis (*an-id-ro'-sis*). See *Anhidrosis*.

Anidrotic (*an-id-ro'-tik*). See *Anhidrotic*.

Anilid (*an'-il-id*) [Ar., *anil*, the, *nil*, dark blue]. A compound formed by the action of acid chloride or acid anhydride upon aniline. The anilids are very stable derivatives.

Anilidmetarsenite (*an-il-id-met-ar'-sen-it*), $C_6H_5N(C_2H_5O)_2AsCl_2$. A white, odorless powder containing 37.69% of arsenic, about half as much as arsenic trioxide. It dissolves in water up to 20%, and is used by subcutaneous injection in skin diseases. Dose $\frac{1}{4}$ -3 gr. (0.05-0.2 Gm.) of 20% solution a day. Syn., *Atoxyl*.

Anilin (*an'-il-in*) [see *Anilid*], C_6H_5N . Amidobenzene; formed in the dry distillation of bituminous coal, bones, indigo, isatin, and other nitrogenous substances. It is made by reducing nitrobenzene. It is a colorless liquid with a faint, peculiar odor, boiling at 183°; its sp. gr. at 0° is 1.036. When perfectly pure, it solidifies on cooling, and melts at -8°. It is slightly soluble in water, but dissolves readily in alcohol and ether. Combined with chlorine, the chlorates, and hypochlorites, it yields the various aniline dyes known by the names of *a. purple*, *a. green*, *a. black*, *a. blue*, etc. It is used in chorea and epilepsy in $\frac{1}{4}$ gr. (0.03 Gm.) doses. Unof. Syn., *Phenylamin*, *Benzidin*; *Crystalin*; *Cyanol*.

Anilism (*an'-il-izm*) [*anilin*]. An acute or chronic disease produced in workmen in aniline factories by the poisonous fumes. The symptoms are debility, vertigo, gastrointestinal disturbance, and cyanosis.

Animal (*an'-i-mal*) [*anima*, the spirit, breath, or life]. An organism capable of ingesting

and digesting food. No sharp line of distinction exists between the lowest animals and certain vegetables. The higher animals are distinguished by the power of locomotion and the possession of a nervous system. **A. Charcoal**, bone-black, ivory-black, etc., is the product of the calcining of bones in closed vessels. **A. Chemistry**, that concerned with the composition of animal bodies. **A. Electricity**, electricity generated in the body. **A.-gum**, $C_{12}H_{20}O_{10} + 2H_2O$. A substance prepared from mucin by Landwehr, and so named on account of its resemblance to the gum of commerce. It occurs in many tissues of the body, is soluble in water, and in alkaline solution readily dissolves cupric oxid, the solution not being reduced on boiling. It yields no coloration with iodine, and is very feebly dextrorotatory. **A. Heat**, the normal temperature of the body in man—about 98.5° F. (37° C.). **A. Magnetism**, mesmerism; hypnotism. **A. Starch**. See *Glycogen*.

Animalcule (*an-im-a'-kul*) [*animalculum*, a minute animal]. An animal organism so small as to require the microscope for its examination.

Anime (*an'-im-e*) [Fr., *animé*, origin doubtful]. A name of various resins, especially that of *Hymenaea courbaril*, a tree of tropical America; sometimes used in plaster, etc. *Unof*.

Aniodol (*an-i'-o-dol*). A glycerol solution of trioxymethylene, useful as an antiseptic in 1% solution.

Anion (*an'-i-on*) [*ἀνά*, up; *ῥέω*, going]. In electrolysis, an electronegative element.

Aniridia (*an-i-rid'-e-ah*) [*ἀν*, priv.; *ῥίς*, the rainbow]. Absence or defect of the iris.

Anisalol (*an-is'-al-ol*), $C_6H_4(OCH_3)(CO_2C_6H_5)$. The phenyl ester of anisic acid, forming colorless crystals. It is antirheumatic and analgesic. Dose 8-15 gr. (0.52-1.0 Gm.).

Anisallyl (*an-is'-al-il*) [*anistic*; *aleanol*], C_6H_5O . The univalent radicle of anisic alcohol. **A. Hydrate**, anisic alcohol.

Anisamid (*an-is'-am-id*), $C_6H_5NO_2$. The amid of anisic acid, anisyl amid.

Anisated (*an'-is-a-ted*) [*anisum*, anise]. Containing anise.

Anise (*an'-is*). See *Anisum*.

Aniseed (*an'-i-sed*). Anise-seed. The seed of *Pimpinella anisum*. See *Anisum*.

Anisic Acid. See *Acid*, *Anisic*.

Anisidin (*an-is'-id-in*), $N(C_6H_4)OH_2$. A base obtained from nitranisol by action of ammonium solid in alcoholic solution; with acids it forms crystalline compounds. Syn., *Methylphenudin*; *Methylamidophenol*. **A. Citrate**, an analgesic similar to phenetidin citrate.

Anisin (*an'-is-in*) [*anisum*, anise], $C_{12}H_{24}N_2O_6$. A crystalline alkaloid, a derivative of anise.

Anisochromatic (*an-is-o-kro-mat'-ik*) [*ἀνισος*, unequal; *χρῶμα*, color]. Not having the same color throughout; said of solutions

containing two pigments used in testing for color-blindness.

Anisocoria (*an-is-o-ko'-re-ah*) [*anisos*, unequal; *κόρη*, pupil]. Inequality of the diameter of the pupils.

Anisol (*an'-is-ol*) [see *Anisin*], C_6H_5O . Methylphenyl ether, produced by heating phenol with potassium and methyl iodid or potassium methyl sulfate in alcoholic solution. It is an ethereal-smelling liquid, boiling at 152° ; its sp. gr. at 15° is 0.901.

Anisomelous (*an-is-om'-el-us*) [*anisos*, unequal; *μέλος*, a limb]. Having limbs of unequal length.

Anisometropia (*an-is-o-met-ro'-pe-ah*) [*anisos*, unequal; *μέτρον*, a measure; *ὄψ*, the eye]. A difference in the refraction of the two eyes.

Anisometropic (*an-is-o-met-rof'-ik*) [see *Anisometropia*]. Affected with anisometropia.

Anisopia (*an-is-o'-pe-ah*) [*anisos*; *ὄψ*, eye]. Inequality of visual power in the two eyes.

Anisosthenic (*an-is-o-sthen'-ik*) [*anisos*; *ἀνδρεία*, strength]. Not of equal power; used of pairs of muscles.

Anisotachys (*an-is-ot'-a-kis*) [*anisos*; *ταχὺς*, quick]. Applied to an accelerated pulse of varying rapidity.

Anisotropical, Anisotropic, Anisotropous (*an-is-o-trop'-al*, *an-is-o-trop'-ik*, *an-is-ot'-ro-pus*) [*anisos*; *τροπή*, turning]. Not possessing the same light-refracting properties in all directions; a term applied to doubly refracting bodies. In biology, varying in irritability in different parts or organs.

Anisotrophy (*an-is-ot'-ro-fē*) [see *Anisotropal*]. The quality of being doubly refractive or unequally refractive in different directions, or of being unequally responsive to external influences.

Anisum (*an'-is-um*) [L.]. Anise. The fruit of *Pimpinella anisum*. Its properties are due to a volatile oil. It is slightly stimulant to the heart action. It liquefies bronchial secretions, and is therefore a favorite ingredient in cough-mixtures. Dose 10-20 gr. (0.65-1.3 Gm.). **Anisi, Aqua** (U. S. P.), oil of anise, 1; water, 500 parts. Dose indefinite. **Anisi, Essentia** (B. P.). Dose 10-20 min. (0.6-1.2 Cc.). **Anisi, Oleum** (U. S. P.), an ingredient in tinctura opii camphorata. Dose 15 min. (0.06 c. 3 Gm.). **Anisi, Spiritus** (U. S. P.), a 10% solution of the oil in alcohol. Dose 1-2 dr (4-8 Cc.).

Anisyl (*an'-is-il*) [*anisum*], $C_6H_5O_2$. A hypothetical radicle supposed to be found in anise and its derivatives.

Anitin (*an'-it-in*). A brownish powder obtained from ichthyol. In 33% aqueous solution it combines with phenols, etc., to form anitols. Syn., *Ichthyosulfonic acid*.

Anitol (*an'-it-ol*). Any one of the soluble compounds formed by anitin with phenols, cresols, etc.; they possess germicidal properties.

anitrogenous (ah-ni-troj'-en-us) [d. priv.; *nitro-* (gen)]. Nonnitrogenous.

Ankle (ang'-kl) [ME., *anle*]. The joint between the leg and the foot. It is a ginglymus joint, with three ligaments, the anterior, internal, and external. **A.-bone**, the astragalus. **A.-clonus**, the succession of a number of rhythmic muscular contractions in

the calf of the leg when the foot is suddenly flexed by pressure upon the sole. It is a symptom of various diseases of the spinal cord, especially those involving the lateral pyramidal tracts. **A.-jerk**. See *A.-clonus*. **A.-joint**. See *Ankle*. **A. Reflex**. See *A.-clonus*. **A., Tailors'**, a ganglion or synovial sac over the external malleolus in tailors, due to their constrained posture when at work. **A. Valgus**, a debilitated condition of the ankle-joint due to laxity of the internal lateral ligament, permitting the foot to act as in talipes valgus.

Ankola (an-ko'-lah) [Hind.]. The bitter, emetic root-bark of *Alangium lamarkii*, a tree of tropical Asia and Africa. It is used in India in skin diseases and leprosy.

Ankyla, Ankyle (ang'-kil-ah, -e) [ἀγκύλη, anything bent]. 1. An angular part, particularly the elbow. 2. Ankylosis of a joint with flexion. 3. Abnormal adhesion of parts.

Ankyloblepharon (ang-kil-o-ble'-ar-on) [ankyle; βλεφάρων, the eyelid]. The adhesion of the ciliary edges of the eyelids.

Ankylocheilia, Ankylochilia (ang-kil-o-ki'-le-ah) [ankyle; χείλος, lip]. Adhesion of the lips.

Ankylocolpos (ang-kil-o-ko'-pos) [ankyle; κόλπος, the vagina]. Atresia of the vagina or vulva.

Ankylodeire, Ankyloedere, Ankyloderis (ang-kil-o-di'-re, -de'-re, ang-kil-od'-er-is) [ankyle; δειρῆς, the neck]. Wry-neck; torticollis.

Ankyloglossia, Ankyloglossum (ang-kil-o-glos'-e-ah, ang-kil-o-glos'-um) [ankyle; γλῶσσα, the tongue]. Tongue-tie.

Ankyloemele (ang-kil-om'-el-e) [ankyle; μέλος, a limb]. The abnormal growing together of limbs (as of the fingers or toes).

Ankylose (ang'-kil-ös) [ἀγκύλωσις, a loop]. To be, or to become, consolidated or firmly united.

Ankylosis (ang-kil-o'-sis) [see *Ankylose*]. Union of the bones forming an articulation, resulting in a stiff joint. **A., Capsular**, that due to cicatricial shrinking of the joint-capsule. **A., Cartilaginous**, a form observed as a sequel of subacute coxitis in the young, marked with great muscle tension and absence of suppuration; the cartilages may remain intact for a long time, although the shrunken synovial membrane has ceased to secrete. **A., Central**, that due to causes present within the joint. **A., Extracapsular**, that due to rigidity of the parts external to the joint. **A., False, A., Spurious**, that due to the rigidity of surrounding parts. **A., Generalized**, ankylosis affecting many joints, or a tendency toward it. **A., Intracapsular**, that due to rigidity of the structures within a joint. **A., Ligamentous**, when the medium is fibrous. **A., Muscular**, that due to muscular contraction. **A., True, A., Bony**, that in which the connecting material is bone.

Ankylostoma, Ankylostomum (ang-kil-ös'-to-mah, -mum) [ἀγκύλος, crooked; στήμα, a

ANTERIOR VIEW OF THE ANKLE JOINT.—(Sappey.)

1. Posterior inferior tibiofibular ligament. 2. Transverse ligament. 3. Posterior fasciculus of the external lateral ligament. 4. Internal lateral ligament. 5. External transverse astragalus ligament. 6. Middle fasciculus of external lateral ligament. 7. Tubercle on outer side of groove for flexor longus pollicis. 8. Posterior tubercle of os calcis. 9. Tubercle on inner side of groove for flexor longus pollicis. 10. Groove on astragalus for flexor longus pollicis. 11. Groove on astragalus for flexor longus pollicis. 12. Posterior calcaneoastragalus ligament. 13. Point of insertion of achilles tendon.

VERTICAL SECTION OF ANKLE JOINT.—(Henle.)

1. Tibialis posterior. 2. Flexor longus digitorum. 3. Flexor longus hallucis. 4. Astragalus. 5. Astragalocalcaneal ligament. 6. Peroneus brevis. 7. Os calcis. 8. Peroneus longus.

mouth]. A genus of nematode worms, one species of which, *A. duodenale* (hook-worm), is sometimes found in the human intestine. It produces a condition analogous to pernicious anemia.

Ankylostomiasis (*ang-kil-as-to-mi'-as-is*) [see *Ankylostoma*]. The morbid condition produced by the presence of the parasite *Ankylostoma duodenale* in the human intestine. It is especially prevalent among brickmakers and other workmen in Europe. Syn., *Dochmiasis*; *Brickmakers' anemia*; *Tunnel anemia*; *Miners' cachexia*, *Egyptian chlorosis*; *Uncinariasis*; *Hookworm disease*.

Ankylotia (*ang-kil-o'-she-ah*) [*ἀγκύλη*, a loop; *ὄς*, ear]. Union of the walls of the meatus auditorius.

Anatto (*an-at'-o*). See *Anatto*.

Annectent (*an-ek'-tent*) [*ad*, to; *nectere*, to bind]. Linking or binding together. **A. Convolutions**. See *Convolutions*.

Annidalin (*an-id'-al-in*). 1. Dithymoltriiodid. A substitute for iodoform and aristol. 2. See *Aristol*.

Anatto (*an-of'-o*) [native American]. A coloring-matter obtained from the pellicles of the seeds of *Bixa orellana*. It is used to color plasters and as an artificial color for butter. Syn., *Anatto*; *Anatto*.

Annuens (*an'-u-enz*) [*annuere*, to nod]. The rectus capitis anticus minor muscle.

Annular (*an'-u-lar*) [*annulus*, a ring]. Ring-like. **A. Cartilage**, the cricoid cartilage. **A. Finger**, the ring-finger. **A. Ligament**, the ligament surrounding the wrist and the ankle. **A. Muscle of Müller**, the circular fibers of the ciliary muscle. **A. Process**, **A. Protuberance**, the pons varolii. **A. Reflex** (of macula), a ring-like reflexion sometimes seen with the ophthalmoscope around the macula.

Annulus (*an'-u-lus*) [see *Annular*]. A ring-shaped or circular opening. **A. abdominalis**, the external or internal abdominal ring. **A. abdominis**, the inguinal ring. **A. ciliaris**, the boundary between the iris and the choroid. **A. fibrosus**. 1. The external part of the intervertebral discs. 2. Firm connective tissue containing elastic fibers surrounding the auriculoventricular openings of the heart. Syn., *Annulus fibrosus atrioventricularis*. **A. inguinalis abdominalis**, the internal abdominal ring. **A. inguinalis cutaneus**, the external abdominal ring. **A. membranæ tympani**, an incomplete bony ring that forms the fetal auditory process of the temporal bone. **A. migrans**, a disease of the tongue marked by crescentic bands of a light-colored rash which spread over its dorsal surface and sometimes over the sides and under surface. Syn., *Annulus errans*. **A. osseus**, the tympanic plate. **A. ovalis**, the rounded or oval margin of the foramen ovale. **A. tracheæ**, a tracheal ring. **A. umbilicus**, the umbilical ring. **A. ventriculi**, the pylorus.

Anoceliadelphous (*an-o-se-le-ah-del'-us*) [*ἀνω*,

upward; *κοίλη*, a cavity; *ἀδελφός*, a brother]. United by the thorax or upper part of the abdomen.

Anocheiloschisis, Anochiloschisis (*an-o-ki-los-ki'-sis*) [*ἀνω*, upward; *χειλος*, a lip; *σχίζω*, to split]. An operation of splitting the upper lip for reducing its size.

Anococcygeal (*an-o-kok-sij'-e-al*) [*anus*, the fundament; *ἀκκύξ*, the coccyx]. Pertaining to the anus and the coccyx. **A. Ligament**, a ligament that connects the tip of the coccyx with the external sphincter ani muscle.

Anodal (*an'-o-dal*) [*ἀνά*, up; *ὁδός*, a way]. Relating to the anode; electropositive. **A. Closure**, the closure of an electric circuit with the anode placed in relation to the muscle or nerve which is to be affected. **A. Closure Clonus, A. Closure Contraction**. See *Contraction, Anodal Closure*. **A. Duration**, the duration of an anodal closure contraction.

Anode (*an'-ōd*) [see *Anodal*]. The positive pole of a galvanic battery. **A., Soluble**, Sprague's term for an anode formed of the metal which is deposited.

Anodermous (*an-o-der'-mus*) [*ἀ*, priv.; *δέρμα*, the skin]. Without the appearance of an epidermis.

Anodinia (*an-o-din'-e-ah*) [*ἀ*, priv.; *ὠδίνε*, the pain of childbirth]. Absence of labor-pains.

Anodontia (*an-o-don'-she-ah*) [*ἀν*, priv.; *ὀδούς*, tooth]. Absence of the teeth.

Anodyne (*an'-o-din*) [*ἀν*, priv.; *ὀδίνε*, pain]. A medicine that gives relief from pain. **A., Hoffmann's**. See under *Ether*.

Anodynia (*an-o-din'-e-ah*) [see *Anodyne*]. 1. Freedom from pain. 2. Loss of sensation. Cf. *Anodinia*.

Anoesia (*an-o'-e-ze-ah*) [*ἀνοησία*, a want of sense]. Want of understanding.

Anoia (*an-o'-ah*) [*ἄνοια*, idiocy]. Synonym of *Idiocy*.

Anomalous (*an-om'-al-us*) [see *Anomaly*]. Irregular; characterized by deviation from the common or normal order.

Anomaly (*an-om'-al-e*) [*ἀνωμλία*, irregularity]. A marked deviation from the normal; an abnormal thing or occurrence.

Anomous (*an-o'-mus*) [*ἀ*, priv.; *ὤμος*, the shoulder]. Without shoulders.

Anona (*an-o'-nah*) [Malay, *monona*]. A genus of shrubs and trees of the order *Anonaceæ*, native of tropical America. *A. ambotay* is a native of French Guiana. The bark is applied to malignant ulcers. *A. glabra* is a West Indian species. The juice of the unripe fruit is applied to ulcers. *A. muricata*, sour-sop, rough anona, is an American tree, but cultivated in all tropical countries, where the ripe fruit is a favorite food and used in a cooling drink for fevers. The astringent unripe fruit is used in intestinal atony. The bark is astringent and irritant; the root-bark is used in cases of disease resulting from ingestion of poisonous fish,

the leaf is anthelmintic and externally a suppurant. The edible fruit of *A. obtusiloba* is used in South America and in the West Indies by the natives as a narcotic. *A. reticulata*, custard-apple, is a West Indian tree, but cultivated throughout the tropics. The unripe dried fruit and seeds are used as an intestinal astringent, the kernels of the seeds are very poisonous; the leaves are anthelmintic. *A. spinosa*, of Brazil, the seeds are used to poison vermin; the fruit as a poultice. *A. squamosa*, sweet-sop, bullock's-heart, is an American tree cultivated throughout the tropics for its fruit, which is used medicinally as is *A. muricata*. The seeds are used to destroy insects; the bark is employed by the Malays and Chinese as a tonic.

Anonyma (an-on'-im-ah) [ā, priv.; ἄνυμνα, name]. The innominate artery.

Anonymos (an-on'-im-us) [see *Anonyma*]. The round cartilage.

Anonymous (an-on'-im-us) [see *Anonyma*]. Nameless. **A. Bone**. See *Innomination*.

Anoperineal (a-no-per-in'-e-ah). Relating to the anus and the perineum.

Anopheles (an-oh'-el-iz) [ἀνopheles, harmful]. A genus of dipterous insects (mosquitos) founded by Meigen (1818), belonging to the family Culicidae. **A. christophersi**, of India, harbors sporozoites, and in districts where present the endemic index of malaria varies from 40 to 72%. **A. maculipennis**, is the common form of northern and central Europe and America, and the common agent in the transmission of the malaria parasite. Syn., *Anopheles quadrimaculatus*. **A. rossii**, the most widely distributed species in India, breeding in foul water; does not carry the parasite of benign nor of malignant tertian fever, and in Calcutta, where this is the prevalent species, the endemic index of malaria is 40%.

Anophthalmia (an-oh'-thal'-me-ah) [ā, priv.; ὀφθαλμία, eye]. Congenital absence of the eyes. **A. cyclopica**, a congenital malformation in which the eye-socket is very ill-developed and the orbit rudimentary or altogether absent.

Anophthalmus (an-oh'-thal'-mus) [see *Anophthalmia*]. A person born without eyes.

Anopia (an-oh'-pe-ah) [ā, priv.; ὀψ, the eye]. Absence of sight, especially that due to defect of the eyes.

Anopubic (a-no-pu'-bik). Relating to the anus and the pubes.

Anorchia (an-or'-ke-ah). See *Anorchism*.

Anorchism (an'-or-kizm) [ā, priv.; ὄρχις, the testicle]. Absence of the testicles.

Anorectal (a-no-rek'-tal) Pertaining to the anus and the rectum.

Anorexia (an-or'-e-se-ah) [ā, priv.; ὄρεξις, appetite]. Absence of appetite. **A. nervosa**, a hysterical affection occurring chiefly in young neurotic females, and characterized by a great aversion to food.

Anorrhorrhea (an-or-or'-e'-ah) [ā, priv.; ῥήρῃς, serum; ῥοή, a flow]. A diminished or defective secretion of serous substance.

Anorthography (an-or-thog'-ra-fe) [ā, priv.; ὀρθός, straight; ῥάττω, to write]. Incapacity to write correctly; motor agraphia.

Anorthopia (an-or-tho'-pe-ah) [ā, priv.; ὀρθός, straight; ὄψις, vision]. 1. A defect in vision in which straight lines do not seem straight, and parallelism or symmetry is not properly perceived. 2. Squinting; obliquity of vision.

Anorthosis (an-or-tho'-sis) [ā, priv.; ῥθωσις, a making straight]. Absence or defect of erectility.

Anoscope (a'-no-skōp) [anus; σκοπεῖν, to look]. An instrument for examining the rectum.

Anosmia (an-oz'-me-ah) [ā, priv.; ὀσμή, smell]. Absence of the sense of smell. **A., Afferent**, that due to the loss of the conductivity of the olfactory nerves. **A., Central**, that due to cerebral disease. **A., Organic**, that due to disease of the nasal pituitary membrane. **A., Peripheral**, that due to disease of the peripheral ends of the olfactory nerves.

Anosphrasia (an-os'-fro'-ze-ah). See *Anosmia*.

Anospinal (a-no-spi'-nal) [anus; spina, the back-bone]. Relating to the anus and the spinal cord. **A. Center**, a center that controls the anal sphincters. It is situated in the lumbar portion of the spinal cord.

Anotus (an-oh'-tus) [ā, priv.; ὠς, the ear]. Destitute of ears.

Anovesical (a-no-ves'-ik-ul) [anus; vesica, the bladder]. Pertaining conjointly to the anus and urinary bladder.

Anoxolin, Anoxolin (an-oks-ol'-u-in, -i-in) [ā, priv.; ὀξύς, sharp; λύνω, to dissolve]. The substance opposed to oxolin, which, according to Le Conte, exists with it in fibrin, albumin, globulin, and casein, and which is not soluble in glacial acetic acid.

Anozol (an'-oz-ul). A combination of iodoform and thymol; deodorous iodoform.

Ansa (an'-sah) [L., "a handle"]. A loop. **A. atlantis**, the uppermost cervical ansa. **A. capitis**, the zygomatic arch. **A., Cervical**, one of the intercommunicating branches of the anterior cervical nerves. **A., Coccygeal**. See *A. sacralis*. **A., Galvanocautic**, the wire loop of a galvanic cautery. Syn., *Ligatura caudens*. **A., Haller's**, the loop formed by the nerve joining the facial and glossopharyngeal nerves. **A., Henle's**. See *Henle's Loop*. **A. hypoglossi**, a loop formed at the side of the neck by the junction of the descendens noni nerve, with branches of the second and third cervical nerves. **A. lenticularis**, a bundle of fibers proceeding from the neural laminae between the divisions of the lenticular nucleus. Syn., *Ansa lentiformis*; *Lenticular loop*. **A. lumbalis**, **A. lumbaris**, one of the connecting ramifications between the branches of the lumbar nerves. **A. sacralis**, a loop joining the

ganglion impar with the sympathetic trunks of the two sides. **A.**, Sternal, the interclavicular notch. **A. subclavialis**, **A.**, Subclavian. See *A. of Vieussens*. **A. supra-maxillaris**, one of communication between the ventral and dorsal superior dental nerves. **A. of Vieussens**, a loop extending from the third cervical ganglion and surrounding the subclavian artery. **A. of Wrisberg**, the nerve joining the right great splanchnic and right pneumogastric nerves.

Anserine (*an'-ser-ên*) [*anser*, a goose]. Resembling a goose. **A. Disease**, a wasting of the muscles of the hands, rendering the tendons unduly prominent, and suggesting the appearance of a goose's foot. **A. Skin**, goose-skin.

Ansiform (*an'-si-form*) [*ansa*, a handle; *forma*, shape]. Loop-shaped.

Antacid (*ant-as'-id*) [*anti*, against; *acidus*, acid]. 1. Neutralizing acidity. 2. A substance counteracting or neutralizing acidity.

Antacidin (*ant-as'-id-in*). Saccharate of lime.

Antagonism (*an-tag'-on-izm*) [see *Antagonist*]. Opposition; opposed action, as of two sets of muscles or of two remedial agents.

Antagonist (*an-tag'-o-nist*) [*ἀνταγωνιστής*, counteracting]. A term applied to a drug that neutralizes the therapeutic effects of another. In anatomy, a muscle that acts in opposition to another. **A.**, Associated, a name given to that muscle of a healthy eye that turns the globe in the same direction as the affected muscle of the opposite eye would, if normal, turn the eye to which it belongs.

Antagonistic (*an-tag'-o-nis'-tik*) [see *Antagonist*]. Opposing.

Antalgic (*ant-al'-jik*) [*anti*; *ἄλγος*, pain]. 1. Relieving pain. 2. A remedy that relieves pain.

Antalkaline (*ant-al'-kal-in*) [*anti*; *alkali*]. 1. Neutralizing alkalis. 2. An agent neutralizing alkalis, as acids.

Antanacathartic (*ant-an-ah-kath-ar'-tik*) [*anti*; *ἀν*, up; *κλύω*, purgation]. 1. Checking expectoration. 2. An agent which checks expectoration.

Antaphrodisiac (*ant-aj-ro-dis'-e-ak*). See *Antaphrodisiac*.

Antapopleptic (*ant-ap-o-plek'-tik*) [*anti*; *ἀποπληξία*, apoplexy]. Efficient in preventing or treating apoplexy.

Antarthritic (*ant-ar-thrit'-ik*) [*anti*; *ῥευματισμός*, gouty]. 1. Relieving gout. 2. A medicine for the relief of gout.

Antasphyctic (*ant-as-fik'-tik*) [*anti*; *ἀσπυκτικός*, pulseless]. 1. Efficient in preventing asphyxia. 2. An agent efficacious in preventing asphyxia.

Antasthenic (*ant-as-then'-ik*) [*anti*; *ἀσθενία*, weakness]. Tending to correct debility and restore the strength.

Antasthmatic (*ant-az-mat'-ik*) [*anti*; *ἄσθμα*, short-drawn breath]. 1. Relieving asthma. 2. A medicine serving for the relief of asthma.

Antebrachium (*an-te-brat'-ke-um*). See *Antibrachium*.

Antecurvature (*an-te-kur'-va-tūr*) [*ante*, forward; *curvatus*, bent]. A forward curvature.

Antefixatio uteri (*an-te-fiks-a'-she-o u'-ter-i*). The operative suturing of the uterus in retroflexion.

Anteflexion (*an-te-flek'-shun*) [*ante*, before; *flectere*, to bend]. A bending forward. **A. of Uterus**, a condition in which the fundus of the uterus is bent forward.

Antemetetic (*ant-em-et'-ik*). See *Antiemetic*.

Ante mortem (*an'-te mor'-tem*) [L.]. Before death. **A. partum**, before delivery.

Anteneasium, Anteneasmus (*an-ten-e-as'-mum, -mas*). P. Zaehias' term for a form of dementia marked by restlessness and a suicidal tendency.

Antephalitic (*ant-ef-a-l'-tik*) [*anti*; *ἐπιπληξία*, nightmare]. Preventive of nightmare.

Antepileptic (*ant-ep-il-ep'-tik*) [*anti*; *ἐπιπληξία*, epilepsy]. Relieving epilepsy.

Anteprostatic (*an-te-pros-lat'-ik*) [*ante*, before; *προστάτης*, one who stands before]. Situated before the prostate. **A. Glands**, certain small accessory glands sometimes found between Cowper's gland and the prostate.

Antepyrretic (*an-te-pi-ret'-ik*) [*ante*; *πυρετός*, fever]. Prior to the development of fever.

Antereisis (*ant-er-i'-sis*) [*ἀντερείσις*, resistance]. The resistance opposed by a dislocation during its reduction.

Anterior (*an-te'-re-or*) [L., "before"]. Situated before or in front of, pertaining to the part or organ situated toward the ventral aspect of the body. **A. Poliomyelitis**, inflammation of the anterior horns of the spinal cord, giving rise to a characteristic paralysis, common in children. **A. Rotation**, the forward turning of the presenting part in labor.

Antero- (*an'-te-ro-*) [*anterior*, before]. A prefix signifying position in front.

Anteroinferior (*an-te-ro-in-fe'-re-or*) [*antero*; *inferior*, lower]. Situated in front and below.

Anterolateral (*an-te-ro-lat'-er-al*) [*antero*; *latus*, a side]. In front and to or on one side; from the front to one side.

Anteroparietal (*an-te-ro-par-i-et-al*) [*antero*; *parietal*]. Anterior and also parietal. **A. Area**, the anterior part of the parietal area of the cranium.

Anteroposterior (*an-te-ro-pos-te'-re-or*) [*antero*; *posterior*, backward]. Extending from before backward.

Anterosuperior (*an-te-ro-su-pe'-re-or*) [*antero*; *superior*, upper]. Situated in front and above.

Anteversion (*an-te-ser'-shun*) [*ante*, forward; *vertere*, to turn]. A turning forward. **A. of Uterus**, a tilting forward of the uterus.

Anthectic (*an-thek'-tik*) [*anti*; *ἐκτικός*, hectic]. 1. Efficacious against tuberculosis. 2. An agent or remedy efficient against tuberculosis.

Anthelix (an'-the-lik) [*ἀνθελίξ*, the inner curvature of the ear]. The ridge surrounding the meatus of the external ear posteriorly.

Anthelmintic (an-thel-min'-tik) [anti-; *ἄλμυς*, a worm]. 1. Efficacious against worms. 2. A vermicide.

Anthema (an'-the-mah) [*ἀνθεῖν*, to bloom]. An eruption, a skin eruption.

Anthemis (an'-them-is) [*ἀνθεμῖς*, a flower]. Camomile. The flower-heads of *A. nobilis*, the properties of which are due to a volatile oil, a camphor, and a bitter principle. It is useful in coughs and spasmodic infantile complaints, and is an excellent stomachic tonic. Infusion of 3 dr to 1 pint, given in doses of 1-2 oz. (30-50 Cc.). **Anthemidis, Extractum** (B. P.). Dose 2-10 gr. (0.13-0.65 Gm.). **Anthemidis, Infusum** (B. P.). Dose 1-4 oz. (30-120 Cc.). **Anthemidis, Oleum**, the volatile oil of camomile. Dose 2-10 min. (0.1-0.6 Cc.).

Anthemorrhagic (ant-hem-ox-aj'-ik) [anti-; *ἄν*, blood, *ῥαγία*, a bursting]. Checking or preventing hemorrhage.

Anthocephalous, Anthocephalus (an-tho-sep'-al-us) [*ἀνθος*, a flower; *κεφαλή*, a head]. Having a flower-shaped head; e. g., *Tania anthocephala*.

Anthony's Fire, St. See *Erysipelas*.

Anthracemia (an-thrax-e'-me-ah) [*anthrax*; *αἷμα*, blood]. 1. Woodrow's disease, splenic fever of animals, a disease due to the presence in the blood of *Bacillus anthracis*. 2. Anthrax due to carbon monoxid poisoning.

Anthracene (an'-thra-sen) [*anthrax*], $C_{14}H_{10}$. A hydrocarbon formed from many carbon compounds when they are exposed to a high heat, also from coal-tar. It crystallizes in colorless, monoclinic tables, showing a beautiful blue fluorescence; dissolves with difficulty in alcohol and ether, but easily in hot benzene; melts at 213°. It is the base from which artificial alizarin is prepared.

Anthracia (an-thra'-se-ah) [*anthrax*]. A name for diseases characterized by the formation of carbuncles. **A. pestis**, the plague. **A. rubula**. Synonym of *Frambesia*.

Anthracic (an'-thra-ik) [*anthrax*]. Pertaining to or of the nature of anthrax.

Anthracin (an'-thra-sin) [*anthrax*]. A toxic poison derived from pure cultures of the bacillus of anthrax.

Anthracina (an-thra-sin'-ah). Melanotic carcinoma.

Anthracion (an-thra-sin'-on) [*anthrax*]. Contagious anthrax.

Anthracoid (an'-thra-oid) [*anthrax*; *ειδος*, likeness]. Resembling carbon, anthrax, or the carbuncle.

Anthracolemus, Anthracolæmus (an-thra-sin'-e-mus) [*anthrax*; *μῆμα*, a plague]. Contagious anthrax.

Anthracoma (an-thrak-o'-mah) [*anthrax*]. A carcinoma.

Anthracometer (an-thrak-om'-et-er) [*anthrax*; *μετρον*, a measure]. An instrument for esti-

inating the amount of carbon dioxide in the air.

Anthraconecrosis (an-thrak-o-ne-kro'-sis) [*anthrax*; *νεκρσις*, death]. The necrotic transformation of a tissue into a black mass as in dry gangrene.

Anthracopestis (an-thrak-o-pe-sis) [*anthrax*; *pestis*, a plague]. Malignant anthrax.

Anthracophlyctis (an-thrak-o-flik'-tis) [*anthrax*; *φλυκτις*, a pustule]. The same as *Anthracopestis*.

Anthracosis (an-thrak-o'-sis) [*anthrax*; *κασις*, disease]. 1. "Miners' lung." A diseased condition of the lung produced by the inhalation of coal-dust. It is a form of pneumokoniosis. 2. A malignant or corroding ulcer; a carbuncle.

Anthraflavon (an-thra-flav'-on) [*anthracene*; *flavus*, yellow], $C_{14}H_8O_4$. A substance acting as a dibasic acid, forming yellow needles subliming without fusion at temperatures above 300° C.

Anthrapurpurin (an-thra-pur'-pu-rin) [*anthracene*; *purpurin*], $C_{14}H_8O_4$. A derivative of anthraflavon acid and an isomer of purpurin and of flavopurpurin, almost identical with the latter; it forms orange-colored needles.

A. Acetate, A. Diacetate, a fine yellow, tasteless powder, freely soluble in glacial acetic acid and xylol, sparingly so in alcohol, insoluble in water. It is used as an aperient and laxative (it colors the urine red). Dose 7½ gr. (0.5 Gm.). Syn., *Purgatum*; *Purgator*.

Anthraquinolin (an-thra-kin'-al-in) [*anthracene*; *quina*, bark], $C_{17}H_{11}N$. A crystalline substance melting at 175° C., boiling at 446° C.; its solutions exhibit an intensely blue fluorescence.

Anthraquinone (an-thra-kin'-on) [*anthracene*; *quinone*], $C_{14}H_8O_2$. A substance produced by oxidizing anthracene with HNO_3 . It sublimes in yellow needles, melting at 277° C., and is soluble in hot benzene and HNO_3 .

Anthrarobin (an-thra-ro'-bin), $C_{14}H_{10}O_4$. A derivative of alizarin, similar to chrysarobin. It is a yellowish-white powder, insoluble in water, but soluble in alcohol and dilute alkaline solutions. It is useful in psoriasis, herpes, pityriasis versicolor. Unof.

Anthrax (an'-thraks) [*ἀνθραξ*, a coal or a carbuncle]. 1. A carbuncle. 2. An acute infectious disease due to *Bacillus anthracis*. It is most common in cattle and sheep, but may occur in man. Infection in man may occur—(a) through a wound, the resulting lesion being a boil or carbuncle, whence the disease becomes disseminated through the blood. (b) Through the intestinal tract. In this case there are marked local lesions, either such as resemble the dermal boils or a hemorrhagic infiltration of the mucous membrane. (c) Through the respiratory tract. The results are inflammatory processes in the lungs and pleura. Syn., *Milchbrand*; *Charbon*, *Woolworker's disease*; *Splenic fever*; *Splenic apoplexy*; *Siberian cattle plague*; *Plaga ignis*; *Acacanthrax*; *Mal de Ch*

- Abscessus gangrenescens*; *Abscessus gangrenosus*. **A.**, Contagious, malignant anthrax. **A.**, Malignant. See *Anthrax* (2). **A.**, Pulmonary, gangrene of the lungs. **A.**, Symptomatic. See *Black-leg*.
- Anthropo-** (*an-thro-po-*) [*ἄνθρωπος*, a man; a human being]. A prefix signifying relating to man or to the human race.
- Anthropogenesis** (*an-thro-po-jen'-es-is*) [*an-thro-po-*; *γένεσις*, generation]. The development of man, as a race (*phylogenesis*) and as an individual (*ontogenesis*).
- Anthropoglot** (*an'-thro-po-glōt*) [*anthropo-*; *γλῶσσα*, the tongue]. Human-tongued, as a parrot.
- Anthropography** (*an-thro-pog'-ra-fe*) [*anthropo-*; *γράφειν*, to write]. A treatise upon the human structure or organism.
- Anthropoid** (*an'-thro-poid*) [*ἄνθρωπος*, a man; *ειδός*, like]. Man-like.
- Anthropology** (*an-thro-pol'-o-je*) [*anthropo-*; *λόγος*, discourse]. The science of man.
- Anthropometallism** (*an-thro-po-met'-al-izm*) [*anthropo-*; *μέταλλον*, metal]. Hypnotism or the like condition, induced by looking at a metallic disc.
- Anthropometry** (*an-thro-pom'-et-re*) [*anthropo-*; *μέτρον*, a measure]. The determination of the measurement, weight, strength, and proportions of the parts of the human body.
- Anthropomorphic** (*an-thro-po-mor'-fik*) [*anthropo-*; *μορφή*, form]. Man-like.
- Anthropophagy** (*an-thro-pol'-a-je*) [*anthropo-*; *φάγειν*, to devour]. 1. Cannibalism. 2. Sexual perversion leading to rape, mutilation, and cannibalism.
- Anthropophobia** (*an-thro-po-fō'-be-ah*) [*anthropo-*; *φόβος*, fear]. A symptom of mental disease consisting in fear of society.
- Anthropotoxin** (*an-thro-po-toks'-in*) [*anthropo-*; *τοξικόν*, poison]. The toxic substance supposed to be excreted by the lungs of human beings.
- Anthropic** (*ant-hi-drop'-ik*) [*anti-*; *ὑδρωψία*, dropsy]. Effective against dropsy.
- Anthypnotic** (*ant-hip-nōt'-ik*) [*anti-*; *ὑπνος*, sleep]. 1. Preventive of sleep. 2. An agent that tends to induce wakefulness.
- Anthysteria** (*ant-his-ter'-ik*) [*anti-*; *δυσέρεια*, the womb]. Overcoming hysteria.
- Anti-** (*an-ti-*) [*ἀντί*, against]. A prefix meaning against.
- Antiades** (*an-ti'-ad-ēs*) [pl. of *ἀντιὰς*, tonsil]. The tonsils.
- Antiagglutinin** (*an-te-ag-lu'-tin-in*). A substance opposed in action to an agglutinin.
- Antiaffessin** (*an-te-ah-gres'-in*) [*anti-*; *αγρессин*]. A hypothetic content of the serum of an animal immunized to aggrassin-containing serous exudate produced in a second animal by bacterial inoculation.
- Antialbumate** (*an-te-al'-bu-māt*) [*anti-*; *albumen*, white of egg]. Parapeptone; a product of the imperfect digestion of albumin. It is changed by the pancreatic ferment into antipeptone.
- Antialbumin** (*an-te-al'-bu-min*) [see *Antialbumate*]. One of the products of the action of the digestion of albumin; it is probably one of the preformed substances existing in the proteid molecule.
- Antialbumose** (*an-te-al'-bu-mōs*) [see *Antialbumate*]. One of the albumoses produced by the action of pancreatic juice on albumin. It resembles syntonin or acidalbumin, and is convertible into antipeptone.
- Antiamboceptor** (*an-te-am-bo-cep'-tor*). A substance which inhibits the action of an amboceptor.
- Antiaphrodisiac** (*an-te-af-ro-dis'-e-ak*). See *Amphrodisiac*.
- Antiarin** (*an-te-ar-in*) [Javanese, *antiar* or *antjar*], $C_{14}H_{15}O_3 + 2H_2O$. The active principle of *Antiaris toxicaria* or *Upas antiar*, Javanese poison-tree. Intensely poisonous and used as an arrow-poison. Is a cardiac depressant. Dose, $\frac{1}{4}$ gr. (0.0065 Gm.). Unof.
- Antiarthritic** (*an-te-ar-thrit'-ik*). See *Antiarthritic*.
- Antisthmatic** (*an-te-as-mat'-ik*). See *Antesthmatic*.
- Antibacterial** (*an-te-bak-ter'-e-al*) [*anti-*; *bacteria*]. Acting against bacteria.
- Antibacterin** (*an-te-bak-ter-in*). 1. A pale yellow fluid said to consist of boric acid, 0.25 parts; iron chlorid solution, 1.5 parts; ether chlorate, to make 100 parts. It is used by inhalation in tuberculosis, beginning with 100 gr. (10 Gm.) daily, and increasing to 10 times that quantity. 2. Crude aluminium sulfate mixed with soot.
- Antibiotic** (*an-te-bi-ot'-ik*) [*anti-*; *βίος*, life]. Tending to destroy life.
- Antiblennorrhagic** (*an-te-blen-or-ai'-ik*) [*anti-*; *βλιννα*, mucus, *ρρρρρρ*, to burst]. Efficient in preventing or curing gonorrhea.
- Antibodies** (*an-te-bod'-ēz*). Characteristic constituents of the blood and fluids of the immune animal; antagonistic to the harmful action of bacteria; e. g., antitoxins, agglutinins, precipitins, etc. They cause the enveloping surrounding bacterial bodies to swell, and on this account are called by Gruber *glabrifins*. This swelling renders bacteria amenable to the action of the alexins, which kill them. Cf. *Antitoxin*.
- Antibrachial** (*an-te-brā'-ke-al*) [*anti-*; *βραχιον*, the arm]. Pertaining to the forearm.
- Antibrachium** (*an-te-brā'-ke-um*). The forearm.
- Anticardium** (*an-te-kar'-de-um*) [*anti-*; *καρδια*, the heart]. The scrobiculus cordis, or pit of the stomach; the infrasternal depression.
- Anticheirotonus, Antichirotonus** (*an-te-kei-rot'-o-nus*) [*anti-*; *χειρ*, hand, *τονος*, tension]. forcible and steady inflection of the thumb, seen at times in or before attacks of epilepsy.
- Antichlor** (*an-te-klor*). 1. Sodium thiosulfate. 2. Potassium sulfite.
- Anticholerin** (*an-te-kol'-er-in*) [*anti-*; *χολέρα*, cholera]. A product isolated by Klebs from cultures of cholera bacilli. Immunizing and curative properties have been ascribed to it.
- Anticipating** (*an-tis'-ip-a-ting*) [*anticipare*, to take before]. Occurring before the regular

or expected time, as an *anticipating* intermittent fever, one in which the paroxysms occur at earlier or successive days.

Anticlinal (*an-te-klī-nāl*) [*anti-*, *κλίνας*, to slope]. Sloping in opposite directions. **A. Vertebra**, in man, the tenth thoracic vertebra, where the thoracic vertebrae begin to assume the characters of the lumbar.

Anticnemion (*an-tek-nē-me-on*) [*anti-*, *κνήμη*, leg]. The shin or front of the leg.

Anticnesmatic (*an-tek-nēs-mat'ik*) [*anti-*, *κνημιον*, itching]. 1. Efficient against itching. 2. A remedy for itching.

Anticoagulant (*an-te-ko-āg'ū-lant*) [*anti-*, *coagulum*]. 1. Opposed to or preventive of coagulation. 2. A substance preventing coagulation.

Anticomplement (*an-te-kom'ple-ment*) [*anti-*, *complement*]. A substance held by Ehrlich in his lateral-chain theory to enter into the constitution of an antihemolysin (*q. v.*). Cf. *Antimmune Body* under *Body*.

Anticope (*an-tek'ōp-ē*) [*ἀντίκοπη*, a beating back]. Resonance; reaction; repercussion; counterstroke.

Anticrisis (*an-te-kri'is*) [*anti-*, *crisis*]. An agent or phenomenon preventing a crisis.

Anticus (*an-tek'us*) [*anticus*, that in front]. Anterior; in front of.

Anticyclie Acid. See *Acid*, *Anticyclie*.

Antidiabeticum (*an-te-di-a-bet'ik-um*). A preparation recommended for diabetes, said to consist of wheat starch, sugar of milk, sulfur, powdered senna leaves, and fennel seed. *Antidiabeticol*, *Glucosakol*.

Antidiabetin (*an-te-di-āb-et'in*). A mixture of saccharin and mannite used instead of sugar by diabetics.

Antidiastole (*an-te-di-ast'ō-le*) [*ἀντιδιαστολή*, contraction]. Differential diagnosis.

Antidinic (*an-te-din'ic*) [*anti-*, *δίνω*, a whirl]. Causing or preventing vertigo.

Antidiphtherin (*an-te-dif'ther-in*). A solution containing cultures of *Bacillus diphtherie* with 1-2% of orthocresol and some glycerol. It is used externally and subcutaneously in diphtheria. **A. Klebs'**, a preparation obtained by precipitation with alcohol from the culture fluid of *Bacillus diphtherie* after removal of the bacilli.

Antidotai (*an-te-dō'tai*) [*anti-*, *δοτός*, given]. The nature of an antidote.

Antidote (*an-te-dōt*) (see *Antidotai*). An agent preventing or counteracting the action of a poison. **A. Arsenical** (G. Ph.), is prepared by dissolving 100 parts of the hydrated sulfate of iron in 250 parts of water, to which 15 parts of burnt magnesia and 250 parts of water are added. **A. Chemic**, one that changes the chemie nature of the poison so that it becomes insoluble or harmless. **A. Mechanic**, one that prevents absorption by holding the poison in suspension or by coating the stomach. **A. Physiologic**, one that counteracts the physiologic effects of a poison. **A. Universal**, a mixture of 1 part of dis-

solved iron sulfate in 2 parts of magnesia water.

Antidotism (*ant'id-ō-tizm*) (see *Antidotai*). Therapeutic or physiologic antagonism; the possession of antidotal properties; the act of giving antidotes.

Antidynamic (*an-te-dī-nam'ik*) [*anti-*, *δυναμική*, force]. Weakening.

Antidysenteric (*an-te-dis-en-ter'ik*) [*anti-*, *δυσεντερία*, dysentery]. 1. Serviceable against dysentery. 2. A remedy for dysentery.

Antiemetic (*an-te-em-et'ik*) [*anti-*, *ἐμετικός*, causing vomit]. Preventing emesis; relieving nausea.

Antifebrin (*an-te-feb'rin*) [*anti-*, *febris*, a fever]. $C_9H_7 \cdot C_2H_5O \cdot NH$. The proprietary name of acetanilid or phenylacetamid. A white, crystalline powder, insoluble in water, freely soluble in alcohol ether, and chloroform. It is antipyretic and analgesic. The drug's official name is *acetanilidum*. Dose 5-10 gr. (0.3-0.6 Gm.).

Antiferment (*an-te-fer'ment*) [*anti-*, *fermentum*, leaven]. An agent that prevents fermentation.

Antifermentative (*an-te-fer-men'ta-tiv*) [*anti-*, *ferment*]. Preventing fermentation.

Antigalactic (*an-te-gal-ak'tik*) [*anti-*, *γάλα*, milk]. 1. Lessening the secretion of milk. 2. A drug that lessens the secretion of milk.

Antigermin (*an-te-ger'min*). A compound of copper and an acid, forming a yellowish-green, tenacious mass, soluble in 200 parts of water. It is said to be disinfectant, deodorant, and bactericidal.

Antigerminal (*an-te-ger'min-al*) [*anti-*, *germen*, germ]. Relating to the pole of the ovum opposed to the germinal pole.

Antihelix (*an-te-he'iks*). See *Anthelix*.

Antihemolysin (*an-te-hem-o-lī'sin*) [*anti-*, *αἷμα*, blood; *λύω*, solution]. A complex substance developed in the blood-serum as the result of inoculations with hemolysins. It is composed of anticomplements and antimmune bodies.

Antihemolytic (*an-te-hem-o-lī'tik*). Relating to an antihemolysin; not capable of dissolving blood-corpuscles.

Antihidrotic (*an-te-hi-dro'tik*) [*anti-*, *ἰδρώς*, sweat]. 1. Diminishing the secretion of sweat. 2. An agent lessening the secretion of sweat.

Antihydropin (*an-te-hi'dro-pin*) [*anti-*, *ὑδρῶς*, water]. A crystalline principle obtainable from the common cockroach, *Blatta* (*Periplaneta*) *orientalis*, and said to be diuretic. Dose 10-20 gr. (0.6-1.3 Gm.).

Antikamnia (*an-te-kam'ne-ah*) [*anti-*, *κόπω*, to suffer pain]. A proprietary remedy said to be composed of sodium bicarbonate, acetanilid, and caffeine. It is used as an analgesic in doses of 5-10 gr. (0.32-0.65 Gm.).

Antikathode (*an-te-kath'ōd*) [*anti-*, *kathode*]. A piece of platinum foil so placed in a Crookes tube as to intercept the kathode rays.

thus rendered fluorescent, it becomes a source of roentgen-rays.

Antikol (an'-tik-ol). A proprietary antipyretic mixture said to contain acetanilid, sodium bicarbonate, and tartaric acid.

Antilemic, Antilemic, Antilemic (an-te-le'-mik, an-te-loi'-mik) [anti-; λημῆς, the plague]. Efficacious against the plague or other pestilence.

Antileptic (an-ti-lep'-tik) [ἀντιληπτός, a receiving in return]. Revulsive.

Antilithic (an-te-lith'-ik) [anti-; λίθος, a stone]. 1. Efficacious against calculus. 2. An agent preventing the deposit of urinary sediment.

Antilemic (an-ti-le'-mik). See *Antilemic*.

Antileptic (an-te-lu-el'-ik) [anti-; lues, the plague; syphilis]. Efficacious against syphilis.

Antipyrrin (an-te-le-pi'-rin). An antipyretic and analgesic substance obtained by heating acetanilid, 1 part, with antipyrin, 2 parts. Dose 7-8 gr. (0.45-0.52 Gm.).

Antilysin (an-te-li'-sin) [anti-; λύσις, a losing]. A substance opposed to the activity of a lysin.

Antilysis (an-ti-l'-is-is). The condition due to the activity of antilysin.

Antilyssic (an-te-lis'-ik) [anti-; λύσσα, rabies]. 1. Tending to cure rabies. 2. A remedy for rabies.

Antimetropia (an-te-met-ro'-pe-ah) [anti-; metropia]. A condition characterized by opposing states of refraction in the two eyes, as, for example, the existence of myopia in one eye and of hyperopia in the other.

Antimiasmatic (an-te-mi-as-mat'-ik) [anti-; μiasμα, exhalation]. Preventive of malaria.

Antimonial (an-te-mo'-ne-al) [antimonium, antimony]. Containing antimony.

Antimonic (an-te-mon'-ik) [see *Antimonial*]. A term applied to those compounds of antimony that correspond to its higher oxid.

Antimonious (an-te-mo'-ne-us) [see *Antimonial*]. A term denoting those compounds of antimony that correspond to its lower oxid.

Antimonium (an-te-mo'-ne-um). See *Antimony*.

Antimony (an'-te-ma-ne) [L., *antimonium*], Sb = 122; quantivalence III and V. A metallic, crystalline element possessing a bluish-white luster. The symbol Sb is derived from the old name, *stibium*. Antimony is found native, as the sulfid, Sb₂S₃, as the oxid, and is a constituent of many minerals. It is used commercially chiefly for making alloys. Type-metal, Britannia metal, and Babbitt antifriction metal are alloys of antimony. In medicine antimonium salts are used less frequently than formerly. The salts are cardiac and arterial depressants, diaphoretic and emetic, and in large doses powerful gastrointestinal irritants, producing symptoms resembling those of Asiatic cholera. Antimony has been used as an antiphlogistic in sthenic inflammation, as a diaphoretic and expectorant, and as an emetic. **A. Arsenate**, a heavy white powder; it is used in syphilitic affections of the skin. Dose $\frac{3}{16}$ gr. (0.020 Gm.) 4 times daily. **A. Arsenite**, a fine white powder; it is used in skin diseases. **A. Chlorid**, SbCl₃, the "butyr" of antimony; a strong caustic. **A. Iodid**, SbI₃, red crystals, decomposed by water soluble in carbon disulfid, melts at 107° C. It is alterative. Dose $\frac{1}{4}$ -1 gr. (0.016-0.065 Gm.) in pills. **A. Oxychlorid**, the "powder of algaroth", now little used. **A. Pentoxid**, Sb₂O₅, antimonious acid, combines with bases to form antimonates. **A., Pills of Compound** (*pilule antimonii composita*, B. P.), Plummer's pills, contain calomel and sulfured antimony, of each, $\frac{1}{4}$ gr. (0.032 Gm.). **A. and Potassium Tartrate** (*antimonii et potassii tartarus*, U. S. P.; *antimonium tartaratum*, B. P.), 2KSB(C₂H₃O₆ · H₂O), "tartar emetic." Dose $\frac{1}{16}$ - $\frac{1}{4}$ gr. (0.004-0.016 Gm.). **A., Powder of** (*pulvis antimonialis*, B. P.), antimonial powder, James' powder, consists of antimonious oxid 33, and calcium phosphate 67 parts, and is diaphoretic, in large doses, emetic and cathartic. Dose 3-8 gr. (0.2-0.5 Gm.). **A. Sulfid**, Sb₂S₃, black sulfid of antimony. Dose $\frac{1}{4}$ gr. (0.016-0.065 Gm.). **A. Sulfid, Golden**, Sb₂S₃, a fine, odorless, orange-yellow powder, soluble in alkaline solutions. It is alterative, diaphoretic, emetic, and expectorant. Dose $\frac{1}{4}$ - $\frac{1}{16}$ gr. (0.01-0.1 Gm.) several times daily. **A., Sulfured** (*antimonium sulphuratum*, B. P.), the sulfid with a small but indefinite amount of the oxid. Dose 1-5 gr. (0.065-0.32 Gm.). **A. Tartrate**, (SbO)₂C₂H₃O₆ · H₂O, a white, crystalline powder. Used internally as a substitute for arsenic in affections of the skin. Dose $\frac{1}{16}$ gr. (0.0065 Gm.) 3 to 5 times daily. **A. Trioxid**, antimonious acid, Sb₂O₃, soluble in hydrochloric and tartaric acids. Dose 1-2 gr. (0.065-0.13 Gm.). It is an ingredient of James' powder. **A., Vegetable**, boneset. **A., Wine of** (*vinum antimonii*, U. S. P.), boiling water, 60; tartar emetic, 4; stronger white wine, 1000 parts. It contains about 2 gr. of tartar emetic to the ounce. Dose 5-15 min. (0.3-1.0 Cc.).

Antimycotic (an-te-mi-ko'-ik) [anti-; μύκηξ, a fungus]. Destructive to microorganisms.

Antimydratic (an-te-mid-re-al'-ik) [anti-; μυδρίασις, mydriasis]. 1. Opposed to or arresting dilation of the pupils. 2. A drug efficacious against mydriasis.

Antinarcotic (an-te-nar-ko'-ik) [anti-; νάρκωσις, a benumbing]. Preventing narcosis.

Antineuralgic (an-te-nu-ral'-jik) [anti-; νευραλγία, a nerve, άλγος, pain]. Overcoming neuralgia.

Antinonin (an-te-non'-in), C₂H₅ · (NO₂)₂ · CH₃, OK, potassium orthodinitroresylate. See *Dinitroresol*.

Antiotomy, Antiotomy (an-te-o-to'-me-ah, an-te-al'-om-e) [ἀντιτομή, a tonsil; τέμνειν, to cut]. Excision of the tonsils.

Antipaludean (an-te-pal-u'-de-an) [anti-; palus,

a marsh]. Efficient against malarial diseases.

Antiparasitic (*an-te-par-as-it'-ik*) [*anti*; *παράσιτος*, a parasite]. 1. Destroying parasites. 2. An agent destroying parasites.

Antiparastata (*an-te-par-as'-tat-ah*) [*anti*; *παράστατος*, testicle]. Cowper's glands.

Antipeptone (*an-te-pep'-tōn*) [*anti*; *πέπτος*, to cook, digest]. A variety of peptone not acted upon by trypsin.

Antiperiodic (*an-te-pe-ri-od'-ik*) [*anti*; *περίοδος*, a going round]. 1. Preventing periodic attacks of a disease. 2. A remedy against periodic disease. **A. Tincture.** See *Warburg's Tincture*.

Antiperistalsis (*an-te-per-is-tal'-sis*) [*anti*; *περί*, around, *σπάζω*, compression]. Reversed peristalsis.

Antiperistaltic (*an-te-per-is-tal'-tik*) [see *Antiperistalsis*]. Relating to antiperistalsis.

Antiperonosporin (*an-te-per-o-nos'-por-in*). Topazol G. I., an antiseptic preparation of zinc and copper sulfates.

Antiphlogistic (*an-te-flō-jis'-tik*) [*anti*; *φλόγιστος*, inflammatory heat]. 1. Counteracting fever. 2. An agent subduing or reducing inflammation or fever. 3. Applied to the pneumatic theory of Lavoisier as having supplanted Stahl's phlogistic theory. **A. Treatment,** bloodletting, the application of cold, the administration of antipyretics, etc.

Antiphlogistin (*an-te-flō-jis'-tin*). A paste said to consist of kaolin, glycerol, and antiseptics, it is a substitute for poultices.

Antiphlogosis (*an-te-flō-go'-sis*) [see *Antiphlogistic*]. 1. The reduction of inflammation. 2. Inflammation purposely excited to counteract other inflammation.

Antiphrasin (*an-te-fr'-sin*). Dilute tuberculin, made from the slight residue after precipitation with sodium bismuth iodide.

Antiplastic (*an-te-plas'-tik*) [*anti*; *πλάσσω*, to form]. 1. Unfavorable to granulation or to the healing process. 2. An agent impoverishing the blood. 3. Preventing or checking plastic exudation.

Antipodal (*an-tip'-od-al*) [*anti*; *πός*, a foot]. Situated directly opposite. **A. Cells,** a term applied to a group of four cells formed in the lower end of the embryo-sac opposite to the cells constituting the egg-apparatus. **A. Cone,** the cone of astral rays opposite to the spindle-fibers.

Antipraxis (*an-te-praks'-e-ah*) [*anti*; *πράξις*, to do]. Antagonism of functions or of symptoms.

Antiprostatitis (*an-te-pros-lat'-i'-tis*) [*anti*; *πρόστας*, the prostate; *εἰς*, inflammation]. Inflammation of Cowper's glands. Syn., *Antiparastatitis*.

Antipruritic (*an-te-pru-rit'-ik*) [*anti*; *πρuritus*, itching]. 1. Relieving the sensation of itching. 2. A drug that relieves the sensation of itching.

Antipsoric (*an-tip-so'-rik*) [*anti*; *ψώρα*, the

itch]. Effective against itching or the itch.

Antipyresis (*an-te-pi-re'-sis*) [*anti*; *πυρετός*, fever]. The reduction of fever by means of antipyretics.

Antipyretic (*an-te-pi-re'-ik*) [see *Antipyresis*]. 1. Cooling; lowering the temperature. 2. An agent reducing temperature. The most important antipyretic agents are cold, diaphoretics, and the newer remedies, many of which are coal-tar products, such as antipyrin, acetanilid, phenacetin, etc.

Antipyrin (*an-te-pi'-rin*) [*anti*; *πύρ*, fever heat, $C_{11}H_{13}N_2O$]. Phenazon. The scientific name is dimethyloxychinicin-phenyldimethylpyrazolon, or dihydrodimethylphenylpyrazin. An alkaloidal product of the destructive distillation of coal-tar. It may be produced by heating acetoacetic ester with methylphenylhydrazin. It is a grayish or reddish-white, crystalline powder, slightly bitter, soluble in water, alcohol, and chloroform, and crystallizes from an ethereal solution in shining leaflets melting at 113° . It reduces temperature, causes sweating, at times vomiting, peculiar eruptions, pruritus, coryza, etc. Not rarely a cyanotic condition of the face and hands is produced. Antipyrin is incompatible with nitrous compounds. It is a powerful antipyretic and analgesic. Dose 5-15 gr. (0.3-1.0 Gm.). **A. Bichloral,** a trituration product of 94 parts of antipyrin with 165.5 parts of chloral hydrate; it is hypnotic and analgesic. Maximum dose 45 gr. (3 Gm.). Syn., *Dichloralantipyrin*. **A. Mandelate,** a crystalline compound of antipyrin and amygdalic acid, used as a remedy for whooping-cough. Dose $\frac{1}{2}$ -8 gr. (0.05-0.5 Gm.). Syn., *Tussol*; *Phenylglycollate*. **A. Salicylate, A. Salol,** a brown liquid obtained by fusing together equal parts of phenyl salicylate and antipyrin. It is recommended as an antiseptic, and as a hemostatic in uterine hemorrhage, applied by means of cotton tampons. Syn., *Salipyrin*. **A., Test for.** See *Fieuz*.

Antirabic (*an-te-ra'-lik*) [*anti*; *rabies*, madness]. Preventing or curing rabies.

Antirennene (*an-te-ren'-ēn*). Morgenroth's name for the principle which appears in the blood of an animal following the introduction of rennet. It has the power of impeding the action of rennet on milk.

Antirheumatic (*an-te-ru-mat'-ik*) [*anti*; *rheumatism*]. Preventing or curing rheumatism.

Antirheumaticum (*an-te-ru-mat'-ik-um*). A compound of sodium salicylate and methylene blue. It occurs in blue, prismatic crystals, soluble in water and alcohol. Dose 1-1½ gr. (0.06-0.09 Gm.).

Antirheumatin (*an-te-ru'-mat-in*). An ointment used in treatment of rheumatism, and said to contain fluorphenetol, 1 part; di-fluordiphenyl, 4 parts; vaselin, 10 parts; wool-fat, 85 parts.

Antirrhinum (*an-te-ri'-num*) [L.]. A genus of scrophulariaceous plants. *A. linaria*, called also *Linaria vulgaris*, toadflax, ramsted, "butter-and-eggs," is a herbaceous plant of Europe and North America; diuretic, cathartic, and irritant; used as a poultice and fomentation.

Antiscorbutic (*an-te-skor-bu'-tik*) [*anti-*; *scorbutus*, scurvy]. 1. Effective against scurvy. 2. A remedy useful in scurvy.

Antisensitizer (*an-te-sen'-sit-i-zer*). In Ehrlich's side-chain theory, a substance antagonistic in its action to that of the intermediary body or sensitizer.

Antiseptin (*an-te-sep'-sin*) [*anti-*; *σῆψις*, putrefaction]. $C_8H_7BrNHC_2H_5O$. Asepsin; bromated acetanilid; soluble in alcohol and ether, insoluble in water. It is antipyretic, analgesic, and antiseptic. Dose 6-7 gr. (0.30-0.35 Gm.).

Antisepsis (*an-te-sep'-sis*) [see *Antiseptin*]. Exclusion of the germs that cause putrefaction.

Antiseptic (*an-te-sep'-tik*) [see *Antiseptin*]. 1. Having power to prevent the growth of the bacteria upon which putrefaction depends. 2. An agent that prevents development of bacteria. Among the principal antiseptics are mercuric chloride, creolin, phenol, iodoform, thymol, salicylic acid, boric acid, formaldehyd, and potassium permanganate. **A. Gauze**, open cotton cloth charged with an antiseptic. **A. Ligature**, catgut or other material rendered aseptic by soaking in antiseptic solutions. **A. Treatment of Wounds**, this looks to thorough antisepsis as regards the wound, the instruments, the operator's hands, the dressings, etc.

Antisepticism (*an-te-sep'-tis-izm*) [see *Antiseptin*]. The theory or systematic employment of antiseptic methods.

Antisepticize (*an-te-sep'-tis-iz*) [see *Antiseptin*]. To render antiseptic, to treat with antiseptics.

Antiseptin (*an-te-sep'-tin*) [see *Antiseptin*]. 1. Zinc borathymoliodid. It consists of 85 parts zinc sulfate, 25 parts each of zinc iodid and thymol, and 10 parts boric acid. It is an antiseptic. 2. A proprietary preparation said to consist of sodium or potassium silicate, 2 parts, and a 0.1% solution of mercuric chloride, 1 part.

Antiseptol (*an-te-sep'-tol*) [see *Antiseptin*]. Cinchoun iod-sulfate, an odorless and fairly effective substitute for iodoform.

Antiserum Method. A method of differentiating human from other blood; modified Uhlenhuth's antiserum method. Human blood-serum is injected into the peritoneal cavity of rabbits in doses of 10 Cc. every 8 or 10 days. After 6 injections their blood is collected and preserved on ice, the serum is pipetted off after 24 hours. Some rabbits, as control-animals, are not injected. The blood to be tested is, if dried, first dissolved, and then, as is fluid blood, diluted with ordinary water and salt solution. Several drops of the test-serum

are added and the tubes placed at a temperature of 35°. If the blood to be tested is human, a turbidity appears invariably, if not human, it remains clear.

Antisialagog (*an-te-si-al'-a-gog*) [*anti-*; *saliva*, saliva; *ἀγᾱγῆς*, leading]. 1. Preventing or checking salivation. 2. A remedy that is effective against salivation.

Antisialic (*an-te-si-al'-ik*) [*anti-*; *saliva*, saliva]. 1. Checking the flow of saliva. 2. An agent that checks the secretion of saliva.

Antisideric (*an-te-sid-er'-ik*) [*anti-*; *σίδηρος*, iron]. 1. Incompatible with iron and counteracting its effects; impoverishing the blood. 2. An agent or drug opposed to the action of iron; one which impoverishes the blood.

Antispasmin (*an-te-spaz'-min*), $C_{25}H_{28}NO_3Na + 3NaC_2H_3O_2$. A compound of 1 molecule of narcein sodium united with 3 molecules of sodium salicylate, occurring as a white slightly hygroscopic powder containing about 50% of narcein. It is sedative and hypnotic. Dose $\frac{1}{2}$ -1½ gr. (0.01-0.1 Gm.).

Antispasmodic (*an-te-spaz'-mod'-ik*) [*anti-*; *σπασμῶς*, a spasm]. 1. Tending to relieve spasm. 2. An agent relieving convulsions or spasmodic pains, as the narcotics, the nitrites, etc.

Antispastic (*an-te-spaz'-tik*) [*anti-*; *σπαστικός*, drawing]. 1. Revulsive; counterirritant. 2. Antispasmodic. 3. A revulsive agent.

Antistaphylolysin (*an-te-staf-il-o-li'-sin*) [*anti-*; *Staphylococci*, a genus of bacteria; *λύσις*, a loosing]. A substance antagonistic to the toxic products of staphylococci, contained in healthy blood-serum.

Antistreptococcic (*an-te-strep-to-kok'-sik*) [*anti-*; *Streptococci*, a genus of bacteria]. Antagonistic to or preventing the action of streptococci.

Antisudoral (*an-te-su'-der-al*) [*anti-*; *σῦδος*, sweat]. Checking the secretion of sweat.

Antisyphilitic (*an-te-sif-il-it'-ik*) [*anti*; *σφιλίτις*]. 1. Effective against syphilis. 2. A remedy used in the treatment of syphilis.

Antithenar (*an-tith'-en-ar*) [*anti-*; *ἔκσπερ*, the flat of the hand or the sole of the foot]. 1. Opposite to thenar. 2. A muscle that extends the thumb or opposes it to the hand, an antithenar muscle. **A. Eminence**, the border of the palm of the hand from the base of the little finger to the wrist. **A. Muscles**, of the toe and of the thumb; the abductor pollicis pedis and the flexor brevis pollicis manus; also, the first dorsal interosseous muscle.

Antithermic (*an-te-ther'-mik*) [*anti-*; *ῥίψω*, heat]. Cooling; antipyretic.

Antithermin (*an-te-ther'-min*) [see *Antithermic*]. $C_{11}H_7O_2N_2$. Phenylhydrazinlevulinic acid, a coal-tar derivative used as an antipyretic, analgesic, and antiseptic. Dose 5 gr. (0.3 Gm.). Unof.

Antitoxic (*an-te-tok'-ik*) [*anti-*; *τοξικόν*, poison]. Antidotal; counteracting poisons.

Antitoxin (*an-te-tox'in*) [see *Antitoxic*]. 1.

A counterpoison or antidote elaborated by the body to counteract the toxins of bacteria. According to some authorities, antitoxins are, like the toxins, bacterial products. Antitoxins are used in the treatment of certain infectious diseases and also to confer immunity against these diseases. 2. The commercial name for a fine white powder said to be a coal-tar product and used as an analgesic and antipretic. Dose 10-15 gr. (0.65-1.0 Gm.) in from 1 to 4 hours. **A.**, **Artificial**, an antitoxin prepared by passing an electric current through a toxic bouillon. **A.**, **Diphtheria**, one prepared from the blood-serum of an animal inoculated with *Bacillus diphtherie*. **A.**, **Tetanus**, one prepared from the blood-serum of an animal inoculated with *Bacillus tetani*. **A.** **Unit**, 10 times the amount of serum requisite to neutralize completely 10 times the minimum fatal dose of diphtheria toxin in a half-grown guinea-pig, or the amount of antitoxin which, when inoculated into a guinea-pig of 250 Gm. weight, will neutralize 100 times the minimum fatal dose of toxin of standard weight.

Antitragic (*an-te-tra'i-ik*) [*anti*; *τράγος*, the tragus]. Pertaining to the antitragus. **A.** **Muscle**, a mere rudiment in man; it arises from the antitragus, and extends to the cauda of the helix.

Antitragus (*an-te-tra'-gus*). An eminence of the external ear opposite the tragus.

Antitrisismus (*an-te-tris'-mus*) [*anti*; *τρίσμος*, a cravaking]. A condition in which the open mouth cannot be closed.

Antitrope (*an-te-trop*) [*anti*; *ἐπείσσειν*, to turn]. Organs arranged to form a symmetric pair.

Thus, the right eye is an antitrope to the left.

Antityptic (*an-te-tip'-tik*). 1. A ferment inimical to bacteria. 2. Antagonistic to proteolysis.

Antityphoid (*an-te-ti'-foid*). Opposed to typhoid. **A.** **Extract**, a preparation obtained by injecting repeatedly cultures of typhoid bacilli of increasing virulence into the peritoneal cavity of rabbits. The animals are killed as soon as they do not react to poisonous doses, and extracts are made of the thymus, spleen, bone-marrow, brain, and spinal cord, by soaking these organs in a solution of salt, glycerol, and alcohol, with the addition of some pepsin. The filtrate is injected in typhoid cases.

Antitypic (*an-te-tip'-ik*) [*anti*; *τύπος*, a type]. 1. Efficient against the periodic recurrence of a paroxysm or fever. 2. Irregular; not conformable to a type. 3. An antiperiodic.

Antiruratic (*an-te-u-rat'-ik*). 1. Efficacious against the deposition of urates. 2. An agent that prevents the deposit of urates.

Antivenin (*an-te-ven'-in*) [*anti*; *venenum*, poison]. A serum perfected by Calmette by infecting cobra venom mixed with solutions of calcium hypochlorite into horses. It is used in doses of 24-5 dr. (10-20 Cc.) in

bites of venomous serpents. Syn., *Antivenene*.

Antivenomous (*an-te-ven'-om-us*). Antagonistic to venom; a term applied to immunized animals, to certain serums, and to antitoxins.

Antivirulent (*an-te-vir'-u-lent*) [*anti*; *virus*, a poison]. Effective against viruses.

Antizymotic (*an-te-zī-mot'-ik*) [*anti*; *ζύμωσις*, fermentation]. 1. Preventing or checking fermentation. 2. An agent preventing the process of fermentation; an antifermment.

Antocular (*ant-ok'-u-lar*) [*ante*, before; *oculus*, the eye]. Situated in front of the eye.

Antorbital (*ant-orb'-it-al*) [*ante*, before; *orbita*, the orbit]. Located in front of the orbit.

Antracoele (*an'-tra-sēl*) [*antrum*; *κτλη*, a tumor]. Dropsy of the antrum; an accumulation of fluid in the maxillary sinus.

Antral (*an'-tral*) [*antrum*]. Relating to an antrum.

Anrectomy (*an-tek'-to-me*) [*antrum*; *ἐκτομή*, excision]. Surgical removal of the walls of the antrum.

Antritis (*an-tri'-tis*) [*antrum*; *τις*, inflammation]. Inflammation of an antrum.

Antrinalgia (*an-tron-al'-je-ah*) [*antrum*; *ἄλγος*, pain]. Pain in the antrum.

Antrophore (*an'-tro-for*). Cacao-butter bougies, containing tannin, 5%; resorcinol, 5%; thallin sulfate, 2 to 5%; zinc sulfate, 0.5%.

Antroscope (*an'-tro-skōp*) [*antrum*; *σκοπεῖν*, to look]. An instrument for examining the maxillary sinus.

Antrotome (*an'-tro-tōm*) [*antrum*; *τέμνειν*, to cut]. An instrument for the performance of mastoid antrotomy.

Antrotomy (*an-trot'-o-me*). Incision of an antrum.

Antrotympanic (*an-tro-tim-pan'-ik*) [*antrum*; *τύμπανον*, a drum]. Relating to the cavity of the tympanum and to the tympanic antrum.

Antrum (*an'-trum*) [L.]. A cavity or hollow space, especially in a bone. **A.**, **Cardiac**, Luschka's name for a dilation sometimes found in the esophagus immediately above its passage through the diaphragm. **A.**, **Duodenal**, the normal dilation presented by the duodenum near its origin. **A.** **ethmoidale**, the ethmoid sinus. **A.** **highmorianum**, antrum of Highmore, a cavity in the superior maxillary bone. Syn., *Antrum genue*. **A.** **highmori testis**. See *Mediastinum testis*. **A.**, **Mastoid**, the hollow space beneath the roof of the mastoid process. **A.**, **Maxillary**. See *A. highmorianum*. **A.** **pyloricum willisii**, the cavity of the pylorus. **A.** **tubæ**, a sac-like dilation of the fallopian tube about an inch from the fimbriated extremity, regarded by some as occurring only in pregnancy.

Anuresis (*an-u-re'-sis*) [*ἀν*, priv.; *οὐρὸν*, urine]. Anuria.

Anuretic (*an-u-ret'-ik*) [see *Anuresis*]. Pertaining to or affected with anuria.

Anuria (*an-u'-re-ah*) [see *Anuresis*]. Suppression of the urine.

Anuric (*an-u'-rik*) [see *Anuresis*]. Pertaining to anuria.

Anurous (*an-u'-rus*) [*an*, priv., *opsis*, a tail] Without a tail.

Anus (*u'-nus*) [*la*, "the fundament"]. The extremity of the rectum, the lower opening of the alimentary canal. **A.**, **Artificial**, an opening established from the bowel to the exterior at a point above the normal anus, most commonly from the colon, either in the lumbar or in the iliac region. **A.**, **Fissure of**, a slight tear in the mucous membrane at the anus, usually due to passage of hardened feces. It is very painful. **A.**, **Fistula of**, fistula in ano, a sinus opening from the rectum into the connective tissue about the rectum or discharging externally. **A.**, **Imperforate**, absence of the anus, the natural opening being closed by a membranous septum. **A.**, **Infundibuliform**, a relaxed condition of the anus with destruction of the natural folds. **A.**, **Praternatural**, an abnormal aperture serving as an anus, whether congenital, made by operation, or due to disease or injury. Syn., *Fecal fistula*; *Anus praternaturalis*. **A.**, **Praternatural Ileo-vaginal**, **A.**, **Praternatural Vaginal**, **A.**, **praternaturalis vestibularis**, the rare abnormality of the rectum opening through the vulva. **A.**, **Rusconi's**, the blastopore. **A.**, **Umbilical**, a praternatural anus located in the umbilical region. **A.**, **vulvovaginalis**, an anal opening communicating with the vulva.

Anvil (*an'-vil*). See *Incus*.

Anydremia, **Anydremia** (*an-id-re'-me-ah*) See *Anhydremia*.

Anypnia (*an-sp'-ne-ah*) [*an*, priv.; *hypnos*, sleep]. Sleeplessness.

Anytol. See *Anitol*.

Aorta (*to-ort'-ah*) [*apeq*, aorta]. The large vessel arising from the left ventricle and distributing, by its branches, arterial blood to every part of the body. It ends by bifurcating into the common iliacs at the fourth lumbar vertebra. The *arch*, that extending from the heart to the third dorsal vertebra, is divided into an *ascending*, a *transverse*, and a *descending* part. The *thoracic* portion extends to the diaphragm, the *abdominal*, to the bifurcation. **A.**, **Cardiac**, that part of the embryonic vascular system giving rise to the aortic arches. **A.**, **Dorsal**. 1. The embryonic vessel formed by the junction of the two primitive aortas. Syn., *Primordial aorta*, *Subvertebral aorta*. 2. The thoracic aorta. **A.**, **Inferior**, the abdominal aorta. **A.**, **Left**, the embryonic division of the vascular system which finally becomes the aorta. **A.**, **Main**, the embryonic vessel formed by the union of the two primitive aortas. **A.**, **Pectoral**, the thoracic aorta. **A.**, **Pelvic**, the middle sacral artery. **A.**, **Pericardiac**, the part of the aorta within

the pericardial cavity. **A.**, **Primitive**. 1. That part of the aorta extending from its origin to the point where it first branches. 2. Two embryonic branches of the cardiac aorta extending through the first vascular arch and uniting to form the dorsal aorta. **A.**, **Right**, the embryonic division of the aortic bulb which finally forms the pulmonary artery. **A.**, **Root of**, the origin of the aorta at the heart. Syn., *Radix aortae*. **A.**, **Superior**, the thoracic aorta. **A.**, **Systemic**. See *A.*, *Left*. **A.**, **Thoracic**. See under *Aorta*.

Aortal (*a-ort'-al*) [see *Aorta*]. Relating to the aorta.

Aortic (*a-ort'-ik*) [see *Aorta*]. Pertaining to the aorta. **A.**, **Arch**. See *Aorta* and *Arch*. **A.**, **Foramen**. See *A.*, *Opening of Diaphragm*. **A.**, **Murmur**, a murmur produced by disease of the aortic valves. **A.**, **Opening of Diaphragm**, the aperture in, or really behind, the diaphragm, through which the aorta passes. **A.**, **Opening of Heart**, the opening between the heart and the aorta. **A.**, **Plexus**, the plexus of sympathetic nerves situated on the front and sides of the aorta, between the origins of the superior and inferior mesenteric arteries. **A.**, **Sinus**, a deep depression between the leaflets of the aortic valve and the aortic wall. **A.**, **Valve**, the three semilunar valves closing the aortic opening during the cardiac diastole.

Aortitis (*a-ort-i'-tis*) [*aorta*; *itis*, inflammation]. Inflammation of the aorta. **A.**, **Nummular**, that characterized by white, circular patches in the inner coat.

Aortoclasia, **Aortoclasia** (*a-ort-to-kla'-se-ah*, *-sis*) [*aorta*; *klasis*, a breaking]. Rupture of the aorta.

Aortolithia (*a-ort-to-lith'-e-ah*). A calcareous deposition in the aorta.

Aortomalacia, **Aortomalaxia** (*a-ort-to-mal-ak'-se-ah*, *-aks'-e-ah*) [*aorta*; *malacia*, softening]. Softening of the aorta.

Aortosclerosis (*a-ort-to-kle-ro'-sis*) [*aorta*; *sclerosis*, hard]. Induration of the aorta.

Aortostenosis (*a-ort-to-sten-o'-sis*) [*aorta*; *stenosis*, narrow]. Stenosis or narrowing of the aorta.

Apatropin (*ap-at'-ro-pin*) [*ap*, from, *atropin*]. $C_{17}H_{27}NO_2$. A compound derived from atropin by the action of nitric acid. It is said to produce peculiar convulsions.

Ape (*ape*) [ME]. A man-like monkey. **A.**, **Fissures**, those fissures of the human brain that are also found in apes. **A.**, **hand**, a peculiar shape of the hand produced by the wasting of the thumb-muscles, it is seen in some cases of progressive muscular atrophy.

Apellous (*ah-pel'-us*) [*an*, priv., *pelos*, skin]. Skinless.

Apepsia (*ah-pep'-se-ah*) [*an*, priv., *pepsis*, to digest]. Cessation or absence of the digestive function. **A.**, **Hysteric**, *apepsia* due to hysteria. Syn., *Hysteric anorexia*. **A.**, *nervosa*. See *Anorexia nervosa*.

Apeptic (*ah-pep'-tik*) [see *Apepsia*]. Affected with *apepsia*.

Aperient (ap-e'-ri-ent) [*aperire*, to open]. 1. Laxative; mildly purgative. 2. A mild purgative; a laxative.

Aperistalsis (ah-per-is-tal'-sis) [d. priv.; *nepl*, around; *σπάσμις*, constriction]. Cessation of the peristaltic movements of the intestine.

Apertometer (ap-ur-lom'-et-er) [*aperture*; *μέτρον*, a measure]. An optic device for determining the angle of aperture of microscopic objectives. The *apertometer* of Abbe, which is mostly used, consists of a semicircular piece of thick glass with the straight edge beveled at 45 degrees. Light entering the curved edge is reflected upward by the beveled edge. This is received by the objective of the microscope. By means of two metal slides moving on the curved edge the exact angle of the light required to fill the back lens of the objective is indicated on the curved edge and can be read off directly.

Aperture (ap'-er-cher) [*apertura*, an opening]. An opening. **A., Angular**, in the microscope, the angle formed between a luminous point placed in focus and the most divergent rays that are capable of passing through the entire system of an objective. **A., Numeric**, the capacity of an objective for admitting rays from the object and transmitting them to the image.

Apex (ah'-pek) [L., "the extreme end of a thing"; cf. *apex*]. The summit or top of anything; the point or extremity of a cone. **A.-beat**, the impulse of the heart felt in the fifth intercostal space, about 3½ inches from the middle of the sternum. **A. of the Lung**, the upper extremity of the lung behind the border of the first rib. **A. Murmur**, a murmur heard over the apex of the heart.

Aphacia (ah-fa'-se-ah). See *Aphakia*.

Aphacic (ah-fa'-sik). See *Aphakic*.

Aphagia (ah-fa'-je-ah) [d. priv.; *φαγεῖν*, to eat]. Inability to eat or to swallow.

Aphakia (ah-fa'-ke-ah) [d. priv.; *φακός*, a lens; the crystalline lens]. The condition of an eye without the lens.

Aphakic (ah-fa'-kik) [see *Aphakia*]. Not possessing a crystalline lens.

Aphasia (ah-fa'-ze-ah) [d. priv.; *φάσις*, speech]. Partial or complete loss of the power of expressing ideas by means of speech or writing. Aphasia may be either motor or sensory. **Motor or ataxic aphasia** consists in a loss of speech owing to inability to execute the various movements of the mouth necessary to speech, the muscles not being properly coordinated, owing to disease of the motor center. It is usually associated with *agraphia*, "aphasia of the hand," inability to write, and right-sided hemiplegia. Some aphasias can write, but are unable to articulate words or sentences; this variety is variously named *aphemia*, *atalia*, or *anarthria*, according as the impairment of speech is more or less marked. Charcot supposes the center for articulate language divided into 4 subcenters—a visual center for words, an

auditory center for words, a motor center of articulate language, and a motor center of written language. Lesions of one or more of these centers produce the characteristic forms of aphasia, all of which have clinical exemplifications. **Sensory aphasia**, or *amnesia*, is the loss of memory for words, and may exist alone or in association with motor aphasia. Amnesia appears clinically in 3 distinct forms: 1. Simple loss of memory of words. 2. **Word-deafness**, or inability to understand spoken words (there is usually some paraphasia connected with this form). 3. **Word-blindness**, or inability to understand written or printed words. **A., Broca's**, motor aphasia. **A., Conduction**, such as is due to defect in some commissural connection between centers. **A., Cortical**, **A., Pictorial**, **A., True**, destruction of the function of the auditory speech-center. **A., Functional**, that in which there is no manifest lesion, but it occurs as a result of excitement in hysteria or in severe constitutional disorders. **A., Gibberish**, a form of transcortical aphasia in which the speech is confused, words or syllables being transposed or jumbled together, due to disruption of the tracts associating cortical speech-centers. Syn., *Jargon aphasia*. **A., Kussmaul's**, voluntary mutism, simulating aphasia, which sometimes affects the insane, particularly paranoiacs, with mystic ideas. **A., Mixed**, combined motor and sensory aphasia. **A., Optic**, inability to give the names for objects seen, due to interrupted connection between the centers for vision and speech. **A., Pure**, **A., Isolated**, **A., Subcortical**, **A., Subpictorial**, aphasia arising from a lesion interrupting impulses toward the afferent tracts proceeding to the auditory speech-center. **A., Supracortical**, **A., Suprapictorial**, that form of lesion completely severing the connection of the auditory center with the cortical center, but not destroying the auditory speech-center, the afferent tracts proceeding to it or the efferent tracts passing from it to the motor speech-center. **A., Tactile**, inability to recognize objects by the sense of touch, due to lesion in the central parietal lobule. **A., Total**, **A. universalis**, inability to utter a single word. **A., Wernicke's**, cortical sensory aphasia.

Aphasiac (ah-fa'-ze-ah) [see *Aphasia*]. One who is aphasic.

Aphasic (ah-fa'-zik) [see *Aphasia*]. Relating to or affected with aphasia.

Aphemesthesia (ah-fem-es-the'-ze-ah) [d. priv.; *φαῖν*, voice; *αἰσθάνεσθαι*, sensation]. Word-blindness; word-deafness.

Aphemia (ah-fe'-me-ah) [d. priv.; *φαῖν*, voice]. Motor aphasia, inability to articulate words or sentences from centric and not from peripheral disease. See *Aphasia*.

Aphemic (ah-fem'-ik) [see *Aphemia*]. Relating to or affected with aphemia.

Aphlogistic (ah-flo-jis'-ik) [d. priv.; *φῶς*, a flame]. 1. Noninflammable. 2. Burning without flame.

Aphonia (*ah-fō'-ne-ah*) [*d. priv.*; *φωνή*, voice]. Loss of speech, due to some peripheral lesion, as in clergyman's sore throat; it may be due to hysteria.

Aphonic (*ah-fōn'-ik*) [see *Aphonia*]. Speechless, voiceless.

Aphorama, Aphorema (*ah-fō-rā'-mah, -eē'-mah*) [*αφωρη*, to have in full view]. The state of having projecting eyes, enabling one to see at a distance on each side without moving the head.

Aphoria (*ah-fō'-re-ri-ā*) [*d. priv.*; *φέρω*, to bear]. Sterility, unfruitfulness. **A. impercита**, that attributed to aversion. **A. impotens**, that due to impairment of coceptive power. **A. incongrua**, that attributed to non-synchronous condition of the coceptive power to the seminal fluid. **A. paramenica**, that due to menstrual disorder. **A. polyposa**, that attributed to the existence of a uterine polyp.

Aphrasia (*ah-fre'-ze-ri-ā*) [*d. priv.*; *φράζω*, to utter]. Absence of the power to utter connected phrases. **A.**, Paralytic, that due to paralysis of the ideation faculty. **A.**, Superstitious, the voluntary avoidance of certain words from scruples of nicety or religion.

Aphrodesin, Aphrodesin (*ah-fro-des'-in*) [*αφροδισια*, foamy]. $C_{27}H_{48}O_{10}$. A glucosid constituent of the cotyledons of horse chestnut. It is a colorless, amorphous powder, soluble in alcohol and water, its watery solution frothing like soap.

Aphrodisia (*ah-fro-des'-e-ri-ā*) [*Αφροδισια*, Venus]. Sexual desire, especially when morbid or immoderate, sexual congress.

Aphrodisiac (*ah-fro-des'-e-ri-ā*) [see *Aphrodisia*]. 1. Stimulating the sexual appetite, erotic. 2. An agent stimulating the sexual passion.

Aphtha (*ah'-tha*) [*απθη*, an eruption, pl., *απθαι*]. A form of stomatitis characterized by the presence of small white vesicles in the mouth, occurring chiefly in children under 4 years and supposed to be due to a special microorganism. Syn., *terco*; *Aracu*, *Ophlyctis*, *Morbus aphtharum*; *Thrush*; *Sprue*, *Angina aphthosa*, *Aphthae stomatiticae*. **A. anginosa**, a form of sore throat attended by slight fever, redness, and enlargement of the fauces, with the formation of small whitish specks on the tongue and inner surface of the throat. It usually occurs in cold, damp weather and in women and children. **Aphthæ**, *Bednar's*, two or more shallow placed ulcers seen at times on the hard palate of cachectic infants, one on each side of the median line. **Aphthæ**, *Cachectic*, those appearing beneath the tongue and associated with grave constitutional symptoms; *Riga's disease*. Syn., *Cardarell's aphthæ*. **A. epizootica**. See *Foot-and-mouth Disease*. **A. febrilis**, ulceration of the mouth, extending to the oesophagus and stomach, and accompanied by fever. **A. serpens**, *Aphthæ serpentes*. See *Cancerum oris*.

Aphthæ tropicæ, a disease of the tropics marked by epigastric fulness, pain, vomiting, diarrhea, and redness of the tongue, with the formation of small, white, pointed spots on it. Syn., *Tropical sprue*, *Pruritus costroentericus aphthosus indicus*, *Pseudo-membranous mucosa gastro-pulmonaria*. **Aphthæ**, *Valleir's*. See *Aphthæ*, *Bednar's*.

Aphthoid (*ah'-thoid*) [see *Aphthæ*]. Resembling aphthæ.

Aphthongia (*ah'-thon'-ge-ah*) [*d. priv.*; *απθωγία*, a sound]. A peculiar form of aphasia due to spasm of the muscles supplied by the hypoglossal nerve.

Aphthous (*ah'-thush*) [see *Aphthæ*]. 1. Pertaining to or affected with aphthæ. 2. Presenting the appearance of a surface covered with aphthæ.

Apical (*ah'-fik-al*) [*apex*, the top]. Pertaining to the apex.

Apicified (*ah'-pis'-e-fikt*) Attached by the apex.

Apiciform (*ah'-pis'-e-form*) [*apex*, the top, *forma*, form]. Sharp-pointed.

Apicular (*ah'-pi'-u-lar*) [*apex*, the top]. Attached to or located upon an apex.

Apiin (*ah'-pi'-in*) [*apium*, parsley]. $C_{11}H_{14}O_4$. A glucosid obtained from the leaves, stems, and seeds of parsley, *Apmum petroselinum*. It is a yellowish white, crystalline powder, soluble in hot water and alcohol, slightly soluble in cold water, insoluble in ether.

Apinoid (*ah'-pin-oid*) [*d. priv.*; *απινος*, dirt, clay, form]. Clean, not foul. **A. Cancer**, scirrhous, so called from its clayey secretion.

Apiol (*ah'-pi-ol*) [*apium*, parsley, *oleum*, oil]. $C_{12}H_{16}O_4$. A principle occurring in parsley seeds, it crystallizes in long white needles with a slight odor of parsley. It melts at 30° C. (86° F.), and boils at 294° C. (552° F.). It is used in dysmenorrhea and in malaria. In large doses it produces ringing in the ears and frontal headache. Syn., *Parsley camphor*. Dose 10-15 gr. 10-15 i.c. (gr.). **A.**, *Green*, crude ethereal oil from seeds of parsley, *Apmum petroselinum*. It is used as an emmenagog and antispasmodic. Dose in dysmenorrhea, 5-10 min. cc. 1 c.c. (m.) 2-3 times daily, in malaria, 15-30 min. cc. 1 c.c. (m.). **A.**, *Liquid*, an alcoholic extract of parsley seeds.

Aplacental (*ah'-plas-en'-tal*) [*d. priv.*; *placental*, destitute of placenta].

Aplanatic (*ah'-plan-at'-ik*) [*d. priv.*; *πλανητικός*, to wander]. Not wandering, rectilinear. **A. Focus**, that focus of a lens, the rays from which do not undergo spheric aberration in their passage through the lens. **A. Lens**, a lens corrected for aberration of light and color; a rectilinear lens.

Aplasia (*ah'-plā'-ze-ah*) [*d. priv.*; *πλάσσειν*, to form]. Incomplete or defective development. Syn., *Agenesis*.

Aplastic (*ah'-plast'-ik*) [see *Aplasia*]. 1. Sternumless, formless. 2. Incapable of forming new tissue. 3. Relating to aplasia. 4. Defective in fibrin. 5. Applied to inflammation unattended with organizable exudation. **A.**

Lymph, a nonfibrous material incapable of migration or organization.

Apnea, **Apnoea** (*ap-no'-e-ah*) [*ἀπνῆα*, to breathe]. 1. A transient cessation of respiration from an overabundance of oxygen, as, e.g., after forcible respiration. 2. Asphyxia. **A., Cardiac**, the period of apnea in Cheyne-Stokes respiration. **A., Nervous**, that due to disorders of the centers of respiration. **A., Placental**, placental tuberculosis. **A., Uterine**, a form of dyspnea observed in hysterical patients, due to no manifest disease. *syn.* *Uterine asthma*.

Apneumatosis (*ah-nu-mat-o'-sis*) [*ἀπναισμός*, inflation] Collapse of the air-cells.

Apocanitin (*ap-o-kan'-it-in*) [*ἀπόκάνιτιν*, from, *aconitum*, aconite], $C_{21}H_{33}NO_{11}$. An alkaloid prepared from aconitin by dehydration.

Apotropin (*ap-o-tro'-pin*) [*ἀτρόπιν*, from; *atropia*], $C_{17}H_{21}NO_2$. An alkaloid obtained by the action of HNO_3 on atropin.

Apocrenosis (*ap-o-sen'-o-sis*) [*ἀποκρένωσις*, to drain]. 1. An increased flow or evacuation of blood or other humors. 2. A partial evacuation. In the plural, *apocrenoses*, Cullen and Swediaur's term for diseases marked by fluxes and unattended by fever.

Apochromatic (*ap-o-ker-mat'-ik*) [*ἀπόχρωμα*, away; *chroma*, color]. Without color. **A. Lens**, a lens of a special variety of glass, corrected for spheric and chromatic aberration.

Apocodin (*ap-o-ko'-de-in*) [*ἀπόκώδιν*, from, *codon*], $C_{17}H_{21}NO_2$. An alkaloid prepared from codon by dehydration. It is emetic and expectorant, with other qualities much like those of codon, and is recommended in chronic bronchitis. The hydrochlorate is generally used. Dose 3-4 gr. (0.2-0.25 Gm.).

Apocoptic (*ap-o-ko'-pt-ik*) [*ἀποκόπτειν*, to cut off]. Affected by or occurring from the removal of a part.

Apocynum (*ap-o-sin'-in-in*) [see *Apocynum*]. The principle from a tincture of *Apocynum cannabinum*; tonic, alterative, and cathartic. Dose 1-1 gr. (0.010-0.065 Gm.).

Apocynum (*ap-o-sin'-in-in*) [*apocynon*, dogbane]. Achenes up. The root of *A. cannabinum*, the properties of which are due to apocynin. It is a good expectorant, in full doses it is emetic and cathartic. Dose 5-20 gr. (0.3-1.2 Gm.), of tincture 5-10 min. (0.3-2.5 C.). Another American species, *A. androsaemifolium*, has similar properties. Unof. **A., Fluidextract of** (*fluidextractum apocyni*, U. S. P.). Dose 5-20 min. (0.3-1.2 C.).

Apodia (*ah-po'-de-ah*) [*ἀπόδια*, a foot]. Amputation of foot.

Apolar (*ah-po'-lar*) [*ἀπόλος*, the end of an axis]. Not possessing a pole. **A. Cells**, nerve-cells without processes.

Apollinaris Water (*ap-ol-in-a'-ris*). A German alkaline mineral water, highly charged with carbonic acid, and largely used as a solvent in gout, rheumatism, etc.

Apolsin (*ap-ol'-is-in*), $C_6H_5(OC_2H_5)NH_2C_6H_5$.

A compound of citric acid and phenetidin. It is antipyretic and analgesic. Dose 8-10 gr. (0.5-5.0 Gm.) daily. *Syn.* *Monophenetidin citric acid*.

Apomorphin (*ap-o-mor'-fin*) [*ἀπόμορφιν*, from; *Morpheus*, the god of sleep], $C_{17}H_{17}NO_2$. An artificial alkaloid, derived from morphin by the abstraction of a molecule of water. **A. Hydrochlorid** (*apomorphine hydrochloridum*, U. S. P.), is the salt used, and is a grayish, crystalline powder. It acts as a centric emetic. Dose $\frac{1}{10}$ - $\frac{1}{5}$ gr. (0.003-0.005 Gm.), hypodermatically, or $\frac{1}{10}$ - $\frac{1}{5}$ gr. (0.005-0.01 Gm.) by the mouth. It is expectorant in small doses.

Apomorphosis (*ap-o-mor'-fo'-sis*) [*ἀπομόρφωσις*, to change the form]. A chemie change by which one substance acting upon another takes something away from it.

Aponeurosis (*ap-o-nu-ro'-sis*) [*ἀπόνευρωσις*, from, *νέυρον*, a tendon]. A fibrous, membranous expansion of a tendon giving attachment to muscles or serving to inclose and bind down muscles. Important are the *infrapinnous*, inclosing the *infrapinnous* muscle; that of the *deltoid muscle*, of the *external oblique* or *abdominal*, of the *forearm*, of the *leg*, of the *transversalis*, of the *head*, etc. **A. of Occipitofrontalis Muscle**, the aponeurosis that separates the two slips of the occipitofrontalis muscle. **A. of Soft Palate**, a thin, firm, fibrous layer, attached above to the hard palate, and becoming thinner toward the free margin of the velum. **A., Subscapular**, a thin membrane attached to the entire circumference of the subscapular fossa, and affording attachment by its inner surface to some of the fibers of the subscapularis muscle. **A., Supraspinous**, a thick and dense membranous layer that completes the osseofibrous case in which the supraspinatus muscle is contained, affording attachment by its inner surface to some of the fibers of the muscle. **A., Vertebral**, a thin aponeurotic lamina extending along the whole length of the back part of the thoracic region, serving to bind down the erector spine, and separating it from these muscles that unite the spine to the upper extremity.

Aponeurosis (*ap-on-u-ro'-sis*) [*aponeurosis*; *ερεγ*, inflammation]. Inflammation of an aponeurosis.

Aponeurotic (*ap-on-u-ro'-ik*) [*aponeurotic*]. Pertaining to an aponeurosis.

Apophysis (*ap-ol'-is-is*) [*ἀπόφύσις*, from; *φύω*, growth, pl. *apophyses*]. A process, outgrowth, or swelling of some part or organ, as of a bone.

Apophyses, False. See *Epiphyses*. **A. lenticularis**, the orbicular process of the temporal bone. **A. ravana**, the process gravis of the malleus. **Apophyses, True**, these which have never been epiphyses.

Apoplectic (*ap-o-plek'-tik*) [*apoplexy*]. Pertaining to or affected with apoplexy. **A. Equivalents**, a name given to the premonitory symptoms of apoplexy, indicating that the brain is subject to alterations in blood-pressure.

Apoplectiform (ap-o-plek'-tif-orm) [apoplexy, forma, form]. Resembling apoplexy.

Apoplexy (ap'-o-plek'-e) [ἀπὸ, off, ἀπλῶς, to strike]. The symptom-complex resulting from hemorrhage or the plugging of a vessel in the brain or spinal cord. The term is sometimes also applied to the bursting of a vessel in the lungs, liver, etc. **A.**, **Asthenic**, that due to vital depression. **A.**, **Atonic**, that which comes on gradually and does not attain a high degree of development. **Syn.** *Imperfect apoplexy*. **A.**, **Atrabilious**, deep melancholy attributed to resorption of bile. **A.**, **Bulbar**, that due to hemorrhage into the substance of the oblongata, causing paralysis of one or both sides of the body, inability to swallow, difficulty in protruding the tongue, dyspnea, gastric disorders, and tumultuous action of the heart. **A.**, **Capillary**, one resulting from rupture of capillaries. **A.**, **Consecutive**, that due to the arrest of some habitual discharge or eruption. **A.**, **Cutaneous**. 1. See *Purpura hemorrhagica*. 2. A sudden effusion of blood to the skin and subcutaneous tissue. **A.**, **Dysarthritic**, a form accompanying arthritic diseases, in which the pain disappears from the joints, and vertigo, pain in the head, etc., appear. **A.**, **Epileptic**, coma with epileptoid symptoms, sometimes observed in cerebral and acute inflammatory diseases. **A.**, **Febrile**, pyrexial fever attended with deep sleep and stertor. **Syn.** *Apoplexia febrilis*. **A.**, **Fulminant**, a sudden and fatal apoplexy. **A.**, **Ingravescent**, a term applied to a form of apoplexy in which there is a slowly progressive loss of consciousness, due to a gradual leakage of blood from a ruptured vessel. **A.**, **Muscular**, an escape of blood into the muscular tissue. **A.**, **Nervous**. 1. Acute anemia of the brain. 2. A condition marked by symptoms of cerebral congestion and hemorrhage which are due to functional disturbance of the nervous system. **A. of the Ovary**, **A.**, **Ovarian**, hemorrhage into the stroma of the ovary, through the rupture of a follicle, converting the organ into a cyst or hematoma. The blood is gradually absorbed, though it gives rise to great pain; the cause is unknown. **A.**, **Phlegmonous**, a condition attributed to inflammation of the brain and its membranes; it is marked by delirium, fever, severe headache, conjunctival injection, lacrimation, and a hard pulse. **A.**, **Pituitous**, serous apoplexy. **A.**, **Placental**, **A.**, **Placental**, escape of blood into the placental substance. **A.**, **Progressive**, that in which there is a very gradual increase of the paralysis and other symptoms. **A.**, **Pulmonary**, escape of blood into the pulmonary parenchyma. **A.**, **Pulmonary**, **Vascular**, very acute and extensive congestion of the lungs, leading to apoplectic symptoms and a fatal termination. **A.**, **Sanguineous**, hemorrhage into or upon the brain. **A.**, **Serous**, that due to an effusion of serous matter into or upon the brain. **A.**, **Simple**, the name given to

those cases of death from coma in which no cerebral lesion is found. **A.**, **Spinal**, rupture of a blood-vessel of the spinal cord. **A.**, **Suppurative**, that due to purulent processes and fever. **A.**, **Symptomatic**, that attributed to another disease or to the arrest of some habitual evacuation. **A.**, **Uterine**, escape of blood into the muscular tissue of the uterus. **A.**, **Venous**, that due to congestion of the veins.

Apoquinamin (ap-o-kin'-amin), $C_{10}H_{11}N_3O$. An artificial alkaloid occurring as a white, amorphous substance derived from quinamin, conquinamin, or quinuclidin by action of hydrochloric acid.

Aporetin (ap-o-re'-tin) [ἀπὸ, from, ἀρηγ, a resin]. A resinous substance found in rhubarb.

Aporocephalous (ap-o-ro-sef'-al-us) [ἀπορῶς, difficult to distinguish, κεφαλή, the head]. Having a head scarcely distinguishable.

Apositia (ap-o-sit'-e-ah) [ἀπόσις, from, ἀποσίν, head]. Aversion to or loathing of food.

Apostasis (ap-os'-tas-is) [ἀποστασις, a standing away from]. 1. An abscess. 2. The end or the crisis of an attack of disease, termination by crisis. 3. An exfoliation.

Aposthia (ah-pos'-the-ah) [ἀ, priv., στήθης, penis, prepuce]. Absence of the penis or of the prepuce.

Apostoli's Method. The use of strong electrolytic or chemic galvanocautic currents in the treatment of diseases of the female generative organs, especially uterine fibroids.

Apothecaries' Weight. A system of weights and measures used in compounding medicines. The troy pound of 5760 grains is the standard. It is subdivided into 12 ounces. The ounce is subdivided into 8 drams, the dram into 3 scruples, and the scruple into 20 grains. For fluid measure the quart of 32 fluidounces is subdivided into 2 pints, the pint into 16 fluidounces, the ounce into 8 fluidrams, and the fluidram into 60 minims. The following symbols and abbreviations are used.

m, minim.	3, ounce (an ounce (16 grains))
3, scrupulus, a scruple (16 grains)	℔, libra, a pound
3, drachma, a dram (60 grains)	℥, ounce, a pint
	gr, grain, a grain
	℥, semuncia, one half.

See *Weights and Measures*.

Apothem, Apothema (ap'-o-them, ap-oth'-em-ah) [ἀπὸ, from, θέμα, a deposit]. A brown powder deposited from vegetable infusions or decoctions exposed to the air.

Apothesis (ap-oth'-e-sis) [ἀποθέσις, a putting back]. The reduction of a fracture or luxation.

Apotheter (ap-oth'-et-er). A navel-string retractor devised by Braun, consisting of a staff with a sling attached in which the prolapsed funis is placed and carried up into the uterine cavity.

Apozem, Apozema (ap'-e-zem, ap-os'-em-ah) [ἀπὸ, away, ζέω, to boil]. A decoction, especially one to which medicines are added.

Apparatus (ap-ar-a'-tus) [apparatus, preparation]. 1. A collection of instruments or devices used for a special purpose. 2. Anatomically the word is used to designate collectively the organs performing a certain function. 3. A collection of pathologic phenomena. **A.**, **Absorbent**, the blood vessels and lymphatics. **A. ligamentosus colli**, the occipitoaxoid ligament, a broad band at the front surface of the spinal canal that covers the odontoid process.

Apparition (ap-ar-ish'-un) [apparitio, an appearance]. 1. A visual delusion or hallucination. 2. The sudden aggregation of scattered principles into an element or corpuscle.

Appendage (ap-en'-daj) [appendere, to weigh; hang]. Anything appended, usually something of minor importance. **A.**, **Auricular**.

1. The projecting part of the cardiac auricle. 2. Virchow's name for a round or elongated cartilaginous prominence in front of the tragus. **A.s.**, **Cutaneous**, **A.s.**, **Dermal**, the nails, hair, sebaceous glands, and sweat-glands. **A.s.**, **Epiploic**. See *Appendicitis* and *Appendix*. **A.s.** of the **Eye**, the eyelashes, eyebrows, lacrimal gland, lacrimal sac and ducts, and conjunctiva. **A.s.**, **Fetal**, the placenta, amnion, chorion, and umbilical cord. **A.**, **Ovarian**, the parovarian. **A.**, **Pineal**, the epiphysis. **A.**, **Pituitary**, the hypophysis. **A.s.**, **Uterine**, the ovaries and oviducts.

Appendalgia (ap-en-dal'-je-ah) [appendix; algos, pain]. Pain in the appendicular region.

Appendectomy (ap-en-dek'-u-me). See *Appendicectomy*.

Appendiceal, **Appendicial** (ap-en-di-se'-al, ap-en-dish'-al). See *Appendicular*.

Appendicectomy (ap-en-dis-ek'-u-me) [appendix; tomia, excision]. Excision of the vermiform appendix.

Appendicitis (ap-en-dis-it'-tis) [appendix; itis, inflammation]. Inflammation of the vermiform appendix. Syn., *Paratyphlitis*; *Epityphlitis*, *Abscess of iliac form*. **A.**, **Gangrenous**, that in which the vermiform appendix is found gangrenous and sloughing, usually with one or more perforations and free leakage, a large section of the right groin full of lemon-colored, septic fluid, a puddle of filth underneath the cecum and ileum, the omentum fixed with a cluster of bowel adhesions beneath. Syn., *Green groin*. **A. larvata**, an incipient or latent form of appendicitis. **A. obliterans**, an inflammation characterized by the progressive obliteration of the lumen of the appendix, by the disappearance of the epithelial lining and glandular structure. The symptoms are acute attacks of brief duration, moderate swelling at the seat of disease, and persistence of tenderness in the region of the appendix during the intermissions.

Appendicular (ap-en-dik'-u-lar) [appendicula, a small appendix]. Pertaining to the vermiform appendix. **A. Colic**, a spasmodic colicky pain originating in the appendix.

Appendiculate (ap-en-dik'-u-lat). Having appendages or protruding accessory parts.

Appendix (ap-en'-diks) [appendere, to hang upon or to]. An appendage. **A. auricularis**. See *Appendage*, *Auricular* (1). **A. cerebri**, the pituitary body. **A.**, **Ensiform**. See *Xiphoid*. **A. epididymidis**, the vas aberrans. **Appendices epiploicæ**, fatty projections of the serous coat of the large intestine. **A. lobularis**, the flocculus. **A.**, **Suprasphenoid**, **A. ventriculi**, the hypophysis. **A.**, **Vermiform**, **A. vermiformis**, the small, blind gut projecting from the cecum. **A.**, **Xiphoid**. See *Xiphoid*.

Apperception (ap-er-sep'-shun) [appercepire, to perceive]. The conscious reception or perception of a sensory impression; the power of receiving and appreciating sensory impressions.

Appetence, **Appetency** (ap'-e-lens, ap'-e-len-se) [appetentia, appetite]. An appetite or desire, the attraction of a living tissue for those materials that are appropriate for its nutrition.

Appetite (ap'-e-lit) [appetere, to desire]. The desire for food; also any natural desire; lust. **A.**, **Perverted**, that for unnatural and indigestible things, frequent in disease and in pregnancy.

Applanate (ap'-lan-at) [ad, to; planus, flat]. Horizontally flattened.

Applanatio, **Applanation** (ap-lan-a'-sho-o, ap-lan-a'-shun) [L.]. A flattening. **A. corneæ**, flattening of the entire surface of the cornea from disease.

Apple (ap'-l) [AS., *appel*, an apple]. The fruit of the tree, *Pyrus malus*. **A.**, **Adam's**. See *Pomum adam*. **A.-brandy**, an alcoholic spirit distilled from cider; cider-brandy. **A. Extract**. See *Extraction ferri pomatum* under *Extract*. **A. Eye**. Synonym of *Exophthalmus*. **A. Head**, a term for the broad, thick skull of dwarfs. **A. Oil**, amyli valerate.

Applicator (ap'-lik-a-tor) [L.]. An instrument used in making applications.

Apposition (ap-o-zish'-un) [apponere, to apply to]. 1. The act of fitting together; the state of being fitted together. 2. An addition of parts. 3. Development by accretion.

Apraxia (ah-prak'-e-ah) [d, priv.; *πρᾶξις*, to do]. Soul-blindness; mind-blindness; object-blindness, an affection in which the memory for the uses of things is lost, as well as the understanding of the signs by which the things are expressed.

Aprouctia (ah-prak'-she-ah) [d, priv.; *πρωκτός*, anus]. Absence of the anus.

Apron (a'-pron) [ME., *apern*]. 1. A cloth or rubber covering to prevent the clothing from becoming soiled. 2. The omentum. **A.**, **Hottentot**, artificially elongated labia minora. Syn., *Pudenda apron*. **A.**, **Masonic**, a name sometimes given to a support, attached to the waist, for the penis and testicles in gonorrheal cases. **A. of Succor**, a canvas appliance borne by two men, and used for the transportation of wounded persons.

Aprosexia (*ah-pro-sek'se-ah*) [*ā*, priv.; *aprosynō*, to give heed]. A mental disturbance consisting in inability to fix the attention upon a subject. An inability to think clearly and to comprehend readily what is read or heard; a condition sometimes observed in the course of chronic catarrh of the nose or of the nose and pharynx.

Aprosopia (*ah-pro-so'pe-ah*) [*ā*, priv.; *aprosōpion*, the face]. A form of fetal monstrosity with absence of part or all of the face.

Apsephesia (*ap-sel-af'e-se-ah*) [*ā*, priv.; *aphepsis*, touch]. Loss of the tactile sense.

Apsithyria, Apsithurea (*ah-pith'i-re-ah, -w-re-ah*) [*ā*, priv.; *apsithyria*, to whisper]. Hysterical aphonia, in which the patient loses the voice and is also unable to whisper.

Apsychia (*ah-ih'ke-ah*) [*ā*, priv.; *apsichia*, spirit]. Unconsciousness, a faint or swoon.

Aptyalia, Aptyalism (*ah-ti-a'le-ah, ah-ti'-al-ism*) [*ā*, priv.; *aptyalismos*, to spit]. 1. Deficiency or absence of saliva. 2. Psychical salivation; delirium and general disorder from loss of oxydases due to excessive excretion.

Apyknomorphous (*ah-pik'-no-morf-us*) [*ā*, priv.; *pyknos*, compact, *morphē*, form]. Applied by Nissl to feebly staining cells, or those in which the stained portions are not arranged in close proximity.

Apyonin (*ah-pi'-on-in*) [*ā*, priv.; *pyon*, pus]. A remedy introduced as a substitute for pyoktanin in ophthalmic practice. It is said to be identical with yellow pyoktanin. Unof.

Apyous (*ah-pi'-yus*). Having no pus.

Aporetic (*ah-pi-ret'ik*). **Aporetia** (*ah-pi-ret'ik-ia*) [*ā*, priv.; *pyretos*, fever]. Without fever.

Aporetial (*ah-pi-ret'ik-ial*) [see *Aporetia*]. Pertaining to, of the nature of, or characterized by aporetia.

Aqua (*ah'-kwah*) [*L.*]. Water. An oxid of hydrogen, having the composition H_2O . It is a solid below 32° , a liquid between 32° and 212° , vaporizes at 212° at the sea-level (bar. 760 mm.), giving off vapor of tension equal to that of the air. It covers four-fifths of the surface of the earth, but is never pure in nature, containing from a trace of soluble matter, in rain-water, to 26% of soluble mineral salts, in the Dead Sea. Water is an essential constituent of all animal and vegetable tissues. In the human body it forms 2% of the enamel of the teeth, 77% of the tissues, 78% of the blood, and 93% of the urine. Water is a valuable antipyretic, internally, it is diuretic. It is the most useful of all the solvents. *Aqua*, in pharmacy, designates various medicated waters. **A. ammoniac** (U. S. P.), ammonia-water. Dose 10-30 min. (10-20 Cc.). **A. ammoniac fortior** (U. S. P.), stronger ammonia-water, used externally. **A. amygdalæ amara** (U. S. P.), bitter almond water. Dose 2 dr. (8 Cc.). **A. anethi** (B. P.), dill water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A. anisi** (U. S. P.), anise water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A.**

aurantii florum (U. S. P.), orange-flower water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A. aurantii florum fortior** (U. S. P.), triple orange-flower water. **A. bulliens**, boiling water. **A. camphoræ** (U. S. P.), camphor water. Dose $\frac{1}{2}$ -1 oz. (15-30 Cc.). **A. carbolisata**, 22 parts of liquefied phenol in 978 parts of distilled water. Dose 1 dr.- $\frac{1}{2}$ oz. (4-16 Cc.). **A. chlori** (*liquor chlori composuit*, U. S. P.), chlorine water. Dose 1-4 dr. (4-16 Cc.). **A. chloroformi** (U. S. P.), chloroform water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A. cinnamomi** (U. S. P.), cinnamon-water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A. communis**, common water. **A. creosoti** (U. S. P.), creosote-water. Dose 1-4 dr. (4-16 Cc.). **A. destillata** (U. S. P.), distilled water. **A. ferrata**, a chalybeate water. **A. fervens**, hot water. **A. fluvialis**, river-water. **A. fœniculi** (U. S. P.), fœnicul water. Dose 1-2 oz. (30-60 Cc.). **A. fontana**, well- or spring-water. **A. fortis**. See *Acid, Nitric*. **A. hamamelidis** (U. S. P.), hamamelis water. Dose 2 dr. (8 Cc.). **A. hydrogenii dioxidi** (U. S. P.), solution of hydrogen dioxide, used chiefly locally. **A. labyrinthi**, the clear fluid existing in the labyrinth of the ear. **A. laurocerasi** (B. P.), cherry-laurel water. Dose 5-30 min. (10-60 Cc.). **A. levisco**, water from springs at Levisco in the Tyrol, containing arsenic, iron, and copper. **A. marina**, sea water. **A. menthæ piperitæ** (U. S. P.), peppermint-water. Dose 1-2 oz. (30-60 Cc.). **A. menthæ viridis** (U. S. P.), spearmint water. Dose 1-2 oz. (30-60 Cc.). **A. oculi**, the aqueous humor. **A. omnium florum**, a liquid distillation product of condensing collected during the month of May, formerly used in pulmonary tuberculosis. **A. pimentæ** (B. P.), allspice water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.). **A. pluvialis**, rain water. **A. putealis**, **A. puteana**, well water. **A. regia**. See *Acid, Nitrohydrochloric*. **A. rosæ** (U. S. P.), rose-water. Dose 1-2 oz. (30-60 Cc.). **A. rosæ fortior** (U. S. P.), used for making rose-water. **A. vitæ**, brandy or spirit.

Aquacapsulitis (*ah-kwah-kap-su-lit'is*) [*agua*, *capsula*, *itis*, inflammation]. Inflammation of the membrane of Descemet, serous parts.

Aqueductus (*ah-we-duk'tus*). See *Aqueduct*.

Aquapuncture (*ah-kwah-pungk'tchur*) [*agua*, *punctura*, a puncture]. 1. Counterirritation by means of a very fine jet of water impinging upon the skin, it is useful in neuralgic disorders. 2. The hypodermatic injection of water as a placebo.

Aquatic (*ah-kwat'ik*) [*agua*]. Pertaining to water. **A. Cancer**. Synonym of *Carcinomæ*.

Aqueduct, Aqueductus (*ah-we-duk'tus, ah-we-duk'tus*) [*agua*; *ductus*, a leading]. A canal for the passage of fluid, any canal. **Aqueductus cerebri**, the infundibulum. **Aqueductus cochleæ**, aqueduct of the cochlea. **A.**, Communicating, **Aqueductus communicationis**, a small canal.

sometimes found at the junction of the mastoid part of the temporal bone with the petrosa, which transmits a venous branch to the end of the transverse sinus. **A. of Cotunnus**, the aqueduct of the vestibule, extending from the utricle to the posterior wall of the pyramid in the brain. **Aqueductus fallopii**. See under *Fallopian*. **Aqueductus sylvii**, the aqueduct of Sylvius, the passageway from the third to the fourth ventricle, the *iter e tertio ad quartum ventriculum*. Syn., *Ventricular aqueduct*. **A., Temporal**, an inconstant canal at the dorsal part of the superior angle of the petrosa, for passage of the squamosopetrosal sinus. **Aqueductus vestibuli**, the aqueduct of the vestibule of the ear.

Aqueous (a'-kwe-us) [aqua]. Watery. **A. Chamber of the Eye**, the space between the cornea and the lens; the iris divides it into an anterior and a posterior chamber. **A. Extract**, a solid preparation of a drug made by evaporation of its aqueous solution. **A. Humor**, the fluid filling the anterior chamber of the eye.

Aquocapsulitis (a'-kwo-kap-su-li'-tis). See *Aquocapsulitis*.

Aquosity (a'-kwoz'-i-te) [aquisitas, watery]. The state or condition of being watery.

Aquozon (ak'-wo-zon). Ozonized, distilled, and sterilized water, containing 3% by volume of ozone.

Arabic Acid (ar'-ab-ik). See *Arabin.* **A., Gum.** See *Gum.*

Arabin (ar'-ab-in) [arabi-]. ($C_6H_{11}O_5$)_n + H_2O . Arabic acid. A transparent, glassy, amorphous mass, an exudate from many plants. It is soluble in water, and is the principal constituent of gum-arabic.

Arabinose (ar'-ab-in-ös) [arabic], $C_6H_{12}O_6$. One of the glucoses made from gum-arabic on boiling with dilute H_2SO_4 . It crystallizes in shining prisms that melt at 100° , is slightly soluble in cold water, has a sweet taste, and reduces Fehling's solution, but is not fermented by yeast.

Arabite (ar'-ab-it) [arabinose], $C_3H_5O_4$. A substance formed from arabinose by the action of sodium amalgam. It crystallizes from hot alcohol in shining needles, melting at 102° . It has a sweet taste, but does not reduce Fehling's solution.

Arachnitis (ar-ak-ni'-tis) [arachnoid; *ερεγ*, inflammation]. Inflammation of the arachnoid membrane of the brain. Syn., *Leptomeningitis externa*; *Arachnoiditis*; *Arachnoiditis*; *Arachnoideitis*; *Arachnoitis*. **A., Rachidian**, **A., Spinal**, spinal meningitis.

Arachnoid (ar-ak'-noid) [ἀράχνη, a spider's web; *αἶμα*, form]. 1. Resembling a web. 2. The arachnoid membrane. Syn., *Membrana arachnoidea*; *Meninx media*; *Meninx cerebra*; *Meninx media*; *Meninx arachnoidea*; *Meninx media*; *Meninx cerebra*. 3. Pertaining to a membrane. 4. Thready; feeble; said of the pulse. **A. Membrane**, the delicate membrane of the brain and cord between the dura and pia

mater. It is separated from the pia by the subarachnoid space, and passes over the convolutions without dipping down into the fissures between them.

Arachnoidal (ar-ak'-noid'-al) [see *Arachnoid*]. Pertaining to the arachnoid membrane.

Arachnolysin (ar-ak-no-li'-sin) [ἀράχνη, a spider, *λύσις*, a loosing]. A very active hemolytic substance extracted from spiders. It is destroyed by heating to 70° or 72° C., and is probably identical with Kobert's toxalbumin of spiders.

Arack (ar'-ak). See *Arrack*.

Aræometer (ar-æ-om'-et-er). See *Areometer*.

Aralia (ar-a'-le-ah) [L.]. A genus of plants, order *Araliaceæ*, embracing several species, having aromatic, diaphoretic, and resolvent properties. Ginseng, wild sarsaparilla, petty-morrel, and other plants esteemed in popular medicine belong here; few have active qualities of high value in any disease.

Aran's Green Cancer. See under *Cancer*. **A.'s Law**, fractures of the base of the skull are the result of injury to the vault, the extension taking place by irradiation along the line of the shortest circle. The fractures of the base which occur by contre-coup are exceptions to this law.

Aran-Duchenne's Disease. Progressive muscular atrophy.

Araneous (ar-a'-ne-us) [aranea, a spider's web]. 1. Full of webs; resembling a cobweb. 2. Applied to a thready, feeble pulse. 3. Consisting of separate filaments. **A. Membrane**, the arachnoid membrane.

Arantius, Bodies of. See *Corpora arantii*. **A., Canal of**, **A., Duct of**, the ductus venosus. The smaller of the two branches into which the umbilical vein divides after entering the abdomen; it empties into the ascending vena cava and becomes obliterated after birth. **A., Ligament of**, the obliterated ductus venosus of Arantius. **A., Ventricle of**, a small culdesac in the medulla oblongata, forming the lower termination of the fourth ventricle.

Araroba (ar-ar-a'-bah) [Brazil]. Goa powder. An oxidation-product of the resin found deposited in the wood of the trunk of *A. andira*, of Brazil. Its active principle is chrysarobin or chrysophanic acid. It is largely used in skin affections.

Arbor (ar'-bor) [L.]. A tree. A name for the arbor vite of the cerebellum. **A. vitæ**. 1. A term applied to the arborescent appearance of a section of the cerebellum, and also to a similar appearance of the folds of the interior of the cervix uteri. 2. The *Thuja occidentalis*.

Arborescent (ar-bor-es'-ent) [arbor]. Branching like a tree.

Arborization (ar-bor-iz-a'-shun) [arbor]. A form of nerve-termination in which nerve-fiber is brought into contact with muscle-fiber by means of an expansion. **A., Terminal**. 1. A branched end of a sensory

nerve. 2. A motor end-plate. **A., Vascular**, a tree-like branching of blood-vessels.

Arbutin (*ar'-bu-tin*) [*arbutus*], $C_{12}H_{14}O_7$. A bitter glucosid obtained from *Arctostaphylos uva-ursi*, or bearberry. It is neutral, crystalline, and resolvable into glucose and hydroquinone. It is diuretic. Dose 15-30 gr. (1-2 Gm.). See *Uva ursi*.

Arbutus (*ar-bu'-tus*) [L.]. A genus of ericaceous shrubs and trees. *A. menziesii*, the madroño of California, has an astringent bark, useful in diarrhea. Unof. *A. unedo*, the European arbutus, is astringent and narcotic. **A., Trailing**. See *Epigaea*.

Arc (*ark*) [*arcus*, a bow]. A part of the circumference of a circle; a more or less curved passageway. **A., Bigonial** (of lower jaw), a measurement around the anterior margin of the jaw. **A., Binauricular**, a measurement from the center of one auditory meatus to the other, directly upward across the top of the head. **A., Bregmatolambdoid**, a measurement along the sagittal suture. **A., Diastaltic Nervous**, Marshall Hall's term for the nerves concerned in a reflex action. **A., Frontal**, the measurement from the nasion to the bregma. **A., Maximum Transverse**, the measurement across the face from points just anterior to the external auditory meati. **A., Nasobregmatic**, a line measured from the root of the nose to the bregma. **A., Nasomalar**, measurement between the outer margins of the orbits over the nasion. **A., Nasooccipital**, measurement from the root of the nose to the lowest occipital protuberance. **A., Occipital**, measurement from the lambda to the opisthion. **A., Parietal**, measurement from the bregma to the lambda. **A., Reflex**, the pathway for a reflex act, comprising the center, the afferent and efferent nerve. **A., Voltaic**, the band of light formed by the passage of a strong electric current between two adjacent carbon points.

Arcade (*ar-kād'*) [see *Arc*]. 1. A series of arches; an arch. 2. The bow of a pair of spectacles. **A., Crural**, Poupart's ligament. **A., Flint's**, the arteriovenous arch about the base of the renal pyramids. **A., Temporal**, **A., Temporal, Inferior**, the zygoma. **A., Temporal, Superior**, the orbital arch.

Arcanum (*ar-ka'-num*) [L., "a secret"]. A secret medicine.

Arcate (*ar'-kāt*) [*arcatus*, bow-shaped]. Bow-shaped; curved; arcuate.

Arch (*arch*) [*arcus*, a bow]. 1. A structure having a curved outline resembling that of an arc or a bow. 2. A part of a circle. **A., Abdominothoracic**, the lower boundary of the front of the thorax. **A., Alveolar**, that marking the outlines of the alveolar processes of the jaw. **A., Anastomotic**, one uniting two veins or arteries. **A., Anterior Hyoid**, a general term which includes the *tyrpanohyal*, *epihyal*, *stylohyal*, and *ceratohyal arches*. **A.s., Aortic**, five pairs of

vascular arches existing in the fetus. **A.s., Axillary**, twigs of the latissimus dorsi, sometimes passing over the vessels and nerves to the anterior part of the axilla, where they disappear in the tissues. **A.s., Branchial**, the cartilaginous arches that support the gills of fishes. They are also present in the human fetus. **A.s., Cervical**, the fourth and fifth postoral arches. **A., Cortical**, that portion of the renal substance which stretches from one column to another and surrounds the base of the pyramids. **A., Costal**, the arch of the ribs. **A., Cotylosacral**, one formed by the sacrum and the osseous structures extending to the coxofemoral joints. Syn., *Standing arch*. **A., Crural**, Poupart's ligament. **A., Dental**. 1. The parabolic curve formed by the cutting-edges and masticating surfaces of the teeth. 2. The alveolar arch. **A., Epencephalic**, the bones lying over the epencephalon, uniting in man to form the occipital bone. Syn., *Neurooccipital arch*. **A., Facial**, the first postoral arch. **A., Femoral**. Same as *A., Crural*. **A., Femoral, Deep**, a band of fibers originating apparently in the transverse fascia, arching across the crural sheath and attached to the middle of Poupart's ligament and the pectineal line. Syn., *Deep crural arch*. **A.s. of the Foot**, certain arches formed by the bones of the foot; the most distinct is the transverse in the line of the tarsometatarsal articulations. The inner longitudinal is composed of the os calcis, the astragalus, the navicular, the 3 cuneiforms, and the first 3 toes, and the outer longitudinal is made up of the os calcis, the cuboid, and the fourth and fifth toes. **A., Gluteal**, an opening in the gluteal fascia transmitting the gluteal vessels and nerves. **A., Hemal**, Owen's term for the inferior loop of the typical vertebra. It is so called because it surrounds the essential portion of the vascular system. It is formed dorsally by the centrum, laterally by the pleuroapophyses and hemapophyses, and inferiorly by the hemal spine. Syn., *Injravertebral arch*; *Subcentral arch*; *Vertebral ventral arch*. **A., Hyoid**, the second branchial arch of vertebrates. Syn., *Lingual arch*; *Arch of tongue*; *Parietohemal arch*. **A., Inguinal**, Poupart's ligament. **A., Ischiopubic**, that formed by the pubis and the ischiopubic branches. **A., Ischiosacral**, one formed by the sacrum, the descending branches of the ischiums, and the iliums lying between. Syn., *Sitting arch*. **A., Laryngeal**, Callender's term for one in the embryo composed of a membranous plate extending from the lower portion of the skull and developing into the inferior constrictor muscle, the cartilages of the larynx, the superior portion of the trachea, and the thyroid body. **A.s., Lateral Inferior** (of the skull), the bones encircling the mouth, nose, and larynx. **A.s., Lateral Superior**, the bones encircling the cerebrum, the cerebellum, and the oblongata. **A.,**

Mandibular, the first branchial arch, descending into the lower jaw. Syn., *Maxillary arch*. **A., Maxillary**. 1. See *A., Mandibular*. 2. See *A., Palatomaxillary*. **A., Mesencephalic**, one formed by the basi-sphenoid, alisphenoid, parietal, and mastoid bones. Syn., *Neuroparietal arch*. **A., Nasal**, one uniting the two frontal veins. **A., Neural**, the superior loop of the typical vertebra including the neural canal. Syn., *Dorsocentral arch*; *Supravertebral arch*. **A., Occipitohemal**. See *Cradle*; *Shoulder*. Syn., *Basal arch*; *Scapular arch*; *Scapuloclavicular arch*; *Scapulohumeral arch*. **A., Osteoblastic**, those formed imperfectly or completely by the osteoblasts, arising from the bone trabeculae already developed and finally becoming bony. **A., Palatal**, the concavity of the hard palate when seen in transverse section. **A. of the Palate, Posterior**, that formed by the posterior pillars of the fauces. Syn., *Palatopharyngeal arch*. **A., Palatine**, that formed by the anterior pillars of the fauces. Syn., *Anterior arch of the palate*. **A., Palatomaxillary**, one formed by the palatine, maxillary, and premaxillary bones of their analogs; it is looked upon as the neural arch of the nasal vertebra. Syn., *Maxillary arch*. **A., Palmar**, the arch formed by the radial artery and ulnar arteries in the palm of the hand, there are two—a superficial and a deep. Syn., *Radial arch*. **A., Palmar, Superficial**, the continuation of the ulnar artery across the palm. **A., Pelvic**, the bones of the pelvis considered as the hemal arches of the sacral vertebrae. **A., Plantar**, the arch made by the external plantar artery. **A.s, Postoral**, arches in the lower jaw in number, that develop into the lower jaw and throat. See *A., Branchial*. **A., Preorbital**, *Poststernal*, *Skeletal*, *Suborbital*, *Visceral arches*. **A., Prosencephalic**, one considered as the cranial arch of the frontomandibular vertebra; it is formed by the frontal, pre-sphenoid, and orbitosphenoid bones. Syn., *Frontocranial arch*. **A. of Pubes**, that part of the pelvis formed by the convergence of the rami of the ischia and pubes on each side. Syn., *Subpubic arch*. **A., Radial**. See *A., Palmar*. **A., Rhinencephalic**, the neural arch of the nasal vertebra, formed by the vomer and the prefrontal and nasal bones. Syn., *Neurocranial arch*. **A., Rioloan's**, the arch of the mesenteries which is attached to the transverse colon. **A., Stylohyoid**, the hemal arch of the parietal vertebra formed by the parietal, epiphyseal, ceratohyal, basihyal, glossohyal, and unihyal bones. **A., Supraorbital**, the curved and prominent margin of the frontal bone that forms the upper boundary of the orbit. **A.s, Tarsal**, the arches of the palpebral arteries. **A., Thyrocartilaginous**, a communicating branch between the superior thyroid arteries of the two sides, lying at about the level of the angle of the

thyroid cartilage. **A., Thyrohyal**, **A., Thyrohyoid**, the third of the postoral arches; it develops into the hyoid body and the greater cornua of the hyoid bone. **A., Tonsillar**. See *Isthmus of the Fauces*. **A., Trabecular**, one formed by the junction of the middle trabeculae of the skull, containing the hypophysis and the infundibulum. **A. of a Vertebra**, the part of a vertebra, formed of two pedicles and two laminae, inclosing the spinal foramen. **A., Vertebral**. 1. A neural arch. 2. A hemal arch. **A., Zygomatic**, the arch formed by the malar and temporal bones. Syn., *Subocular arch*; *Suborbital arch*; *Temporal arch*.

Arch-, Archi (ἀρχή, primitive). Prefixes denoting first, chief, or principal.

Archameba (ark am-e'-bah) [arch-; ἀμοιβή, change]. Haeckel's hypothetical progenitor of all amoebas and of all higher forms of life.

Archamphiaster, **Archiampfiaster** (ark-am-je-as'-ter, ar-ke-am-je-as'-ter) [arch-; ἀμφι, around; ἀστήρ, star]. In biology, these amphiasters concerned in the production of the polar globules.

Archangelica (ark-an-jel'-ik-ah) [ἀρχαγγέλος, archangel]. A genus of umbelliferous plants. See *Angelica*.

Archebiosis (ar-ke-bi-o'-sis) [arch-; βίος, life]. Spontaneous generation.

Archeogenesis (ark-e-je-n'-es-is). The same as *Archebiosis*.

Archenteron (ark-en'-ter-on) [arch-; ἔντερον, intestine]. The embryonic alimentary cavity.

Archetype (ar'-ke-tip) [arch-; τύπος, a type]. In comparative anatomy, an ideal type or form with which the individuals or classes may be compared. A standard type.

Archiblast (ar'-ke-blast) [archi-; βλαστός, germ]. In embryology, the granular areola surrounding the germinal vesicle. It is composed of three layers, the outer, or *epiblast*, from which the skin and its adnexa, the nervous system, and the terminal portions of the alimentary canal are formed; the middle, or *mesoblast*, from which the epithelium of the genitourinary organs and the smooth and striated muscle tissue are derived; and the inner, or *hypoblast*, for the development of the epithelium of the respiratory tract and of the alimentary canal. In pathology, the important tissues of the body as contrasted with the *parablast*, or connective tissues.

Archiblastic (ar-ke-blas'-tik) [see *Archiblast*]. Derived from the archiblast. The parenchymatous tissues are regarded as archiblastic.

Archiblastoma (ar-ke-blas-ta'-mah) [archiblast; ὄγκος, a tumor]. A tumor composed of archiblastic tissue, such as myoma, neuroma, papilloma, adenoma, carcinoma, etc.

Archiblastula (ar-ke-blas'-tu-lah) [see *Archiblast*]. In embryology, a ciliated, vesicular morula, resulting from complete and regular yolk-division and by invagination forming the archigastrula.

- Archicytula** (ar-ke-sit'-u-lah) [archi-; *ἀρχή*, a cell]. A fertilized egg-cell in which the nucleus is discernible.
- Archigaster** (ar-ke-gas'-ter) [archi-; *γαστήρ*, belly]. The primitive, perfectly simple intestine; archenteron.
- Archigastrula** (ar-ke-gas'-tru-lah) [see *Archigaster*]. The gastrula as it is observed in the most primitive types of animal development; called also bell-gastrula, from its shape.
- Archigenesis** (ar-ke-jen'-es-is). See *Archebiosis*.
- Archil** (ar'-kil) [ME., *orchell*]. A coloring-matter similar to litmus, chiefly obtained from the lichen, *Roccella tinctoria*; used for staining animal tissues.
- Archimonerula** (ar-ke-mon-er'-u-lah) [archi-; *μονήρης*, single; solitary]. In embryology, a special name given by Haeckel to the monerula stage of an egg undergoing primitive and total cleavage.
- Archimorula** (ar-ke-mor'-u-lah) [archi-; *μύρον*, a mulberry]. In embryology, the solid mass of cleavage cells, or mulberry mass, arising from the segmentation of an archicytula, and preceding the archiblastula and archigastrula.
- Archinephron** (ar-ke-nef'-ron) [archi-; *νεφρός*, kidney]. The primitive or embryonic stage of the kidney or renal apparatus.
- Archineuron** (ar-ke-nur'-rou) [archi-; *νεῖρον*, a nerve]. 1. A primitive neuron. 2. The neuron at which the impulse starts in any physiologic act involving the nervous system.
- Archistome** (ar'-kis-tom). See *Blastopore*.
- Architis** (ar-kis'-tis) [*ἀρχή*, anus; *ίτις*, inflammation]. Proctitis; inflammation of the anus.
- Archoplasm, Archoplasma** (ar'-ku-plasm, ar-ku-plaz'-mah) [*ἀρχον*, a ruler; *πλάσμα*, a thing formed]. Boveri's term for the substance from which the attraction-sphere, the astral rays, and the spindle fibers of mitosis are derived and of which they consist. Syn., *Kinoplasm*.
- Arciform** (ar'-se-form) [arcus, bow; arch; forma, form]. Arcuate; especially used to designate certain sets of fibers in the medulla oblongata.
- Arctation** (ark-ta'-shun) [arctatio, to draw close together]. Contraction of an opening or canal.
- Arctium** (ark'-she-um) [L.]. Burdock. See *Lappa*.
- Arcual** (ar'-hu-al) [arcualis, arched]. Arched; bent or curved.
- Arcuate** (ar'-ku-āt) [arcuatio, a bowing]. Arched; curved; bow-shaped. **A. Fibers of the Cerebellum**, associating fibers connecting one lamina with another. **A. Fibers of the Cerebrum**, associating fibers connecting adjacent convolutions.
- Arcuation** (ar-ku-a'-shun) [arcuatio, a bowing]. Curvature, especially of a bone.
- Arcula** (ark'-u-lah) [arcula, a casket]. The orbit. **A. cordis**, the pericardium.
- Arcus** (ar'-kus) [L., "a bow"]. A bow or arch. **A. dentalis**, the dental arch. **A. senilis**, a ring of fatty degeneration seen about the periphery of the cornea in old persons. **A. senilis lentis**, an opaque ring in the equator of the crystalline lens, it sometimes occurs in the aged. **A. vasculosi renales**, arches at the bases of the malpighian pyramids, formed by anastomoses of tiny ramifications of the renal artery. They give off vessels supplying the cortex of the kidneys, the malpighian corpuscles, and the capillary plexuses about the convoluted tubules. Syn., *Fornices vasculosi renales*.
- A. zygomaticus**, the zygomatic arch.
- Ardor** (ar'-dor) [L., "heat"]. Violent heat, burning. **A. urinæ**, burning pain in the inflamed urethra during micturition.
- Area** (a'-re-ah) [L., "an open space"]. A limited extent of surface. **A., Auditory**, the cerebral center for hearing. **A., Broca's**. See under *Broca*. **A. celsi**. See *Alagoni areola*. **A.s, Cohnheim's**, certain clearcut areas seen in a transverse section of muscle-fibers. **A., Cord**, that part of the cortex in which lesions would produce degeneration of the spinal cord. **A., Crural**, a space at the base of the brain included between the pons and chiasm. **A. diffuens**, alopecia areata. **A., Diffraction**, a clear area seen in the microscopic image around all bodies of greater or less refractive power, and which by Nageli and Schwendener was referred partly to the direct reflection of the incident light at the edge of the body in question, partly to the interference of this reflected light when comes through unreflected. **A. germinativa**, or embryonic spot, the oval germinating spot of the embryo. **A., Martegiani's**, the slight widening of the hyaloid canal at its beginning in front of the optic disc. **A.s, Motor**, the convolutions on either side of the Rolandic fissure, containing the centers for voluntary motion. **A., Non-nucleated**, one of the clear spaces found at times between the endothelial cells of blood-vessels; they have no nuclei, are smaller than endothelial cells, and are considered to be due to the removal of parts of the surrounding endothelium. **A. opaca**, the opaque circle about the *A. pellucida*. **A. pellucida**, the light central portion of the *A. germinativa*. **A., Rolandic**, the excitomotor area of the cerebral hemispheres, comprising the ascending frontal and ascending parietal convolutions. **A., Septal**, the inner surface of each of the laminae which make up the septum lucidum. **A., Spencer's**, a cortical area in the frontal lobe just outside of the olfactory tract and anterior to the point where it joins the temporosphenoid lobe, as indicated by the crossing of the sylvian artery. Faradic stimulation of this area influences the respiratory movements, causing stoppage of the respiration when sufficiently intense. **A. vasculosa**,

the vascular area of the *A. opaca*. **A.s.**, **Viscerocutaneous**, areas of skin and viscera corresponding to different spinal segments. **A.**, **Visual**, the occipital lobe and the angular gyrus. **A.**, **Vocal**, the portion of the glottis lying between the vocal bands.

Areane, Arekane (ar'ek-an). An oily and viscous base substance obtainable from areca-nut, said to be a purgative and sialagogue, and to slow the pulse.

Areca-nut (ar'ek-an-ut). See *Beetl*.

Arecolin (ar'ek-ol-in) [Sp., *areca*], $C_{10}H_{15}N_2O$. 1. An organic base isomeric with brucine, derived from cinchona bark. 2. A brown-red coloring-matter obtained from areca-nuts. *Syn.*, *Areca red*.

Arecolin (ar'ek-ol-in) [*areca*], $C_{10}H_{15}NO_2$. A liquid alk-oid isolated from the seeds of *Areca catechu*. It is a powerful poison, affecting the heart similarly to muscarin. It has colchicine-like properties. Dose $\frac{1}{10}$ to $\frac{1}{5}$ gr. (0.016 to 0.032 Gm.). **A.** **Hydrobromate**, is used as a diotic, applied in 1% solution, and in the treatment of glaucoma. In veterinary practice it is used as a cathartic and emetic. Indication for horse, $\frac{1}{2}$ -1 gr. (0.032 to 0.065 Gm.).

Areola (ar'ek-ol-ah) [dim. of *area*, an open space]. 1. The brownish space surrounding the nipple of the female breast. This is sometimes called *areola papularis*. A *second areola*, surrounding this, occurs during pregnancy. The pigmentation about the umbilicus is called the *umbilical areola*. 2. Any minute or minute space in a tissue. **A.**, **Primary**, cell spaces still containing cartilage cells in the matrix of ossifying cartilage. *Syn.*, *Primary marrow cavity*; *Medullary space*.

Areolar (ar'ek-ol-ar) [see *Areola*]. Relating to or characterized by areolas. **A.** **Tissue**, cellular tissue, loose connective tissue.

Arometer (ar'ek-an-ol-ah) [*arēros*, rare; *uteros*, a measure]. An instrument for measuring specific gravity.

Argentamin (ar'jen-a'm-in). A colorless alkaline fluid consisting of an 8% solution of silver phosphate in a 15% aqueous solution of ethylacetic acid. It is applied in gonorrhea and conjunctivitis in 1:4000 solution. *Syn.*, *Ethylacetic acid silver phosphate*.

Argentation (ar'jen-ta'shun) [*argentum*]. 1. Staining with a preparation of silver. 2. The act of silvering. 3. The process of injecting mercury into the vessels of an anatomic specimen. 4. Argyria.

Argentie (ar'jen-ah). Containing silver.

Argentine (ar'jen-in). Containing or resembling silver.

Argentol (ar'jen-ol), $C_6H_5N.OH.SO_3Ag$. Silver quinresol, a yellow powder, sparingly soluble in water, used as a surgical antiseptic and astringent in ointment 1:100 to 1:200, in solution 1:1000 to 3:1000.

Argentum (ar'jen-tum) [L.]. Silver. Ag = 108, equivalent, 1; specific gravity, 10.49 to 10.5. A malleable and ductile metal of

brilliant white luster. It tarnishes only in the presence of free sulfur, sulfur gases, and phosphorus. **Argenti cyanidum** (U. S. P.), $AgCN$, silver cyanid, is used in the preparation of diated hydrocyanic acid. **Argenti iodidum**, AgI , sometimes used internally instead of argenti nitras. Dose $\frac{1}{4}$ to 1 gr. (0.016 to 0.065 Gm.). **Argenti nitras** (U. S. P.), $AgNO_3$, silver nitrate, argentic nitrate, "lunar caustic," a powerful astringent and an escharotic of moderate strength. It stains skin and other tissues black. If too long administered, it leaves a slate-colored, insoluble deposit of silver under the skin (*argyria*). It is used in gastric catarrh, in gastric ulcer, in intestinal ulceration, and as an alternative in sclerosis of the nervous system. Dose $\frac{1}{4}$ -4 gr. (0.016 to 0.26 Gm.). **Argenti nitras fusus** (U. S. P.), "stick caustic," contains 4% of silver chlorid. It is used locally. **Argenti nitras mitigatus** (U. S. P.), the mitigated caustic, or diluted stick, is fused with an equal amount of potassium nitrate. **Argenti oxidum** (U. S. P.), Ag_2O , explosive when treated with ammonia. Used internally for the same conditions in which the nitrate is used. Dose $\frac{1}{2}$ -2 gr. (0.032 to 0.13 Gm.). **Argenti vivum**, an old name for mercury or quicksilver.

Argilla (ar'jil-ah) [*ἀργίλλος*, potter's clay]. White or potter's clay, alumina.

Argol (ar'goh) [*ἀργός*, white]. The impure tartar derived from wine.

Argon (ar'gen) [*ἀργός*, idle; inactive]. An inert gaseous element discovered in the atmosphere by Lord Rayleigh and Wm. Ramsay (1894). Its symbol is *A*; atomic weight, 19.7. Argon may be obtained by freeing air, which has been deprived of its carbon dioxide and water, from oxygen by means of red-hot copper, and then absorbing the nitrogen by means of metallic magnesium. The residual gas, the passage of the gases being repeated a number of times, is argon. Chemically, it is the most inert element known.

Argyll Robertson Pupil. Loss of the pupil reflex to light, it is seen in tabes dorsalis, parietic dementia, in some cases of encephalomalacia, senile brain atrophy, syphilis, hydrocephalus, etc.

Argyria (ar'jil-re-ah) [*argentum*]. A form of discoloration of the skin and mucous membranes produced by the prolonged administration of silver, the granules of silver being deposited in much the same position as those of the natural pigment of the skin.

Argyrol (ar'jil-ol). A soluble silver salt obtained by combining a proteid of wheat with 20% of silver. It is used in gonorrhea. *Syn.*, *Silver vitellin*.

Argyrosis (ar'jil-ro'sis). Same as *Argyria* (q. v.).

Arice Bark. Calisaya bark exported from Arica, Chili. It contains the alkaloid, aricin.

Aricin (ar'is-in) [*Aricea*], $C_{20}H_{25}N_3O_4$. An alkaloid obtained from several varieties of cinchona bark.

Aristocardia (ar-ri-to-kar'-de-ah) [*ἀριστερός*, left, *καρδία*, heart] Deviation of the heart to the left side.

Aristol (ar'-is-toh) [*ἀριστο*, best], ($C_6H_5CH_3$, O) C_6H_5 ; Dithymololol. It is also called annidalin, although this is dithymololol. An iodin compound used as a substitute for iodoform as an antiseptic dressing. It has the advantage of being odorless, and is used either in the powder form or as a 5 to 10% ointment with vaselin or lanolin.

Aristolochia (ar-ri-toh'-lo'-ke-ah) [*ἀριστο*, best; *λοχία*, the lochia] A genus of exogenous herbs, many species of which have active medicinal qualities. *A. clematula*, of Europe, has been used as a tonic, stimulant, and diaphoretic. *A. cymbifera*, of South America, furnishes a part of the drug called guaco, and is a good tonic and stimulant. *A. rotunda*, a species of southern Europe, with offensive odor and bitter taste, is employed as an emmenagogue and in gout. *A. serpentaria*, Virginia snakeroot, is at present more used in medicine than any other species. See *Serpentaria*.

Aristolochin (ar-is-to-lo'-kin) [see *Aristolochia*]. A bitter principle found in Virginia snakeroot. See *Serpentaria*.

Aristotle's Experiment. The eyes being closed, when a small spheric object is placed between two crossed fingers of one hand so that it touches the radial side of one and the ulnar side of the other, the sensation produced is that of two objects.

Arithmomania (ar-ith-mo-ma'-ne-ah) [*ἀριθμός*, a number, *μανία*, madness] An insane anxiety with regard to the number of things that fall under the observation. Sometimes it consists in constant or uncalled for counting of objects, sometimes in the mere repeating of consecutive numbers.

Arkyochrome (ar'-ke-o-krom) [*ἀρκος*, a net, *χρώμα*, a color] A chromatochrome nerve cell in which the stainable portion of the cell-body appears in the form of network.

Arkyostichochrome (ar'-ke-o-stik'-o-krom) [*ἀρκος*, a net, *στίχος*, a row or rank, *χρώμα*, a color] Applied by Nissl to a nerve cell in which the chromatophilic particles of its cell-body present a combination of both the striated (ostichochrome) and network (arkyochrome) arrangements, so that it is difficult to decide which predominates, e. g., the Purkinje cells of the cerebellar cortex.

Arl's Ointment. An ointment containing 7½ gr (10.5 Gm.) of belladonna to 1½ dr (15 Gm.) of blue ointment. **A.'s Recess, A.'s Sinus**, a small depression directed forward and outward, in the lower portion of the lacrimal sac, it is not constant. **A.'s Trachoma**, granular conjunctivitis, trachoma.

Arm [armare to arm] 1. The upper extremity from the shoulder to the wrist. 2. That portion of the shaft connecting the body or tube of a microscope with the pillar. **A. Center**, the vertical center for the movement of the arm, it is situated in the middle third of the ascend-

ing frontal and ascending parietal convolutions.

Armanni-Ehrlich's Degeneration. See *Degeneration, Armanni-Ehrlich's*.

Armature (ar'-ma-ture) [*armatura*, equipment] 1. A mass of soft iron at the extremity of a magnet. Also the core of motor armature which coils of insulated wire are wound. 2. Any protective investment of an organism. 3. A condenser.

Army Itch. A distressing, chronic form of itch prevalent in the United States at the close of the civil war. The itching was intense. The eruption was seen especially on the arms, forearms, chest, abdomen, and lower extremities, particularly on the ulnar side of the forearm and inner aspect of the thigh. It resembled prurigo associated with vesicles, pustules, and excoriations.

Arnica (ar'-nik-ah) [L.] A genus of composite-flowered plants. The *arnica* of the U. S. P. is the dried flower-heads of the plant commonly known as 'lesquardiaria,' *A. montana*. The root *arnica radix* is official in the B. P. Its properties are probably due to an alkaloid, *trimethylarnin*, C_8H_9N . In small doses it is a cardiac stimulant, in larger doses a depressant. It is a powerful remedy, when locally applied, for sprains, bruises, and surface wounds. Dose, 12 gr (1 Gm.). **A., Infusion of** 20 parts (decortice parts water), superior to the tincture for local use. **A. Plaster**, contains extract of root, 33, lead plaster, 67 parts. **A. Root, Extract of.** Dose 3-5 gr (0.2-0.3 Gm.).

A. Root, Fluidextract of. Dose 2-10 min (0.3-0.65 Gm.). **A. Root, Tincture of.** 10%. Dose 5-30 min (0.5-2 Gm.). **A., Tincture of (tinctura arnica)** U. S. P., 20%. Dose 15-30 min (1-2 Gm.).

Arnicin (ar'-nis-in) [arnica], $C_{10}H_{16}O_4$. A brownish, bitter glucosid extracted from the root of *Arnica montana*.

Arnold's Bundle. The fibers which form the inner third of the crista of the cerebral peduncles. **A.'s Canal**, a small canal in the petrous portion of the temporal bone, transmitting Arnold's nerve. **A.'s Fold.** See *Arnold's Valve*. **A.'s Ganglion**, the cranial ganglion. **A.'s Ground Plexus**, a plexus formed by the axis cylinders of non-myelinated nerve fibers in smooth muscular tissue. **A.'s Innominate Canal**, a nonconstant canal in the base of the skull, internally to the foramen rotundum, it transmits the superficial and deep petrosal branches that later become fused into one nerve. **A.'s Ligament**, the ligament connecting the bodies of the incus with the roof of the tympanic cavity. **A.'s Membrane**, the pigmented layer of the iris. **A.'s Nerve**, the auditory branch of the pneumogastric nerve. **A.'s Operculum**, the operculum of the island of Reil. **A.'s Recurrent Nerve**, a sensory branch of the ophthalmic division of the trigeminus that anastomoses with the trochlear nerve and is distributed to the ten-

torum cerebri and the posterior part of the falx cerebri. **A.'s Stratum Reticulatum**, the network formed by the fibers connecting the occipital lobe with the optic chiasmus before they enter the latter.

Aroma (*ar-o-ma*) [*âroma*, spice]. The fragrance or odor emanating from certain vegetable substances, especially those used for food and drink.

Aromatic (*ar-o-mat-ik*) [see *Aroma*]. 1. Having a spicy odor. 2. A substance characterized by a fragrant, spicy taste and odor, as cinnamon, ginger, the essential oils, etc. 3. A qualification applied to any carbon compound originating from benzene, C_6H_6 . Their stability is relatively great as compared with that of the fatty bodies. **A. Acids**, those derived from the benzene group of hydrocarbons. **A. Compound**, any benzene derivative. **A. Fluidextract**, aromatic powder, 100; alcohol, sufficient to make 100 Cc. **A. Group**, a series of hydrocarbons having the composition C_6H_{10} . **A. Powder**. See *Cinnamomum*. **A. Sulfuric Acid**. See *Acid, Sulfuric*. **A. Vinegar**, any mixture of aromatic oils in vinegar. **A. Wine**, a wine containing in each 100 parts 1 part each of lavender, origanum, peppermint, rosemary, sage, and wormwood.

Aromin (*ar-o-min*) [see *Aroma*]. An alkaloid obtainable from urine. When heated, it emits a fragrant odor.

Arrack (*ar'-ak*) [Ind.]. A liquor distilled from malted rice. Any alcoholic liquor is called arrack in the East.

Erector (*er-ek'-tor*) [L., "an erector"]. An erector. **A. pili**, a fan-like arrangement of a layer of smooth muscular fibers surrounding the hair-follicle, the contraction of which erects the follicle and produces *cutis anserina*, or "goose-skin."

Arthral (*ar'-enal*). A monomethyl sodium arsenate, recommended in treatment of tuberculosis. Dose $\frac{1}{2}$ gr. (0.05 Gm.) daily.

Arrhinencephalia (*ar-in-en-sep-al'-e-ah*) [*d. priv.*; *phic*, nose; *lymphēdon*, the brain]. A form of partial anencephalia in which there is malformation of the nose.

Arrhinia (*ah-rin'-e-ah*). Congenital absence of the nose.

Arrhythmia (*ah-rith'-me-ah*) [*d. priv.*; *ῥυθμός*, rhythm]. Absence of rhythm.

Arrhythmic (*ah-rith'-mik*) [see *Arrhythmia*]. Without rhythm; irregular.

Arosion (*ar-o'-shun*) [*arodere*, to gnaw]. The gnawing or destruction of vessel-walls by ulcerous processes.

Arrow-poison (*ar-o-poi'-zun*). See *Curara*.

Arrowroot (*ar'-ee-oot*) [ME., *arow*; *root*]. A variety of starch derived from *Maranta arundinacea* of the West Indies, southern United States, etc. It is a popular remedy for diarrhea, and is widely used as a food. Many other starchy preparations are sold as arrowroot.

Arsenate, Arseniate (*ar'-sen-at*, *ar-se'-ne-at*) [*arsenic*]. Any salt of arsenic acid. **A.**,

Acid, a monohydric or dihydric arsenate.

A., **Basic**, an arsenate combined with the oxid or hydrate of a base. **A.**, **Dihydric**.

1. An acid arsenate containing two atoms of hydrogen. 2. See *Pyroarsenic Acid*. **A.**, **Monohydric**. 1. An acid arsenate containing one atom of hydrogen. 2. Metarsenic acid, $HAsO_3$, a crystalline substance obtained from arsenic trioxid by heating above $200^\circ C$. **A.**, **Neutral**. 1. A normal arsenate. 2. A pyroarsenate.

Arsenauro (*ar-sen-aw'-ro*). A double bromid of gold and arsenic; 10 min. contain $\frac{1}{2}$ gr. each of gold and arsenic bromids. It is an alternative and a tonic. Dose $\frac{5}{15}$ min. (0.3-1.0 Cc.) in water three times daily.

Arsenhemol (*ar-sen-hem'-ol*). A compound of hemol and 1% of arsenic trioxid, forming a brown powder. It is used as a substitute for arsenic as an alternative and hematinic. Dose 2 gr. (0.1 Gm.) 3 times daily.

Arsenic, Arsenicum, Arsenum (*ar'-sen-ik*, *ar-sen'-i-kum*, *ar-se'-num*). 1. As = 75; quantivalence III, V. A brittle, crystalline metal, of a steel-gray color, tarnishing on exposure to the air. Sp. gr. 5.73. It sublimes at $180^\circ C$, and gives off a garlicky odor. It forms two oxids: arsenous oxid, As_2O_3 , and arsenic oxid, As_2O_5 . The sulfids are used as pigments in the arts, rarely in medicine. Scheele's green is copper arsenite; Schweinfurth and Paris-green likewise contain arsenic. Arsenic is also an ingredient of certain poisons used against rodents and insects. In medicine arsenic is used as an alternative in anemia, chronic malaria, asthma, pulmonary tuberculosis, as a gastric sedative, and in chorea. 2. Arsenic trioxid. 3. Pertaining to arsenic. **A. Bromid**, $AsBr_3$, is used in diabetes. Dose $\frac{1}{2}$ gr. (0.001 Gm.). **A. Bromid, Solution of** (*liquor arsenii bromidi*), Clemens' solution, a 1% solution of arsenic bromid. Dose 1-3 min. (0.06-0.24 Cc.). **A.**, **Butter of**. See *A. Chlorid*. **A. Caseinate**, a soluble arsenic compound for internal administration. **A. Chlorid**, $AsCl_3$, a colorless, oily liquid decomposed by water. Dose $\frac{1}{16}$ - $\frac{1}{8}$ gr. (0.001-0.004 Gm.). Syn., *Butter of arsenic*; *Chlorid of caustic arsenic*. **A. Disulfid**, As_2S_3 , occurs native as realgar. Syn., *Sandaraca*; *Red sulfid of arsenic*, *Red arsenic*. An artificial disulfid of arsenic is prepared in the arsenic works and contains about 15% of arsenic and 27% of sulfur. Syn., *Red arsenic glass*; *Ruby sulfur*; *Red orpiment*. **A.**, **Flowers of**, a fine white powder, formed by the sublimation of arsenic trioxid. **A. Glass**, a term applied to the vitreous mass obtained either by heating arsenic pyrites with sulfurous ores, or by the resublimation of the "flowers of arsenic" obtained by subliming arsenic pyrites. Syn., *White arsenic glass*. **A. Iodid** (*arseni iodidum*, U. S. P.), arsenous iodid, AsI_3 . Dose $\frac{1}{16}$ - $\frac{1}{8}$ gr. (0.003-0.008 Gm.). **A. Iodid**,

Solution of Mercuric and of (liquor arseni et hydrargyri iodidi, U. S. P.). Donovan's solution, contains arsenous iodid, 10 Gm.; red mercuric iodid, 10 Gm.; distilled water, q. s. to make 1000 Gm. **A., Test for.** See Bettendorf, Marsh. **A. Trioxid** (arseni trioxidum, U. S. P.), As_2O_3 ; arsenous acid; "ratsbane." Dose $\frac{3}{16}$ – $\frac{1}{8}$ gr. (0.002–0.006 Gm.). Syn., *White arsenic*.

A. Trioxid, Solution of (liquor acidi arsenosi, U. S. P., liquor arsenici hydrochloricus, B. P.), a 1% solution of the trioxid in hydrochloric acid and distilled water. Dose 2–5 min. 10.12 0.3 (C.). **A. Trisulfid**, As_2S_3 , translucent, lemon-colored, rhombic prisms, occurring in nature, sp. gr. 3.76, a corrosive and depilating agent recommended for removal of warts. Syn., *Orpiment*; *Auri pigmentum*; *Yellow sulfid of arsenic*; *Arsenicum* (Pliny); *Arsenii sulfidum citrinum*, King's yellow. **A., White.** See *A. Trioxid*.

Arsenicalism, Arsenism (ar-sen'-ik-al-izm, ar'-sen-izm) [arsenic]. Chronic arsenic poisoning.

Arseniophosphate (ar-sen-e-o-fos'-fat). A compound of a base with both arsenic and phosphoric acids.

Arsenite (ar'-sen-it) [arsenic]. Any salt of arsenic trioxid.

Arsenmethyl (ar-sen-meth'-il), $As(CH_3)_2$. A bivalent or quadrivalent radicle.

Arsenous (ar-se'-nus) [arsenic]. Containing arsenic. **A. Acid.** See *Arsenic Trioxid*.

Arsins (ar'-sins) [arsenic]. Peculiar volatile arsenic bases found by Selmi to be produced by the contact of arsenic trioxid and alkaline substances.

Arsinyl (ar'-sin-il). The proprietary name for disodium methylarsenate, a nontoxic substance allied to cacodyl and free from its garlic odor. It is said to be a powerful tonic. Dose $\frac{1}{4}$ gr. (0.03 Gm.) twice daily.

Arsonium (ar-so'-ne-um) [arsenic; ammonium]. AsH_4 . A univalent radicle in which arsenic replaces the nitrogen of ammonium.

Arsonvalization (ar-ton-val'-iz-a'-shun) [d'Arsonval, a French physiologist and physicist]. The therapeutic application of Tesla currents.

Arsycodile (ar-sik-od'-il-e). A chemically pure cacodylate of sodium (sodium dimethyl arsenic), a nontoxic salt indicated in emaciating diathesis. Dose $\frac{1}{4}$ gr. (0.03 Gm.) 4 times daily.

Artefact (ar'-te-fakt) [arte, by art; factum, made]. In microscopy and histology, a structure that has been produced by mechanic, chemic, or other artificial means; a structure or tissue that has been changed from its natural state.

Artemisia (ar-tem-is'-e-ah) [*Ἄρτεμις*, the goddess Diana]. A genus of plants of the order *Compositae*. **A. abrotanum**, southernwood, is stimulant, tonic, and vermifuge, and is popularly used as a vulnerary. It is simi-

lar in properties to wormwood. Dose of fluidextract 10–20 min. (0.6–1.2 C.). Unof. **A. absinthium**. See *Artemisium*. **A. abyssinica**, an African species yielding the drug *terechint*, applied to relieve cramps in the final stages of malaria. **A. arborescens**, of southern Europe, is stomachic and tonic, and is used as is *A. absinthium*. **A. chinensis**, of Asia, is employed by the Chinese as a tonic and emmenagogue, and the down covering the leaf-surface in the preparation of moxa. **A. frigida**, wild sage, mountain sage, sierra salvia. An herb of western United States, introduced as a substitute for quinin in the treatment of periodic fevers. Also of service in dysentery, rheumatism, and scarlatina. Dose of the fluidextract 1–2 dr (4–8 C.). Unof. **A. maritima**, affords pure wormseed. **A. mexicana**, an American species, is said to be a stimulant, emmenagogue, and antihelmintic. **A. pontica**, Roman wormwood. It grows in Europe and Asia, has a pleasant odor and taste, and is used as a tonic and stimulant; it is burned in Egypt during the plague to ward off contagion. **A. santonica**, a species of Persia and Tartary, a variety of wormseed sometimes imported from Russia. **A. spicata**, an Alpine species with strong aromatic properties. **A. tridentata**, sage-brush, a shrub of the elevated portion of western North America, containing a pungent volatile oil. It is diaphoretic and stimulant. The Indians use an infusion of the plant as remedial for colds and headache and as a vermifuge. **A. trífida**, is found in the valleys of Utah and Wyoming, and has properties similar to *A. tridentata*. **A. vulgaris**, mugwort, a popular remedy in various diseases.

Arteria (ar-te'-re-ah) [*ἀρτηρία*, trachea; artery]. A hollow tube. See *Artery*.

Arterial [see *Arteria*]. Pertaining to an artery.

Arterialization (ar-te-re-al-iz-a'-shun) [see *Arteria*]. The process of making or becoming arterial; the change from venous blood into arterial.

Arteriasis (ar-te-ri-a'-sis) [see *Arteria*]. Degeneration of an artery; it may be either calcareous or fatty.

Arterin (ar'-ter-in) [see *Arteria*]. Hoyer-Seyler's term for the arterial blood-pigment contained in the red corpuscles.

Arteriocapillary (ar-te-re-o-kap'-il-a-ree) [arteria; capillus, a hair]. Pertaining to arteries and capillaries. **A. Fibrosis**, a chronic inflammatory process characterized by an overgrowth of connective tissue in the walls of the blood-vessels. It is known also as arteriocapillary fibrosis of Gull and Sutton.

Arteriochhalasis (ar-te-re-o-khal-s'-sis) [arteria; γάλαξ, a slackening]. Arterial atony.

Arteriodialysis (ar-te-re-o-dial'-i-sis) [arteria; διάλυσις, dissolution]. Attenuation of the arterial walls with or without rupture.

Arteriodiplopiasmus (ar-te-re-o-dip-lo-pi-et'-mus) [*arteria*, διπλός, twofold; πῆμα, pressure]. D'Etiolles' procedure for obtaining rapid coagulation of the blood in that part of an artery lying between two points upon which simultaneous pressure is made.

Arteriofibrosis (ar-te-re-o-fi-bro'-sis). See *Arterio-capillary fibrosis*.

Arteriogram (ar-te'-re-o-gram). See *Sphygmogram*.

Arteriography (ar-te-re-ag'-ra-fe) [*arteria*; γράφω, a writing]. 1. A description of the arteries. 2. The graphic representation of the pulse-waves.

Arteriole (ar-te'-re-ol) [*arteriola*]. A very small artery. **A.**, Straight, the small blood-vessels that supply the medullary pyramids of the kidneys.

Arteriolith (ar-te'-re-o-lith) [*arteria*; λίθος, a stone]. A calculus in an artery from calcification of a thrombus.

Arteriology (ar-te-re-ol'-o-je) [*arteria*; λογία, science]. The science of the arteries; the anatomy, physiology, and pathology of the arteries.

Arteriomalacia (ar-te-re-o-mal'-a-se-ah) [*arteria*, μαλακία, softness]. Softening of the wall of an artery.

Arteriometer (ar-te-re-om'-et-er) [*arteria*; μέτρον, measure]. An instrument for measuring the changes in the caliber of a pulsating artery.

Arterioperissia, Arterioperittia (ar-te-re-o-per-iss'-e-sh, -it'-e-sh) [*arteria*; περιπαθία, excessive]. Abnormal or excessive arterial development. Syn., *Peritarteria*; *Perrisarteria*.

Arterioplegmus (ar-te-re-o-pleg'-mus) [*arteria*; πλεγμα, anything twined or plaited]. Perpliation. Syn., *Arterinople*.

Arteriosclerosis (ar-te-re-o-skle-ro'-sis) [*arteria*, σκληρός, hard]. A chronic inflammation of the arterial walls, especially of the intima.

Arteriosclerotic (ar-te-re-o-skle-ro'-ik) [see *Arteriosclerosis*]. Pertaining to arteriosclerosis. **A.** Kidney, a kidney the seat of chronic interstitial inflammation affecting primarily the blood-vessels.

Arteriotomy (ar-te-re-ot'-o-me) [*arteria*; τέμνω, to cut]. The cutting or opening of an artery for the purpose of bloodletting. The temporal artery is generally selected.

Arteriovenous (ar-te-re-o-ve'-nus) [*arteria*; vena, vein]. Both arterial and venous, involving an artery and a vein, as an *arterio-venous aneurysm*.

Arterioversion (ar-te-re-o-ver'-shun) [*arteria*; verto, to turn]. Weber's method of arresting hemorrhage by turning vessels inside out by means of an instrument called the arterioverter.

Arterioverter (ar-te-re-o-ver'-ter). An instrument for performing arterioversion.

Arteritis (ar-te-ris'-tis) [*arteria*; τειγ, inflammation]. 1. Inflammation of an artery. 2. Inflammation of the external coat of an artery. **A.** deformans. See *Endarteritis*, *Chronic*. **A.** obliterans. See *Endarteritis obliterans*. **A.** syphilitica, endarteritis deformans caused by syphilis. **A.** umbilicalis, septic inflammation of the umbilical arteries in the newborn.

Artery (ar'-ter-e) [see *Arteria*]. One of the tube-like vessels through which the blood is propelled by the heart to all parts of the body. Arteries end in arterioles and capillaries. They are composed of 3 coats: the outer, or *tunica adventitia*; the middle, or *tunica media*, the muscular coat; the internal, or *intima*, composed of endothelial cells, fibrous and elastic tissue. **A.**, Abdominal. See *A.* Circumflex Iliac, Deep. **A.**, Abdominal, External or Subcutaneous. See *A.* Epigastric, Superficial; *A.* Pudic, External Superior. **A.**, Abdominal, Posterior. See *A.* Epigastric, Deep. **A.**, Acetabular, a branch of the internal circumflex artery distributed to the hip-joint. **A.**, Acromiothoracic (Thoracic Axis), origin, second branch of first part of axillary; distribution, shoulder, arm, upper anterior part of chest, and mammary gland; branches, acromial, humeral, pectoral, clavicular. **A.**, Alar Thoracic, origin, second part of axillary; distribution, lymphatic glands in axilla. **A.**, Anastomotic, those which connect other arteries, more or less remote from each other. **A.**, Anastomotic (of External Plantar), origin, external plantar; distribution, outer border of foot; it anastomoses with the tarsal and metatarsal branches of the dorsalis pedis. **A.**, Anastomotic (of Internal Plantar), origin, internal plantar; distribution, inner side of foot; it anastomoses with internal tarsal branch of the dorsalis pedis. **A.**, Anastomotica magna (of Brachial), origin, brachial; distribution, elbow; branches, posterior and anterior. **A.**, Anastomotica magna (of Superficial Femoral), origin, superficial femoral (in Hunter's canal); distribution, knee; branches, superficial and deep. **A.**, Angular, origin, the termination of the facial; distribution, lacrimal sac and lower part of orbicularis palpebrarum; it anastomoses with infraorbital. **Aorta**, Abdominal, origin, thoracic aorta; distribution, two common iliacs, branches, phrenic (right and left), celiac axis, suprarenal or capsular (right and left), superior mesenteric, lumbar (4 pairs), renal (right and left), spermatic (right and left), inferior mesenteric, right and left common iliac, middle sacral. **Aorta**, Arch, origin, left ventricle of heart; distribution, thoracic aorta; branches, two coronary, innominate, left common carotid, left subclavian. **Aorta**, Primitive, that portion from the origin to the point at which the first branch is given off. **Aorta**, Thoracic, origin, arch of aorta;

distribution, abdominal aorta; branches, 2 or 3 pericardiac, 3 bronchial, 4 or 5 esophageal, 20 intercostal, subcostal (or twelfth

A., Articular, Superior External (of Knee), origin, popliteal, distribution, cruciate and knee. A., Articular, Superior Inter-

SCHEME OF ARTERIES — (Hewson)

dorsal), diaphragmatic, aberrans. A., Articular, Middle (of Knee), origin, popliteal, distribution, cruciate ligaments and joint.

nal, origin, popliteal; distribution, knee. A., Auditory, External, a division of the first part of the internal maxillary artery,

it enters the tympanum by the glaserian fissure and is distributed to the tympanum. **A., Auricular, Posterior**, origin, fifth branch of external carotid; distribution, back of auricle, scalp, and part of neck; branches, parotid, muscular, stylomastoid, anterior terminal or auricular, and posterior terminal or mastoid. **A., Axillary**, origin, subclavian; distribution, brachial and seven branches, branches, superior thoracic, acromioclavicular, long thoracic, alar thoracic, subscapular, anterior and posterior circumflex. **A., Azygos (of the Tongue)**, a small artery formed by the junction of branches of the dorsal arteries of the tongue; it extends along the median line of the dorsum of the tongue. **A., Basilar**, origin, by confluence of right and left vertebral; distribution, brain, branches, transverse (or pontile), internal auditory, anterior cerebellar, superior cerebellar, two posterior cerebral. **A., Brachial**, origin, axillary, distribution, arm and forearm; branches, superior and inferior profunda, anastomotica magna, nutrient, muscular, radial, and ulnar. **A., Cardiac**, origin, gastric; distribution, cardiac end of stomach. **A., Carotid, Common**, origin, right side, innominate, left side, arch of aorta; distribution, external and internal carotid, branches, external and internal carotid. **A., Carotid, External**, origin, common carotid; distribution, anterior part of neck, face side of head, integuments, and dura mater, branches, ascending pharyngeal, superior thyroid, lingual, facial, occipital, posterior auricular, temporal, internal maxillary. **A., Carotid, Internal**, origin, common carotid; distribution, greater part of brain the orbit, internal ear, forehead, and nose; branches, tympanic, vidian, arteria receptaculi, pituitary, gasserian, meningial, ophthalmic, posterior communicating, anterior choroid, anterior cerebral, middle cerebral. **A., Carotid, Primitive**. See **A., Carotid, Common**. **A., Celiac**, origin, abdominal aorta; distribution, stomach, duodenum, spleen, pancreas, liver, and gall bladder, branches, gastric, hepatic, splenic. **A., Central (of Retina)**, origin, ophthalmic, distribution, retina. **A.s, Central System of**, Heubner's and Duret's term for the primary or secondary branches of the circle of Willis; they are distributed to the central ganglions of the brain. **A., Cerebellar, Anterior**, origin, basilar; distribution, anterior inferior surface of cerebellum. **A., Cerebellar, Inferior**, origin, vertebral; distribution, vermiciform process and cortex of cerebellum; branches, inferior vermicular and the hemispherical. **A., Cerebellar, Superior**, origin, basilar; distribution, superior vermiciform process and circumference of cerebellum; branches, superior vermicular and hemispherical. **A., Cerebral, Anterior**, origin, internal carotid; distribution, anterior portion of cerebrum; branches, anterior communicating, ganglionic (or cen-

tral), commissural, hemispherical (or cortical). **A., Cerebral, Middle**, origin, internal carotid; distribution, middle portion of cerebrum; branches, ganglionic (or central), hemispherical (or cortical). **A., Cerebral, Posterior**, origin, basilar; distribution, temporosphenoid and occipital lobes; branches, ganglionic (or central) and hemispherical (or cortical). **A., Cervical**, origin, uterine; distribution, cervix uteri. **A., Cervical, Ascending**, origin, inferior thyroid; distribution, deep muscles of neck and spinal canal; branches, muscular, spinal, and phrenic. **A., Cervical, Deep**, origin, superior intercostal; distribution, deep muscles of neck and spinal canal, branches, muscular, anastomotica, vertebral (or spinal). **A., Cervical, Superficial**, origin, transverse cervical; distribution, trapezius, levator anguli scapular, splenius muscles, and posterior chain of lymphatic glands. **A., Cervical, Transverse (Transversalis colli)**, origin, thyroid axis; distribution, posterior cervical and scapular regions; branches, posterior scapular and superficial cervical. **A., Circumflex, Anterior (of Axillary)**, origin, axillary; distribution, pectoralis major, biceps, and shoulder-joint, branches, bicipital and pectoral. **A., Circumflex Iliac, Deep**, origin, external iliac; distribution, upper part of thigh and lower part of abdomen; branches, muscular and cutaneous. **A., Circumflex, Posterior (of Axillary)**, origin, axillary; distribution, deltoid, teres minor, triceps, and shoulder-joint; branches, nutrient, articular, acromial, muscular. **A., Colic, Left**, origin, inferior mesenteric; distribution, descending colon. **A., Colic, Middle**, origin, superior mesenteric; distribution, transverse colon. **A., Colic, Right**, origin, superior mesenteric; distribution, ascending colon. **A., Colic, Transverse**, origin, colic, middle; distribution, transverse colon. **A., Comes nervi phrenici**. See **A., Phrenic, Superior**. **A., Communicating**. 1. One establishing communication between two arteries. 2. An artery having as origin the dorsalis pedis; it enters into the formation of the plantar arch and has two digital branches. **A., Communicating (or Perforating)**, origin, deep palmar arch; distribution, joins proximal ends of metacarpal and second and third dorsal interosseous arteries. **A., Communicating, Anterior**, origin, anterior cerebral; it assists in formation of anterior boundary of Willis; sends branches to caudate nucleus. Syn., *Communicans willisii*. **A., Communicating, Posterior**, origin, posterior cerebral; it enters into formation of circle of Willis, sends branches to uncinate convolution and optic thalamus; branches, uncinate, middle thalamic. **A. Compressor**, **A. Constrictor**, an instrument for occluding an artery for the purpose of arresting or preventing hemorrhage. **A., Coronary, Inferior**, origin, facial; distribution, lower lip. **A., Coronary, Left**,

origin, left anterior sinus of Valsalva; distribution, heart, branches, left auricular, anterior interventricular, left marginal, terminal. **A., Coronary, Right**, origin, right anterior sinus of Valsalva; distribution, heart, branches, right auricular, preventricular, right marginal, posterior interventricular, transverse. **A., Coronary, Superior**, origin, facial, distribution, upper lip. **A.s, Cortical System of**, Hensler and Duret's term for the arteries distributed to the cerebral cortex and the parts immediately beneath it. **A., Diaphragmatic**, origin, thoracic aorta; distribution, diaphragm. **A., Digital**, origin, external plantar; distribution, outer side of the second and third, fourth, and fifth toes. **A., Digital, Palmar**, origin, superficial palmar arch; distribution, both sides of little, ring, and middle finger and ulnar side of index finger. **A., Dorsal (of Penis)**, origin, pudic; distribution, penis. **A., Dorsalis hallucis**, a continuation of dorsalis pedis; distribution, great and second toe. **A., Dorsalis pedis**, origin, continuation of anterior tibial; distribution, assists to form plantar arch, branches, tarsal, metatarsal, dorsalis hallucis, communicating. **A., End**, **A., Terminal**, an artery that does not anastomose with other arteries by means of large branches; there is usually a capillary anastomosis. **A., Epigastric, Deep (or Inferior)**, origin, external iliac; distribution, abdominal wall, branches, cremasteric, pubic, muscular, cutaneous, terminal. **A., Epigastric, Superficial**, origin, common femoral; distribution, inguinal glands, skin, superficial fascia, and abdominal wall. **A., Epigastric, Superior**, origin, internal mammary; distribution, abdominal wall and diaphragm, liver, and peritoneum; branches, phrenic, xiphoid, cutaneous, muscular, hepatic, and peritoneal. **A., Epiploic**, origin, right and left gastroepiploic; distribution, omentum. **A., Esophageal**. 1. Origin, gastric; distribution, esophagus. 2. Origin, inferior thyroid; distribution, esophagus. 3. Origin, left phrenic; distribution, esophagus. 4. (4 or 5.) Origin, thoracic aorta; distribution, esophagus. **A., Esophageal, Inferior**, origin, coronary (of stomach); distribution, esophagus. **A., Facial**, origin, third branch of external carotid; distribution, pharynx and face; branches, ascending, or inferior palatine, tonsillar, glandular, muscular, submental, masseteric, buccal, inferior labial, inferior and superior coronary lateralis nares, angular. **A., Femoral, Common**, origin, continuation of external iliac; distribution, lower part of abdominal wall, upper part of thigh and genitalia, branches, superficial epigastric, superficial circumflex iliac, superficial profunda. **A., Femoral, Deep**. See **A., Femoral Profunda**. **A., Femoral, Profunda**, origin, common femoral; distribution, muscles of thigh, branches, external circumflex, internal cir-

cumflex, and three perforating. **A., Femoral, Superficial**, origin, continuation of common femoral; distribution, muscles of thigh and knee joint; branches, muscular, sartorius, anastomotic magna. **A., Forceps**, a device for catching or twisting an artery; a term used for **A., Frontal**, a branch of the ophthalmic artery; it ascends the inner part of the orbital arch and supplies the periorbital muscles, and integument of the middle forehead. **A., Gastric (or Coronary)**, origin, celiac axis; distribution, stomach, liver, and esophagus, branches, esophageal, cardiac, gastric, and hepatic. **A., Gastroduodenal**, a branch of the hepatic artery gives off near the pyloric orifice of the stomach, branches, right gastroepiploic, and superior pancreaticoduodenal. **A., Gluteal**, a branch of the internal iliac which runs backward between the lumbosacral cord and the first sacral nerve, turns around the upper margin of the great sacrosacral foramen, and divides opposite the interval between the gluteus medius and piriformis muscles into the deep and superficial gluteal arteries. **A., Gluteal, Deep**, origin, gluteal; distribution, deep muscles of posterior gluteal region. **A., Gluteal, Inferior**, origin, sciatic; distribution, gluteus maximus. **A., Gluteal, Superficial**, origin, gluteal; distribution, gluteus maximus and integument over sacrum. **A., Gluteal, Superior**, origin, deep gluteal; distribution, muscles adjacent. **A.s, Helicine**, the arteries found in coiled tissue, as in the testicle, uterus, ovary, etc. **A., Hemorrhoidal, Inferior (or External)**, origin, pudic; distribution, sphincter muscle, levator ani. **A., Hemorrhoidal, Middle**, origin, internal iliac, anterior division; distribution, middle part of rectum. **A., Hemorrhoidal, Superior**, origin, inferior mesenteric; distribution, upper part of rectum. **A., Hepatic**, origin, celiac axis; distribution, liver, pancreas, part of duodenum, and stomach, branches, pancreatic, subpyloric, gastroduodenal, right and left terminal. **A., Iliac, Common**, origin, terminal branch of abdominal aorta; distribution, peritoneum, subperitoneal fat, ureter, and terminates in external and internal iliac branches, peritoneal, subperitoneal, ureters, external and internal iliac. **A., Iliac, External**, origin, common iliac; distribution, lower limb, branches, deep epigastric, deep circumflex iliac, muscular, and continues as femoral. **A., Iliac, Internal**, origin, common iliac; distribution, pelvis and generative organs and inner side of thigh, branches, anterior and posterior trunk. **A., Iliac, Internal (Anterior Trunk)**, origin, internal iliac; distribution, pelvis and generative organs and thigh, branches, hypogastric, superior, middle, and inferior vesical, middle hemorrhoidal, uterine, vaginal, obturator, sciotic, internal pudic. **A., Iliac, Internal (Posterior Trunk)**, origin, internal iliac; distribution, muscles of hip and sacrum, branches, iliothoracic, lateral sacral and gluteal. **A.,**

Innominate, origin, arch of aorta; distribution, right side of head and right arm; branches, right common carotid, right subclavian, occasionally thyroidea ima. **A.**, **Intercostal, Anterior**, origin, internal mammary; distribution, intercostal muscles, ribs (upper five or six), and pectoralis major. **A.**, **Intercostal, Anterior**, origin, musculophrenic; distribution, lower five or six intercostal spaces. **A.**, **Intercostal, Superior**, origin, subclavian; distribution, neck and upper part of thorax; branches, deep cervical, first intercostal, arteria aberrans. **A.**, **Interosseous, Anterior**, origin, interosseous (common); distribution, muscles of forearm. **A.**, **Interosseous, Common**, origin, ulnar; distribution, interosseous membrane and deep muscles of the forearm; branches, anterior and posterior interosseous. **A.**, **Interosseous, Posterior**, origin, ulnar; distribution, muscles of forearm. **A.**, **Labial, Superior**. See **A. Coronary, Superior**. **A.**, **Laryngeal, Superior**, origin, superior thyroid; distribution, intrinsic muscles and mucous membrane of larynx. **A.**, **Lenticulostriate**, origin, middle cerebral; distribution, lenticular and caudate nuclei. **A.**, **Lingual**, origin, external carotid; distribution, tongue; branches, hypoid, dorsalis linguae, sublingual, ranine. **A.**, **Mammary, External**. See **A. Thoracic, Long**. **A.**, **Mammary, Internal**, origin, subclavian; distribution, structures of thorax; branches, superior phrenic, mediastinal (or thymic), pericardiac, sternal, anterior intercostal, perforating, lateral intercostal, superior epigastric, internal mammary. **A.**, **Maxillary, External**. See **A. Facial**. **A.**, **Maxillary, Internal (Maxillary Group)**, origin, external carotid; distribution, structures indicated by names of branches; branches, deep auricular, tympanic, middle meningeal, mandibular, small meningeal. **A.**, **Maxillary, Internal (Pterygoid Group)**, origin, external carotid; distribution, structures indicated by names of branches; branches, masseteric, posterior deep temporal, internal and external pterygoid, buccal, anterior deep temporal. **A.**, **Maxillary, Internal (Sphenomaxillary Group)**, origin, external carotid; distribution, structures indicated by names of branches; branches, posterior dental (or alveolar), infraorbital, posterior (or descending) palatine, vidian, pterygopalatine, nasal, or sphenopalatine. **A.**, **Median (Arteria comes nervi mediani)**, origin, anterior interosseous; distribution, median nerve and superficial palmar arch. **A.**, **Mediastinal, Anterior (or Thymic)**, origin, internal mammary; distribution, connective tissue, fat, and lymphatics in superior and anterior mediastinum; thymus gland. **A.s**, **Medullary**. 1. Those supplying the medullary substance of the brain. 2. The nutrient arteries. **A.**, **Meningeal**. 1. Origin, ascending pharyngeal; distribution, membranes of brain. 2. Origin, posterior ethmoid, distribution, dura

mater. **A.**, **Meningeal, Anterior**, origin, internal carotid; distribution, dura mater. **A.**, **Meningeal, Middle or Great**, origin, internal maxillary; distribution, cranium and dura mater; branches, anterior and posterior. **A.**, **Meningeal, Posterior**. 1. Origin, occipital; distribution, dura mater. 2. Origin, vertebral; distribution, dura mater. **A.**, **Meningeal, Small**, origin, internal maxillary; distribution, gasserian ganglion, walls of cavernous sinus, and dura mater. **A.**, **Mesenteric, Inferior**, origin, abdominal aorta; distribution, lower half of large intestine; branches, left colic, sigmoid, superior hemorrhoidal. **A.**, **Mesenteric, Superior**, origin, abdominal aorta; distribution, whole of small intestine and upper half of large; branches, inferior pancreaticoduodenal, colica media, colica dextra, ileocolic, vasa intestini tenuia. **A.**, **Musculophrenic**, origin, internal mammary; distribution, diaphragm, fifth and sixth lower intercostal spaces, oblique muscles of abdomen; branches, phrenic, anterior intercostals, muscular. **A.**, **Nasal**, origin, ophthalmic; distribution, lacrimal sac and integuments of nose; branches, lacrimal and transverse nasal. **A.**, **Nasopalatine**. See **A.**, **Sphenopalatine**. **A.**, **Obturator**, origin, anterior division, internal iliac; distribution, pelvis and thigh; branches, iliac (or nutrient), vesical, pubic, external and internal pelvic. **A.**, **Obturator, External**, origin, obturator; distribution, muscles about obturator foramen. **A.**, **Occipital**. 1. Origin, fourth branch of external carotid; distribution, muscles of neck and scalp, branches, sternomastoid, posterior meningeal, auricular, mastoid, princeps cervicis, communicating, muscular, terminal. 2. A branch of the posterior cerebral artery distributed to the occipital gyri and surrounding parts. **A.**, **Omphalomesenteric**, origin, primitive aorta; distribution, subsequently becomes the umbilical. **A.**, **Ophthalmic**, origin, internal carotid; distribution, the eye, adjacent structures, portion of face; branches, lacrimal, supraorbital, central artery of retina, muscular, ciliary, posterior and anterior ethmoid, palpebral, frontal, nasal. **A.**, **Ovarian**, origin, abdominal aorta; distribution, ovary, ureter, fallopian tube, uterus; branches, ureteral, fallopian, uterine, ligamentous. **A.**, **Palatine**, origin, ascending pharyngeal; distribution, soft palate and its muscles. **A.**, **Palatine, Ascending (or Inferior)**, origin, first branch of facial; distribution, upper part of pharynx, palate, and tonsils, branches, palatine, tonsillar. **A.**, **Palatine, Descending**, origin, internal maxillary; distribution, to soft and hard palate; branches, anterior and posterior. **A.**, **Palmar Arch, Deep**, origin, radial and communicating of ulna, distribution, palm and fingers, branches, princeps pollicis, radialis indicis, palmar interosseous (3), recurrent carpal, posterior perforating. **A.**,

Palmar Arch, Superficial, origin, ulnar and superficialis volar; distribution, palm and fingers, branches, digital (4), muscular, cutaneous. **A., Pancreatic**. 1. Origin, hepatic; distribution, pancreas. 2. Origin, splenic; distribution, pancreas. **A., Pancreaticoduodenal, Inferior**, origin, superior mesenteric; distribution, pancreas and duodenum. **A., Pancreaticoduodenal, Superior**, origin, gastroduodenal; distribution, duodenum and pancreas. **A., Perforating (or Posterior Communicating)** (3), origin, deep palmar arch; distribution, interosseous spaces. **A.s, Pericardiophrenic**, the pericardiac divisions of the internal mammary artery connecting with sternal ramifications of the same artery and with branches of the superior phrenic, bronchial, and intercostal arteries to form the subpleural mediastinal plexus. **A., Pharyngeal**. 1. Origin, pterygopalatine, distribution, roof of pharynx. 2. Origin, sphenopalatine, distribution, roof and contiguous portions of pharynx. **A., Pharyngeal, Ascending**, origin, first branch external carotid; distribution, pharynx, soft palate, tympanum, posterior part of neck, and membranes of brain; branches, prevertebral, pharyngeal, palatine, tympanic, meningeal. **A., Phrenic**, origin, ascending cervical; distribution, phrenic nerve. **A., Phrenic, Superior (Comes nervi phrenici)**, origin, internal mammary; distribution, pleura, pericardium, and diaphragm. **A., Plantar Arch**, origin, external plantar artery; distribution, anterior part of foot and toes; branches, articular and plantar digital. **A., Plantar, Deep**, origin, metatarsal; distribution, assists in formation of plantar arch. **A., Plantar, External**, origin, posterior tibial; distribution, sole and toes, branches, muscular, calcaneal, cutaneous, anastomotic, posterior perforating, plantar arch. **A., Plantar, Internal**, origin, posterior tibial; distribution, inner side of foot, branches, muscular, cutaneous, articular, anastomotic, superficial digital. **A., Popliteal**, origin, continuation of femoral; distribution, knee and leg; branches, cutaneous, muscular (superior and inferior) or sural, articular, superior and inferior external, superior and inferior internal and ankylos, terminal anterior and posterior tibial. **A., Profunda (Deep Femoral)**, origin, femoral; distribution, thigh, branches, external and internal circumflex, three perforating. **A., Profunda, Inferior**, origin, brachial; distribution, triceps, elbow joint. **A., Profunda, Superior**, origin, brachial; distribution, humerus, muscles and skin of arm, branches, ascending, cutaneous, articular, nutrient, muscular. **A., Pterygopalatine (Pterygopharyngeal)**, origin, internal maxillary; distribution, pharynx, eustachian tubes, and sphenoid cells; branches, pharyngeal, eustachian, sphenoid. **A., Pudic, External, Deep (Inferior)**, origin, femoral, common; dis-

tribution, skin of scrotum (or labium in female). **A., Pudic, External, Superficial (Superior)**, origin, common femoral; distribution, integument above pubes and external genitalia. **A., Pudic, Internal**, origin, internal iliac, anterior division; distribution, generative organs; branches, external (or inferior) hemorrhoidal, superficial perineal, muscular, arteries of bulb, crus, and dorsal of penis. **A., Pulmonary**, origin, right ventricle; distribution, lungs, branches, right and left. **A., Pyloric, Inferior**, origin, gastroduodenal or right gastroepiploic; distribution, pyloric end of stomach. **A., Pyloric, Superior**, origin, hepatic; distribution, pyloric end of stomach. **A., Radial**, origin, brachial; distribution, forearm, wrist, hand; branches, radial recurrent, meso-radial, anterior and posterior carpal, superficial volar, metacarpal, dorsalis pollicis, dorsalis indicis, deep palmar arch. **A., Ranine**, origin, lingual; distribution, tongue and mucous membrane of mouth. **A., Renal**, origin, abdominal aorta; distribution, kidneys, branches, inferior suprarenal, capsular, ureteral. **A.s, Retinal**, the central artery of the retina and the upper and lower arteries on the nasal side and on the temporal side of the optic nerve. **A., Sacra media**. See **A., Sacral, Middle**. **A., Sacral, Middle**, origin, continuation of aorta; distribution, sacrum and coccyx. **A., Scapular, Dorsal**, origin, subscapular; distribution, muscles of infraspinous fossa; branches, infrascapular. **A., Scapular, Posterior**, origin, continuation of transverse cervical; distribution, muscles of scapular region; branches, supraspinous and infraspinous, subscapular, muscular. **A., Sciatic**, origin, internal iliac, anterior division; distribution, pelvic muscles and viscera, and branches; branches, coccygeal, inferior gluteal, muscular, anastomotic, articular cutaneous, comes nervi ischiadici, vesical, rectal, prostatic, etc. **A., Spermatic**, origin, abdominal aorta; distribution, scrotum and testis; branches, ureteral, cremasteric, epididymal, testicular. **A., Sphenopalatine (Nasopalatine)**, origin, internal maxillary; distribution, pharynx, nose, and sphenoid cells; branches, pharyngeal, sphenoid, nasal, ascending septal. **A., Spinal**. 1. Origin, ascending cervical; distribution, spinal canal. 2. Origin, intercostals; distribution, spinal canal and spine. 3. Origin, lateral sacral; distribution, spinal membranes and muscles and skin over sacrum. **A., Spinal, Anterior**, origin, vertebral; distribution, spinal cord. **A., Spinal, Lateral**, origin, vertebral; distribution, vertebrae and spinal canal. **A., Spinal, Posterior**, origin, vertebral; distribution, spine. **A., Splenic**. 1. Origin, celiac axis; distribution, spleen, pancreas, part of stomach, omentum, branches, small and large pancreatic, left gastroepiploic, vasa brevia, terminal. 2. Origin, left phrenic; distribution, spleen. **A., Subclavian**, origin,

right, innominate; *left*, arch of aorta; distribution, neck, thorax, arms, brain, meninges, etc.; branches, vertebral, thyroid axis, internal mammary, superior intercostal. **A., Subscapular**, origin, axillary; distribution, subscapularis, teres major, latissimus dorsi, serratus magnus, axillary glands, branches, dorsal and infrascapular. **A., Suprascapular (Transversalis humeri)**, origin, thyroid axis; distribution, muscles of shoulder; branches, inferior sternomastoid, subclavian, nutrient, suprasternal, acromial, articular, subscapular, supraspinous, and infraspinous. **A., Sylvian**, the middle cerebral artery. **A., Temporal**, origin, external carotid; distribution, forehead, parotid gland, masseter muscle, ear, branches, parotid, articular, masseteric, anterior auricular, transverse facial, middle, anterior, and posterior temporal. **A., Temporal, Deep, Anterior**, origin, internal maxillary; distribution, anterior part of temporal fossa. **A., Termatic**, origin, anterior communicating; distribution, lamina cinerea and corpus callosum. **A., Thoracic, Acromial**, origin, axillary; distribution, muscles of shoulder, arm, and chest, branches, acromial, humeral, pectoral, clavicular. **A., Thoracic, Alar**, origin, axillary; distribution, axillary glands. **A., Thoracic, External**. See **A., Thoracic, Long**. **A., Thoracic, Internal**. See **A., Mammary, Internal**. **A., Thoracic, Long (External Mammary)**, origin, axillary; distribution, pectoral muscles, serratus magnus, mammary and axillary glands. **A., Thymic**, origin, internal mammary; distribution, connective tissue, fat, and lymphatics of mediastinum and thymus. **A. of the Thyroid Axis**, origin, subclavian; distribution, shoulder, neck, thorax, spine, cord, branches, inferior thyroid, suprascapular, and transverse cervical. **A., Thyroid, Inferior**, origin, thyroid axis; distribution, larynx, esophagus, and muscles of neck, branches, muscular, ascending cervical, esophageal, tracheal, and inferior laryngeal. **A., Thyroid, Superior**, origin, external carotid; distribution, omohyoid, sternohyoid, sternothyroid, thyroid gland; branches, hyoid, sternomastoid, superior laryngeal, cricothyroid. **A., Thyroidea ima**, origin, innominate (usually); distribution, thyroid body. **A., Tibial, Anterior**, origin, popliteal; distribution, leg; branches, posterior and anterior tibial recurrent, muscular, internal and external malleolar. **A., Tibial, Posterior**, origin, popliteal; distribution, leg, heel, and foot; branches, peroneal, intertarsal, medullary, cutaneous, communicating, malleolar, calcanean, internal and external plantar. **A., Tonsillar**. 1. Origin, ascending palatine; distribution, tonsil and eustachian tube. 2. Origin, facial; distribution, tonsil and root of tongue. **A., Transversalis colli**. See **A., Cervical, Transverse**. **A., Ulnar**, origin, brachial; distribution, forearm, wrist, and hand, branches, anterior and posterior ulnar, recurrent, common in-

tersosseous, muscular, nutrient, anterior and posterior ulnar, carpal, palmar arch. **A., Uterine**. 1. Origin, internal iliac, anterior branch; distribution, uterus; branches, cervical, vaginal, azygos. 2. Origin, ovarian; distribution, uterus. **A., Vasa brevia**, origin, splenic; distribution, stomach. **A., Vertebral**, origin, subclavian; distribution, neck and cerebrum; branches, lateral spinal, muscular, anastomotic, posterior meningeal, posterior and anterior spinal, posterior cerebellar. **A., Vesical, Inferior**, origin, internal iliac, anterior division; distribution, bladder, prostate, seminal vesicles, and vagina (in female). **A., Vesical, Middle**, origin, superior vesical; distribution, bladder. **A., Vesical, Superior**, origin, internal iliac, anterior division; distribution, bladder; branches, deferentia, ureteric, middle vesical (occasionally). **A., Vidian**, origin, internal maxillary; distribution, roof of pharynx, eustachian tube, and tympanum; branches, pharyngeal, eustachian, tympanic. **A., Vitelline**. See **A., Omphalomesenteric**.

Arthragra (ar-thra'-grah) [arthron; *ἀρρα*, seizure]. Gout.

Arthralgia (ar-thral'-je-ah) [arthron; *ἄλγος*, pain]. Neuralgic pain in a joint. Syn., **Arthron neuralgia**; **Articular neuralgia**. **A. saturnina**, pain in the joints and rigidity and cramps in the approximate muscles; it is symptomatic of lead-poisoning.

Arthralgic (ar-thral'-jik). See **Arthralgia**.

Arthrectasia, Arthrectasis (ar-threk'-la'-se-ah, ar-threk'-ta-sis) [arthron; *ἵκτασις*, dilation]. Dilation of a joint-cavity.

Arthrectomy (ar-threk'-ta-me) [arthron; *ἵκτομή*, a cutting-out]. Excision of a joint.

Arthrempyesis (ar-threm-pi'-e'-sis). Suppuration in a joint.

Arthrentasis (ar-thren'-la-sis) [arthron; *ἵκτασις*, distortion]. Distortion of the limbs due to gout.

Arthric (ar'-thrik). See **Arthritic** (2).

Arthrituent (ar-thri'-lu-ent) [arthron; *fluere*, to flow]. Applied to abscesses proceeding from a diseased joint.

Arthritic (ar-thri'-ik) [arthritis]. Relating—1. To arthritis or to gout. 2. To a joint.

Arthritis (ar-thri'-tis) [arthron; *εἶσις*, inflammation]. Inflammation of a joint. **A., Acute**, acute joint-inflammation, particularly that due to gout. Syn., **Arthritis vera**. **A., Acute Serous**, acute synovitis. **A. arthrodynia**, gout. **A. asthmatica**, a form observed in elderly persons subject to asthma, and mitigated by an attack of the latter. **A., Atrophic**. Synonym of **Charcot's joint disease**. **A., Blennorrhagic**, gonorrheal rheumatism. **A., Chronic**, a form in which the joints are not so much affected as are other parts of the body. **A. deformans**, chronic inflammation of a joint with deformity; rheumatoid arthritis. **A., Diaphragmatic**, angina pectoris. **A., Erratic**, retrocedent or metastatic gout. **A. fungosa**, tuberculous disease of the joints; white

swelling. **A.**, Gonorrheal, gonorrheal synovitis. **A.**, Gouty, that due to gout. **A. hiemalis**, winter gout, a form occurring less frequently in summer than in other seasons. **A.**, Internal. See **A.**, Visceral. **A.**, Intervertebral. See **Spondylarthritis**. **A. ischias**, gout in the hip. **A. larvata**, **A.**, Latent, a masked form not manifested by the usual symptoms. **A. maxillaris**, rheumatoid arthritis of the temporomaxillary joint. **A. nodosa**. See **Osteoarthritis**. **A. pauperum**. Synonym of **A.**, Rheumatoid. **A. podagra**, gout in the feet. **A.**, Proliferating. See **A. deformans**. **A.**, Retrograde, suppressed gout. **A.**, Rheumatoid, a chronic joint affection characterized by inflammatory overgrowth of the articular cartilages and synovial membranes, with destruction of those parts of the cartilages subject to intra-articular pressure; there is progressive deformity. The nature of the disease is unknown, by some it is considered a trophic disorder consequent upon spinal changes. It occurs in the young, in whom it is often acute, and in the old, in whom it is of a more mild form. The mildest type is known as Heberden's nodosities, in which small nodules appear at the sides of the distal phalanges of the fingers; in severer forms nearly every articulation may become ankylosed. Syn., **Chronic rheumatoid arthritis**; **Osteoarthritis**; **Rheumatic gout**; **Nodular rheumatism**; **Arthritis deformans**. **A. sicca**, rheumatoid arthritis. **A.**, Strumous. See **A. fungosa**. **A.**, Subdiarthrodial, a form of fungous arthritis in which fleshy granulations occur between the bone and the cartilage of the joint. **A. syphilitica**, gonorrheal rheumatism, also the nocturnal pains of syphilis. **A. typica**, acute arthritis. **A.**, Urethral, gonorrheal rheumatism. **A. urica**, gout attributed to excessive formation of uric acid. Syn., **Arthritis uratica**; **Panarthritus urica**, **Uarthritia**. **A. vertebralis**, a breakdown of the intervertebral discs. **A.**, Visceral, gout affecting an internal organ, with alternating attacks in the joints.

Arthritism (ar'-thrit-izm) [arthron]. Gout or the gouty diathesis.

Arthro- [ar-thro-] [arthron]. A prefix denoting relating to the joints.

Arthrobacterium (ar-thro-bak-ter-um) [ar-thro-; bacterium]. A bacterium forming arthrospheres. See under **Bacteria**.

Arthrocarcinoma (ar-thro-kar-sin-oh'-mah) [ar-thro-; carcinoma]. Carcinoma affecting a joint.

Arthrocenchriasis (ar-thro-sen-kri'-as-is) [ar-thro-; cenchrus, like a grain of millet]. A milium eruption occurring about a joint.

Arthroclasia (ar-thro-kla'-se-ah) [arthro-; klasis, to break]. The breaking down of ankyloses in order to produce free movement of a joint.

Arthrodesia (ar-throd'-es-is) [arthro-; desis, a binding]. Fixation of paralyzed joints.

Arthrodia (ar-thro'-de-ah) [arthrodia, a kind

of articulation]. A form of joint admitting of a gliding movement.

Arthrodynia (ar-thro-din'-e-ah). See **Aethralgia**.

Arthrography (ar-throg'-ro-je) [arthro-; grapho, to write]. The description of the joints.

Arthrogryposis (ar-thro-grip-oh'-sis) [arthro-; grypos, curved]. 1. Persistent contracture of a joint. 2. Tetany or tetanilla.

Arthrolith (ar'-thro-lith) [arthro-; lithos, a stone]. One of the free bodies which occur in joints, arising from the segmentation of warty outgrowths of joint cartilage or of synovial membrane. Syn., **Arthrophyte**, **Arthromphyle**; **Joint-bodies**; **Joint-mice**. *Mures articulares*, *Corpora mobilia articularum*, *Corpora libera articularum*; *Tophus arthriticus*, *Arthrotophus*.

Arthrolithiasis (ar-thro-lith-i'-as-is) [see **Arthrolith**]. Gout.

Arthromeningitis (ar-thro-men-in-jit'-is) [arthro-; meninges, membrane; itis, inflammation]. Synovitis.

Arthron (ar'-thron) [arthron, a joint]. A joint or an articulation.

Arthron neuralgia (ar-thron-nu-ral'-je-ah) [arthro-; neuron, nerve; algos, pain]. Neuralgic pain in a joint.

Arthropathy (ar-throp'-a-the) [arthro-; pathos, disease]. 1. Any joint disease. 2. A general trophic disease of the joints, sometimes occurring in locomotor ataxia and syringomyelia, rarely in general paralysis of the insane and in disseminated sclerosis. Syn., **Charcot's joint**. **A.**, Vertebral, arthropathy with depressions and rugosities of the vertebrae.

Arthroplysis (ar-throp'-lis-is) [arthro-; plasis, an eruption]. Gout accompanied with a cutaneous eruption. **A. cardiaca**. See **Milium arthriticum**. **A. vulgaris**. See **Eczema arthriticum**.

Arthroplyma (ar-thro-pl'-mah) [arthro-; plima, a swelling]. Swelling of a joint.

Arthroplasty (ar'-thro-plas-te) [arthro-; plasis, to form]. The making of an artificial joint.

Arthropodous (ar-throp'-o-dus) [arthro-; podos, a foot]. In biology, having jointed legs.

Arthropyosis (ar-thro-pi-oh'-sis) [arthro-; pyosis, suppuration]. Pus-formation in a joint.

Arthrorrhagia (ar-thro-ro'-je-ah) [arthro-; pyrosis, to burst forth]. Hemorrhage into a joint.

Arthrosis (ar-thro'-ze-ah) [arthron]. Painful inflammatory or other affection of a joint.

Arthrosis (ar-thro'-sis) [arthron, to fasten by a joint]. Articulation or jointing.

Arthrosphere (ar'-thro-spher) [arthro-; sphera, a seed]. A permanent form assumed by some bacteria, chiefly the cocci. It is analogous to a spore.

Arthroteitis (ar-thro-ste'-tis) [arthro-; teitis, bone, etc., inflammation]. Inflammation of the bone about a joint.

Arthrostenosis (ar-thro-sten-oh'-sis) [arthro-; stenosis, a narrowing]. Contraction of a joint.

Arthrosteophyma (ar-thro-sto-o-fl'-mah) [arthro-, bone; phyma, tumor]. A tumor of the bone in a joint.

Arthrotomy (ar-thro-tō-me) [arthro-; to cut, to cut]. Incision of a joint.

Arthrotropia (ar-thro-tro'-pe-ah) [arthro-; to turn, a turning]. Torsion of a limb.

Arthrotypoid (ar-thro-ti'-foid). Typhoid fever with articular involvement.

Arthroxerosis (ar-thro-zer-o'-sis) [arthro-; to dry, a dry state]. Chronic osteoarthritis.

Artiad (ar'-te-ah) [apros, even]. In chemistry, a term designating atoms having an even valence, as oxygen, which is bivalent.

Articular (ar-tik'-u-lar) [articulus, of the joints]. Pertaining to an articulation or joint.

Articulate (ar-tik'-u-lāt) [articulare, to divide in joints]. Divided into joints; distinct. **A. Speech**, the communication of ideas by spoken words.

Articulation (ar-tik'-u-lā'-shun) [articulus, a joint]. 1. A joint; a connection between two or more bones, whether or not allowing movement between them. The articulations are divided into (1) *Synarthroses*, immovable, subdivided into *schindyleses*, or grooved joints, *gomphoses*, in sockets, as the teeth; and *suturas*, as in the bones of the skull; (2) *Diarthroses*, or movable joints, subdivided into the *arthrodia*, or gliding joints, the *ginglymus*, or hinge like; the *enarthroses*, or ball-and-socket joints; (3) *amphiarthroses*, or those of a mixed type. 2. The enunciation of spoken speech. 3. The articulating contact of the cusps in the positions of mastication. **A., False**, one formed between the end of a dislocated bone and the contiguous parts or between the parts of a broken bone. Syn., *Pseudarthrosis*. **A., Supplementary**, a false articulation in which the ends of the fragments become rounded and covered with a fibrous capsule.

Articulo mortis, In (ar tik'-u-lo mor'-tis) [L.]. At the moment of death. In the act of dying.

Articulus (ar-tik'-u-lus) [dim. of artus, a joint; pl. and gen., *articuli*]. 1. A joint; a knuckle. 2. A segment; a part, a limb. 3. A moment of time.

Artifact (ar'-te-fakt) See *Artefact*.

Artificial (ar-te-fish' al) [artificialis]. Made or imitated by art. **A. Anus**, an opening in the abdomen or loin to give exit to the feces.

A. Eye, a film of glass, celluloid, rubber, etc., made in imitation of the front part of the globe of the eye, and worn in the socket or over a blind eye for cosmetic reasons. **A. Feeding**, the feeding of an infant by other means than mother's milk. Various mixtures and foods are to be had, such as Meigs', Rotch's, Biedert's Mixtures, etc. See Table on p. 106. **A. Leech**. See *Leech, Artificial*. **A. Palate**. See *Palate, Artificial*. **A. Pupil**, the result of removal of a piece of the iris (*iridectomy*,

iridodialysis, etc.) to allow the light to pass through the opening. **A. Respiration**, the aeration of the blood by artificial means—

a method of inducing the normal function of respiration, as in asphyxia neonatorum, drowning, etc. **Bain's Method**: A modification of Sylvester's method, the structures surrounding the axilla being seized so that traction is made directly upon the pectoral muscles. **Byrd's (H. L.) Method**: The physician's hands are placed under the middle portion of the child's back, with their ulnar borders in contact and at right angles to the spine. With the thumbs extended, the two extremities of the trunk are carried forward by gentle but firm pressure, so that they form an angle of 45 degrees with each other in the diaphragmatic region. Then the angle is reversed by carrying backward the shoulders and the nates. **Calliano's Method**: A modification of Sylvester's: the arms are drawn up so as to expand the thorax, and then fixed above and behind the head by fastening the wrists together, pressing with the hands upon the thorax some 18 to 20 times a minute to induce respiration. **Dew's Method**: The infant is grasped in the left hand, allowing the neck to rest between the thumb and forefinger, the head falling far over backward. The upper portion of the back and the scapulas rest in the palm of the hand, the other three fingers being inserted in the babe's left axilla, raising the arm upward and outward. The right hand grasps the knees, and the lower portion of the body is depressed to favor inspiration. The movement is reversed to favor expiration, the head, shoulders, and chest being brought forward and the thighs pressed upon the abdomen. **Forest's Method**: The child is placed on its face, and quick, firm pressure is made on the back, then it is placed in a pail of hot water, and the hands carried upward until the child is suspended by its arms, and mouth-to-mouth insufflation is practised; the arms are then lowered and the body doubled forward; these movements are repeated at the rate of 40 a minute. **Hall's Method**: By turning the body alternately upon the side or face to compress the chest, and then upon the back to allow the lungs to expand. **Howard's Method**: By pressure upon the lower ribs every few seconds. **Laborde's Method**: By rhythmic tractions of the tongue. **Pacini's Method** (for resuscitating asphyxiated infants): The child lying on its back, the operator stands at its head and grasps the axillary structures, pulling the shoulders forward and upward to compress the thorax, and allowing them to fall in order to expand the chest. **Rosenthal's Method**: Compression of the knees, hips, and spine in rapid succession in order to induce expiration; inspiration is favored by stretching the body. **Satterthwaite's Method**: Pressure upon the abdomen alternating with relaxation to allow

descent of the diaphragm. *Schroeder's Method*: The babe while in a bath is supported by the operator on the back, its head, arms, and pelvis being allowed to fall backward, a forceful expiration is then effected by bending up the body over the belly, thereby compressing the thorax. *Schultze's Method*: The child is seized from behind with both hands, by the shoulders, in such a way that the right index-finger of the operator is in the right axilla of the child from behind forward, and the left index-finger in the left axilla, the thumbs hanging loosely over the clavicles. The other three fingers hang diagonally downward along the back of the thorax. The operator stands with his feet apart and holds the child as above, practically hanging on the index-fingers in the first position, with the feet downward, the whole weight resting on the index fingers in the axillae, the head being supported by the ulnar borders of the hands. At once the operator swings the child gently forward and upward. When the operator's hands are somewhat above the horizontal, the child is moved gently, so that the lower end of the body falls forward toward its head. The body is not flung over, but moved gently until the lower end rests on the chest. In this position the chest and upper end of the abdomen are compressed tightly. The child's thorax rests on the tips of the thumbs of the operator. As a result of this forcible expiration the fluids usually pour out of the nose and mouth of the infant. The child is allowed to rest in this position one or two seconds. The operator gradually lowers his arms, the child's body bends back, and he again holds the infant hanging on his index-fingers with its feet downward. These movements are repeated 15 to 20 times in the minute. *Sylvester's Method* consists chiefly of movements of the arms. This method is valueless in asphyxia neonatorum, owing to nondevelopment of the pectoral muscles.

ARTIFICIAL FEEDING OF INFANTS.

TABLE OF QUANTITY REQUIRED

AGE	INTERVAL	NUMBER OF FEEDINGS IN 24 HOURS	AMOUNT OF FOOD AT EACH FEEDING.	TOTAL AMOUNT IN 24 HOURS
1st week	2 hours	12	1-2 oz.	12-24
2d to 4th week	3 "	8	1-2 1/2 "	13 1/2 "
5th to 1st month	4 "	6	3 "	18 "
2d to 3d month	5 "	5	4 "	20 "
4th to 5th month	6 "	4	4 1/4 "	24-27 "
6th month	7 "	3	5 "	30 "
8th month	8 "	3	6 "	36 "
10th month	9 "	3	8 "	40 "

Artistomia (ar-te-sto'-me-ah) [*Apr*, exactly; *stoma*, a mouth]. 1. Distinctness in utterance.

2. The condition of an aperture, especially in surgical incisions, in which the size is perfectly adapted to the purpose.

Artiyls (ar'-te-ile) [*Apr*us, complete]. Löwig's name for hydrocarbons of the general formula C_nH_m .

Artocarpus (ar-to-kar'-pus) [*Apr*us, broad; *karpos*, a fruit]. A genus of trees of the order *Urticaceae*, including the breadfruit tree. *A. incasa*. *A. blumei* is an East Indian species with an edible fruit, the oil of which is used in diarrhea; an ointment from the buds and leaves is applied to buboes. *A. integrifolia*, native in India, is prized for its wood, the root is used in diarrhea and as an external application in leprosy; the root bark is used as a vermifuge.

Aryepiglottic (ar-e-pi-s-glut-ik). Same as *Arytenoepiglottic*.

Arytenoepiglottic (ar-it-en-o-pi-s-glut-ik) [*Ar*temis, a pitcher, *epi*glottis, likeness, *glut*, upon; *glutis*, glottis]. Relating to an arytenoid cartilage and to the epiglottis, as the *arytenoepiglottic fold* (or folds), consisting of a fold of mucous membrane that extends from each arytenoid cartilage to the epiglottis.

Arytenoid (ar-it-en-oid) [*Ar*temis, a pitcher, *oid*, likeness]. 1. Resembling the mouth of a pitcher. 2. Pertaining to the arytenoid cartilages. **A. Cartilages**, two cartilages of the larynx regulating, by means of the attached muscles, the tension of the vocal bands. **A. Glands**, muciparous glands, found in large numbers along the posterior margin of the arytenoepiglottic fold in front of the arytenoid cartilages. **A. Muscle**, a muscle arising from the posterior surface of one arytenoid cartilage and inserted into the corresponding parts of the other. It is composed of three planes of fibers, two oblique and one transverse. It draws the arytenoid cartilages together.

Arytenoidectomy (ar-e-ten-oid-e-k'to-me) [*ary*-tenoid; *ectomy*, a cutting-out]. Removal of an arytenoid cartilage.

Arytenoiditis (ar-e-ten-oid-i-tis). Inflammation of the arytenoid cartilage or muscles.

Arythmia (ar-ith'-me-ah). See *Arrhythmia*.

Arythmic (ar-ith'-mik). See *Arrhythmic*.

Asab [Ar]. An African venereal disease said to differ from syphilis.

Asafetida, **Asafoetida** (as-a-foe'-id-ah) [*asa*, gum; *foetida*, stinking]. A gum-resin obtained from the root of *Ferula foetida*. It is slightly soluble in alcohol and forms an emulsion with water. Its properties are due to a light volatile oil. It is antispasmodic, stimulating, expectorant, and is used in hysteria and in bronchial affections. Dose 5-20 gr. (0.32-1.3 Gm.). **A.**, Emulsion of asafetida. U. S. P., a 3% emulsion of asafetida. Dose 4-7 oz. (115-60 Cc.). Syn., *Milk of asafetida*. **A.**, Pills of *prunella asafetida*, U. S. P., composed of asafetida, soap, and water. Dose 1-3. **A.**, Tincture of *tinctura asafetida*, U. S. P., strength, 20%. Dose 10-30 min. (0.6-2.0 Cc.).

Dewees' carminative (*mistura magnesia et carminativa*) is an unoffical preparation composed of magnesium carbonate, 5; tincture of asafetida, 7; tincture of opium, 1; sugar, 10; distilled water, sufficient to make 100 parts. Dose (dr. $\frac{1}{2}$ oz. (1-15 Cc.).

Asaphia (as-af'-i-ah) [*asaphia*, indistinctness]. Indistinctness of utterance, especially that due to a stiff palate.

Asaprol (as'-ap-rol) [*Asaprol*, $\text{C}_{10}\text{H}_{16}\text{S}_2\text{O}_6 + 3\text{H}_2\text{O}$]. A sodium betanaphthol-sulfonate, a substance readily soluble in water and alcohol, and recommended in asthma, tonsillitis, and acute articular rheumatism, in doses of from 10 to 30 gr. (1-4 Gm.).

Asarol (as'-ar-ol) [*asarum*; *oleum*, oil], $\text{C}_{10}\text{H}_{16}\text{O}$. A camphor-like body derived from asarum.

Asarum (as'-ar-um) [*Asarum*, asarabacca]. A genus of aristolochiaceae plants. *A. canadense*, called wild ginger, Canada snakeroot, with other North American species, is used chiefly in domestic practice. It is a fragrant, aromatic stimulant. Dose of *fluidextract* 15 min. $\frac{1}{2}$ dr. (1-2 Cc.). *A. europaeum* has diaphoretic, emetic, purgative, and diuretic qualities, but is now little used except in domestic practice.

Asbestiform (as-bes't-e-form) [*asbestos*]. Fibrous in texture.

Asbestos (as-bes't-ox) [*asbestos*, unquenchable]. A soft fibrous mineral made up of flexible or brittle filaments, and the best nonconductor of heat known. Mixed with plaster it is used in mechanic dentistry as a substitute for sand to form the investment preparatory to soldering. It has also a limited use in surgery.

Asbolic, Asbolicous, Asbolicus (as-bol'-ik, -us) [*asbolic*, soot]. Sooty, due to soot, e. g., *Asbolicus scroti asbolicus*.

Asbolin (as'-bol-in) [see *Asbolic*]. A bitter, sweet, yellow oil extracted from soot, it is used in tuberculosis.

Ascariasis (as-kar'-i-as-is) [*ascaris*]. The ascariasis produced by the presence of ascarides in the gastrointestinal canal.

Ascaricide (as-kar'-i-sid) [*ascaris*; *cadere*, to fall]. A medicine that kills ascarides.

Ascaris (as-kar-is) [*Ascaris*, a species of intestinal worm, pl., *ascarides*]. A genus of parasitic worms inhabiting the intestine of most animals. *A. alata*, a variety that has been found in man. *A. lumbricoides*, a variety found in the ox, hog, and man. It inhabits the small intestine, especially of children. *A. mystax*, the roundworm of the cat, found in man. *A. vermicularis*. Synonym of *Oxyuris vermicularis*.

Ascending (as-ens'-ing) [*ascendere*, to rise]. Having an upward course, rising (as parts of the aorta and colon, and as one of the nerve centers). *A. Current*, in electricity, one running from the periphery to a nerve center. *A. Degeneration*, a degeneration of the nerve fibers extending from the periphery to the center, or, in the spinal cord, from the periphery toward the brain. *A. Paralysis*. See *Paralysis, Ascending*. *A. Tracts*,

the centripetal tracts of the spinal cord, carrying afferent impulses.

Ascherson's Vesicles. The peculiar small globules formed when oil and an albuminous fluid are agitated together; formerly thought to be cells.

Ascia (ah'-se-ah or as'-ke-ah) [*â*, priv.; *skia*, shadow]. A spiral bandage applied without reverses, each turn of which overlaps the preceding for about one-third of its width. *Dolabra repens* is the same as the preceding, but the spirals are formed more obliquely and do not overlap each other, but are separated by a greater or less interval. Syn., *Dolabra currens*; *Fascia spiralis*.

Ascites (as-i'-tez) [*askites*, a kind of dropsy; from *askos*, a bag]. An abnormal collection of serous fluid in the peritoneal cavity; dropsy of the peritoneum. It is either local in origin or part of a general dropsy. The ascitic fluid is usually clear, yellow, and coagulates on standing. It may be turbid, blood-stained, and contain lymph particles or shreds. There are uniform enlargement of the abdomen, fluctuation, percussion-dullness. Its usual cause is cirrhosis of the liver. Syn., *Abdominal dropsy*, *Hydroperitoneum*; *Hydrops peritonei*. See *Duparcque's Method for Detecting Ascites*. *A.*, *Active*, *A.*, *Acute*, that in which there is a sudden large effusion due to exposure or cold. *A. adiposus*, ascites characterized by a fluid, milky appearance, due to the presence in it of numerous cells that have undergone fatty degeneration and solution. It is seen in certain cases of carcinoma, tuberculosis, and other chronic inflammations of the peritoneum. Syn., *Ascites oleosus*. *A. chylosus*, the presence of chyle in the peritoneal cavity. It follows rupture of a chyle duct. *A. intercus*, an effusion occurring between the skin and the peritoneum. *A. intermuscularis*, edema of the abdominal muscles. *A.*, *Mechanic*, *A.*, *Passive*, that due to diseases which retard the blood-current in the portal vein. *A. saccatus*. 1. A form in which the effusion is prevented by adhesions or inflammatory exudate from entering the general peritoneal cavity. Syn., *Encysted dropsy of the peritoneum*. 2. An ovarian cystoma. *A. vaginalis*, a collection of liquid within the sheath of the rectus abdominis muscle. *A. vulgarior*, a form apparently due to diseased kidneys, and preceded by scanty, highly colored urine.

Ascitic (as-il'-ik) [see *Ascites*]. Pertaining to or affected with ascites.

Asclepiadin (as-kle-pi'-ad-in) [*Asclepias*]. A bitter glucosid obtainable from various species of *Asclepias*. It is poisonous, and has emetic, purgative, and sudorific properties. Unof.

Asclepias (as-kle'-pe-as) [*Asclepias*]. 1. Pleurisy-root. The root of *Asclepias tuberosa*. A popular remedy in the Southern States for pleurisy. It is diaphoretic, emetic, and cathartic. The infusion recommended has a strength of 1 oz. of the powdered root to

Aseptolin (ah-sep'-toe'-lin). A preparation of picrotoxin (0.8%) in an aqueous solution of phenol (2.71%). It is used in tuberculosis and in malaria. Dose: 50 to 70 min (3-4 Cc) daily, 3 or 4 subcutaneously.

Aspergillin (as per pil' in) *loosecolorin*. A pigment obtained by *Lincolster* from the

spores of *Aspergillus niger*. Syn., Vegetable scutellum.

Aspergillosis (as-per-jil-oh'sis). Pseudotuberculosis, morbid lesions due to some species of *Aspergillus*.

Aspergillus (as-per-jil'-us) [aspergere, to sprinkle]. A genus of fungi. **A. auricularis**, a fungus found in the wax of the ear. **A. fumigatus**, found in the ear, nose, and lungs. **A. glaucus**, the bluish mold found upon dried fruit. **A.-keratitis**, corneal inflammation due to invasion by a fungus belonging to the genus *Aspergillus*. Syn., *Keratomycosis aspergillina*. **A. mucoroides**, a species found in tuberculous or gangrenous lung tissue. **A.-mycosis**. See *Otomycosis*.

Aspermatic (ah-sper-mat'-ik) [ἀ, priv.; σπέρμα, seed]. Affected with or relating to aspermatism.

Aspermatism (ah-sper'-mat-izm) [see *Aspermatic*]. Defective secretion of semen or lack of formation of spermatozoa.

Aspermous (ah-sper'-mus) [see *Aspermatic*]. Without seed.

Asperous (as'-per-us) [asper, rough]. Uneven; having a surface with distinct minute elevations.

Aspersio (as-per'-shun) [aspergere, to sprinkle]. Treatment of disease by sprinkling the body or the affected part with a medicinal agent.

Aspersus (as-per'-us) [see *Aspersio*]. Covered with scattered dots or punctures.

Asphalgnesia (as-fal-ah'-ze-ah) [ἀλγία, their own; πόνος, pain]. Pitres' term for a condition observed in hypnotism, in which intense pain follows the touching of certain articles, and prolonged contact produces convulsions.

Asphyctic, Asphyctous (as-fik'-ik, -us) [ἀσφύκτις]. 1. Affected with asphyxia. 2. Pulseless.

Asphyxia (as-fiks'-e-ah) [ἀ, priv.; σπύξις, the pulse]. Suffocation; the suspension of vital phenomena resulting when the lungs are deprived of oxygen. The excess of carbon dioxide in the blood at first stimulates, then paralyzes, the respiratory center of the medulla. Artificial respiration is therefore required in cases of asphyxia. **A. cataphora**, that with brief incomplete remissions. **A. Lethargic**, deep sleep accompanying mental and physical torpor. **A., Local**, that stage of Raynaud's disease in which the affected parts are dusky red from intense congestion. **A. neonatorum**, the asphyxia of the newborn from any cause. **A. sideratorum**, loss of consciousness from lightning-stroke. **A., Solar, A. solaris**, sunstroke. **A., Syncopal**, a form of asphyxia in which the heart cavities are found vacant. **A. valsalviana**, syncope due to disturbance of cardiac functions.

Asphyxiant (as-fiks'-e-ant) [see *Asphyctic*]. 1. Producing asphyxia. 2. An agent capable of producing asphyxia.

Asphyxiate (as-fiks'-e-sh) [see *Asphyctic*]. To produce or cause asphyxia.

Aspidopsoriasis (as-pid-oh'-m-ri'-as-is) [ἀσπίς, a little shield; psoriasis]. A form

of psoriasis marked by the formation of scutiform scales.

Aspidium (as-pid'-e-um) [L.; gen., *aspidii*].

1. A genus of ferns known as shield-ferns. 2. The rhizome of *Aspidium filix-mas* and of *A. marginale*, or male fern. Its properties are due to a resin containing filicic acid. It is valuable chiefly against tape-worm. Dose ½ dr.-½ oz. (2-15 Cc.). **A., Liquid Extract of** (*extractum filicis liquidum*, B. P.). Dose 15 min.-1 dr. (1-4 Cc.). **A., Oleoresin of** (*oleoresina aspidii*, U. S. P.), an ethereal extract. Dose ½-1 dr. (2-4 Cc.).

Aspidosamin (as-pid-oh'-am-in), $C_{22}H_{28}N_2O_2$. A basic principle from quebracho bark. It is emetic. Unof.

Aspidosperma (as-pid-oh'-sper'-mah) [ἀσπίς, a shield; σπέρμα, a seed]. A genus of apocynaceous trees, of which the quebracho is the most important.

Aspidospermin (as-pid-oh'-sper'-min) [see *Aspidosperma*], $C_{22}H_{28}N_2O_2$. An alkaloid extracted from quebracho (*Aspidosperma quebracho*). It is a respiratory stimulant and antispasmodic. Dose 1-2 gr. (0.065-0.13 Gm.).

Aspiration (as-pir-ah'-shun) [ad, to; spirare, to breathe]. 1. The act of sucking up or sucking in; inspiration; imbibition. 2. The act of using the aspirator. 3. A method of withdrawing the fluids and gases from a cavity. **A. Pneumonia**. See *Pneumonia, Aspiration*.

Aspirator (as'-pir-ah'-tor) [see *Aspiration*]. An apparatus for withdrawing liquids from cavities by means of suction.

Aspirin (as'-pir-in). The acetic-acid ester of salicylic acid; small needles without color or taste, used as an antipyretic and analgesic, as is sodium salicylate. Dose 15 gr. (1 Gm.). Syn., *Acetyl salicylic acid*.

Asporogenic (ah-spor-oh'-jen'-ik) [ἀ, priv.; σπόρος, seed; γένεσις, producing]. Not reproducing by means of spores; not producing spores.

Assault (as-awl') [assalire, to assail]. An attack. **A., Criminal**, in medical jurisprudence, the touching or attempting to touch, on the part of a male, any of the sexual organs (the breasts included) of a female against her will, even though they be covered by clothing.

Assideration (as-id-er-ah'-shun) [ad, intensive; sideratio, an evil influence]. In forensic medicine, infanticide by immersing in ice-cold water.

Assimilable (as-im-il-ah'-bl) [assimulare, to make like]. Capable of being assimilated; nutritious.

Assimilation (as-im-il-ah'-shun) [see *Assimilable*]. The process of transforming food into so nutrient a condition that it is taken up by the circulatory system, to form an integral part of the economy; synthetic or constructive metabolism; anabolism. **A., Mental**, the mental reception of impressions and their assignment by the consciousness to their proper place. **A., Primary**, that con-

cerned in the conversion of food into chyle and blood. **A., Secondary**, that relating to the formation of the organized tissues of the body.

Associated (*as-ô-se-a-ted*) [*associatus*, united].

Joined. **A. Movements**, coincident or consensual movements of muscles other than the leading one, and which, by habit or unity of purpose, are involuntarily connected with its action: both eyeballs move alike in reading, though one be a blind eye. Movement of the normal arm will sometimes produce slight motion of the opposite paralyzed arm. Uniformity of innervation is usually the cause of these movements. **A. Paralysis, A. Spasm**, a common paralysis or spasm of associated muscles.

Assuetude (*as'-ue-tud*) Habituation to disturbing influences; the condition of the organism in which it has acquired such tolerance for a drug or poison that the effect it once had is lost.

Assurin (*as'-urin*), $C_{20}H_{30}N_7P_2O_8$. A name given by Thudichum to a complex substance occurring in brain tissue.

Astasia (*ah-sta'-se-ah*) [*â*, priv.; *στᾶν*, standing]. Motor incoordination for standing. **A.-abasia**, a symptom consisting in inability to stand or walk in a normal manner. The person affected seems to collapse when attempting to walk.

Asteatosis (*as-te-at-ô-sis*) [*â*, priv.; *στέαρ*, tallow, *ωλέω*, fulness]. 1. A deficiency or absence of the sebaceous secretion. 2. Any skin disease (as xeroderma) characterized by scantiness or lack of the sebaceous secretion. **A. cutis**, a condition of diminished sebaceous secretion, as the result of which the skin becomes dry, scaly, and often fissured.

Aster (*as'-ter*) [*L.*, "a star"]. The stellate form assumed by the mitose of the nucleus when undergoing karyokinesis.

Astereognosis (*ah-stere-og-nô-sis*) [*â*, priv.; *στέρεω*, solid, *γινώσκω*, knowledge]. Inability to recognize objects by the sense of touch, due to lesion in the central parietal lobule. Syn., Stereognosis. Cf., *Aphasia, Tactile*.

Asterion (*as-te'-re-on*) [*aster*]. A point on the skull corresponding to the junction of the occipital, parietal, and temporal bones.

Asternal (*ah-ster'-nal*) [*â*, priv.; *στέρας*, the breast-bone]. Not connected with the sternum. **A. Ribs**, the five lower pairs, because not joined directly to the sternum.

Asternia (*ah-ster'-ne-ah*) [see *Asternal*]. Absence of the sternum.

Asteroid (*as'-ter-oid*) [*aster*; *ειδής*, likeness]. 1. Stellate. 2. See *Astrocyte*.

Asthenia (*ah-sten-e'-ah* or *ah-sthe'-ne-ah*) [*â*, priv.; *αἰσθε*, strength]. Absence of strength, adenamia. Syn., *Lipopsychia*.

Asthenic (*ah-sthen'-ik*) [see *Asthenia*]. Characterized by asthenia.

Asthenogenia, Asthenogenesis (*ah-sthen-o-je'-ne-ah*, *ah-sthen-ô-jen'-ô-sis*) [*asthenia*; *γεννάω*, to produce]. The production of asthenia.

Asthenometer (*ah-sthen-om'-et-er*) [*asthenia*;

μέτρον, a measure]. An instrument for detecting and measuring asthenia, especially a device for measuring muscular asthenopia.

Asthenopia (*ah-sten-ô-pe-ah*) [*asthenia*; *ὄψ*, eye]. Weakness of the ocular muscles or of visual power, due to errors of refraction, heterophoria, overuse, asthenia, etc. **A., Accommodative**, that due to hyperopia, astigmatism, or a combination of the two, producing strain of the ciliary muscle. **A., Muscular**, that due to weakness, incoordination (heterophoria) or spasm of the external ocular muscles. **A., Nervous, A., Retinal**, a rare variety, caused by retinal hyperesthesia, anesthesia, or other abnormality, or by general nervous affection.

Asthenopic (*ah-sthen-ôp'-ik*) [see *Asthenopia*]. Characterized by asthenopia.

Asthma (*as'-mah*) [*ἀσθμα*, panting]. A paroxysmal affection of the bronchial tubes characterized by dyspnea, cough, and a feeling of constriction and suffocation. The disease is probably a neurosis, and is due to hyperemia and swelling of the bronchial mucous membrane, with a peculiar secretion of a mucus-like substance. The attacks may be caused by direct irritation of the bronchial mucous membrane or by indirect or reflex irritation, as from the nose, the stomach, the uterus. When dependent upon disease of the heart, the kidneys, stomach, thyroid, etc., it has been designated *cardiac, renal, pericardiac, etc.* **A., Arthritic**, 1. That due to gout. 2. Angina pectoris. **A., Bronchial**. Same as *Asthma*. **A., Cardiac**, paroxysmal dyspnea due to heart disease. **A., Cheyne-Stokes'**, dyspnea due to pulmonary congestion in an advanced stage of chronic myocarditis. **A. convulsivum**. Synonym of *Asthma*. **A. Crystals**, acicular crystals (Charcot-Leyden crystals) contained in the sputum of asthmatic patients. They are generally associated with eosinophil cells. **A. cultrarium**. See *Filiform Processes*. **A. dyspepticum**, asthma due to nervous reflexes through the vagus. **A., Fuller's, A. fullorum**, a pulmonary affection due to inhaling particles of wool and dust in the manufacture of cloth. **A., Grinders'**. See *Filiform Processes*. **A., Hay-**. See *Hay-fever*. **A., Heberden's**, angina pectoris. **A., Intrinsic**, that due to direct irritation of the lungs. **A., Kopp's**, spasm of the glottis. **A., Marine**. See *Beriberi*. **A., Miller's**. See *Laryngismus stridulus*. **A., Miner's**. See *Asthenosis*. **A. nervosum**. Synonym of *Asthma*. **A., Organic**, asthma of organic origin. **A.-paper**, interpaper. **A., Paralytic Bronchial**, a rare form attributed to a relaxed condition of the bronchioles. **A., Pneumobulbar**. See *term* for a form attributed to pulmonary irritation transmitted to the bronchioles by reflexes through the vagus. **A. purulentum**, that due to an abscess in the respiratory passages. **A., Renal**, a paroxysmal dyspnea sometimes

occurring in the course of Bright's disease. **A., Spasmodic.** See *Asthma*. **A., Thymic.** Synonym of *Laryngismus stridulus*. **A., Wichmann's.** Same as *A., Kopp's*. **A., Willis' Convulsive,** asthma with sudden onset, attributed to an affection of the intercostal nerves.

Asthmatic (az-mat'-ik) [see *Asthma*]. Relating to or affected with asthma.

Asthmatorthopnea, Asthmorthopnea (az-mat-orthop'-ne-ah, az-morthop'-ne-ah) [asthma; orthopnea]. Orthopnea due to asthma or respiratory obstruction located in the chest.

Astigmatic (ah-stig'-mat'-ik) [astigmatism]. Pertaining to or affected with astigmatism.

Astigmatism (ah-stig'-mat-izm) [*d.* priv.; *astigma*, a point, because rays of light from a point are not brought to a point by the refractive media of the eye]. That condition of the eye in which rays of light from a point do not converge to a point on the retina. It is usually due to inequality of curvature of the different meridians of the cornea (*corneal astigmatism*), but may be caused by imperfections of the lens (*lenticular astigmatism*), unequal contraction of the ciliary muscle, or may perhaps be due to retinal imperfection. It may be *acquired* or *congenital*, and may complicate hyperopia or myopia, producing either *simple hyperopic astigmatism*, in which one principal meridian is emmetropic, the other

DIAGRAM ILLUSTRATING THE FORMATION OF ASTIGMATIC IMAGES.

The figures below give the images corresponding to the positions of the perpendicular lines above. The vertical lines are brought to a focus anterior to the horizontal. V = vertical rays, H = horizontal.

hyperopic, or *compound hyperopic astigmatism*, in which both meridians are hyperopic, but one more so than the other. Complicating myopia we may in the same way have *simple myopic* or *compound myopic astigmatism*. In *mixed astigmatism* one principal meridian is myopic, the other hyperopic. *Regular astigmatism* is when the two principal meridians are at right angles to each other; *irregular astigmatism* when different parts of a meridian have different refracting powers.

Astigmatometer (ah-stig-mat-om'-et-er) [astigmatism; *metron*, a measure]. An instrument for measuring the degree of astigmatism.

Astigmia (ah-stig'-me-ah). See *Astigmatism*. **Astigmometer** (ah-stig-mom'-et-er). See *Astigmatometer*.

Astigmatometry (ah-stig-mom'-et-re). The measurement of astigmatism.

Astomia (ah-sto'-me-ah) [*d.* priv.; *stoma*, a mouth]. The condition of having no mouth.

Astragalectomy (as-trag-al-ek'-to-me) [astragalus; *ektomē*, excision]. Excision of the astragalus.

Astragalocalcaneal (as-trag-al-o-kal-ka'-ne-al). Relating to the astragalus and calcaneum.

Astragaloscaphoid (as-trag-al-o-ska'-oid). Relating to the astragalus and the scaphoid bone.

Astragalotibial (as-trag-al-o-tib'-e-al). Relating to the astragalus and the tibia.

Astragalus (as-trag'-al-us) [ἀστράγαλος, a die; the analogous bones of the sheep were used by the ancients as dice]. 1. The ankle-bone, upon which the tibia rests. 2. A genus of leguminous plants from some varieties of which gum tragacanth is derived. 3. *A. mollissimus* is the loco-plant. The active principle of this plant has mydriatic properties. Unof.

Astraphobia, Astraphobia (as-trah-fu'-be-ah, as-trap-a-fu'-be-ah) [ἀστραπή, lightning; φόβος, fear]. Morbid fear of lightning.

Astro- (as-tro-) [ἀστρον, a star]. A prefix meaning star or star-shaped.

Astroblast (as'-tro-blast) [astro-; βλαστός, a germ]. A variety of glia-cell less differentiated than the endymal cell and astrocytes.

Astrocyte (as'-tro-sit) [astro-; κύτος, cell]. 1. One of the cells derived from the endyma of the embryonic cerebrospinal canal that, in the course of development, wander toward the periphery, undergo modification, and form one of the two chief divisions of glia-cells, the other divisions being the original endymal cells. Syn., *Deiters' cells*. 2. A stellate bone corpuscle.

Astrokinetic (as'-tro-kin-et'-ik) [astro-; κινῆν, to move]. Applied to the phenomena of motion as exhibited by the centrosomes of cells.

Astrosphere (as'-tro-sfēr) [astro-; σφαῖρα, sphere]. 1. The radially arranged protoplasmic filaments surrounding the centrosome in a dividing cell. 2. The central mass of the aster, exclusive of the filaments or rays, in which the centrosome lies. 3. The entire aster exclusive of the centrosome. See *Centrosphere* and *Sphere of Attraction*.

Astrostatic (as'-tro-stat'-ik) [astro-; ἰσθάναι, to stand]. Applied to the resting condition of the centrosomes of cells.

Asturian (as-tu'-re-an). Relating to Asturia, an old province of Spain. **A. Rose.** 1. Pellagra. Syn., *Rosa asturica*, *Rosa asturiensis*. 2. Leprosy.

Astysia (ah-stis'-e-ah) [*d.* priv.; *stasiv*, to make erect]. Incomplete power to erect the penis.

Asylum (as-i'-lum) [L., "a place of refuge"]. An institution for the support, safe-keeping, cure, or education of those incapa-

ble of caring for themselves, such as the insane, the blind, etc. **A. Ear.** See *Hematoma auris* under *Hematoma*.

Asymbolia (ah-sim-bol'-le-ah) [*d*, priv.; *sym-bolov*, symbol]. The loss of all power of communication, even by signs or symbols.

Asymmetry (ah-sim'-et-ee) [*d*, priv.; *sym-metria*, symmetry]. 1. Unlikeness of corresponding organs or parts of opposite sides of the body that are normally of the same size, etc., e. g., *asymmetry* of the two halves of the skull or brain. 2. The linking of carbon atoms to four different groups, the combination of carbon atoms with different atoms or atomic groups. **A., Meridional.** See under *Asigmatism*. **A., Unilateral.** See *Hemihypertrophy*.

Asynechia (ah-si-ne'-ke-ah) [*d*, priv.; *syn-tycho*, to hold together]. Absence of continuity in structure.

Asynergy (ah-sin'-er-ee) [*d*, priv.; *synergy*, cooperation]. Faulty coordination of the different organs or muscles normally acting in unison. **A., Progressive Locomotor, A., Motorial.** See *Ataxia*, *Locomotor*. **A., Verbal,** defective coordination of speech, as in aphasia. **A., Vocal,** faulty coordination of the muscles of the larynx due to chorea.

Asynesia (ah-sin'-ee-ah) [*d*, priv.; *synesia*, stupidity]. Stupidity, loss of disorder of mental power.

Asynodia (ah-sin'-o-de-ah) [*d*, priv.; *synodia*, a traveling together]. Impotence.

Asystole (ah-sist'-ole) [*d*, priv.; *synstole*, a shortening]. Imperfect contraction of the ventricles of the heart. **A., Cardiataxic,** transitory asystole due to accelerated heart-action. **A., Cardioplegic.** See *Arteriosclerosis*.

Asystolic (ah-sist'-ole) [see *Asystole*]. Characterized by asystole.

Atactic (at-ak'-tik) [*d*, priv.; *synstole*, irregular]. Irregular, incoordinate. Pertaining to muscular incoordination, especially in ataxia.

Atactilia (ah-tak'-te'-le-ah). Inability to recognize tactile impressions.

Atavic (at'-av-ik) [*atavus*, a forefather]. Relating to or characterized by atavism.

Atavism (at'-av-izm) [see *Atavic*]. The reappearance of a peculiarity in an individual whose more or less remote progenitors possessed the same peculiarity but whose immediate ancestors did not present it.

Atavistic (at'-av-ik) [see *Atavism*]. Same as *Atavic*.

Ataraphasia (at-ah'-fa'-ee-ah). Inability to arrange words synthetically into sentences.

Ataxia (at-ak'-ee-ah) [*d*, priv.; *synstole*, want of order]. Incoordination of muscular action. **A., Bulbar,** taken due to a lesion in the pons or oblongata. **A., Cerebellar, A., Cerebral, A., Spinal,** that due to disease of the cerebellum of the brain or of the spinal cord. **A., Briquet's,** a hysterical state marked by loss of sensation in the skin and in the leg muscles. **A. cordis.** See *Delirium cordis*. **A., Diphtheric,** a sequel of diphtheria preceding diphtheric paralysis, and in which the chief phenomena of locomotor ataxia are present. **A., Family, A., Friedreich's,**

A., Hereditary. See *Friedreich's Disease*.

A., Hereditary Cerebellar (of Mance), a form of ataxia that resembles Friedreich's disease in being hereditary, occurring in families, the gait, however, is not the staggering gait of tabes, but the reeling gait of cerebellar disease, the knee-jerk is increased instead of being diminished, and there are no deformities. **A., Leyden's, pseudotabes.** **A., Locomotor,**

a disease of the posterior columns of the spinal cord, characterized by static and motor ataxia, by fulgurant pains, girdle-sensation, Argyll Robertson pupil, disturbances of sensation and of the sphincters, and loss of the patellar reflex. Syn., *Posterior spinal sclerosis, Tabes dorsalis.* **A., Moral,** the inconstancy of ideas and will, attended with convulsions and pain, observed in hysterical subjects. **A., Motor,** inability to coordinate the muscles in walking. **A., Paralytic, of the Heart,** a condition marked by dyspnea, weakness of cardiac sounds, palpitation, edema, and dropsy, without any organic heart disease. **A., Sensory,** a form regarded as due to disturbance of the nerve tracts lying between the periphery and the centers of coordination, its existence is denied by some authorities. **A., Spinal.** See *A., Cerebellar*.

A., Static, the failure of muscular coordination in standing still, or in fixed positions of the limbs. **A., Thermal,** peculiar large and irregular fluctuations of the body-temperature, due to a condition of incoordination or a disordered or weakened thermotaxic mechanism. This may give rise to the so-called *paradoxical* or *hysterical temperatures*, rising occasionally to 108° or 110° F., without grave or permanent injury. **A., Vasomotor.** See *Vasomotor Ataxia*.

Ataxic (at-ak'-ik) [see *Ataxia*]. 1. Pertaining to or affected with ataxia. 2. A person affected with ataxia. **A. Aphasia.** See under *Aphasia*. **A. Fever.** See *Typhus*.

Ataxodysmama (at-ak'-o-din'-am-ee). Adenoma combined with ataxia.

Ataxodysmama (at-ak'-o-din'-am-ee) [*ataxia*, disorder, power]. Abnormality in the movements of a part or organ.

Ataxophemia (at-ak'-o-f'e-me-ah) [*ataxia*, disorder, speech]. Lack of coordination in speech.

Ataxospasmodic (at-ak'-o-spat-mod'-ik). Affected with chorea ataxia or relating to it.

Ataxy (at-ak'-ee). See *Ataxia*.

Atelectasis (at-ek'-ta-sis) [*d*, priv.; *telektasis*, imperfect expansion]. Imperfect expansion or collapse of the air-vesicles of the lung. It may be present at birth, or may be acquired from diseases of the bronchi or lungs. **A., Absorption,** acquired atelectasis in which the air has been removed by absorption from within, resulting from the plugging of the bronchial tubes.

Atelectatic (at-ek'-ta-tik) [see *Atelectasis*].

Relating to or characterized by atelectasis.

Ateleiosis (at-ee'-ee-sis) [*d*, priv.; *teleiosis*, not arriving at perfection]. A disease first described by Schaeffhausen, of Bonn (1865), charac-

terized by abrupt onset, the absence of any perceptible cause, conspicuous infantilism with retention of unimpaired intelligence, and marked tardiness in development of the sexual system. Cf. *Progeria*.

Atelia (*at-e'-le-ah*) [*ἀτέλεια*, imperfection]. Imperfect development. The word is compounded with others to designate the part affected, as *atelocardia*, etc., imperfect development of the heart, etc.

Atelo- (*at-el-o-*). A prefix signifying imperfect development.

Atelocardia (*at-el-o-kar'-de-ah*) [*atelo-*; *καρδίη*, heart]. An imperfect or undeveloped state of the heart.

Atelocephalous (*at-el-o-sef'-ul-us*) [*atelo-*; *κεφαλή*, head]. Having the skull or head more or less incomplete.

Atelocheilia (*at-el-o-ki'-le-ah*) [*atelo-*; *χείλη*, lip]. Defective development of a lip.

Atelocheiria (*at-el-o-ki'-re-ah*) [*atelo-*; *χείρ*, hand]. Defective development of the hand.

Atelencephalia (*at-el-o-en-sef'-ul-us*) [*atelo-*; *ἐγκέφαλος*, brain]. Incomplete development of the brain.

Ateloglossia (*at-el-o-glos'-e-ah*) [*atelo-*; *γλῶσσα*, tongue]. Congenital defect in the tongue.

Atelognathia (*at-el-o-gnath'-e-ah*) [*atelo-*; *γνάθος*, jaw]. Imperfect development of a jaw, especially of the lower jaw.

Atelomyelia (*at-el-o-mi'-e-le-ah*) [*atelo-*; *μυελός*, marrow]. Congenital defect of the spinal cord.

Atelopodia (*at-el-o-po'-de-ah*) [*atelo-*; *πούς*, foot]. Defective development of the foot.

Ateloprosopia (*at-el-o-pro-so'-pe-ah*) [*atelo-*; *πρόσωπον*, face]. Incomplete facial development.

Atelorachidia (*at-el-o-rak-id'-e-ah*) [*atelo-*; *ράχη*, spine]. Imperfect development of the spinal column, as in *spina bifida*.

Atelostomia (*at-el-o-sto'-me-ah*) [*atelo-*; *στόμα*, mouth]. Incomplete development of the mouth.

Athermanous (*ah-ther'-man-us*). Impervious to radiant heat.

Athermic, Athermous (*ah-ther'-mik, -mus*). 1. Without fever. 2. See *Athermanous*.

Athermosystaltic (*ah-ther-mu-sist-al'-tik*) [*ἀ-*, priv.; *θερμός*, heat; *συστατικός*, drawing together]. Applied to muscles which do not contract under the influence of heat.

Atheroma (*ath-er-o'-mah*) [*ἀθήρη*, gravel; *ἄμα*, tumor]. 1. A sebaceous cyst containing a cheesy material. Syn., *Acne sebacea molluscum*. Sebaceous cyst; *Steatoma*. 2. The fatty degeneration of the walls of the arteries in arteriosclerosis; by common usage the word is also applied to the whole process of arteriosclerosis. Arterial atheroma is also termed *atherosis*. **A.**, **Capillary**, the formation of fatty granules in the walls of the capillaries.

Atheromasia (*ath-er-o-ma'-ze-ah*) [see *Atheroma*]. Atheromatous degeneration; the condition of atheroma.

Atheromatous (*ath-er-o'-mat-us*) [see *Atheroma*]. Characterized by or affected with atheroma. **A.** **Abscess**. See *Abscess*, *Atheromatous*. **A.** **Ulcer**, an ulcer formed by the abscess breaking through the intima.

Atheros (*ath-er-o'-sis*) [*ἀθήρη*, gravel]. A synonym of *Atheroma* (2).

Athetoid (*ath'-et-oid*) [*athetosis*]. Pertaining to or affected with athetosis. **A.** **Spasm**, a spasm in which the affected member performs athetoid movements.

Athetosis (*ath'-et-oid'-sis*) [*ἄθετος*, unfixed; changeable]. A condition most frequently occurring in children, and characterized by continual slow change of position of the fingers and toes. It is usually due to a lesion of the brain. It is also called "posthemiplegic chorea," from its occurrence after hemiplegia. **A.**, **Double Congenital**. See *Paraplegia*, *Infantile Spasmodic*.

Athlete's Heart (*áthlēt', to contend with*). A slight incompetency of the aortic valves, a condition sometimes found in athletes.

Athrepsia (*ah-threps'-e-ah*) [*ἀ-*, priv.; *τρέφειν*, to nourish]. Malnutrition.

Athymia (*ah-thi'-me-ah*) [*ἀ-*, priv.; *θυμός*, spirit]. 1. Despondency. 2. Loss of consciousness. 3. Insanity.

Athyrea, Athyria (*ah-thi'-re-ah*) [*ἀ-*, priv.; *θυρεός*, thyroid]. The condition arising from absence of the thyroid gland or suppression of its function. Syn., *Myxedema*. Cf. *Thyreoprivus*.

Athyreosis (*ah-thi-re-o'-sis*). Atrophy or absence of the thyroid gland and the pathologic condition consequent upon elimination of its function.

Athyroidea (*ah-thi-roid'-e-ah*). Absence of the thyroid gland.

Athyroidemia (*ah-thi-roid'-e'-me-ah*). Davel's name for myxedema.

Atlantoaxial (*at-lant-o-aks'-e-al*). See *Atlantoaxoid*.

Atlas (*at'-las*) [*ἄτλας*, able]. The first of the cervical vertebrae. It articulates with the occipital bone of the skull and with the axis.

Atloaxoid (*at-lo-aks'-oid*). Relating to the bones termed the atlas and the axis.

Atiodymus (*at-iod'-im-us*) [*ἄτλας*, able; *διδύμος*, double]. A monstrosity with two heads on one neck and a single body.

Atmiatry (*at-mi'-at-re*) [*ἀτμός*, vapor; *ιατρική*, medical treatment]. Treatment of diseases of the lungs or mucous membranes by inhalation, fumigation, or by directing a current of vapor or gas upon the part.

Atmic (*at'-mik*) [*ἀτμός*, vapor]. Relating to, due to, or consisting of vapor.

Atmidalbumin (*at-mid-al'-bu-min*). A substance standing between the albuminates and the albumoses, obtained by Neumeister at the same time with atmidalbumose.

Atmidalbumose (*at-mid-al'-bu-mose*). Neumeister's name for a body obtained by the action of superheated steam on fibrin.

Atmiometer (*at-mi-om'-et-er*). A closed cab-

inet with apparatus for treating diseases by means of atmiatry.

Atmo- (at-mo-) [ἀτμός, vapor; breath]. A prefix meaning vapor or breath.

Atmocausia, Atmocausis (at-mo-kaw'-se-oh, -sis) [atmo-; καύω, a burning]. Therapeutic cauterization with steam by means of an atmocautery.

Atmocautery (at-mo-kaw'-ser-e). A double-channelled intrauterine catheter provided with fenestras in both tubes.

Atmograph (at'-mo-graf) [atmo-; γράφω, to record]. A form of self-registering respirometer.

Atmokaussis (at-mo-kaw'-sis). See *Atmocausis*.

Atmolysis (at-mol'-is-is) [atmo-; λύω, loosing]. A method of separating the ingredients of mixed gases or vapors by means of their different diffusibility through a porous substance.

Atmometer, Atmidometer (at-mom'-et-er, at-mid-om'-et-er) [atmo-, μέτρον, a measure]. An instrument for measuring the amount of water exhaled by evaporation from a given surface in a given time, in order to determine the humidity of the atmosphere.

Atmosphere (at'-mos-fer) [atmo-; αἶσα, a sphere]. 1. The mixture of gases surrounding the earth to the height of about 200 miles. 2. The pressure exerted by the atmosphere at the level of the sea, it is about 15 pounds to the square inch, or 1 kilogram to the square centimeter. 3. In chemistry, any special gaseous medium enclosing a body. 4. The climatic state of a locality.

Atmospheric (at'-mos-fer-ik) [see *Atmosphere*]. Pertaining to the atmosphere. **A. Moisture**, the vapor of water mingled with the atmosphere. It varies in quantity according to the temperature. **A. Tension**, the pressure of the air per square inch on the surface of a body. Normally, at the sea level, it is about 15 pounds per square inch, or equal to that of a column of mercury about 30 inches in height. It decreases about $\frac{1}{10}$ inch or $\frac{1}{10}$ pound per square inch for every 90 feet of altitude. Above 10,000 feet the rarity of the atmosphere is usually noticeable in quickened breathing and pulse-rate.

Atmospherization (at'-mos-fer-iz-a'-shun). The conversion of venous into arterial blood by the absorption of oxygen. Cf. *Dearterialization*.

Atmotherapy (at-mo-ther'-ap-e) [atmo-; θεραπεία, therapy]. A name given by Pitres to the treatment of certain fits by methodic reduction of respiration.

Atocia (at'-o-se-ah) [ἄτοκος, barren]. Sterility of the female.

Atom (at'-om) [ἀ, priv.; τέμνω, to cut]. The ultimate unit of an element; that part of a substance incapable of further division, or the smallest part capable of entering into the formation of a chemie compound, or uniting with another to form a molecule - which last is the smallest quantity of a substance that can exist free or uncombined.

Atomic (at'-om-ik) [see *Atom*]. Pertaining to

atoms. **A. Heat**, the specific heat of an atom of a chemie element as compared with that of an atom of hydrogen. **A. Theory**, the theory of Dalton that all matter is composed of atoms, the weight of each atom differing for the different elements. **A. Valence**, the saturating power of the atom of an element as compared with an atom of hydrogen. Syn., *Equivalence*. **A. Weight**, the weight of an atom of an element as compared with the weight of an atom of hydrogen. **Atomicity** (at'-om-is'-it-e) [see *Atom*]. Chemie valence, quantivalence.

Atomization (at'-om-iz-a'-shun) [see *Atom*]. The mechanic process of breaking up a liquid into fine spray.

Atomizer (at'-om-iz-er) [see *Atom*]. An instrument for transforming a liquid into a spray.

Atonic (at'-on'-ik) [atony]. Relating to or characterized by atony.

Atony (at'-o-ne) [ἀτονία, want of tone]. Want of power, especially of muscular power.

Atoxogen (ah-tok'-o-zen) [ἀ, priv.; γένω, to produce]. A defensive substance resembling the enzymes and chemically allied to toxins and antitoxins prepared from the adrenals and spleen of the horse.

Atrabiliary (at-rah-bil'-e-are) [atra, black; bilis, bile]. Pertaining to black bile. **A. Capsules**, an old name for the suprarenal capsules.

Atrabilin (at-rah-bil'-in). A preparation of suprarenal capsule. It is used in eye diseases.

Atrachelia (ah-trak'-el-e-ah) [ἀ, priv.; τραχέω, the neck]. Absence or exceeding shortness of the neck.

Atrachelocephalus (ah-trak'-el-o-sep'-al-us) [ἀ-, πύγγω, without a neck; κεφαλή, the head]. 1. Affected with atrachelia. 2. A monster with no neck or an abnormally short one.

Atractenchyma (ah-trakt-en'-ti-ma) [ἀτρακτός, a spindle; τέμνω, to pour in]. A tissue consisting of spindle-cells.

Attractoid (ah-trakt'-oid). Spindle-shaped.

Atremia (ah-tre'-me-ah) [ἀ, priv.; τρέμω, to tremble]. 1. An absence of tremor. 2. Inability to walk, stand, or sit without general discomfort and paresthesia of the head and back, all movements being readily executed in the recumbent posture. Syn., *Nephe's disease*.

Atresia (ah-tre'-se-ah) [ἀ, priv.; ῥήσις, perforation]. Imperforation of a normal opening or canal, as of the anus, vagina, meatus auditorius, pupil, etc.

Atresic (ah-tre'-sik) [see *Atresia*]. Characterized by atresia.

Atreto- (ah-tre-to-) [ἀτρετός, imperforate]. A prefix meaning imperforate.

Atretocephalus (ah-tret-o-sep'-al-us) [atreto-; κεφαλή, the head]. A monster with imperforate nostrils or mouth.

Atretogastria (ah-tret-o-gas'-tre-ah) [atreto-; γαστήρ, stomach]. Imperforation of the cardiac or pyloric orifice of the stomach.

Atretolemia (ah-tret-o-le'-me-ah) [atreto-, αἷμα, blood].

the gullet] Imperforation of the esophagus or pharynx.

Atretorrhinia (ah-tret-or-rin'-e-ah) [atreto-; *rhis*, the nose] Nasal atresia.

Atretostomia (ah-tret-o-sto'-me-ah) [atreto-; *stoma*, the mouth]. Imperforation of the mouth.

Atreturethria (ah-tret-u-re'-thre-ah) [atreto-; *urethra*, the urethra]. Imperforation of the urethra.

Atrichia (ah-trik'-e-ah) [*trich*, priv.; *trich*, hair]. Absence of the hair.

Atrichosis (ah-trik'-o-sis) [see *Atrichia*]. A condition characterized by absence of hair.

Atrioventricular (a-tre-o-ven-trik'-u-lar) [atrium, hall, ventriculus, ventricle]. Relating both to the atrium (or auricle) and to the ventricle of the heart.

Atrium (a'-tre-um) [L., "the forecourt or hall"] 1. That part of the auricle of the heart into which the venous blood is poured. 2. The part of the tympanic cavity of the ear below the head of the malleus. **A., Infection-**, the point of entrance of the bacteria in an infectious disease.

Atrolactyl (at-ro-lak'-til) $C_6H_5O_2$. The radicle of atrobatic acid. **A.-tropein**. See *Aconitin*, British.

Atropa (at'-ro-pah) [*Atropa*, "she who turns not", undeviating; one of the three Fates who cut the thread of life—in allusion to the poisonous effects of the plant]. A genus of the natural order *Solanaceae*. *A. belladonna* is the deadly nightshade, from which *atropin* is obtained. See *Belladonna*.

Atrophia (at-ro'-fe-ah) See *Atrophy*.

Atrophic (at-ro'-fik) [atroph]. Pertaining to or affected with atrophy.

Atrophoderma (at-ro'-fo-der'-mah). See *Atrophodermis* of the Skin. **A. pigmentosum**. See *Xeroderma pigmentosum*.

Atrophodermatosis (at-ro'-fo-der-mat'-d-sis) [atrophos, *atro*, the skin]. A class of skin diseases, including atrophoderma, ulodermis, and scleroderma, characterized by atrophy of the cutis.

Atrophy, Atrophia (at'-ro-fe, at-ro'-fe-ah) [atrophos, atrophy]. 1. Diminution in the size of a tissue, organ, or part, the result of degeneration of the cells or a decrease in the size of the cells. 2. To become atrophied. **A., Accidental**, that of a part from compression or cutting off its blood-supply. **A., Acute Yellow**. See *Interus gravis*. **A., Angibromic**, decrease in the size of the lumen of the alimentary canal. **A., Brown**, a form of atrophy in which the normal pigment of the organ is retained, and in which there is also frequently the addition of new pigment. It occurs most frequently in the heart, muscles, and liver, and is caused by chronic congestion. Syn., *Pigmented atrophy*. **Atrophia cachochymica**, that due to indigestible food. **A., Cardiac**, atrophy of the heart following senile changes, or occurring in cachectic conditions, or as a result of pressure exerted by mediastinal tumors, etc. Syn., *Atrophia*

cordis. **A., Chronic Spinal Muscular**. See *A., Progressive Muscular*. **A., Concentric**, that proceeding from without inward and tending to lessen the capacity of a hollow organ. **A., Correlated**, an atrophy of certain portions of the body following the removal or destruction of other portions. Thus, amputation of an arm will be followed by an atrophy of the scapula; of a leg, by atrophy of the corresponding os innominatum. **A., Cyanotic** (of the liver), atrophy of the parenchyma of the hepatic lobules due to stasis in the venous circulation, causing dilation and congestion of the central veins and adjacent capillaries. **A., Degenerative**, that due to degeneration of the cells. **A., Eccentric**, that proceeding from within toward the periphery. **A., Granular**, a form observed in the liver and kidneys, causing diminution in size and attended with excess in formation of connective tissue, with copious supply of granular matter. **A., Granuloproteic**, that due to replacement of proper cell-structure with fine granular masses. **A., Gray**, a degenerative change in the optic disc in which the latter assumes a grayish color. **A., Halisteretic**, atrophy of bone manifested only by gradual thinning of the lamellas of the spongy tissue. **A., Idiopathic Muscular**, muscular wasting, beginning in various groups of muscles, usually progressive in character, and dependent on primary changes in the muscles themselves. There is a strong hereditary predisposition to the disease. **A., Inanition**, emaciation from diarrhea. Syn., *Atrophia inanitionum*. **A., Individual**, Charcot's name for atrophy of individual muscles in different parts, the proximate muscles not being affected. **A., Infantile**, tabes mesenterica (q.v.). Syn., *Atrophia infantum*; *Atrophia mesenterica*. **A., Muscular**, atrophy affecting muscles; it may be hereditary or acquired, idiopathic, myelopathic, myopathic, neuropathic, primary, secondary, simple, or progressive. **A. of the Nails**, onychatrophia. Syn., *Atrophia unguis*. **A., Necrobiotic**, **A., Numeric**, atrophy of a part with destruction of some of its elements. **Atrophia nervea**, atrophy of the nerves. **Atrophia nervosa**, gradual emaciation, with loss of appetite, due to unwholesome and depressing environment. **A., Pigmentary**, **A., Pigmented**, a form of atrophy so called from a deposit of pigment (yellow or yellowish-brown) in the atrophied cells. **Atrophia pilorum propria**, atrophy of the hair, either symptomatic or idiopathic in origin. **A., Progressive Facial**, a condition characterized by progressive wasting of the skin of the face. Syn., *Atrophia nova facialis*. **A., Progressive Muscular**, a chronic disease characterized by progressive wasting of individual muscles or physiologic groups of muscles, and by an associated and proportional amount of paralysis. It is due to a degeneration and atrophy of the multipolar cells in the anterior gray horns of the cord, with consec-

utive degeneration of the anterior nerve-roots and muscles. The right hand is usually the part first attacked, and takes on a peculiar claw-like form (*main-en griffe*). The disease is most frequent in males of adult life, and follows excessive muscular exertion. Syn., *Chronic anterior poliomyelitis*; *Wasting palsy*. **A., Progressive Nervous**, Jaccoud's name for atrophy of the spinal nerve-roots due to pressure from a deposit of fibrous substance on the spinal arachnoid. **A., Progressive Unilateral Facial**, a disease characterized by progressive wasting of the skin, connective tissue, fat, bone, and more rarely the muscles of one side of the face. It is most common in females, its course is slow and generally progressive. **A., Qualitative**, degeneration. **A., Quantitative**. See *A., Simple*. **A., Red**, a form of atrophy due to chronic congestion, as seen in the liver in mitral and tricuspid valvular lesions. **A., Sclerotic**, a name for connective tissue found at times deposited in the heart substance after myocarditis. **A., Senile**, the physiologic atrophy of advanced life. It affects the lungs, the sexual and other organs. **A., Senile, of the Skin**, an atrophy of the skin usually associated with general signs of senile degeneration. Syn., *Atrophia cutis senilis*; *Senile atrophoderma*. **A., Serous**, atrophy associated with an infiltration of fluid into the atrophic tissues. **A., Simple**, that due to a decrease in the size of individual cells. **A., Simple Brown**, a condition of the heart in which the muscle-fibers retain their striated appearance, but the muscle-cells are small and contain yellow granules of pigment. **A. of the Skin**, atrophy characterized by diminution or disappearance of certain of the elements of the skin, especially seen in advanced age. The skin becomes thin, loose, wrinkled, and discolored. Syn., *Atrophia cutis*; *Atrophoderma*. **A., Sympathetic**, atrophy of the second member of a pair of organs following that of the first. **A., Trophoneurotic**, that dependent upon abnormality of the nervous supply of an organ or tissue, best illustrated in muscular atrophy from disease of the anterior horns of the spinal cord. **Atrophia verminosa**, emaciation due to intestinal worms. **A., White**, nerve atrophy, leaving only white connective tissue.

Atropin, Atropina (*at-ro-pin*, *at-ro-pi'-nah*) [*at-ro-pin*, one of the Eates who cut the thread of life], $C_{17}H_{23}NO$. The *atropine* of the U. S. P. is a crystalline alkaloid derived from *Atropa belladonna*. It is a mydriatic, antispasmodic, and anodyne; in small doses a cardiac, respiratory, and spinal stimulant; in large doses a paralyzant of the cardiac and respiratory centers, the spinal cord, motor nerves, and involuntary and voluntary muscles. It lessens all the secretions except the urine. In full doses it produces dryness of the throat, flushing of the face, dilation of the pupils, a rise of temperature, and sometimes an erythematous rash. It is extensively used in ophthalmic

practice to dilate the pupil, to paralyze accommodation, and also in various corneal, iris, and other ocular diseases. Its therapeutic use in general medicine is also manifold, e. g., in inflammatory affections and the pain of cerebral and spinal hyperemia, atonic constipation, cardiac failure, hypersecretions, especially of the sweat, to relieve local spasm, as in intestinal and biliary colic, in asthma, whooping cough, etc., and as a physiologic antagonist in opium poisoning. **A. Borate**, $(C_{17}H_{23}NO)_2 \cdot H_2O_2$, is used in ophthalmic practice. **A. Hydrobromate**, $C_{17}H_{23}NO \cdot HBr$, white crystals, soluble in water and in alcohol. It is used as is atropin. **A. Hydrochlorate**, $C_{17}H_{23}NO \cdot HCl$, white crystals, soluble in water and alcohol, slightly in ether. Used in the same manner as atropin. Dose $\frac{1}{4}$ gr. (0.0006-0.001 Gm.). **A. Hydroiodate**, $(C_{17}H_{23}NO) \cdot HIO_2$, is employed in ophthalmic practice in 0.5 to 1 per cent. solution. **A., Lamellas of *belladonna atropina***, B. P.), each contains $\frac{1}{10}$ gr. (0.0001 Gm.) atropin. **A. Oleate** (*oleatum atropine*, U. S. P.), a 2 per cent. solution of atropin in oleic acid; it is a mydriatic, sedative, and anodyne, and is used as an injection in cases in which tablets cannot be administered by the mouth. **A. Salicylate**, $C_{17}H_{23}NO \cdot C_7H_5O_2$, a colloidal mass, used as is atropin. **A. Santonate**, a compound of atropin and santonin, is recommended as a mydriatic. **A. Santoninate**, $C_{17}H_{23}O_2 \cdot C_{15}H_{17}O_6$, is used in ophthalmic practice. **A. Stearate**, $C_{17}H_{23}NO \cdot C_{18}H_{37}O_2$, fine white needles, greasy to the touch, melting at $120^\circ C.$, beginning to decompose at $170^\circ C.$, and containing 50.41 per cent. of atropin. It is soluble in ether and in alcohol. Applied in 1 to 5 per cent. solution as a substitute for oil of belladonna or oil of hyoscyamus. **A. Sulfate** (*atropine sulphur*, U. S. P.), the most frequently used preparation of atropin, is a white powder, of bitter taste and neutral reaction, and is soluble in water. Dose $\frac{1}{16}$ gr. (0.0002-0.0008 Gm.). **A. Sulfate, Solution of** (*liquor atropinae sulphatis*, B. P.). Dose 1-6 min. (0.005-0.4 Cc.). **A. Tartrate**, $(C_{17}H_{23}NO)_2 \cdot C_4H_4O_6$, is used as is atropin.

Atropinize (*at-ro-pin-ize*) [*atropin*]. To bring under the influence of, or to treat with, atropin.

Atroscin (*at'-ros-in*), $C_{17}H_{23}NO$. An alkaloid isomeric with hyoscin, obtained from *Sanguinaria carnolica*. It has a higher rotatory power than hyoscin, and is from 2 to 3 times stronger in mediætic action. Syn., *Atrocin*.

Attar (*at'-ar*) [*Ar*, *styr*, perfume]. A general name for any of the volatile oils. **A. of Rose**, oil of rose. The volatile oil distilled from the fresh flowers of the Damascus rose. It comes mainly from eastern Rumeia, and is generally adulterated with other volatile oils. It is used as a perfume.

Attendant (*at-en'-dant*) [*attendere*, to attend]. A nonprofessional attaché of an asylum or hospital.

Attenuant (at-en'-u-ant) [attenuare, to make thin]. 1. A medicine or agent increasing the fluidity or thinness of the blood or other secretion. 2. Lessening the effect of an agent.

Attenuating (at-en'-u-a-ting) [see Attenuant]. Making thin.

Attenuation (at-en-u-a'-shun) [see Attenuant].

The act of making thin, a thinning, narrowing, or reduction of the strength or size of a substance, especially the weakening of the pathogenic virulence of microorganisms by successive cultivation, by exposure to light, air, heat, or other agency, or by passing through certain animals, so that they may be used as a vaccine to confer immunity from future attacks of the disease. **A.**, Sanderson's Method of, the passing of virus through the system of another animal (e. g., the guinea-pig, in anthrax) so that it becomes modified in virulence.

Attic (at'-ik) ['Attikos, Attic]. Part of the tympanic cavity situated above the atrium. **A. Disease**, chronic suppurative inflammation of the attic of the tympanum.

Atticoantrotomy (at-ik-a-an-trot'-o-me) [attic; antrum, -trein, to cut]. The opening of the attic and mastoid process.

Atticomastoid (at-ik-a-mas'-toid). Relating to the attic and the mastoid.

Atticotomy (at-ik-ot'-o-me) [attic; -tomein, to cut]. Surgical incision of the attic.

Attitude (at'-e-tud) [aptitudo, aptitude]. See *Posture*. **A.**, Crucifixion, in hysterocpiplosis, a rigid state of the body, the arms stretched out at right angles. **A.**, Frozen, a peculiar stiffness of the gait characteristic of disease of the spinal cord, especially of amyotrophic lateral sclerosis. **A.**, Passionate, the assumption of a dramatic or theatric expression, a position assumed by some hysterical patients.

Attollens (at-ol'-enz) [attollere, to rise up]. Raising. **A. auris**, a muscle raising the external ear.

Attraction (at-rak'-shun) [attrahere, to draw to]. The tendency of one particle of matter to approach another; affinity. As existing between masses, it is termed *gravitation*, while molecular attraction or cohesion expresses the force aggregating molecules. **A.**, Capillary, the force that causes liquids to rise in fine tubes or between two closely approximated surfaces, or on the sides of the containing vessel. **A.**, Chemic, the attraction of affinity, relates to the attraction of atoms of one element to those of others, resulting in chemic compounds. **A.**, Electric, the tendency of bodies toward each other when charged with opposite electricities. **A.**, Magnetic, the influence of a magnet upon certain magnetic substances, chiefly iron.

Attrahens (at'-ra-henz) [L., "drawing"]. Drawing forward, as *attrahens aurem*, a muscle drawing the ear forward and upward.

Attention (at-rish'-un) [attendere, to rub against]. Rubbing or friction.

Atypic, Atypical (ah-tip'-ik, -al) [at, priv.,

τῖπος, a type]. Irregular; not conformable to the type. **A. Fever**, an intermittent fever with irregularity of the paroxysm.

Aubert's Phenomenon. An optic illusion by which, when the head is inclined to one side, a vertical line is made to appear oblique toward the opposite side.

Audiometer (au-de-om'-et-er) [audire, to hear; μέτρον, a measure]. An instrument for measuring the acuteness of hearing.

Audiphone (au'-dij-ŏn) [audire, to hear, φωνή, a sound]. An instrument for improving the power of hearing by conveying sounds through the bones of the head to the labyrinth.

Audition (au-dish'-un) [audire, to hear]. The act of hearing. Syn., *Acousis*; *Acosia*; *Acosia*. **A. colorée**, color-hearing, a peculiar association between the auditory and optic nerves, by which a certain sound or musical note will give rise to a subjective sensation of color, the same note in the same person being always associated with the same color. Syn., *Chromatic audition*. **A. contre**, the perception by one ear of the vibrations of a tuning-fork placed on the mastoid process on the other side.

Auditory (au'-dit-o-re) [see Audition]. Pertaining to the act or the organs of hearing.

A. After-sensations, the sensations of sounds continuing or occurring after the cessation of the stimulus. **A. Amnesia**. See *Mind-deafness*. **A. Area**, the cerebral center for hearing, probably located in the temporo-sphenoid lobe. **A. Aura**, an auditory sensation preceding an attack of epilepsy. **A. Center**. Same as *A. Area*. **A. Eminence**, the prominent part of the floor of the fourth ventricle, lying between the inferior and superior fovea. **A. Hairs**, the processes of the crista acustica. **A. Meatus** (external and internal), the external and internal canals or openings of the ear. **A. Nerve**, the eighth cranial nerve, supplying the internal ear; formerly the *partio mollis* of the seventh pair of cranial nerves. **A. Ossicles**, the chain of small bones of the middle ear. **A. Pit**, the depression in the epiblast on both sides of the embryonic after-brain, destined to form the labyrinth of the ear. **A. Vertigo**, dizziness due to pathologic conditions of the ear. See *Meniere's Disease*.

Auenbrugger's Sign. Bulging of the epigastric region in cases of extensive pericardial effusion.

Auerbach's Ganglions. The ganglionic nodes in Auerbach's plexus. **A.'s Plexus**, plexus myentericus, a nerve plexus found between the circular and longitudinal muscular coats of the stomach and intestine, and consisting of a network of pale nerve-fibers, at the nodal points of which minute ganglions exist.

Aufrecht's Sign. Short and feeble breathing heard just above the jugular fossa on placing the stethoscope over the trachea; it is noted in tracheal stenosis.

Augnathus (au-gni'-thus) [au, besides; γνάθος, the jaw]. A monster with two lower jaws.

Aula (au'-lah) [αὐλή, a hall or open court]. The

common mesal cavity of the cerebrum, it being also the anterior portion of the third ventricle.

Aura (*aw'-rah*) [*āpa*, a breath]. A breath of wind; a soft vapor. The phenomenon preceding an attack of epilepsy. It may be motor, sensory, vasomotor, secretory, or psychic. It is also applied to the symptom preceding an attack of any disease or paroxysm, as the *aura hysterica*, *aura vertiginosa*, etc. **A.**, Epigastric, a localized epileptic aura.

Aurade, Auradin (*aw'-rād, aw'-rad-in*). A fatty body obtained from oil of orange-flowers. It crystallizes in tasteless, pearly, odorless scales, melting at 131° F.; soluble in water, insoluble in alcohol. **Syn.**, *Neroli camphor*.

Aural (*aw'-ral*) [*auris*, the ear]. 1. Relating to the ear or to hearing. 2. [*aura*] Relating to the air or to an aura. **A. Vertigo**. See *Meniere's Disease*.

Auramin (*aw'-ram-in*) [*aurum*, gold; *amin*]. Yellow pyoktanin, a yellow anilin color used to some extent as an antiseptic.

Aurantia (*aw-ran'-she-ah*) [*aurantium*]. 1. An orange coal-tar dye; an ammonium salt of hexanitrodiphenylamin. 2. An orange or oranges.

Aurantia (*aw-ran'-tin*). See *Hepiane*.

Aurantium (*aw-ran'-she-um*) [*L.*; gen., *aurantii*]. Orange. The fruit of *Citrus vulgaris* and *C. aurantium*. Both the flowers and the rind of the fruit are employed in medicine. **Aurantii amari cortex** (U. S. P.), bitter orange-peel. **Aurantii amari, Fluidextractum** (U. S. P.), bitter orange-peel, alcohol, and water. It is used as a flavor. Dose 1-1 dr. (2-4 Cc.).

Aurantii amari, Tinctura (U. S. P.), bitter orange-peel, 20; dilute alcohol, q. s. ad 100. Dose 1-2 dr. (4-8 Cc.). **Aurantii corticis, Oleum** (U. S. P.), the volatile oil expressed from the rind of the orange, it is aromatic and a mild tonic, but is used mainly as a flavor. Dose 1-5 drops. **Aurantii dulcis cortex** (U. S. P.), sweet orange-peel. **Aurantii dulcis, Tinctura** (U. S. P.), sweet orange-peel, 20; dilute alcohol, q. s. ad 100. Dose 1-2 dr. (4-8 Cc.).

Aurantii, Elixir, oil of orange peel, 1; sugar, 100, alcohol and water, q. s. ad 300. **Aurantii florum, Aqua** (U. S. P.), stronger orange-flower water and distilled water, of each, 1 volume. **Aurantii florum fortior, Aqua** (U. S. P.), water saturated with the volatile oil of fresh orange-flowers. **Aurantii florum, Oleum**, oil of neroli, a volatile oil distilled from fresh orange-flowers. Dose 1-5 drops. **Aurantii florum, Syrupus** (U. S. P.), sugar, 85; orange-flower water, sufficient to make 100 parts. A common flavoring agent. **Aurantii, Infusum** (B. P.). Dose 1-2 oz. (30-60 Cc.).

Aurantii, Compositum (B. P.). Dose 1-2 oz. (30-60 Cc.). **Aurantii, Spiritus**, oil of orange peel, 5; deodorized alcohol, 95. Dose according to quantity of alcohol desired. **Aurantii, Spiritus, Compositus** (U. S. P.), oil of orange-peel, 20; oil of lemon, 5; oil of coriander, 2; oil of anise, 5; deodorized alcohol, sufficient to make 100 parts. **Aurantii, Syrupus** (U. S. P.), tincture of sweet orange-peel,

5; citric acid, 0.5; magnesium carbonate, 1; sugar, 85; water sufficient to make 100 parts.

Aurantii, Tinctura (B. P.). Dose 1-2 dr. (4-8 Cc.). **Aurantii, Tinctura, recentis** (B. P.), tincture of fresh orange-peel. Dose 1-2 dr. (4-8 Cc.). **Aurantii, Vinum** (B. P.), contains 12% of alcohol.

Aureola (*aw-re'-o-lah*). See *Aureole* (1).

Aureolin (*aw-re'-o-lin*) [*aurum*, gold]. A yellow pigment obtained by heating paratoluidin with sulfur and treating with fuming sulfuric acid. **Syn.**, *Carnotin*; *Polychromin*; *Primulin* yellow; *Sulfin*; *Thiochromogen*.

Auric (*aw'-rik*) [*aurum*, gold]. Pertaining to aurum or gold. **A. Acid**. See *Acid, Auric*.

Auricle (*aw'-rik-l*) [*auricula*, the ear]. 1. The expanded portion or pinna of the ear. 2. One of the upper chambers of the heart receiving the blood from the lungs (*left auricle*) or from the general circulation (*right auricle*).

3. An ear-shaped appendage. 4. A kind of ear-trumpet. **A.**, **Cervical**, congenital cartilaginous remains of the neck, arising about the middle of the sternomastoid as symmetrical bodies, occurring in man occasionally and almost constantly present in the goat.

Auricoammonic (*aw-rik-o-am-on'-ik*). Containing gold and ammonium.

Auricobarytic (*aw-rik-o-bar-ic'-ik*). Containing gold and barium.

Auricular (*aw-rik'-u-lar*) [see *Auricle*]. 1. Relating to the auricle of the ear. 2. Pertaining to the auricles of the heart, as *auricular* appendix. 3. Relating to the auricular nerve, arteries, veins, etc. **A. Finger**, the little finger. **A. Point**, the central point of the external auricular meatus.

Auricularis (*aw-rik-u-la'-ris*) [see *Auricle*]. 1. Auricular. 2. The extensor minimi digiti. See under *Muscle*. **A. magnus**, a branch of the cervical plexus of nerves.

Auriculocranial (*aw-rik-u-la-kra'-ne-al*). Pertaining to both the auricle and the cranium.

Auriculotemporal (*aw-rik-u-la-tem'-po-ral*) [*auricle*; *tempus*, the temple]. Relating to the auricle and to the temporal region. **A. Nerve**, a branch of the inferior maxillary, supplying superficial parts about the auricle and temple.

Auriculoventricular (*aw-rik-u-la-ven-trik'-u-lar*) [*auricle*; *ventriculus*, the ventricle]. Relating to an auricle and a ventricle of the heart. **A. Opening**, the opening between the auricles and the ventricles of the heart.

Auriginous (*aw-ri'-in-ous*). 1. Having the color of gold. 2. Relating to jaundice.

Aurinaseal (*aw-re-nu'-sal*) [*auris*, *nasus*, nose]. Pertaining to the ear and the nose.

Auripuncture (*aw-re-punk'-char*) [*auris*; *punctura*]. Puncture of the membrana tympani.

Auris (*aw'-ris*) [*L.*]. The ear.

Auriscopes (*aw'-ris-kōp*) [*auris*; *σκοπεῖν*, to examine]. An instrument for examining the ear, and especially the eustachian passage; an otoscope.

Aurist (*aw'-rist*) [*auris*]. A specialist in diseases of the ear.

Aurobromid (*aw-ro-bro'-mid*). Gold and potassium bromid.

Aurum (*aw'-rum*) [L.; gen., *auri*]. Gold. Au = 196.7, quantivalence III. A brilliant yellow metal, having a specific gravity of 19.3. It is soluble in a mixture of nitric and hydrochloric acids. **A. bromidum**, AuBr₃, used in epilepsy and migraine. Dose $\frac{1}{16}$ – $\frac{1}{8}$ gr. (0.003–0.01 Gm.). **A. chloridum**, gold chlorid. Dose $\frac{1}{16}$ – $\frac{1}{8}$ gr. (0.001–0.002 Gm.). Also used as a stain for nerve tissue. **Auri et sodii chloridum** (U.S.P.), the double chlorid of gold and sodium. It is used as an alternative in chronic inflammations, diabetes, in the treatment of the alcohol habit, etc. Dose $\frac{1}{16}$ – $\frac{1}{8}$ gr. (0.002–0.006 Gm.). **A. vegetabile**, saffron.

Auscult, **Auscultate** (*aws-kul't*, *aws'-kul-tat*) [*auscultare*, to listen to]. To perform or practise auscultation; to examine by auscultation.

Auscultation (*aws-kul-ta'-shun*) [see *Auscult*]. A method of investigation of the functions and conditions of the respiratory, circulatory, digestive, and other organs by the sounds they themselves give out or that are elicited by percussion. It is called *immediate*, when the ear is directly applied to the part, and *mediate*, if practised by the aid of the stethoscope. *Obstetric auscultation* is practised in pregnancy to detect or study the fetal heart-sounds or the placental murmur. **A.-tube**, in otology, an instrument for listening to the forced passage of air through the ear of another.

Auscultatory (*aws-kul'-ta-to-re*) [see *Auscult*]. Relating to auscultation. **A. Percussion**, the practice of listening with the stethoscope to the sounds produced by percussing a part.

Austroscope (*aw-tek'-o-skōp*) [*αὔτης*, self; *ἦχος*, sound, *σκοπεῖν*, to inspect]. A device for enabling a person to listen to sounds produced within his own body.

Autecious, **Autécious** (*aw-te'-shus*) [*αὐτός*, self; *οἶκος*, dwelling]. Applied to parasitic fungi that pass through all the stages of their existence in the same host.

Autemesia (*aw-tem-e'-zhe-ah*) [*αὐτός*, self; *ἔμεν*, to vomit]. Vomiting without manifest cause.

Auto- (*aw-to-*) [*αὐτός*, self]. A prefix meaning self, of itself.

Autoaudible (*aw-to-awd'-i-bl*) [*auto-*; *audire*, to hear]. Applied to cardiac sounds audible to the patient.

Autoblast (*aw'-to-blást*) [*auto-*; *βλαστός*, a germ]. An independent bioblast.

Autochthon (*aw-tok'-thon*) [*αὐτόχθων*, sprung from the land]. An aboriginal inhabitant.

Autochthonous (*aw-tok'-thon-us*) [see *Autochthon*]. Aboriginal, formed (as, e. g., a clot) in the place where it is found.

Autocinesis (*aw-to-sin-e'-sis*). See *Autokinesis*.

Autocinet (*aw-to-in-e'-ik*). See *Autokinetic*.

Autoclave (*aw'-to-klāv*) [*auto-*; *clavis*, a key]. 1. Self-fastening; closing itself. 2. An appa-

ratus for sterilizing objects by steam-heat at high pressure.

Autoconduction (*aw-to-kon-duk'-shun*) [*auto-*; *conductio*]. A term used in electrotherapy for a method of using high-frequency currents. The patient or part to be acted upon is placed inside of the solenoid, without any direct connection with any part of the circuit.

Autocystoplasty (*aw-to-sis'-to-plas-te*) [*auto-*; *κύστη*, bladder; *πλασσειν*, to form]. Plastic surgery of the bladder with grafts from the patient's body.

Autocytotoxins (*aw-to-si-to-toks'-ins*) [*auto-*; *κύτταρον*, cell; *τοξικόν*, poison]. Cytotoxins produced in the body of the individual by abnormal retention and absorption of the products of degenerated and dead cells.

Autodidact (*aw'-to-dī-dakt*) [*auto-*; *διδάκτωρ*, taught]. One who is self-taught.

Autodigestion (*aw-to-di-jes'-chun*) [*auto-*; *digere*, to digest]. Digestion of an organ by its own secretion.

Autogenesis (*aw-to-jen-es-is*) [*auto-*; *γένεσις*, production]. Spontaneous generation; self-production.

Autogenetic (*aw-to-jen-et'-ik*) [see *Autogenesis*]. Produced within the organism.

Autogenous (*aw-toj'-en-us*) [see *Autogenesis*]. 1. Pertaining to diseases or conditions self-produced within the body and not derived from external sources; applied to poisons generated in the body by its inherent processes. 2. Having a distinct center of development, as parts of bones. **A. Hemorrhage**, hemorrhage due to causes residing within the body; not traumatic. **A. Vaccine**, one derived from the microorganism infecting the person to be immunized.

Autogony (*aw-log'-o-ne*) [*αὐτογόνος*, self-produced]. The rise of the simplest protoplasmic substance in a formative fluid.

Autographism (*aw-to-graf'-izm*) [*auto-*; *γράφειν*, to write]. Dermographia. See *Urticaria factitia*.

Autohypnotism (*aw-to-hip'-not-izm*) [*auto-*; *ὑπνος*, sleep]. Mental stupor induced by dwelling intensely upon some all-absorbing thought.

Autoimmunization (*aw-to-im-u-ni-za'-shun*) [*auto-*; *immunization*]. Immunization obtained by natural processes at work within the body.

Autoinfection (*aw-to-in-fek'-shun*) [*auto-*; *infection*]. Infection by virus originating within the body or transferred from one part of the body to another.

Autoinfusion (*aw-to-in-fu'-shun*) [*auto-*; *ἐκκένδρειν*, to pour in]. Compulsion of the blood to the heart by bandaging the extremities, compression of the abdominal aorta, etc.

Autoinoculable (*aw-to-in-ok'-u-la-bl*) [*auto-*; *inoculare*, to implant]. Capable of being inoculated upon the person already infected. Chaneroid is autoinoculable.

Autoinoculation (*aw-to-in-ok-u-la'-shun*) [see *Autoinoculable*]. Inoculation in one part of the body by virus present in another part; self-inoculation.

Autointoxication (*aw-to-in-toks-ik-a'-shun*)

[*auto-*; *τοξικόν*, a poison]. Poisoning by faulty metabolic products elaborated within the body. autoinfection. **A., Endogenous**, that due to the action of excessive unneutralized or modified discharges from the cells of any tissue acting upon the other tissues without previous discharge from the body; or that due to the action of products of decomposition and necrosis of any tissue acting in a similar manner; or that due to microendoparasites or macroendoparasites. **A., Exogenous**, that due to the action of poisons entering the system from without, through the skin, the digestion, the respiratory or genitourinary tract, as by the absorption of retained excreta, or of decomposition- and fermentation-products developed in the external secretions through the action of these secretions. **A., Indirect**, that caused by the absorption of retained excrements.

Autoisolysin (*aw-to-isol' is-in*) [*auto*; *ισος*, equal, *λυσω*, a losing]. A serum which dissolves the corpuscles of the individual from which it was obtained and also those of another individual of the same species.

Autokinesis (*aw-to-kin'e-sis*) [*auto*; *κίνησις*, movement]. Voluntary movement.

Autokinetic (*aw-to-kin'e-tik*) [*see Autokinesis*]. Pertaining to, or of the nature of, autokinesis.

Autolysin (*aw-to-li-sin*) [*auto*; *λύνω*, a losing]. A lysin capable of dissolving the red blood-corpuscles of the animal in the serum of which it circulates.

Autolysis (*aw-to-li-sis*) [*see Autolysin*]. 1. Self digestion of inflammatory exudates and necrotic material within the living body. 2. The chemi splitting-up of the tissue of an organ by the action of an enzyme peculiar to it, described by Miescher as occurring in the placenta. 3. The hemolytic action of the blood serum of an animal upon its own corpuscles.

Automatic (*aw-to-mat' ik*) [*αὐτοματικός*, to act spontaneously]. Performed without the influence of the will.

Automatism (*aw-ton' at-izm*) [*see Automatic*]. The performance of acts without apparent volition, as seen in certain somnambulists and in some hysterical and epileptic patients. **A., Epileptic**. *See Automatism*.

Automaton (*aw-ton' at-on*) [*αὐτόματος*, spontaneous]. One who acts in an involuntary or the mimic manner.

Autonomous (*aw-ton' om-us*) [*auto*; *νόμος*, law]. Self ruled, independent.

Autonomy (*aw-ton' o-me*) [*see Autonomous*]. Independence.

Autopepsia (*aw-to-pep'si-a*) [*auto*; *πέψω*, to digest]. Auto-digestion.

Autophagia (*aw-to-fa' i-ah*) [*auto*; *φαγέω*, to eat]. Self consumption, emaciation.

Autophagy (*aw-tof' a-gi*). *See Autophagia*.

Autophobia (*aw-to-fob' le-ah*) [*auto*; *φοβία*, fear]. A morbid dread of one's self or of solitude.

Autophonous (*aw-tof' on-us*) [*auto*; *φωνή*,

voice]. Having the character of autophony.

Autophony (*aw-tof' o-ne*) [*see Autophonous*]. 1. The auscultation of the physician's own voice through the patient's chest. 2. The condition in which one's own voice appears changed. It may be due to chronic inflammation of the ear or to other causes.

Autophthalmoscopy (*aw-tof' thal mos' ko pe*) [*auto*; *ὀφθαλμός*, the eye, *σκοπεω*, to see]. Examination of one's own eye with the ophthalmoscope.

Autoplasty (*aw-to-plas-te*) [*auto*; *πλάσσω*, to form]. A method of repairing the effects of a wound or lesion involving loss of tissue by grafting or implanting fresh parts taken from other portions of the patient's body.

Autopsy (*aw-top' se*) [*auto*; *ὄψις*, a seeing]. The postmortem examination.

Autopsychorhythmia (*aw-to-si-kor-ith' me-ah*) [*auto*; *ψυχή*, mind, *ῥυθμός*, rhythm]. A morbid rhythmic activity of the brain; it is a symptom of grave insanity.

Autoscope (*aw-to-skop*) [*auto*; *σκοπεω*, to see]. An instrument arranged for the examination of one's own organs by one's self.

Autoscopy (*aw-tof' ko-pe*) [*see Autoscope*]. The examination of one's own organs by means of an autoscope.

Autosite (*aw-to-sit*) [*auto*; *σitus*, food]. 1. A monster capable of an independent existence after birth. 2. That member of a double fetal monstrosity that nourishes itself by its own organs and also the other member, which is called the parasite.

Autositic (*aw-to-sit' ik*) [*see Autosite*]. Of the nature of an autosite.

Autosterilization (*aw-to-ster-il-iz' a' shun*) [*auto*; *sterilization*]. Sterilization effected by the normal fluids of the body.

Autostethoscope (*aw-to-steth' o-skop*) [*auto*; *στήθος*, the breast, *σκοπεω*, to examine]. A stethoscope so arranged that by it one may listen to his own chest sounds.

Autosuggestion (*aw-to-sug-jes' chun*) [*auto*; *suggestio*, an intimation]. A peculiar mental condition, often developing after accidents, especially railway accidents, it is intimately associated with the hypnotic state. In both of these conditions the mental spontaneity, the will, or the judgment is more or less suppressed or obscured, and suggestions become easy. Thus the slightest traumatic action directed to any member may become the occasion of a paralysis, of a contracture, or of an arthralgia. Syn., *Traumatic suggestion*.

Autotherapy (*aw-to-ther' a-pe*) [*auto*; *θεραπεία*, treatment]. The spontaneous or self-cure of a disease.

Autotoxemia (*aw-to-tox-e-me-ah*) [*auto*; *τοξικόν*, a poison; *αἷμα*, blood]. Toxicemia from poisons derived from the organism itself.

Autotoxin (*aw-to-tox'in*) [*auto*; *τοξικόν*, a poison]. Any poisonous product of tissue-metamorphosis.

Autotransfusion (*aw-to-trans-fu'-shun*) [*auto-; transfusio*, a pouring-out or forth]. The transfer of the blood to the brain and other central organs by elevating the hips and legs and by the use of elastic bandages compressing the limbs.

Autotypization (*aw-to-ti-fiz-a'-shun*) [*auto-; typhoid*]. The production of a condition resembling typhoid fever from faulty elimination of waste-material.

Autovaccination (*aw-to-vaks-in-a'-shun*) [*auto-; vaccinare*, to vaccinate]. The reinsertion of fresh vaccine lymph upon the same person from whom it is taken.

Autumn Catarrh. Synonym of *Hay-fever*, since it occurs in August and the fall of the year.

Autumnal (*aw-tum'-nal*) [*autumn*]. Pertaining to the fall of the year. **A. Fever**. Synonym of *Typhoid fever*.

Auxanography (*awks-an-og'-ra-fe*) A method devised by Beyerinck for ascertaining the nutrient mediums suitable for a growing microbe. Plate cultures of poor mediums (e. g., 10% gelatin or 2% agar in distilled water) are stippled with drops of solutions the nutrient properties of which are to be tested. The species of microbe under examination will then develop strong colonies only on those spots where the requisite pabulum is present.

Auxanometer (*awks-an-om'-et-er*) [*auxāna*, to grow; *metron*, a measure]. An instrument used in biologic study for measuring the growth of young organisms.

Auxiliary (*awks-il'-e-a-re*) [*auxilium*]. 1. Aiding. 2. An adjuvant. **Auxiliaries of Respiration**, those muscles brought into action in difficult respiration.

Auxilium (*awks-il'-e-um*) [L., "help"]. A wheeled vehicle or ambulance with couch and mattresses, for use in the service of field military hospitals.

Auximeter (*awks-om'-et-er*) [*auxēiv*, to grow; *metron*, a measure]. 1. A device for estimating the magnifying power of lenses. 2. See *Auxanometer*. 3. A dynamometer. Syn., *Auxometer*; *Auxenometer*; *Auxesimeter*; *Aux-vimeter*; *Auzometer*.

Ava-kava (*ah-vah-kah'-vah*). See *Kava-kava*.

Avalanche Theory. Pflüger's theory that nerve-energy gathers intensity as it passes toward the muscles.

Avalvular (*ah-val'-vul-lar*) [*d*, priv.; *valvula*, a valve]. Lacking valves.

Avascular (*ah-vas'-ku-lar*) [*d*, priv.; *vas*, a vessel]. Without blood; not possessing blood-vessels.

Avellis' Symptom-complex. Paralysis of one-half of the soft palate, associated with a concurrent paralysis on the same side.

Avena (*aw-e'-nah*) [L.]. A genus of plants. Oats. **Avenæ farina**, oatmeal. **A. sativa**, the embryo of the seed of the common oat-plant. It contains starch, gluten, a ferment called diastase, and a small amount of alkaline phosphates, and is a nutritious food. Dose of the concentrated tincture or fluidextract 10

min.-2 dr. (0.65-8.0 Cc.). The pericarp contains an alkaloid possessed of slight narcotic powers. Unof.

Avenin (*aw-e'-nin*) [*avena*]. 1. A precipitate made from a tincture of *Avena sativa*, or the oat. It is a nerve-stimulant and tonic. Unof. 2. A nitrogenous principle obtained from the oat, and nearly identical with legumin, the gluten casein of oats.

Avenious, Avenous (*ah-ve'-ne-us, ah-ve'-nus*) [*d*, priv.; *vena*, vein]. Lacking veins or nerves.

Avenolith (*av-en'-o-lith*) [*avena*; *lithos*, stone]. An intestinal calculus formed around a grain of oat.

Aversion (*av-ur'-shun*) [*avertere*, to turn aside]. 1. A turning aside, as in the displacement of an organ or in metastasis. 2. Nausea.

Avogadro's Law. Equal volumes of all gases and vapors, at like temperature and pressure, contain an equal number of molecules.

Avoldrupois Weight (*av-or-du'-pois'*). See *Weights and Measures*.

Avulsio, Avulsion (*av-il'-se-o, -shun*) [*avellere*, to tear away]. A tearing or wrenching away of a part, as a polyp, a limb, etc. **A. bulbi, Avulsion of the Bulb**, separation of the pupil from its attachments in consequence of complete or almost complete rupture of the tendons of the optic muscles and nerves.

Axanthopsia (*ah-zan-thop'-se-ah*) [*d*, priv.; *χρᾶθος*, yellow; *opsis*, vision]. Yellow-blindness.

Axenfeld's Test for Albumin in Urine. Acidulate with formic acid and add, drop by drop, a 0.1% solution of gold chlorid, and warm. If albumin is present, the solution becomes red, then purplish, and on the addition of more gold chlorid, blue. The blue color is also produced by glucose, starch, tyrosin, uric acid, urea, leucin, etc., but the red color is characteristic of albumin.

Axial (*aks'-e-ah*) [*axis*]. Pertaining to or situated in an axis. **A. Current**, the column of red corpuscles which, by reason of the weight of the cells, occupies the center or axis of the blood-stream. **A. Hyperopia**. See *Hyperopia*, *Axial*. **A. Stream**. See *A. Current*.

Axilemma (*aks-il-em'-ah*) [*axis*; *lemma*, husk; skin]. An elastic sheath composed of neurokeratin, inclosing the axis-cylinder of medullated nerve-fibers.

Axilla (*aks-il'-ah*) [L.]. The armpit.

Axillary (*aks-il-a-re*) [*axilla*]. Pertaining to the axilla. **A. Artery**, the continuation of the subclavian artery, extending from the lower border of the first rib to the insertion of the pectoralis major muscle, where it becomes the brachial. See under *Artery*. **A. Glands**, the lymphatic glands in the axilla. **A. Plexus**, the brachial plexus, formed by the last three cervical and the first dorsal nerves. **A. Space**, the irregular conic space of the axilla. **A. Vein**, a continuation of the brachial vein, corresponding with the artery and terminating in the subclavian vein.

Axioplasm (*ak'se-o-plazm*) [*axis*; *axiōn*, a thing molded]. Waldeyer's term for the delicate structure of cellular substance holding together the fine fibrils of the axis-cylinders. *Syn.*, *Neuroplasm*.

Axis (*ak'sis*) [*l.*, "axletree"]. 1. An imaginary line passing through the center of a body.

2. The second cervical vertebra. 3. A short artery which breaks up into several branches, e. g., thyroid axis, celiac axis. See under *Artery*.

A., Basicranial, in craniometry, a line drawn from the basion to the middle of the anterior border of the cerebral surface of the sphenoid bone.

A., Basifacial, in craniometry, a line drawn from the anterior border of the cerebral surface of the sphenoid to the alveolar point.

A., Binauricular, in craniometry, the imaginary line joining the two auricular points.

A., Brain, the isthmus.

A., Cerebrospinal, the central nervous system.

A.-cord. See *Primitive Streak*.

A.-corpuscle. See *Corpuscle*.

A., Craniofacial, in comparative anatomy the bones making the floor of the cranial cavity.

A.-cylinder, the conducting or essential part of a nerve. *Syn.*, *Encylinder of Purkinje*.

A.-cylinder Process, that one of the protoplasmic processes of a nerve-cell which becomes an axis-cylinder.

A., Electric, a line connecting the two poles of an electric body.

A., Frontal (of the eye), an imaginary line running through the eyeball from right to left, and corresponding with the movements of elevation and depression of the eyeball.

A., Hemal, the aorta.

A., Magnetic, a line connecting the two poles of a magnet.

A., Optic. 1. The line from the center of the cornea to the macula lutea.

2. An imaginary line passing from the center of the eye-piece of a microscope through the body, objective, stage, and substance, to the mirror.

A., Pelvic, an imaginary line passing through all the median anteroposterior diameters of the pelvic canal at their centers.

A., Sagittal (of the eye), an imaginary line running through the eyeball from before backward, and coinciding with the line of vision.

A.-traction, traction on the fetus in the axis of the pelvis.

A.-traction Forceps, a forceps for performing axis traction.

A. uteri. 1. The long diameter of the uterus.

2. A line imagined to pass transversely through the uterus near its junction with the cervix, on which it is said to turn in retroversion.

A., Visual, the line from the object through the nodal point to the macula.

Azite (*ak'sit*) [*axis*]. Gowers' name for the terminal filaments of the axis-cylinder.

Axo- (*ak'se*) [*axis*]. A prefix meaning axis.

Axodendrite (*ak'se-den'drit*) [*axis*, *dendron*, a tree]. Lenhosiek's term for a nonmedullated, axopodally conducting side filar of the axons, as distinguished from a cytodendrite or one of the true medullated, cellular axonal collaterals.

Azoid (*ak'soid*) [*axis*, *oid*, likeness]. 1. Shaped like a point.

2. Relating to the second cervical vertebra.

Axon, **Axone** (*ak'son*) [*axis*]. 1. The body-

axis. 2. An unbranched nerve-cell process of the second order. 3. The cerebral spinal axis. 4. Kolmer's term for neurite.

Axonuron (*ak'son-ur-on*) [*axis*, *neurax*, nerve]. A neuron the cell body of which lies in the interior of the brain or the spinal cord. The axonurons are classified as rhombonurons and the endaxonurons.

Axonometer (*ak'son-om-eter*) [*axis*, *metron*, a measure]. 1. An instrument used for locating the axis of astigmatism. 2. An apparatus for determining the axis of a cylinder.

Axungia (*ak-sung'-je-ah*) [*l.*]. Fat, adipose. **Axungia lunæ**, a variety of sodium carbonate. **Axungia vitri**, salt of glass, a scum forming on the surface of molten glass. It is applied as a desiccative and detergent.

Ayapana, **Ayapano**. The South American name for the leaves of the herb *Purpureum triplinervium*, of tropical America. It is stimulant, diaphoretic, and tonic, and is used as infusion externally for wounds and abscesses, internally for gastric disorders, and is recommended as a substitute for tea, coffee, and cocoa.

Azalein (*az-é'-le-in*). Same as *Rosazilin*.

Azedarach (*az-ed'-ar-ak*) [*Pers.*, *azad*, free, *darab*, a tree]. Trade of China, the bark of *Melia azedarach*, an Asiatic tree naturalized in the southern United States. It occurs in curved pieces or quills, having a sweetish taste. A decoction, $\frac{1}{2}$ oz. to 1 pint, is used as an anthelmintic against the roundworm. Dose $\frac{1}{2}$ -1 oz. (15-30 Gm.). Dose of the fluid extract 1 dr. (4 Gm.), of the tincture, 1 to $\frac{3}{4}$ -2 dr. (2-8 Cc.). Unof.

Azerin (*az'-er-in*) [*Gr.*, *priv.*, *ἐρπός*, dry]. A ferment analogous to ptyalin and found in the digestive secretions of *Drosophila*, *Nepenthes*, and probably all other insectivorous plants.

Azoamly (*ak'-azam'-dēn*) [*Gr.*, *priv.*, *ζωή*, and *mal*; *ἀζωός*, starch]. The inability of the cell (hepatic) to store up the normal amount of glycogen.

Azobenzene (*az-oh-ben'-ēn*) [*azote*, nitrogen, *benzene*], $C_{12}H_{10}N_2$. A compound formed by the action of sodium amalgam upon the alcoholic solution of nitrobenzene. It forms orange-red, rhombic crystals, readily soluble in alcohol and ether, but sparingly soluble in water. It melts at 68° and distills at 293° .

Azobenzoid (*az-oh-ben'-oid*). An amorphous white powder derived from oil of bitter almonds by action of ammonia.

Azo-compounds. In chemistry, compounds intermediate between the nitro-compounds and the amido-compounds, and made from the former by partial reduction, or from the latter by partial oxidation.

Azo-dyes. A well-defined group of the color-stuff dyes, all containing the diazonium group $-N \equiv N-$ bound on either side to a benzene molecule. They may be prepared by reduction of the nitro-compounds in alkaline solutions, or by acting on diazo-compounds with phenols or amines of the aromatic series. The azo-dyes are the amido-derivatives of simple azo-

compounds, and distinguished as amidoazobenzene and oxyazo-dyes.

Azotic (áz-ot'-ik) [*á*, priv.; ζωή, life]. 1. Destitute of living organisms. 2. Relating to nitrogen; azotic nitric.

Azotilemin (áz-o-tíl'-mín) [*á*, priv.; ζωή, life; αμινο] $C_6H_5NO_2$. A deep blood-red coloring-matter obtained from litmus.

Azomethane (áz-o-meth-án'). Hydrocyanic acid.

Azoospermia (áz-o-o-sper'-me-ah) [*á*, priv.; ζωή, life; σπέρμα, seed]. Absence of, or deficient vitality of, the spermatozoa.

Azoresorcin (áz-o-res-or'-sín) [*á*, priv.; ζωή, life; σόρξιν, sorcinol]. $C_{12}H_6NO_4$. A derivative of resorcinol, occurring as dark-red and greenish crystals.

Azoresorufin (áz-o-res-o-rú'-fín), $C_{12}H_{10}N_2O_7$. An amorphous reddish-brown powder or prismatic crystals obtained from azoresorcin by action of sulfuric acid. With alkalis it gives a magenta-red color and is a very sensitive reagent for alkalis.

Azote (as'-ót) [*á*, priv.; ζωή, life]. A synonym of *Nitrogen*.

Azotemia (áz-o-té'-me-ah) [azote; αἷμα, blood]. The presence of nitrogenous compounds in the blood; uremia.

Azotic Acid. Nitric acid.

Azotid (áz'-o-tíd). 1. A nitrid. 2. An amidoramin.

Azotiodic (áz-ot-i-ót'-dik). Containing nitrogen and iodine.

Azotized (áz'-ot-ízd) [azote]. Nitrogenized; containing nitrogen.

Azoturia (áz-o-tú'-re-ah) [azote; οὖρον, urine]. An increase of the urea and urates in the urine.

Azygos (áz'-ig-as) [*á*, priv.; ζυγόν, a yoke].

Applied to parts that are single, not in pairs.

A. uvulæ, a small muscle of the uvula. **A.**

Vein, a vein connecting the superior and inferior vena cavae.

Azygous (áz'-ig-us) [see *Azygos*]. Not paired.

Azymia (áz-zí'-me-ah) [*á*, priv.; ζύμη, a ferment]. Absence of ferment.

Azzle Teeth (áz'-l) [E. dial., assal teeth]. A name given to the molar teeth.

B

B. The symbol of baron.

Ba. The chemie symbol of barium.

Babbitt Metal. See *Antimony*.

Babes-Ernest's Bodies. Bodies found in bacteria, especially those derived from animal bodies or secretions, they are supposed to be condensations of the enchromatic substances of the bodies of bacteria.

Babinski's Phenomenon, B.'s Reflex. Extension, instead of flexion, of the toes on extending the sole of the foot; it is connected with a lesion of the pyramidal tract, and is found in epilepsy, but not in hysteric, hemiplegia. Syn., *Phénomène des orteils*. **B.'s Sign**, diminution or absence of the achilles tendon reflex in some solution as distinguished from hysteric contracture.

Babiabs, Bablah (bah'-lahz, -lah) The pods of *Babingtonia arabica* and several other species; they are used in coughs; the seeds contain a bitter resin.

Babool, Babul Bark (ba-hool'). The astringent, inner bark of the babul tree, *Acacia arabica*, called *babul*.

Bacca (bah'-ka) [L.]. A berry.

Bacelli's Method. 1. In echinococcus cysts of the liver aspiration is done on several consecutive days, and washings made with a 1:1000 solution of mercury bichlorid and a 1:1000 salt solution. 2. In tetanus: hypodermic injection of a solution of phenol. **B.'s Sign**, aphonic pectoriloquy. The whispered voice is transmitted through a serous, but not through a purulent, pleuritic exudate.

Baccharis (bah'-ar-is) [βακχαρίς, a fragrant herb]. A genus of composite trees. *B. halimifolia*, the groundsel-tree, is a shrub of North America. A decoction of the leaves and bark is a popular demulcent and pectoral medicine. *B. pilularis*, kidney plant, a native of the Pacific coast of the United States, is used in cystitis.

Bacciform (bah'-si-form) [bacca; forma, form]. Berry-shaped.

Bach's Reagent for Hydrogen Dioxid. This consists of two solutions: (a) 0.03 potassium dichromate and 5 drops of anilin in 1 liter of water; (b) 5% oxalic acid solution. Shake 5 Cc. of the solution to be tested with 5 Cc. of solution a and 1 drop of solution b; in the presence of hydrogen dioxid a violet-red color results.

Bacillemia, Bacillæmia (bas-il-é'-me-ah) [bacillus; αἷμα, blood]. The presence of bacilli in the blood.

Bacilliform (bas-il'-i)-orm) [bacillus; forma, form]. Having the shape or appearance of a bacillus.

Bacilliparous (bas-il-ip'-ar-us) [bacillus; parere, to produce]. Producing bacilli.

Bacillogenous (bas-il-aj'-en-us) [bacillus; generare, to beget]. Due to bacilli; producing bacilli.

Bacillol (bas-il-ol) A coal-tar distillation-product resembling lysol, its active property being due to cresols, of which it contains 52%. It is an oily fluid, of faint alkaline reaction, dark-brown color, and odor of pitch, readily

Rabbits and guinea-pigs immune. **B. diphtheriticus**, **B. diphtheritidis**, **B. diphtheritis**. See *B. diphtheriae*, Klebs and Löffler. **B. distortus**, Duclaux. Syn., *Tyrophilus distortus*. Found in milk and cheese. aer., mot., npg. **B. dysenteriae**, Chantemesse and Vidal. Found in the intestinal contents and viscera of dysentery cadavers. aer., nliq., pg. **B. dysenteriae**, Shiga. Found in the feces of infants suffering from summer diarrhea. **B. dysodes**, Zopf. Syn., *Bacterium dysodes*. Found in yeast, inducing fermentative changes in bread, causing it to smell disagreeably and to become greasy and unfit for use. **B. Emmerich**. See *B. neapolitanus*, Emmerich. **B. emphysematis vaginae**, Lindenthal. pg. Found in cases of cystic hyperplasia of the vagina. **B. endocarditidis capsulatus**, Weichselbaum. From viscera of man who died of endocarditis with thrombi. aer., nliq., pg. **B. endocarditidis griseus**, Weichselbaum. From the heart in a case of endocarditis recurrens ulcerosa. aer., nliq., mot., pg. **B. enteritidis**, Gartner. Obtained from the tissues of a cow killed on account of sickness attended with mucous diarrhea, and from the spleen of a man who died shortly after eating of the flesh of this cow. aer., nliq., mot., pg. Dogs, cats, chickens, and sparrows are immune. **B. epidermidis**, Bizzozero. Syn., *Leptothrix epidermidis*; *Microsporon minutissimum*, Burchardt. From the epidermis between the toes. aer., nliq., npg. **B. epidermidis**, Bordoni-Uffreduzzi. See *B. of Scheurlen*. **B. Epsilon**, von Mille.

See *Sp. fukleri*. **B. erysipelatos leporis**, Koch. Bacillus of erysipelas in the rabbit. Found in the erysipelatous inflammation in a rabbit's ear caused by the injection of mouse's dung. **B. erysipelatos suis**, Koch, Löffler, Schutz, Pasteur. Syn., *Bacillus erysipelatos malignum*; *Bacillus minimus*; *Bacillus murisepticus*, Flügge; *Bacillus septicus*, Koch; *Bacillus of mouse septicemia*; *Bacillus of hog erysipelas*. First obtained by Koch by injecting putrefying flesh beneath the skin of mice, afterward by Löffler and Schutz from carcasses of swine dead of "rotlauf." aer., facanaer., nliq., pg. **B. erythrosporus**, Eidam, Cohn, and Millet. Found in putrefying albuminous fluids, water, etc. aer., nliq., mot., chg. (greenish yellow, fluorescent), npg. **B. ethaceticus**, Frankland. Cause of fermentation of arabinose. **B. ex pneumoenteritide suis**, E. Klein, Schutz, Salmon, Cornil, Chantemesse, Selander. Bacillus of hog cholera. Found in the intestinal contents, blood, and viscera of swine dead of hog cholera. aer., facanaer., nliq., mot., pg. **B. "f,"** Vignal. See *B. buccalis*, Vignal. **B. facultatus**, Sadelbach and E. Frankel. Found in nonmalignant pharyngeal mycosis. **B. figurans**, Crook-shank. See *B. mesentericus vulgaris*. **B. figurans**, Vaughan. Found in water. aer., liq., mot., npg. **B. filiformis**, Duclaux. Syn., *Tyrophagus filiformis*. Found in cheese and milk. aer., mot., npg. **B. filiformis**, Tils. Found in water. aer., liq., oscl., npg. **B. filiformis havaniensis**, Sternberg. From the liver of a yellow-fever cadaver. anaer., facanaer., nliq., nmot., npg. **B. fitzianus**, Zopf. See *B. subtilis*, Cohn. **B. flavescens**, Pohl. Found in swamp-water. aer., nliq., chg. (yellow). **B. flavocoriaceus**, Eisenberg. Syn., *Sulfur-yellow bacillus*, Adametz. Found in water. aer., nliq., nmot., chg. (sulfur yellow), npg. **B. flavus**, Macé. Found in drinking-water. aer., liq., chg. (golden yellow), nmot. **B. fluorescens aureus**, Zimmermann. Found in hydrant-water (Chemnitz). aer., nliq., mot., chg. (pale yellow), npg. **B. fluorescens liquefaciens**, Flügge. Common in water and putrefying infusions. aer., liq., mot., chg. (greenish yellow), npg. Cf. *B. viscosus*, Frankland. **B. fluorescens longus**, Zimmermann. Found in hydrant-water (Chemnitz). aer., nliq., mot., chg. (grayish yellow), npg. **B. fluorescens minutissimus**, Unna and Tommasoli. Found upon skin in cases of eczema seborrhoicum. aer., facanaer., liq., mot., chg. (greenish yellow), npg. Possibly identical with the preceding species. **B. fluorescens nivalis**, Schmolik. Syn., *Bacillus nivalis*, Gilchrist. Found in snow and ice water from Norwegian glaciers. aer., liq., mot., chg. (bluish green), npg. **B. fluorescens nonliquefaciens**, Schiller. **B. fluorescens putidus**, Flügge. Found in water. aer., nliq., mot., chg. (greenish), npg. **B. fluorescens tenuis**, Zimmermann. Found in hydrant-water (Chemnitz). aer., nliq.,

nmot., chg. (greenish yellow), npg. **B. foetidus**, Liborius. Syn., *Bacterium foetidum*, *Clostridium foetidum*, Liborius. Obtained from soil. anaer., liq., mot. **B. foetidus**, Passet. Syn., *Bacterium foetidum*, Thin; *Clostridium foetidum*, Liborius; *Corpuscles brillants*. Found in cases of fetid sweating feet, in the exudations of mice inoculated with garden earth, and in cases of malignant edema. anaer., liq., mot., npg. **B. foetidus lactis**, Jensen. Found in milk. aer., nliq., npg. Resembles *B. neopolitanus*, Emmerich. **B. foetidus ozonæ**, Hajek. Obtained from nasal secretions of patients with ozena. aer., facanaer., liq., mot., pg. **B. fulvus**, Zimmermann. Found in hydrant-water (Chemnitz). aer., liq., nmot., chg. (gamboge yellow), npg. **B. fuscus**. Obtained from a putrefying infusion of maize, from the air, etc. Cf. *Bact. brunneum*, Schröter. **B. fuscus limbus**, Scheibenzuber. Obtained from rotten eggs. aer., facanaer., nliq., mot., chg. (brown), npg. **B. gallinarum**, Klein. Found in blood of chickens dead from a disease resembling chicken cholera. aer., nliq., nmot., pg. **B. gasoformans**, Eisenberg. Found in water. aer., facanaer., liq., mot., npg. **B. gaytoni**, Cheshire. The cause of a disease of honeybees. Cf. *B. alvei*, Cheshire and Chwyne. **B. geniculatus**, De Bary. Syn., *Tyrophagus geniculatus*, Duclaux; *Bacterium en zigzag*, Fr. Found in the contents of the stomach. aer., nliq., mot., npg. **B. gingivæ**, Miller. **B. gingivæ pyogenes**, Miller. Found in a filthy mouth and in purulent dental pulp. aer., facanaer., liq., pg. (for white mice, guinea-pigs, and rabbits). **B. glaucus**, Maschek. Found in water. aer., liq., nmot., chg. (gray), npg. **B. gliscrogenus**. See *Bact. gliscrogenum*, Malerba. **B. glycerinæ**, Buchner. See *B. subtilis*, Cohn. **B. gracilis**, Zimmermann. Found in hydrant water (Chemnitz). aer., facanaer., liq., oscl., npg. **B. gracilis anaerobiescens**, Vaughan. Found in water. aer., facanaer., nliq., mot., npg. **B. gracilis cadaveris**, Sternberg. Obtained from human liver. aer., facanaer., nmot., nliq., pg. **B. granulatus**, Russell. Found in mud (Bay of Naples). aer., facanaer., liq., nmot. Pathogenesis not determined. **B. graveolens**, Bordon-Uffreduzzi. Found on epidermis between the toes of man. aer., liq., npg. **B. guttatus**, Zimmermann. Found in hydrant-water (Chemnitz). aer., facanaer., liq., mot., npg. **B. halophilus**, Russell. Obtained from water and mud (Bay of Naples). aer., liq., mot. Pathogenesis not determined. **B. hansenii**, Rasmussen. Found in various nutrient liquids. aer., mot., chg. (chrome yellow to yellowish brown). **B. havaniensis**, Sternberg. See *Microc. havaniensis* (?), Sternberg. **B. havaniensis liquefaciens**, Sternberg. Obtained from the surface of the body of patients in the hospital at Havana. aer., nliq., chg. (blood-red). **B. helvolus**, Zimmermann. Found in hydrant-water (Chemnitz). aer., liq., mot.

(rotary only), *chg.* (Naples yellow), *npg.* **B. heminecrobiophilus**, Arloing. Found in a caseous lymphatic gland of a guinea-pig. *aer.*, *juv.*, *mot.*, *npg.* **B. hepaticus fortuitus**, Sternberg. Obtained from the exudations of a guinea-pig inoculated with liver from a yellow fever patient. *aer.*, *mot.*, *npg.* **B. hessii**, Guillebeau. See *Bact. hessii*. **B. hominis capsulatus**, Bordoni-Uffreduzzi. Syn. *Proteus capsulatus septicus*, Banti. *Proteus hominis capsulatus*, Bordoni-Uffreduzzi. *Bacillus of rag-pickers' disease*. Obtained from persons dead from rag-pickers' disease. *aer.*, *mot.*, *npg.* **B. hyacinthi septicus**, Heine. Found in diseased hyacinths. *aer.*, *juv.*, *mot.*, *npg.* Cf. *Bact. hyacinthi*, Wakker. **B. hyalinus**, Jordan. Found in hydrant water (Lawrence, Mass.). *aer.*, *juv.*, *mot.*, *npg.* Reduces nitrates rapidly. **B. hydrophilus fuscus**, Santarelli. From the lymph of diseased frogs. *aer.*, *mot.*, *npg.* **B. implexus**, Zimmermann. Found in hydrant-water (Chernitz). *aer.*, *mot.*, *npg.* **B. incanus**, Pohl. Found in swamp-water. *aer.*, *mot.*, *npg.* Not sufficiently studied. **B. indicus**, Koch. Syn. *Bacillus indicus ruber*, Koch. *Micrococcus indicus*, Koch. Found in the intestinal contents of a monkey. *aer.*, *juv.*, *mot.*, *chg.* (brick-red), *npg.* (for rabbits). **B. indigoferus**, Clissen. Found in river-water (Spain). *aer.*, *mot.*, *chg.* (deep indigo blue), *npg.* **B. indigenus**, Alvarez. Found in an infusion of the leaves of the indigo plant (*Indigofera tinctoria*). *aer.*, *mot.*, *chg.* (indigo blue), *npg.* **B. inflatus**, A. Koch. Obtained from the air. *aer.*, *mot.*, *npg.* **B. influenzae**. See *B. of influenzae*. **B. intestinus motilis**, Sternberg. From the intestinal contents of yellow-fever carriers. *aer.*, *juv.*, *mot.*, *npg.* **B. inunctus**, Pohl. Found in swamp-water. *aer.*, *juv.*, *mot.*, *npg.* Pathogenesis not determined. **B. invisibilis**, Vaughn. Found in water. *aer.*, *juv.*, *mot.*, *npg.* **B. iodococcus vaginatus**, Milby. See *Iodococcus vaginatus*. **B. iris**, Frick. *aer.*, *mot.*, *chg.* (green), *npg.* **B. janthinus**, Zopf. Syn. *Bacterium janthinus*, Zopf. Violet bacillus found in sewage (Lawrence, Mass.). *aer.*, *mot.*, *chg.* (bluish violet), *npg.* **B. klebsii**. See *B. septitidis*, Lustgarten. **B. lacticus**, Pasteur. See *B. lactis lactici*, Hueppe. **B. lactis aerogenes**, Escherich and Abelson. Syn. *Bacillus aerogenes*, *Bacillus capninitus*, Smith. *Bacterium lactis aerogenes*, Escherich. Found in the stomach and intestine of healthy adults. *aer.*, *juv.*, *mot.*, *npg.* **B. lactis albus**, Loëller. Found in milk. *aer.*, *mot.*, *npg.* **B. lactis cyanogenus**. See *B. cyanogenus*, Hueppe. **B. lactis erythrogenes**, Hueppe and Baginsky. Syn. *Bacillus of red milk*. Found in milk and the feces of a child. *aer.*, *mot.*, *chg.* (yellow and red), *npg.* **B. lactis pituitosi**, Loëller. Syn. *Bacillus lactis pituitosi*, Adametz. Found in milk. *aer.*, *mot.*, *npg.* **B. lactis viscosus**, Ad-

ametz. Found inropy milk. *aer.*, *mot.*, *npg.* Capsulated. **B. latericeus**, Eisenberg. Found in water. *aer.*, *mot.*, *chg.* (brick-red), *npg.* **B. leiodermos**, Loëller. Syn. *Bacillus leiodermos*, Flügge. Found in water and milk. **B. leporis lethalis**, Gibner and Sternberg. From the intestinal contents of yellow-fever patients. *aer.*, *mot.*, *npg.* **B. lepra**, Armauer and Hansen. Found in leprosy in children. Cannot be cultivated in ordinary mediums. Specific pathogenesis settled by inoculation of a condemned criminal. **B. leptosporus**, L. Klein. Obtained from the air. *aer.*, *mot.*, *npg.* **B. lethalis**, Babes. Syn. *Proteus lethalis*. Obtained from spleen and lung of patient dead of septicaemia. *aer.*, *juv.*, *mot.*, *npg.* **B. limbatus acidilactici**, Marpmann. Found in cow's milk. *aer.*, *mot.*, *npg.* **B. limosus**, Russell. Obtained from mud (Bay of Naples). *aer.*, *mot.* Pathogenesis not determined. **B. lineola**. See *Bact. lineola*, Cohn. **B. liodermos**, Flügge. See *B. leiodermos*, Loëller. **B. liquefaciens**, Eisenberg. Found in water. *aer.*, *mot.*, *npg.* **B. liquefaciens bovis**, Arloing. Syn. *Pneumobacillus liquefaciens bovis*. From the lungs of a diseased ox. *aer.*, *juv.*, *mot.*, *npg.* **B. liquefaciens communis**, Sternberg. Found in feces of yellow-fever patients. *aer.*, *juv.*, *mot.*, *npg.* **B. liquefaciens magnus**, L. deutz. In the exudates of mice inoculated with garden-earth. *aer.*, *mot.*, *npg.* **B. liquefaciens parvus**, Ludwiz. Same as last. *aer.*, *mot.*, *npg.* **B. liquidus**, Frankland. Found in river-water (Thames). Common. *aer.*, *mot.*, *npg.* **B. litoralis**, Russell. Obtained from mud (Bay of Naples). *aer.*, *juv.*, *mot.*, *npg.* Pathogenesis not determined. **B. lividus**, Flügge and Prankauer. Found in hydrant-water (Berlin). *aer.*, *juv.*, *mot.*, *chg.* (brick-red), *npg.* **B. lucens**, Van Tieghem. Syn. *Bacterium lucens*, Van Tieghem. Found on the surface of water. *aer.*, *mot.* Brilliant. **B. of Lustgarten**. See *B. septitidis*. **B. luteus**, Flügge. Syn. *Bacterium luteum*. Found in superficial layers of gelatin plate culture. *aer.*, *mot.*, *chg.* (yellow), *npg.* **B. luteus suis**, Salmon and Smith. In the perivisceral fluids of swine. *aer.*, *mot.*, *chg.* (yellow red). Smells like glue. **B. lyxae**, Pasteur. Syn. *Coccobacterium lyxae*, Russell. *Lamprothyon suspensum*, Haller. Cf. *Bact. septicum putigenum*, Frankel. Found in saliva of hydrophobic patients and animals. Cf. *B. septicus putigenus*, Flügge. **B. mardii**, Culoni. In unincubated corn and feces of pellagra patients. *aer.*, *mot.*, *npg.* **B. malandriae**, Israel. See *B. mallei*, Loëller. **B. malariae**, Klebs and Tomaszewski. *Crocidobacillus* of the blood. Obtained from the soil and air of the Campagna, from swarms, the blood of malarial patients, etc. Pathogenesis disputed. **B. mallei**, Loëller. Syn. *Bacillus mallei*, Israel. From nasal discharges, mules, etc., of animals with gland-

ders. aer., facuacer., mot. (strictly parasitic), pg. (proved by inoculation). **B. martinez**, Sternberg. Obtained from the liver of a yellow fever cadaver. aer., facuacer., nliq., mot., nfg. **B. megatherium**, De Bary. Found on the leaves of boiled cabbage. aer., liq., mot., nfg. **B. melittophorus**. See **B. alaz**, Che-hire and Cheyne. **B. melochloros**, Winkler and Schroter. Syn., *Bacillus bacari fluorescentis*, Latar. Obtained from the dejections of the larva in a wormy apple. aer., liq., mot., chg. (concolor green), pg. (for rabbits). **B. membranaceus amethystinus**, Eisenberg. Found in well water (Spalato). aer., liq., nmot., chg. (dark violet), nfg. **B. meningitidis purulenta**, Naumann and Schuler. Obtained from pus taken from beneath the pia mater in a person dead of purulent meningitis. aer., facuacer., nliq., mot., pg. **B. merismopædioides**, Zopf. Syn., *Arthrobacterium* or *Bacterium merismopædioides*, De Bary. Obtained from sewage mud, the type of the so-called "tablet-cocci." **B. mesentericus fuscus**, Flugge. Potato bacillus. Obtained from the air, hay-dust, water, etc. Common. aer., liq., mot., nfg. **B. mesentericus ruber**, Globig. Potato bacillus. Found upon potatoes. aer., liq., mot., chg. (reddish yellow or pink), nfg. **B. mesentericus vulgaris**, Flugge. Syn., *Bacillus typhosus*, Crookshank, *Proteus vulgaris*. Potato bacillus. Common. Found in potatoes, water, milk, intestinal contents of man, etc. aer., liq., nfg. **B. miniacus**. See **B. ruber**. **B. minimus**, Klebs. See **B. erythropolis suis**, Koch, etc. **B. mirabilis**, Hauser. Syn., *Proteus mirabilis*. Obtained from decaying animal matter. aer., facuacer., liq., mot., pg. **B. mollusci**, Domenico. Found in molluscum contagiosum; resembles somewhat **B. lepro** and **B. malvaria**. Pathogenesis disputed, the disease being attributed by some to *proteus*. **B. multipedunculatus**, Flugge. Found in air and water. aer., nliq., nmot., nfg. **B. murisepticus**, Flugge. See **B. erythropolis suis**, Koch. **B. murisepticus pleomorphus**, Karlinski. Found in purulent uterine discharges. aer., facuacer., liq., mot., pg. Probably identical with *Proteus vulgaris*, Hauser. **B. muscoides**, Liborius. Found in soil, old cheese, moulding, etc. aer., nliq., mot., nfg. **B. mycoides**, Flugge. Common in soil and water. aer., nliq., mot., nfg. **B. mycoides roseus**, Scholl. Found in the soil. aer., liq., chg. (red), nfg. **B. neapolitanus**, Emmerich. Syn., *Bacillacei communis*, *Bacterium coli commune*, Fischer, *Bacillus of Booker*, "a" form. A normal inhabitant of the intestine of man; resembles the bacillus of typhoid fever, differing from it in producing gas, coagulating milk, forming lactic acid in mediums containingucose or glucose, in producing indol, in being nonmotile, and in giving a visible growth on potato. It is the cause of certain forms of suppuration in the peritoneum, liver,

pelvis of kidney, urethra, etc. aer., facuacer., nliq., nmot., pg. **B. necrophorus**, Lauffer. Obtained from rabbits after inoculation in the anterior chamber of the eye with portions of condyloma. aer., facuacer., nliq., pleom., pg. **B. nodosus parvus**, Lustgarten. From the healthy urethra of man. aer., facuacer., nliq., nmot., nfg. **B. oedematis aerobicus**, Klein. A bacillus of malignant edema. Found in the exudates of guinea-pigs after inoculating with garden earth. aer., facuacer., nliq., mot., pg. **B. oedematis maligni**, Koch. Syn., *Bacillus oedematis*, Koch; *Bacillus septicus*, Pasteur; *Bacillus of gangrene*; *Bacillus of gangrenous septicemia*, Pink bacillus of spreading edema, A. B. Harris. A widely scattered species, obtained from surface soil, dust, putrefying matter, foul water, etc., and from the exudates produced by inoculating animals with garden earth. aer., liq., mot., pg. **B. of Afanassiew**. See **B. tussis convulsiva**. **B. of Albuminous Decomposition**. See **B. putrificus coli**. **B. of Allantiasis**, Müller, Hoppe-Sevler. See also *Sarcina botulina*, Van den Corput. Cf. **B. of Cholerae Diarrhea from Meat poisoning**, Klein. Found in poisonous sausages, particularly in "Blunzen." aer., liq., pg. **B. of Alopecia areata**, Kasauli. Found attached to the hairs from the diseased patches; easily cultivated. See *Microc. of Alopecia areata* and *Microc. arei celsii*. **B. of Babes and Oprescu**. Obtained from a case presenting symptoms of typhus fever. aer., facuacer., nliq., mot., pg. **B. of Belfanti and Pascarella**. Syn., *Impletanusbacillus*, Ger. From the pus of wounds in a person dead of tetanus. aer., facuacer., nliq., nmot., pg. **B. of Beriberi**, Eykmann. See **B. beribericus**, Lacerda. **B. of Blue Milk**. See **B. cyanogenus**, Hueppe. **B. of Blue Pus**. See **B. pyocyanus** a, Gessard. **B. of Booker**, a to n. Found in alvine discharges of children suffering from cholera infantum, probably varieties of **B. neapolitanus**, Emmerich. **B. of Bovet**. Obtained from the intestine of a woman dead of acute cholerae enteritis. aer., nliq., mot., pg. **B. of Braxy**. See **B. anthracis**, Pollender and Davaine. **B. of Bronchitis**, Lunitzer. Syn., *Bacillus of Lunitzer*. From the bronchial secretions in cases of putrid bronchitis. aer., mot. Cf. *Microc. of Bronchitis*, Picchini. **B. of Butyric-acid Fermentation**. See **B. butyricus**, Prazmowski. **B. of Canestrini**. Found in larvae and bees suffering from a malady common among bees in certain parts of Italy. aer., liq., mot., chg. (pink), pg. **B. of Canon and Pielicke**. See **B. of Meades**. **B. of Carcinoma**, Reppin and Scheurlen and Domingo Frite. See **B. of Scheurlen**. **B. of Cattle Plague**, Metchnikoff. See **B. septicaemia Lamorrhagica**, Sternberg. **B. of Cazal and Vaillard**. Obtained from cheesy nodules upon the peritoneum and in the pancreas. aer., facuacer., liq., mot., pg. **B. of Chancroid**, Ducty. Found in pustules developed upon the arm

from the inoculation of chancroidal virus; does not grow in artificial cultures. Cf. *Microc. ulceris mollis*. **B. of Cheese.** See *Sp. tyroenum*, Denecke. **B. of Chicken Cholera.** See *B. septicaemia hemorrhagica*, Sternberg. **B. of Cholera.** See *Sp. cholera asiatica*, Koch. **B. of Cholera in Ducks.** Cornil and Toupet. Obtained from the blood of ducks that had died of an epidemic disease characterized by choleraic symptoms. *aer., nliq., nmot., pg.* (for ducks, but not for chickens or pigeons). **B. of Choleraic Diarrhea from Meat-poisoning.** Klein. Found in the blood and feces of persons poisoned with tainted meat. Cf. *B. of Allantiasis*, Muller and Hoppe-Seyler. **B. of Chyluria.** Wilson. Found in the coagulum of chylous urine. *aer., facuac., mot.* **B. of Colomiatti.** Obtained from cases of conjunctivitis and xerotic masses in the eye. *aer., nliq., nmot., npg.* Cf. *B. of Xerosis epithelialis conjunctive*, Leber. **B. of Conjunctival Catarrh.** Koch. Syn., *Bacillus of conjunctivitis*; *Bacillus of pink eye*, Weeks. *aer., nliq., pg.* Resembles *B. xerosis*. **B. of Dantec.** Syn., *Bacille du rouge de morue*, Fr. Obtained from salted codfish, to which it gives a red color. *aer., liq., mot., chg. (red), npg.* **B. of Davaine's Septicemia.** See *B. septicaemia hemorrhagica*, Sternberg. **B. of Demme.** Obtained from the contents of tumors and pustules and from the blood of patients suffering from erythema nodosum. *aer., facuac. (?) , nliq., pg.* (for guinea-pigs; rabbits, dogs, and goats refractory). **B. of Diphtheria in Calves.** See *B. diphtheria vitulorum* Löffler. **B. of Diphtheria in Doves.** See *B. diphtheria columarum*, Löffler. **B. of Diphtheria in Man.** See *B. diphtheria*, Klebs and Löffler. **B. of Döderlein.** See *B. vaginalis*, Döderlein. **B. of Egyptian Catarrhal Conjunctivitis.** See *B. of Kartulis*. **B. of Endocarditis.** See *B. pyogenes felis*, Frankel and Saenger. **B. of Erysipelas in the Rabbit.** Koch. See *B. erysipelatos leporis*, Koch. **B. of False Hog Cholera.** See *B. parvus ovatus*, Löffler. **B. of False Tuberculosis in Rabbits.** See *B. of Pseudotuberculosis in Rabbits*, Malassez and Vignal. **B. of Fiocca.** Found in the saliva of cats and dogs. *aer., facuac., nliq., nmot., pg.* (for rabbits, guinea-pigs, rats, mice). **B. of Foot-sweat.** See *B. pitidus*, *B. saprogenes*, II, and *B. griseolens*. **B. of Foul Brood of Bees.** See *B. alvei*, Cheshire and Cheyne. **B. of Fowl Cholera.** See *B. septicaemia hemorrhagica*, Sternberg. **B. of Friedländer.** See *B. pneumoniae friedländeri*. **B. of Gangrene.** See *B. oedematis maligni*, Koch; *B. saprogenes*, III, Rosenbach; *B. of Senile Gangrene*. **B. of Gangrenous Septicemia.** See *B. oedematis maligni*, Koch. **B. of Gessner.** See *Bact. thaloidem*, Gessner. **B. of Glanders.** See *B. mallei*, Löffler. **B. of Green Diarrhea in Children.** Lesage. See *B. of Lesage*. **B. of Green Pus.** See *B. pyocynensis*, Gessard. **B. of Grouse Disease,**

Klein. Obtained from the lungs and liver of grouse that had died of an epidemic disease. *aer., nliq., nmot., pg.* (for mice, guinea-pigs, linnets, green finches, sparrows; chickens, pigeons, and rabbits immune). **B. of Hay Infusions.** See *B. subtilis*, Ehrenberg. **B. of Hog Cholera.** Salmon and Smith. See *B. ex pneumoenteritide suis*, Klein. **B. of Hog Erysipelas.** See *B. erysipelatos suis*, Koch, etc. **B. of Horse-pox.** Dieckerhoff and Grawitz. Syn., *Bacillus of acne contagiosa of horses*. Obtained from the pustules of horses suffering from acne contagiosa. *aer., nliq., pg.* **B. of Hydrophobia.** See *B. lyssa*, Pasteur. **B. of Icterus.** Karlinsky and Ducamp. Found in the blood during an attack of infectious icterus. Did not thrive on ordinary culture-mediums. **B. of Influenza.** Pfeiffer, Kitasato, and Canon. *Influenza bacillus*. Found in the purulent bronchial secretions and in the blood of persons suffering from epidemic influenza. *aer., nmot., pg.* Cf. *Microc. influenzae*, Letzerich. **B. of Intestinal Diphtheria in Rabbits.** Ribbert. Obtained from the viscera of rabbits dead of a disease characterized by a diphtheric inflammation of the intestinal mucous membrane. *aer., nliq., nmot. (?) , pg.* **B. of Jeffries.** A group (A, G, J, K, P, S, Z) of bacilli, resembling *B. neapolitanus*, Emmerich, and *B. lactis aerogenes*, Escherich. Found in the alvine discharges of children suffering from summer diarrhea. *anaer., npg.* **B. of Jequirity Ophthalmia.** DeWecker and Sattler. Found in cases of jequirity ophthalmia and in infusions of jequirity seeds (*Abrus precatorius*), the supposed source of abrin. *aer., liq., mot., npg.* The disease is now held to be caused by a soluble poison, *jequiritin*. **B. of Karlinski.** See *B. murisepticus pleomorphus*, Karlinski. **B. of Kartulis.** Koch and Kartulis. Obtained from the conjunctiva in cases of Egyptian catarrhal conjunctivitis. *aer.* Pathogenesis not well determined. **B. of Koubasoff.** Obtained from carcinomatous growth in the human stomach. *aer., facuac., nliq., mot., pg.* (for guinea-pigs and rabbits). Cf. *B. of Scheuren*. **B. of Lactic-acid Fermentation.** See *B. acidi lactici*, Hueppe. **B. of Laser.** Obtained from mice infected with an epidemic disease. *aer., facuac., nliq., mot., pg.* (for field-mice, guinea-pigs, rabbits, and pigeons). **B. of Leprosy.** See *B. lepra*, Hansen. **B. of Lesage.** Syn., *Bacillus of green diarrhea in children*. Obtained in the green alvine discharges of infants suffering from green diarrhea. *aer., nliq., mot., pg.* According to Baumgarten, identical with *B. fluorescens nonliquefaciens*, Schiller. **B. of Letzerich.** Obtained from the urine of children suffering from primary interstitial nephritis. *aer., liq., pg.* **B. of Liborius.** See *B. amylobacter*, Prazmowski. **B. of Lichen ruber.** Laser. Found in the lymph-passages in cases of lichen ruber. **B. of Lucet.** Obtained from chickens and turkeys suffering from an infectious form of septicemia characterized by

dysenteric discharges. *aer.*, *facanaer.*, *nlqj.*, *nmot.*, *pg.* **B. of Lumnitzer.** See *B. of Bronchitis*. **B. of Lupus.** See *B. tuberculosis*, Koch. **B. of Lustgarten.** See *B. copulidis*, Lustgarten. **B. of Lymph in Fishes.** Oliver and Richet. Observed in the lymph of certain fishes. *aer.*, *mot.*, *npg.* **B. of Malaria.** See *B. malariae*, Klebs and Tommasi-Crudeli. **B. of Malignant Edema.** See *B. edematis maligni*, Koch. **B. of Measles.** Canon and Pielcke. Syn. *Bacillus of Canon and Pielcke*. Found in the blood and in the secretions of the nose and conjunctiva of persons with measles. Cf. *Microc. of Measles*, Klebs and Keating. **B. of Mouse Septicemia.** See *B. erysipelatos suis*, Pasteur. **B. of Necrosis of the Liver in Badgers.** Eberth. Found in the necrotic liver of a badger. **B. of Necrosis of the Liver in Guinea-pigs.** Eberth. Found in the necrotic liver of a guinea-pig. **B. of Nephritis.** Letzerich. See *B. of Letzerich*. **B. of Nocard.** Found in the superficial abscesses of cattle suffering from farcy. *aer.*, *nmot.*, *pg.* **B. of Okada.** Obtained from the dust between the boards of a floor. *aer.*, *facanaer.*, *nlqj.*, *nmot.*, *pg.* **B. of Osteomyelitis.** Kraski and Becker. Found in cases of osteomyelitis. *aer.*, *liqj.* (or in some forms *nlqj.*), *mot.*, *pleom.*, *pg.* Held by Pasteur as identical with the micrococci of furuncle. **B. of Phthisis.** See *B. tuberculosis*, Koch. **B. of Pink Eye.** Weeks. See *B. of Conjunctival Catarrh*, Koch. **B. of Potato Rot.** Kraemer. Obtained from potatoes affected with wet rot. *aer.*, *liqj.*, *mot.*, *npg.* Putrefies the albuminous substances of potatoes. **B. of Pseudotuberculosis in Rabbits.** Eberth, Matesse and Vignal. Syn. *Bacille de la tuberculose canulique*, *Bacille de la pseudotuberculose du lapin*, Fr.; *Bacillus der Pseudotuberculose der Kaninchen*, Ger. Found in the necrotic deposits characteristic of this disease. **B. of Puerperal Fever.** See *B. puerperalis*, Engel and Spillmann. **B. of Purpura hæmorrhagica of Babes.** Obtained from the viscera of a patient dead of purpura hæmorrhagica. *aer.*, *facanaer.*, *liqj.*, *nmot.*, *pg.* Resembles the next two forms. **B. of Purpura hæmorrhagica of Kolb.** Obtained from the viscera of patients dead of purpura. *aer.*, *facanaer.*, *nlqj.*, *nmot.*, *pg.* **B. of Purpura hæmorrhagica of Tizzoni and Giannini.** Obtained from the blood of two children dead of purpura hæmorrhagica. *aer.*, *facanaer.*, *nlqj.*, *nmot.*, *pg.* **B. of Pyæmia.** Böttow. Two forms found in pyæmia, one of which resembles *B. edematis maligni*, Koch. **B. of Rabbit Septicemia.** See *B. septicæmiz hæmorrhagica*, Sternberg. **B. of Rabies.** See *B. lyssa*, Pasteur. **B. of Rag-pickers' Disease.** See *B. hominis carculatus*, Bordoni-Uffreduzzi. **B. of Red Bread.** See *B. prodigiosus*, Ehrenberg. **B. of Red Milk.** See *B. lactis exilis*, Hueppe. **B. of Rheumatism.** See *B. rheumathritidis*, Kussmaul.

B. of Rhinoscleroma. See *B. rhinoscleromatis*, Cornil and Alvarez. **B. of Roth, I, II.** Obtained from old rags. *aer.*, *facanaer.*, *nlqj.*, *nmot.*, *pg.* Resembles *B. neapolitanus*, Emmerich, and *B. carvatus*, Burger. **B. of Rouget.** See *B. erysipelatos suis*, Koch, etc. **B. of Scarletina.** Crooke. Found in the nasal mucus and tissues of the throat in a case of anginose scarlatina. *mot.* Resembles *B. edematis maligni*, Koch, and the *Protens* of Hauser. According to Doehle, the parasite of this disease is a protozoön. Cf. *Microc. scarlatina*. **B. of Scheurlen.** Scheurlen, Kapin, and Domingo Freire. Syn. *Bacillus epidermidis*, Bordoni-Uffreduzzi. From cancerous tissues and from mammary epithelium of healthy persons. According to Macé, possibly identical with a variety of *B. mesentericus vulgaris*, Flügge. *aer.*, *liqj.*, *mot.*, *npg.* **B. of Schimmelbusch.** Obtained from the necrotic tissues of a case of cancerous oroma. *aer.*, *nlqj.*, *pg.* **B. of Schou.** See *B. pneumonicus agilis*, Schou. **B. of Senile Gangrene.** Tricomi. Syn. *Bacillus of gangrene*; *Bacillus of Tricomi*. Found in the blood, in the tissues along the line of demarcation, in the subcutaneous tissue and the lymph spaces of the skin, and in the ichorous discharge. *aer.*, *liqj.*, *nmot.*, *pg.* Cf. *B. edematis maligni*, Koch, and *B. soprogenes*, III, Rosenbach. **B. of Septicemia in Man.** Klein. Found in the blood-vessels of swollen lymph-glands in cases of septicemia. **B. of Southern Cattle Plague.** F. S. Billings. Syn. *Bacillus of Texas fever in cattle*. Found in the blood, viscera, and manure of cattle infected with cattle plague or Texas fever, and in their discharges, also in the ticks (*Boophilus bovis*, Curtis) infecting the cattle. The spread of the disease is largely due to the manure of the cattle and also indirectly to the ticks. *aer.*, *nlqj.*, *mot.*, *pleom.*, *pg.* Smith and Kilborn now attribute this disease to the psorosperm *Piroplasma bigeminum*. **B. of Spontaneous Rabbit Septicemia.** Eberth. See *B. of Swine Plague*, Marseilles. **B. of Swine Pest.** Selander. See *B. ex pneumoenteritide suis*, Klein. **B. of Swine Plague.** Reitsch and Jobert. Syn. *Bacillus suis*, Detmers; *Bacillus of spontaneous rabbit septicemia*; *Bacillus of swine plague*, Detmers and Billings; *Bacillus of ferret disease*. First obtained from swine attacked by a fatal epidemic disease in Marseilles. *aer.*, *nlqj.*, *mot.*, *pg.* Canova and others identify this with the bacillus of ferret disease and with that of American swine plague; also with the bacillus of southern cattle plague, Billings; but this last seems to be a distinct species. See *B. latiglandus*. **B. of Symptomatic Anthrax.** See *B. chauvæi*, Bollinger and Foser. **B. of Syphilis.** See *B. syphilidis*, Lustgarten. **B. of Tetanus.** See *B. tetani*, Nicolaier. **B. of Texas Cattle Fever.** F. S. Billings. See *B. of Southern Cattle Plague*. **B. of the Blood.** Hoffman. Found in the blood in health and disease, probably identical with *B. malariae*. **B. of the Lungs of**

Cattle, Lüstig. Found in the lungs of healthy and diseased cattle. *aer., liq.* **B. of the Meconium**, Escherich. Found in the meconium. **B. of the Pneumoenteritis of the Pig**. See *B. ex pneumoenteritidis suis*, Klein. **B. of the Smegma**. Found in the smegma of the male and female genitals. **B. of Tommasoli**. Found on the hair in a case of syphilis. **B. of Tricomi**. See *B. of Senile Gangrene*. **B. of Tuberculosis of Vines**. Regarded by Corvo as the cause of the diseased condition of vines usually attributed to *Phylloxera vastatrix*, Planchon. **B. of Ulcerative Stomatitis of Cattle**, Lingard and Batt. Found on the skin, the mucous membranes, and in the lungs of young cattle. Cf. *Streptococcus of Eczema epizootica*, Schottelius. **B. of Ulcus molle**, Kröfting. Identical with that described by Ducrey as the bacillus of chaneroid. **B. of Utpadel**, Utpadel and Gessner. Obtained from the stuffing of the bed-quits in a military hospital (Augsburg), and from the intestinal contents of man. *aer., nliq., mot., pg.* **B. of Vagus Pneumonia**. See *B. pneumonicus agilis*, Schou. **B. of Verruga peruana**, Izquierdo. Found in the intercellular spaces and blood-vessels in the nodules characteristic of Peruvian wart. **B. of Vignal**. See *B. buccalis minutus*, Vignal. **B. of Whooping-cough**. See *B. tussis convulsiva*, Aianassiew. **B. of Xerosis epithelialis conjunctivæ**, Leber, Kuschbert, Frankel, and Neisser. Syn., *Bacillus xerosis*, Frankel; *Bacillus of Columbiani*; *Bacillus of xerosis*, Schreiber. Found in the white, fatty scales of the conjunctivas in cases of xerophthalmia. *nmot.* Does not grow on gelatin or potato. Pathogenesis not fully determined. **B. of Yellow Fever**. Found in the mucous membrane of the small intestine in two cases of yellow fever. Sternberg has found many forms in the intestinal contents and viscera of yellow-fever cadavers, the most frequent and abundant being *B. neapolitanus*, Emmerich; *B. cadaveris*, Sternberg, and *B. "X."* Sternberg. The last is held by Sternberg as being possibly concerned in the etiology of yellow fever. **B. of Yellow Milk**. See *B. synanthus*, Ehrenberg and Schröter. **B. ovatus minutissimus**, Unna. Found upon the skin in cases of eczema seborrhoicum. *aer., facuac., nliq., npg.* **B. oxytocus perniciosus**, Wyssokowitsch. Found in milk left standing a long time. *aer., nliq., pg.* **B. panificans**, Laurent. Claimed as the active agent in the raising of bread. Found especially in black bread. Dunnenberger considers it a mere impurity and not concerned in the leavening processes. **B. Paracolon**, Gwyn. Found in the blood in an infection resembling typhoid. *pg.* **B. parvus ovatus**, Lotlier. Bacillus of false hog cholera. Found in the carcass of a pig dead of a disease resembling ranget. It resembles *B. septicaemia hemorrhagica*, Sternberg. **B. pasteurianus**, Hansen. Syn., *Bacterium pasteurianum*; *Micrococcus pasteurianus*. Found in

beer-wort and beer, especially that poor in alcohol. Resembles *B. aceti*, Kützing and Sommer. **B. pestifer**, Frankland. Found in the air. *aer., liq., mot., npg.* **B. phosphorescens**, Fischer. Syn., *Paecilium phosphorescens indicus*, Fischer; *Photobacterium indicum*, Fischer. Found in sea-water (Gulf of Mexico). *aer., liq., mot., phos., npg.* **B. phosphorescens gelidus**, Förster. See *B. phosphoreus*, Cohn. **B. phosphorescens indicus**, Fischer. See *B. phosphorescens*, Fischer. **B. phosphorescens indigenus**, Luchet. Found in sea-water (harbor of Kiel) and upon herring. *aer., liq., mot., phos., npg.* **B. phosphoreus**, Cohn. Syn., *Micrococcus phosphoreus*, Cohn; *Bacterium phosphorescens*, Hermes; *Bacillus phosphoreus gelidus*, Förster. Found on sea-fish, raw and cooked (cooked salmon, Cohn). *aer., nliq., phos., npg.* **B. plicatus**, Zimmermann. Found in hydrant-water (Chernitz). *aer., liq., nmot., chg.* (grayish yellow), *npg.* **B. pneumoniæ**, Flügge. See *B. pneumoniae friedländeri*. **B. pneumoniæ friedländeri**. Syn., *Bacillus pneumoniae*, Flügge; *Diplococcus pneumoniae fibrinosus*, Friedländer; *Micrococcus pneumoniae infectiosa*, Friedländer. Occasionally obtained from the exudates in the pulmonary alveoli in cases of crupus pneumonia. *aer., facuac., nliq., nmot., pg.* **B. pneumonicus agilis**, Schou. Syn. *Bacillus of Schou*; *Bacillus of vagus pneumoniae*. Obtained from rabbits suffering from pneumonia induced by section of the vagi. *aer., liq., mot., pg.* **B. pneumosepticus**, Rales. Obtained from the blood and tissues of a person dead of septic pneumonia. *aer., facuac., nliq., nmot., pg.* **B. polymyxa**, Prazmowski. Syn., *Clostridium polymyxa*, Prazmowski. Found in infusion of potatoes, lupin seeds, etc. *aer., facuac., npg.* **B. polytrophicus**, Liborius. Found in cow-dung and in the exudates of mice inoculated with garden-earth. *anac., nliq., mot., npg.* **B. preussii**, Cieielski. See *B. alzi*, Chisholm and Cheyne. **B. prodigiosus**, Ehrenberg. See *Bacteridium prodigiosum*, Schröter, *Bacillus prodigiosum*; *Micrococcus prodigiosus*, Cohn; *Micrococcus imetrophus*, Trevisan; *Monas prodigiosa*, Ehrenberg, *Pulmella prodigiosa* Mont; *Zoogalactina imetropa*, Sette. Frequently found upon food-stuffs, boiled potatoes, hard-boiled eggs, moist bread, etc. *aer., facuac., liq., mot., chg.* (red), *npg.* Acts as a protective to rabbits against anthrax. **B. pseudocedema**, Liborius. Syn., *Bacillus pseudosepticus*, Macé; *Pseudo-adembacillus*, Ger. Obtained from the exudates of mice after inoculation with garden-earth. *anac., liq., pg.* Resembles *B. adematix mahren*, Koch. **B. pseudopneumonicus**, Passat. Syn., *Bacterium pseudopneumonicum*. Found in pus. *aer., nliq., nmot., pg.* Resembles *Micrococcus pneumoniae cruposa*, Frankel. **B. pseudosepticus**, Macé. See *B. pseudocedema*, Liborius. **B. pseudosepticus of Mice**, Binstock. Syn., *Bacillus of pseudosepti-*

amnis of mice. Found in feces. *aer.*, *nliq.*, *nmot.*, *pg.* Found after inoculation, mostly in the edematous fluid and not in the blood. **B. pseudotuberculosis**, Pfeiffer. Obtained from the viscera of a horse killed on suspicion of having glanders. *aer.*, *nliq.*, *nmot.*, *pg.* **B. puerperalis**, Engel and Spillmann. Leptothrix of puerperal fever; bacillus of puerperal fever. Found in two cases of puerperal sepsis *pg.* (for mice and rabbits). Considered by Pasteur to be identical with *B. anthracis*. **B. pulpæ pyogenes**, Miller. Obtained from gangrenous tooth-pulp. *aer.*, *facuanaer.*, *liq.*, *pg.* **B. punctatus**, Zimmermann. Found in hydrant-water (Chemnitz). *aer.*, *liq.*, *npg.* **B. putrificus coli**, Bienstock. Found in human feces. *aer.*, *facuanaer.*, *nliq.*, *mot.*, *npg.* **B. pyocyaneus** α , Gessard. Syn., *Bacillus aeruginosus*; *Bacterium aeruginosum*, Schröter; *Micrococcus pyocyaneus*, Gessard; *Bacillus of blue or green pus*. A widely distributed form, found in purulent and serous wounds, in perspiration, and in the viscera of human cadavers. *aer.*, *facuanaer.*, *liq.*, *mot.*, *chlg.*, *pg.* Two pigments—one fluorescent green, the other blue, pyocyanin. **B. pyocyaneus** β , Ernst. Found in pus from bandages stained green. *aer.*, *liq.*, *mot.*, *chlg.* (yellowish green), *npg.* **B. pyogenes foetidis**, Passet. Syn., *Bacille pyogene fétide*, Fr. Obtained from an ischio-rectal abscess. *aer.*, *nliq.*, *mot.*, *pg.* **B. pyogenes soli**, Bolton. Obtained from the exudates of a rat after inoculation with garden-earth. *aer.*, *facuanaer.*, *chlg.*, *nmot.*, *npg.* **B. radiatus**, Luderitz. Obtained from the exudates of mice and guinea-pigs after inoculation with garden-earth. *anaer.*, *liq.*, *mot.*, *npg.* **B. radiatus aquatilis**, Zimmermann. Found in hydrant-water (Chemnitz). *aer.*, *liq.*, *mot.*, *npg.* **B. ramosus**, Eisenberg. Syn., *Wurzelbacillus*. Common in soil and water. *aer.*, *liq.*, *npg.* **B. ramosus liquefaciens**. Obtained from the air. *aer.*, *liq.*, *mot.*, *npg.* **B. reticularis**, Jordan. Found in hydrant-water (Lawrence, Mass.). *aer.*, *liq.*, *mot.*, *npg.* **B. rheum-arthritis**, Kussmaul. Syn., *Bacillus rheum-arthritis*; *Micrococcus rheum-arthritis*, Leyden. Found in the joint effusions in articular rheumatism. **B. rhinoscleromatis**, Cornil and Alvarez, von Frisch, Paltauf, von Eiselsberg, Dittich, Stepanow, etc. Found in the newly formed tubercles of rhinoscleroma. *aer.*, *facuanaer.*, *nliq.*, usually *nmot.* (becomes motile on cultivation), *pg.* Etiologic relations not established. Considered by many as identical with *B. pneumoniae friedlanderii*. It is less virulent, gelatin cultures more transparent, and the capsules more persistent. **B. rosaceum metalloides**, Dowdeswell. **B. rubefaciens**, Zimmermann. Found in hydrant-water (Chemnitz). *aer.*, *nliq.*, *mot.*, *chlg.* (pale pink), *npg.* **B. rubellus**, Okada. Found in the exudates of guinea-pigs after inoculation with street-dust. *anaer.*, *liq.*, *mot.*, *chlg.* (red), *npg.* **B. ruber**, Frank, Cohn, and Becker. Syn., *Bacillus minuscus*, Zimmer-

mann; *Bacillus* (or *Bacterium*) *rosaceum metalloides*, Dowdeswell. The red bacillus of water. Found in water and on boiled rice. *aer.*, *liq.*, *mot.*, *chlg.* (magenta red), *npg.* **B. ruber indicus**. See *B. indicus*, Koch. **B. rubescens**, Jordan. Found in sewage (Lawrence, Mass.). *aer.*, *nliq.*, *mot.*, *chlg.* (pale pink), *npg.* **B. rubidus**, Eisenberg. Found in water. *aer.*, *liq.*, *mot.*, *chlg.* (brownish red), *npg.* (Lustig describes a red bacillus from river-water which he claims to be different from this.) **B. salivarius septicus**, Biondi. See *B. septicus sputigenus*, Flügge. **B. sanguinis typhi**, Brannan and Cheesman. Obtained from the blood of typhus-fever patients. *aer.*, *facuanaer.*, *nmot.* **B. saprogenes**, I, II, III, Rosenbach. Found in putrefying matter on fetid feet, the white plugs of the pharyngeal follicles, etc. *aer.*, *facuanaer.*, *pg.* **B. scaber**, Duclaux. Syn., *Tyrophilus scaber*. Found in cheese. *aer.*, *nliq.*, *mot.* (in early stages becoming non-motile), *npg.* **B. schafferi**, Freudreich. Obtained from cheese and fermenting potato infusion. *aer.*, *facuanaer.*, *nliq.*, *mot.*, *npg.* Closely resembles *B. neapolitanus*, Emmerich. **B. scissus**, Frankland. Found in the soil. *aer.*, *nliq.*, *nmot.*, *npg.* **B. septicæmiæ hæmorrhagica**, Sternberg. Syn., *Bacillus cholerae gallinarum*, Flügge; *Bacillus cuniculicida*, Flügge; *Bacillus cuniculicidus*, Koch; *Bacterium septicæmiæ*, Koch; *Bacterium morbilli*, Laniz; *Coccobacteria septicæ*, Billroth; *Micrococcus septicus*, Cohn; *Micrococcus cholerae gallinarum*; *Micrococcus gallitidis*; *Microsporon septicus*, Klebs. Found in the blood in cases of septicæmia. *pg.* **B. septicus**, Koch. See *B. erysipelatos suis*, Koch. **B. septicus**, Pasteur. See *B. adematidis maligni*, Koch. Cf. *Proteus septicus*. **B. septicus acuminatus**, Bales. Obtained from the umbilical stump, blood, and viscera of a five-days-old child dead of septic infection. *aer.* (no growth on gelatin), *pg.* (for rabbits and guinea-pigs, not for mice). **B. septicus agri-genus**, Nicolaier. Obtained from manured garden soil. *aer.*, *nliq.* (?). Resembles *B. septicæmiæ hæmorrhagica*, Sternberg. **B. septicus from Sputum**. See *B. septicus sputi*, I, II, Kreibohm. **B. septicus keratomalaciæ**, Bales. Obtained from the corneal tissues and viscera of a child that died of septicæmia following keratomalacia. *aer.*, *facuanaer.*, *nliq.*, *pg.* (for rabbits and mice, slightly for birds, not for guinea-pigs). **B. septicus sputi**, I, II, Kreibohm. Obtained from human buccal secretions. Does not grow in any known culture-medium. Resembles *B. septicæmiæ hæmorrhagica*, Sternberg. **B. septicus sputigenus**, Flügge. Syn., *Bacterium septicum sputigenum*, Frankel; *Micrococcus pneumoniae cruposa*, Frankel; *Micrococcus pasteurii*, Sternberg; *Diplococcus pneumoniae*, Weichselbaum; *Streptococcus lanceolatus pasteurii*, Gamaleia; *Micrococcus of sputum septicæmiæ*, Frankel; Lanceol-shaped *micrococcus*, Talamon; *Pneumococcus of Frankel*. Found both in healthy and in pæcu-

monic sputum, in the fibrinous exudate of croupous pneumonia, and in the pus of meningitis, in middle-ear disease, in certain forms of pleurisy, joint-disease, and endocarditis. *aer., facu-aer., nmot., nliq., pg.* Held to be the cause of croupous pneumonia in man, and by some to be identical with *B. lyssa*, Pasteur. **B. septicus ulceris gangrænosæ**, Babes. Found in the blood and viscera of a boy dead of septicæmia following gangrene of the skin. *aer., liq., mot., pg.* **B. septicus vesicæ**, Clado. Found in the urine of a patient with cystitis. *aer., facu-aer., nliq., mot., pg.* **B. sessilis**, L. Klein. Found in the blood of a cow supposed to have died of anthrax. *aer., mot. (convulsive jerking), npg.* **B. similis**, Bienstock. See *B. subtiliformis*, I, II, Bienstock. **B. smaragdinosphorescens**, Katz. (Obtained from a herring in fish-market (Sydney, N. S. W.). *aer., nliq., nmot., phos.* (emerald green), *npg.* Resembles *Photobacterium phosphorescens*, Cohn, and *Photobacterium pfligeri*, Ludwig. **B. smaragdinus foetidus**, Reimann. Found in the nasal secretions in a case of ozæna. *aer., facu-aer., liq., pg.* **B. solidus**, Luderitz. Found in the exudates of mice inoculated with garden-earth. *aer., nliq., mot., npg.* **B. spiniferus**, Unna. Found upon the skin in cases of eczema seborrhœicum. *aer., nliq., chg.* (grayish yellow), *npg.* **B. sputigenus crassus**. See *B. crassus sputigenus*, Kreibohm. **B. stolonatus**, Adametz. Found in water. *aer., nliq., mot., npg.* **B. stoloniferus**, Pohl. Found in swamp-water. *aer., liq., mot.* Pathogenesis not determined. **B. striatus albus**, von Besser. Found in the nasal secretions of healthy persons. *aer., nliq., npg.* **B. striatus flavus**, von Besser. Occasionally found in nasal mucus. *aer., nliq., chg.* (sulphur yellow), *npg.* **B. subflavus**, Zimmermann. Found in hydrant-water (Chemnitz). *aer., nliq., mot., chg.* (pale yellow), *npg.* **B. subtiliformis**, Bienstock. Syn., *Bacillus subtilis simulans*, I, II, Bienstock; *Bacillus similis*, Bienstock. Found in human feces. *aer., nliq., nmot., npg.* **B. subtilis**, Ehrenberg, Cohn, Brefeld, Prazmowski, and Fitz. Syn., *Bacillus glycerinæ*, Fitz; *Bacillus fitzingeri*, Zopf; *Bacterium subtile*, Zopf; *Metallactes subtile*, Pertz; *Vibrio subtilis*, Ehrenberg, *Bacillus of hay infusions*. De Bary confines *B. subtilis* to the form described by Brefeld and Prazmowski. The relation of the starch fermentation species of Fitz remains doubtful. A common form found in the air, water, soil, and on plants. *aer., liq., osc., npg.* **B. suis**, Detmers. See *B. tardigradus*. **B. sulphhydrogenus**, Miquel. Found in water. *aer., mot.* Decomposes albumin with evolution of H₂S. **B. sulphureum**, Holschewnikoff and Rosenheim. Two forms found in urine and in mud. **B. superficialis**, Jordan. Common in sewage. *aer., liq., mot., npg.* **B. synxanthus**, Ehrenberg and Schroter. Syn., *Bacillus xanthogenus*, Fuchs and Ehrenberg; *Bacterium xanthinum*, Schroter; *Vibrio synxanthus*, Ehrenberg; *Vibrio xanthogenus*,

Fuchs; *Bacillus of yellow milk*. Found in milk that has been boiled. *aer., mot., chg.* (golden yellow), *npg.* Precipitates the casein, renders the milk alkaline. **B. syphilidis**, Lustgarten. Syn., *Bacillus of syphilis*, Lustgarten; *Bacillus of Lustgarten*. Found in syphilitic newgrowths and secretions, does not develop in ordinary culture-mediums. In staining, reaction seems to be identical with that of the bacillus of the smegma. Doehle describes parasitic infusoria as the causative agents of syphilis. **B. tardigradus**. Syn., *Bacillus suis*, Detmers; *Micrococcus suis*, Burrill. Found in dew, water, and in the fluids of pigs affected with swine plague. *aer., mot., npg.* Cf. *B. of Swine Plague*, Reitsch and Jobert. **B. tenuis**, Duclaux. Syn., *Tyrophrix tenuis*, Duclaux. Found in decomposing albuminoid matter, cheese, etc. *aer., facu-aer. (?) , mot., npg.* Used in ripening certain French cheeses. **B. tenuis sputigenus**, Pansini. Obtained from sputum. *aer., nliq., nmot., pg.* **B. termo**, Dujardin and Ehrenberg. See *Bact. termo*, Cohn. **B. tetani**, Nicolaier. Syn., *Bacillus tetani traumatici*, Rosenbach; *Bacillus of tetanus*. Found in garden-earth and in the wounds of persons suffering from tetanus. Spores form at one end and give bacillus a drumstick appearance. *aer., liq., mot., pg.* **B. tetani traumatici**. See *B. tetani*. **B. thalassophilus**, Russell. Obtained from mud (Bay of Naples). *aer., liq., mot.* Pathogenesis not determined. **B. thermophilus**, Miquel. Found in the intestinal tract of man and animals, in sewage, and in the soil. *aer., nmot., npg.* **B. tremelloides**, Schottelius. Found in hydrant-water (Freiburg). *aer., liq., chg.* (golden yellow), *npg.* **B. tremulus**, Koch. Syn., *Metalactes tremulus*, Trevisan. Found as a surface pellicle on decomposing plant infusions. Resembles *B. subtilis*, Ehrenberg. **B. tuberculosis**, Koch. Syn., *Bacterium tuberculosis*, Zopf; *Bacterium tuberculosis*; *Bacillus tuberculi*; *Bacillus tuberculosis*. Found in the sputum, in tuberculous organs, and elsewhere in persons and animals affected with tuberculosis. Parasitic. *aer., facu-aer., nmot., pg.* **B. tuberculosis gallinarum**, Maffucci. Obtained from cases of spontaneous tuberculosis in fowls. This seems to be a distinct species, characterized by its staining reactions, etc., its growth in pure cultures, and its pathogenic qualities, Koch. **B. tumescens**, Zopf. Syn., *Bacterium tumescens*, Zopf. Found upon beets. *aer., liq., mot., npg.* **B. turgidus**, Duclaux. Syn., *Tyrophrix turgidus*, Duclaux. Found in cheese. *aer.* Produces alkaline reaction (carbonate and butyrate of ammonium) in milk. **B. tussis convulsivæ**, Afanassiew. Syn., *Bacillus of Afanassiew*. Found in the sputum of persons affected with pertussis. *aer., nliq., mot., pg.* **B. typhi abdominalis**, Eberth, Gaffky, Klebs, Eppinger, Brautlecht. Syn., *Bacillus typhosus*, *Bacterium typhosum*. Found in water and in milk and in the feces and organs in

typhoid fever. aer., *Jacanaer.*, nliq., mot. **B. typhi murium**, Löffler. (Obtained from mice affected with an epidemic disease. aer., *Jacanaer.*, nliq., mot. **B. typhosus**. See *B. typhi abdominalis*, Eberth, etc. **B. ubiquitous**, Jordan. Found in air, water, sewage (Lawrence, Mass.). aer., *Jacanaer.*, nliq., nmot., npg. Resembles *B. candicans*, Frankland. **B. ulna**, Cohn and Prazmowski. Syn. *Vibrio "d."* Ehrenberg, *Bacterium ulna*, Miller; *Vibrio bacillus*, Muller, Ehrenberg. Found in egg albumen. aer., mot., npg. **B. ulna of Vignal**. Found in saliva of healthy persons; perhaps identical with the preceding form. aer., liq., npg. **B. ureæ**, Maquell. Found in the air. aer., *Jacanaer.*, nliq., npg. Perhaps identical with the preceding form. **B. ureæ**, Leube. Three varieties found in old urine. aer., nliq., npg. Converts urea into ammonium carbonate. **B. urocephalus**, Duclaux. Syn., *Tyrophrix urocephalus*, Duclaux. One of the commonest forms associated with putrefaction of animal matter. aer., *Jacanaer.*, npg. **B. vaginalis**, Doderlein. Constantly found in the normal vaginal secretions of adults. aer., *Jacanaer.*, nmot. (no growth in gelatin), npg. **B. varicosus conjunctivæ**, Gornbert. Found in the healthy conjunctival sac of man. aer., *Jacanaer.*, nliq., mot., pg. **B. vasculosis**, Sternberg. (Obtained from the intestine and stomach of yellow-fever cadavers. aer., liq., mot., npg. **B. venenosus**, Vaughan. Found in water. aer., *Jacanaer.*, nliq., mot., pg. **B. venenosus brevis**, Vaughan. Found in water. aer., *Jacanaer.*, nliq., mot., pg. **B. venenosus invisibilis**, Vaughan. Found in water. aer., *Jacanaer.*, nliq., mot., pg. **B. venenosus liquefaciens**, Vaughan. Found in water. aer., *Jacanaer.*, liq., mot., pg. **B. ventriculi**, Raeszymsky. Obtained from the stomach of meat-fed dogs. aer., *Jacanaer.*, nliq., mot., npg. **B. vermicularis**, Frankland. Found in river-water. aer., liq., osc., npg. **B. vermiculosus**, Zimmermann. Found in water. aer., liq., osc., npg. **B. violaceus**, Becker. Found in river-water. aer., *Jacanaer.*, liq., mot., chg. (dark violet). **B. violaceus laurentius**, Jordan. Found in hydrant water (Lawrence, Mass.). aer., *Jacanaer.*, liq., mot., npg. **B. virens**, Van Tieghem. Syn., *Sporonema gracile*. Found in stagnant water. aer., mot., chg. (green, held by some to be chlorophyll, but not sufficiently studied), npg. **B. virescens**, Frick. Found in green sputum. aer., nliq., mot., chg. (green), npg. **B. virgula**. See *Sp. cholera asiatica*, Koch. **B. virgula**, Duclaux. Syn., *Tyrophrix virgula*, Duclaux. Found in albuminous solutions. aer., nmot., npg. **B. viridis**, Van Tieghem. Syn., *Bacterium viride*, Van Tieghem; *Arthrobacterium viride*, De Bary. Found in water collected in the hollow of a porous fungus. aer., chg. (green). Not thoroughly investigated. **B. viridis flavus**, Frick. Syn., *Bacillus viridis pallescens*, Frick. aer., nliq., mot., chg. (yellowish-

green), npg. Resembles *B. virescens*, Frick. **B. viridis pallescens**, Frick. See *B. viridis flavus*, Frick. **B. viscosus**, Frankland. Found in river-water. aer., liq., mot., chg. (fluorescent green). Perhaps identical with *B. fluorescens*, Flugge. **B. viscosus**, I, II, Van Laer. Found inropy milk. aer., nliq., npg. **B. viscosus cerevisiæ**, Van Laer. Found in viscous beer and in milk. aer., liq., npg. **B. viscosus sacchari**, Kramer. Found in viscous saccharine fluids. aer., liq., npg. **B. vulgaris**, Hauser. Syn., *Proteus vulgaris*; *Proteus sulphureus*, Holschenikoff, *Proteus of Hauser*. Commonly associated with putrefaction. aer., *Jacanaer.*, liq., mot., pg. This species is probably one of those formerly included under *Bact. termo*. **B. "X,"** Sternberg. Found in yellow-fever cadavers. Sternberg thinks it possible that this form is concerned in the etiology of the fever. pg. (for rabbits). **B. xanthogenus**, Fuchs and Ehrenberg. See *B. synxanthus*, Ehrenberg. **B. xerosis**, Frankel. Syn., *Xerose bacillus*. See *B. of Xerosis epithelialis conjunctivæ*, Leber. **B. zenkeri**, Hauser. Syn., *Proteus zenkeri*; *Bacille de Hauser*, Fr. Found in putrefying animal matter. aer., *Jacanaer.*, nliq., mot., pg. **B. zoffii**, Syn., *Bacterium zoffii*, Kurth; *Arthrobacterium zoffii*, De Bary. Found in the intestinal tract of fowls. aer., nliq., mot., npg. **B. zurianus**, List. Found in water. aer., nliq., nmot., npg. **Bacteridium prodigiosum**, Schröter. See *B. prodigiosum*, Ehrenberg. **Bacterium aceti**, Lanzl. See *B. aceti*, Kützing. **Bact. ægypticum**, Chester. path. The cause of an acute contagious form of conjunctivitis. **Bact. aerogenes**, Miller. See *B. aerogenes*, II, Miller. **Bact. aeruginosum**, Schröter. See *B. pyocyaneus* a, Giesard. **Bact. alii**. See *B. alii*, Griffiths. **Bact. anthracis**, Zopf. See *B. anthracis*, Pollender and Davaine. **Bact. articulatum**, Ehrenberg. See *Bact. lineola*, Cohn. **Bact. aurantiacum**, Trelease. A chromogenic form. **Bact. bacillus**, Pasteur. See *Bact. termo*, Davaine. **Bact. brunneum**, Schröter. Found in a putrid infusion of Indian corn. chg. (brown). Perhaps identical with *B. fuscus*, Zimmermann. **Bact. butyri colloideum**, Laffar. Found in every sample of natural butter examined. Cf. *B. butyri fluorescens*, Laffar. **Bact. candidum**, Trelease. A chromogenic form, identical with *B. mesentericus fuscus*, Flugge. **Bact. capitatum**, Davaine. Found in an infusion of albuminous matter. aer., mot. **Bact. carbunculare**, Pollender, Brauell, Delafond, and Davaine. See *B. anthracis*, Pollender and Davaine. **Bact. carlsbergense**, Hansen. Found in the air. Cf. *Bact. kochii*, Hansen. **Bact. catenula**, Dujardin. Has been observed especially in putrid wine and putrefying blood, generally in albuminous liquids in contact with air. Coze and Feltz found it in man in typhoid fever. It resembles *B. acidilactici*, Davaine, Hueppe. **Bact. caucasicum**. See *B. caucasicus*, Kern. **Bact.**

chlorinum, Engelmann. Found in water. *aer.*, *chg.* (green). Engelmann holds this to be chlorophyll, as a small amount of oxygen is given off, indicating the assimilation of carbon. **Bact. coli commune**, Escherich. See *B. neapolitanus*. **Bact. commune**, Pasteur. See *Bact. termo*, Dujardin. **Bact. cuneatum**, Rivolta. See *B. cuneatus*. **Bact. cyanogenum**, Fuchs. See *B. cyanogenus*, Hueppe. **Bact. denitrificans**. See *B. denitrificans*. **Bact. dysodes**, Zopf. See *B. dysodes*. **Bact. enchelys**, Ehrenberg. Found in river-water. **Bact. farinaceum**, Wigand. Found in sour sponge or dough. **Bact. fitzianum**, Zopf. See *B. subtilis*, Ehrenberg. **Bact. foetidum**, Thin. See *B. latidus*, Passet. **Bact. fusiforme**, Warming. Found in sea-water. **Bact. gingivæ pyogenes**, Müller. See *B. gingivæ pyogenes*. **Bact. gliscrogenum**, Malarba. Syn., *Bacillus gliscrogenus*. Found in viscid acid urine. *aer.*, *liq.*, *mot.*, *npg.* **Bact. griseum**, Warming. Syn., *Micrococcus griseus*, Winter, a doubtful form. **Bact. gummis**, Comes. The cause of the gummos disease of the fig, almond, and orange trees, and the *mal nero* of vines. Cf. *Bact. putredinis*, Davaine. **Bact. gummosum**, Ritsert. Found to produce the viscosity of infusions of digitalis. *aer.*, *liq.*, *pleom.* **Bact. hessii**, Guillebeau. One of the two forms found by Guillebeau to cause milk to becomeropy. Thrives best in pasteurized milk. *aer.*, *liq.*, *mot.*, *npg.* Cf. *Microc. freudenreichii*. **Bact. hyacinthi**, Wakker. Found in the bulbs and leaves of the hyacinth and causing the "yellows" of hyacinths. Cf. *B. hyacinthi septicus*, Heinz. **Bact. janthinum**, Zopf. Found on pieces of pig-bladder floating on water rich in lower organisms. In the air it forms a violet pigment soluble in alcohol. **Bact. kochii**, Hansen. Found in the air of Carlsberg. Cf. *Bact. carlsbergense*, Hansen. **Bact. lactis**, Lister. See *B. acidi lactici*, Hueppe. **Bact. lactis aerogenes**, Escherich. See *B. lactis aerogenes*, Abelson. **Bact. lineola**, Müller, Cohn. Syn., *Bacterium punctum*, Rivolta; *Bacterium tremulans*, Trevisan; *Bacterium tribulare*, Ehrenberg; *Bacterium articulatum*, Ehrenberg. *Vibrio lineola* (Müller), Ehrenberg; *Vibrio tremulans*, Ehrenberg, *Bacillus lineola*. Found in well-water and other water, in infusions, in soil on vegetables, etc. *aer.*, *mot.* (trembling and darting back and forth), *pleom.*, *npg.* Probably represents several species, or a developmental form of a spirillum. **Bact. litoreum**, Warming. Found only in sea-water. *aer.*, *mot.*, *npg.* **Bact. lucens**, Van Tieghem. See *B. lucens*, Van Tieghem. **Bact. luteum**, Trelease. See *B. luteus*, Flügge. **Bact. maidis**, Cuboni. See *B. maidis*, Cuboni. **Bact. merismopedioides**, Zopf. See *B. merismopedioides*, Zopf. **Bact. morbilli**, Lanzi. Found in the urine of persons with measles. Cf. *B. septiciemiæ hemorrhagica*, Sternberg. **Bact. navicula**, Reinke and Berthold. See *B. butyricus*, Prazmowski. **Bact.**

neapolitanum. See *B. neapolitanus*, Emmerich. **Bact. oblongum**, Boutroux. Syn., *Micrococcus oblongus*, Boutroux. Found in beer; the agent of gluconic fermentation. **Bact. of Butyric-acid Fermentation**. See *B. butyricus*, Prazmowski. **Bact. of Diphtheria**, Emmerich. Found in cases of diphtheria in man and doves. **Bact. of Fire-blight**. See *B. butyricus*, Prazmowski. **Bact. of Infectious Pneumonia in the Horse**. See *Str. corvæ contagiosa equorum*, Schütz. **Bact. of Kephir**. See *B. caucasicus*, Kern. **Bact. of Pear-blight**. See *B. butyricus*, Prazmowski, and *Microc. amyloporus*, Burdill. **Bact. of Sheep-pox**. Found in cases of sheep pox, or "Schafblattern". **Bact. of Variola**, Cose and Feltz. Found in the vesicles of smallpox; pathogenic for rabbits. **Bact. oleæ**, Arcangeli. Said to cause the so-called tuberculosis ("maladie de la loupe"; "rogner") of olives. **Bact. ovatum**, Lebert. See *Nosema bombycis*, Nageli. **Bact. pasteurianum**, **Bact. pastorianum**. See *B. pasteurianus*, Hansen. **Bact. periplanetæ**, Tichomirov. Found in the common cockroach (*Periplaneta orientalis*), and producing in it a specific disease. **Bact. pflügeri**, Ludwig. See *Photobacterium pflügeri*, Ludwig. **Bact. phosphorescens**, Herms. **Bact. phosphorescens**, Cohn. Syn., *Photobacterium phosphorescens*. See *B. phosphoreus*, Cohn. **Bact. photometricum**, Engelmann. Found in water; motion dependent on light; possibly not a bacterium at all. **Bact. pneumoniæ**, **Bact. pneumoniæ crouposæ**, Friedländer. See *B. pneumoniæ friedländeri*. **Bact. porri**, Tommasi-Crudeli. Found in warts. **Bact. prodigiosum**. See *B. prodigiosus*, Ehrenberg. **Bact. pseudopneumonicum**. See *B. pseudopneumonicus*, Flügge. **Bact. punctum**, Rivolta. See *Bact. lineola*, Müller, Cohn. **Bact. putredinis**, Davaine. Found in rapidly decaying plants. Cf. *Bact. gummis*, Comes. **Bact. pyriforme**, Hansen. Found in the air. **Bact. radicola**, Prazmowski. Syn., *Bacillus radicola*, Beyernick. *Rhizobium leguminosarum*, Frank. Found in the soil, particularly in the roots of the *Leguminosæ*, where it is held to stimulate the cells to unusual growth, affect nitrification, constitute the "bacteroids" of Woronin, and form the so-called "bacteroid tissue." **Bact. rosaceum metalloides**, Dowdeswell. See *B. ruber*, Frank, Cohn. **Bact. rubescens**, Lankester. See *Beggiatoa roseopersicina*, Zopf. **Bact. septiciemiæ**, Koch. See *B. septiciemiæ hemorrhagica*, Sternberg. **Bact. septicum sputigenum**. See *B. septicus sputigenus*, Flügge. **Bact. subtile**, Buchner. See *B. subtilis*, Ehrenberg. **Bact. sulphuratum**; **Bact. sulphuratum**, Warming. See *Beggiatoa roseopersicina*, Zopf. **Bact. sulphureum**, Rosenham. Found in wine. *liq.*. Evolves H₂S. **Bact. syncyanum**, Ehrenberg, Schröter. See *B. cyanogenus*, Hueppe. **Bact. synxanthum**, Schröter. See *B. synxanthus*. **Bact. termo**, Dujardin and Ehrenberg. Syn.,

Bacillus termo, Davaine. *Bacterium bacillus*, Pasteur. *Cryptococcus natans*, Kutzing; *Cryptococcus nebulosus*, Kutzing. *Micrococcus cremoris*, Cohn. *Zooglea termo*; *Monas termo*, Mader. A collective species. **Bact. termo**, Vignat. Found in the saliva of healthy persons. *aer.*, *liq.*, *mot.*, *chg.* (yellowish gray). **Bact. tholoideum**, Gessner. Syn. *Bacillus* of Gessner. Found in the intestinal contents of healthy persons. Resembles *B. lactis aerogenes*, Escherich. *pg.* (for mice and guinea-pigs). **Bact. tremulans**, Trevisan. See *Bact. lineola*, Cohn. **Bact. triloculare**, Ehrenberg. See *Bact. lineola*, Cohn. **Bact. tuberculosis**, Zopf. **Bact. tuberculosum**, Koch. See *B. tuberculosis*, Koch. **Bact. tumescens**, Zopf. See *B. tumescens*, Zopf. **Bact. typhosum**. See *B. typhi abdominalis*, Eberth and Gaffky. **Bact. ulna**. See *B. ulna*, Cohn. **Bact. ureæ**, Cohn. See *Microc. ureæ*. **Bact. ureæ**, Jaksch. Found in ammoniacal urine. *aer.*, *mot.*, *nlq.* Not sufficiently investigated. **Bact. vermiforme**, Ward. Found in fermented ginger-beer. **Bact. violaceum**, Bergonzini. Syn. *Chromobacterium violaceum*, Bergonzini. Found in putrefying solutions of egg albumen. *chg.* (violet). **Bact. viride**. See *B. viridis*, Van Tieghem. **Bact. xanthinum**. See *B. xanthus*, Ehrenberg and Sauter. **Bact. xylum**, Brown. Found in solutions of carbohydrates, giving rise to acetic acid, and converting dextrose into gluconic acid, and mannitol into levulose. **Bact. zoppii**, Kurth. See *B. zoppii*. **Bacteroides**, Woronin. See under *Bacteroides*. **Beggiatoa alba**, Vaucher. Syn. *Beggiatoa punctata*, Trevisan; *Beggiatoa leptomitiformis*, Meneghi; *Oscillaria alba*, Vaucher; *Hygrococcus vandelli*, Meneghi. Next to *Cladothrix* the most common bacterium of water, forming a superficial layer in the mud. **Beggiatoa alba**, var. *marina*, Cohn. Syn. *Beggiatoa crstedtii*, Rabenhorst. See *Beggiatoa marina*, Cohn. **Beggiatoa arachnoidea**, Agardh. Syn. *Oscillaria arachnoidea*, Agardh. *Oscillaria versatilis*, Kutz. Found in swamps and sulfur springs. **Beggiatoa leptomitiformis**, Meneghi and Trevisan. Syn. *Oscillaria leptomitiformis*, Meneghi. Found in sulfur springs. **Beggiatoa marina**, Cohn. Syn. *Beggiatoa alba*, var. *marina*, Cohn. **Beggiatoa crstedtii**, Rabenhorst. Found in a salt-water aquarium, forming a thin, slimy layer on dead fish. **Beggiatoa minima**, Warming. Found in sea-water; gray. **Beggiatoa mirabilis**, Cohn. Found in a salt-water aquarium; snow white. **Beggiatoa multisepta**. See *Pragmidiothrix multisepta*, Eagler. Held by Zopf to be identical with *Beggiatoa alba*, Vaucher. **Beggiatoa nivea**, Rabenhorst. Syn. *Leptonema niveum*, Symphiothrix *nivea*, Bruggen. Found in sulfur springs. **Beggiatoa nodosa**, Van Tieghem. A doubtful form, characterized by nodes in the filaments, which differs from other members of the genus in the absence of sulfur grains and of motion.

Beggiatoa crstedtii, Rabenhorst. See *Beggiatoa marina*, Cohn. **Beggiatoa pellucida**, Cohn. Found in a marine aquarium; sulfur grains few. **Beggiatoa punctata**, Trevisan. See *Beggiatoa alba*, Cohn. **Beggiatoa roseopersicina**, Zopf. Syn. *Bacterium rubescens*, Lankester; *Bact. sulfuratum* or *Bact. sulphuratum*, Warming; *Clathrocystis roseopersicina*, Cohn; *Cohnia roseopersicina*, Winter, Kutzing; *Microhaloa rosea*, Kutz; *Ophidiomonas sanguinea*, Ehrenberg; *Pleurococcus roseopersicina*, Rabenhorst. Peach-colored bacterium. Morphologically identical with *Beggiatoa alba*, Vaucher. Forms rose-colored to violet pellicles on putrid matter. Produces bacteriopurpurin. **Beggiatoa tigrina**, Rabenhorst. Syn. *Oscillaria tigrina*, Roemer. Found in swamps on submerged wood. Forms a thin white layer. **Bienstock's Putrefactive Bacillus**, **Bienstock's Putrefactive Bacillus** from the **Feces**. See *B. putrificus coli*, Bienstock. **Brieger's Bacillus**. See *B. canicidus*, Brieger. **Buff Bacillus of Spreading Edema**, A. B. Harris. *nlq.*, *aer.*, *chg.* (buff), *pleom.* **Capsule Bacillus of Loeb**. Obtained from a case of keratomalacia infantum. *aer.*, *mot.*, *nlq.*, *nmot.*, *pg.* Resembles *B. capsulatus*, Pfeiffer. **Capsule Bacillus of Ozena**, Marano. Found in the nasal secretions in ten cases of ozena. Resembles *B. pneumoniae friedländeri*. Cf. *Murex loewenbergii*. **Capsule Bacillus of Smith**. See *B. capsulatus smithii*. **Cheese Spirillum**. See *Sp. tyroenum*, Denecke. **Chromobacterium violaceum**, Bergonzini. See *Bact. violaceum*, Bergonzini. **Cladothrix bovis**. See *Actinomyces bovis*, Harz. **Cladothrix canis**. Held by Rabe to be very like *Actinomyces bovis*. **Cladothrix dichotoma**, Cohn and Zopf. Causes lesions of the skin in butchers, tanners, cooks, etc.; called by Rosenbach *erysipeloid*. See *Leptothrix ochracea*, Kutzing; *Myconostoc gregarium*, Cohn. **Cladothrix foersteri**, Cohn. Syn. *Cernothrix foersteri*; *Streptothrix foersteri*, Cohn. Forms yellowish or grayish concretions in the human lacrimal ducts. **Cladothrix intricata**, Russell. Obtained from sea-mud (Laysan). *aer.*, *liq.*, *mot.* **Clathrocystis roseopersicina**, Cohn. See *Beggiatoa roseopersicina*, Zopf. **Clostridium butyricum**, Prazmowski. See *B. butyricum*, Prazmowski. **Clostridium foetidum**, Lilius. See *B. foetidum*, Passet. **Clostridium of Symptomatic Anthrax** (or **Charbon**), Needlen and Ehlers. See *B. chauvoei*, Bollinger and Feser. **Clostridium polymyxa**, Prazmowski. See *B. polymyxa*, Prazmowski. **Coccidioides immitis pyogenes**, Ophüls and Mollet. Found in chronic suppurative processes. **Coccobacillus pyogenes ureæ**, Rorsing. See *Dip. pyogenes ureæ*. **Coccobacteria septica**, Billroth. The single term under which Billroth includes all putrefactive bacteria. See *B. septicaemia hemorrhagica*. **Coccobacteria ureæ**, Rorsing. See *Dip. pyogenes ureæ*. **Coccobac-**

terium lyssæ, Rivolta. See *B. lyssa*. *Cohnia roseopersicina*, Winter and Kützing. See *Beggiatoa roseopersicina*, Zopf. *Colon Bacillus* of Escherich. See *B. neapolitanus*. *Comma Bacillus*, *Comma Bacillus* of Koch, *Comma-shaped Bacillus*, Waten. See *Sp. cholera asiatica*, Koch. *Corpuscles brillants*. See *B. latidus*, Passet. *Coryza Diplococci*. See *Microc. cereus aureus*, Schrotter and Winkler. *Crenothrix fœrsteri*, Cohn. See *Cladothrix fœrsteri*. *Crenothrix kühniana*, Saccardo and Rabenhorst. Syn. *Crenothrix polyspora*, Cohn; *Hypothyrix kühniana*; *Lepenthrix kühniana*. Found in drinking-water, to which it imparts a disagreeable taste. *Crenothrix polyspora*, Cohn. See *Crenothrix kühniana*, Saccardo and Rabenhorst. *Cryptococcus alveareus*. See *B. alvei*, Cheshire and Cheyne. *Cryptococcus clava*, Wedl. Found in the stomachs of ruminants. *Cryptococcus cerevisiæ*, Robin, *Cryptococcus fermentatum*, Kützing. See *Saccharomyces cerevisiæ*, Reess and Robin. *Cryptococcus glutinis*, Fersen. See *Saccharomyces glutinis*. *Cryptococcus guttulatus*, Robin. See *Saccharomyces guttulatus*. *Cryptococcus natans*, *Cryptococcus nebulosus*, Kützing. See *Bact. termo*, Dujardin and Davaine. *Cryptococcus of Yellow Fever*. See *Cryptococcus xanthogenicus*, Freire. *Cryptococcus xanthogenicus*, Domingo Freire. Considered by Freire to be the cause of yellow fever. Cf. *B. of Yellow Fever*. *Denecke's Cheese Bacillus*. See *Sp. tyrogenum*. *Dengue Micrococci*. See *Schientzia laughlini*. *Detionella ochracea*, Saccardo. See *Leptothrix ochracea*, Kützing. *Diplococcus albicans amplius*, Bumm. Grayish-white micrococcus. Found in mucus from the healthy vagina. *aer.*, *Jacanaer.*, *liq.*, *npg.* *Dip. albicans tardissimus*. Morphologically identical with the gonococcus, but more adherent, forming small masses. *aer.*, *nliq.*, *npg.* *Dip. albicans tardus*, Unna and Tommasoli. Found in eczema. *aer.*, *nliq.*, *nmot.* *Dip. citreus conglomeratus*, Bumm. Obtained from the air, in dust, and from gonorrheal pus. *aer.*, *Jacanaer.*, *liq.*, *chg.* (lemon-yellow), *npg.* *Dip. citreus liquefaciens*, Unna and Tommasoli. Found on the skin in cases of eczema seborrhoicum. *aer.*, *liq.*, *nmot.*, *chg.* (lemon yellow), *npg.* *Dip. coryzæ*, Klebs and Hajek. Obtained from the nasal secretions in cases of acute nasal catarrh. *aer.*, *nliq.*, *npg.* *Dip. flavus liquefaciens tardus*, Unna and Tommasoli. Found on the skin in cases of eczema seborrhoicum. *aer.*, *Jacanaer.*, *liq.*, *chg.* (chrome yellow), *npg.* *Dip. fluorescens foetidus*, Klamann. Obtained from the posterior nares. *aer.*, *Jacanaer.*, *liq.*, *chg.* (grass-green to violet), *npg.* *Dip. intracellularis meningitidis*, Goldschmidt and Weichselbaum. Found within the cells of the exudate in cerebrospinal meningitis. *aer.*, *nliq.*, *pg.* *Dip. lacteus faviformis*, Bumm. Found frequently in the

vaginal secretions. *aer.*, *nliq.*, *npg.* **Dip. luteus**, Adametz. Found in water *aer.*, *liq.*, *mol.*, *chg.* (yellow), *npg.* **Dip. of Gonorrhea**. See *Microc. gonorrhoeae*, Neisser. **Dip. of Orchitis**, Hugoumenq and Enaud Syn., *Orchiococcus*. Frequently found in gonorrheal pus during the first few days. *aer.*, *nliq.*, *pg.* **Dip. of Ozena**, Lowenberg. Found in the secretions in cases of *ozena*. **Dip. of Pemphigus**, **Dip. of Pemphigus acutus**, Demme. Syn., *Micrococcus* of Demme. Found in the bullas of pemphigus *aer.*, *nliq.*, *pg.* Resembles the gonococcus. **Dip. of Pneumonia in Horses**, Schutz. Obtained from the lungs of a horse afflicted with acute pneumonia. *aer.*, *nliq.*, *pg.* **Dip. pneumoniae**, Weichsellum. Syn., *Pneumococcus* of Fränkel. See *B. septicus putiginus*, Flügge. **Dip. pneumoniae fibrinosa**, Friedländer. See *B. pneumoniae friedländeri*. **Dip. pyogenes ureæ**, Rörising. Syn. *Diplococcus ureæ*, Rörising; *Coccobacillus pyogenes ureæ*, Rörising; *Coccobacterium ureæ*, Rörising. Found in purulent urine. Cf. *Dip. ureæ trifolius*, Rörising, *Microc. pyogenes ureæ fluxus*, Rörising. **Dip. roseus**, Bumm. Found in the air. *aer.*, *jacuans*. *liq.*, *chg.* (pink), *npg.* **Dip. ureæ**, Rörising. See *Dip. pyogenes ureæ*, Rörising. **Dip. ureæ trifolius**, Rörising. Found in purulent urine. Cf. *Dip. pyogenes ureæ*, Rörising. *Microc. pyogenes ureæ fluxus*, Rörising. **Dispora caucasica**, Kern. See *B. caucensis*, Kern. **Drumstick Bacillus**. See *B. pasteurii*. **Epsilon Bacillus**. See *Sp. finckleri*. **Erythroconus litoralis**, Cirstedi. See *Sarcina litoralis*. **Feet-sweat Bacillus**. See *B. fritidus*, *B. saprogenes*, II. and *B. granulosus*. **Finkler-Prior's Bacillus**. See *Sp. finckleri*. **Flesh-colored Bacillus**, Tilk *aer.*, *liq.*, *mol.*, *chg.* (pink), *npg.* **Flowers of Wine**. See *Saccharomyces mycoderma*, Reuss. **Fränkel's Pneumobacillus**. See *B. septicus putiginus*, Flügge. **Frog-spawn Bacillus**, **Frog-spawn Fungus**. See *Leucomostoc mesenteroides*. **Gaffky tetragenus**, Saccardo. See *Microc. tetragenus*, Gaffky. **Gas-forming Bacillus**. See *B. gasiformans*, Eisenberg. **Ginger-beer Plant**, Marshall Ward. Forms jelly-like, semitransparent, yellowish white, brain-like masses at the bottom of the fermentation; resembles Caucasian kephir grains; it is a symbiotic association of *Saccharomyces pyrabum* and of *Bact. vermiforme*. **Glacier Bacillus**. See *B. fluorescens nivalis*, Schmalek. **Gliococcus**. A micrococcus with a slimy capsule. **Golden Staphylococcus**. See *S. pyogenes aureus*, Ogston, Becker. **Gray-white Micrococcus**, Bumm. See *Dip. albidus amplius*, Bumm. **Hæmatococcus bovis**, Babes, Zimmermann. Obtained from the blood and viscera of cattle dead of an epidemic infectious disease characterized by hemoglobinuria (in Rumania). *aer.*, *jacuans*, *nliq.*, *pg.* **Hay Bacillus**. See *B. subtilis*, Ehrenberg. **Helicobacterium aerogenes**, Miller. See *B.*

aerogenes, III. Miller. *Helicobacterium klebsii*, Escherich. Found in the intestine of guinea-pigs. pleom. *Helicomonas*, Klebs. *Syphilis fungis*. Cf. *B. syphilidis*, Lustgarten. *Hormiscium cerevisiae*, Bonard, *Hormiscium vini*, *Hormiscium vini et cerevisiae*, Bonard. See *Saccharomyces myo-*
arum. Hueppe's *Bacillus of Butyric-acid Fermentation*. See *B. butyricus*, Hueppe. *Hydrocrocis vandelli*, Meneghi. See *Beggiatia alba*, Trevisan. *Hypothrix kühniana*. See *Crenothrix kühniana*. *Influenza Bacillus*. See *B. of Influenza*, Pfeiffer. *Iodococcus vaginatus*, Müller. Found in unclean mouths, gives peculiar reaction with iodine, the sheath being stained yellow, the coat dark blue. *Koch's Bacillus*, K.'s *Comma Bacillus*, *Comma Bacillus*. See *sp. cholerae asiatica*, Koch. *Lanceolate Coccus*, *Lancet-shaped Micrococcus*, *Tal-*
anion. See *B. septicus putigenus*, Flügge. *Lepra Bacillus*. See *B. lepra*, Hansen. *Leptonema niveum*. See *Beggiatia nivea*, Rabenhorst. *Leptothrix buccalis*, Robin. Syn. *Leptothrix gigantea*, Miller; *Leptothrix pulmonalis*; *Ramussenia buccalis*, Saccardo. Found in the mouth of man and animals. Falsely considered the cause of dental caries. *Leptothrix buccalis* of Vignal. See *B. buccalis* var. Vignal. *Leptothrix epidermidis*. Syn. *Bacillus epidermidis*, Bizzozzi. *Microsporon minutissimum*, Burchardt. Found on the epidermis between the toes, and held by Bizzozzi to be nonpathogenic, but by Hock to be the cause of erythrasma. *Leptothrix gigantea*, Miller. Found on the teeth of dogs, sheep, cattle, and other animals affected with pyorrhea alveolaris. Some consider it identical with *Leptothrix buccalis*, Robin. *Leptothrix hyalina*, Reinsch. Found on marine algae. *Leptothrix inornata*, Miller. See *Leptothrix buccalis*, Robin. *Leptothrix kühniana*. See *Crenothrix kühniana*, Saccardo. *Leptothrix lacrimalis*. See *Cladothrix faestleri*, Cohn. *Leptothrix lanugo*, Kützing. Found on marine algae near Heligoland. *Leptothrix maxima buccalis*, Miller. See *B. buccalis maximus*, Miller. *Leptothrix muralis*, Kützing. See *Leptothrix parasitica*. *Leptothrix natans*. See *Sphaeromys natans*, Saccardo. *Leptothrix ochracea*, Kützing. Syn. *Detonella*
ochrea, Saccardo; *Cladothrix dichotoma*, Lept. According to Zopf, this represents filaments of cladotrix stained with iron oxid. *Leptothrix of Puerperal Fever*, *Leptothrix puerperalis*, Fetz. See *B. puerperalis*, Engelmann and Spidemann. *Leptothrix parasitica*, Kützing. Parasitic on fresh-water algae. *Leptothrix pulmonalis*. See *Leptothrix*
var., Robin. *Leptothrix pusilla*, Rabenhorst. Found on fresh water algae, also in the mouth, Klebs. *Leptothrix symplacoides*, Fetz. Found on marine algae. *Leptothrix vaginalis*. Found in the vagina of animals and women. *Leptothrix variabilis*, Saccardo. Found in saliva of healthy persons.

Leuconostoc mesenteroides, Van Tieghem. Syn. *Ascacoccus mesenteroides*, Cienkowski; *Frog-spawn bacterium of sugar-factories*; *Frog-spawn fungus*. A source of great loss to the manufacturers of beet-sugar, frequently and rapidly converting large quantities of the beet-juice into a mucilaginelatinous mass. *Liborius' Bacillus of Butyric-acid Fermentation*. See *B. butyricus*, Prazmowski. *Lissophyton suspectum*, Hallier. See *B. lyssa*, Pasteur. *Löffler's Bacillus*. See *B. diphtheria*, Klebs and Löffler. *Melunella flexuosa*, Borg. See *Sp. rugula*, Müller. *Merismopædia chondroidea*, With, *Merismopædia glauca*. See *Sarcina renis*, Hepworth. *Merismopædia goodsirii*. See *Sarcina ventriculi*, Goodsir. *Merismopædia hyalina*, Kützing. See *Sarcina hyalina*, Kützing. *Merismopædia litoralis*, Rabenhorst. See *Sarcina litoralis*, Erstedt. *Merismopædia reitenbachii*, Caspary. See *Sarcina reitenbachii*, Caspary. *Merismopædia urinae*, Rabenhorst. See *Sarcina urinae*, Welcker. *Merismopædia ventriculi*, Husem. See *Sarcina ventriculi*, Goodsir. *Merismopædia violacea*, Kützing. See *Sarcina violacea*, Kützing. *Metallacter anthracis*, Trevisan. See *B. anthracis*, Pollender and Davaine. *Metallacter tremulus*, Trevisan. See *B. tremulus*, Koch. *Metallacter ulna*, Trevisan. See *B. ulna*, Cohn. *Micrococcus aceti*. See *B. aceti*, Kützing. *Microc. acidi lactici*, Marpmann. Found in milk; resembles in its action *B. acidi lactici*, Hueppe. aer., nliq., nmot., npg. Cf. *Spharococcus acidi lactici*, Marpmann. *Microc. acidi lactici liquefaciens*, Krüger. Found in butter and cheese. aer., *lucanac.*, liq., nmot. *Microc. aerogenes*, Miller. Found in the intestinal tract of man. aer., liq., nmot., npg. *Microc. agilis*, Ali-Cohen. Found in drinking-water. aer., liq., mot., npg. A motile coccus, provided with a flagellum; described by Menge. Found in water. *Microc. agilis citreus*, Menge. *Microc. (Diplococcus) albicans amplius*, Bumm. Syn. *Neisseria albicans*. Frequently found in the vaginal secretions. aer., liq., npg. *Microc. albicans tardissimus*, Eisenberg, Bumm. Found in the vaginal secretions of puerperal women. aer., *fac-*
anac., nliq., npg. *Microc. (Diplococcus) albicans tardus*, Unna and Tommasoli. Found in eczema. aer., nliq., nmot. *Microc. albus urinae*. See *Microc. urinabius*. *Microc. amylovorus*, Burnill and Arthur. Syn. *Micrococcus of apple-blight*; *Bacterium of pear-blight*. Produces fermentation in saccharine fluids. aer., nliq., mot., pg. (for apple and pear trees). Cf. *B. butyricus*, Prazmowski. *Microc. aquatilis*, Bolton. Found frequently in water. aer., nliq., npg. *Microc. arei*
celsii, Buchner and Sehlen. Syn. *Bacterium decalvans*, Thin. Found on the diseased hairs in alopecia areata. Cf. *B. of Alopecia areata*, Kasauli, and *Microc. of Alopecia areata*, Robinson. *Microc. azo-*
formans, Johne. See *Microc. botryogenes*,

Rabe. **Microc. aurantiacus**, Cohn. Syn., *Pediococcus aurantiacus*. Found in water. aer., nliq., chg. (orange-yellow), npg. **Microc. biskrae**. See *Microc. of Heydenreich*. **Microc. blennorrhoeus**. See *Microc. gonorrhoeae*, Neisser. **Microc. bombycis**, Cohn, Béchamp. Syn., *Streptococcus bombycis*, Béchamp. Found in the intestinal tract of silkworms and other *Lepidoptera* dead of the epidemic disease known in France as *la flacherie*; etiologic relation demonstrated by Pasteur. **Microc. botryogenes**, Bollinger, Rabe. Syn., *Bollingeria equi*, Saccardo; *Ascococcus johnei*, Cohn, *Micrococcus ascoformans*, John, *Microc. of mykodesmoids of the horse*. Found in colonies in the connective tissue of horses affected with "mykodesmoids." aer., liq., pg. **Microc. candicans**, Flügge. Found abundantly in air and water. aer., nliq., npg. **Microc. candidus**, Cohn. Found in water. aer., nliq., npg. **Microc. capillorum**. Found on the scalp and said to alter the color of the hair. aer., chg. (reddish-yellow). **Microc. carneus**, Zimmermann. Found in water. aer., nliq., chg. (red to violet), npg. **Microc. cerasinus siccus**, List. aer., nliq., chg. (cherry-red), npg. **Microc. cereus albus**, Passet. Syn., *Staphylococcus cereus albus*, Passet. Found in the pus of acute abscesses, and by Tils in hydrant-water (Freiburg). aer., nliq., npg. **Microc. cereus aureus**, Schröter and Winkler. Syn., *Staphylococcus cereus aureus*, S. and W. Found in the thin secretions of coryza. aer., nliq., chg. (orange-red), npg. **Microc. cereus flavus**, Passet. Syn., *Staphylococcus cereus flavus*, Passet; *Staphylococcus passetii*. Found in an acute abscess. aer., nliq., chg. (lemon-yellow), npg. **Microc. chlorinus**. Occurs in zooglea masses. aer., chg. (greenish-yellow), npg. **Microc. cholerae gallinarum**, Pasteur. See *B. septicaemia hemorrhagica*, Sternberg. **Microc. cinnabareus**, Flügge. Syn., *Streptococcus cinnabareus*, Flügge. Found in air and water. aer., nliq., chg. (reddish-brown), npg. **Microc. citreus**, List. Syn., *Staphylococcus citreus*, List. Found in water, also by Lannelongue and Ashard in the seat of an old osteomyelitis. aer., nliq., chg. (pale-yellow), npg. **Microc. citreus conglomeratus**, Bumm. See *Dip. citreus conglomeratus*, Bumm. **Microc. concentricus**, Zimmermann. Found in water. aer., nliq., sap., npg. **Microc. conglomeratus**, Weichselbaum. Syn., *Neisseria conglomerata*, W. **Microc. coronatus**, Flügge. Syn., *Streptococcus coronatus*, Flügge. Found in the air. aer., liq., npg. **Microc. cremoides**, Zimmermann. Found in water. aer., liq., chg. (yellowish-white), npg. **Microc. crepusculum**, Cohn. See *B. termo*, Ehrenberg and Du-jardin. **Microc. cumulatus tenuis**, von Besser. Found in abundance in the nasal mucus of man. aer., lacanaer., nliq., npg. **Microc. cyaneus**, Schröter. Obtained from the air on boiled potatoes. aer., chg. (cobalt blue, altered to carmin by acids, restored

by alkalis). **Microc. decalvans**, Schröter. Syn., *Bacterium decalvans*, Saccardo. Cf. *P. of Alopecia areata*, Kasauli; *Microc. areolatus*, Buchner and Sehlen; *Microc. of Alopecia areata*, Robinson. **Microc. diffusus**, Schröter. Found in the air, dust, and excrement; common. aer., nliq., chg. (pale green, with a greenish fluorescence; not oxidized to acids). Resembles *B. fluorescens putidus* Flügge. **Microc. diphtheriticus**, Oertel. Cohn, Löffler. Syn., *Streptococcus diphtheriae*, Löffler. Found in the false membranes and in the tissues of diphtheria patients, Cornil identifies this with *Microc. pyogenes*, Rosenbach. aer., nliq., pg. **Microc. doyenii**. See *Microc. urinae albae*, Doyen. **Microc. endocarditicus**, Syn., *Streptococcus endocarditicus*. **Microc. endocarditidis rugatus**, Weichselbaum. Found in a case of ulcerative endocarditis. aer., nliq., pg. **Microc. erysipelatis**, **Microc. erysipelatos**, **Microc. erysipelatosus**, Fehleisen. See *Microc. pyogenes*, Rosenbach. **Microc. fermenti**. See *Microc. viniferda*. **Microc. fervidus**, Adametz. Found in water. aer., liq., npg. **Microc. fickii**. Found in healthy and diseased eyes. **Microc. finlayensis**, Sternberg. Obtained from the viscera of a yellow-fever cadaver. aer., liq., chg. (pale yellow), npg. **Microc. flavus**. See *Microc. flavus liquefaciens*, Flügge. **Microc. flavus desidens**, Flügge. Found in air and water. aer., liq., chg. (yellowish brown), npg. **Microc. flavus liquefaciens**, Flügge. Syn., *Micrococcus flavus*, *Micrococcus liquefaciens*. Found in air and water. aer., liq., chg. (yellow), npg. **Microc. flavus tardigradus**, Flügge. Syn., *Micrococcus tardigradus*. Found in the air and water. aer., nliq., chg. (dark olive-green), npg. **Microc. fetidus**, Klamann, Rosenbach. Found in the posterior nares of man. aer., liq., npg. **Microc. freudenreichii**, Guillebeau. One of the two forms found by Guillebeau to produce ripeness in milk. aer., liq., npg. Cf. *Bact. term*, Guillebeau. **Microc. friedländeri**. See *B. pneumoniae friedländeri*. **Microc. fulvus**, Cohn. Syn., *Staphylococcus fulvus*. Found in horse and rabbit dung. aer., nmot., nliq., chg. (rose), npg. **Microc. fuscus**, Mascha. Found in water. aer., nmot., liq., chg. (sepia-brown), npg. **Microc. gallicidus**. See *B. septicaemia hemorrhagica*, Sternberg. **Microc. gelatinosus**. Found in milk, which it causes to coagulate at about 22° C. **Microc. gingivae pyogenes**, Miller. Found in the mouth of a man affected with alveolar abscess. aer., lacanaer., nliq., pg. **Microc. gonorrhoeae**, Neisser. Syn., *Micrococcus blennorrhoeae*; *Neisseria gonorrhoeae*, *Micrococcus gonococcus*. Found in gonorrheal pus. aer. No growth on ordinary gelatin. has been grown on acid gelatin and human blood-serum. pg. **Microc. griseus**, Winter. See *Bact. griseum*, Warming. **Microc. hematodes**, Babes. Syn., *Micrococcus of red sweat*. Found in foul sweat from the

anila. aer., chg (red), npg. **Microc. havaniensis**, Sternberg. Syn., *Bacillus karmentum*, Sternberg. Obtained by Sternberg in his investigation of yellow fever. aer., nliq., chg. (blood-red). Only found in the presence of free oxygen. **Microc. imetrophus**, Trevisan. See *B. prodigiosus*, Ehrenberg. **Microc. indicus**, Koch. See *B. indicus*, Koch. **Microc. influenzae**, Letzerich. Syn., *Streptococcus referti*; *Micrococcus of influenza*, Soderb. See *B. of Influenza*, Pfeiffer. **Microc. insectorum**, Burri. Syn., *Streptococcus insectorum*. Found in the cecal appendages or pancreatic organs of the chinch-bug (*Blattus leucopterus*, Say) and the higher Hemiptera. Especially recommended as a remedy for the chinch-bug and for *Halticus minutus*, so damaging to the peanut. **Microc. intracellularis meningitidis**, Neumann and Schaffer. Syn., *Micrococcus meningitidis*, Neumann; *Neisseria weichselbaumii*. Found in the tissues of the brain and spinal cord in cases of cerebrospinal meningitis. **Microc. lacteus faviformis**, Bumm. Syn., *Neisseria lactea*. Frequently found in normal vaginal mucus. aer., nliq., npg. **Microc. lactis viscosus**, Conn. Syn., *Micrococcus of bitter milk*, Conn. The cause of the bitter taste of milk and cream. aer., liq., nliq., npg. **Microc. liquefaciens**. See *Microc. florum liquefaciens*, Flügge. **Microc. liquefaciens**, von Besser. Found in the nasal secretions of healthy persons. aer., nliq., npg. **Microc. loewenbergi**. Syn., *Micrococcus of ozena*. Found in the secretions in cases of ozena. aer., liq., pg. **Microc. luteus**, Cohn. Found in water, the superficial soil, dust of bedrooms, animal foods, etc. aer., nliq., chg (yellow), npg. **Microc. lysæ**, Neisser. Syn., *Neisseria lysæ*; *Micrococcus of hydrophobia*; *Microc. of rabies*, Fol. Found in the spinal cord of rabid animals. Cornil and Babes throw doubt on the culture experiments of Fol. **Microc. major**, Dönn. See *Microc. urinarum*, Dönn. **Microc. manfredii**. Syn., *Streptococcus manfredi*; *Micrococcus of frog-ovary granuloma formation*. Found in the stomach in two cases of pneumonia following measles. aer., nliq., pg. **Microc. mastotubus**, Nocard, Mollereau, and Kitt. Syn., *Streptococcus nocardii*; *Micrococcus of bovine mastitis*, Kitt. *Micrococcus of mastitis in cows*; *Streptococcus of mastitis in cows*; *Micrococcus of contagious mastitis*; *Micrococcus of gangrenous mastitis in sheep*, Nocard. Obtained from the milk of cows and sheep affected with mastitis. aer., nliq., npg. The form found in cattle is said to be non-liquefactive, that of sheep liquefies both gelatin and blood serum. Sternberg recognizes three distinct forms producing mastitis. **Microc. meningitidis**, Neumann. See *Microc. intracellularis meningitidis*, Neumann and Schaffer. **Microc. meningitidis purulentæ**, Heydenreich. **Microc. morbillosus**. See *Mucor of Meuser*. **Microc. nasalis**, Hack.

Found in the nasopharyngeal space. aer., mot., nliq., npg. **Microc. nitrificans**, Van Tieghem. Found in water. aer., npg. **Microc. oblongus**. See *Bact. oblongum*, Bontoux. **Microc. ochroleucus**, Prove and Lagrain. Syn., *Streptococcus ochroleucus*. Found in urine. aer., nliq., chg. (sulfur yellow), npg. **Microc. of Acute Infectious Osteomyelitis**. See *Microc. pyogenes aureus*, Rosenbach. **Microc. of Alopecia areata**, von Schlen, Robinson, Vahlhard, and Vincent. Found on the hairs from the diseased patches. aer., liq., pg. Cf. *B. of Alopecia areata* and *Microc. arei celsii*. **Microc. of Ammoniacal Urine**. See *Microc. ureæ*, Cohn, and *Microc. ureæ liquefaciens*, Flügge. **Microc. of Apple-blight**. See *B. burgensis*, Botkin, Prazmowski, etc. **Microc. of Beriberi**, Lacerda. Syn., *Bacillus beribericus*, Lacerda; *Micrococcus of biskra button*. See *Microc. of Heydenreich*. **Microc. of Bitter Milk**. See *Microc. lactis viscosus*, Conn. **Microc. of Bovine Mastitis**, Kitt. See *Microc. mastotubus*, Nocard, Mollereau, and Kitt. **Microc. of Bovine Pneumonia**, Poels and Nolen. Syn., *Micrococcus of cattle pneumonia*. Found in the lungs of cattle suffering from infectious pleuropneumonia. aer., nliq., pg. **Microc. of Bronchitis**, Pichini. Three distinct forms. aer., liq. Cf. *B. of Bronchitis*. **Microc. of Cerebrospinal Meningitis**. See *Microc. intracellularis meningitidis*, Neumann and Schaffer. **Microc. of Chicken-pox**. See *S. viridis flavescens*, Gottmann. **Microc. of Contagious Mammitis**. See *Microc. mastotubus*, Nocard, Mollereau, and Kitt. **Microc. of Cow-pox**. See *Microc. variolæ et vaccinae*, Cohn. **Microc. of Dantec**. Obtained from salted codfish which had turned red. aer., nliq., chg (yellow, changing to deep red), npg. **Microc. of Demme**. See *Dip. of Pemphigus acutus*, Demme. **Microc. of Dengue**, McLaughlin. See *Scheutia laughlini*. **Microc. of Dental Caries**. See *Leptothrix vulvaris*, Robin; *Leptothrix gigantea*, Miller; *Mittler's Epsilon Bacillus*, and *Sp. dentium*, Arnt. **Microc. of Diphtheria**. See *Streptococcus antitoxinorum*, Löffler. **Microc. of Disse and Taguchi**. Obtained from the blood, the secretions of broad condyloma, as well as the primary indurations of syphilis. Etiologic relations not confirmed. **Microc. of Drinking-water**. See *Microc. aquatilis*, Bolton. **Microc. of Egyptian Ophthalmia**. See *Microc. of Trachoma*, Sattler and Michel. **Microc. of Endocarditis**. See *Str. endocarditis* and *Microc. endocarditis rugatus*, Weichselbaum. **Microc. of Erysipelas**, Feblisen. See *Microc. pyogenes*, Rosenbach. **Microc. of Fischel, II**. Found in the blood in two cases of influenza. aer., nliq., pg. **Microc. of Foot-and-mouth Disease**. Syn., *Streptococcus of Ercema epizootica*, Schottelius; *Streptococcus athynola*, Hallier. Found in the vesicular eruptions about the mouth and feet of cattle,

pigs, and sheep. Communicable to man. aer., *facanaer.* Pathogenesis not fully settled. Cf. *B. of Ulcerative Stomatitis of Cattle.* **Microc. of Forbes.** Found in the bodies of larvae of the cabbage-butterfly, *Pieris rapa*, affected with an infectious disease. **Microc. of Fowl Cholera.** See *B. septicæmia hæmorrhagica*, Sternberg. **Microc. of Freire.** See *Cryptococcus xanthogenicus*. **Microc. of Furuncle.** See *Microc. pyogenes aureus*. **Microc. of Gangrenous Mastitis in Sheep.** **Microc. of Gangrenous Mammitis.** See *Microc. mastobius*, Nocard, Mollereau, and Kitt. **Microc. of Gonorrhea.** See *Microc. gonorrhæa*, Neisser. **Microc. of Gray Parrot Disease.** See *Microc. psittaci*, Eberth and Wolf. **M. of Hepatitis enzootica of Hogs.** See *Microc. porcellorum*. **Microc. of Heydenreich.** Syn., *Streptococcus biskra*; *Microc. of biskra button*. Found in the tumors and ulcers characteristic of Aleppo boil or biskra button. aer., liq., pg. **Microc. of Hydrophobia.** See *Microc. lyssa*, Pasteur. **Microc. of Infectious Osteomyelitis.** See *Microc. pyogenes aureus*, Rosenbach, and *Microc. osteomyelitis*, Becker and Kraske. **Microc. of Influenza.** Seifert. Syn., *Streptococcus seiferti*. See *Microc. influenza*, Letzerich. **Microc. of Kirchner.** Obtained from the sputum of patients suffering with influenza. aer., pg. **Microc. of Manfredi.** See *Microc. manfredii*. **Microc. of Mastitis.** Kitt. See *Micrococcus mastobius*, Nocard and Mollereau. **Microc. of Measles.** Klebs and Keating. Syn., *Streptococcus morbillosus*; *Micrococcus morbillosus*. Found in the blood and exudates of persons afflicted with measles. Flagge considers it unimportant. **Microc. of Mykodesmoids of the Horse.** See *Microc. botryogenes*, Rabe. **Microc. of Osteomyelitis.** See *Microc. pyogenes aureus*, Ogston. **Microc. of Ozena.** See *Microc. lewenbergii*. **Microc. of Pearlbright.** Burrill. See *B. butyricus*, Prazmowski. **Microc. of Pébrine.** See *Nosema bombycis*, Nägeli. **Microc. of Pneumonia.** See *B. pneumoniae friedlanderii* and *Microc. septicus*, Flugge. **Microc. of Progressive Abscess Formation in Rabbits.** Koch. Found in the exudates of rabbits inoculated with putrefying blood. pg. **Microc. of Progressive Granuloma Formation.** See *Microc. manfredii*. **Microc. of Progressive Tissue Necrosis in Mice.** Koch. Found in the exudates of mice inoculated with putrid blood. pg. **Microc. of Pyemia in Rabbits.** Koch. Found in the exudates of rabbits inoculated with putrefying flesh infusion. pg. **Microc. of Rabies.** Fol. See *Microc. lyssa*, Neisser. **Microc. of Red Sweat.** See *Microc. hamatodes*, Babes. **Microc. of S. Le M. Moore.** See *B. latidus*, Liborius. **Microc. of Salvioli.** See *B. septicus sputigenus*, Flugge. **Microc. of Scarlatina.** Pohl and Pinus. See *Microc. scarlatinae*. **Microc. of Septicæmia in Rabbits.** Koch. Syn., *Streptococcus kochii*. Found in the ex-

udates of rabbits inoculated with putrefying flesh infusion. pg. **Microc. of Smallpox.** See *Microc. variola et vaccina*, Cohn. **Microc. of Sputum Septicæmia.** See *B. septicus sputigenus*, Flugge. **Microc. of Swine Plague or Hog Cholera.** See *B. of Swine Plague*, Reitsch and Jobert, and *B. ex pneumocenteride suis*, Klein. **Microc. of Syphilis.** Haberkorn and Marcus. Found in the white blood-corpuscles in cases of syphilis. aer., osc., chg. (red). **Microc. of Trachoma.** Sattler and Michel. Syn., *Neisseria rebellis*; *Micrococcus of Egyptian ophthalmia*. Found in the secretions and nodules of the conjunctiva in cases of trachoma. aer., nliq., pg. Researches of Baumgarten and Kartulis go to show that this form has no etiologic relation to the diseases mentioned. **Microc. of Vaccinia.** See *Microc. variola et vaccina*, Cohn. **Microc. of Whooping-cough.** Letzerich. Found in the sputum in cases of whooping-cough. See *B. tussis convulsiva*, Afanassiew. **Microc. olearius.** See *Microc. urinae flavus olearius*. **Microc. osteomyelitis, Becker. Syn., *Micrococcus of acute infectious osteomyelitis*. See *Microc. pyogenes aureus*, Rosenbach. **Microc. ovalis.** Escherich. Found in the meconium and feces of infants. aer., *facanaer.*, nliq., npg. **Microc. ovatus.** See *Nosema bombycis*. **Microc. pasteurii.** Sternberg. See *B. septicus sputigenus*, Flugge. **Microc. petechialis.** Neisser. Syn., *Neisseria petechialis*. **Microc. psittaci.** Ludwig. See *Photobacterium psittaci*, Ludwig. **Microc. phosphoreus.** Cohn. See *B. phosphoreus*, Cohn. **Microc. plumosus.** Brautigam. Found in water. aer., nliq., npg. **Microc. pneumoniae crouposæ.** Sternberg. See *B. septicus sputigenus*, Flugge. **Microc. pneumoniae infectiosæ.** Friedlander. See *B. pneumoniae friedlanderii*. **Microc. porcellorum.** Syn., *Micrococcus of hepatitis enzootica of hogs*. Found in hogs affected with hepatitis (Russia). aer., liq., pg. **Microc. prodigiosus.** Cohn. See *B. prodigiosus*, Ehrenberg. **Microc. pseudocyanæus.** Cohn. Found in boiled potatoes exposed to air. aer., chg. (verdigris green), npg. **Microc. psittaci.** Wolf. Syn., *Streptococcus perniciosus psittacorum*, Eberth and Wolf; *Micrococcus of gray parrot disease*. The cause of a disease of parrots resembling fowl cholera; fatal to many of the parrots imported from Guinea into Europe. **Microc. putridus.** A form emitting a fetid gas from gelatin when mixed with iodoform. **Microc. pyocyaneus.** Gessard. See *B. pyocyaneus* a. Gessard. **Microc. pyogenes.** Rosenbach. Syn., *Streptococcus pyogenes*; *Streptococcus erysipelatis*; *Streptococcus longus*, von Lingelsheim; *Micrococcus erysipelatis (-los) (-lusus)*; *Streptococcus of pus*; *Micrococcus of erysipelas*, Fehleisen. Found in the pus of acute abscesses and in the skin in cases of erysipelas. aer., *facanaer.*, nliq., pg. **Microc. pyogenes albus.** Rosenbach. Syn., *Staphylococcus***

pyogenes albus, Passet; *Staphylococcus epidermidis albus*, Welch. Frequently found in company with *Microc. pyogenes aureus*. The cause of "stitch abscesses." aer., liq., pg. **Microc. pyogenes aureus**, Rosenbach. Syn., *Staphylococcus pyogenes aureus*; *Micrococcus of infectious osteomyelitis*. The species most frequently found in pus. Obtained from various suppurations, boils, anthrax, osteomyelitis, ulcerative endocarditis, phlegmon, etc. aer., Jacanaer., liq., chg. (brilliant golden yellow), pg. **Microc. pyogenes citreus**, Passet; *Micrococcus pyogenes flavus*. Found associated with the two preceding forms, in acute abscesses. aer., Jacanaer., liq., chg. (lemon yellow), pg. Held by some to be but a variety of *Microc. pyogenes aureus*. **Microc. pyogenes tenuis**, Rosenbach. Syn., *Micrococcus rosenbachii*. Found in pus. Culture thin, varnish-like; pathogenesis not settled. Cf. *Microc. septicus*, Flügge. **Microc. pyogenes ureæ flavus**, Röring. Found in purulent urine. Cf. *Dip. pyogenes urea*, Röring; *Dip. urea trifolius*, Röring. **Microc. pyosepticus**, Richet. Syn., *Staphylococcus pyosepticus*, Horieourt and Richet. Obtained from a carcinomatous tumor in a dog. aer., liq., pg.; resembles *Microc. pyogenes albus*, Rosenbach. **Microc. radiatus**, Flügge. Syn., *Streptococcus radiatus*, Flügge. Found in air and water. aer., liq., npg. **Microc. rheum-arthritis**, Kussmaul. See *B. rheumathritidis*, Kussmaul. **Microc. rosenbachii**. See *Microc. pyogenes tenuis*, Rosenbach. **Microc. rosetaceus**, Zimmermann. Found in water. aer., nliq., npg. **Microc. roseus**, Eisenberg. Found in the sputum of a person suffering from influenza. aer., Jacanaer., liq., chg. (pink), npg. **Microc. roseus**, Bumm. See *Dip. roseus*, Bumm. **Microc. roseus**, Maggiora, Flügge. Syn., *Neisseria rosea*. Found on the skin. aer., npg. **Microc. salivarius pyogenes**, Biondi. Syn., *Staphylococcus salivarius pyogenes*, Biondi. Found in an abscess produced in a guinea-pig by inoculation with saliva from a child affected with anginous scarlatina. aer., liq., pg. **Microc. salivarius septicus**, Biondi. Obtained from animals after inoculation with saliva from a person with puerperal septicemia. aer., nliq., pg. Cf. *Microc. sialosepticus*. **Microc. scarlatinae**, Pohl and Pincus. See *Microc. scarlatinus*. **Microc. scarlatinus**, Coze and Feltz. Syn., *Perroneitoea scarlatinae*, *Micrococcus of scarlatina*, Pohl and Pincus. Found in the blood, on the desquamating skin, and on the palate of scarlatina patients; resembles *Microc. septicus*, Flügge. Cf. *Str. rubiginosus*, Edington, and *B. of Scarlatina*, Croucke. **Microc. septicus**, Cohn. See *B. septicemia hemorrhagica*, Sternberg. **Microc. septicus**, Flügge; Syn., *Streptococcus septicus*, Flügge. *Staphylococcus pyogenes*, Saccardo, *Streptococcus pneumoniae*, Weichselbaum. Found in sial. aer., nliq., pg. **Microc.**

septopyæmicus. Syn., *Streptococcus septopyæmicus*. Obtained from cases of phlegmonous angina and erysipelas of the larynx. aer., nliq., pg. Resembles *Microc. septicus*, Flügge. **Microc. sialosepticus**. Found in the saliva in a case of puerperal septicemia. aer., nliq., pg. Cf. *Microc. salivarius septicus*, Biondi. **Microc. subflavus**, Flügge, Neisser. Syn., *Neisseria subflava*; *Yellowish-white micrococcus or diplococcus*, Bumm. Obtained from the lochia of puerperal women and from vaginal mucus. aer., liq., pg. **Microc. suis**, Burrill. See *B. tardigradus*. **Microc. tardigradus**. See *Microc. flavus tardigradus*, Flügge. **Microc. tetragenus**, Gaffky. Syn., *Gaffky tetragenus*, Saccardo. Obtained from a cavity in the lung of a person with pulmonary tuberculosis. aer., Jacanaer., nliq., pg. **Microc. tetragenus**, Marotta. Constantly found in smallpox vesicles and pustules. aer., liq., pg. Produces vaccinia in calves. **Microc. tetragenus febris flavæ**, Finlay. Syn., *Micrococcus tetragenus versatilis*, Sternberg. Obtained from the excrement of mosquitoes which had drawn blood from yellow-fever patients; also from the surface of the body in the same disease (Sternberg). aer., liq., chg. (lemon yellow), npg. **Microc. tetragenus mobilis ventriculi**, Mendosa. Found in the contents of the stomach of man. aer., nliq., mol., npg. **Microc. tetragenus subflavus**, von Besser. Found in nasal mucus. aer., Jacanaer. (no growth in gelatin), npg. **Microc. tetragenus versatilis**, Sternberg. See *Microc. tetragenus febris flavæ*, Finlay. **Microc. toxicatus**, Purill. Syn., *Streptococcus toxicatus*, Burrill. Found in the poison of the poison-ivy, *Rhus toxicodendron*. **Microc. ulceris molis**. See *B. of Chaneroid*, Ducey. **Microc. ureæ**, Cohn. Syn., *Bacterium ureæ*, Cohn; *Streptococcus ureæ*; *Torula ureæ*, Pasteur. Found in urine, in which it produces ammoniacal fermentation. **Microc. ureæ**, Pasteur and Van Tieghem. Found in the air and in ammoniacal urine. aer., Jacanaer., nliq., npg. Possibly the last two forms and *Bact. ureæ*, Jaksch, are identical. **Microc. ureæ liquefaciens**, Flügge. Syn., *Streptococcus atthebus*. Found in ammoniacal urine. aer., Jacanaer., liq., npg. **Microc. urinæ albus olearius**, Doyen. Syn., *Micrococcus doyenii*. Found under the same conditions as the last form. aer., liq. **Microc. urinæ flavus olearius**, Doyen. Syn., *Micrococcus olearius*. Found in the urine in cystitis, with the two preceding forms. aer., liq., chg. (golden yellow). **Microc. urinæ major**, Doyen. Syn., *Micrococcus major*. Found in same conditions as the three preceding forms. **Microc. urinalbus**. Syn., *Micrococcus albus urinæ*. Found in the urine in cases of pyelonephritis and cystitis. **Microc. variolæ**, *Microc. variolæ et vaccinæ*, Cohn. Syn., *Streptococcus variolæ*. Obtained by

Cohn, Guttman, Marotta, Hlava, and others from the lymph of vaccine pustules in man and animals, from variola papules, and from the blood of persons affected with variola. **Microc. versatilis.** Found on the skin of healthy persons, also in the liver, spleen, and kidneys after death from yellow fever. Not sufficiently studied. **Microc. versicolor,** Flügge. Found in water. *aer., nliq., chg.* (yellow), *npg.* **Microc. viniperda.** *Syn., Micrococcus fermenti.* Found in spoiled wine. **Microc. violaceus,** Cohn. Found in water. *aer., nliq., chg.* (violet), *npg.* **Microc. viridis flavescens,** Guttman. Found in the lymph of a variella pustule. *aer., nliq., npg.* **Microc. viscosus,** Pasteur. Found in the disease of wine known as *la graisse.* **Microc. viticulosus,** Flügge, Katz. Found in air and water. *aer., jactuer., nliq., npg.* **Microc. xanthogenicus.** *Syn., Cryptococcus xanthogenicus,* Pasteur. Found in cases of yellow fever. **Microhaloa rosea,** Kützing. See *Beggiatoa roseopersicina*, Zopf. **Microsporon minutissimum,** Burchard. See *B. epidermisi,* Bizzozzo. **Microsporon septicum,** Klops. See *B. septicum* *honor-rhagiae,* Sternberg. **Microzyma bombycis,** Béchamp. See *Microc. bombycis,* Cohn, Beck. **Milk-white Micrococcus,** Bunn. See *Microc. albus tardissimus,* Eisenberg. **Milk Yeast.** See *Saccharomyces lactis,* Adametz. **Miller's Bacillus.** See *B. dentatus viridans,* Miller, and *Sp. of Miller.* **Miller's Bacillus of the Intestine.** See *B. aerogenes*, I, II, III, Miller. **Miller's Epsilon Bacillus.** See *Epsilon Bacillus,* Miller. **Milzbrandbacillus.** See *B. anthracis*, Pollender and Davaine. **Monas prodigiosa,** Ehrenberg. See *B. prodigiosus,* Ehrenberg. **Monas termo,** Mäller. See *B. termo,* Dujardin. **Mycoderma aceti.** See *B. aceti,* Kützing. **Mycoderma cerevisiae,** Treul. See *Saccharomyces mycoderma,* Reuss. **Mycoderma vini,** Pasteur. See *Saccharomyces mycoderma,* Reuss. **Myconostoc gregarium,** Cohn. A gaseous or crumpled condition of a filamentous schizomycete, perhaps *Cladotrix dichotoma*, Cohn. **Neisseria albicans.** See *Microc. albus amplus,* Bunn. **Neisseria citrea.** See *Microc. citreus conglomeratus,* Bunn. **Neisseria conglomerata.** See *Microc. conglomeratus,* W. albaum. **Neisseria gonorrhoeae.** See *Microc. gonorrhoeae,* Neisser. **Neisseria lactea.** See *Microc. lacteus laniformis,* Bunn. **Neisseria lysae.** See *Microc. lysae,* Neisser. **Neisseria petechialis.** See *Microc. petechialis,* Neisser. **Neisseria rebellis.** See *Microc. of Trichina,* Sauter. **Neisseria rosea.** See *Microc. roseus,* Magdon. **Neisseria subflava.** See *Microc. subflavus,* Flügge. **Neisseria tardissima.** See *Microc. albus tardissimus,* Bunn. **Neisseria weichselbaumii.** See *Microc. intercellularis meningitidis,* Neumann and Schaller. **Neisseria winkleri.** See *B. oenotherae,* Laseca. **Nitrifying Bacillus of Winogradsky,** **Nitromonas** of Wino-

gradsky. Found in the soil, no growth on ordinary culture-mediums, one of the very few nitrifying ferments. **Nosema bombycis,** Nageli. *Syn., Micrococcus inanis.* It is found in the organs and the blood of silkworms suffering from *pébrine.* **Ophidomonas jenensis,** Ophidomonas sanguinea, Ehrenberg. See *Beggiatoa roseopersicina*, Zopf. **Orchiococcus.** See *Prop. of Orchid.* Hugoueney and Fraud. **Oscillaria alba,** Vaucher. See *Beggiatoa alba,* Trevisan. **Oscillaria arachnoidea,** Agardh. See *Beggiatoa arachnoidea,* Trevisan. **Oscillaria leptomitiformis,** Meneghin. See *Beggiatoa leptomitiformis,* Trevisan. **Oscillaria tigrina.** See *Beggiatoa tigrina,* Rabenhorst. **Oscillaria versatilis,** Kützing. See *Beggiatoa arachnoidea,* Trevisan. **Palmella infusionum,** Ehrenberg. See *B. termo,* Dujardin. **Palmella prodigiosa,** Mont. See *B. prodigiosus,* Ehrenberg. **Palmellina capillorum,** Radlkoffer, Buhl. *Syn., Zoopira capillorum,* Buhl. Found in the epidermis of the head; supposed to affect the color of the hair. **Panhystophyton ovatum.** *Syn., Nosema bombycis.* Passet's Putrefying Bacillus of Pus. See *B. prodigiosus*, Joridis, Passet. **Peach-colored Bacterium,** Lankester. See *Beggiatoa roseopersicina*, Zopf. **Pediococcus acidi lactici,** Lindner. Found in hay infusion and in mash from malt. *aer., jactuer., nliq., npg.* **Pediococcus albus,** Lindner. Found in well water. *aer., liq., npg.* **Pediococcus aurantiacus,** Cohn. See *Microc. aurantiacus*, Cohn. **Pediococcus cerevisiae,** Vanke. *Syn., Sarcina cerevisiae,* Lindner. Found in beer and in the air of breweries. *aer., jactuer., nliq., npg.* **Perroncitoea scarlatinosa.** See *Microc. scarlatina*, Fiala and Pinkus. **Pfeiffer's Bacillus.** See *B. anthracis*, Pfeiffer. **Photobacterium balticum,** Fischer. Found in the waters of the Baltic. *aer., liq., nliq., npg.* **Photobacterium indigenum,** Fischer. **Photobacterium fischeri,** Kutz. Found in the waters of the Baltic. *aer., liq., nliq., npg.* **Photobacterium indicum,** Fischer. See *B. phosphorescens*, Fischer. **Photobacterium luminosum,** Beyerinck. Found on many of the phosphorescent animals, crustaceans, polyps, infusoria, of the North Sea. *aer., liq., nliq., npg.* **Photobacterium pflügeri,** Ludwig. *Syn., Bacterium pflügeri.* **Atrococcus pflügeri.** Found upon butcher's meat and upon market fish. The most phosphorescent of all light-producing bacteria. *aer., liq., nliq., npg.* **Photobacterium phosphorescens,** Fischer. See *B. phosphorescens*, Cohn. **Photobacterium phosphorescens,** Cohn. See *B. phosphorescens*, Cohn. **Pink Bacillus of Spreading Edema,** A. B. Harris. *aer., nliq., nliq., chg.* (pink), *npg.* **Cl. B. edematis malignae** Koch. **Pleurococcus roseopersicina,** Rabenhorst. See *Beggiatoa roseopersicina*, Zopf. **Pneumobacillus friedländeri.** See *B. parvulus*

franklandensis. **Pneumobacillus liquefaciens** *bovis*. See *B. liquefaciens bovis*, Arlo-
ing. **Pneumococcus**, Friedländer's, **Pneu-
monococcus** of Friedländer, Sternberg.
See *B. pneumoniae friedlanderi*. **Potato
Bacillus**. Applied to *B. mesentericus juscus*,
Flügge; *B. mesentericus vulgaris*, Flügge;
B. mesentericus rubrum, Globig. **Prag-
midiothrix multisepta**, Engler. Syn.,
Beggiatoa multisepta. Found in sea-water
upon crustaceans (Kieler Bucht). It is
distinguished from *Beggiatoa* by the absence
of sulfur grains. **Prazmowski's Bacillus**
of Butyric-acid Fermentation. See *B.*
butyricus, Botkin, Prazmowski. **Proteus**
capsulatus septicus, *Proteus hominis*
capsulatus. See *B. hominis capsulatus*,
Banti, Bordoni-Uffreduzzi. **Proteus leth-**
alis. See *B. lethalis*, Babes. **Proteus**
mirabilis. See *B. mirabilis*, Hauser. **Pro-**
teus of Karlinski. See *B. murisepticus*
anomorphus, Karlinski. **Proteus septicus**.
See *B. septicus*, Pasteur. **Proteus sul-**
phureus. See *B. sulphureus*, Lindenborn.
Proteus sulphureus of Holochenikoff,
Proteus vulgaris, Hauser. See *B. vulgaris*,
Hauser. **Proteus zenkeri**. See *B. zenkeri*,
Häuser. **Pseudodiphtheria** **Bacillus**,
Löffler, von Hoffmann, Roux, Yersin, and
Abbt. Found in the mucus from the
pharynx and tonsils of children suffering
from nondiphtheric throat affections. **Pseu-**
dodiplococcus pneumoniae, Bonome. Ob-
tained from the serofibrinous exudate of
a person dead of cerebrospinal meningitis.
aer., *liqf.*, *pg.* Cf. *Microc. meningitidis*,
Neumann, and *B. meningitidis purulenta*,
Neumann. **Rasmussenia buccalis**, Sac-
cardo. See *Leptothrix buccalis*, Robin.
Rauschbrand-bacillus. See *B. chauvii*,
Böttger and Feser. **Red Bacillus of**
Water. See *B. ruber*, Frank and Becker.
Saccharomyces albicans, Robin. Syn.,
Osidium albicans, Robin. The cause of thrush.
Saccharomyces apiculatus, Reess. Occurs
in fermented wine and beer, and, in the hot
seasons, on sweet succulent fruits; in winter,
in the soil beneath the trees that bear these
fruits. **Saccharomyces cerevisiae**, Reess
and Robin. Syn., *Cryptococcus cerevisiae*,
Kützing, *Cryptococcus fermentatum*, Torula
arvensis; *Yeast-plant*. Under this heading
are included a series of different yeasts.
Saccharomyces conglomeratus, Reess. As
the result of Hansen's investigations this
yeast has been discarded by recent writers.
Saccharomyces ellipsoideus, I, II, Han-
sen. A "wild" species of wine ferment.
Saccharomyces exiguus, Hansen. Found
in German yeast; acts toward sugar exactly
as does *Saccharomyces marxianus*. **Sac-**
charomyces glutinis. Syn., *Cryptococcus*
glutinis, Fersen. A pullulating yeast that
bears beautiful rose-colored patches on
cooked potatoes. **Saccharomyces guttu-**
latus, Robin. Syn., *Cryptococcus guttulatus*,
Robin. Winter. Found in the esophagus,

stomach, and intestine of mammals, birds,
and reptiles. The feces of patients suffering
from tunnel anemia or ankylostomiasis fre-
quently contain this species of saccharomy-
ces. **Saccharomyces lactis**, Adametz.
Syn., *Milk-yeast*. Found in milk, of which
it ferments the milk-sugar. **Saccharomy-**
ces marxianus. Found in wine, acts
vigorously on saccharose, inverting and fer-
menting it with great activity, it also acts
on dextrose. **Saccharomyces membrani-**
faciens. Forms a bright yellow, tough scum
on beer-wort; liquefies gelatin, has no fer-
mentative action on ordinary carbohydrates,
and does not invert cane sugar. **Saccharo-**
myces minor, Engel. According to En-
gel, this is the cause of fermentation in bread.
Saccharomyces mycoderma, Reess. Syn.,
Mycoderma mesentericum, Pers; *Mycoderma*
cerevisiae et vini, Desm; *Hermiscium vini*
et cerevisiae, Bonard; *Mycoderma vini*, Pas-
teur; *Mycoderma cerevisiae*, Trecul. Found
on the surface of wine and beer, forming the
so-called "flowers of wine." **Saccharomyces**
pasteurianus, Reess. According to Han-
sen, this represents a group of three forms that
cause changes in beer and wine. **Saccharo-**
myces pyriformis, Ward. Found in the
fermentation of ginger-beer. A yeast which
develops much CO₂, but little alcohol; it
inverts cane-sugar and ferments the products;
does not ferment milk-sugar. *aer.*, *lucifer*.
Saccharomyces ruber, Demme. Found
in milk and cheese, forming red spots in
the latter and red sediment in the former.
liqf. **Saccharomyces vaccinæi**, Pfeiffer.
Found in the lymph of a vaccinia pustule,
nothing is known of its action. **Sarcina**
alba, Eisenberg. Found in air and water.
aer., *liqf.*, *npg.* **Sarcina aurantiaca**. Syn.,
Orange sarcina, Koch. Found in air and
water. *aer.*, *liqf.*, *chg.* (orange yellow), *npg.*
Sarcina aurea, Macé. Found in the pul-
monary exudates of a person dead of a pneu-
monia complicated with purulent pleurisy.
aer., *liqf.*, *chg.* (brilliant golden yellow).
Sarcina botulina, Van den Corput. Found
in cases of poisoning with tainted sausage
(botulism), and believed to be the active
agent. Cf. *B. of Allantiasis*. **Sarcina**
candida, Reinke. Found in the air of
breweries. *aer.*, *liqf.*, *npg.* **Sarcina cere-**
visiae, Lindner. Syn., *Pediococcus cerevisiae*,
Balke. Found in beer and the air of brew-
eries. *aer.*, *lucifer*, *liqf.*, *npg.* **Sarcina**
flava, De Bary. Found in beer. *aer.*,
liqf., *chg.* (yellow), *npg.* **Sarcina fusces-**
cens, Falkenheim. Found in the human
stomach. **Sarcina hyalina**, Kützing. Syn.,
Merismopedia hyalina, Kützing. Found in
swamps. **Sarcina intestinalis**, Zapf. Found
in the intestine of chickens and turkeys,
principally in the cecum. **Sarcina litoralis**,
Erstedt. Syn., *Merismopedia litoralis*, Ra-
benhorst; *Erythroconis litoralis*, Erstedt.
Found in sea-water; forms a thin, reddish
layer between decomposing algae on the

shore. *Sarcina lutea*, Schrüter. Found in the air and in fungus cultures. aer., liq., chg. (yellow), npg. *Sarcina minuta*, De Bary. Occurred spontaneously in a culture of sour milk on a microscopic slide; resembles *Sarcina welckeri*. *Sarcina mobilis*, Maurea. Found in old ascitic fluid. aer., liq., mot., chg. (brick-red). *Sarcina morrhuae*. Obtained from codfish. *Sarcina of the Lungs*. See *Sarcina pulmonum*, Hauser. *Sarcina of the Urine*. See *Sarcina urinae*, Welcker. *Sarcina paludosa*, Schroter. Found in bog-water. *Sarcina pulmonum*, Hauser. Syn., *Sarcina of the lungs*. Found in sputum. aer., nliq., npg. *Sarcina reitenbachii*, Caspary. Syn., *Merismopodia reitenbachii*. Found in fresh water on decaying plants. *Sarcina renis*, Hepworth. Found in the lungs of persons dead of pulmonary tuberculosis. *Sarcina rosea*, Menge. Found in milk and other food-stuffs. Held to be distinct from the form described by Schröter. aer., liq., chg. (rose-red), npg. *Sarcina rosea*, Schröter. Found in the air. aer., liq., chg. (intense red, giving same reaction as the pigment of *Sarcina aurantiaca*), npg. *Sarcina urinae*, Welcker. Syn., *Merismopodia urinae*, Rabenhorst. Found in the bladder; appears to be destitute of zymotic action. *Sarcina ventriculi*, Goodsir. Common in the stomach of man and animals. aer., nliq., npg. *Sarcina welckeri*, Rossmann. Repeatedly found in the human bladder and voided for months at a time in the urine, which is usually abnormally rich in phosphates, the patient retaining good health. *Scheutzia laughlini*. Syn., *Micrococcus of dengue*; *Staphylococcus of dengue*; *Dengue micrococcus*. Found in the blood of patients suffering from dengue. Pathogenetic relations not determined. *Schweine-rothlaufbacillus*. See *B. erysipelas suis*, Koch. *Shiga's Bacillus*. See *B. dysenteriae*, Shiga. *Smegma Bacillus*. See *B. of the Smegma*. *Sphærococcus acidilactici*, Marpmann. Found in fresh cow's milk. aer., nliq., npg. *Sphærotilus natans*, Kützing, Saccardo. Syn., *Leptothrix natans*. Found in running and stagnant water. Old portions yellowish, younger portions colorless. *Spirillum amyliferum*, Van Tieghem. Found in water. Forms granules at certain developmental stages; gives the blue reaction with iodine. Cf. *B. butyricus*, Prazmowski. *Sp. anserum*. Syn., *Spirochæte anserina*, Sakharoff. Found in the blood of geese affected with a fatal form of septicemia due to this microbe. A disease prevalent in the swampy regions of Caucasus. aer., mot., pg. (not for chickens). *Sp. a of Weibel*. See *Sp. saprophiles a of Weibel*. *Sp. attenuatum*, Warming. Found in sea-water. *Sp. aureum*. Syn., *Vibrio aureus*, Weibel. Found in the air and slime of sewers. aer., nliq., nmot., chg. (golden yellow), npg. *Sp. β of Weibel*. See *Sp. saprophiles β*

a of Weibel. *Sp. cholerae asiaticæ*, Koch. Syn., *Spirillum cholerae*, *Spirillum of cholera*; *Bacillus of cholera*; *Comma bacillus of Koch*. Found in the discharges of cholera patients and in the intestine of cholera cadavers. aer., facanaer., liq., mot., pg. *Sp. concentricum*, Kitasato. Found in putrefying blood. aer., nliq., mot., npg. *Sp. denticola*, Miller. *Sp. dentium*, Arnt. Syn., *Spirochæte denticola*; *Spirochæte dentium*. Found under the margins of the gums in the mouths of healthy persons; biologic characters unknown, as it does not thrive in culture-fluids. *Sp. endoparagoticum*, Sorokin. Found in a glairy liquid exuding from a poplar tree. *Sp. finkleri*, *Sp. of Finkler-Prior*. Syn., *Vibrio proteus*; *Bacillus of Finkler-Prior*. Found in the feces of persons affected with cholera nostras, after allowing the discharge to stand for some time. aer., facanaer., liq., mot. Pathogenetic relation not confirmed. *Sp. flavescens*. Syn., *Vibrio flavescens*, Weibel. Found in the slime of sewers. aer., nliq., nmot., chg. (yellowish green), npg. *Sp. flavum*. Syn., *Vibrio flavescens*, Weibel. Found in the slime of sewers. aer., nliq., nmot., chg. (rich yellow), npg. *Sp. jenensis*, Ehrenberg. Syn., *Ophidomonas jenensis*, Ehrenberg. A doubtful species. *Sp. leukomelænum*, Perty. Found in water containing decaying algae. *Sp. linguae*. Syn., *Vibrio lingualis*. Found in the deposit on the tongue of a mouse after inoculation. aer., facanaer., nliq., nmot., npg. (for mice). *Sp. litorale*, Warming. Syn., *Vibrio spirillum*, Müller; *Melunella spirillum*, Borg. Found in bog-water. *Sp. metchnikovi*. Syn., *Vibrio metchnikovi*, Gamaleia. Found in the intestinal contents of chickens affected with an epidemic infectious disease resembling fowl cholera. aer., facanaer. (?), liq., mot., pg. *Sp. nasale*. Syn., *Vibrio nasale*, Weibel. Found in nasal mucus. aer., facanaer., nliq., nmot., npg. *Sp. obermeieri*, Cohn. Syn., *Spirochæte obermeieri*; *Spirillum of relapsing fever*. Found in the blood of persons affected with relapsing fever. aer., mot. (efforts to cultivate thus far unsuccessful), pg. *Sp. of Asiatic Cholera*. *Spirillum of cholera*. See *Sp. cholera asiaticæ*, Koch. *Sp. of Denecke*. See *Sp. tyrogenum*, Denecke. *Sp. of Finkler and Prior*. See *Sp. finkleri*. *Sp. of Miller*. Syn., *Miller's bacillus*. Found in carious teeth. aer., facanaer., liq., mot., npg. *Sp. of Relapsing Fever*. See *Sp. obermeieri*, Cohn. *Sp. of Smith*. Found in the intestine of swine. aer., nliq., mot., npg. *Sp. plicatilis*, Dujardin. Syn., *Spirochæte plicatilis*, Ehrenberg; *Spirulina plicatilis*, Cohn. Found in water containing decomposing algae. Biologic characters undetermined. *Sp. rosaceum*. Observed upon excrement in water. aer., chg. (red), npg. *Sp. rosenbergii*, Warming. Found in brackish water. Contains refractive sulfur grains. aer., mot. *Sp. ro-*

seum, Macé. Found in a tube culture of blennorrhagic pus. aer., nliqf., mot., chg. (rose red), npg. *Sp. rubrum*, von Esmarch. Obtained from the putrefying body of a mouse aer., facuac., nliqf., mot., chg. (pink), npg. *Sp. rufum*, Perty. Found in cistern-water aer., mot., chg. (rose red), npg. *Sp. rugula*, Muller. Syn., *Vibrio rugula*. Found in swamp-water and frequently in the alimentary canal, on the teeth, etc. aer., facuac., mot., npg. According to Prazmowski, this species gives rise to decomposition of cellulose. *Sp. sanguineum*. See *Beggiatoa roseopersiana*, Zopf. *Sp. saprophiles* α of Weibel. Syn., *Vibrio saprophiles* α of Weibel. Found in rotting hay infusion and in the slime of sewers. aer., nliqf., mot., npg. *Sp. saprophiles* β of Weibel. Syn., *Vibrio saprophiles* β of Weibel. Found in rotting hay infusion. aer., nliqf., mot., npg. *Sp. saprophiles* γ of Weibel. Syn., *Vibrio saprophiles* γ of Weibel. Found in the slime of sewers. aer., nliqf., mot., npg. *Sp. serpens*, Muller. Syn., *Vibrio serpens*, Muller. Found in stagnant water containing decaying plants, etc. Biologic characters not determined. *Sp. sputigenum*, Miller. Common in neglected mouths of healthy persons. Does not grow on culture-mediums. *Sp. tenue*, Ehrenberg. Found in putrefying plant infusions. Biologic characters undetermined. *Sp. tyrogenum*, Denecke. Syn., *Spirillum* of Denecke, *Bacillus* of cheese; *Denecke's cheese spirillum*. In old cheese. aer., facuac., liqf., mot., pg. (for guinea-pigs). *Sp. undula*, Cohn, Muller. Syn., *Vibrio undula*, Muller; *Vibrio proteus*, Ehrenberg. Found in zoogla masses in swamp-water, vegetable infusions, etc. aer., mot., npg. *Sp. violaceum*, Warming. Found in brackish water; cell-contents violet, with a few sulfur grains. *Sp. volutans*, Ehrenberg. Syn., *Vibrio spirillum*, Muller; *Melanella spirillum*, Borg. Found in infusions and in bog-water. Biologic characters undetermined. *Spirochæte anserina*, Sakatani. See *Sp. anserum*. *Spirochæte denticola*, Miller. *Spirochæte dentium*, Arnt. See *Sp. dentium*. *Spirochæte obermeieri*. See *Sp. obermeieri*, Cohn. *Spirochæte pallida*. Parasite found in syphilis. Syn., *Treponema pallidum*. *Spirochæte plicatilis*, Ehrenberg. See *Sp. plicatilis*, Dujardin. *Spiromonas cohnii*, Warming. Found in foul water. *Spiromonas volubilis*, Pertz. In putrefying infusions and in bog-water. *Sporonema gracile*. See *B. citreus*, Van Tieghem. *Staphylococcus albus liquefaciens*, Escherich. Syn., *White liquefying staphylococcus*. Found in the alvine discharges of healthy infants. aer., liqf., npg. *S. bistræ*. See *Microc. of Heydenreich*. *S. cereus albus*, Passet. See *Microc. cereus albus*, Passet. *S. cereus aureus*, Schroter and Winkler. See *Microc. cereus aureus*, S. and W. *S. cereus flavus*, Passet. See *Microc. cereus flavus*, Passet. *S. citreus*.

See *Microc. citreus*, List. *S. epidermidis albus*, Welch. See *Microc. pyogenes albus*, Rosenbach. *S. of Dengue*, McLaughlin. See *Scheutria langhlini*. *S. of Pemphigus*, De Michele. Obtained from the skin, kidney, and spleen in a case of pemphigus chronica. *S. passetii*. See *Microc. cereus flavus*, Passet. *S. pyogenes albus*, Rosenbach. See *Microc. pyogenes albus*, Rosenbach. *S. pyogenes aureus*, Cagston, Becker. See *Microc. pyogenes aureus*, Rosenbach. *S. pyogenes citreus*, Passet. See *Microc. pyogenes citreus*, Passet. *S. pyosepticus*, Henricourt and Richet. See *Microc. pyosepticus*, Richet. *S. salivarius pyogenes*, Biondi. See *Microc. salivarius pyogenes*, Biondi. *S. viridis flavescens*, Guttman. Syn., *Micrococcus of chicken-pox*. Found in the vesicles of varicella. aer., nliqf., chg. (greenish yellow), npg. *Streptococcus acidilactici*, Grotenfeldt. Found in coagulated milk in Finland. anaer. (not strictly), nliqf., npg. *Str. æthebius*. See *Microc. urea liquefaciens*, Flugge. *Str. albus*, Maschek. Found in hydrant-water (Leiturg). aer., liqf., npg. *Str. aphicola*, Lallier. See *Streptococcus of Eczema epizootica*, Schüttelius. *Str. articulatorum*, Löffler. Syn., *Micrococcus of diphtheria*. Obtained from the affected mucous membrane in cases of diphtheria. Possibly a variety of *Microc. pyogenes*. pg. (for mice). *Str. bombycis*, Béchamp. See *Microc. bombycis*, Cohn. *Str. brevis*, von Lingelsheim. Obtained from normal human saliva. aer., facuac., nliqf., npg. *Str. cadaveris*, Sternberg. Found in the liver of a yellow-fever cadaver. aer., facuac., nliqf., npg. *Str. cinnabareus*. See *Microc. cinnabareus*, Flugge. *Str. coli gracilis*, Escherich. Found in the feces of healthy children living on a meat diet. aer., facuac., liqf., npg. *Str. conglomeratus*, Kurth. Obtained from cases of scarlatina. pg. (for mice). *Str. coronatus*, Flugge. See *Microc. coronatus*, Flugge. *Str. coryza contagiosæ equorum*, Schütz. Found in the pus from affected lymphatic glands in horses suffering with the disease known in Germany as *Druse des Pferdes*. aer., facuac., pg. (for horses and mice), npg. (for rabbits, guinea-pigs, and pigeons). *Str. endocarditicus*. See *Microc. endocarditicus rugatus*, Weichselbaum. *Str. erysipelatis (erysipelatos)*, Fehleisen. See *Microc. pyogenes*, Rosenbach. *Str. fermenti*. See *Microc. viniperda*. *Str. giganteus urethræ*, Lustgarten and Mannaberg. Found in the healthy human urethra. aer., npg. *Str. havaniensis*, Sternberg. Found in the acid vomit of a yellow-fever patient. Biologic characters undetermined. *Str. insectorum*, Burrill. See *Microc. insectorum*, Burrill. *Str. kochii*. See *Microc. of Septicæmia in Rabbits*, Koch. *Str. lanceolatus pasteurii*, Gamaleia. See *B. septicus spuligenus*, Flugge. *Str. liquefaciens*, Sternberg. Obtained from the intestine and

livers of yellow-fever cadavers. *aer.*, *Jacanaer.*, *liq.*, *npg.* **Str. longus**, von Lingelsheim. See *Microc. pyogenes*, Rosenbach. **Str. lucæ**. See *Microc. ulceris mollis*. **Str. manfredii**. See *Microc. manfredii*. **Str. meningitidis**. See *Microc. intraventricularis meningitidis*, Neumann and Schaffer. **Str. monomorphus**, Bujwid, Heryng. Found in benign pharyngeal ulcers. *npg.* **Str. morbillosus**. See *Microc. of Measles*. **Str. nocardii**. See *Microc. mastobius*, Nocard. **Str. ochroleucus**. See *Microc. ochroleucus*, Prove and Legrain. **Str. of Bonome**. Obtained from the exudations in the cerebrospinal meninges and from hemorrhagic extravasations in the lungs in cases of epidemic cerebrospinal meningitis. *pg.* (for white mice and rabbits). **Str. of Granuloma fungoides**, Rindfleisch and Auspitz. See *Str. of Mycosis fungoides*. **Str. of Mannaberg**. Obtained from the urine in cases of acute nephritis. *aer.*, *Jacanaer.*, *nliq.*, *pg.* (for dogs and rabbits). **Str. of Mastitis in Cows**. See *Microc. mastobius*, Nocard and Mollereau. **Str. of Mycosis fungoides**. Syn., *Streptococcus of Granuloma fungoides*, Rindfleisch and Auspitz. Found in the capillaries and subcutaneous tissue in the parts affected by this disease. Not sufficiently investigated. **Str. of Pus**. See *Microc. septicus*, Flügge. **Str. perniciosus psittacorum**, Eberth and Wolf. See *Microc. psittaci*, Wolf. **Str. pneumoniae**, Weichselbaum. See *Microc. pyogenes*, Flügge. **Str. putrefaciens**. Syn., *Micrococcus of putrefaction*. Refers to any one of the many micrococci found in putrefying substances. **Str. pyogenes**, Rosenbach. See *Microc. pyogenes*, Rosenbach. **Str. pyogenes**, Saccardo. See *Microc. septicus*, Flügge. **Str. pyogenes maligni**, Krause and Flügge. Found in necrotic masses in a leukemic spleen. *pg.* (for mice and rabbits). **Str. pyogenes ureæ**, Röring. Found in purulent urine. Cf. *Microc. pyogenes ureæ flavus*, Röring. **Str. radiatus**. See *Microc. radiatus*, Flügge. **Str. rubiginosus**, Edington. Found in cases of scarlatina. *npg.* Does not appear until late in the disease. **Str. seiferti**. See *Microc. influenza*, Letzerich. **Str. septicus**, Flügge. See *Microc. septicus*, Flügge. **Str. septicus liquefaciens**, Babes. Obtained from the blood and viscera of a child that died of septicemia following scarlatina. *aer.*, *liq.*, *pg.* (for mice and rabbits). **Str. septopyæmicus**. See *Microc. septopyæmicus*. **Str. toxicatus**. See *Microc. toxicatus*, Burrill. **Str. ureæ**. See *Microc. ureæ*, Cohn. **Str. ureæ rugosus**, Röring. Found in urine. **Str. vermiformis**, Maschek. Found in hydrant water (Freiburg). *aer.*, *liq.*, *npg.* **Streptocytus of Eczema epizootica**, Schottelius. Syn., *Streptococcus aphicola*, Hallier; *Micrococcus of Foot-and-mouth Disease*. Found in vesicular eruptions about the mouth and feet of cattle, pigs, and sheep. Communicable

to man. *aer.*, *Jacanaer.* Pathogenesis not fully settled. Cf. *B. of Ulcerative Stomatitis of Cattle*. **Streptothrix foersteri**, Cohn. See *Cladothrix foersteri*, Cohn. **Swine Plague Schizophyte**, Detmers. See *B. of Swine Plague*, Reitsch and Jobert. **Syphilis Bacillus**. See *B. syphilidis*, Lustgarten. **Syphilis Bacillus of Eve and Lingard**. Obtained from the blood and diseased tissues of syphilitic persons who have not undergone mercurial treatment. *aer.*, *chg.* (pale yellow or brown). Pathogenetic relations not settled. Not stained by Lustgarten's method; capable of development on blood-serum. **Tetanus Bacillus**. See *B. tetani*, Nicolaier. **Thiothrix nivea**. See *Beggiatoa nivea*, Rabenhorst. **Thiothrix tenuis**, Winogradsky. Found in sulfur springs. **Thiothrix tenuissima**, Winogradsky. Found in sulfur springs. **Torula cerevisiæ**. See *Saccharomyces cerevisiæ*, Reess and Robin. **Torula ureæ**, Pasteur. See *Microc. ureæ*, Cohn. **Tubercle Bacillus**. See *B. tuberculosis*, Koch. **Typhus Bacillus**. See *B. typhi abdominalis*, Eberth. **Tyrophthrix catenula**, *T. claviformis*, *T. distortus*, *T. filiformis*, *T. geniculatus*, *T. scaber*, *T. tenuis*, *T. turgidus*, *T. urocephalus*, *T. virgula*. See the corresponding terms under *Bacillus*. **Ulvina aceti**, Kützing. See *B. aceti*, Kützing. **Urobacillus duclauxi**, Miquel. Found in sewage and river-water. *aer.*, *Jacanaer.*, *mot.*, *liq.* Pathogenesis not determined. **Urobacillus freudenreichii**, Miquel. Obtained from air, dust, sewage. *aer.*, *liq.*, *mot.* Pathogenesis not determined. **Urobacillus maddoxi**, Miquel. Obtained from sewage and river-water. *aer.*, *liq.*, *mot.* Pathogenesis not determined. **Urobacillus pasteurii**, Miquel. Obtained from decomposing urine. *aer.*, *liq.*, *mot.* Pathogenesis not determined. **Urobacillus schützengbergii**, Miquel. Obtained from sewage and river-water. *aer.*, *liq.*, *mot.* Pathogenesis not determined. **Vibrio aureus**, Weibel. See *Sp. aureum*. **Vibrio Bacillus**, Müller, Ehrenberg. See *B. uina*, Cohn. **Vibrio cholerae**. See *Sp. cholera asiatica*, Koch. **Vibrio cyanogenus**, Ehrenberg. See *B. cyanogenus*, Fuchs. **Vibrio flavescens**, Weibel. See *Sp. flavescens*, Weibel. **Vibrio flavus**, Weibel. See *Sp. flavum*, Weibel. **Vibrio lineola**, Müller and Ehrenberg. See *Bact. lineola*, Cohn. **Vibrio lingualis**. See *Sp. linguae*, Weibel. **Vibrio metchnikovi**, Gamaleia. See *Sp. metchnikovi*, Gamaleia. **Vibrio nasalis**, Weibel. See *Sp. nasale*, Weibel. **Vibrio proteus**. See *Sp. finkleri*. **Vibrio rugula**, Müller. See *Sp. rugula*, Müller. **Vibrio saprophiles α**, Weibel. See *Sp. saprophiles α*, Weibel. **Vibrio saprophiles β**, Weibel. See *Sp. saprophiles β*, Weibel. **Vibrio saprophiles γ**, Weibel. See *Sp. saprophiles γ*, Weibel. **Vibrio serpens**, Müller. See *Sp. serpens*, Müller. **Vibrio synchyantus**, Ehrenberg.

See *B. cyanogenus*, Fuchs. **Vibrio synxanthus**, Ehrenberg. See *B. synxanthus*, Ehrenberg and Schroter. **Vibrio tremulans**, Ehrenberg. See *Bact. lincola*, Cohn. **Vibrio undula**, Muller. See *Sp. undula*, Muller. **Vibrio xanthogenus**, Fuchs. See *B. synxanthus*, Ehrenberg and Schroter. **Violet Bacillus**. See *B. janthinus*, Zopf. **Zoogalactina imetropa**, Sette. See *B. prodigiosus*, Ehrenberg. **Zooglæa capillorum**, Buhl. See *Palmellina capillorum*, Radlkoffer. **Zooglæa ramigera**. A tree-like variety of *Cladothrix dichotoma*. **Zooglæa termo**, Muller, Cohn. See *B. termo*, Dujardin.

Bacteriaceæ (bak-te-re-ä'-se-e) [bacteria]. The Schizomycetes.

Bacterial (bak-te'-re-äl). Resembling, of the nature of, or derived from bacteria.

Bactericidal (bak-te'-ris-i'-däl), **Bactericide** (bak-te'-ris-id) [bacteria; *cedere*, to kill]. 1. Destructive to bacteria. 2. An agent that destroys bacteria.

Bacteridium (bak-ter-id'-e-um) [bakterion, a little stick]. According to Davaine, a genus of *Bacteriaceæ* characterized by immobility of the elements at all periods of their existence. The distinction does not now obtain. See under *Bacteria*.

Bacteriemia (bak-te-re-e'-me-ah). The presence of bacteria in the blood.

Bacteriform (bak-te'-re-form) [bacterium; *forma*, form]. Shaped like a bacterium.

Bacterio- (bak-te-re-o-) [bacterium]. A prefix meaning relating to bacteria.

Bacteriogenic (bak-te-re-o-jen'-ik) [bacteria; *generare*, to produce]. Caused by bacteria.

Bacteriohemagglutinin (bak-te-re-o-hem-ag-glü-tin-in). A hemagglutinin produced in the body by the action of bacteria; it is very unstable, being destroyed at 58° C.

Bacteriohemolysin (bak-te-re-o-hem-o-lü'-sin). A very unstable hemolysin formed in the body by the action of bacteria; it is destroyed at 58° C.

Bacterioid (bak-te'-re-oid) [bacteria; *eidos*, form]. Applied to certain microorganisms flourishing in and around the roots of leguminous plants, assisting in the accumulation of nitrogen, and giving rise to tubercles. They may be cultivated in artificial mediums like ordinary bacteria.

Bacteriologist (bak-te-re-öl'-o-jist) [bacteriology]. A specialist in bacteriology.

Bacteriology (bak-te-re-öl'-o-je) [bacteria; *lógos*, science]. The science concerned with the study of bacteria.

Bacteriolysin (bak-te-re-ö-lü'-sin). A complex substance containing a peptic ferment combined with a bacterial derivative.

Bacteriolysis (bak-te-re-öl'-is-is) [bacteria; *lysis*, a loosing]. A fermentative process, discovered by Fischer (1894), in which specific ferments act only on certain cells, just as certain yeasts act only on sugars of certain definite constitution. Syn., *Pfeiffer's phenomenon*.

Bacteriolytic (bak-te-re-ö-lit'-ik). Possessing a disintegrating action upon living bacteria.

Bacteriopathology (bak-te-re-o-path-öl'-o-je) [bacteria; *pathology*]. The science of diseases due to bacteria.

Bacteriophytoma (bak-te-re-o-fi-to'-mah) [bacteria; *phuton*, a growth]. A newgrowth caused by bacteria.

Bacterioplasm (bak-te-re-o-plas'-min) [bacteria; *πλάσμα*, anything formed or molded]. One of several toxic principles or toxalbumins extracted from pathogenic organisms, as of cholera or typhoid fever, by pressure.

Bacterioprotein (bak-te-re-o-pro'-te-in) [bacteria; *πρωτος*, first]. A protein contained in bacteria.

Bacteriopurpurin (bak-te-re-o-pur'-pu-rin) [bacteria; *purpura*, purple]. A peach-colored pigment found by Lankester in the protoplasm of *Beggiatoa roseopersicina*. It is insoluble in water, alcohol, chloroform, ammonia, acetic acid, and sulfuric acid.

Bacterioscopic (bak-te-re-o-shop'-ik), **Bacterioscopy** (bak-te-re-ös'-ko-pe) [bacteria; *σκοπεiv*, to view]. The microscopic study of bacteria.

Bacteriosis (bak-te-re-ö'-sis) [bacterium]. The action of bacteria in the system; infection by bacteria.

Bacteriotherapy (bak-te-re-ö-ther'-ap-e) [bacteria; *θεραπεία*, treatment]. Treatment of disease by bacteria.

Bacteriotropic (bak-te-re-o-trop'-ik) [bacteria; *τροπώ*, I turn]. A generic term used by Wright to denote all substances in the blood which turn toward and enter into chemic combination with bacteria. Said of agglutinins.

Bacterium (bak-te'-re-um) [bakterion, a little stick; pl. bacteria]. 1. A synonym of *Schizomycetes* or *Microorganism*. 2. The word was formerly restricted to a genus of schizomycetous fungi established by Ehrenberg (1838) and Dujardin (1841), characterized by short, linear, inflexible, rod-like forms, without tendency to unite into chains or filaments. Morphologically, bacteria are spheric (*cocci*); in the form of straight rods (*bacilli*); or of twisted rods (*spirilla*). Bacteria are either *aerobic*, requiring free oxygen, or *anaerobic*, not requiring free oxygen. Again, certain forms appear to possess the ability to flourish in either condition, and are known as *facultative aerobic* or *facultative anaerobic*. Bacteria are either motile or nonmotile; they may exist as *saprophytes*, *facultative parasites*, *strict obligate*, or *true parasites*. Those that produce pigment are known as *chromogenic*; those that produce fermentation, as *zymogenic*; those that affect adversely the health of plants or animals, as *pathogenic*. See *Bacteria*, *Table of*, and special terms under appropriate headings.

Bacteriuria (bak-te-re-ü'-re-ah) [bacterium; *ουρον*, urine]. Bacteria in the urine.

Baculiform (bak'-u-le-form) [baculum, a stick; *forma*, form]. Rod-shaped.

Bael (ba'-el). See *Bel*.

Baelz's Disease. Progressive ulceration and destruction of the mucous glands of the lips (von) **Baer's Law**. The more special forms

of structure arise out of the more general, and that by a gradual change. **B.'s Vesicle**, the ovule.

Baeyer's Reaction for Glucose. Indigo is formed on boiling a glucose solution with ortho-nitrophenyl propionic acid and sodium carbonate. When the glucose is in excess, this blue is converted into indigo white. **B.'s Reaction for Indol**, a watery solution of indol to which have been added 2 or 3 drops of fuming nitric acid and then a 2% solution of potassium nitrate drop by drop, yields a red liquid and then a red precipitate of nitroso-indol nitrate, $C_{10}H_7NO(N_2HNO_2)$.

Bag [AS., *bag*]. 1. A sac. 2. The scrotum. **B., Barnes'**, a rubber bag, shaped somewhat like a lyre, used for dilating the cervical canal. **B., Intragastric**, an elastic rubber bag which, when folded over a tube which runs through it, occupies less space than an ordinary stomach-tube, and which has the exact shape of the stomach when it is inflated within that organ. It is employed to obtain the contents of the duodenum. **B., Politzer's**, a soft-rubber bag for inflating the middle ear. **B. of Waters**, the fetal membranes inclosing the liquor amnii and projecting through the os uteri early in labor. The sac usually ruptures when the cervix is dilated.

Bagnio (*ban'-yo*) [It., *bagno*]. 1. A house of prostitution. 2. A bath-house.

Baillarger's Layer. A layer of short, delicate fibers in the cerebral cortex, parallel to the surface, it is visible to the naked eye in the region surrounding the calcarine fissure, and is there known as Vieq d'Azyr's band.

B.'s Sign, pupillary inequality in paralytic dementia.

Baker's Cyst. See *Cyst, Baker's*.

Bakers' Itch. An exzematous affection of the hands, caused by the irritation of the yeast.

B.'s Leg, knock-knee, or genu valgum.

B.'s Salt. A synonym of *Smelling-salts* or *Ammonium carbonate*; it is sometimes used by bakers in leavening cakes. **B.'s Stigmata**, lesions on the fingers from kneading dough.

Balance (*bal'-ans*) [L., *bilans*, having two scales]. 1. An instrument for weighing.

2. The harmonious adjustment of related parts. **B., Electromagnetic**, an apparatus for estimating the intensity of electric currents. **B., Thermic.** See *Bolometer*. **B., Torsion**, an instrument for estimating magnetic attraction and repulsion.

Balanic (*bal'-an-ik*) [*balanos*, the glans penis]. Pertaining to the glans of the penis or of the clitoris.

Balanitis (*bal-an-itis*) [*balanos*, the glans penis; *itis*, inflammation]. Inflammation of the glans penis.

Belano- (*bal-an-o-*) [*balanos*, the glans penis]. A prefix meaning relating to the glans penis.

Balanoblennorrhoea (*bal-an-o-blen-or-e'-ah*) [*balano*; *blennos*, mucus; *rhoia*, a flow]. Gonorrheal balanitis.

Balanocoele (*bal-an-o-sel*) [*balano*; *koile*, a

hernia]. The protrusion of the glans through an opening in the prepuce, as occurs in gangrenous phimosis.

Balanoplasty (*bal-an'-o-plas-ty*) [*balano*; *plasis*, to form]. Plastic surgery of the glans penis.

Balanoposthitis (*bal-an-o-pos-thi'-tis*) [*balano*; *posth*, prepuce; *itis*, inflammation]. Inflammation of the glans penis and of the prepuce.

Balanoprepucial (*bal-an-o-per-pu'-she-ol*) [*balano*; *preputium*, prepuce]. Relating to the glans penis and the prepuce.

Balantidium (*bal-an-tid'-e-um*) [*balanoides*, dim. of *Balanovos*, a bag]. A genus of protozoa. **B. coli**, a protozoan parasite that inhabits the intestine of the pig.

Balata (*bal-at'-ah*) [native Guiana]. The dried milky juice of the bully tree, *Mimosaops balata*, and of several other sapotaceous trees of Guiana. It is intermediate between caoutchouc and gutta-percha, and is used chiefly in England as a substitute for these.

Balatin (*bal'-at-in*). The creamy sap from a South American tree, *Mimosaops kauki*, it is used as a varnish and vehicle in skin diseases.

Balbuties (*bal-bu'-she-iz*) [*balbutire*, to stammer]. Stammering.

Baldness (*bold'-nes*) [ME., *bolde*, bald]. Loss of hair; alopecia.

Balfour's Disease. A fatal disease of children with postmortem findings of greenish yellow or greenish-gray fibrosarcomas in various parts of the body, especially the peritoneum. Syn., *Chloroma*; *Chlorosarcoma*.

Ball (*ball*) [ME., *ball*]. 1. An object having a round or spheric shape. 2. In anatomy, any globular part. **B., Bichat's Fat-**, the buccal fat-pad, a mass of fat lying in the space between the buccinator and the anterior border of the masseter; is especially well developed in infants. **B., Gascoigne's**, pulverized Oriental bezoar formed into balls. **B., Martial**, balls made of 2 parts of cream of tartar and 1 part of iron filings, they were used in the preparation of ferruginous baths. Syn., *Boli martis*; *Globuli martis*. **B.-and-socket Joint.** See *Diarthrosis* and *Enarthrosis*.

Ballet's Sign. Ophthalmoplegia externa, characterized by the loss of all voluntary movements of the eyeball, with preservation of the automatic movements and integrity of the movements of the pupil. It is seen in hysteria and exophthalmic goiter.

Ballingal's Disease. Mycetoma.

Balloon (*bal-oon*) [Mod. E., *balson*, a large bag]. 1. In chemistry, a spheric glass receiver with a short neck. 2. To distend a body-cavity by means of air-bags or water-bags. **B. Sickness**, an abnormal condition due to the breathing of an insufficient amount of oxygen.

Ballottement (*bal-ot'-mon(g)*) [Fr., *ballotement*, tossing, shaking about]. A method of diagnosing pregnancy from the fourth

by the eighth month. A push is given the uterus by the finger inserted into the vagina, and if the fetus is present, it will rise and fall again like a heavy body in water. **B., Cephalic**, the rebound of the fetal head against the hand when depressed through the abdominal wall. **B., Ocular**, the falling of opaque particles in a fluid vitreous humor after movements of the eyeball.

Balm (*bahm*) [*balsamum*, a balsam]. 1. A popular synonym of **Balsam**. 2. Any soothing application or ointment. **B. of Gilead**, the balm of the Old Testament; an oleoresin obtained from the *Balsamodendron gileadense*.

Balneal (*bal'-ne-al*). Relating to baths.

Balneography (*bal-ne-og'-ra-je*) [*balneum*; *graphein*, a writing]. A treatise on bathing and baths.

Balneology (*bal-ne-ol'-o-je*) [*balneum*; *logos*, science]. The science of baths and their effects upon the system.

Balneophysiology (*bal-ne-o-fis-e-ol'-o-je*) [*balneum*; *physiology*]. The physiology of bathing; the science of the effects of baths upon the system.

Balneotherapy (*bal-ne-o-ther'-ap-e*) [*balneum*; *therapeia*, treatment]. Systematic bathing for therapeutic purposes, or the treatment of disease by baths.

Balneum (*bal'-ne-um*) [L.]. A bath. See **Bath**. **B. arenae**, a sand-bath. See **Ammonotherapy**. **B. lacteum**, a milk-bath. **B. luteum**, a mud-bath. **B. pneumaticum**, an air-bath.

Balsam (*baul'-sam*) [*ῥάσamon*, the resin of the balsam-tree]. The resinous, volatile, aromatic substance, liquid or solid, obtained from certain trees by natural exudation or by artificial extraction. Balsams are divided into two classes—those with, and those without, benzoic and cinnamic acids. In general they are mixtures of various essential oils, resins, and acids. **B.-apple**, the plant *Momordica balsamina*, and its warty, gourd-like fruit. It is purgative, but its tincture is used in domestic medicine chiefly as a vulnerary. **B., Bengué's Anodyne**, a compound consisting of menthol, 2½ drams; methyl salicylate, 2½ drams; wool-fat, 3 drams. **B.-bog**, a singular stone-like, woody, umbelliferous plant, *Bolax*, or *Azorella giliaria*, of the Falkland Islands and Patagonia. Its aromatic gum is locally prized as a vulnerary, desiccative, and antigonorrheal remedy. **B., Canada**, a turpentine gathered from the natural blisters of the bark of *Abies balsamea*. It is used as a mounting-medium by microscopists. See under **Turpentine**. **B. of Copaiba**. See **Copaiba**. **B. of Fir**. Same as **B., Canada**. **B., Friars'**. See **Benzoin**. **B., Humiri**, **B., Humiri**, the fragrant exude from the trees *Humiria balsamifera* and *H. floribunda*, natives of South America. It is used as an expectorant and vermifuge. Syn., *Umire*. **B. of Peru** (*balsamum peruvianum*, U. S. P.), the balsam obtained from *Tolujera peruviana*; an-

tiseptic, stimulant to the circulation, and sedative to the nervous system, tonic and expectorant. Applied locally, it is useful in chronic inflammatory skin diseases. Dose of the emulsion 10-25 min. (0.6-1.5 Cc.).

B.-root, a popular name for certain composite-flowered plants of the genus *Balsamorhiza*. *B. hookeri*, *B. macrophylla*, and *B. sagittata* are common in the Pacific States and abound in a resinous balsam. **B., Samaritan**, a mixture of equal parts of oil and wine, heated together, and a tenth part of rosemary leaves. **B., Stimulant**, a mixture of 8 parts of turpentine and 1 part of mustard flour. **B., Sulfur**, a mixture of 8 parts of olive oil and 1 part of sublimed sulfur heated together. **B., Tagulaway**, **B., Tagulaway**, a yellow oil prepared in the Philippines by boiling the bark and twigs of the cebu, *Parameria vulneraria*, in coconut oil; it is used as a vulnerary and in skin diseases. Syn., *Cebur*; *Jagulaway balsam*. **B. of Tolu**, **B. of Tolutan** (*balsamum toltanum*, U. S. P.), obtained from *Tolujera balsamum*. Its properties are due to a volatile oil, *toluene*. It possesses an agreeable odor, and is a basis for many cough-mixtures. It is expectorant. See also **Tolu**.

Balsamation (*baul'-sam-a'-shun*) [see **Balsam**]. Emballment with balsamic or aromatic spices.

Balsamic (*baul'-sam'-ik*). Having the nature or qualities of a balsam.

Balsamodendron (*baul'-sam-o-den'-dron*). See **Bidellium** and **Myrrh**.

Balsamum (*baul'-sam-um*) [*balsam*]. A balsam. **B. dipterocarpi**. See **Gurjun Balsam**.

Balser's Fat-necrosis. An acute disease of the pancreas with areas of fat-necrosis in the interlobular tissue of that organ, in the omentum and mesentery, at times also in the pericardial fat and bone-marrow.

Bamberger's Bulbar Pulse. Pulsation of the jugular vein,—the bulbus venae jugularis,—synchronous with the systole, in tricuspid insufficiency. **B.'s Disease**, saltatory spasm. **B.'s Fluid**, an albuminous mercuric compound used in the treatment of syphilis. It is made as follows: To 100 Cc. of a filtered solution of white of egg (containing 40 Cc. of albumin and 60 Cc. of water) there are added 60 Cc. of a solution of mercuric chlorid (containing 5%, or 3 Gm., of mercuric chlorid) and 60 Cc. of a solution of sodium chlorid (containing 20%); finally, 80 Cc. of distilled water is added, which brings the bulk of the solution up to 300, containing 0.010 mercuric chlorid in every cubic centimeter. **B.'s Hematogenic Albuminuria**, albuminuria occurring during the later stages of severe anemia. **B.'s Sign**, allochiria; perception of a stimulus applied to the skin of one extremity at the corresponding place on the other extremity. **B.'s Type of Hypertrophic Pulmonary Osteopathy**, a form in which painful thickenings of the long

bones, especially of the forearm and leg, are a prominent symptom.

Bamboo (*ham-bao'*) [E. Ind., *bambu*]. A popular name for many tree-like, woody-stemmed grasses, especially those of the genus *Bambusa*. *Bambusa arundinacea* is employed as an alterative, anthelmintic, and depurative. Unof. **B.-brier**, the root of *Smilax sarsaparilla*, habitat, southern United States. Its properties are identical with those of sarsaparilla. Dose of the fluid-extract $\frac{1}{2}$ -2 dr. (2-8 Cc.). Unof.

Banana (*ban-un'-ah*) [Sp.]. The fruit of the common banana, *Musa sapientum*, said to be a valuable alterative, and useful in strumous affections. Dose of the fluid-extract 10-30 min. (0.6-2.0 Cc.). Unof.

Bananina (*ban-an-in'-ah*). Banana flour, plantain flour, the fruit of *Musa sapientum*, dried and pulverized.

Band [ME., *bande*]. That which binds. A stripe. A ligament. **B.s**, Amniotic, bands formed by drawn-out adhesions between the fetus and the amnion where the cavity has become distended through the accumulation of fluid. Syn., *Simonart's bands*. **B.**, Anogenital, the rudiment of the perineum; a transverse band of integument completing the division of the cloaca in the embryo. **B.**, Axis, the primitive streak. **B.**, Belly-, a flannel band wound around the abdomen. **B. of the Colon**, **Inner**, a band-like thickening of the muscular coat running along the inner surface of the ascending and descending colon and the inferior aspect of the transverse colon. **B.s**, Fetoamniotic, amniotic bands producing deformities or intrauterine amputation. **B.**, Furrowed, a small band of cinerea uniting the uvula cerebelli with the cerebellar tonsils. **B.**, Head-, a strap for securing a mirror to the forehead. **B.**, Horny (of *Tarinus*), the fore part of the tænia semicircularis. **B.**, *Kramer's Frontal*, a head-band with appliances to hold a eustachian catheter in place so that the surgeon's hands may be free. **B.**, Mesoblastic, a band of mesoblastic cells which extends the entire length of the embryo. **B.**, Moderator. See *B.*, *Reil's*. **B.**, *Reil's*, a fibromuscular fillet that frequently extends across the right ventricle of the heart. Syn., *Moderator band*. **B. of Remak**. See *Fiber*, *Axial*; also *Purkinje*, *Axis-cylinder of*. **B.s**, Supraorbital, the embryonal thickenings above the eyes and to the outer side of them. **B. of Tarinus**. See *B.*, *Horny (of Tarinus)*.

Bandage (*ban'-daj*) [Fr., *bande*, a strip]. Bandages are usually strips of muslin or other material, of varying widths and lengths, used in surgery for the purpose of protecting, compressing, etc., a part, or for the retention of dressings and applications. A simple bandage or roller consists of one piece; a compound, of two or more pieces. *Starch*, *plaster-of-paris*, *silica*, *dextrin*, *tripoli*, etc.,

are used for making stiff and immovable dressings or bandages. According to their direction, bandages are classed as: 1. *Circular*, circular turns about the part. 2. *Figure-of-8*, the turns crossing one another like the figure 8. 3. *Oblique*, covering the part by oblique turns. 4. *Recurrent*, the turns returning successively to the point of origin. 5. *Spica*, the turns resembling the arrangement of the husks of an ear of corn. 6. *Spiral*, each turn covering one-half of the preceding. 7. *Spiral reverse*, the bandage is reversed in order better to adapt it to the part. Bandages are also classed according to the part to which they are applied. (See illustrations on pp. 155-158.) **B.**, Abdominal. See *Binder*. **B.**, *Borsch's*, a bandage for one eye. **B.**, *Esmarch's*, an elastic rubber bandage to prevent hemorrhage in amputations. **B.**, *Genga's*. See *B.*, *Theden's*. **B.**, *Heliodorus'*, the T-bandage. **B.**, *Hueter's*, a spica bandage for the perineum. **B.**, *Langier's*, a many-tailed paper bandage. **B.**, *Larrey's*, a form of many-tailed bandage, the edges being glued together. **B.**, *Maisonneuve's*, a variety of plaster-of-paris bandage formed from cloths folded, these being supported by other bandages. **B.**, *Martin's*, an india-rubber bandage for varicose veins. **B.**, *Recurrent*, a bandage used after amputations, to support the flaps of the stump. **B.**, *Ribble's*, the spica bandage for the instep. **B.**, *Richet's*, a form of plaster-of-paris bandage to which a small amount of gelatin has been added. **B. of Scultetus**, a compound bandage, similar to a spiral reverse in appearance and action, used in compound fractures, so that the short pieces of which it is composed may be removed without motion of the limb. **B.**, *Startin's*, a bandage impregnated with a mixture of paraffin and stearin. **B.s**, *T.*, bandages shaped like the letter T. **B.**, *Theden's*, a form of roller bandage applied from below upward over a graduated compress, to control hemorrhage from a limb.

Bandl's Ring. The line of depression sometimes felt on digital pressure just above the pubes during labor-pains; it corresponds to the site of the internal os uteri.

Baneberry (*ban'-ber-e*). See *Actæa*.

Bang, Bhang, Bangué (*bang*). See *Cannabis indica*.

Banian (*ban'-yan*) [Ar., *banyân*, a trader]. A South Asiatic fig-tree, *Ficus bengalensis*, remarkable for the development of roots and secondary trunks from its branches. The bark and seeds are tonic, diuretic, and antipyretic.

Banti's Disease. Enlargement of the spleen with progressive anemia, followed by hepatic cirrhosis.

Banting Cure. A method for the reduction of corpulence by abstinence from saccharine, fatty, and farinaceous foods, and the use of red meats.

Banyan (*ban'-yan*). See *Banian*.

CROSSED BANDAGE OF BOTH EYES.

BARTON'S BANDAGE.

T-BANDAGE OF THE EYE.

THE SIX-TAILED BANDAGE OF GALEN.

RECTUS BANDAGE OF THE HEAD.—(Moullin.)

TRANSVERSE RECURRENT BANDAGE OF THE HEAD.—
(Moullin)

FOUR-TAILED BANDAGE OF THE HEAD.

AGNEW'S BANDAGE.—(Moullin.)

FOUR-TAILED BANDAGE OF THE HEAD.

GIBSON'S BANDAGE.—(Moullin.)

ANTERIOR FIGURE-OF-8 BANDAGE OF THE CHEST.

POSTERIOR FIGURE-OF-8 BANDAGE OF THE CHEST.

SUSPENSORY AND COMPRESSOR BANDAGE OF THE BREAST.

SPICA BANDAGE OF SHOULDER.

SPIRAL BANDAGE OF THE CHEST.

VELPEAU'S BANDAGE.

DESAULT'S BANDAGE.

DOUBLE SPICA BANDAGE OF THE GROIN.

EIGHT-TAILED BANDAGE OF THE ABDOMEN.—(Moullin.)

ASCENDING SPICA BANDAGE OF THE GROIN.—(Moullin.)

FIGURE-OF-8 BANDAGE OF THE ELBOW.—(Moullin.)

SPIRAL BANDAGE OF THE FINGER.

GANTLET BANDAGE.

SPICA BANDAGE OF THE THUMB.—(Horvitz.)

DEMI-GANTLET BANDAGE.

MODIFIED FIGURE-OF-8 BANDAGE OF THE LOWER EXTREMITY.—(*Moulton*.)

RECURRENT BANDAGE OF STUMP.

SPICA BANDAGE OF THE FOOT.—(*Moulton*.)

SPIRAL REVERSED BANDAGE OF THE FOREARM (OR LEG).—(*Moulton*.)

FIGURE-OF-8 BANDAGE OF ANKLE.—(*Howie*.)

ESCHMANN'S BANDAGE.—(*Howie*.)

Baobab Tree. See *Adansonia digitata*.

Baptin (bap'-tin) [baptisus]. A purgative glucosid, obtainable from *Baptisia tinctoria*.

Baptisia (bap-tiz'-e-ah) [baptisus, a dipping]. Wild indigo. The root-bark of *B. tinctoria*, the properties of which are due to an impure glucosid, the so-called *baptisin*. It is laxative and stimulant in moderate doses, emetic and cathartic in large doses, and is used in amenorrhœa, typhus and typhoid fevers, and as a local application to indolent ulcers and gangrenous sores. Dose of the resin 1-5 gr. (0.065-0.32 Gm.). **B.**, Extract of. Dose 1-10 gr. (0.065-0.65 Gm.). **B.**, Fluidextract of. Dose 2-20 min. (0.13-1.3 Cc.). **B.**, Tincture of. Dose 5-30 min. (0.32-3.0 Cc.). All unof.

Baptisin (bap'-tiz-in) [baptisia]. 1. A precipitate from the tincture of *Baptisia tinctoria*; antiseptic, purgative, ecboic, resolvent. Dose 1-3 gr. (0.065-0.2 Gm.). Unof. 2. A bitter glucosid obtainable from the plant *Baptisia tinctoria*; it has little medicinal activity.

Bar (OF, barre). 1. A band or stripe. 2. The part of the upper jaw of a horse destitute of teeth. 3. An arch. 4. A prominence of the symphysis pubis projecting into the pelvic cavity. **B.s**, Hyoid, the pair of cartilaginous plates forming the second visceral arch. **B.**, Interureteric. See **B.**, Mercier's. **B.**, Mercier's, the transverse curved ridge joining the openings of the ureters on the inner surface of the bladder; it forms the posterior boundary of the trigone. Syn., *Bar of the bladder*, *Interureteric bar*; *Plicæ uretericæ*.

Barba (bar'-bah) [L.]. The beard.

Barbados Aloes (bar-ha' dōz al'-ōz). See *Aloes*. **B.** Distemper. Synonym of *Yellow fever*. **B.** Leg. See *Elephantiasis arabum*. **B.** Nut. See *Purging Nut*.

Barbaloin (bar-bal'-o-in) [*Barbados*; ἀλόη, aloē]. $C_{17}H_{20}O_7$. The aloin derived from *Barbados aloes*.

Barbel (bar'-bel) [*barba*, a beard]. The fish *Cyprinus barbatus*; the roe is used as a purgative in some countries, and causes vomiting and purging if eaten to excess. **B.** Cholera, an epidemic of fish-poisoning from eating diseased barbels. The symptoms are identical with those of cholera nostras, and are due to a ptomain. Syn., *Gastric ichthyotoxism*.

Barberry (bar'-ber-ē). See *Berberis*. **B.** Gum, a commercial name of certain varieties of gum-arabic.

Barber's Itch. Sycosis parasitaria.

Bard's Sign. To differentiate between organic and congenital nystagmus. In the former the oscillations of the eyeball increase when the patient follows the physician's finger, moved before his eye alternately from right to left and from left to right. In the latter the oscillations disappear under these conditions.

Bardana (bar-da'-nah) [L.]. The burdock. See *Lappa*.

Bardinet's Ligament. The posterior fasciculus of the internal lateral ligament of the elbow-joint; it is attached above to the posteroinferior portion of the internal condyle, and below, by its expanded border, to the inner side of the olecranon process.

Bareggi's Reaction. Twenty or 30 drops of blood collected in a small test-tube and allowed to stand for 24 hours will show a nonretracted clot and a small amount of serum if the blood has been taken from a typhoid-fever patient. In tuberculosis, on the other hand, the clot will retract and an abundance of serum will be formed.

Baregin (bar-a'-zhin). See *Glairin*.

Barethesiometer (bar-es-the-re-om'-et-er) [βάρος, weight; αἰσθησις, perception; μέτρον, a measure]. An instrument for estimating the sense of weight or pressure.

Barfoed's Reagent for Dextrose. One part copper acetate dissolved in 15 parts of water; 5 Cc. of acetic acid containing 38% of glacial acetic acid, added to 200 Cc. of this solution. Heat this reagent with a dextrose solution, and a reduction of copper suboxid is produced, but not when heated with lactose or maltose.

Baric (ba'-rik) [barium]. Pertaining to or containing barium.

Barilla (bar-il'-ah) [Fr., barille, impure soda]. The ashes obtained by burning various chenopodiaceous plants of the genera *Salicornia* and *Salsola*. They contain about 30% of sodium carbonate.

Barium (ba'-re-um) [βαρύς, weight]. Ba = 136.8; quantitative II. A metal of the group of alkaline earths, of pale yellow color, characterized by a strong affinity for oxygen. The salts are poisonous. **B.** Arsenate, $Ba_3(AsO_4)_2$, a white powder, almost insoluble in water. It is used in tuberculosis and in skin diseases. Dose $\frac{1}{4}$ - $\frac{1}{2}$ gr. (0.004-0.016 Gm.). **B.** Benzoate, $Ba(C_6H_5O_2)_2 + 2H_2O$, small, colorless plates. It is used instead of digitalis as a heart-stimulant. **B.** Carbonate, $BaCO_3$, used in the preparation of the chlorid. **B.** Chlorid, $BaCl_2 \cdot 2H_2O$, soluble, used as a test for sulfates, which it precipitates as barium sulfate, and also as a cardiac and vasomotor stimulant. Dose $\frac{1}{2}$ -5 gr. (0.032-0.32 Gm.).

B. Chromate, $BaCrO_4$, yellow crystals, insoluble in water; it is used as a pigment. Syn., *Yellow ultramarine*. **B.** Hydrate, **B.** Hydroxid, $Ba(OH)_2$, caustic baryta; a crystalline substance, soluble in water, and used as a test for sulfates, which it precipitates as barium sulfate. **B.** Iodid, formerly used as an alterative. Dose $\frac{1}{2}$ gr. (0.008 Gm.). It is employed in ointments. **B.** Manganate, $BaMnO_4$, emerald-green powder of microscopic prisms or six-sided plates; it has been used as a pigment. **B.** Meconate, a compound of barium and meconic acid; it is used as an anthelmintic. **B.** Oxid, BaO , baryta. **B.** Sulfate, $BaSO_4$. **B.**

Sulfid, BaS, a white, phosphorescent powder, soluble in water; it is used as an alterant. Dose $\frac{1}{4}$ -1 gr. (0.032-0.065 Gm.) in keratin-coated pills. **B. Sulfocarbonate**, Ba(C₂H₃SO₃)₂, colorless crystals, soluble in water; it is antiseptic.

Bark [ME., *burke*]. 1. The cortex or covering surrounding the wood of exogenous trees. 2. Synonym of *Cinchona* or *Calisaya bark*. **B., Peruvian**. See *Cinchona*. (For other barks, see the names of the plants or trees that produce them.)

Barkow's Ligament. Ligamentous bundles lying in the fatty tissue of the olecranon fossa; they pass from the upper border of the fossa vertically downward to join the deeper fibers of the posterior ligament of the elbow-joint.

Barley (*bar'-le*) [ME., *barly*]. A cereal belonging to the order *Gramineae*; the most common variety, *Hordeum distichon*, is used as a food, and also in the preparation of malt. **B., Decoction of**. See *B.-water*. **B., Pearl-**, the decorticated grain, rounded and polished. **B.-water** (*decocum hordei*, B. P.), a decoction consisting of 2 ounces of pearl-barley boiled in $1\frac{1}{2}$ pints of water and afterward strained. It is used as a demulcent and food in the diarrheas of children. Dose 1-4 oz. (30-120 Cc.).

Barlow's Disease. Infantile scurvy, generally associated with rickets, and characterized by subperiosteal hemorrhages, especially of the long bones, with painful swellings.

Barnes' Cervical Zone. The lowest fourth of the internal surface of the uterus. **B.'s Curve**, in obstetrics, the segment of a circle, having for its center the sacral promontory, its concavity looking backward. **B.'s Dilators**, graduated rubber bags used for dilating the cervix uteri in the induction of abortion or premature labor.

Baro- (*ba-ro-*) [*βάρος*, weight]. A prefix implying heaviness.

Baroelectroesthesiometer (*bar-o-e-lek-tro-es-the-zo-om'-et-er*) [*baro-*; *ἤλεκτρον*, amber; *αἰσθησις*, perception; *μέτρον*, a measure]. An apparatus to determine the amount of pressure when electric sensibility to pain is felt.

Barograph (*bar'-o-graf*) [*baro-*; *γράφειν*, to record]. A self-registering barometer.

Barometer (*bar-om'-et-er*) [*baro-*; *μέτρον*, a measure]. An instrument for determining the weight and tension of the atmosphere. It consists essentially of a glass tube, about 36 inches long, closed at one end, filled with mercury, and inverted in a basin of mercury. The mercury will sink in the tube until it rests at a height of about 30 inches (760 mm.) at the sea-level, the height varying as the atmospheric pressure increases or diminishes. **B., Air**, a barometer with air or gas imprisoned above the column of liquid; the variations of atmospheric pressure are indicated by the changes in the volume of this air. **B., Aneroid**, a metallic box from which the air has been

exhausted, the tension being indicated by the collapsing or bulging of the thin, corrugated cover, which is connected with a movable index. **B., Boiling-point**, an instrument for determining the atmospheric pressure through observation of the boiling-point of water. Syn., *Barothermometer*; *Hypsometer*. **Thermobarometer**. **B.-maker's Disease**, a form of chronic mercurial poisoning among the workmen who make barometers. It is due to the inhalation of the fumes of mercury.

Barometrograph (*bar-o-met'-ro-graf*). See *Barograph*.

Barometry (*bar-om'-et-ee*). The science of atmospheric pressure and the use of the barometer.

Baroscope (*bar'-o-skōp*) [*baro-*; *σκοπεῖν*, to observe]. An instrument used for determining the loss of weight of a body in air, compared with its weight in a vacuum. A form of baroscope has been invented by Estabrook for the quantitative determination of urea.

Barosma (*bar-os'-mah*) [*baro-*; *βαρύς*, smell]. A plant of the order *Rutaceae*, native to the Cape of Good Hope and vicinity, several species of which yield the buchu of commerce.

Barosmin (*bar-os'-min*) [*barosma*]. A precipitate from the tincture of *Barosma crenulata*. Dose 2-3 gr. (0.13-0.2 Gm.). Unof.

Barral's Test for Albumin and Bile-pigments. Cover the urine in a test-tube with a layer of 20% solution of aseptol (orthophenolsulfonic acid), and in the presence of albumin a white ring will form at the zone of contact of the two fluids; $\frac{1}{2}$ of a grain of albumin in 1 liter of urine may be thus detected. Mucin causes a similar appearance, but it disappears on boiling. A green ring will indicate the presence of bile-pigments. This is much more sensitive than the color test with fuming nitric acid.

Barringtonia (*bar-ing'-tō-ne-ah*) [D. *Barrington*, an English naturalist]. A genus of plants of the order *Myrtaceae*. *B. acutangula* is a tree growing in Australia and India. The juice from the leaves mixed with oil is used in skin diseases; the root is bitter, cooling, and aperient, and is said to be similar to cinchona; the seeds, prepared with sago and butter, are used in diarrhea. *B. butonica* is a tree of Australia and India. The outer portion of the fruit is used to stupefy fish. *B. racemosa* has properties similar to *B. acutangula*.

Barsati (*bar-sat'-e*). A disease affecting horses, considered analogous to cancer. Syn., *Atrophic carcinoma*.

Bartholin, Duct of (*bar'-tho-lin*). See *Duct of Bartholin*. **B., Foramen of**, the obturator foramen. **B., Glands of**, the vulvovaginal glands, a pair of glands situated at the entrance of the vagina, one on each side, and corresponding to Cowper's glands in the male.

Bartholinian Abscess. An abscess of Bartholin's glands.

Barton's Bandage. A bandage for the lower jaw. **B.'s Fracture**, the separation of the posterior portion of the lower articular surface of the radius.

Baruch's Sign. The resistance of the rectal temperature to a bath of 75° for 15 minutes, with friction, it is pathognomonic of typhoid fever.

Baruria (*bar-u'-re-ah*) [*ῥαρίς*, heavy; *οὐρῶν*, urine]. The passage of urine having a high specific gravity; also the condition of the body associated therewith.

Bary- (*bar-ee*) [*βαρύς*, heavy]. A prefix meaning heavy, dull, or hard.

Baryencephalia (*bar-en-sef-a'-le-ah*) [*bary-*; *ἑνκεφαλίς*, brain]. Dullness of intellect.

Baryglossia (*bar-e-glos'-e-ah*) [*bary-*; *γλῶσσα*, tongue]. Thick, slow utterance.

Barylalia (*bar-e-la'-le-ah*) [*bary-*; *ἀλγία*, speech]. Thickness of speech.

Baryta, Barytes (*bar-ee'-tah, bar-ee'-tes*) [*barium*]. Barium oxid. **B., Caustic.** See *Barium Hydroxide*. **B., Synthetic.** See *Barium Sulfate*.

Barythymia (*bar-e-thi'-me-ah*) [*bary-*; *θυμός*, mind]. A melancholy, gloomy, or sullen state of mind.

Barytocoargentia (*bar-it-ik-o-ar-jen'-tik*) [*baryta*; *argentum*]. Containing baryta and silver.

Barytocosodic (*bar-it-ik-o-so'-dik*) [*baryta*; *sodium*]. Containing baryta and sodium.

Barytin (*bar-it-in*). Native barium sulfate.

Basal (*ba'-sal*) [*βάσις*, a foundation]. Pertaining to or located at the base. **B. Ganglions**, the optic thalamus and corpus striatum of the brain.

Basalia (*ba-so'-le-ah*) [*basis*]. Huxley's term for the metacarpal bones.

Bascule Movement (*bas'-kūl*) [Fr., *bascule*, a swing]. The recoil of the heart in its systolic motion.

Base (*bās*) [*basis*]. The lowest part of a body or the foundation upon which anything rests. In chemistry, an element or radical that combines with an acid to form a salt. The electropositive molecule or radical of a compound. In pharmacy, the most important part of a prescription. **B., Acid-forming, B., Acidifiable**, one which forms an acid by uniting with water. **B., Aldehyd.** See *Aldin*. **B., Animal**, a ptomain.

Basedow's Disease. Exophthalmic goiter or Graves' disease. See *Goiter, Exophthalmic*.

Basella (*bas-el'-ah*) [Malabar name]. A genus of plants of the order *Chenopodiaceae*. *B. rubra*, Malabar nightshade, is an esculent herb cultivated throughout India, where the juice of the leaves is given in infantile catarrh and an infusion of the leaves is used as tea.

Basement (*bāz'-ment*) [Fr., *basement*]. The fundamental portion. **B.-membrane.** See *Membrane, Basement*.

Bas-fond (*bah-fünd'*) [Fr.] The floor or lowest portion of the urinary bladder.

Basham's Mixture. A mixture of iron and ammonium acetate.

Bas- (*ba-si-*) [*basis*]. A prefix meaning basis or base.

Basial (*ba'-ee-al*) [*basis*]. Relating to a base or to the basion.

Basic (*ba'-sik*). Having properties of a base; i. e., capable of neutralizing acids.

Basichromatin (*bas-e-kro'-mat-in*) [*basi-*; *χρῶμα*, color]. According to Heidenhain, that portion of the nuclear reticulum stained by basic anilin dyes.

Basicity (*bas-is'-it-e*). 1. The quality of being basic. 2. The combining power of an acid.

Basiscranial (*ba-se-kra'-ne-al*) [*basi-*; *κράνιον*, the skull]. Relating to the base of the skull.

B. Axis, a line running from a point midway between the occipital condyles through the median plane to the junction of the ethmoid and presphenoid.

Basidiomycetes (*bas-id-e-o-mi-se'-lēs*) [*basidium*; *μύκης*, a fungus]. A division of fungi comprising genera which produce spores upon basidia.

Basidium (*bas-id'-e-um*) [dim. of *βῆσις*, a base; pl. *basidia*]. In biology, a large cell in the higher fungi, borne on the hymenium and producing spores at its free end.

Basifacial (*ba-se-fa'-shal*) [*basi-*; *facies*, face]. Pertaining to the lower portion of the face.

B. Axis, in craniometry, a line from the anterior point of the premaxilla to the anterior point of the basiscranial axis.

Basifier (*ba'-si-i-er*) [*basi-*; *facere*, to make]. A substance capable of converting a body into a base.

Basigenic (*ba-se-jen'-ik*) [*basi-*; *γενῶν*, to produce]. Producing bases.

Basihyal (*ba-se-hi'-al*) [*basi-*; *ὀστέτης*, shaped like the letter *u*, upsilon]. Either one of the two bones, one on each side, that form the principal part of the body of the hyoid arch.

Basihyoid (*ba-se-hi'-oid*). See *Basihyal*.

Basilar (*bas'-il-ar*) [*basis*]. Pertaining to the base. **B. Artery.** See under *Artery*. **B. Membrane**, a membranous division-wall separating the scala vestibuli from the scala tympani, extending from the base to the apex of the cochlea, and supporting the organ of Corti. **B. Process**, a strong quadrilateral plate of bone in front of the foramen magnum. **B. Suture**, the suture formed by the junction of the basilar process of the occipital bone with the posterior surface of the body of the sphenoid.

Basilateral (*bas-e-lat'-er-al*) [*basi-*; *latus*, side]. Both basilar and lateral.

Basilemma (*bas-il-em'-ah*) [*basi-*; *λέμμα*, a husk]. A basement-membrane.

Basilic (*ba-sil'-ik*) [*βασιλικός*, royal]. Important; prominent; said of a structure or a drug. **B. Vein**, a large vein of the arm on the inner side of the biceps.

Basilicon Ointment (*bas-il'-ik-on oint'-ment*). Rosin cerate. It consists of rosin, 35 Gm.; yellow wax, 15 Gm.; lard, 50 Gm.

Basilopharyngeal (*bas-il-o-far-in'-je-al*). Relating to the basilar process of the occipital bone and to the pharynx.

Basiosubnasal (*bas-il-o-sub-na'-zal*). Relating to the basion and the nasion.

Basilysis (*bas-il'-is-is*) [*basi-*; *lysis*, a loosening]. The breaking-up of the fetal skull in craniotomy.

Basilyst (*bas-il-ist*) [see *Basilysis*]. An instrument for use in perforating the cranial vault and breaking up the base of the skull.

Basin (*ba'-sin*) [M.E.]. 1. The third ventricle of the brain. 2. The pelvis. **B.-trap**, a trap or seat in the outlet of the basin of a water-closet, placed there to prevent the escape into the apartment of noxious and offensive vapors and gases.

Basinasal (*bas-e-na'-sal*) [*basion*; *nasus*, the nose]. Relating to the basion and the nasion.

Basiooccipital (*bas-e-ok-sip'-it-al*) [*basi-*; *occiput*, the back of the head]. A bone, separate in many of the lower vertebrate animals, forming the central axis of the skull. In adult human life it is the basilar process of the occipital bone.

Basioglossus (*bas-e-o-glos'-us*) [*basi-*; *glossa*, the tongue]. That part of the hyoglossus muscle that is attached to the base of the hyoid bone.

Basion (*ba'-se-on*) [*basis*]. A point located at the middle of the anterior margin of the foramen magnum.

Basiotribe (*bas'-e-o-trib*) [*basion*; *τριβειν*, to grind or crush]. An instrument used for perforating or crushing the fetal head.

Basiotripsy (*bas-e-ot'-rip-se*) [see *Basiotribe*]. The operation of crushing the fetal head.

Basipresphenoid (*bas-e-pre-sfe'-noid*). 1. Relating to the basisphenoid and presphenoid bones. 2. The basipresphenoid bone.

Basirrhinal (*bas-e-ri'-nal*) [*basi-*; *ῥίς*, nose]. Relating to the base of the brain and to the nose. Applied to a cerebral fissure located at the base of the olfactory lobe.

Basis (*ba'-sis*) [*ῥῆσις*, foundation]. Base.

Basisphenoid (*bas-e-sfe'-noid*) [*basi-*; *σφῆν*, wedge, *ειδος*, form]. The lower part of the sphenoid bone.

Basisylvian (*bas-e-sil'-ve-an*) [*basi-*; *Sylvius*, an anatomist]. Applied to the transverse basilar portion or stem of the sylvian fissure.

Basitemporal (*bas-e-tem'-po-ral*) [*basi-*; *tempera*, the temples]. Relating to the base or lower part of the temporal bone.

Basivertebral (*bas-e-ver'-te-bral*) [*basi-*; *vertebra*, a joint]. Relating to the basis or centrum of a vertebra.

Basophil (*bas'-o-fil*) [*basis*; *φιλεῖν*, to love]. Cells and tissue elements showing an affinity for basic rather than for acid dyes.

Basophilia (*bas-o-fil'-e-ah*) [*basophil*]. Increase in the number of basophils in the circulating blood.

Basophilic (*bas-o-fil'-ik*) [*basophil*]. 1. Combining readily with bases; stainable by means of basic dyes. 2. Any histologic structure which stains with basic dyes.

Basophilous (*bas-af'-il-us*) [*basophil*]. Stained by basic rather than by acid dyes.

Basophobia (*bas-o-f'-o-be-ah*) [*basis*; *φοβος*, fear]. Complete inability to walk or stand erect, due to emotional causes. The muscles concerned are not appreciably impaired.

Bass-deafness (*bas'-de-f-nes*) [Fr. *basse*, fem. of *bas*, low, M.F., *deaf*]. Deafness to certain bass-notes, the higher notes being heard.

Bassia (*bas'-e-ah*) [*Bassi*, an Italian physician]. A genus of plants of the order *Dioscoreaceae*. *B. butyrosa*, the Indian butter-tree, furnishes from its seeds a pure vegetable butter called *chooric*, esteemed as an application in rheumatism, as an emollient for the hands, as a dressing for the hair, and to adulterate ghee; it is also used for soap-making and for illumination. The fruit is edible, and the flowers furnish a sugar equal, if not superior, to date-sugar. *B. latifolia* is the mahwa-tree of central India where the flowers are eaten by the natives and an intoxicating liquor is distilled from them. The seeds yield a concrete oil in large quantities, which is used for illuminating and to adulterate ghee; the seeds also yield stearic acid on saponification. *B. longifolia*, a tree of India, yields from the bark a gummy exudate which is employed in rheumatism; the bark is astringent and emollient. An oil is expressed from the ripe fruit. *B. oleifera* is an African species the seeds of which furnish an oil used in the Gaboon region as a food and an application for rheumatism. *B. sericea* is a Java species yielding a kind of gutta-percha.

Basophilic (*bas-o-fil'-e-ah*). Abnormal condition of the blood in which the erythrocytes develop basophile granules.

Bassorin (*bas'-o-rin*) [*Bassora*, an Asiatic town], $C_{10}H_{10}O_8$ or $2C_6H_{10}O_3$. 1. A tasteless, odorless, vegetable mucilage, insoluble in cold water, but rendered soluble by alkalis; it is found in gum tragacanth (of Bassora) and in cherry and plum gums. 2. A term for all vegetable mucilages.

Bast [AS., *basti*, a lime-tree]. The inner bark of exogenous plants. The fibrous parts of the bark are used in making cordage, and have a limited use in surgery.

Bastard (*bas'-tard*) [OF., *filz de bas*, son of a bast or of a pack-saddle]. 1. An illegitimate child. 2. Illegitimate. 3. A hybrid species. 4. The name given to an impure sugar procured by concentrating molasses and allowing it to crystallize slowly in molds.

Basyl (*ba'-sil*) [*ῥῆσις*, foundation]. The electropositive constituent of a compound.

Basylous (*bas'-il-us*). See *Basigenic*.

Bateman's Disease. Molluscum contagiosum. **B.'s Drops**, the tinctura pectoralis, a weak tincture of opium, camphor, and catechu; a popular remedy in coughs.

Bath [AS., *bath*]. 1. A bathing place or room. 2. The medium in which the body is wholly or partly immersed. As therapeutic agents, baths are classified according as water, vapor, air, etc., is used; according to the temperature, as hot, temper-

ate, cold, etc.; according to the end desired, as nutritional, medicinal, stimulant, etc. Special forms of bath are the moor, peat, mud-, slime, pine-leaf, herb (hay, gentian, ramomile, juniper, marjoram, etc.), brine, sand, tan, bran, malt, glue, soup, milk, whey, blood, wine, guano, starch, soap, acid, iron, sulfur, carbonic acid, compressed air, mustard, electric, etc. 3. A medium, such as sand, water, oil, or other substance, interposed between the fire and the vessel to be heated, in chemic manipulations. **B., Acid**, add $\frac{1}{2}$ oz. of nitric acid and 1 to 3 oz. of hydrochloric acid to 30 gallons of warm water in a wooden or earthenware vessel, and immerse the patient in this for from 10 to 20 minutes. For a foot-bath, add $\frac{1}{2}$ oz. of nitric acid and 1 oz. of hydrochloric acid to 4 gallons of warm water. This is said to be useful in cases of dyspepsia with sluggish liver and constipation. **B.s, Acrato-thermal**, baths prepared from natural mineral waters of high temperature, but in which the gaseous and saline constituents are small in quantity and of feeble therapeutic action. *Syn., Indifferent thermal baths; Simple thermal baths; Unmixed thermal baths.* **B., Air-**, a bath in which but little water is employed, the body being exposed freely to the air. It is employed in those cases in which there is a tendency to catch cold on slight exposure. **B., Alcohol**, one in dilute alcohol, used to reduce temperature in fever. **B., Alkaline**, add 3 oz. of potassium carbonate, or 6 of sodium carbonate, to 25 or 30 gallons of hot water. It is used in chronic squamous skin diseases, chronic rheumatism, and lithemia. It should be taken in a wooden, earthenware, or enameled tub. **B., Animal**. 1. One prepared from dung of cattle or the contents of the first stomach of a freshly slaughtered ox. 2. The introduction of the whole body or the part affected with rheumatism into the body-cavity of an animal just slaughtered. **B., Antimonial**, one containing 1-2 oz. of tartar emetic, it is used in skin diseases. **B., Antirheumatic**, one containing, in sufficient water for the purpose, 100 Gm. of oil of turpentine, 10 Gm. of oil of rosemary, 50 Gm. of sodium carbonate. **B., Antisyphilitic**, a solution of 15 Gm. of mercury bichloride in 500 Gm. of water, to be added to the bath at the time of using. **B., Astringent**, one prepared with tannin or other astringents, to control sweating or in the treatment of skin diseases. **B., Astringent, Most's**, a bath for extensive burns, consisting of a solution of 200 Gm. of alum in 6 to 8 pails of cold water and 1 pailful of curdled milk. **B., Balsamic**, one containing tar, turpentine, or the buds and bark of terebinthaceous plants. **B., Bog-**, a bath made by mixing bog earth (produced by the decomposition of plants in the presence of water and bound at iron and sulfur springs) with warm water to form a pulpy or mushy consistence.

This is used as a mud-bath. **B., Borax**, borax, 4 oz.; glycerol, 3 oz.; water, 30 gallons. It is used in the same class of cases as the bran-bath. **B., Bran-**, boil 1 pound of bran in 1 gallon of water, strain, and add 30 gallons of water. This is a soothing and emollient bath, and is of service in squamous and irritable conditions of the skin. **B. Buff-**, one in which the bather is nude. **B., Chemic**, in chemistry, an apparatus for regulating the temperature of chemic processes by surrounding the substance with water, sand, oil, or mercury, through which the heat is communicated. **B., Cold**, a bath of cold water, the temperature of the latter varying from 32° - 70° F. (0° - 21° C.). It is used to reduce fever and as a general stimulant. **B., Dipolar**, a hydroelectric bath in which the patient does not come in contact with either of the electrodes, but these are immersed in the water at each end of the tub. **B., Effervescent**, a liquid bath containing a free gas, which is given off with effervescence. **B., Egyptian**, a modification of the Turkish bath, with rise of temperature to the maximum point, followed by lowering of temperature to the initial point. **B., Electric**. 1. One in which the medium of the bath and the bather's person are included in the circuit of a galvanic current. 2. A bath in which an electric current is generated by the decomposition of the chemic constituents of the medium. **B., Electrothermal**, a hot bath combined with exposure to the influence of electricity. **B., Foot-**, a bath for the feet, used as a derivative agent in cases of cold, etc. **B., Fucus-**, one containing seaweed, or a decoction of it, imparting sodium chlorid and a small percentage of iodine. **B., Full**, one in which the patient's body is entirely covered by water, so that his chin just clears it. **B., Gas-**, one in which a gas is applied to the entire body or an affected part by means of a closed cabinet. **B., Graduated**, one in which the temperature of the water is gradually lowered by the addition of cold or iced water. **B., Herb-**, made by using the extract of pine-needles or of some aromatic herbs; used as a tonic. **B., Hip-**. See *B., Sitz-*. **B., Hot**, one in which the temperature of the water ranges from 103° to 110° F. (40° - 43.3° C.). It acts upon the skin, producing free perspiration, and accelerates the pulse and respiration. **B., Hot-air**, a Turkish bath. A bath in hot air. It is useful as a diaphoretic, and in catarrhal, neuralgic, and rheumatic conditions, but is contraindicated in fatty degeneration of the heart. **B., Hydroelectric**, a water-bath charged with electricity. **B., Hydrostatic**, a variety of permanent water-bath in which the patient is supported without total immersion. **B., Indian**, massage in combination with a Turkish bath. **B., Internal**, lavage of the stomach or rectum. **B., Iodin-**, one to which is added a solution of

8 Gm. of iodine and 16 Gm. of potassium iodide in 600 Gm. of water. **B., Kinetotherapeutic**, a water-bath in which specified movements are carried out. **B., Light-**. 1. See *B., Sun-*. 2. Exposure of affected parts to rays of light by means of various apparatus; also of the whole body for inducing perspiration. **B., Lime-**, a bath to which slaked lime is added at the time of using; it is used in gout and in treatment of itch. **B., Medicated**, a bath in which medicinal substances, as mineral salts, sulfur, etc., are dissolved or held in suspension. **B., Mercurial**, a bath for the treatment of syphilis, given in the vapor of mercury, usually prepared by vaporizing calomel over an alcohol lamp. **B., Milk-**, a bath in milk, given for nutritive purposes. **B., Mineral**. 1. The water of a mineral spring used as the medium. 2. One to which a solution of mineral substances has been added. **B., Monopolar**, a hydroelectric bath in which the wall of the metal tub is utilized as a large electrode. The current entering here is conducted to the entire surface of the body in contact with the water, and passes out by means of a large metal electrode the edges of which are covered by a rubber pillow so placed that the patient can lie upon it without coming in contact with the metal. Cf. *B., Dipolar*. **B., Moor-**, a bath in water mixed with the earth of moors. **B., Mud-**, a bath prepared by mixing well-seasoned earths, containing more or less mineral matter, with water containing the same substances. It is useful in chronic rheumatism. **B., Mustard-**, made by inclosing from 2 to 4 oz. of ordinary mustard in a piece of muslin or thin linen and hanging it in about four gallons of hot water until the latter becomes yellow, or simply by adding mustard to water. It is used as a general bath for infants in collapse, convulsions, or severe bronchitis, the child being left in until the skin becomes distinctly reddened. It is also used as in the foot-bath or Sitz-bath in amenorrhea. **B., Nauheim**, a natural thermal effervescent (gaseous) mineral bath. **B., Needle**. See *B., Rain-*. **B., Nutritive**, one containing wine, milk, or any nutritive ingredient. **B., Oxygen-**, an inhalation of oxygen to correct inadequate aeration of the blood, also a local application of oxygen gas to gangrenous ulcers. **B., Ozone-**. See *B., Fucus*. **B., Pack-**, one in which the body is wrapped in wet cloths. See *B., Sheet-*. **B., Peat-**, an application of bog-earth containing much vegetable matter and used in gout and rheumatism. **B., Pine-**, prepared by adding a decoction of pine needles, or some pine-extract, to hot water. It is mildly stimulating, and is employed in hysteria, gout, and rheumatism. **B. of Plombières**, a bath to which a solution of 100 Gm. of powdered gelatin in hot water is first added and afterward a mixture of 100 Gm. of sodium carbonate, 20 Gm.

each of sodium chlorid and sodium bicarbonate, and 60 Gm. of sodium sulfate. **B., Plunge-**, a bath, hot or cold, into which the patient plunges. **B., Rain-**, consists of from four to six three-fourths circles of pipes secured together at a distance of 2 to 3 inches. Each pipe has three lines of fine perforations, from which the stream issues under pressure, striking the body of the patient at all points with considerable force. **B., Russian**, a vapor-bath, the vapor being generated by throwing water upon heated mineral or metallic substances. Syn. *Vapor-bath*. **B., Sand-**. 1. One in which the body of the patient is placed in a layer of dry sand that has been heated. 2. In chemistry, the immersion of a crucible, etc., containing a heat-compound, in a vessel containing fire sand, the latter being heated gradually to a high temperature. **B., Seaweed**. See *B., Fucus*. **B., Sheet-** the application of cold water to the body through the medium of a wet sheet or towel placed upon the skin. It is used to reduce temperature. **B., Shower-**, a douche in which the water is delivered against the body from a nozzle with numerous perforations. **B., Sitz-**, one in which only the buttocks and hips are immersed in water. It is useful in pelvic inflammations, amenorrhea, and retention of urine. **B., Slime-**, a bath in water mixed with the slimy deposit of organic matter found in rivers and ponds. **B., Sponge-**, one in which the patient's body is rubbed with a wet sponge. It is used to reduce temperature. **B., Sulfur**, potassium sulfid 4 to 8 oz. in 30 gallons of water; a little sulfuric acid may be added. It is used in certain skin diseases, scabies, lead colic, and lead palsy. **B., Sun-**, the exposure of the naked body to the sun's rays. **B., Sweat-**, **B., Sweating**, a bath to induce a free flow of perspiration; e. g., a Turkish bath. **B., Tepid**, the temperature of the water ranges from 85°-95° F. (29.4°-35° C.). It acts as a sedative, cleansing, and detergent agent; the pulse, respiration, excretion, secretion, and temperature are practically unaffected. **B., Turkish**, one in which the bather is placed successively in rooms of higher temperature, then shampooed or rubbed, and finally stimulated to a douche of cold water. See *B., Hot-air*. **B., Vacuum**, the treatment of parts by subjecting them to a partial vacuum. **B., Vapor-**. See *B., Russian*. **B., Warm**, a bath in water having a temperature of from 90°-100° F. (32.2°-38.3° C.). It is used to calm the nervous system, produce sleep, and allay reflex irritability. **B., Water-**. 1. A bath of water. 2. In chemistry, a bath of water for immersing vessels containing substances that must not be heated above the boiling-point of water. **B., Zinc-chlorid**, a chemical bath of molten zinc chlorid for immersion of substances not to be heated beyond 700° C.

Bathmotropic (*bath-mo-tro-pik*) [*Gr.* *bathos*, deep].

threshold; *epistiv*, to turn]. Applied by T. W. Engelmann to a supposed set of fibers in the cardiac nerves which affect the excitability of the cardiac muscle. Cf. *Dromotropic*; *Inotropic*.

Bathyessthesia (*bath-es-the'-ze-ah*) [*βαθῆς*, deep, *αἰσθησις*, sensation]. Oppenheim's term for the muscle-sensations.

Bathymetry (*bath-i'-mei-re*) [*βαθῆς*, deep; *μετρον*, a measure]. The measurement of the depths of the sea or of any body-cavity, natural or abnormal.

Batophobia (*bat-o'-fo-be-ah*) [*βατός*, a height; *φοβος*, fear]. 1. *Acrophobia*; dread of being at a great height. 2. Dread of high objects, fear of passing near a high building or of going through a deep valley.

Batrachcephalus (*bat-rak-o-sef'-al-us*) [*βατραχίος*, a frog, *κεφαλή*, the head]. Having a frog like head.

Batracin (*bat-ra-sin*) [*βατραχος*, a frog]. A poisonous secretion obtained from the cutaneous pustules of toads. According to Calmeil, the poison of toads contains methyl-carbonyl-acid and isocyanacetic acid.

Batracosia (*bat-tra-ko'-se*) [It.]. See *Ranula*.

B. sottolinguale, a form of diphtheria supposed to be contracted from fowls, and characterized by swelling of the submaxillary and sublingual glands.

Battarism (*bat'-ar-izm*) [*βατταρισμός*, a stuttering]. Stuttering or stammering.

Battery (*bat'-er-ee*) [*batteria*, a beating; battery].

A series of two or more pieces of apparatus arranged to produce increased effect, as battery of boilers, prisms, lenses, galvanic cells. It is usually applied to a series of cells producing electricity (voltaic or galvanic battery), also, frequently, to a single cell. **B.**, **Cautery**, a galvanic battery with high electromotive force for heating a wire and as a cautery. **B.**, **Faradic**, **B.**, **Faradaic**, one giving a faradic current. **B.**, **Galvanic**, one giving a galvanic or chemical current. **B.**, **Hare's**, a battery of cells excited by low resistance. Two large plates of zinc and copper, separated from each other by cloth or some indifferent substance, are rolled on a wooden cylinder and immersed in acidulated water. See *Deflagrator*. **B.**, **Primary**, the combination of a number of primary cells so as to form a single battery. **B.**, **Secondary**, the combination of a number of storage cells to form a single electric source. The following table shows the materials used in the more important batteries, and the electromotive force (E.M.F.) in volts. **PRINCIPAL BATTERIES AND ELEMENTS, FLUIDS, ETC.** BEETZ.—Positive element, zinc; negative element, copper; exciting agent, zinc sulfate in plaster-diphenyl; depolarizing agent, copper sulfate in plaster-diphenyl; E.M.F., 1.04 volts. **BUNSEN**.—Positive element, zinc; negative element, carbon; exciting agent, dilute sulfuric acid; depolarizing agent, nitric acid; E.M.F., 1.75-1.90 volts. **CALLAUD**.—Positive ele-

ment, zinc; negative element, copper; exciting agent, solution of zinc sulfate; depolarizing agent, cupric sulfate; E.M.F., 1.0-1.14 volts. **DANIELL**.—Positive element, zinc; negative element, copper; exciting agent, zinc sulfate; depolarizing agent, cupric sulfate; E.M.F., 1.0-1.14 volts. **EDISON-LELANDE**.—Positive element, zinc; negative element, cupric oxide and carbon; exciting agent, potassium hydroxide; depolarizing agent, cupric oxide; E.M.F., 0.75 volt. **FULLER**.—Positive element, zinc; negative element, carbon; exciting agent, zinc chloride; depolarizing agent, potassium dichromate and hydrochloric acid; E.M.F., 1.5 volts. **GAIFFE**.—Positive element, zinc; negative element, silver; exciting agent, zinc chloride; depolarizing agent, silver chloride; E.M.F., 1.02 volts. **GRAVITY**.—See *Callaud*. **GRENET**.—Positive element, zinc; negative element, carbon; exciting agent, sulfuric acid and potassium dichromate; depolarizing agent, chromium trioxide; E.M.F., 2 volts. **GROVE**.—Positive element, zinc; negative element, platinum; exciting agent, dilute sulfuric acid; depolarizing agent, nitric acid; E.M.F., 1.94-1.97 volts. **LATIMER-CLARK**.—Positive element, zinc; negative element, mercury; exciting agent, mercuric sulfate; depolarizing agent, mercuric sulfate; E.M.F., 1.436 volts. **LECLANCHÉ**.—Positive element, zinc; negative element, carbon; exciting agent, ammonium chloride; depolarizing agent, manganese dioxide; E.M.F., 1.42 volts. **LELANDE-CHAPPEL**.—Positive element, zinc; negative element, copper or iron; exciting agent, potassium hydroxide; depolarizing agent, cupric oxide; E.M.F., 0.98 volt. **MAISCHÉ**.—Positive element, zinc scraps in a bath of mercury; negative element, platinized carbon; exciting agent, common salt solution; depolarizing agent, none separate; E.M.F., 1.25 volts. **MARIE-DAVY**.—Positive element, zinc; negative element, carbon; exciting agent, sulfuric acid, dilute; depolarizing agent, mercuric sulfate; E.M.F., 1.52 volts. **MAYNOOTH**.—Positive element, zinc; negative element, iron; exciting agent, sulfuric acid, dilute; depolarizing agent, nitric acid (strong). **NEAUDET**.—Positive element, zinc; negative element, carbon; exciting agent, common salt solution; depolarizing agent, chlorinated lime; E.M.F., 1.03 volts. **POGGENDORF**.—Positive element, zinc; negative element, carbon; exciting agent, potassium dichromate and sulfuric acid; depolarizing agent, chromium trioxide; E.M.F., 1.08 volts. **SCHANSCHIEFF**.—Positive element, zinc; negative element, carbon; exciting agent, mercurial solution; depolarizing agent, none separate; E.M.F., 1.50 volts. **SCRIVANOFF**.—Positive element, zinc; negative element, silver; exciting agent, potassium hydroxide; depolarizing agent, silver chloride; E.M.F., 1.5 volts. **SNEF**.—Positive element, zinc; negative element, platinized silver; exciting agent, sulfuric acid, dilute; depolarizing agent, none; E.M.F., 0.5 to 1.0

volt. WALKER.—Positive element, zinc; negative element, platinized carbon; exciting agent, sulfuric acid, dilute; depolarizing agent, none. E.M.F., 0.66 volt. WARREN DE LA RUE.—Positive element, zinc, negative element, silver, exciting agent, ammonium chloride, depolarizing agent, silver chloride; E.M.F., 1.05 volts.

Battey's Operation. Removal of the ovaries in order to eliminate their physiologic influence.

Battledore (*bat'-el-dôr*) [ME., *batyldoure*, a bat for beating clothes]. An instrument shaped like a racket. **B. Placenta**, one in which there is a marginal insertion of the cord.

Baudelocque's Diameter (*ba'-del-ok*). In obstetrics, the external conjugate diameter of the pelvis.

Bauhin, Valve of (*ba'-hin*). The ileocecal valve.

Bauhinia (*ba'-hin'-e-ah*). A genus of plants of the order *Leguminosae*. *B. variegata* is a tree of India; the bark is astringent and used as a tonic in fevers; the buds are used in diarrhea and as a vermifuge.

Baumann's Coefficient. The ratio existing between the total sulfuric acid and the ether sulfuric acids of the urine, it amounts to 10%. **B.'s Reaction for Dextrose**, to an aqueous solution of grape-sugar add benzoyl chloride and an excess of sodium hydrosul and shake until the odor of benzoyl chloride disappears. A precipitate of benzoyl acid ester of dextrose will be produced which is insoluble in water and alkalis.

Baumann and Goldmann's Test for Cystin. If a solution of cystin is shaken in caustic soda with benzoyl chloride, a voluminous precipitate of benzoyl cystin will be produced. The sodium salt occurs as silky plates, readily soluble in water, but nearly insoluble in an excess of caustic soda.

Baunscheidtism (*baun'-shî-tizm*) [named from *Baunscheidt*, the inventor]. A mode of treating rheumatism and chronic neuralgias by counterirritation, the latter being produced by pricking the exterior of the part affected with fine needles dipped in oil of mustard, formic acid, or other irritant.

Bavarian Dressing, B. Splint. A variety of immovable dressing in which the plaster is applied between two flannel cloths.

Bavarol (*ba'-ar-ol*). A proprietary brown, aromatic liquid used in 5% solution as a disinfectant.

Bawchan, Bauchee. Names given in India to the seeds of *Pisonia corymbosa*, used as a tonic and in skin diseases. Syn. *Bauchan*; *Bauchee*.

Bay, Lacrimal. The depression at the inner canthus of the eye, holding the lacrimal canal. **B., Oil of.** See *Myrica*. **B.-rum.** See *Myrica*. **B.-tree**, the *Laurus nobilis*;

also *Prunus laurocerasus*, commonly called the laurel or the cherry-laurel.

Bayard's Ecchymoses. Small capillary hemorrhages found in the pleura and peritoneum of infants who, as the result of asphyxia, have made premature efforts at breathing in the uterus.

Bayberry (*ba'-ber-ee*) [ME., *bay*; *berry*]. 1. The berry of *Laurus nobilis*, bay, or noble laurel. 2. The wax-myrtle, *Myrica caribaea*, and its fruit. 3. The pimenta, or allspice.

Bayle's Disease. Progressive general psychosis of the insane. **B.'s Granulations**, military tubercles.

Bayonet-leg (*ba'-on-et-leg*). A backward displacement of the leg bones.

Bazin (*ba'-zin*). Synonym of *Multum contagiosum*.

Bazin's Disease. 1. *Psoriasis humilis*. 2. Scrofulous ulcer of the leg. **B.'s Erythema**, erythema induratum scrofulosorum, a form most commonly seen in strumous individuals; it attacks the calf, or the leg immediately below, more frequently than the front of the leg, occurring in diffuse, ill-defined patches or in nodules, bright red at first and gradually assuming a violet hue. The nodules can be superficial or deep, a quarter of an inch to an inch or more in diameter, and may be slowly absorbed, and necrose or slough out, leaving a very indolent ulcer.

Bdella (*del'-ah*) [*bdella*, a leech]. 1. A leech. 2. A varicose vein.

Bdellepithecium (*del'-e-pi-the'-se-um*) [*bdellepitheca*, to put on]. A tube for applying leeches.

Bdellium (*del'-e-um*) [Heb., *b'delch*]. A resinous gum exuding from various species of *Balsamodendron*. It resembles myrrh. **B., Indian**, has been recommended as an emmenagogue.

Beads, Rachitic. "Rachitic rosary," the so-called "beading of the ribs" in rickets; a succession of visible and palpable swellings at the points where the ribs join their cartilages.

Beak (*bêk*) [ME., *beke*]. 1. The mandibular portion of a forceps. 2. The lower end of the calamus scriptorius. 3. The pedicle of the splenium of the corpus callosum. **B., Coracoid**, the beak of the coracoid process of the scapula. **B. of the Encephalon.** See *Beak* (1). **B. of the Sphenoid Bone.** See *Rastrum sphenoidale*.

Beaker (*bê'-ker*) [ME., *beker*]. A wide-mouthed glass vessel used in chemie laboratories. **B.-cell**, the goblet cell found in mucous membranes.

Beale's Fiber. The fine spiral fiber serving as the process of some of the sympathetic ganglion cells of the frog.

Bean (*bên*) [ME., *beane*]. The seeds of several plants, mostly *Leguminosae*, especially those of the common bean, *Faba vulgaris*. **B.-Calabar.** See *Physostigma*. **B. of St. Ignatius.** See *Ignatia*.

Bearberry. See *Uva ursi*.

Beard's Disease. Nervous exhaustion; neurasthenia.

Beard-Valleix's Points. See *Valleix's Points douloureux*.

Bear's-foot. Leafcup. A composite-flowered plant, *Polymnia uedalia*, of North America. A popular remedy for enlargement of the spleen or the "ague-cake" of malarious regions.

Beat (*bêt*) [ME., *beten*]. The pulsation of the arteries or the impulse of the heart. **B., Apex-**, the stroke of the heart-apex against the chest-wall. **B., Heart-**, a pulsation of the heart. **B., Pulse-**, an arterial pulsation which can be felt.

Beatty-Bright's Friction-sound. The friction-sound produced by inflammation of the pleura.

Beau's Disease [*bo*]. Asystole; cardiac insufficiency. **B.'s Lines**, the transverse rings seen on the finger-nails after convalescence from exhausting diseases.

Beaumès' Sign (*bo'-mâ*). Retrosternal pain in angina pectoris.

Beaumès-Colles' Law. See *Colles' Law*.

Beauperthuy's Method (*bo'-per-thrue*). A method of treating leprosy by good hygiene, bathing with olive oil, the internal administration of mercury bichlorid, and abstinence from salted meats.

Beauvais' (Landré) Disease (*bo'-vâ*). Chronic articular rheumatism.

Beberin (*be'-ber-in*). See *Nectandra*. **B. Hydrochlorate**, $C_{10}H_{12}NO_2HCl$, reddish-brown scales, soluble in alcohol and water, and used as an antipyretic and tonic. Dose $\frac{1}{2}$ to 1 gr. (0.005-0.007 Gm.) 3 or 4 times daily. **B. Sulfate**, $(C_{10}H_{12}NO_2)_2H_2SO_4$, reddish-brown scales, soluble in water and alcohol; uses and dose as in *B. Hydrochlorate*.

Beccaria's Sign (*bek-kah'-re-ah*). Painful pulsating sensations in the occipital region during pregnancy.

Bechic (*bek'-ik*) [*ḡḡ*, a cough]. Relieving cough; a remedy against cough.

Bechterew's Disease (*bek'-ter-u*). Ankylosis of the vertebral column, associated, as a rule, with muscular atrophy and sensory symptoms. **B.'s Layer**, the layer of fibers between and parallel to the tangential fibers and Bailarger's layer in the cerebral cortex. **B.'s Nucleus**, the nucleus of the vestibular portion of the auditory nerve. **B.'s Reaction**, the minimum strength of the electric current necessary to provoke muscular contraction requires a gradual diminution at every interruption of the current or change in density, to prevent tetanic contraction which will occur if the initial strength is maintained. It is observed in tetany. **B.'s Sign**, anesthesia of the popliteal space in tabes dorsalis. **B.'s Tract**, the central tract of the tegmentum that passes between the mesial pole of the superior olivary body and the 5th.

Becker's Reaction for Picrotoxin. The alkaloid reduces Fehling's solution upon the application of gentle heat. **B.'s Sign**, spontaneous pulsation of the retinal arteries in exophthalmic goiter.

Béclard's Hernia (*bek'-lar*). Hernia occurring through the saphenous opening. **B.'s Nucleus**, a vascular, bony nucleus, of lenticular shape, appearing in the cartilage of the lower epiphysis of the femur during the thirty-seventh week of fetal life.

Becquerel's Disc. (*bek'-er-el*). See *Disc, Becquerel's*. **B.'s Pills**, pills containing quinin, extract of digitalis, and colchicum seeds; they are used in gout. **B.'s Rays.** See *Rays, Becquerel's*.

Bed [AS., *bedd*]. The couch or support on which the body may rest in sleep or in sickness; usually a mattress of straw, hair, or similar substance. **B., Air-**, a mattress of rubber or leather that can be inflated with air. **B., Arnott's** (Neil), a rubber mattress filled with water, designed to prevent bed-sores. **B., Bandeloux's**, an air-bed furnished with a vessel for urine and surmounted with a gauze-covered cradle. **B., Fracture-**, an especial device for the use of a patient confined with a fracture, composed of sections forming a double or triple inclined plane with an aperture to allow of the ejection of urine and feces. **B.-hoist**, a device for lifting a patient from bed. **B.-pan**, a large shallow vessel for receiving the alvine discharges of bedridden patients. **B., Protection-**, a bed arranged for the confinement of maniacs in a recumbent posture. **B.-rest**, an apparatus for propping up patients in bed. **B.-sore**, a sore produced on any part of the body by prolonged pressure against the bed or by trophic changes in paralyzed parts. **B.-swing**, an appliance like a hammock for swinging a patient clear of the bed. **B., Water-**, a rubber mattress containing water; it is used to prevent the formation of bed-sores.

Bedbug (*bed'-bug*). An apterous insect, *Cimex lectularius*, that infests bedsteads, and at times is parasitic upon the human body.

Bedlam (*bed'-lam*) [ME., *bedlem*, a corruption of *Bethlehem*]. An insane asylum.

Bedlamism (*bed'-lam-izm*) [*Bedlam*]. Insanity.

Bedlamite (*bed'-lam-it*) [*Bedlam*]. A madman; an insane person.

Bednar's Aphthæ. See *Aphthæ, Bednar's*, under *Aphthæ*.

Bedridden (*bed'-rid-n*). Confined to bed; applied especially to those who seem permanently so affected.

Beef (*bêf*) [ME., *beſe*]. The flesh of domestic cattle. It consists of water, 73; fibrin, 15, gelatin, 4; albumin, 3; fat and other substances, 5%. **B.-extract**, the soluble fibrin of lean meat partly desiccated. **B.-measles.** See *Cyticerus bovis*. **B.-tea**, the soluble extractive matter of beef, made by steeping finely cut lean beef in its weight of water and straining.

Beeley's Square and Plumb-line. An instrument to measure degrees of deformity.

Beer (*ber*). See *Malt Liquors*.

Beer's Cataract Knife (*bär*). A knife with a triangular-shaped blade, for making section of the cornea in the removal of the crystal-line lens.

Beeswax (*bēz'-waks*). *Cera flava* (U. S. P.), wax secreted by bees, of which their cells are constructed. It is used in making candles, ointments, and pomades.

Beet (*bēt*). The genus *Beta*, especially *B. vulgaris*, the common beet.

Begbie's Disease. 1. Exophthalmic goiter. 2. Localized rhythmic chorea.

Beggiatoa (*bej'-at-ah*) [after the Italian botanist, J. Beggiato]. A genus of bacteria described by Trevisan, consisting of swinging or gliding, milk-white, gray, rosy, or violet threads. They decompose sulfur compounds and store up sulfur granules in their protoplasm. They are found in stagnant, fresh, or salt water, particularly in that contaminated with sewage or factory-waste. See under *Bacteria*.

Béhier-Hardy's Symptom (*ba'-he-a*). Aphonia, an early symptom in pulmonary gangrene.

Behring's Law (*ba'-ring*). The blood and blood serum of an individual who has been artificially rendered immune against a certain infectious disease may be transferred to another individual with the effect of rendering the other also immune. **B.'s Serum**, serum containing diphtheria-antitoxin.

Beigel's Disease (*bi'-gel*). Trichorrhæxis nodosa.

Beissenhirtz's Reaction for Anilin. On the addition of a grain of potassium dichromate to a solution of anilin in concentrated sulfuric acid the solution becomes first red, then blue, the color gradually disappearing.

Bel, Bela (*be'-lah*) [Hind.]. The dried, half-ripe fruit of *Ficus marmelos*, or Bengal quince. It is recommended as a remedy for chronic diarrhea and dysentery. The ripe fruit is slightly laxative. Dose ½-1 dr. (2-4 Gr.).

B., Liquid Extract of (*extractum bele liquidum* B. P.). Dose 1-2 dr. (4-8 Cc.).

Belching (*belch'-ing*) [ME., *belchen*]. The expulsion of gas from the stomach through the mouth, eructation.

Belemnoid (*bel'-em-oid*) [*Idem*, a dart; *eidōs*, form]. 1. Dart-shaped; styloid. 2. The styloid process of the ulna or of the temporal bone.

Bell (*bēl*) [ME., *bel*]. A hollow, metallic, sounding instrument. **B.-gastrula**. See *Archigastrea*. **B.-metal**, an alloy of copper, zinc, tin, and antimony. **B. Sound**, **B. Tympany**, the sound produced in pneumothorax by striking a coin, placed flat upon the chest with another coin. It can be heard through the stethoscope placed over the affected side.

Bell's Aneurysm. See *Aneurysm*, *Bell's*.

B.'s Disease. 1. See *Bell's Mania*. 2. See *Bell's Paralysis*. **B.'s Law**, the anterior spinal nerve-roots are motor, the posterior, sensory. **B.'s Mania**, acute delirium, acute periencephalitis. **B.'s Muscle**. See under *Muscle*. **B.'s Nerves**, the external and internal respiratory nerves—i. e., the posterior thoracic and phrenic nerves. **B.'s Palsy**, **B.'s Paralysis**, peripheral paralysis of the facial nerve. **B.'s Phenomenon**, upward and outward rolling of the eyeball when an attempt is made to close the eye of the affected side in peripheral facial paralysis. **B.'s Respiratory Nerve**, the long thoracic nerve. **B.'s Spasm**, convulsive facial tic.

Belladonna (*bel'-ah-don'-ah*) [It., *Bella donna*, beautiful lady]. Deadly nightshade. A perennial plant of the order *Solanaceæ*, indigenous to southern Europe and Asia, and cultivated in the United States. Its properties are due to the alkaloids *atropin* and *belladonnin*, the latter thought to be identical with hyoscyamin. Both leaves and root are employed. It is used as an antispasmodic, as a cardiac and respiratory stimulant, and to check secretions, as those of the sweat and milk. **B. Leaves** (*belladonna folia*, U. S. P.), the dried leaves of *Atropa belladonna*. **B. Leaves, Extract of** (*extractum belladonna foliorum*, U. S. P.). Dose ½ gr. (0.01 Gr.). **B. Leaves, Tincture of** (*tinctura belladonna foliorum*, U. S. P.), 15 %. Dose 1-20 min. (0.06-2.0 Cc.). **B. Liniment** (*linimentum belladonna*, U. S. P.), made of camphor 4, fluidextract of belladonna root, 95. **B. Ointment** (*unguentum belladonna*, U. S. P.) contains extract of belladonna leaves, 10; diluted alcohol, 6; benzoinated lard, 65; hydrous wool-fat, 20. **B. Plaster** (*emplastrum belladonna*, U. S. P.), made of adhesive plaster and extract of belladonna leaves. **B. Root** (*belladonna radix*, U. S. P.), the dried root of *Atropa belladonna*. **B. Root, Fluidextract of** (*fluidextractum belladonna radices*, U. S. P.). Dose 1-5 min. (0.05-0.3 Cc.).

Belladonnin (*bel'-ah-don'-in*) [See *Belladonna*]. $C_{17}H_{23}NO_3$. An alkaloid found in belladonna. It resembles atropin, hyoscyamin, and hyoscin. It occurs with atropin, and is likewise decomposed into tropin and oxatropin, $C_{17}H_{23}NO_3$. See *Belladonna*.

Bell-Bernhardt's Phenomenon. See *Bell's Phenomenon*.

Bellini's Duct (*bel'-ē-ne*). One of the excretory ducts of the kidney. **B.'s Ligament**, a ligamentous band extending from the capsule of the hip-joint to the greater trochanter of the femur. **B.'s Tubes**, the straight uriniferous tubules.

Bellite (*bel'-it*) [*bellum*, war]. An explosive employed both in war and in blasting. A principal element in its manufacture is nitrobenzol. The most prominent symptoms induced by its inhalation and absorption are headache, mental confusion, dyspnea, pallor, blueness of the lips, general lividity, coma, insensibility.

Bell-Magendie's Law. See *Bell's Law*.

Belloco's Cannula (*bel'-oks*). An instrument used in plugging the nares.

APPLICATION OF BELLOCO'S CANNULA (Gould and Pyle's Cyclopaedia)

Bellonia (*bel'-o-ne-ah*). [Peter Belon (1499-1564), a French naturalist]. A genus of plants of the order *Geraniales*. *B. aspera* is a shrub of the West Indies; the bark is used in intermittent fever and in dysentery.

Bellows (*bel'-do*) [*ME., belwes*]. An instrument for propelling air through a tube or small orifice. **B., Richardson's**, a double bellows with a connecting tube employed for the injection of vapors into the middle ear.

Belly (*bel'-e*) [*ME., hely*]. 1. See *Abdomen*. 2. Any belly-like enlargement of a part. **B.-bound**, a vulgar term for constipated. **B.-button**, the navel.

Bellyache (*bel'-e-ah*). See *Colic*.

Belonospasis (*bel-on-as'-pa-sis*) [*βελόνη*, a point, *σπάζω*, a drawing]. Irritation by means of needles or metallic tractors.

Ben, Oil of, Benne Oil (*ben, ben'-e*). *Oleum balatum*; it is obtained by expression from the seeds of the several species of *Moringa*. It is a colorless, odorless oil, not readily turning rancid. It is used for extracting odors and for lubricating clocks and light machinery.

Benario's Method (*ben-ar'-e-o*). For the fixation of blood-films. It consists in the use of a 1% alcoholic solution of formalin for one minute.

Bencke-Jones' Bodies. Peculiar bodies, consisting of albumose, found in the urine in certain affections of the bone-marrow, especially neoplasms. **B.-J.'s Cylinders**. See *Cylinders, Bencke-Jones'*.

Bends (*ben-ds*) [*ME., bend*]. A term used by miners and raisson laborers for a condition produced by too sudden reduction of the high air-pressure; it is indicated by swellings or small bubbles under the skin.

Benedict's Test for HCl in the Stomach. This consists in auscultation over the stomach after the patient has swallowed a small quantity of saturated solution of sodium bicarbonate. Normal hydrochloric acidity is indicated by a fine crepitation, superacidity by an

earlier and louder sound, and in anacidity the crepitation is absent.

Benedikt's Syndrome. Paralysis of the motor oculi of one side and tremor of the arm of the opposite side, attributed by Charcot to a lesion in the ventrointernal part of the crura cerebri.

Bengalin (*ben'-gaw-lin*) [*Hind., Bengāl*]. A blue pigment derived from the benzene colors.

Benign, Benignant (*be-nin', be-nig'-nant*) [*benignus*, kind]. Not endangering health or life; applied to certain tumors.

Benincasa (*ben-in-ka'-zah*) [*Benincasa*, an Italian nobleman]. A genus of plants of the order *Cucurbitaceae*. *B. cerifera* is a perennial species of the East Indies, with large, greenish fruit, the seeds of which are used in dysuria and colic, the rind in tuberculosis, asthma, and chills, and the plant in fevers, vertigo, etc.

Bennett's Corpuacles. See *Corpuscles, Bennett's*. **B.'s Fracture**, a longitudinal fracture of the first metacarpal bone, extending into the carpometacarpal joint and complicated by subluxation.

Benzacetin (*ben-zas'-et-in*), $C_6H_5(OC_2H_5) \cdot (NH_2 \cdot CH_3CO)COOH$. Colorless crystals, soluble in alcohol, slightly soluble in water; melt at 205° C. It is used in neuralgia. Dose 8-15 gr. (0.52-0.97 Gm.). Syn., *Acetamidomethyl-salicylic acid*.

Benzaconin (*ben-zak'-on-in*). An alkaloid from aconite with action similar to aconitin, except that it lacks its antipyretic power and has little effect on the sensory nerves, while it depresses the motor group and also the muscle-fibers.

Benzaldehyd (*ben-zal'-de-hid*) [*benzoin; aldehyd*], C_6H_5O , benzaldehydum (U. S. P.). Bitter-almond oil, a compound that results from the oxidation of benzyl alcohol.

Benzamid (*ben'-zam-id*; [*benzoin; amid*], C_6H_5NO . A compound resulting from the action of benzoyl chlorid upon alcoholic ammonia.

Benzamil (*ben'-zam-il*), $C_{22}H_{10}NO_2$. A distillation-product of oil of bitter almonds.

Benzanalgen (*ben-zan-al'-jen*), $C_6H_5OC_2H_5 \cdot HNCO \cdot CH_2N$. A derivative of chinolin. It is antiseptic, antipyretic, and antineuralgic, and has the power of dissolving uric acid. It is used in rheumatism, tabes dorsalis, and chronic gout. Dose 7½-45 gr. (0.5-3.0 Gm.).

Benzanilid (*ben-zan'-il-id*) [*benzoin; anilid*], C_6H_5NO . Benzoyl anilid, prepared by the action of benzoyl chlorid on anilin. It is used as an antipyretic in children in doses of 3-8 gr. (0.2-0.5 Gm.). Unof.

Benzaurin (*ben-zaw'-rin*), $C_{16}H_{10}O_3$. Red crystals melting at 100° C. Syn., *Phenyldiphenylarbinol*. **B. Anhydrid**, a colorless substance dissolving in alkaline solutions with a violet color.

Benzene (*ben'-zin*), C_6H_6 . A hydrocarbon contained in coal-tar. It is formed by the dry distillation of all benzene acids. It is a mobile, etherent-smelling liquid, of specific gravity 0.890 at 0°. It solidifies at about 0°, melts at +6°, boils at 580°, and

burns with a luminous flame. It readily dissolves resins, fats, sulfur, iodine, and phosphorus. Anilin and the anilin colors are derived from it. Syn., *Benzol*, *Phene*; *Phenyl hydrid*. **B.-sulfonic Acid**, $C_6H_5 \cdot SO_3H$, is prepared by boiling together equal parts of benzene and H_2SO_4 . It occurs in small plates, readily soluble in alcohol and water, and which deliquesce in the air.

Benzenyl (*ben'-zen-il*). See *Phenyl*. **B.-amidothiophenol**, C_6H_5NS , acicular crystals with fragrance of roses, obtained from amido-phenylmercaptan by benzoic aldehyd and heat, it is soluble in alcohol, ether, carbon disulfid, and dilute hydrochloric acid. Syn., *Benzoylamidophenylmercaptan*.

Benzhydrol (*benz-hi'-drol*), $C_6H_5-CH(OH)-C_6H_5$. An alcohol occurring as silky, acicular crystals, slightly soluble in water, obtained from an alcoholic solution of benzophenone by action of sodium amalgam. Syn., *Diphenyl-carbinol*. **B. Acetate**, a thick liquid obtained by heating benzhydrol with acetic acid.

Benzil (*benz'-il*), $C_{14}H_{10}O_2$. A compound produced by the action of nitric acid on benzoil.

Benzilimid (*benzil'-im-id*), $C_{12}H_{10}N_2O_2$. White silky needles obtained from an alcoholic solution of benzil by action of dry ammoniacal gas.

Benzimid (*benz'im-id*) (*benzoid*; *amid*), $C_{12}H_{10}N_2O_2$. A compound formed by the action of hydrocyanic acid on benzoyl hydrate. It occurs also in the resinous residue of the rectification of the oil of bitter almonds.

Benzin, Benzinum (*ben'-zin*, *-zī-nūm*). Petroleum ether. The benzinum of the U.S.P. is a purified distillate from American petroleum, having a specific gravity of 0.77 to 0.79, boiling at 80° to 90° C., colorless, of ethereal odor, and a slightly peppermint-like taste. It is a valuable solvent for oils, fats, resins, caoutchouc, and some alkaloids. It has been used against tape-worm. It should be distinguished from benzene. Dose 5-10 min. 10-37-0.66 Gr.) on sugar or in mucilage. **B., Coal-tar, benzin** obtained as a by-product in preparing benzene and toluene from coal-tar oil by action of acids and alkalis. It differs chemically and physically from petroleum benzin, and is used as a cleansing fluid and as a solvent for resin, caoutchouc, etc.

Benzinin (*benz'-zin-in*). A toxin extracted by Auclair from tubercle bacilli. Syn., *Benzimbarillin*.

Benzinobacillin (*ben-zin-o-bas'-il-in*). See *Benzinin*.

Benzite (*ben'-zīt*). A solution of sulfur in two or three parts of hot coal-tar.

Benzoate (*ben'-zo-āt*) (*benzoin*). Any salt of benzoic acid. **B., Naphthol**. See *Benzonaphthol*.

Benzoated (*ben'-zo-āt-ed*) (*benzoin*). Impregnated with benzoate or with benzoic acid.

Benzodiureid (*ben-zo-di-ūr'-e-id*), $C_6H_5N_4O_2$. Tiny needles obtained from benzoic aldehyd by action of urea.

Benzoglycolate (*ben-zo-glī'-kol-āt*). A salt of benzoic acid.

Benzohelicin (*ben-zo-hel'-is-in*), $C_{20}H_{20}O_2$. A

combination of benzoyl and helicin. Syn., *Benzoyl-helicin*.

Benzoic (*ben-zo'-ik*) (*benzoin*). Pertaining to or derived from benzoil. **B. Acid**. See *Acid*, *Benzoic*.

Benzoin (*ben'-zoin* or *-so-in*) (*benzoin*; foreign names). 1. *Benzoinum* (U.S.P.), a resin obtained from *Styrax benzoin*, a tree native to Sumatra and Siam. It is a ketone alcohol, $C_{14}H_{12}O_2$, and may be produced by oxidizing hydrobenzoin with concentrated HNO_3 . It is sparingly soluble in water, cold alcohol, and ether, and crystallizes in shining prisms, melting at 134° C. It yields benzoic and cinnamic acids; is antiseptic and disinfectant, and is used mainly as a stimulant expectorant in chronic bronchitis. 2. $C_{14}H_{12}O_2$, a reaction product of an alcoholic solution of potassium cyanid on benzoic aldehyd, forming yellowish, fragrant prisms, soluble in hot alcohol, melting at 135°-137° C. It is used as an external antiseptic, 1 part in 5 of lard. Syn., *Benzalmond oil camphor*; *Phenylbenzoyl carbinol*. **B., Flowers of, benzoic acid** obtained by the sublimation of benzoil. **B., Tincture of** (*tinctura benzoini*, U.S.P.), 20% of the resin in alcohol. Dose $\frac{1}{2}$ -1 dr. (2-4 Gr.). **B., Tincture of, Compound** (*tinctura benzoini composita*, U.S.P.), Friar's balsam, Turlington's balsam; it consists of benzoil, 12, aloes, 2, styrax, 8; balsam of tolu, 4; alcohol, sufficient to make 100 parts. Dose $\frac{1}{2}$ -2 dr. (2-8 Gr.).

Benzoinam (*ben-zo'-in-am*), $C_{12}H_{10}N_4O_2$. A crystalline powder derived from benzoil by action of alcoholic solution of ammonia with heat.

Benzoinated (*ben-zo'-in-a-ted*). Combined or prepared with benzoil.

Benzoinol (*ben-zo'-in-ol*). An oily liquid, said to consist of alcohol with gum benzoil in solution, it is used as an exsiccant for menthol, camphor, etc., in diseases of the nose and throat.

Benzoiodohydrin (*ben-zo-i-o-do-hi'-drin*), $(C_6H_5)CHI(C_7H_5O_2)$. A brownish yellow oil mass, soluble in alcohol, ether, and petroleum ether, insoluble in glycerol. It decomposes at 100° C., iodine being liberated. It is a succedaneum for potassium iodid, and is given in the same doses. Syn., *Chloroiodo-benzoyl-glycerinester*; *Glycerylchloriodobenzoate*.

Benzol, Benzole, Benzoleum (*ben'-zol*, *ben'-zōl*, *ben-zōl'-ūm*). See *Benzene*.

Benzolguaiacol (*ben-zol-guā'-ak-ol*). See *Benzozol*.

Benzolism (*ben'-zol-izm*). Benzol poisoning, from inhaling the vapor or swallowing it. It is marked in light cases by dizziness, loss of consciousness, and anesthesia, in severer cases by hallucination, epileptic paroxysms, and coma.

Benzonaphthol (*ben-zo-nāf'-thol*) (*benzoin; naphthol*), $C_{10}H_7(O)(C_7H_5O)$. The benzoate of betanaphthol, used as an intestinal antiseptic in typhoid fever and other intestinal diseases. Dose 2-8 gr. (0.15-0.52 Gr.).

Benzonitril (*ben-zo-nī'-tril*) (*benzoin; nitril*,

niter], C_7H_5N . An oil obtained from benzene-sulfonic acid by distillation with potassium cyanide. It has an odor resembling that of oil of bitter almonds, and boils at $191^{\circ}C$; its specific gravity is 1.023 at $0^{\circ}C$.

Benzophenid (*ben-zo-fen'id*). Phenyl benzoate.

Benzopyrin (*ben-zo-pi'-rin*). Antipyrin benzoate.

Benzosol (*ben'-zo-sol*) [*benzoin*], $C_{14}H_{12}O_3$. The benzoate of guaiacol; it contains 54 % of guaiacol. Its chief uses are as an intestinal antiseptic and in pulmonary tuberculosis. Dose 3-12 gr. (0.2-0.8 Gm.).

Benzosulfate (*ben-zo-sul'-fat*). A salt of benzoic acid.

Benzosulfonid (*ben-zo-sul'-fin'id*). *Benzosulfonyl-sulfonid* (U. S. P.); saccharin.

Benzotrichlorid (*ben-zo-tri-klo'-rid*), $C_7H_5Cl_3$. A colorless, transparent, highly refractive liquid, with penetrating odor, obtained from boiling toluene by action of chlorine; sp. gr. 1.38 at $14^{\circ}C$; boils at 213° - $214^{\circ}C$. Syn., *Benzotrichloride*.

Benzoyl (*ben'-zo-il*) [*benzoin*], C_7H_5O . The radical of benzoic acid, of oil of bitter almonds, and of an extensive series of compounds derived from this oil, or connected with it by certain relations. **B.-acetylperoxid**, $C_{14}H_{10}O_4$, an oxidized product of the mixed anhydride of acetic and benzoic acids, a crystalline body, slightly soluble in water and very unstable. To prevent explosion by sudden heating or grinding it is diluted with an equal quantity of inert absorbent powder and called *acetozone*. It is used as an intestinal antiseptic. Dose 4-5 gr. (0.26-0.32 Gm.) 3 times daily. Syn., *Acetyl-benzoyl peroxid*.

B. Chlorid, C_7H_5OCl , a transparent, colorless, pungent oil with a specific gravity of 1.21 at $19^{\circ}C$; it is soluble in ether and carbon disulfide, boils at 194° - $195^{\circ}C$. When acted on by alcoholic ammonia it gives dibenzylamin. It is used as a reagent in organic analysis and synthesis. Syn., *Chlorobenzoyl chlorid*. **B.-ecgonin**, $C_{16}H_{19}NO_4$, a substance intermediate in composition between cocaine and ecgonin. **B.-eugenol**, $C_{11}H_{14}O_2$, a substance forming large, transparent, colorless prisms or small white crystals, soluble in alcohol, ether, chloroform, and acetone, melts at 60° - $70^{\circ}C$. It is used in tuberculosis. Dose 7½-15 gr. (0.5-1.0 Gm.). **B.-glycocin**, **B.-glycocoll**, hippuric acid. **B.-guaiacol**. See *Benzosol*. **B. Hydrate**, benzoic acid; also improperly applied to benzoic aldehyd. **B. Peroxid**, a bactericide and disinfectant substance. **B.-phenylhydrazin**, $C_{10}H_9N_2O$, an antiseptic. **B.-tropoin**, $(C_6H_5(C_6H_5CO)NO)$, silky, acicular needles, it is a local anesthetic.

Benzyl (*ben'-zil*) [*benzoin*], C_7H_7 . A univalent hydrocarbon radical that does not exist in the free state, but in combination forms a considerable number of compounds. **B. Alcohol**. See *Alcohol*, *Benzyl*.

Benzylidene (*ben-zil'id-én*) [*benzoin*], C_7H_6 . A univalent hydrocarbon radical derived from benzoin compounds.

Bérard's Aneurysm (*ba'-rar*). A varicose aneurysm having its sac in the tissue immediately surrounding the vein.

Béraud's Ligament (*ba'-ro*). The suspensory ligament of the pericardium that is attached to the third and fourth dorsal vertebrae. **B.'s Valve**, a fold of mucous membrane found occasionally in the lacrimal sac, which it separates from the nasal duct.

Berberin (*ber'-ber-in*) [*berberis*], $C_{20}H_{17}NO_3$. An alkaloid found in the bark of *Berberis* and in many other plants. It is recommended as a tonic and antiperiodic, and is an ingredient of various lotions for mucous membranes; it is useful in nasal catarrh, etc. Dose 1-10 gr. (0.065-0.65 Gm.). **B. Carbonate**, $C_{20}H_{17}NO_3$, crystalline powder, soluble in hot water; it is antiperiodic, stomachic, and tonic. Dose, antiperiodic, 8-15 gr. (0.52-1.0 Gm.); stomachic and tonic, ½-1 gr. (0.032-0.065 Gm.) 3 times daily. **B. Hydrochlorid**, is used locally in gonorrhea.

Berberis (*ber'-ber-is*) [L.]. Barberry. The berberis of the U. S. P. is the root of *Berberis aquifolium* and other species. Its properties are due to an alkaloid, *berberin*, $C_{20}H_{17}NO_3$. It is an astringent, bitter tonic; in large doses, a cathartic. It has been used locally in conjunctivitis, and internally in malarial and typhoid fevers. **B., Fluid-extract of** [*fluidextractum berberidis*, U. S. P.]. Dose 5-30 min. (0.32-2.0 Cc.). **B., Tincture of**. Dose 10 min.-1 dr. (0.65-4.0 Cc.).

Bergamot, Oil of (*bur'-gam-ol*) [*Bergamo*, a town in Italy], $C_{10}H_{16}$. A volatile oil derived from the rind of the *Citrus bergamia*. It is used mainly as a perfume and as a clearing agent in histologic work.

Bergaptene (*bur-gap'-ten*), $C_{12}H_{12}O_2$. A solid, greasy compound obtained from bergamot oil, being the lactone of bergaptenic acid. It melts at $188^{\circ}C$. Syn., *Bergamitene*; *Bergamot camphor*.

Bergenin (*bur'-jen-in*) [*Bergenia*, a genus of plants], $C_6H_7O_2H_2O$. A bitter, crystalline substance, obtained from various species of saxifrage, melting at $140^{\circ}C$. It is said to be a nerve tonic, with action intermediate between that of salicylic acid and of quinin.

Berger's Paresthesia (*bär'-ja*). Paresthesia in youthful subjects, of one or both lower extremities, without objective symptoms, accompanied by weakness. **B.'s Sign**, an elliptic or irregular shape of the pupil sometimes seen in the early stage of tabes and paralytic dementia and in paralysis of the third cranial nerve.

Bergeron's Disease (*bär'-ja-ron*). An affection characterized by abrupt, lightning-like, muscular contractions, independent of the will and limited ordinarily to the head and arms, involving at times the two extremities of one side. Like Dubini's disease, it is also known as "electric chorea."

Bergeron-Henoch's Chorea. See *Bergeron's Disease*.

Bergmann's Fibers, B.-Deiters' Fibers. The processes of certain superficial neuroglia cells of the cerebellum which radiate toward the surface and are connected with the pia. **B. Incision.** An oblique incision to expose the kidney. From the outer edge of the erector spinae at the level of twelfth rib downward and outward toward the junction of the outer and middle third of Poupart's ligament.

Beriberi (*ber'-e-bee-ee*) [Sinhalese, *beri*, weakness]. An infectious disease, endemic in various countries of Asia (Ceylon, India, China, Japan), Africa, and Australia, and presenting the features of a multiple neuritis. Bad food and defective hygienic conditions are predisposing causes, the true etiologic factor is probably a microorganism. Various types of the disease have been described, particularly an anasaric form and an atrophic form. The main symptoms are anesthesia, paralysis, wasting of the muscles, edema, changes in the electric reactions, dyspnea, and palpitation. The mortality is variable; often it is very great. True beriberi has been met in the seaport towns of the United States, introduced there by East Indian sailors, and an affection resembling it seems to occur among certain fishermen of New England. Syn., *Kaklé*; *Myelopathia tropicalis*; *Panneuritis epidemica*. **B., Dropsical.** See *Uncinariasis*. **B., Pseudo-**, Gibbs' name for a disease endemic in the Singapore Lunatic Asylum, prevails during the wet season and attacks Asiatics only. Not contagious, is marked by slight anemia, considerable soft anasarca, and tendency to sudden death from shock. The softness of the edema, lack of spastic and paralytic conditions, and rapidity of recovery distinguish it from beriberi. The period of incubation is from one to two days. **B. Web**, that is marked by anemia and dropsy without paralysis.

Berlin's Disease. Traumatic edema of the retina. Syn., "*Berlin'sche Trübung*"; *Comotio retinae*.

Bernard's Canal. The supplementary duct of the pancreas. **B.'s Center**, the "diabetic center" in the floor of the fourth ventricle. **B.'s Granular Layer**, the deep layer of cells lining the acini of the pancreas. It is granular in appearance and stains but slightly with carmin. **B.'s Puncture**, the puncture of a definite spot in the floor of the fourth cerebral ventricle for the production of artificial diabetes.

Bernhardt's Paresthesia (*bern'-hart*). Abnormal sensations, especially of numbness, with hyperesthesia and pain on exertion, in the region supplied by the external cutaneous nerve of the thigh.

Bernhardt-Roth's Symptom-complex. See *Bernhardt's Paresthesia*.

Bernheimer's Fibers (*bern'-hi-meer*). A tract of nerve fibers extending from the optic tract to Lays' body.

Berthollet's Test for Phenol (*ber'-thol-e*). An ammoniacal solution of phenol treated with

sodium hypochlorite produces a beautiful blue coloration.

Berthollet's Law (*ber'-thol-e*). When two salts in solution can, by double decomposition, produce a salt less soluble than either, this salt will be produced.

Bertillonage (*ber'-til-lon-a(h)*) [*Bertillon*, a French criminologist]. A system of carefully recorded measurements and descriptions of criminals, for the purpose of future identification, introduced into France by Bertillon and adopted by the police of many large cities of the United States.

Bertin, Bones of. The sphenoid turbinated bones, partly closing the sphenoidal sinuses.

B., Column of, a cortical column of the kidney; the part separating the medullary pyramids.

B., Ligament of, the iliofemoral ligament.

Beryllium (*ber-ill'-e-um*) [*Beryllus*, *beryl*]. A bivalent metal obtained from the beryl whence its name. Syn., *Glucinum*. See *Elements, Table of Chemicals*.

Berzelius' Test for Albumin. All albuminous substances (except peptone) are precipitated from their aqueous solutions by metaphosphoric acid in freshly prepared concentrated solution.

Besnier's Rheumatism. Simple chronic articular rheumatism; chronic arthrosynovitis.

Bestiality (*bes-tee-ah'-ee-tee*) [*bestia*, a beast]. Unnatural intercourse with an animal.

Bestucheff's Mixture, B.'s Tincture. The ethereal tincture of iron chlorid, used in erysipelas. It is made as follows: Tincture of iron chlorid, 1 part, spirit of nitrous ether, 4 parts. Mix and expose to the rays of the sun in well-closed bottles until the brownish color disappears. The dose is from 1 to 2 teaspoonfuls every 2 hours.

Beta (*ba'-tah*) [*β*]. 1 The beet. 2 The second letter of the Greek alphabet, used in chemic nomenclature to indicate the second of two isomeric compounds.

Betanaphthol (*ba-tah-naf'-thol*). See *Naphthol*. **B. Bismuth**, a preparation containing 80% of bismuth oxid and 20% of betanaphthol. It is a brown powder, insoluble in water, and decomposed into its component parts in the intestine, the betanaphthol being absorbed and discharged with the urine, while the bismuth is evacuated with the stools. It is an intestinal antiseptic. Dose: 10-25 gr. (1-3 Gm.). **B. Carbonate**, $\text{CO}_3\text{C}_{10}\text{H}_7$, a dinaphthyl ester of carbonic acid obtained by the action of phosgene on betanaphthol sodium. It is used as an intestinal antiseptic. **B. Lactate**, lactol.

Betel (*be'-tel*) [*F Ind*]. A masticatory used in the East. A few grains of the nut of the *Catechu palm*, *Acacia catechu*, are rolled up with a small amount of quicklime in a leaf of *Piper betel*, and chewed. It is tonic, astringent, stimulant, and aphrodisiac, and seems to increase the powers of endurance. Dose of fluidextract 1-3 dr. (4-12 Cc.). Unol.

Betol (*be'-tol*). $C_{11}H_7O$. $C_7H_5O_2$. A salicylic ester of naphthol, used in rheumatism and cystitis. It resembles salicylic acid in its properties. Dose 10-15 gr. (0.65-1.0 Gm.). Syn. *Naphthalol*; *Salynaphthol*.

Bottendorf's Test for Arsenic. On heating a solution of stannous chlorid in concentrated hydrochloric acid, specific gravity 1.19, with a solution of arsenic or arsenous acids in strong hydrochloric acid, a brownish turbidity or precipitate of metallic arsenic and tin is yielded.

Betula (*bet'-u-lah*) [*betula*, birch]. See *Birch*.

Betulase (*bet'-u-laz*). See *Gaultherase*.

Betulin (*bet'-u-lin*) [*betula*, birch]. $C_{26}H_{40}O_8$. Birch-resin, or birch-amphor, derived from the bark of the white birch.

Betulol (*bet'-u-lol*). An application for the treatment of rheumatism, said to be more quickly absorbed than oil of wintergreen. Syn. *Methyl-oleovalicylate*.

Betz's Giant-cells. Large ganglion-cells found in the deeper layers of the cortex, especially in the ascending frontal convolution and the paracentral lobule. They are usually arranged in small groups of from three to five that are known as *Betz's nests*.

Bevan's Incision. To expose the gall-bladder. A vertical incision along the outer border of right rectus muscle.

Bezoar (*be'-zoar*) [Pers., *pādahar*, the bezoar-stone, supposed antidote for poison]. Found in the stomach or intestine of some animals (especially ruminants), formerly believed to be efficacious in preventing the fatal effects of poison. **B.**, Oriental, a hard, round concretion obtained from the intestine of the gazelle and other ruminants. It consists of concentric layers of resinous matter which burn with an agreeable odor; it is valued in the East for supposed medicinal properties.

Bezold's Mastoiditis. See *Mastoiditis*. **Bezold's B's Symptom**, the appearance of an inflammation swelling a short distance below the apex of the mastoid process is evidence of mastoid suppuration. See *Mastoiditis*. **Bezold's B's Ganglion**, a ganglion in the interauricular septum of the frog's heart.

Bhang (*bang*). See *Cannabis indica*.

Bel (*bel*). See *Bel*.

Bi-. A prefix meaning two, twice, double.

Biacuminate (*bi-ak'-u'-min-āt*) [*bi-*; *acuminatus*, pointed]. Having two diverging pointed ends.

Bialate (*bi-ā'-let*) [*bi-*; *ala*, a wing]. Having two wings or wing-like appendages.

Bialuminate (*bi-al'-u'-min-āt*) [*bi-*; *aluminatus*]. A salt of aluminium containing two equivalents of aluminium combined with one acid.

Bangulate (*bi-ang'-u-lāt*) [*bi-*; *angulus*, an angle]. With two angles.

Bipiculate (*bi-ap'-ik'-u-lāt*) [*bi-*; *apex*, the summit]. With two summits.

Basenate (*ba-ar'-sen-āt*) [*bi-*; *arsenic*]. An arsenate containing two atoms of hydrogen.

Barticulate (*bi-ar'-tik'-u-lāt*) [*bi-*; *articulus*, a joint]. Having a double joint.

Biasteriac, Biasterial, Biasteric (*bi-as-ter'-e-ak*, *bi-as-ter'-e-al*, *bi-us-ter'-ik*) [*bi-*; *asterion*, a craniometric point]. Relating to the asterion on each side of the skull; extending between the two asterions.

Biauricular (*bi-aw'-rik'-u-lar*) [*bi-*; *auricula*, the ear]. Relating to two auricles or to two corresponding auricular points.

Biaurite (*bi-aw'-rit*) [*bi-*; *auris*, the ear]. Furnished with two ears or ear-like projections.

Bib. A portion of a red blood-corpuscle adherent to the crescent bodies observed in the blood of remittent-fever patients.

Bibasic (*bi-ba'-sik*) [*bi-*; *basis*, a base]. Having two hydrogen atoms replaceable by bases, as certain acids, dibasic.

Biborate (*bi-bo'-rāt*). See *Pyroborate*.

Bibromid (*bi-bro'-mid*). A compound of bromine with a radicle or element, containing twice as much bromine as another similar compound.

Bibulous (*bi-bu'-lus*) [*bibere*, to drink]. Having the property of absorbing moisture, as *bibulous* paper.

Bicalcarate (*bi-kal'-kar-āt*) [*bi-*; *calcar*, a spur]. Furnished with two spurs or spur-like projections.

Bicameral (*bi-kam'-er-al*) [*bi-*; *camera*, a vault]. Having two compartments.

Bicapitate (*bi-kap'-it-āt*) [*bi-*; *caput*, a head]. Having two heads; *bicephalous*; *dicephalous*.

Bicapsular (*bi-kap'-su-lar*) [*bi-*; *capsula*, a capsule]. Having two capsules.

Bicarbonate (*bi-kar'-bon-āt*) [*bi-*; *carbonate*]. Any salt of carbonic acid that has two carbonic-acid equivalents for one of the base.

Bicaudal, Bicaudate (*bi-kau'-dal*, *bi-kau'-dāt*) [*bi-*; *cauda*, tail]. Having two tails or appendages.

Bicavitary (*bi-kav'-it-a-re*) [*bi-*; *cavitas*, a cavity]. Having two cavities.

Bicellular (*bi-sel'-u-lar*) [*bi-*; *cella*, a cell]. Composed of two cells.

Biceps (*bi'-seps*) [*bi-*; *caput*, the head]. Having two heads, a term applied to several muscles, as *B. brachii*, *B. extensor*, *B. flexor cruris*.

Bichat, Canal of (*be'-shah*). A canal which was supposed by Bichat to exist between the subarachnoid space and the third ventricle.

B., Fat-ball of. See *Fall*, *Bichat's Fat*.

B., Fissure of. See *Fissure of Bichat*.

B., Foramen of. See *Foramen of Bichat*.

B., Membrane of. See *Henle's Fenestrated Membrane*.

B., Tunic of, the intima of the blood-vessels.

Bichlorid (*bi-klo'-rid*) [*bi-*; *chlorin*]. A salt containing two equivalents of chlorine.

Bichromate (*bi-kro'-māt*) [*bi-*; *chromium*]. A salt containing two equivalents of chromium trioxid.

Bicinctus, Bicingulatus (*bi-sink'-tus*, *bi-singul'-tus*) [*bi-*; *cingere*, to gird]. Having two zones or belts.

Bicipital, Bicipitous (*bi-sip'-it-al*, *-us*) [*biceps*,

- double-headed]. 1. With two heads. 2. Relating to one of the biceps muscles.
- Biclavate** (*bi-kla'-vāt*) [*bi*; *clava*, a club]. Clubbed at each end. **B.-bihamate**, with the two club-shaped ends bent toward each other. **B.-cylindric**, cylindric and with clubbed ends.
- Biconcave** (*bi-kon'-kāv*). See *Lens*, *Biconcave*.
- Biconvex** (*bi-kon'-vek-s*). See *Lens*, *Biconvex*.
- Bicorporal**, **Bicorporate**, **Bicorporated** (*bi-kor'-por-al, -al, -al-ēd*) [*bi*; *corpus*, a body]. Consisting of two bodies.
- Bicrural** (*bi-kru'-rāl*) [*bi*; *crus*, a leg]. Having two legs or leg-like processes.
- Bicuspid** (*bi-kus'-pid*) [*bi*; *cuspis*, the point of a spear]. Having two cusps, as *bicuspid teeth*. **B. Valve**, the mitral valve of the heart.
- Bicyanate** (*bi-si'-an-at*) [*bi*; *cyanogen*]. A salt having two equivalents of cyanic acid and one of a base.
- Bicyanid** (*bi-si'-an-id*) [see *Bicyanate*]. A cyanid containing twice as much cyanogen as the lower member of the cyanid series.
- Bicyanuret** (*bi-si'-an'-u-ret*). See *Bicyanid*.
- Bidacryc** (*bi-dak'-rik*) [*bi*; *dacryon*]. In craniometry, relating to the two dacryons.
- Bidder's Ganglions**. See *Ganglion*, *Bidder's*.
- Bidental** (*bi-den'-tal*) [*bi*; *dens*, a tooth]. Having two teeth or tooth-like prominences.
- Bidet** (*bē'-dā*) [*Fr.*, "pony"]. A tub or basin with fixed attachments for the administering of injections, also for use as a sitz-bath or hip-bath.
- Bidigital** (*bi-dij'-it-al*) [*bi*; *digitus*, a finger]. Referring to the tip of a finger of each hand.
- Bieber's Reagent**. Equal volumes concentrated sulfuric acid, red nitric acid, and water.
- Biedert's Cream Mixture** (*bē'-ddē*). An infant's food made by mixing a oz. of cream with 12 oz. of warm water, and adding $\frac{1}{2}$ oz. of milk sugar. It contains 1% of casein, 2.5% of fat, and 3.8% of sugar. As the child grows older a larger proportion of milk is added.
- Bieg's Entotic Test** (*bēg*). When words are audible only on being spoken into an ear-trumpet connected with a catheter placed in the eustachian tube, but not through the ear trumpet as ordinarily applied, there is a probable lesion of the malleus or incus which interferes with conduction.
- Biernacki's Anemia** (*bēr'-nūr*). Pernicious anemia. **B.'s Change of Pitch**, in hydro-pneumothorax the tympanic sound is lower in pitch when the patient is sitting than when he is lying down.
- Biernacki's Symptom** (*bēr'-mak'-ē*). Analgesia of the ulnar nerve at the elbow. It is observed in tabes dorsalis and parietic dementia.
- Biesiadecki's Fossa** (*bē-si-ādē'-ckē*). A peritoneal recess which is bounded in front by a more or less well-defined fold, the inner surface of which looks upward over the psoas toward the root of the mesentery, the outer extending toward the crest of the ilium. *Syn.*, *Fossa duodenosubscapularis*.
- Biett's Collar**. A zone of lenticulopapular syphilid on the neck.
- Bifacial** (*bi-fa'-shāl*) [*bi*; *facies*, a face]. Having the opposite surfaces similar.
- Bifarious** (*bi-fa'-re-us*) [*bifarius*]. Twofold, arranged in two more or less regular series or rows.
- Biffi's Test for Bile**. Acidify 150 to 200 Cc. of urine with sulfuric acid; add drop by drop a 5% barium chlorid solution, using about 20 drops to every 100 Cc. of urine. Pour off the liquid and collect the soft precipitate on absorbent cotton and spread evenly. Place a crystal of potassium dichromate upon the surface of the precipitate, and in the presence of bile a green ring will form around the crystal, changing to blue and then to red. A small amount of albumin will not interfere with the test, but if much is present, the use of a saturated solution of sodium sulfate is recommended instead of the sulfuric acid.
- Bifid** (*bi-fid*) [*bi*; *findere*, to cleave]. Divided into two parts, cleft, as *bifid uvula*.
- Bifissile** (*bi-fis'-s*) [*bi*; *findere*, to split]. Parting naturally into halves.
- Bifistular**, **Bifistulous** (*bi-fis'-tū-lar, -lous*) [*bi*; *fistula*, a pipe]. With two tubes.
- Biflagellate** (*bi-fa'-el-at*) [*bi*; *flagellum*, a whip]. Furnished with two flagella.
- Bifocal** (*bi-fō'-kal*) [*bi*; *focus*, a point]. Having a double focus. Applied to a system of lenses or spectacle-glasses with two foci, chiefly used for the correction of presbyopia when there is at the same time an error of refraction for distant vision. The distance lens is above that for near work. These are sometimes called *pantoscopic lenses* and also *Franklin spectacles*, because the device was first made by Benjamin Franklin. They are also called *cement lenses*, because now made by cementing the lower segment to the distance lens.
- Biforate** (*bi-fō'-rāt*) [*bi*; *foratur*, perforated]. Having two foramina.
- Biformity** (*bi-form'-it-ē*). The condition of being dimorphous.
- Biforous** (*bi-fō'-rūs*). 1. See *Biforate*. 2. Having two valves.
- Bifurcate** (*bi-fur'-kāt*) [*bi*; *furca*, a fork]. Divided into two, like a fork.
- Bifurcation** (*bi-fur'-kā-shun*) [see *Bifurcate*]. Division into two branches, as of the trachea or of the aorta.
- Bigaster** (*bi-gas'-ter*). See *Bigaster*.
- Bigelow's Ligament**. The Y-ligament of the hip joint; iliofemoral ligament. **B.'s Septum**, the calcareo femoral, a narrow vertical spur of compact tissue in the neck of the femur, a little in front of the lesser trochanter.
- Bigeminal**, **Bigeminous** (*bi-jem'-in-al, -ous*) [*bi*; *geminare*, to double]. Occurring in two pairs.
- Bihastate**, **Bihastatus** (*bi-has'-tāt, bi-has-tāt*) [*bi*; *hastā*, a lance]. With two lance-shaped processes.
- Bilamellar**, **Bilamellate**, **Bilamellated** (*bi-*

lam-el'-ar, -al, -el-a'-led [*bi-*; *lamella*, a plate].

Consisting of two thin plates.

Bilaminar, **Bilaminat** (*bi-lam'-in-ar, -al*) [*bi-*, *lamina*, a sheet]. Composed of two layers.

Bilateral (*bi-lat'-er-al*) [*bi-*; *latus*, a side]. Relating to two sides; pertaining to or affecting both sides of the body. **B. Symmetry**, the symmetry of right and left halves.

Bilateralism (*bi-lat'-er-al-izm*) [see *Bilateral*]. Bilateral symmetry.

Bile (*bil*) [*bilis*, the bile]. The substance secreted by the liver. It is mucilaginous, golden-brown, and is composed of biliary salts, cholesterol, mucus, and certain pigments. The principal salts are the sodium salts of taurocholic acid ($C_{26}H_{48}NO_5$) and glycocholic acid ($C_{26}H_{48}NO_6$). The taste of bile is intensely bitter, its reaction feebly alkaline, and its density from 1026 to 1032. It exercises a diastatic action on starch, emulsifies fats, and precipitates soluble peptone; it is also the natural antiseptic of the intestine, and has an action on the intestinal mucous membrane through which absorption is favored. Its composition varies, but according to Hoppe-Seyler, in 100 parts bile there are of—

Water	91.68 parts.
Inorganic matter	8.32 "
Organic matter	1.20 "
Mucos	0.87 part.
Sodium taurocholate	3.03 parts.
Sodium glycocholate	1.30 "
Saponified fat	0.35 part.
Cholesterol	0.51 "
Leucin	0.73 "

B. Acids, Tests for. See *Drechsel*, *Mylius*, *Pentendorfer*, *Strassburg*, v. *Udransky*. **B.**, **Crystallized**, Plattner's name for sodium taurocholate. **B.**, **Cystic**, bile contained in the gall-bladder as distinguished from that which is transmitted directly from the liver to the duodenum. **B.**, **Glastring**, that of a bluish color, so called from *glastium*, or woad (*Isatis tinctoria*), used for dyeing blue. **B.**, **Hepatic**, that which is transmitted directly from the liver to the duodenum without entering the gall-bladder. **B.**, **pigments**, the coloring-matters of the bile. See *Barral*, *Capranica*, *Chassier*, *Dragendorff*, *Dumontpallier*, *Fleischl*, *Glaeser*, *Gmelin*, *Huppert*, *Jolles*, *Martéchal*, *Le Nobel*, *Rosenbach*, *Smith*, *Stokvis*, *Trousseau*, *Ullmann*, *Vitelli*.

Bilharzia (*bil-har'-ze-ah*) [named after Theodor Bilharz, a physician of Cairo]. A genus of trematode worms, established by Cobbold, characterized by having the sexes separate.

B. hæmatobia. See *Distoma hæmatobium*.

Bilharziosis (*bil-har'-ze-a'-sis*) [*Bilharzia*]. The group of symptoms produced by the presence in the intestine of worms of the genus *Bilharzia*.

Bil- [*bil*]. A prefix denoting relating to the bile.

Biliary (*bi'-e-a-re*) [*bile*]. Pertaining to the bile. **B. Acids**, glycocholic and taurocholic acids. **B. Colic**, colic produced by the passage of gall-stones. **B. Diabetes**,

Hanot's disease, or hypertrophic cirrhosis of the liver with icterus. **B. Ducts**, the hepatic and cystic ducts and the ductus communis choledochus, together with the small ducts in the liver itself.

Biliation (*bil-e-a'-shun*) [*bile*]. The excretion of bile.

Bilicyanin (*bil-e-si'-an-in*) [*bili-*; *κυανος*, blue]. A blue pigment obtained from bilirubin. Syn., *Cholecyanin*; *Choleverdin*.

Bilification (*bil-ij'-ik-a'-shun*) [*bili-*; *facere*, to make]. The formation of bile.

Biliflavin (*bil-e-fla'-vin*) [*bili*; *flavus*, yellow]. A yellow coloring-matter derivable from biliverdin.

Bilifulvin (*bil-e-jul'-vin*) [*bili-*; *julus*, reddish yellow]. An impure form of bilirubin; also a yellow bile color from ox-gall, not normally present in human bile.

Bilifuscin (*bil-e-fus'-in*) [*bili-*; *fuscus*, brown], $C_{16}H_{20}N_2O_4$. A pigment occurring in bile and in gall-stones.

Biligulate, **Biligulatus** (*bi-lig'-u-lat*, *bi-lig-u-lat'-tus*) [*bi-*; *ligula*, a little tongue]. Formed like two tongues or having two tongue-like processes.

Biliumin (*bil-e-hu'-min*) [*bili-*; *humus*, earth]. An insoluble residue left after treating gall-stones with various solvents.

Bilin (*bi'-lin*) [*bile*]. A mixture of sodium taurocholate and glycocholate, forming a constituent of the bile.

Bilineurin (*bil-e-nu'-rin*). Cholin.

Bilious (*bil'-yus*) [*biliosus*, full of bile]. A term popularly applied to disorders supposed to arise from a too free secretion of bile. **B. Fever**, a remittent fever characterized by the vomiting of bile.

Biliousness (*bil'-yus-nes*) [*biliosus*]. A popular name for a condition characterized by anorexia, constipation, coated tongue, lassitude, and headache, and supposed to be due to an excessive secretion of bile.

Biliprasin (*bil-e-pra'-sin*) [*bili-*; *πράσινος*, leek-green], $C_{16}H_{20}N_2O_4$. A pigment occurring in gall-stones, icteric urine, and bile.

Bilirubin (*bil-e-ru'-bin*) [*bili-*; *ruber*, red], $C_{42}H_{58}N_2O_6$. A red coloring-matter, the chief pigment of the bile, and also found in the urine in jaundice. It is insoluble in water, and almost so in ether and alcohol, but it is readily soluble in alkaline solutions. It crystallizes in rhombic plates or prisms.

Biliverdin (*bil-e-ver'-din*) [*bili-*; *viridis*, green], $C_{42}H_{58}N_2O_6$ or $C_{42}H_{56}N_2O_6$. A green pigment, the first product of the oxidation of bilirubin. It gives the characteristic color to the bile of herbivora, and occurs in the urine in jaundice and in gall-stones.

Bilroth's Disease (*bil'-rôt*). 1. Spurious meningocoele. 2. Malignant lymphoma. **B.'s Mixture**. See under *Anæsthetic*.

Bilobate (*bi-lat'-hât*) [*bi-*; *λοβος*, a lobe]. With two lobes; divided into two lobes.

Bilocular (*bi-lok'-u-lar*) [*bi-*; *loculus*, a little place]. Having two cells; divided into two compartments; biloculate.

Bimaculate (*bi-mak'-u-lat*) [*bi-*; *macula*, a spot]. Marked with two spots.

Bimalar (*bi-ma'-lar*). Extending between the two malar bones.

Bimalate (*bi-mol'-at*). In a series of malates, that one which contains twice the amount of malic acid that the first one of the series does.

Bimanual (*bi-man'-u-al*) [*bi-*; *manus*, a hand]. With both hands; two-handed. **B. Palpation**, palpation by means of both hands.

Bimaxillary (*bi-maks'-il-a-re*). Extending between the two maxillas.

Bimembral (*bi-mem'-bral*) [*bi-*; *membrum*, a member]. With two limbs.

Bimestral (*bi-mes'-tral*) [*bi-*; *mensis*, month]. Two months old; continuing two months.

Bimolybdate (*bi-mol'-ib-dat*). A molybdate containing twice as much molybdic acid as the corresponding normal molybdate.

Bimucous (*bi-mu'-kus*) [*bi-*; *mucus*, mucus]. Relating to two mucous surfaces.

Bimuscular (*bi-mus'-ku-lar*). Having two muscles. *Syn.*, *Dimyarious*.

Binary (*bi-mar-e*) [*binus*, a couple]. In chemistry, compounded of two elements. In anatomy, separating into two branches.

Binaural (*bi-na'-ral*) [*bi-*; *auris*, ear]. Pertaining to or having two ears, used for both ears. **B. Stethoscope**, a stethoscope with two tubes, one for each ear.

Binauricular (*bi-na'-rik'-u-lar*). See *Binaural*.

Binder (*bind'-er*) [*ME.*, *byndere*]. A wide bandage about the abdomen, worn by women after labor or after delivery, to support the abdominal walls. **B., *Mammary*, a sling or suspensory for the mamma.**

Bing's Test. Let a vibrating tuning-fork be held on the vertex until it has ceased to be audible, then close either ear, and the fork will be heard again for a certain period. If this period of secondary perception is shortened, there exists a lesion of the sound-conducting apparatus, if normal and yet deafness is present, the perceptive apparatus is involved.

Biniodid (*bin-i'-odid*). Having two atoms of iodine in the molecule.

Binocular (*bi-nok'-u-lar*) [*bi-*; *oculus*, an eye]. Pertaining to both eyes. In optics, an instrument with two objectives for use with both eyes at once. **B. Vision**, the faculty of using both eyes synchronously and without lipoopia.

Binotic (*bi-not'-ik*). See *Binaural*.

Binoxid (*bi-nok'-s-id*). See *Dioxid*.

Bio- [*logos*, life]. A prefix meaning life.

Bioblast (*bi-o-blast*) [*bio-*; *blastos*, a germ]. A pustule or formative cell, a corpuscle that has not yet become a cell.

Bioblastic (*bi-o-blast'-ik*). Relating to bioblasts. **B. Theory**, Altmann's, according to which leukocyte granules are considered as definite biologic entities, which affect, through oxygen transmission, both reduction and oxygenation, and in this manner accomplish the disjunction and the synthesis of the

economy without sacrificing their own individuality. Cf. *Color-analyses*.

Biochemics (*bi-o-kem'-iks*) [*bio-*; *chemia*, chemistry]. The chemistry of life. See *Biochemy*.

Biochemistry (*bi-o-kem'-is-tee*) [see *Biochemics*]. The chemistry of the living body or of life.

Biochemy (*bi'-o-kem'-e*) [see *Biochemics*].

Chemic force as exhibited in living organisms.

Bioculate, Bioculatus (*bi-ok'-u-lat*, *bi-ok'-u-lat'-us*) [see *Bimacular*]. Marked by two spots of color different from the chief color.

Biod (*bi'-od*) [*biog*, life]. 1. Animal magnetism. 2. See *Protyl*. 3. Vital force.

Biodesmus (*bi-od-es'-mus*) [*bio-*; *desmos*, a bond]. The vital principle regarded as a bond between organisms.

Biodynamics (*bi-o-di-nam'-iks*) [*bio-*; *dynamis*, power]. The dynamics of life, dynamic inology. See *Bionomy*.

Biogen (*bi'-o-jen*) [*biog*; *genesis*, to produce]. 1. See *Protyl*. 2. See *Bioplasma*. 3. See *Magnesium Dioxid*.

Biogenesis (*bi-o-jen'-es-is*) [*biog*; *genesis*, origin]. The doctrine that living things are produced only from living things—the reverse of abiogenesis.

Biogenetic (*bi-o-jen-et'-ik*) [see *Biogenesis*]. Pertaining to biogenesis. **B. Law**, the fact that a certain tendency directs the drift or trend of development of a being along a line parallel with that of the series of forms ancestral to it. The being in the course of its development briefly recapitulates that of the ancestral series to which it belongs. *Syn.*, *Muller's law*.

Biogeny (*bi-o-jen-e*) [see *Biogenesis*]. In biology, the evolution of organic forms either considered individually (*ontogeny*) or tribally (*phylegeny*).

Biologic (*bi-o-laj'-ik*) [see *Biology*]. Pertaining or belonging to biology.

Biologist (*bi-ol'-o-jist*) [see *Biology*]. One who is a student of biology.

Biologos (*bi-o-lj'-gos*) [see *Biologos*]. A designation proposed for the intelligent living power displayed in cellular and organic action and reaction.

Biology (*bi-ol'-o-jy*) [*bio-*; *logos*, science]. The science embracing the structure, function, and organization of living forms. *Syn.*, *Orpology*, *Organomy*, *Somatology*, *Zoonomy*. **B.**, *Dynamic*. See *Bionomy*. **B.**, *Static*. See *Biostatics*.

Biometer (*bi-om'-et-er*) [*bio-*; *metron*, a measure]. 1. A table of life expectancies, etc., upon which the science of life insurance is based. 2. An instrument, of the nature of a tuning fork, invented by Dr. Collingwood for the reproduction and increase of sounds of the body commonly perceived by auscultation.

Biometrics (*bi-o-met'-iks*) [see *Biometer*]. The science of the body-sounds perceived by auscultation.

Biometry (*bi-om'-et-ee*) [see *Biometer*]. Life measurement, the estimation of the prob-

able duration of any given life-form—in the past or future.

Bion (*bi-on*) [*βίος*, life]. A definite physiologic individual element or organism. Cf. *Morphon*.

Biondi's Fluid. A staining medium used in histologic laboratories. It is a mixture of orange-G, methyl-green, and acid-fuchsin.

Bionergy (*bi-on'-er-je*) [*βίος*; *ἔργον*, work]. Life-force; force exercised in the living organism.

Bionomics (*bi-o-no'-miks*) [*βίος*; *νόμος*, law]. That branch of natural history which treats of the relations of organisms among themselves and to their environment.

Bionomy (*bi-on'-o-me*) [see *Bionomics*]. Dynamic biology; biodynamics; the science of the laws of life.

Biontic (*bi-on'-tik*) [*bios*]. Individual as opposed to phyletic.

Bionuclein (*bi-o-nu'-kle-in*) [*βίος*; *nuclein*]. A term suggested by Sacharoff (1902) for the hypothetical substance composed of a combination of iron and nuclein which exists in all enzymes, holding that all vital processes depend upon decomposition of living substance set up by them.

Biophagous (*bi-ōf'-ag-us*) [*βίος*; *φαγεῖν*, to eat]. Feeding upon living organisms or upon living tissue, as insectivorous plants.

Biophilia (*bi-o-fil'-e-ah*) [*βίος*; *φιλεῖν*, to love]. The instinct for self-preservation.

Biophysiography (*bi-o-fis-e-og'-ra-je*) [*βίος*; *φύσις*, nature; *γράφειν*, to write]. Descriptive or structural biology; organography, as distinguished from biophysiology.

Biophysiology (*bi-o-fis-e-ol'-o-je*) [*βίος*; *φύσις*, nature; *λόγος*, science]. The branch of biology including organogenesis, morphology, and physiology.

Biophytum (*bi-ōf'-it-um*) [*βίος*; *φύτον*, plant]. A genus of plants of the order *Geraniaceae*. *B. sensituum* is a native of the East Indies, where the root is used in inflammations, in gonorrhea, and in pulmonary affections.

Bioplasm (*bi-ō-plazm*) [*βίος*; *πλάσμα*, form]. Any living matter, but especially germinal or forming matter; matter possessing reproductive vitality.

Bioplast (*bi-ō-plast*) [*bioplasm*]. A mass or cell of bioplasm that is a unit of living matter.

Biopsia, Biopsy (*bi-ōp'-se-ah*, *bi-ōp'-se*) [*βίος*; *ᾠρα*, vision]. 1. Observation of the living subject; opposed to necropsy. 2. A name coined by Besnier for the excision, during life, of an eruptive lesion or fragment of a newgrowth to establish the diagnostic histology of a malady.

Biorbital (*bi-ōr'-bit-al*) [*βίος*; *orbita*, a circle]. Referring to both orbits.

Bioscope (*bi-ō-skōp*) [*βίος*; *σκοπεῖν*, to view]. An instrument used in bioscopy.

Bioscopy (*bi-ōn'-ko-pe*) [see *Bioscope*]. Examination of the body to ascertain whether life is present. **B., Electro-**, examination to the aid of the electric current. In about

two hours after death the muscular reaction is lost to faradic stimulation in the tongue; after three or four hours in the extremities; after five or six hours in the trunk. The reaction to galvanism persists somewhat longer.

Biosis (*bi-ō'-sis*) [*βίος*, life]. Life; vitality.

Biostatics (*bi-o-stat'-iks*) [*βίος*; *στατικός*, causing to stand]. Static biology; the science of the determinate parts of biology, including anatomy and the physics of the living body.

Biot's Respiration (*be'-o*). Meningitic respiration: rapid, short breathing, interrupted by pauses lasting from several seconds to half a minute, sometimes observed in healthy subjects during sleep; most frequently in meningitis, in which it is an unfavorable prognostic sign.

Biotic (*bi-ōf'-ik*) [see *Biotics*]. Pertaining to life or to the laws of animal and vegetable progress and evolution.

Biotics (*bi-ōf'-iks*) [*βιολογία*, vital]. The science of vital functions and manifestations.

Biotomy (*bi-ōf'-o-me*) [*βίος*; *τέμνειν*, to cut]. Vivisection.

Bipalatinoid (*bi-pal-at'-in-oid*). A gelatin capsule with two compartments.

Biparasitic (*bi-par-as-it'-ik*) [*βίος*; *παράστροφος*, a parasite]. Parasitic upon a parasite.

Biparietal (*bi-par-i'-et-al*) [*βίος*; *paries*, a wall]. Relating to both parietal bones. **B. Diameter**, the distance from one parietal eminence to the other.

Biparous (*bi-p'-ar-us*) [*βίος*; *παρερε*, to bring forth]. Producing two at a birth.

Bipartite (*bi-par'-it*) [*βίος*; *pars*, a part]. In biology, composed of two parts or divisions.

Bipartition (*bi-par-tish'-un*) [see *Bipartite*]. Separation into two parts.

Biped (*bi'-ped*) [*βίος*; *pes*, a foot]. 1. Having two feet. 2. An animal with two feet.

Bioplumbic (*bi-plum'-bik*) [*βίος*; *plumbum*, lead]. Containing two atoms of lead.

Bipocillated (*bi-po'-sil-a-ted*) [*βίος*; *pocillum*, a little cup]. Having two cup-like appendages.

Bipolar (*bi-po'-lar*) [*βίος*; *polus*, a pole]. Having two poles. **B. Nerve-cells**, nerve-cells that have two prolongations of the cell-matter. They are found chiefly in the spinal ganglions.

Bipolarity (*bi-po-lar'-it-e*) [see *Bipolar*]. The condition of having two processes from opposite poles, as a nerve-cell; or of having different electric properties existing at the two poles.

Bipunctate (*bi-punk'-tate*) [*βίος*; *punctum*, a point]. Having two dots or points.

Bipupillate (*bi-pu'-pil-at*) [*βίος*; *pupilla*, pupil of the eye]. Marked with spots which contain two pupil-like dots.

Biramose, Biramous (*bi-ram'-os, -us*) [*βίος*; *ramus*, a branch]. Having two branches.

Birch (*berch*) [A.S., *birce*]. Any tree of the genus *Betula*. Birch-tar, or the tarry oil of *Betula alba*, is useful in certain skin diseases. The bark of *B. lenta*, the American

sides of the cornea, within the region of the palpebral aperture, consisting of dried epithelium, flaky masses, and microorganisms. Observed in some cases of hemeralopia.

Bitter (*bit'er*) [AS., *bītan*, to bite]. A peculiar, acid, biting taste, of which that of quinin is an example; unpalatable. **B. Almond**, the nut of *Amygdalum amarum*. It contains hydrocyanic acid. **B.-almond Oil**, oleum amygdale amaræ. See *Benzaldehyd*. **B. Apple**, the fruit of the colocynth, a purgative remedy. **B.-blain**, a West Indian herb, *Vandellia diffusa*, employed in fevers and in hepatic disorders. Unof. **B. Bugleweed**, the herb *Lycopus europæus*, alterative and tonic. Dose of fluidextract $\frac{1}{2}$ -1 oz. (16-32 Cc.) Unof. **B. Cucumber**, colocynth. **B. Cup**. See *Cup. Bitter*. **B. Purg-ing Salt**, magnesium sulfate. **B.-root**, the root of *Gentiana lutea*, a tonic. **B. Tincture**, the tinctura amara (N. F.), prescribed also in the German pharmacy; it is a tincture of gentian, centaury, bitter orange-peel, orange-berries, and zedoary. Syn., *Stomach-drops*. **B. Wine of Iron**, a solution of white wine, syrup, iron citrate, and quinin.

Bitters (*bit'ers*) [see *Bitter*]. Medicines characterized by a bitter taste. **B., Aromatic**, medicines that unite the properties of aromatics with those of simple bitters. **B., Simple**, medicines that stimulate the gastrointestinal tract without influencing the general system. **B., Styptic**, medicines that add styptic and astringent properties to those of bitterness.

Bittersweet (*bit'er-sweet*). See *Dulcamara*.

Bitumen (*bit'u-men*) [L.]. Mineral pitch or oil, composed of various hydrocarbons. In the solid form it is usually called *asphalt*, in the liquid form, *petroleum*. An intermediate form is known as mineral tar or *maltha*. By distillation, bitumen yields benzol, naphtha, paraffin, and various other hydrocarbons, liquid and gaseous.

Bituminization (*bi-tu-min-i-zā-shun*). A conversion into bitumen.

Biurate (*bi-u'rat*). An acid urate; a urate containing twice as much of the uric-acid constituent as an ordinary urate.

Biuret (*bi'ur-et*) [*bi*; *ur*, urine], $C_2H_5N_3O_2 + H_2O$. A compound formed by exposing urea to a high temperature for a long time. It is readily soluble in water and in alcohol; it crystallizes with one molecule of water in the form of warts and needles. When anhydrous, biuret melts at 100°C. with decomposition. **B. Reaction for Proteids**. See *Proteins*. **B. Reaction for Urea**, melt urea completely in a dry test-tube and continue the heat for some time. When cold, dissolve in water, add abundant caustic soda and a dilute solution of copper sulfate drop by drop. The solution becomes first pink, then reddish violet, and, finally, *bluish violet*, according to the amount of copper sulfate added.

Bivalence (*bi'val-ent*) [*bi*; *valent*, having power]. In chemistry, a valence or saturating power double that of the hydrogen atom.

Bivalent (*bi'val-ent*) [see *Bivalence*]. In chemistry, applied to an element of which an atom can replace two atoms of hydrogen or other univalent element, or to a radicle that has the same valence as such an element.

Bivalve (*bi'valv*) [*bi*; *valva*, a valve]. Having two valves or shells, as a speculum.

Biventer (*bi-vent'er*) [*bi*; *venter*, a belly]. 1. Having two bellies, as a muscle. 2. A digastric muscle. **B. cervicis**, the inner portion of the complexus muscle. **B. maxillæ**, the digastric muscle.

Biventral (*bi-ven'tral*) [see *Biventer*]. Having two stomachs, having two bellies, as the digastric muscle.

Bivittate (*bi-vit'at*) [*bi*; *vitta*, a fillet]. Marked by two longitudinal stripes.

Bixa (*bik'e-ah*) [*buhé*, Brazilian name]. A genus of plants of the order *Bixales*. *B. orellana* is the annatto tree, a native of South America and now dispersed throughout the tropics, furnishing from the pulp surrounding the seeds the annatto of commerce. The pulp is used as a remedy for dysentery and the seeds are said to be astringent and antipyretic.

Bixin (*bik'e-in*) [*Bixa*], $C_{18}H_{16}O_7$. An orange-red coloring-matter found in annatto.

Bizincic (*bi-zink'ik*). Containing two atoms of zinc.

Bizygomatic (*bi-zi-go-mat'ik*) [*bi*; *zygoma*, the zygomatic arch]. Relating to the most prominent points on the two zygomatic arches.

Bizzozero's Blood-platelets. Small, round or elliptic, nonnucleated bodies found in the blood of mammals, including man. **B.'s Corpuscles**. See *Neumann's Corpuscles*. **B.'s Crystals**. See *Charcot's Crystals*.

Black (*blak*) [AS., *blac*] Characterized by an absence of color. The appearance of an object from the surface of which none of the spectrum colors is reflected. **B. Alder**. See *Prinos*. **B. Antimony**, antimony tersulfid, SbS_3 . **B. Ash**, the bark of *Fraxinus sambuci-folia*, a mild tonic and astringent. Dose of fluidextract $\frac{1}{2}$ -1 dr. (2-3 Cc.) Unof. **B. Blood**, venous blood. **B. Cough**. See *Cimicifuga*. **B.-damp**, carbon dioxide gas, which is found in greater or less quantity in all collieries, being given off by many coals, either mixed with fire-damp or separately, or produced in various other ways, as by the exhalations of the miners, by fires, and by explosions of fire-damp. Syn., *Choke-damp*. **B. Death**. See *Plague*. **B. Disease**, a disease of malarial origin and pernicious course, characterized by extreme darkening of the skin, which may be brown or black in color. It occurs in the Garo Hills in Assam. **B. Draught**. See *Senna*.

B.-drop. See *Opium*. **B. Erysipelas.** Synonym of *Anthrax*. **B. Eye,** livor (or sugillation) oculi, ecchymosis of the tissues about the eye, usually from injury. **B. Haw.** See *Viburnum*. **B. Hellebore.** See *Hellebore*. **B. Jaundice,** an excessive jaundice arising from obstruction of the gall-ducts. The color of the skin is greenish-black. **B.-lead,** a form of carbon properly known as the mineral graphite. **B. Measles,** *rubeola nigra*, a grave or malignant form of measles. **B. Pepper.** See *Piper nigrum*. **B. Phthisis.** A synonym of *Miner's phthisis*. **B. Sickness,** cerebrospinal fever. **B. Snake-root.** See *Cimicifuga*. **B. Spit.** See *Miner's Phthisis*. **B. Tongue.** 1. A name given to a condition characterized by the formation, upon the dorsum of the tongue, of a hair-like deposit that passes through various stages of coloration from yellow to brown and finally black, ultimately disappearing by desquamation as gradually as it came. Repeated recurrence is the rule. It is probably an undue proliferation of the epithelium, the result of irritation. 2. A term applied to erysipelatos glossitis. **B. Vomit,** the coffee-ground vomit of yellow fever, etc. **B. Walnut,** the leaves of *Juglans nigra*, a tonic, alterative, and deobstruent. Dose of fluidextract 20-30 min. (1.3-2.0 Cc.). U.S.P. **B.-wash,** *lotio hydrargyri nigra* (B. P.). **B. Willow,** the buds of *Salix nigra*, a bitter tonic with aphrodisiac properties. Dose of fluidextract 15 min.-1 dr. (1-4 Cc.). U.S.P.

Blackbain [OE.]. Synonym of *Anthrax*.

Blackberry (*black'-ber-ee*). See *Rubus*. **B. Cordial,** the *cordiale rubi fructus* (N. F.). Its formula is: blackberry juice, 3 pints; cinnamon, in coarse powder, 2 troy oz.; cloves and nutmeg, in coarse powder, each, $\frac{1}{2}$ troy oz.; dilute alcohol, 2 pints; syrup, 3 pints.

Blackhead (*black'-hed*). See *Comedo*.

Black-leg (*black'-leg*). A febrile, generally fatal, disease, chiefly affecting cattle and sheep, which is characterized by the rapid appearance of irregular nodules in the skin and muscular tissues, that are at first tense and very painful, but rapidly become painless and crepitating. It is caused by *Bacillus anthracis*, or the bacillus of symptomatic anthrax. Syn. *Symptomatic anthrax*.

Blackwater Fever. A very fatal infectious disease occurring especially on the low coasts of tropical Africa, but also in Sicily, Greece, Central and South America, Java, New Guinea, and the southern portions of the United States. The disease is almost exclusively confined to the white race, and is characterized by a chill, an irregular intermittent or remittent fever, vomiting, dyspnea, jaundice, and hemoglobinuria. An almost invariable complication is nephritis. Studies of the blood have revealed the presence of a small, annular, nonpigmented, intracellular parasite, also forms having a roset or crescent shape.

Bladder (*blad'-er*) [AS., *bladdre*, a blister].

1. A membranous sac serving for the reception of fluids or gases. 2. The hollow organ which serves as a reservoir for the urine. **B., Atony of,** inability to expel the urine, from deficient muscular power. **B., Bilobed, B., Bilocular,** a sacculated bladder having two pouches. **B., Brain-,** the cerebral vesicle. **B., Catarrh of.** See *Cystitis*. **B., Encysted,** a urinary bladder with communicating cysts connected with it. **B., Exstrophy of, B., Extroversion of.** See *Exstrophy of Bladder*. **B., Gall-. See Gall-bladder.** **B.-germ.** See *Blastula*. **B., Irritable,** a condition characterized by constant desire to urinate. **B., Multilocular,** a sacculated bladder having many pouches. **B., Neck of,** the constricted portion continuous with the urethra in front. **B., Nervous,** a condition in which there is a frequent desire to pass water, with inability at the same time to perform the act perfectly, and consequent slight dribbling at its close. **B., Sacculated,** a condition due to overextension, in which pouches are formed by the forcing out of its mucous coat between the hypertrophied muscular fibers, and in which urine may be held and become decomposed, and in which calculi may be retained. **B.-stammering,** Sir James Paget's name for that condition observed in young males who are unable to micturate when under observation or surrounded by unusual conditions or objects. It is due to spasm of the compressor urethrae muscle. **B.-stammering, False,** a condition in which there is some mechanic or pathologic interference with urination. **B., Sterile,** a hydatid cyst without secondary cysts, heads, or broad capsules. **B., Supplementary,** a diverticulum caused by sacculatation of the urinary bladder. Syn. *Parurocystis*. **B.-worm.** See *Worm, Bladder*.

Blainville's Ears. Congenital asymmetry of the ears.

Blancard's Pills (*blang'-hard*). Pills of iron iodid.

Bland (*bland*) [*blandus*, mild]. Mild; soothing.

Blandin's Ganglion. The sublingual ganglion, a small gangliform enlargement lying between the lingual nerve and the sublingual gland. **B.'s Gland,** a muciparous gland situated near the tip of the tongue in the median line and opening by several ducts on the lower surface of the tongue.

Blandin-Nuhn's Gland. See *Blandin's Gland*.

Blasius' (Blaes') Duct. See *Stenson's Duct*.

Blast (*blast*) [AS., *blast*]. 1. See *Exotospore*. 2. See *Blight* (2). 3. Inflammation. 4. A disease of sheep.

Blastema (*blas-te'-mah*) [*βλαστημα*, from *blas-tēw*, to germinate]. 1. The formative lymph or rudimentary tissue, from which, by differentiation, tissues and organs are developed. 2. An undifferentiated protoplasmic layer in certain eggs or embryos. **B., Ooni-**

- fic, B., Ossifying, B., Subperiosteal. See *Osteogenetic Layer*. B, pili, a hair-papilla.
- Blastic** (*blas'tik-l*). See *Nucleus*, *Vitelline*.
- Blastidium** (*blas-tid'e-um*) [*βλαστός*, a germ]. An endospore or cell of endogenous origin.
- Blasto-** (*blas-to-*) [*βλαστός*, a germ]. A prefix meaning germ.
- Blastocelis** (*blas-to-se'lis*) [*blas-to-*; *κελίς*, a spot]. Wagner's name for the germinal spot.
- Blastochyle** (*blas'to-khl*) [*blas-to-*; *χυμός*, juice]. The colorless fluid in the blastodermic vesicle.
- Blastocyst**, **Blastocystinx** (*blas'to-sist*, *blas-to-sist'-inks*) [*blas-to-*; *κύστις*, a bladder]. The germinal vesicle.
- Blastoderm** (*blas'to-derm*) [*blas-to-*; *δέρμα*, the skin]. In embryology, the germinal membrane formed by the cells of the morula, lying on the internal surface of the vitelline membrane of the impregnated ovum. The whole hollow sphere, with its surrounding cells, is called the *blastodermic vesicle*, and is formed about the tenth day. The *ectoderm* (or *epiblast*) and the *endoderm* (*entoderm* or *hypoblast*) layers are simply due to a proliferation of the blastodermic cells about the germinal area, whereby the blastoderm is doubled, thus forming these outer and inner layers. The *mesoblast* or middle layer is developed after the others, and probably from the hypoblast. Syn., *Blastodermic membrane*, *Germ membrane*, *Germinal membrane*. B., *Bilaminar*, the blastoderm when it consists only of the ectoderm and the endoderm. B., *Trilaminar*, the blastoderm after the formation of the mesoblast.
- Blastodermic** (*blas-to-der'mik*) [see *Blastoderm*]. Relating to the blastoderm.
- Blastodisc** (*blas'to-disk*) [*blas-to-*; *δίσκος*, disc]. A blastodermic disc; a mass or disc capping one pole of the yolk.
- Blastogenesis** (*blas-to-jen'e-sis*) [*blas-to-*; *γένεσις*, generation]. 1 In biology, Weismann's theory of origin from germ-plasm, in contradistinction to Darwin's theory of pangenesis. 2 Reproduction by buds.
- Blastogeny** (*blas'tj'en-e*) [see *Blastogenesis*]. Maclell's term for the germ-history of an individual organism; a division of ontogeny.
- Blastoma** (*blas'to-mah*) [*blas-to-*; *όμα*, a tumor]. 1 A granular growth due to the presence of a germ or microorganism. 2 One of a peculiar group of true tumors which originate from embryonic cell-nests, e.g., chondromas, gliomas, etc. Syn., *Embryoma*.
- Blastomere** (*blas'to-mer*) [*blas-to-*; *μέρος*, a part]. Any one of the nucleated cells or segments into which the fecundated vitellus divides.
- Blastomyces** (*blas-to-mi'sez*) [*blas-to-*; *μύκης*, a fungus, pl., *blastomycetes*]. A genus of budding fungi usually referred to *Torula* or *Saccharomycetes*. Single-celled thallophytes, destitute of chlorophyll, which reproduce by yeast-like buds or by endogenous cell formation. B. *dermatidis* (Gibbert, 1894), a yeast-like organism producing a scrofuloderma in man. See *Dermatitis*, *Blastomycetic*.
- Blastomycosis** (*blas-to-mi-kó'sis*). An affection due to budding fungi (*blastomycetes*). Cf. *Blastomycet*; *Saccharomycet*, *Torula*.
- Blastoneuropore** (*blas-to-nu'ro-pór*) [*blas-to-*; *νεῦρον*, a nerve, *πόρος*, a pore]. In biology, the temporary aperture in certain embryos formed by the coalescence of the *blastopore* and *neuropore*.
- Blastophore** (*blas'to-fór*) [*blas-to-*; *φέρω*, to bear]. That part of a sperm cell that does not become converted into spermatozoa.
- Blastophyllum** (*blas-to-fil'-um*) [*blas-to-*; *φύλλον*, a leaf]. The endoderm or ectoderm, a primitive germ-layer.
- Blastophyly** (*blas'tof'-il-e*) [*blas-to-*; *φυλή*, a tribe]. The tribal history of individual organisms.
- Blastopore** (*blas'to-pór*) [*blas-to-*; *πόρος*, passage; pore]. The small opening leading into the notochordal canal, or, after the canal has fused with the yolk-cavity, leading into the archenteron. It is situated at the head end of the primitive axis and in a small portion of the gastrula mouth.
- Blastostroma** (*blas-to-stro'-mah*). See *Embryonic Area*.
- Blastous** (*blas't-us*). Relating to a blastema.
- Blastula** (*blas'tu-lah*) [dim. of *βλαστός*, a germ]. The blastodermic vesicle.
- Blastzellen** (*blas'tzel-en*) [Ger]. Primitive cells from which are developed all other kinds of cells. They are seen in the embryo before any beginning of differentiation, and are characterized by their large size, richness in cytoplasm, and large nuclei.
- Blatta** (*blat'-ah*) [L., "blood-colored"]. 1 A genus of *Blattidae*. 2 A clot of blood. B. (*Periplaneta*) *orientalis*, the cockroach, the powdered body is a popular remedy for dropsy among the Russian peasants. *Tinctura blattarum orientalis* is used in whooping-cough. Dose 1 or 2 drops in water at intervals of 2 hours.
- Blaud's Pill** (*blá*). A pill containing equal parts iron sulfate and potassium carbonate, for use in anemia, etc.
- Bleach** (*blech*) [ME., *blechen*, to make white]. To make white or pale.
- Bleacher's Eczema** (*blech'-ez ek'-zem-ah*). Eczema of the hands of bleachers, due to the use of hot water and strong lye.
- Bleaching Fluid**. A fluid obtained by passing chlorine gas into an emulsion of caustic hydrate. Syn., *Eau de Javelle*, *Javelle water*.
- B. Powder**, chlorinated lime, a mixture of calcium chlorid and calcium hypochlorite, containing free chlorine gas. It is used as a disinfectant.
- Bleat Eye** (*blér'-é*). See *Blepharitis ulcerosa*.
- Bleb** (*bleb*). See *Bulla*.
- Bleeders** (*ble'-ders*) [AS., *bládan*, to bleed]. A popular term for those who are subjects of the hemorrhagic diathesis. Syn., *Hemophilus*. B.'s Disease. See *Hemophoria*.

Blennisthmia (*blen-isth'-me-ah*) [*βλέννα*, mucus; *ισθμός*, a throat]. Pharyngeal catarrh.

Blenno- (*blen-o-*) [*βλέννα*, mucus]. A prefix meaning mucus.

Blennocoele (*blen'-o-sēl*) [*blenno-*; *κύστη*, a tumor]. Gonorrheal epididymitis.

Blennocystitis (*blen-o-sis-lī'-tīs*) [*blenno-*; *κύστης*, bladder; *ερεγ.*, inflammation]. Catarrh of the urinary bladder.

Blennophlogisma, Blennophlogosis (*blen-o-flō-jin'-mah*, *blen-o-flō-gu'-sis*) [*blenno-*; *φλόγωσις*, inflammation]. Inflammation of a mucosa.

Blennorrhagia (*blen-or-a'-je-ah*) [*blenno-*; *ρρῆσις*, to burst forth]. 1. An excessive mucous discharge. 2. Gonorrhea.

Blennorrhagic (*blen-or-a'-jik*) [see *Blennorrhagia*]. Relating to blennorrhagia.

Blennorrhea (*blen-or-e'-ah*) [*blenno-*; *ῥέω*, a flow]. Same as *Blennorrhagia*.

Blennorrheal, Blennorrhoic (*blen-or-e'-al*, *-o'-ik*) [see *Blennorrhea*]. Relating to blennorrhea.

Blennostasin (*blen-o-sta'-sin*). The proprietary name for a yellow solid body said to be cinchonidin hydrobromide, $C_{19}H_{22}N_2O(HBr)_2$, a nontoxic vasomotor constrictor and blennostatic. It is used in influenza, colds, night sweats, etc. Dose 15-60 gr. (1-4 Gm.) hourly.

Blennostatic (*blen-os-tat'-ik*) [*blenno-*; *στάσις*, a staying]. 1. Checking or suppressing mucous discharges. 2. An agent capable of suppressing mucous discharges.

Blennostrumous (*blen-o-stru'-mus*). Relating to gonorrhea and to scrofula.

Blennurethria (*blen-u-re'-thre-ah*) [*blenno-*; *ὀφθαλμός*, the urethra]. Urethral gonorrhea.

Blennymenerysipelas (*blen-e-men-er-e-sip'-e-las*) [*βλέννα*, mucus; *μῆμβρα*, membrane; *erysipelas*]. Erysipelas attacking a mucosa.

Blepharadenitis (*blef-ar-ad-en-i'-tīs*) [*blepharon*; *ἀδὴν*, a gland, *ερεγ.*, inflammation]. Inflammation of the meibomian glands. *B. tarsalis*. See *Hordeolum*.

Blepharis (*blef'-ar-is*) [*βλέφαρις*, an eyelash]. 1. An eyelash. 2. A genus of plants of the order *Acanthaceae*. *B. capensis* is a plant of South Africa used in blood-poisoning from anthrax and in treatment of snake-bites. Dose 3-4 oz. 90-118 Gr. of a 1:100 decoction.

Blepharitis (*blef-ar-i'-tīs*) [*blepharon*; *ερεγ.*, inflammation]. Inflammation of the eyelids. *B. ciliaris*, *B. marginalis*, inflammation of the ciliary or marginal border of the lids. *B. gangrenosa*, carbuncle of the eyelids. *B. glandularis*, *B. glandulosa*, inflammation of the meibomian glands. *B. internus*, palpebral conjunctivitis. *B. phlegmonosa*, inflammation of the cellular tissue of the eyelid. *B. scrofulosa*. See *B. simplex*. *B. simplex*, mild inflammation of the borders of the eyelids with formation of moist yellow crusts on the ciliary margins, gluing together the eyelids. *B. squamosa*, that attended with the formation of scales. *B. ulcerosa*, an ulcerative inflammation of the eyelids.

Blepharo- (*blef-ar-o-*) [*blepharon*]. A prefix meaning relating to the eyelid.

Blepharoadenitis (*blef-ar-o-ad-en-i'-tīs*). See *Blepharadenitis*.

Blepharoadenoma (*blef-ar-o-ad-en-o'-mah*) [*blepharo-*; *ἀδὴν*, a gland; *δῆμα*, a tumor]. An adenoma of the eyelid.

Blepharoatheroma (*blef-ar-o-ath-er-o'-mah*) [*blepharo-*; *atheroma*]. A sebaceous cyst of the eyelid.

Blepharoblennorrhea (*blef-ar-o-blen-or-e'-ah*). See *Ophthalmia, Purulent*. **Blepharoblennorrhea gonorrhoea, B. maligna**, gonorrheal ophthalmia. **Blepharoblennorrhea neonatorum**, ophthalmia neonatorum. **Blepharoblennorrhea urethritica**, gonorrheal ophthalmia.

Blepharocarcinoma (*blef-ar-o-kar-sin-o'-mah*) [*blepharo-*; *carcinoma*]. Carcinoma affecting the eyelid.

Blepharochalasis (*blef-ar-o-kal-a'-sis*) [*blepharo-*; *χαλάνειν*, a slackening]. A method of treating trachoma by excising oval slices from the upper and lower palpebral conjunctiva, with incision of the outer canthus.

Blepharochromidrosis (*blef-ar-o-kro-mid-ro'-sis*) [*blepharo-*; *χρῶμα*, color; *ἰδρῶς*, sweat]. Colored sweat of the eyelids, usually of a bluish tint.

Blepharoclonus (*blef-ar-o-klo'-nus*) [*blepharo-*; *κλῆναι*, commotion]. Spasm of the orbicularis palpebrarum muscle.

Blepharocoloboma (*blef-ar-o-kol-o-bō'-mah*). See *Coloboma palpebrae*.

Blepharohematidrosis (*blef-ar-o-hem-at-id-ro'-sis*) [*blepharo-*; *αἷμα*, blood; *ἰδρῶς*, sweat]. The rare occurrence of sweating blood from the skin of the eyelid.

Blepharomelasma (*blef-ar-o-mel-as'-mah*) [*blepharo-*; *μέλας*, black]. Seborrhoea nigricans occurring on the eyelid.

Blepharomelena (*blef-ar-o-mel-e'-neh*). See *Blepharochromidrosis*.

Blepharon (*blef'-ar-on*) [*βλέφαρον*, the eyelid; *πλ.*, *blephara*]. The eyelid; palpebra.

Blepharoncosis (*blef-ar-ong-ko'-sis*) [*blepharon*; *κῶσις*]. The formation of a blepharoncus, or the condition of suffering due to such a growth.

Blepharoncus (*blef-ar-ong'-kus*) [*blepharo-*; *ὄγκος*, an enlargement]. A tumor or swelling of the eyelid.

Blepharonyxis (*blef-ar-on-i'-sis*) [*blepharo-*; *ὀνύχειν*, to prick]. Operation for entropion by means of Gaillard's suture.

Blepharophimosis (*blef-ar-o-fi-mo'-sis*) [*blepharo-*; *φίμωσις*, a shutting-up]. Abnormal smallness of the palpebral aperture.

Blepharophthalmia (*blef-ar-o-thal'-me-ah*) [*blepharo-*; *ὀφθαλμός*, eye]. Combined palpebral and ocular conjunctivitis.

Blepharophthalmic (*blef-ar-o-thal'-mik*). Relating to the eyelids and the globe of the eye, or to blepharophthalmia.

Blepharophthalamostat (*blef-ar-o-thal'-mo-stat*). See *Blepharostat*.

Blepharoplast (*blef'-ar-o-plast*) [*blepharo-*; *πλασάω*, to form]. An individualized centrosome.

Blepharoplasty (*blef'-ar-o-plas-te*) [see *Blepharoplast*]. An operation for the restoration of any part of the eyelid.

Blepharoplegia (*blef'-ar-o-ple'-je-ah*) [*blepharo-*; *πληγή*, a stroke]. Paralysis of an eyelid.

Blepharoptosis (*blef'-ar-o-to'-sis*) [*blepharo-*; *πτωσις*, a fall]. Drooping of the upper eyelid.

Blepharorrhaphy (*blef'-ar-rr'-o-je*) [*blepharo-*; *ῥαφή*, a seam]. The stitching together of a portion of the edges of the lids.

Blepharospasm (*blef'-ar-o-spazm*) [*blepharo-*; *σπασμός*, a spasm]. Spasm of the orbicular palpebrarum muscle; excessive winking.

Blepharosphincterectomy (*blef'-ar-o-sphink-ter-ek'-to-me*) [*blepharo-*; *σφικτήρ*, sphincter; *ἐκτομή*, incision]. An operation to lessen the pressure of the upper lid upon the cornea; it consists in making an incision the entire length of the lid, about 2 mm. above the lid-border; by a second incision a small oval flap of skin, 2-4 mm. broad, is removed along with all the underlying muscle-fibers. The wound is closed with two or three sutures.

Blepharostat (*blef'-ar-o-stat*) [*blepharo-*; *στατός*, causing to stand]. An instrument for holding the eyelids apart while performing operations upon the eyes or lids.

Blepharostenosis (*blef'-ar-o-ste-no'-sis*) [*blepharo-*; *στενός*, narrow]. Diminution of the space between the eyelids.

Blepharosynechia (*blef'-ar-o-sin-e'-he-ah*) [*blepharo-*; *συνήχια*, a holding together]. The adhesion or growing together of the eyelids.

Blepharotomy (*blef'-ar-at'-o-me*) [*blepharo-*; *τομή*, to cut]. Incision into the eyelid.

Blepharydatis (*blef'-ar-id'-at-is*) [*blepharo-*; *ιδάρις*, a vesicle]. A hydatid affecting the eyelid.

Blessed Thistle. See *Carduus*.

Blessig's Groove. The slight groove in the embryonic eye that marks off the fundus of the optic cup from the zone that surrounds the periphery of the lens and corresponds in position with the future ora serrata.

Blight (*blit*) [origin unknown]. 1. A partial paralysis of certain facial nerves, arising from sudden or extreme cold. 2. A fungus-disease of plants. **B. of the Eye**, an extravasation of blood within the conjunctiva. **B., Sandy**, a form of ophthalmia attended with photophobia and a sensation of grittiness, due to the formation of pus in the openings of the meibomian glands.

Blind (*blind*) [AS.]. Without sight; deprived of sight. **B. Spot**, that part of the fundus of the eye where the optic nerve enters.

Blindness (*blind'-ness*). Want of vision. **B., Bright's.** See *Bright's Blindness*. **B., Color-**, imperfect color-perception. This condition is found in about 4% of persons, is more frequent in men than in women, and is probably due to nonexercise of the color-sense. *Complete color-blindness* is very rare, the different colors probably appearing as different intensities or shades of white light. In *partial color-blindness* defective perception

of red is the most frequent, green, blue, and yellow, respectively, being next in order. *Tests for color-blindness* usually consist in matching and classifying colored vases. **B., Cortical**, blindness due to lesion of the cortical center of vision. **B., Day-**. See *Nyctalopia*. **B., Electric-light**, a condition similar to snow-blindness, due to exposure of the eyes to intense and prolonged electric illumination. **B., Gold**, a form of retinal asthenopia at times affecting dentists, owing to which there is inability to distinguish the filling from the tooth. **B., Intellectual**, **B., Mental**. See *B., Psychic*. **B., Moon-**, a rare condition of retinal anesthesia said to be due to exposure of the eyes to the moon's rays in sleeping. **B., Nervous**. See *Amara-sis*. **B., Night-**. See *Hemeralopia*. **B., Object-**. See *Apraxia*. **B., Psychic**, loss of conscious visual sensation from destruction of the cerebral visual center; there is sight but not recognition. **B., Snow-**, photophobia and conjunctivitis due to exposure of the eyes to the glare of sunlight upon snow. **B., Word-**. See *Aphasia*.

Blister (*blis'-ter*) [ME.]. A vesicle resulting from the exudation of serous fluid between the epidermis and true skin, also the agent by which the blister is produced. **B., Fly-**, a blister of cantharides. See *Cantharides*. **B., Flying**, a blister that remains long enough to produce redness of the skin and not vesication.

Blistering (*blis'-ter-ing*). Forming a vesicle upon the skin. **B. Collodion**, a solution of cantharidin in collodion. **B. Liquid**. Same as *B. Collodion*. **B. Paper**, paper saturated with cantharides; used for producing vesication.

Block (*blok*) [ME., *blok*, a piece of wood]. 1. In dentistry a mass of gold-foil for fitting teeth, made by folding a tape of foil upon itself several times by means of pliers. 2. To obstruct the path of all sensory impressions in the nerve trunks and roots in the spinal cord which connect the area of surgical operation with the sensorium. **B. Heart**. See *Heart*. **Blocking** (*blok'-ing*). F. Franck's term for the transitory sensory paralysis of the entire peripheral distribution of a nerve by the infiltration of the sectional area of a nerve-trunk in any part of its course with cocaine or a similar analgesic.

Blocq's Disease. See *Briquet's Ataxia*.

Blood (*blud*) [AS., *blōd*]. The fluid that circulates through the heart, arteries, and veins, supplying nutritive material to all parts of the body. In the human being the blood of the arteries is bright red and diastolic, that of the veins dark red and monochromatic. Blood consists of plasma and corpuscular elements, the latter being the red corpuscles, the white corpuscles, and the blood plaques. In a cubic millimeter there are about 5,000,000 red and 10,000 white corpuscles. The red color of the blood is due to the hemoglobin contained in the red corpuscles. The total

amount of blood is estimated at $\frac{1}{15}$ of the body weight. When exposed to the air, blood coagulates, forming a red clot and a yellowish fluid called serum. Healthy blood consists of 78% of water and 22% of solids. See *Amin, Bremer, Huxey, Hoppe-Seyler, Kobert, Ladendorff, Pacini, Rubner, Salmons, Siewig, Van Dren, Wetzel, v. Zaleski*.

B.-casts, tube casts to which red blood-corpuscles are attached. **B.-coagulation**. See *Hammarsten, Lillienfeld, Pockharing, Schmidt*. **B.-corpuscles**, **Red**, circular, biconcave discs floating in the blood. Red corpuscles are circular in mammals (except the camel) and elliptic in birds and reptiles. In man they are about $\frac{1}{2500}$ inch (7 μ) in diameter and $\frac{1}{5000}$ inch thick. **B.-corpuscles**, **Granular**, bodies described by Ehrh in blood of mammals and supposed to be transitional blood-corpuscles. **B.-corpuscles** **White**, **colorless corpuscles**, about one third larger in diameter than the red — $\frac{1}{1000}$ inch (10 μ). They exhibit movements similar to those of the ameba.

B.-crasis, the mixture of the constituents of the blood. When the blood-crasis is diseased or disordered, the condition is known as dyscrasia. **B.-crystals**, **crystals** of hematin.

B.-defibrinated, blood from which the fibrin has been removed by agitating it with mercury.

B.-disease. A synonym of *Dyscrasia*. **B.-dust**. A synonym of *Hemokonia*.

B.-flake. See *Bilharzia hematobia*. **B.-islands**, a term applied to the groups of corpuscles developed during the first days of embryonic life, within the large branched cells of the mesoblast.

B.-pigments. See *Hemoglobin, Hematin, and Hemochromin*. **B.-plaque**. See *B.-platelets*.

B.-plasma, the *liquor sanguinis*, or fluid part of the blood. **B.-platelets**, circular or oval light-gray bodies found in the blood. They are from 1 to 1.3 μ in size, and number from 18,000 to 300,000 in the cubic millimeter. Their function is not definitely known; they are an important factor in thrombosis.

B.-poisoning, a morbid state due to the introduction of bacteria or their products, or both, in the blood, as the result of a local infection. **B.-pressure**, the tension of the blood in the arteries. **B.-root**. See *Sanguis*.

B.-tumor. See *Hematoma*.

Bloodless (*blind'-less*) [*blood*]. Without blood.

B. Operations, surgical operations, such as amputations, in which the member is so banded by compresses and elastic bands that the blood is expelled and kept from the part to be operated upon.

HUMAN COLORED BLOOD-CORPUSCLES

1. On the flat, 2. on edge; 3. rouleau of corpuscles. — (After Landei.)

Bloodletting (*blud'-let-ing*). The artificial abstraction of blood from the body. **B.**, **General**, venesection or phlebotomy. **B.**, **Local**, **B.**, **Topic**, the removal of a small quantity of blood by cupping, leeching, or scarification. **B.**, **Revulsive**, that performed for arresting internal hemorrhage. **B.**, **Spoliative**, bleeding to reduce the number of blood-corpuscles.

Blue [*ME., blew*]. One of the colors of the spectrum. **B. Baby**, a child with congenital cyanosis. **B.-blindness**, defective color-perception for blue. **B. Cardinal-flower**. Synonym of *Lobelia syphilitica*. **B. Cohosh**. See *Caulophyllum*. **B. Disease**, cyanosis of the newborn, usually due to congenital disease of the heart. **B. Edema**, a puffed and bluish appearance of the limb sometimes seen in hysteric paralysis. **B.-flag**. See *Iris*. **B. Gentian**, the root of *Gentiana catesbaei*, tonic and stomachic. Dose of fluidextract 10–40 min. (0.65–2.65 Cc.). Unoff. **B.-gum Tree**. See *Eucalyptus*. **B.-mass**. See *Mercury Mass*. **B.**, **Methylene-**. See *Methylene-blue*. **B. Ointment**, *unguentum hydrargyri dilutum* (U. S. P.). **B.**, **Prussian**, ferric ferrocyanide, $\text{Fe}_3\text{Fe}(\text{C}_6\text{N}_6)_2$. **B. Stick**. Same as *B.-stone*. **B.-stone**, copper sulfate. **B.**, **Turnbull's**, ferrous ferrocyanide, $\text{Fe}_2\text{Fe}(\text{C}_6\text{N}_6)_2$. **B. Vitriol**, copper sulfate.

Bluebottle (*blu'-bot-l*). See *Carduus*.

Blumenau's Nucleus (*blou'-men-o*). The lateral nucleus of the cuneate nucleus.

Blumenbach's Clivus (*blou'-men-bak*). The inclined surface of the sphenoid bone which lies behind the posterior clinoid processes and is continuous with the basilar process of the occipital bone. **B.'s Process**, the uncinate process of the ethmoid bone.

Blunt-hook (*blunt'-hook*). An obstetric instrument, used mainly in embryotomy.

Blythe's Test for Lead in Potable Water. On the addition of a 1% alcoholic tincture of cochineal a precipitate is formed.

Boas' Reagent. A solution of tropeolin on paper saturated with such a solution. **B.'s Sign**, the presence of lactic acid in the gastric contents in cases of cancer of the stomach. **B.'s Test**, in cases of intestinal atony a splashing sound can be obtained on pressure upon the abdominal wall after the injection of a small quantity (200–300 Cc.) of water into the bowel. **B.'s Test for Hydrochloric Acid in the Contents of the Stomach**, in 100 Gm. dilute alcohol dissolve 5 Gm. pure resorcinol and 5 Gm. white sugar. Spread a few drops of this reagent in a thin layer upon a porcelain dish and heat gently. If a glass rod dipped in the solution is applied to a drop of the filtrate from the stomach, a deep scarlet streak is produced.

Bocconia (*bok'-o'-ne-ah*) [*Paolo Boccone*, an Italian botanist (1633–1704)]. A genus of plants of the order *Papaveraceae*. *B. frutescens* is a native of the West Indies; the juice is purgative and anthelmintic.

Bochdalek's Canal. A minute canal passing

obliquely downward and outward through the membrana tympani from the upper edge of the inner surface of the latter to the umbo, where it opens on the outer surface. **B.'s Ganglion.** See *Ganglion*, *Bochdalek's*. **B.'s Gap,** the interval existing in the diaphragm between the costal and lumbar attachments of this muscle. **B.'s Muscle,** the tritæo-glossus muscle, a small muscle extending from the cartilago tritæa in the thyrohyoid ligament upward and forward to the tongue, which it enters, together with the posterior part of the hyoglossus. **B.'s Tubes,** round or tubular cavities opening into the posterior portion of the thyroglossal duct; like the latter, they are inconstant after birth. **B.'s Valve,** a small fold of the lining membrane of the lacrimal duct, near the punctum lacrimale.

Bock's Pharyngeal Nerve. The posterior efferent (pterygopalatine) branch of the sphenopalatine ganglion.

Bockhart's Impetigo. Epidermic abscesses caused by pyogenic micrococci.

Bodik. A Malay liquor made from rice.

Body (*boi'-e*) [*AS., bodig*]. 1. The animal frame with its organs; also a cadaver or corpse. 2. The important and largest part of an organ, as the body of the uterus. See also *Corpus* and *Corpora*. 3. A mass of matter. **Bodies, Amylaceous, B., Amyloid,** a term applied by Virchow (1856) to bodies found in the central nervous system of adults and young persons dying of various diseases (not alone of diseases of the nervous system). They are concentrically striated, stain deep brown with Lugol's solution, blue with iodine and sulfuric acid, and give the characteristic amyloid color with the anilin stains. **B., Antimmune,** a substance held by Ehrlich in his lateral-chain theory to enter into the composition of an antihemolysin (*q. v.*). (*cf. Anticomplement*, **Bodies, Arantius'.** See *Corpora arantii* **Bodies, Bigeminal.** See *Corpora quadrigemina*. **Bodies, Buchner's Albuminoid,** defensive proteins. **B., Central.**

1. The nucleus. 2. In the plural, peculiar corpuscles which are permanently present near the nucleus in protoplasm during cell-division. **Bodies, Chromatin,** bodies of various forms found in the reticulum of a cell undergoing mitosis. **Bodies, Direction, B., Directive,** the minute abortive cells extruded by the egg-cell as the final phenomenon in the process of maturation, polar bodies. **B., Immune,** a name given by Pfeiffer to one of the two substances of a hemolytic serum. It is thermostable and has two affinities, a stronger one for the red blood-cell and a weaker one for the complement. Having two uniting processes, it is an amboceptor. **B., Intermediary, B., Intermediate.** See *B., Immune*, and *Amboceptor*. **B., Intravertebral,** the centrum of a vertebra. **Bodies, Katalytic,** the ferments. **B., Laveran's.** See *Plasmodium malarie*. **B.-louse.** See under *Pediculus*. **Bodies, Nissl's.** See *Nissl's Bodies*. **Bodies,**

Parenchymal, the lobules of the lacrimal gland. **B.-sarcodæ,** the protoplasm of the cell-body. **Bodies, Semilunar.** See *Cæter*, *Demilune*. **Bodies, Winkler's,** spheric bodies observed in lesions of syphilis.

Boeck's Lotion (*bek*). For dry, itching, inflammatory diseases. Tale and starch, each, 50; glycerol, 30; lead-water, 100. The bottle to be well shaken, the lotion diluted with twice the volume of water and applied with a brush. **B.'s Scabies,** scabies crustosa. Norwegian itch.

Boedecker's Reaction for Albumin (*bo'-dek-er*). Treat the liquid with acetic acid and add a solution of potassium ferrocyanid drop by drop. White precipitate of albumin will be formed.

Boerhaave's Glands (*bor'-hav*). The sudoriparous glands. The convoluted glands in the skin that secrete the sweat.

Boernstein's Test for Saccharin. Extract the substance to be tested with ether, remove the ether and heat with resorcinol and sulfuric acid and next add an excess of soda solution. In the presence of saccharin a strong fluorescence is produced. According to Hoesker, other substances, *e. g.*, succinic acid, also produce this reaction.

Boettcher's Cells (*bet'-cher*). Dark-colored cells, with a basally situated nucleus, found between Claudius' cells. **B.'s Crystals.** See *Crystals*, *Boettcher's*.

Boettcher-Cotugno's Space (*bo-tün'-yo*). The endolymphatic sac of the internal ear.

Boettger's Test for Dextrose (*bet'-ger*). Take 5 Gm. of basic bismuth nitrate, 5 Gm. of tartaric acid, and 30 Cc. of distilled water. Add to this slowly a strong solution of sodium hydroxid, stirring continually until a clear solution is obtained. To a small quantity of this add some solution of dextrose and boil. A black precipitate of metallic bismuth is formed. Or the test may be performed in this way: Add some solid bismuth subnitrate to the liquid already rendered alkaline with sodium carbonate or potassium and boil. The existence of dextrose will be evinced by the darkening of the bismuth salt or a black precipitate.

Bogros' Space (*bo'-gro*). A space between the peritoneum above and the fascia transversalis below, in which the lower portion of the external iliac artery can be reached without wounding the peritoneum.

Bogrow's Fibers (*bo'-gro*). A tract of nerve fibers passing from the optic tract to the optic thalamus.

Boil (*boil*) [*Mod. E., boile*]. A furuncle, a localized inflammation of the skin and subcutaneous connective tissue attended by the formation of pus. See *Furunculus*. **B., Aleppo, B., Delhi,** a peculiar ulcerative affection endemic in India, due to a specific microorganism. See *Furunculus orientalis*. **Boiled Oil.** Linseed oil that has been heated to a high temperature (130° C.) and upwards while a current of air is passed through it

the oil, and the temperature increased the oil begins to effervesce from evolution of products of decomposition.

Oilermakers' Deafness. See *Deafness, Oilermakers'.*

Boil (ME., *boilen*, to stir). The vaporization of a liquid when it gives off vapor having same tension as the surrounding air.

Melanosis (*bol-bo-mel-an-o'-sis*) [*bol, bog*, Gr. *melanous*, blackness]. The process of formation of a melanoma.

Boldin (*bol'-din*). See under *Boldus*.

Bold-do. See *Boldus*.

Boldus. An aromatic glucosid obtained from *Peumus boldus* and other species. It is hypnotic in doses of 20 gr.—1 dr. (1.3–4.0 Gm.).

Boldo (*bol'-du*) [L.]. *Boldo*. The leaves and stems of an evergreen, *Peumus boldus*, native to Chili, sometimes used in anemia and as a substitute for quinin. It contains a bitter alkaloid, *boldin*, a hypnotic in doses of 3 gr. (0.2 Gm.). Dose of the fluid-extract 1–4 min. (0.065–0.26 Cc.); of the tincture which contains 20% of the drug, 5–8 min. (0.32–0.52 Cc.).

Bol (*bol'-dos*, a clod of earth). A translucent, soft variety of clay formerly much used in medicine. Internally as an astringent, locally as an absorbent. Several varieties named, as the *Armenian bole*, the *Lemnian*, the *French bole*.

Bol-form (*bol'-let'-e-form*). Shaped like a bolus.

Bolus (*bol'-let'-us*) [*βολητης*, a kind of mushroom]. A genus of fungi, some species of which edible while others are highly poisonous.

Boni's Sign (*bo-lo-ne'-ne*). On pressing the tips of the fingers of both hands laterally upon the right and left of the abdomen of a patient who is lying on his back whose abdominal muscles are relaxed by one of the thighs, a sensation of friction in the abdomen is perceived; it is noticed in early stages of measles.

Bolometer (*bo-lom'-et-er*) [*βολη*, a throw; *μετρον*, a measure]. A device for measuring the differences in radiant heat. Syn., *radiant balance*.

Bolus (*bol'-tus*) [L.]. 1. A large pill. 2. A rounded mass of food prepared by the bolus for swallowing. 3. See *Bol*.

Bonducella (*bon-du-sel'-ah*) [L.]. *Bonducella*. The seeds of *Carsalpinia bonducella*, a tropical plant. It is a bitter tonic and febrifuge in intermittent fevers. Dose 3 gr. (0.05–0.07 Gm.).

Bonducella (*bon'-du-sin*), $C_{14}H_{16}O_4$. A bitter principle from *bonducella*; a white powder, soluble in alcohol, chloroform, fats, and oils, used as a febrifuge. Dose 1½–3 gr. (0.1–0.2 Gm.).

Bone [AS., *ban*]. A hard tissue that constitutes the framework or skeleton of the body. Bone usually consists of a compact outer mass covered with periosteum, surrounding a reticulated inner structure that contains a central cavity filled with marrow.

A transverse section of a long bone shows bone-tissue to be composed of a number of nearly circular zones, each having a central tube, the haversian canal, through which the blood circulates. Surrounding the haversian canal are concentrically arranged laminae, or layers of bone, between which are found irregular spaces called lacunae, containing bone-corpuscles and communicating with the haversian canal and each other by means of canaliculi, through which the nutrition is conveyed to all parts of the bone. **B., Ankle**, the talus or astragalus. **B., Articular**, that element of the mandible or lower jaw which is formed from the condylar portion of the cartilaginous rudiment in Meckel's cartilage. Syn., *Os articulare*; *Os condyloideum maxilla inferioris*. **B.-ash**, the calcic phosphate remaining after bones have been incinerated. **B., Basilar**. 1. The sphenoid and occipital bones regarded as one. 2. The sacrum. 3. The last lumbar vertebra. 4. The basioccipital bone. 5. The basisphenoid bone in birds. **B., Cancellated**, **B., Cancellous**, bone consisting chiefly of spongy tissue. **B.-cartilage**. See *Osssein*. **B., Cheek**, the malar bone. **B.-chips**. See *Senn's Bone-plates*. **B., Collar**, the clavicle. **B.-conduction**, the transmission of sound-waves to the auditory nerve by means of sonorous vibrations communicated to the bones of the skull. **B.-cyst**, a tumor distending and thinning bone, and filled with serum or bloody fluid; in rare cases bone-cysts contain hydatids. **B., Elongated**, long bones, like the ribs, devoid of a medullary cavity. **B., Endochondral**, such true bone as originates from osteoblastic centers in fetal cartilage, and not from periosteum. **B., Epipetric**, a small wormian bone sometimes found between the great wing of the sphenoid and the anterior inferior angle of the parietal bone. **B., Exercise**, an ossification in the left arm of soldiers due to constant pressure of a musket. **B., Flat**, a bone more or less in the form of a plate. **B.-gelatin**. See *Gelatin, Bone*. **B., Intermaxillary**. See *Mesognathion*. **B., Long**, one consisting of a narrow shaft and two expanded ends. **B., Pneumatic**, those containing many air-cells or air-sacs. **B., Puboischiadic**, **B., Puboischiatic**, the os pubis and the ischium taken as one. **B., Rider's**, an ossification of the lower tendon of the adductor longus or magnus from pressure. **B., Sesamoid**. See *Sesamoid Bone*. **B., Short**, one the three dimensions of which are approximately equal. **B., Stirrup**. See *Stapes*. **B., Sutural**, the wormian bones of the skull. **B., Wormian**, small bones in the sutures of the skull. See *Bones, Table of*.

Boneset. See *Eupatorium*.

Bonfils' Disease. See *Hodgkin's Disease*.

Bonnet's Capsule (*bon-a'*). See *Tenon's Capsule*. **B.'s Position**, the position assumed by the thigh in coxitis: flexion, abduction, and outward rotation.

ATLAS (Superior Surface).

1. Tubercle of anterior arch. 2. Articular facet for odontoid process of axis. 3. Posterior arch and posterior tubercle. 4. Groove for vertebral artery and first cervical nerve. 5. Transverse process. 6. Foramen for vertebral artery. 7. Superior articular process. 8. Tubercle for attachment of transverse ligament.

AXIS (Lateral Aspect).

1. Body. 2. Odontoid process. 3. Foramen for articulating with anterior arch of atlas. 4. Lamina. 5. Spinous process. 6. Transverse process. 7. Superior articular process. 8. Inferior articular process.

AXIS (Posterior View).

1. Posterior surface of body. 2. Odontoid process. 3. Superior articular process. 4. Inferior articular process. 5. Transverse process. 6. Spinous process.

ATLAS AND AXIS (Anterior Surface).

1. Lateral masses of atlas. 2. Anterior arch of atlas including odontoid process of axis. 3. Tubercle of anterior arch. 4. Transverse process of atlas. 5. Inferior articular process of atlas. 6. Superior articular process of atlas. 7. Inferior articular process of axis. 8. Transverse process. 9. Anterior surface of body of axis. 10. Apex of odontoid process.

SEVENTH CERVICAL VERTEBRA (Posterosuperior View).

1. Body. 2. Transverse process. 3. Anterior articular process. 4. Superior articular process. 5. Inferior articular process. 6. Spinous process. 7. Lamina. 8. Spinous process. 9. Spinal foramen.

THORACIC VERTEBRA (Anterior View).

1. Anterior surface. 2. Vertebral foramen. 3. Spinous process. 4. Transverse process. 5. Superior articular process. 6. Inferior articular process. 7. Tubercle. 8. Spinous process.

TABLE OF BONES.

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMEN-TOUS ATTACHMENTS.
	See <i>Iacus</i> .		
<i>Talus</i> .	See <i>Talus</i> .		
[B. N. A.] ^a	First cervical vertebra, ring-like, anterior and posterior arches and tubercles; articular surfaces.	Occipital bone—double <i>arthrodia</i> . Epistropheus, four joints— <i>diarthrodia rotatoria</i> and double <i>arthrodia</i> .	Longus colli (<i>tuberculi</i>), rectus capitis posterior minor (<i>spinous process</i>).
	See <i>Epistropheus</i> .		
<i>Calcaneus</i> [B. N. A.] (<i>os calcis</i>).	The heel bone; irregularly cuboid; lesser process (<i>sustentaculum tali</i>), greater process, peroneal ridge or spine, superior groove articular surfaces.	Astragalus, } <i>arthrodia</i> . Cuboid, } Scaphoid, }	Tibialis posterior, tendo achillis, plantaris, abductor pollicis, abductor minimi digiti, flexor brevis digitorum, flexor accessorius, extensor brevis digitorum.
<i>Metacarpal</i> (os) [B. N.] (<i>os magnum</i>).	Largest bone of carpus; occupies center of wrist; head, neck, body; short bone.	Scaphoid, } <i>enarthrodia</i> . Semilunar, } Second } Metacarpal— <i>arthrodia</i> . Third } Fourth } Trapezoid, } <i>arthrodia</i> . Unciform, }	Flexor brevis pollicis (part).
[B. N. A.] (<i>ossa carpi</i>).	Consists of os naviculare, os lunatum, os triquetrum, os pisiforme, os multangulum majus, os multangulum minus, os capitatum, os hamatum. See individual bones.		
<i>Clavicula</i> [B. N. A.] (<i>clavicle</i>).	Collar bone; resembles the italic "C"; conoid tubercle, deltoid tubercle, oblique line.	Sternum, } <i>arthrodia</i> . Scapula, } Cartilage of first rib, }	Sternomastoid, trapezius, pectoralis major, deltoid, subclavius, sternohyoid, platysma.
<i>Sacrum</i> (os) [B. N. A.] (<i>os sacrum</i>).	The last bone of the vertebral column; resembles a cuckoo's beak; usually composed of four small segments, base, apex, cornua.	Sacrum— <i>amphiarthrodia</i> .	Coccygeus, gluteus maximus, extensor coccygis, sphincter ani, levator ani.
<i>Os nasale inferius</i> [B. N. A.] (<i>inferior turbinate bone</i>).	Situated on the outer wall of the nasal fossa, irregular bone.	Ethmoid, } <i>synarthrodia</i> . Maxilla, } Lacrimal, } Os palatinum, }	None.
[B. N. A.] (<i>ribs</i>).	Twelve in number on each side; shaft, head, neck, tubercle, angle (anterior and posterior), anterior and sternal extremity; first, second, tenth, eleventh and twelfth are peculiar; flat bones.	Vertebrae— <i>arthrodia</i> . Sternum, { First rib— <i>synarthrodia</i> . Others— <i>arthrodia</i> .	Internal and external intercostals, scalenus anticus, medius and posterior, pectoralis minor, serratus magnus, obliquus externus, transversalis, quadratus lumborum, diaphragm, latissimus dorsi, serratus posterior superior and inferior, sacro-lumbalis, musculus accessorius ad sacrolumbalem, longissimus dorsi, cervicis ascendens levatores costarum, infrastostales.
<i>Ilium</i> [B. N. A.] (<i>ilium bone</i> ; <i>os ilium</i>).	Large, 3 parts; flat bone; with its fellow and sacrum and coccyx forms pelvis. <i>Ilium</i> —superior broad expanded portion, crest, superior, middle, and inferior curved lines, iliopectineal line, venter, articular surface, anterior and posterior.	With its fellow of opposite side, } <i>synarthrodia</i> . Sacrum, } Femur— <i>enarthrodia</i> .	<i>Ilium</i> —tensor vaginæ femoris, external oblique, latissimus dorsi, gluteus, transversalis, quadratus lumborum, erector spine, internal oblique, gluteus maximus, medius, and minimus, rectus.

^a The abbreviation [B. N. A.] used throughout this table indicates that the term is in accordance with the *Basel nomenclature*.

TABLE OF BONES.—(Continued.)

NAMP.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND ATTACH.
<i>Coxa (continued)</i>	superior and inferior spinous processes, $\frac{1}{2}$ (about) of acetabulum. <i>Isochium</i> —lower and back portion body, tuberosity and ramus, spine, greater and lesser sacrotubular notches, external and internal lips of tuberosity, lower boundary of obturator foramen, $\frac{1}{2}$ (about) of acetabulum. <i>Pubis</i> —body, horizontal ramus, descending ramus, spine, iliopectineal line, angle, symphysis, obturator foramen (upper boundary), $\frac{1}{2}$ of acetabulum.		<i>pyloricus</i> <i>obliquus</i> <i>Isochium</i> —oblique internus, greater gemelli superior, coccygeus, levator scapularis, transverse, pennis. <i>Pubis</i> —internal oblique, transverse, ramulus, adductor, and brevis, glutei, internal, external, compressor urethrae.
Cranium [B. N. A.].	Occipital, parietal (two), frontal, temporal (two), sphenoid, ethmoid. See individual bones.		
Cuboides (os) [B. N. A.] (cuboid).	Somewhat pyramidal; tubercosity.	Ox calcis, External cuneiform, Fourth and fifth metatarsal bones.	<i>arthro-</i> <i>dia.</i> Flexor brevis pedis.
Cuneiform (of carpus).	See <i>Triquetrum (os)</i> .		
Cuneiforme (m) primum [B. N. A.] (internal cuneiform).	Irregularly wedge-shaped; the largest of the three.	Ox naviculare pedis, Cuneiforme secundum, First and second metatarsal bones.	<i>arthro-</i> <i>dia.</i> Tibialis anticus.
Cuneiforme (m) secundum [B. N. A.] (middle cuneiform).	Wedge-shaped; smallest of the three.	Ox naviculare pedis, Cuneiforme primum, Cuneiforme tertium, Second metatarsal.	<i>arthro-</i> <i>dia.</i> Tibialis posticus.
Cuneiforme (m) tertium [B. N. A.] (external cuneiform).	Wedge-shaped.	Ox naviculare pedis, Cuneiforme secundum, Os cuboideum, Second, third, and fourth metatarsal bones.	<i>arthro-</i> <i>dia.</i> Tibialis posticus pedalis.
Epistropheus [B. N. A.] (axis).	Second cervical vertebra: body, odontoid process, pedicles, laminae, spinous process, transverse processes, articular surfaces.	First cervical vertebra— <i>dens</i> , <i>thyridia rotatoria</i> and <i>dentis arthroidea</i> . Third cervical vertebra— <i>dentis arthroidea</i> .	Longus colli, ch.
Ethmoidale (os) [B. N. A.] (ethmoid).	Irregularly cubic, situated at anterior part of base of skull, horizontal or vertical plate perpendicular plate, two lateral masses, crista galli.	Ox sphenoidale, Two sphenoid—medial, lateral, Two nasal, Two maxillary, Two lacrimal, Oss palatinum, Concha inferior, Vomer.	<i>nasalis</i> None.

FIRST DORSAL VERTEBRA (Lateral View).

1. Superior surface of body. 2. Semilunar process. 3. Articular facet for head of first rib. 4. Demifacet for head of second rib. 5. Superior articular process. 6. Inferior articular process. 7. Transverse process. 8. Articular facet for tubercle of first rib. 9. Spinous process.

TWELFTH DORSAL VERTEBRA (Lateral View).

1. Articular facet for head of twelfth rib. 2. Transverse process. 3. Superior and posterior tubercle of transverse process. 4. Inferior and posterior tubercle. 5. Inferior articular process. 6. Spinous process.

SACRUM (Posterior Aspect)

1. Spinous processes of sacral vertebrae. 2. Sacral groove. 3. Posterior sacral foramina. 4. Articular processes united. 5. Transverse processes. 6. Cribriform base. 7. Articular surface. 8. Superior articular processes of first sacral vertebra. 9. Posterior orifice of sacral canal. 10. Groove transmitting inferior orifice. 11. Cornua. 12. Apex.

ELEVENTH DORSAL VERTEBRA (Lateral View).

1. Articular facet for head of eleventh rib. 2. Transverse process. 3. Superior tubercle of transverse process. 4. Inferior and anterior tubercle. 5. Inferior and posterior tubercle. 6. Superior articular process. 7. Inferior articular process. 8. Spinous process.

LUMBAR VERTEBRA (Posterosuperior View).

1. Anterior surface of body. 2. Transverse processes. 3. Spinous process. 4. Superior articular processes. 5. Inferior articular processes.

SACRUM (Anterior Aspect)

1. Bodies of sacral vertebrae with transverse lines of union. 2. Anterior sacral foramina. 3. Base. 4. Articular surface of lateral aspect. 5. Its inferior portion. 6. Articular surface of base. 7. Notch for formation of first lumbar intervertebral foramen. 8. Superior articular process of first sacral vertebra. 9. Apex of sacrum. 10. Cornu. 11. Notch for transmission of fifth sacral nerve.

Cervix (Anterior Aspect).

1. Base. 2. 2. Corvus. 3. Second cervical vertebra. 4. Third cervical vertebra. 5. Fourth cervical vertebra. 6. Fifth cervical vertebra.

Vertebral Column (Lateral Aspect).

1-7. Cervical vertebrae. 8-10. Dorsal vertebrae. 11-12. Lumbar vertebrae. A. A. Sacral process. B. B. Anterior process of lumbar vertebrae. C. Anterior surface of sacrum. D. Processus in the sacral process. E. Sacral vertebrae.

Parietal, Temporal, and Sphenoid Bones (Posterior Aspect).

1. Body of sphenoid bone. 2. 2. Sphenoid and temporal bones. 3. 3. Parietal bones. 4. 4. Mastoid processes. 5. 5. Jugular foramen. 6. 6. Nuchal crest. 7. 7. Mastoid process of sphenoid bone. 8. 8. Sphenotemporal sutures. 9. 9. Temporoparietal sutures.

Occipital Bone (Posterior View).

1. Basilar process. 2. 2. Posterior condylar process. 3. 3. Posterior condylar process. 4. 4. Condylar process. 5. 5. Internal occipital protuberance. 6. 6. Condylar process. 7. 7. Jugular process. 8. 8. Jugular foramen.

Nasal Bones (External Aspect).

1. 1. The two nasal bones. 2. 2. Superior extremity. 3. 3. Inferior border. 4. 4. Internal border. 5. 5. 5. External border.

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Femur [B. N. A.]	Cylindric; longest, largest, and strongest bone in the body; shaft and two extremities; head, neck, greater and lesser trochanters, linea aspera, condyles; a long bone.	Os coxa— <i>enarthrodia</i> . Tibia— <i>ginglymus</i> . Patella— <i>arthrodia</i> .	Gluteus medius, gluteus minimus, pyridiformis, obturator internus, obturator externus, gemellus superior, gemellus inferior, quadratus femoris, pectens magnus, iliacus, vastus externus, gluteus maximus, short head of the biceps, vastus internus, adductor magnus, pectineus, adductor brevis, adductor longus, crureus, subcrureus, gastrocnemius, plantaris, popliteus.
Fibula [B. N. A.]	Long bone; shaft, upper extremity or head, lower extremity or external malleolus.	Tibia— <i>arthrodia</i> . Talus, with the tibia and fibula— <i>ginglymus</i> .	Biceps, soleus, peroneus longus, extensor longus digitorum peroneus tertius, extensor proprius pollicis, ulnaris posterior, flexor longus pollicis, peroneus brevis.
Foot.	Composed of tarsus, metatarsus, and phalanges (q. v.)		
Frontale (os) [B. N. A.] (frontal).	The forehead bone; a flat bone; a frontal portion and an orbitonasal portion, frontal eminences, superciliary ridges, supraorbital arches, supraorbital notches or foramina internal and external angular processes, temporal ridges, nasal notch, nasal spine, nasal eminence or glabella.	Two parietal, Sphenoid, Ethmoid, Two nasal, Two maxillary, Two lacrimal, Ossa zygomatica,	Corrugator supercilii, orbicularis palpebrarum, and ten peral on each side.
Hamatum (os) [B. N. A.] (trapezoid)	Wedge-shaped; hook like process, in lower row of carpus; short bone.	Os lunatum, Fourth and fifth metacarpal, Os triquetrum, Os capitatum,	Flexor brevis minimi digiti, flexor ossis metacarpi minimi digiti, anterior annular ligament.
Hamul.	Composed of carpus, metacarpus, and phalanges (q. v.).		
Humerus [B. N. A.]	Largest bone of upper extremity; long bone; a shaft and two extremities. Upper extremity presents a head, neck and greater and lesser tuberosities. Lower extremity, trochlea, depression fossa, coronoid fossa, external and internal condyles, supracondylar foramen, supracondylar ridges.	Scapula (glenoid cavity)— <i>enarthrodia</i> . Ulna, } Radius, } <i>ginglymus</i> .	Supraspinatus, infraspinatus, teres minor, subscapularis, pectoralis major, latissimus dorsi, deltoid, coraco-clavicularis, brachialis anticus, triceps, subscapularis, pronator radii teres, flexor carpi radialis, palmaris longus, flexor digitorum superficialis, flexor carpi ulnaris, supinator longus, extensor carpi radialis longus, extensor carpi radialis brevis, extensor carpi ulnaris, extensor digitorum, extensor minimi digiti, extensor carpi ulnaris, supinator brevis, and anconeus.
Hyoides (os) [B. N. A.] (hyoid)	A bony arch, irregular bone; a body, two greater and two lesser cornua.	None.	Sternohyoid, thyrohyoid, omohyoid, digastricus, stylohyoid, mylohyoid, geniohyoid, geniohyoglossus, hyoglossus, middle constricter of the pharynx.
Ilium (os) [B. N. A.] (ilium)	See <i>Coxa</i> (os).		
Inus [B. N. A.] (anvil)	Resembles a bicuspid tooth with two roots, body, and two processes. The largest bone in the ear.	Malleus— <i>arthrodia</i> (trigger-joint). Stapes— <i>arthrodia</i> .	None.
Maxilla [B. N. A.] (upper maxillary).	See <i>Mandibula</i> .		
Mandibula [B. N. A.] (lower maxillary).	See <i>Concha nasalis inferior</i> .		
Mandibula [B. N. A.] (lower maxillary).	See <i>Coxa</i> (os).		

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Iscii (os) [B. N. A.] (ischium).	See <i>Coxa</i> (os).		
Lacrimal (os) [B. N. A.] (lacrimal).	Small; situated at front part of inner wall of orbit; resembles finger-nail; crest, lacrimal groove; flat bone.	Frontal, Ethmoid, Superior maxillary, Inferior turbinate, } <i>synarthrosis</i> .	Tensor tarsi.
Lingual.	See <i>Hyoidem</i> (os).		
Lunatum (os) [B. N. A.] (semilunar).	Upper row of carpus; four surfaces, crescentic outline.	Radius— <i>condyloid</i> . Os capitatum, Os hamatum, Os triquetrum, Os naviculare manus. } <i>arthrosis</i> .	
Magnum (os).	See <i>Capitatum</i> (os).		
Malar.	See <i>Zygomaticum</i> (os).		
Malleus.	Resembles a hammer; head, neck, handle or manubrium, processus gracilis, processus brevis; irregular. The second largest bone of the ear.	Incus— <i>arthrosis</i> (trigger-joint).	Tensor tympani
Mandibula [B. N. A.] (inferior maxillary, mandible).	Body and two rami; contains the teeth of the lower jaw; symphysis, mental process, mental foramen, coronoid and condyloid process, head, neck, sigmoid notch, irregular bone.	The two temporal bones— <i>bilateral condyloid—diarthrosis</i> .	Levator menti depressor labii inferioris, depressor anguli oris, platysma myoides, buccinator, masseter, orbicularis oris, geniohyoglossus, geniohyoidem, mylohyoides, digastric superior constrictor, temporal internal pterygoid, external pterygoid
Maxilla [B. N. A.] (superior maxillary).	Furns with its fellow the whole of the upper jaw; somewhat cuboidal; body and malar, nasal, alveolar and palatine processes, hollow (the antrum of Highmore or maxillary sinus), incisive or myriodont fossa, canine fossa, canine eminence, infraorbital foramen, posterior dental canal, maxillary tuberosity, posterior palatine canal, infraorbital groove; irregular bone.	Frontal, Ethmoid, Nasal, Os zygomaticum, Lacrimal, Concha nasalis inferior, Palate, Vomer, Fellow of opposite side. } <i>synarthrosis</i> .	Orbicularis palpebrarum, obliquus inferior oculi, levator labii superioris alaque nasi, levator labii superioris proprius, levator anguli oris, constrictor nasolabialis alae nasi dilator nasolabialis posterior, masseter, buccinator, internal pterygoid, orbicularis oris.
Metacarpalia (ossa) [B. N. A.] (metacarpal).	Five in number; shaft, base, and head; long bones.	Second row of carpus— <i>arthrosis</i> . Phalanges— <i>condyloid</i> .	To the thumb—flexor and extensor ossis metacarpii pollicis, first dorsal interosseous. Second metacarpal bone—flexor carpi radialis, extensor carpi radialis longus, first and second dorsal interosseous, first palmar interosseous, flexor brevis pollicis (frequently). Third metacarpal—extensor carpi radialis brevis, flexor carpi pollicis, adductor pollicis, second and third dorsal interosseous. Fourth metacarpal—third and fourth dorsal and second palmar interosseous. Fifth metacarpal—extensor carpi ulnaris, flexor carpi ulnaris, flexor carpi metacarpii, third and fourth digital, fourth dorsal, and third palmar interosseous.

LACRIMAL BONE
(External Aspect).

1. Vertical crest, dividing external surface into two parts. 2. Spine, in which crest terminates. 3. Sulcus contributing to the formation of lacrimal canal. 4. Continuation of preceding, contributing to formation of nasal canal. 5. Posterior division of external surface, contributing to formation of orbit. 6. Anterior border. 7. Posterior border. 8. Superior extremity. 9. Portion of inferior border that articulates with lacrimal process of inferior turbinate bone. 10. Portion that articulates with orbital plate of superior maxillary bone.

PALATE BONE (External Aspect).

1. External surface of orbital process. 2. Superior or orbital surface. 3. Anterior or maxillary surface. 4. Notch forming greater part of sphenopalatine foramen. 5. Sphenoid process. 6. Groove entering into formation of posterior palatine canal. 7. Surface that enters into the formation of base of maxillary sinus. 8. External surface of pterygoid process. 9. Groove to receive posterior border of internal plate of pterygoid process.

MALAR BONE (External Aspect).

1. Orbite for malar nerve. 2. Superior or orbital border. 3. Inferior or zygomatic border. 4. Anterior or temporal border. 5. Anterior or maxillary border. 6. Superior angle. 7. Inferior angle. 8. Anterior angle. 9. Posterior angle.

INFERIOR TURBINATE BONE (Internal or Convex Aspect)

1. Anteroposterior ridge, dividing the internal surface into two almost equal parts. 2. Inferior border. 3. Anterior portion of superior border, articulating with nasal process of superior maxillary bone. 4. Lacrimal process. 5. Ethmoid process. 6. Portion of superior border that articulates with palate bone. 7. Anterior extremity. 8. Posterior extremity.

SUPERIOR MAXILLARY BONE (External Aspect).

1. Anterior aspect of pyramidal process, or canine fossa. 2. Invisive or myriiform fossa. 3. Infra-orbital foramen. 4. Summit of pyramidal process, or malar process. 5. Posterior aspect of pyramidal process. 6. Inferior border of pyramidal process. 7. Posterior border, or maxillary tuberosity. 8. Nasal process. 9. Posterior border, grooved for lacrimal duct. 10. Anterior nasal spine. 11. Infra-orbital groove. 12. Summit of nasal process. 13. Posterior and superior angle. 14. Superior border. 15. Anterior border of nasal process. 16. Notch for anterior opening of nasal fossa.

INFERIOR MAXILLARY BONE (External Aspect).

1. Body of bone and external oblique line. 2. Ramus. 3. Symphysis. 4. Incisive fossa. 5. Mental foramen. 6. Depression in inferior border for attachment of digastric muscle. 7. Depression for passage of facial artery. 8. Angle of jaw. 9. Posterior extremity of internal oblique line. 10. Coronoid process. 11. Condyle. 12. Sigmoid notch. 13. Origin of inferior dental canal. 14. Alveolar groove. 15. Alveolar border. a. Incisors. b. Bicuspids. c. Canines. m. Molars.

HYOID BONE (Anterior Aspect).

- 1, 2. Anterior or convex surface of body. 3, 4. Greater cornua. 5. Junction of greater cornua with body. 6, 6. Lesser cornua.

LATERAL ASPECT OF SKULL.

1. Frontal bone. 2. Parietal bone. 3. Occipital bone. 4. Temporal bone. 5. Greater wing of sphenoid bone. 6. Lesser wing of sphenoid bone. 7. Crista parietalis. 8. Squamosal suture. 9. Mastoid process. 10. Sphenoid bone. 11. Sphenoidal suture. 12. Sphenoidal ridge. 13. Vomer bone. 14. Frontal bone. 15. Frontal suture. 16. Mastoid process. 17. Mastoid suture. 18. Superior maxillary bone. 19. Inferior maxillary bone. 20. Nasal bone. 21. Nasomaxillary suture. 22. Nasofrontal suture. 23. Lacrimal groove. 24. Lacrimal bone. 25. Inferior maxillary bone. 26. Mental foramen. 27. Angle of lower jaw. 28. Coronoid process. 29. Condyle. 30. Neck of condyle. 31. External auditory canal. 32. Styloid process. 33. Mastoid process. 34. Mastoid suture.

TABLE OF BONES.—(Continued.)

NAME	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Metatarsalia (ossa) [B. N. A.] (metatarsal).	Five in number; shaft, base, and head; long bones.	Tarsus— <i>arthrodia</i> . Phalanges— <i>condyloid</i> .	<i>First</i> —tibialis anticus (part), peroneus longus, first dorsal interosseous. <i>Second</i> —adductor pollicis, first and second dorsal interosseous, tibialis posticus (part). <i>Third</i> —adductor pollicis, second and third dorsal and first plantar interosseous, tibialis posticus (part). <i>Fourth</i> —adductor pollicis, third and fourth dorsal and second plantar interosseous, tibialis posticus (part). <i>Fifth</i> —peroneus brevis, peroneus tertius, flexor brevis minimi digiti, transversus pedis, fourth dorsal, and third plantar interosseous.
Multangulum majus [B. N. A.] (trapezium).	In lower row of carpus; very irregular; six surfaces, groove; short bone.	Os naviculare manus, Multangulum minus, First and second metacarpal,	<i>arthrodia</i> .
Multangulum minus [B. N. A.] (trapezoid).	Smallest bone in second row of carpus; wedge-shaped; six surfaces; short bone.	Os naviculare manus, Second metacarpal, Multangulum majus, Os capitatum,	
Nasale (os) [B. N. A.] (nasal).	Oblong; forms with its fellow the bridge of the nose; nasal foramen, spine, crest; flat bone.	Frontal, Ethmoid, Nasal (opposite), Maxillary,	<i>synarthrodia</i> .
Naviculare (os) manus [B. N. A.] (scaphoid of wrist).	Largest bone of first row; boat-shaped; upper and outer part of carpus; four surfaces; tubercle; short bone.	Radius— <i>condyloid</i> . Multangulum majus, Multangulum minus, Os capitatum, Os lunatum,	<i>arthrodia</i> .
Naviculare (os) pedis [B. N. A.] (scaphoid of ankle).	Or navicular bone; boat-shaped; inner side of tarsus; four surfaces, tuberosity; short bone.	Talus, Cuneiform (three), Cuboid (occasionally).	
Occipitale (os) [B. N. A.] (occipital).	Back part and base of cranium, trapezoid in shape; outer and inner tables; external protuberance, external occipital crest, superior and inferior curved lines, foramen magnum, condyles, jugular process, anterior and posterior condyloid foramina, basilar process, pharyngeal spine, 4 fossae on internal surface, internal occipital protuberance and crest, grooves for the cerebral sinuses, torcular herophili, jugular foramen; flat bone.	Parietal (two), Temporal (two), Sphenoid, Atlas— <i>double arthrodia</i> .	Twelve pairs—occipitofrontalis, trapezius, sternomastoid, complexus, levator cervicis, splenius capitis, superior oblique, rectus capitis posterior, major and minor, rectus lateralis, rectus capitis anterior, major and minor, superior constrictor of the pharynx.
Palatinum (os) [B. N. A.] (palate).	Back part of nasal fossa; helps to form floor and outer wall of nose, the roof of mouth and floor of orbit, also sphenomaxillary and pterygoid fossae and the sphenomaxillary fissure. L shaped; inferior or horizontal plate, superior or verti-	Sphenoid, Ethmoid, Maxillary, Concha nasalis inferior, Vomer, Opposite palate,	
			Tensor palati, aryepiglottic, internal and external pterygoid, superior constrictor of pharynx.

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Palatinum (continued).	cal plate, posterior palatine canal, posterior nasal spine, inferior and superior turbinated crests, maxillary process, pterygoid process, accessory descending palatine canals, orbital process, sphenoid process, sphenopalatine foramen.		
Parietale (os) [B. N. A.] (parietal).	Form sides and roof of skull; irregular, quadrilateral; two surfaces, four borders, four angles, parietal eminence, temporal ridge, parietal foramen, furrows for cerebral sinuses, depressions for parachionian bodies; flat bone.	Opposite parietal, Occipital, Frontal, Temporal, Sphenoid, } <i>synarthrodial.</i>	Temporal.
Patella [B. N. A.]	Flat; triangular; sesamoid; anterior part of knee-joint; two surfaces, three borders, apex; flat bone.	Condyles of femur— <i>partly arthrodial.</i>	Rectus, crureus, vastus internus, vastus externus.
Pelvis.	Composed of two ossa coxae, os sacrum, and os coccygis (q. v.).		
Phalanges digitorum pedis [B. N. A.] (phalanges of foot).	Two of great toe, three of each of the others; shaft, base, head; long bones.	First row with metatarsal and second phalanges— <i>condyloid.</i> Second of great toe with first phalanx; of other toes, with first and third phalanges. Third row with second row, } <i>singly-mus.</i>	<i>First—great toe—</i> inner tendons extensor brevis digitorum, abductor pollicis, adductor pollicis, flexor brevis pollicis, transverse peslis. <i>Second toe—</i> first and second dorsal interosseus, first lumbrical. <i>Third toe—</i> third dorsal and first plantar interosseus, second lumbrical. <i>Fourth toe—</i> fourth dorsal and second plantar interosseus, third lumbrical. <i>Fifth toe—</i> flexor brevis minimi digiti, abductor minimi digiti, third plantar interosseus, fourth lumbrical. <i>Second—great toe—</i> extensor longus pollicis, flexor longus pollicis. <i>Other toes—</i> flexor brevis digitorum, one slip of extensor tendons of extensor longus and brevis digitorum. <i>Third—</i> two slips from the common tendon of the extensor longus and extensor brevis digitorum, and flexor longus digitorum.
Phalanges digitorum manus [B. N. A.] (phalanges of hand).	Fourteen in number, three for each finger and two for thumb; shaft, head, base, long bones.	First row with metacarpal bones and second row of phalanges— <i>condyloid.</i> Second row with first and third rows, } <i>singly-mus.</i> Third row with second row,	<i>Thumb—</i> extensor primi interossei pollicis, flexor brevis pollicis, abductor pollicis, adductor pollicis, flexor longus pollicis, extensor secundi interossei. <i>First index finger—</i> first dorsal and first palmar interosseus. <i>Middle finger—</i> second and third dorsal interosseus. <i>Ring finger—</i> fourth dorsal and second palmar interosseus. <i>Little finger—</i> third palmar interosseus, flexor brevis minimi digiti, abductor minimi digiti. <i>Second—to all—</i> flexor profundus digitorum and extensor communis digitorum in addition. <i>To index finger—</i> extensor indicis. <i>To little finger—</i> extensor minimi digiti. <i>Third—</i> flexor profundus digitorum, extensor communis digitorum.

BASE OF SKULL.

1. Median suture of palatine vault. 2. Inferior orifice of anterior palatine canal. 3, 3. Inferior openings of posterior palatine canals. 4. Posterior border of palatine vault; posterior nasal spine. 5. Posterior border of nasal septum. 6. Hamular process of internal pterygoid plate of sphenoid bone. 7. Internal pterygoid plate. 8. External pterygoid plate. 9. Sphenoid fossa. 10. Oval or inferior maxillary foramen. 11. Foramen spinosum. 12. Foramen lacerum medium. 13. Zygomatic arch. 14. Sphenoccipital suture. 15. Glenoid cavity. 16. External auditory canal. 17. Mastoid process. 18, 18. Styloid process and stylomastoid foramen. 19. Inferior orifice of carotid canal. 20. Foramen lacerum posterius. 21, 21. Occipital condyles. 22. Basilar process. 23. Foramen magnum. 24. External occipital crest. 25, 25. Inferior curved lines of occipital bone.

THE ORBITAL CAVITIES.

1. Anterior opening of the nasal fossa. 2. Anterior extremity of inferior turbinate bone. 3. Malar bone. 4. 4. Orbital cavity. 5. Lacrimal canal. 6. 6. planum of ethmoid. 7. Optic foramen. 8. Sphenoid fissure. 9. Sphenomaxillary fissure. 10. Great wing of sphenoid. 11. Squamous portion of temporal. 12. Anterior angle of parietal. 13. Portion of frontal entering into formation of temporal fossa. 14. Mastoid process. 15. Styloid process.

THORAX (Anterior View).

1. Manubrium sterni. 2. Gladiolus. 3. Ensiform cartilage or xiphoid appendix. 4. Circumference of apex of thorax. 5. Circumference of base. 6. First rib. 7. Second rib. 8, 9. Third, fourth, fifth, sixth, and seventh ribs. 10. Eighth, ninth, and tenth ribs. 11. Eleventh and twelfth ribs. 12, 13. Costal cartilages.

CLAVICLE (Inferior Aspect)

1. Longitudinal depression for insertion of subclavius muscle. 2. Rough impression for attachment of costoclavicular ligament. 3, 4. For attachment of coracoclavicular ligaments. 5. Anterior border. 6. Facet for articulation with sternum. 7. Facet for articulation with acromion.

RIBS OF LEFT SIDE (Posterior Aspect)

1. 12. Anterior extremities of 12 ribs of left side. 13. Internal surface. 14, 15. External surface. 16. Head of first rib. 17. Head of second rib. 18. Head of third rib. 19. Heads of ribs from fourth to ninth. 20. Head of tenth rib. 21. Heads of eleventh and twelfth ribs. 22. Neck of rib. 23. Tubercle of first rib. 24. Articular facet of tubercle of second rib. 25. Articular facets of tubercles of ribs from third to ninth. 26. Articular facet for tubercle of tenth rib. 27, 28. Angles of ribs.

SCAPULA (Postero-sternal Aspect)

1. Suprascapular fossa. 2. Infrascapular fossa. 3. Superior or coracoid border. 4. Coracoid or suprascapular notch. 5. Axillary or external border. 6. Anterior angle and glenoid cavity. 7. Inferior angle. 8. Rough impression for long head of triceps. 9. Internal or spinal or vertebral border. 10. Spine. 11. Smooth surface over which trapezius muscle glides. 12. Acromion. 13. Base of spine. 14. Coracoid process.

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Isiometacarpal (os) [B. N. A.] (metacarpal).	Anterior and inner side of carpus, small, spheric, one articular facet; short bone.	Os triquetrum— <i>arthrodia</i> .	Flexor carpi ulnaris, abductor minimi digiti, anterior annular ligament.
Pulvis	See <i>Coxa</i> (os).		
Proximal (os)	See <i>Triquetrum</i> (os).		
Radius [B. N. A.].	Outer side of forearm; shaft, head, neck, tuberosity, lower extremity, oblique line, sigmoid cavity, styloid process.	Humerus— <i>ginglymus</i> , superior— <i>diarthro-</i> dia rotatoria, middle— <i>membran-</i> ous, inferior— <i>diarthro-</i> dia rotatoria Os lunatum— <i>condyloid</i> .	Biceps, supinator brevis, flexor sublimis digitorum, flexor longus pollicis, pronator quadratus, extensor ossis metacarpi pollicis, extensor primi internodii pollicis, pronator radii teres, supinator longus.
Ribs	See <i>Costa</i> .		
Sacrum (os) [B. N. A.]	Large triangular bone at lower part of vertebral column and upper and back part of pelvic cavity; composed of five vertebrae; base, promontory, four surfaces, apex, central canal, anterior and posterior sacral foramina, lateral masses, laminae, articular processes, sacral cornua, transverse processes, sacral groove, ala, irregular bone.	Last lumbar vertebra, Coccyx, Osia coxae (two).	Piriformis, coccygeus, iliacus, gluteus maximus, latissimus dorsi, multatus spinæ, erector spinæ, extensor coccygis.
Scaphoid of Carpus	See <i>Naviculare</i> (os) <i>manus</i> .		
Scaphoid of Tarsus	See <i>Naviculare</i> (os) <i>pedis</i> .		
Scapula [B. N. A.].	Back part of shoulder; triangular; posterior aspect and side of thorax; two surfaces, three borders, three angles, subscapular fossa, subscapular angle, dorsum, spine, supraspinous and infraspinous fossae, acromion process, glenoid cavity, neck, head, coracoid process; flat bone.	Humerus— <i>enarthrodia</i> . Clavicle— <i>arthrodia</i> .	Subscapularis, supraspinatus, infraspinatus, trapezius, deltoid, omohyoid, serratus magnus, levator anguli scapulae, rhomboides major and minor, triceps, coracobrachialis, pectoralis minor, platysma, latissimus dorsi.
Semilunar	See <i>Lunatum</i> (os).		
Sesamoid [B. N. A.]	Small, rounded masses, cartilaginous in early life, osseous in the adult; developed in tendons, inconstant, except patellæ.		
Sphenoidal (os) [B. N. A.] (sphenoid).	Anterior part of base of skull, bat-shaped, with wings extended, body, two greater and two lesser wings, two pterygoid processes, ethmoid spine, optic groove, optic foramen, olivary process, pituitary fossa, anterior, middle, and posterior clinoid processes, sella turcica, carotid or cavernous groove, lingula, ethmoid crest, sphenoid cells or sinuses, sphenoid turritated bones, rostrum, vaginal processes, pterygopala line canal, splanchnic processes, round foramen, oval foramen, foramen vesalii, foramen spinosum, pterygoid ridge, external orbital foramen, vidian canal, pterygoid fossa, internal and external pterygoid plates, hamular process, scaphoid fossa.	All the bones of cranium, Malar (two), Palate (two), Vomer,	Temporal, external and internal pterygoids, superior constrictor, tensor palati, levator tympani, levator palpebre, obliquus superior, superior inferior, internal and external recti.

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY	MUSCULAR AND LIGAMENTOUS ATTACHMENTS
Sphenoid Turbinate or Sphenoid Spongy Bones	Situated at anterior and inferior part of body of sphenoid; exist as separate pieces until puberty and occasionally are not joined in the adult.	Ethmoid. } Palate. } <i>synarthrodia</i> .	None.
Stapes (B. N. A.).	Resembles a stirrup, one of the ossicles of the tympanum; head, neck, two branches (crura), base; irregular bone.	Incus— <i>arthrodia</i> .	Stapedius.
Sternum (B. N. A.).	The breast-bone; manubrium, gladiolus, ensiform cartilage, or first, second, and third pieces, anterior and posterior surface, borders.	Clavicles (two)— <i>arthrodia</i> . Costal cartilages (seven on each side) first— <i>synarthrodia</i> , others, <i>arthrodia</i> .	Pectoralis major, sternocleidomastoid, sternohyoid, sternothyroid, triangular sterni aponeuroses of the obliquus and internus and transversus muscles, rectus, diaphragm.
Superior maxillary	See <i>Maxilla</i> .		
Talus (B. N. A.) (astragalus).	Irregularly cubic; forms the keystone of arch of foot; head, neck, six articular surfaces.	Tibia. } Fibula. } <i>ginglymus</i> . Calcaneus } Os naviculare } <i>arthrodia</i> . Pedis.	Internal and external lateral ligaments.
Tarsus (B. N. A.) (ankle).	Consist of calcaneus, or on calcia, talus, cuboid, navicular, internal, middle, and external cuneiform. See individual bones.		
Temporal (os) (B. N. A.) (temporal)	Situated at side and base of skull, squamous, mastoid and petrous portions, temporal ridge, zygoma or zygomatic process, eminentia articularis, glaserian fissure, tubercle, glenoid fossa, postglenoid process, tympanic plate, mastoid foramen, digastric fossa, occipital groove, sigmoid fossa, mastoid cells, meatus auditorius externus, hiatus fallopian, meatus auditorius internus, lamina cribrosa, aqueductus vestibuli, styloid process, stylomastoid foramen, auricular fissure; irregular bone.	Occipital, Parietal, Sphenoid, Internal maxillary, Malar, } <i>synarthrodia</i> .	Temporal, masseter, occipital-frontalis, sternomastoid, stylohyoid, capitis, trachelomastoid, digastricus, petrosus superior, stylohyoid, stylohyoid, styloglossus, levator palati, tensor tympani, tensor palati, stapedius.
Tibia (B. N. A.).	At front and inner side of leg, next to femur in length and size; prismoid in form; upper extremity or head, tuberosities, spinous process, tubercle, popliteal notch, shaft, crest (linea), oblique line, internal malleolus—long bone.	Femur— <i>ginglymus</i> . superior— <i>arthrodia</i> . Fibula, middle— <i>membranous</i> . inferior— <i>arthrodia</i> . Talus with fibula— <i>ginglymus</i> .	Seminembranous tibiales anterior, extensor longus digitorum, latissimus, sartorius, gracilis, semitendinosus, tibiales anterior, popliteus, volvulus, flexor longus digitorum, tibiales posterior, ligamentum patella.
Trapezium	See <i>Multangulum majus</i> .		
Trapezoid	See <i>Multangulum minus</i> .		
Trapezoid	See <i>Wormian</i> .		
Triquetrum (os) (B. N. A.) (cuneiform of carpus)	Pyramidal.	Occlunatum, Pisiform, Os hamatum, Interarticular fibrocartilage } <i>arthrodia</i> .	
Turbinate, Inferior.	See <i>Concha nasalis inferior</i> .		
Turbinate, Middle.	The free convoluted margin of the thin lamella that descends from the under surface of the cribriform plate of the ethmoid bone.		
Turbinate, Superior	The thin curved plate of the ethmoid that bounds the superior meatus of the nose above.		

BONES OF CARPUS (Dorsal Aspect).

- R. Inferior extremity of radius. U. Inferior extremity of ulna. F. Interarticular fibrocartilage. S. Scaphoid. L. Lunate. C. Cuneiform. P. Pisiform. T. Trapezium. T. Trapezoid. M. Os magnum.

Ulniform. The numbers upon these bones indicate the number of others with which each articulates. 1, 2, 3, 4, 5. Proximal extremities of first, second, third, fourth, and fifth metacarpal bones.

Foot (Plantar Aspect).

1. Superior surface of calcaneum. 2. Inner tuberosity. 3. Outer tuberosity. 4. Angular depression between these tuberosities. 5. Inferior portion of head of astragalus. 6. Plantar surface of cuboid for attachment of inferior calcaneocuboid ligament. 7. Tuberosity of cuboid. 8. Scaphoid. 9. Tuberosity of scaphoid. 10. Inferior portion of internal cuneiform. 11. Apex of middle cuneiform. 12. Apex of internal cuneiform. 13, 14, 15, 16. First, second, third, fourth, and fifth metatarsal bones. 17. Tuberosity of fifth metatarsal bone. 18. Two sesamoid bones. 19. First phalanx of great toe. 20. First phalanx of remaining toes. 21. First phalanx of great toe. 22, 23. First phalanges of remaining toes. 24, 25. Second and third phalanges of these toes.

HAND (Palmar Surface).

1. Scaphoid. 2. Semilunar. 3. Cuneiform. 4. Pisiform. 5. Trapezium. 6. Groove for tendon of flexor carpi radialis. 7. Trapezoid. 8. Os magnum. 9. Ulniform. 10, 11. Metacarpal bones. 12, 13. First phalanges of fingers. 14, 15. Second phalanges. 16, 17. Third phalanges. 18. First phalanx of thumb. 19. Second phalanx.

MEDIAN SECTION OF PELVIS, PLANE AND AXIS OF SUPERIOR STRAIT.

1. Sacrovertebral angle. 2, 2. Median section of sacrum. 3. Median section of creux. 4. Junction of sacrum and creux. 5, 5. Sacral canal. 6. Median section of symphysis pubis. 7. Anteroposterior or sacropubic diameter of pelvic inlet. 8. Prolongation of this diameter. 9. Line perpendicular to this diameter at its middle. 10. Anteroposterior or coccygeal diameter of pelvic outlet. 11. Horizontal line passing through inferior margin of symphysis pubis. 12. Line perpendicular to last. 13. Arc of angle between these two.

HUMERUS (Anterior Aspect).

1. Diaphysis. 2. Humeral head. 3. Anatomic neck. 4. Greater or external tuberosity. 5. Lesser or anterior tuberosity. 6. Bicipital groove. 7. Ridge for attachment of coracobrachialis muscle. 8. Anterior border of shaft. 9. External surface. 10. Orifice of nutrient canal. 11. Lesser or radial head. 12. Trochlea. 13. External condyle or epicondyle. 14. Internal condyle or epicondyle. 15. Inferior portion of external border. 16. Inferior portion of internal border. 17. Coronoid fossa.

RADIUS AND ULNA (Anterior Aspect).

1. Anterior surface of body of ulna. 2. Greater sigmoid cavity. 3. Lesser sigmoid cavity. 4. Olecranon. 5. Coronoid process. 6. Orifice of nutrient canal. 7. Interosseous space. 8. Head of ulna. 9. Styloid process. 10. Body of radius. 11. Head of radius. 12. Neck. 13. Bicipital tuberosity. 14. Ridge for insertion of pronator radii teres. 15. Inferior extremity of radius. 16. Styloid process.

FEMUR (Posterior Aspect).

1. Linea aspera. 2. External division. 3. Internal division. 4. Inferior division. 5. Head. 6. Depression for attachment of round ligament. 7. Neck. 8. Great trochanter. 9. Digital or trochanteric fossa. 10. Lesser trochanter. 11. Outer condyle. 12. Inner condyle. 13. Intercondylar notch. 14. Outer tuberosity. 15. Inner tuberosity.

TIBIA AND FIBULA (Anterior Aspect).

1. Shaft of tibia. 2. External tuberosity. 3. External tuberosity. 4. Spine. 5. Tuberosity. 6. Cap. 7. Inferior extremity. 8. Internal malleolus. 9. Shaft of fibula. 10. Superior extremity. 11. Inferior extremity and external malleolus.

TABLE OF BONES.—(Continued.)

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
[A.]	Includes the <i>incus</i> , <i>malleus</i> , and <i>incus</i> (p. 12). Inner side of forearm parallel with radius, prismatic, smooth and two extremities, olecranon process, coronoid process, greater and lesser sigmoid cavities, oblique ridge, perpendicular line, head of lower extremity, styloid process; long bone.	Humerus— <i>giglymus</i> . superior— <i>diarthrodia</i> <i>rotatoria</i> . middle— <i>synarthrodia</i> . inferior— <i>diarthrodia</i> <i>rotatoria</i> .	Triceps, anconeus, flexor carpi ulnaris, brachialis anticus, pronator radii teres flexor sublimis digitorum, flexor profundus digitorum, flexor longus pedis occasionally pronator quadratus, supinator brevis, extensor ossis metacarpi pollicis, extensor secundi internodi pollicis, extensor indicis, extensor carpi ulnaris.
	See <i>Hemotone</i> (a).		
B. N. A.]	Twenty-six; cervical seven, dorsal twelve, lumbar five, sacrum (composed of five), coccyx (composed of four); each has a body and an arch; latter has two pedicles, two laminae, and seven processes, viz.: four articular, two transverse, one spinous). Peculiar vertebrae: first, second, and seventh cervical first, ninth, tenth, eleventh, and twelfth dorsal, sacrum, coccyx; irregular bones.	Articulate with each other, and with occipital and innominate bones and ribs (q. v.). Intervertebral articulations between the bodies— <i>ompharthrodia</i> . Between articular processes— <i>arthrodia</i> .	Attachment of muscles.—To the axis are attached nine pairs: the longus colli, rectus anticus minor, rectus lateralis, rector posticus minor, obliquus superior and inferior, splenius colli, levator anguli scapulae, and first intertransversales. To the axis are attached eleven pairs: the longus colli, obliquus inferior, rectus posticus major, semispinalis colli, multifidus spine, levator anguli scapulae, splenius colli, scalenus medius, transversalis colli, intertransversales, interspinales. To the remaining vertebrae generally are attached thirty-five pairs and a single muscle anteriorly, the rectus anticus major, longus colli, scalenus anticus, medius, and posticus, psoas magnus, psoas parvus, quadratus lumborum, diaphragm, obliquus internus and transversalis, posteriorly, the trapezius, latissimus dorsi, levator anguli scapulae, rhomboides major and minor, serratus pectus superior and inferior, splenius, erector spine, sacrolumbalis, longissimus dorsi, spinalis dorsi, cervicalis ascendens, transversalis colli, trachelomastoid, complexus, biventer cervicis, semispinalis dorsi and colli, multifidus spine, rotatores spine interspinales, supraspinales, intertransversales, levatores costarum.
N. A.]	Situated vertically at back part of nasal fossae; forms part of septum of nose; somewhat like a plowshare; two surfaces and four borders.	Sphenoid, Ethmoid, Superior maxillary (two), Palate (two), Cartilage of the septum, } <i>synarthrodia</i> .	
	Supernumerary bones; irregular, inconstant, isolated, interspersed between the cranial bones, most frequently in the lambdoid suture.		
an (ca) (B. N. A.), the malar bone).	Small; quadrangular; at upper and outer part of face; forms prominence of cheek; part of outer wall and floor of orbit, part of temporal and zygomatic fossae; frontal, orbital, maxillary and zygomatic processes, malar foramen, four borders; irregular bone.	Frontal, Sphenoid, Temporal, Maxillary, } <i>synarthrodia</i> .	Levator labii superioris proprius, zygomaticus major and minor, masseter, temporal.

RIGHT INNOMINATE BONE (External Aspect).

- 1, 1. Superior border, or crest. 2, 2. Anterior superior iliac spine. 3, 3. Posterior superior iliac spine. 4, 4, 4. Superior curved line. 5, 5. Inferior curved line. 6. Surface between inferior curved line and acetabulum. 7. Anterior inferior iliac spine. 8. Anterior interspinous notch. 9. Posterior inferior iliac spine. 10. Posterior interspinous notch. 11. Spine of ischium. 12. Great sciatic foramen. 13. Acetabulum. 14. Fundus of acetabulum. 15. Circumference of acetabulum. 16. Cotyloid notch. 17. Spine of pubis. 18. Horizontal branch of pubis. 19. Descending branch of pubis. 20, 20. Ischium. 21. Groove for tendon of obturator externus muscle. 22. Obturator foramen.

PELVIS (Anterosuperior View, Superior Strait).

- 1, 1. Iliac crests. 2, 2. Iliac crests. 3, 3. Anterior superior iliac spines. 4, 4. Anterior inferior iliac spines. 5, 5. Iliopectineal eminences. 6, 6. Horizontal branches of pubis. 7, 7. Bodies and symphysis of pubis. 8, 8. Acetabula. 9, 9. Tuberosities of ischia. 10, 10. Ascending ramus of ischium. 11, 11. Descending ramus of ischium. 12. Spines of ischia. 13, 13. Posterior wall of pelvic cavity. 14, 14. Sacrotuberous angle. 15, 15. Superior strait.

Boot, Junod's. See *Junod's Boot*.

Boracic Acid (*bo-eas'-ik*). See under *Boron*.

Boracite (*bo'-ras-it*). Native magnesium borate.

Boral (*bo'-ral*). See *Aluminium Borotartrate*.

Borate (*bo'-rat*) [*Ar.*, *bûraq*, borax]. Any salt of boric acid.

Borated (*bo'-ra-ted*). Containing boric acid.

Borax (*bo'-raks*). See *Boron*.

Borborygmus (*bor-bor-ig'-mus*) [*ῥοβορυγμός*, a rumbling]. A rumbling of the bowels.

Border (*borid'-er*) [*ME.*]. In anatomy, the boundary of an area or surface. **B.**, Basal, **B.**, Cuticular, **B.**, Striated. See *Layer*, *Cuticular*. **B.**, Bright, the margin of a ciliated cell. **B.**, Vermilion, the line of union of the mucosa of the lip with the skin.

Bordet's Phenomenon (*bor'-dâ*). See *Pfeiffer's Reaction*, from which it differs only in the use of a small quantity of normal serum instead of fresh peritoneal fluid. **B.'s Specific Test**, for human blood: it is based upon the fact that the blood-serum of an animal subcutaneously injected with the blood of another animal of a different species rapidly develops the property of agglutinating and dissolving the erythrocytes similar to those injected, but has no effect upon blood derived from any other source.

Bordier-Fränkell's Sign. See *Bell's Phenomenon*.

Boric (*bo'-rik*). Relating to boron; containing boron. **B. Acid**. See under *Boron*. **B. Anhydrid**, **B. Oxid**, H_2O_2 , a transparent, brittle, hard glass obtained from boric acid by expulsion of water by heat.

Boricin (*bo'-ris-in*). A proprietary mixture of borax and boric acid used as an antiseptic on mucosae.

Borid (*bo'-rid*). A compound of boron with a radicle or element.

Borin (*bo'-rin*). 1. A compound of 1 atom of boron and 3 atoms or 3 molecules of a univalent radicle. 2. A proprietary antiseptic said to contain boric acid and aromatic steareptens.

Borism (*bo'-rism*). Poisoning with boric acid.

Borneene (*bor'-ne-ên*), $C_{10}H_{18}$. A peculiar volatile oil, the chief constituent of oil of camphor. It is isomeric with oil of turpentine and holds in solution borneol and rosin.

Borneo Camphor (*bor'-ne-o kam'-for*). See *Borneol*.

Borneol (*bor'-ne-ol*) [*Borneo*], $C_{10}H_{18}O$. Borneo camphor: a substance that occurs in *Dryobalanops camphora*, a tree growing in Borneo and Sumatra. It is artificially prepared by treating the alcoholic solution of common camphor with sodium.

Borneyl (*bor'-ne-il*), $C_{10}H_{14}$. The radicle of borneol.

Borocalcite (*bo-ro-kul'-sit*). Native calcium borate.

Borocarbid (*bo-ro-kar'-bid*). A compound of borax and carbon.

Borocitrate (*bo-ro-sit'-rat*). A compound of

both citric and boric acid with an element or radicle.

Borogen (*bo'-ro-jen*). Boric-acid ethyl ester. It is used by inhalation in diseases of the air-passages.

Boroglycerid (*bo-ro-glis'-er-id*). See *Boroglycerin*.

Boroglycerin (*bo-ro-glis'-er-in*). A mixture of boric acid with glycerol. **B.**, Glycerite of (glyceritum boroglycerini, U. S. P.), boroglycerin dissolved in glycerol by heating. Syn., *Solution of Boroglycerin*.

Borol (*bo'-rol*). Potassium borosulfate.

Boron (*bo'-ron*) [*Ar.*, *bûraq*, borax]. $B = 11$; quantivalence III, V. A nonmetallic element occurring in two allotropic forms—as a powder and as a crystalline substance. It is the base of boric acid and of the mineral borax. *Boracic* or, more properly, *boric acid*, H_3BO_3 , is a crystalline substance, found native in the volcanic lagoons of Tuscany. It occurs in white, transparent crystals, soluble in water and alcohol; it is antiseptic. Dose 5-20 gr. (0.32-1.3 Gm.). *Unguentum acidi borici* (U. S. P., B. P.) contains hard paraffin, 2; soft paraffin, 4; boric acid, 1; it is used as an antiseptic and in dermatology. *Borax*, $Na_2B_4O_7 + 10H_2O$, sodium borate, occurs as white, transparent crystals, soluble in water, alcohol, and glycerol; it is used as an antiseptic. Dose 5-40 gr. (0.32-2.6 Gm.). *Glycerinum boracis* (B. P.) contains borax, glycerol, and distilled water; used as a local application. *Mel boracis* (B. P.), borax honey, contains borax, clarified honey, and glycerol (about 1 in 7); used as a local application.

Borosalicyl, **Borsalyl** (*bo-ro-sal'-is-il*, *bor'-sal-il*). Sodium borosalicylate.

Borsieri's Line (*bor-se-a'-re*). In the early stage of scarlatina, a line drawn on the skin with the finger-nail leaves a white mark which quickly turns red and becomes smaller in size.

Boss (*bos*) [*ME.*, *bos*]. A wide, more or less circular protuberance, as on the skull or on a tumor. **B.**, Parietal. See *Eminence*, *Parietal*. **B.**, Pott's. See *Curvature*, *Pott's*. **B.**, Sanguineous. 1. A swelling due to a contusion and containing extravasated blood. 2. See *Caput succedaneum*.

Bossed (*bosd*). Having a prominent center on a circular flat surface.

Bosselated (*bos'-el-o-ted*) [*boss*]. Covered with bosses or small nodules.

Bostock's Catarrh (*bos'-tok*). Hay-fever.

Boston's Reaction for Bence-Jones' Albumose. It depends upon the presence in the albumose of loosely combined sulfur: (1) 15 to 20 Cc. of filtered urine are placed in a test-tube and to it an equal quantity of saturated solution of sodium chlorid is added, and the whole shaken; (2) 2 or 3 Cc. of a 30% solution of caustic soda are now added and shaken vigorously; (3) the upper one-fourth of the column of liquid is gradually heated over the flame of a Bunsen burner to the boiling-point, whereupon a solution of lead acetate (10%) is added, drop by drop, boiling the upper pre-

viously heated stratum of liquid after each additional drop; (4) when the drop of lead acetate comes in contact with the liquid, a copious pearly or cream-colored cloud appears at the surface, which becomes less dense as the boiling-point is reached, and when boiling is prolonged for one-half to one minute, the upper stratum shows a slight browning, which deepens to a dull black. This lessens in intensity toward the bottom of the tube. After standing the reaction becomes intensified, and a black precipitate falls through the clear liquid and collects at the bottom of the tube.

Bot (*bot*) [*botus*, a belly-worm]. The larva of certain species of flies of the genus *Cistru*, which are conveyed into the stomach of man, where they hatch. Also the threadworm, *Oxyuris vermicularis*.

Botal's Duct, Botallo, Duct of (*bot'-tal*, *bot'-tal'-o*) Ductus arteriosus botalli. A short vessel in the fetus between the main pulmonary artery and the aorta. **B., Foramen of**, the foramen ovale in the interauricular septum of the fetal heart. **B., Ligament of**, the remains of Botal's duct.

Botulismus (*bot-ul-i-z'-mus*). See *Botulism*.

Botany (*bot'-an-ee*) [*botanē*, an herb] The science of plants—their classification and structure.

Bothrenchyma (*both-ren'-ke-mah*) [*bothros*, a pit, *tyxos*, to pour in] Pitted tissue.

Bothriocephalus (*both-reo-sep'-al-us*) [*bothrion*, a furrow, *kephalē*, a head]. A genus of tape-worms. **B. latus**, the fish tape-worm, a common parasite of man in certain European localities. It may reach 25 feet in length, with a breadth of three-fourths of an inch. Syn., *Dibothrium latus*; *Tinnia lata*.

Bothrioid (*both'-re-oid*) [*bothrion*; *oidos*, likeness]. Pitted; foveolated; covered with pit-like markings.

Botryoid (*bot'-re-oid*) [*botrys*, a bunch of grapes; *oidos*, likeness]. Resembling in shape a bunch of grapes.

Botryomyces (*bot-reo-mi'-ses*) [*botrys*, a bunch of grapes; *mykes*, a fungus, pl., *botryomyces*]. A general term for those fungi which occur in grape-like clusters.

Botryomycosis (*bot-reo-mi'-ko-sis*) [see *Botryomycosis*]. A disease of horses in which fibromatous nodules form in the lungs. It is supposed to be caused by a microorganism called *Botryomyces*, although Poncet and Dor (1897) credit it to *Botrysacoccus*, and Badin (1902) to *Staphylococcus aureus*.

Botryophyma (*bot-reo-f'-mah*) [*botrys*, a bunch of grapes; *phyma*, a growth]. A vascular, fungus-like growth from the skin. **B. ceruleum**, a form having a blue coloration. **B. rubrum**, a form having a red color.

Böttcher's Cells, B.'s Crystals. See under *Böttcher*.

Böttger's Test. See *Böttger's Test*.

Botulin (*bot'-u-lin*). See *Botulismotoxin*.

Botulism, Botulismus (*bot'-u-lizm*, *bot-u-liz'-mus*) [*botulus*, a sausage]. Sausage-poisoning.

Botulismotoxin (*bot-u-liz-mo-tox'-in*). A toxic albumose of poisonous meat produced by *Bacillus botulinus*, van Ermengem. Syn., *Botulin*; *Botulinic acid*.

Bouchard's Coefficient (*boosh'-ar*). The ratio existing between the amount of urea and the sum-total of the solids in the urine—approximately 50. **B.'s Disease**, distention of the stomach due to deficient function of the gastric muscular fibers. **B.'s Nodosities**, enlargement of the second pharyngeal joints of the fingers, associated with dilation of the stomach. **B.'s Treatment of Obesity**, a daily diet of 1250 Gm. of milk and 5 eggs divided into 5 meals.

Bouchut's Tubes. A variety of tubes for intubation of the larynx.

Boudin's Law. The poisons of malaria and tuberculosis are antagonistic. This law is not founded upon fact.

Bougard's Paste. A caustic paste containing mercury bichlorid, zinc chlorid, arsenic, camphor, starch, and wheat-flour.

Bougie (*boo'-zhe*) [*Fr.*, "a candle"]. 1. A slender cylindric instrument made of waxed silk, catgut, etc., for introduction into the urethra or other passage, for the purpose of diagnosis, exploration, etc. 2. A suppository. **B. à boule**. See *B., Bulbous*. **B. à empreinte**, one with a waxy substance adherent to its point, by means of which an impression of the stricture may be taken. **B., Armed**, a bougie with a piece of silver nitrate or other caustic attached to its extremity. **B., Bulbous**, a bougie with a bulbous tip. **B., Caustic, B., Cauterizant**. See *B., Armed*. **B., Emplastic**. 1. See *B. à empreinte*. 2. A flexible bougie coated with a mixture of wax, diachylon, and olive-oil. **B., Filiform**, a whalebone or other bougie of very small diameter. **B., Fusiform**, one with a spindle-shaped shaft. **B., Medicated**. 1. A bougie charged with some medicament. 2. A medicated suppository. **B., Rosary**, a beaded bougie used in a strictured urethra. **B., Soluble**, a suppository composed of substances dissolving at body-temperature. **B., Whip**, one with filiform end gradually increasing in thickness.

Bouillaud's Disease (*booi-lad'-e*). Infective endocarditis. **B.'s Metallic Tinkling**, a peculiar click sometimes heard to the right of the apex-beat in cardiac hypertrophy.

Bouillon (*boo-e-yon-gi*) [*Fr.*]. 1. A flesh made by boiling meat, usually beef, in water. 2. A liquid nutritive medium for the culture of microorganisms, prepared from finely chopped beef or beef-extract.

Boulton's Solution. A compound mixture of iodine, phenol, glycerol, and distilled water; it is used for spraying in rhinitis.

Bourdin's Paste. An escharotic mixture of nitric acid with flowers of sulfur.

Bourdonnement (*boor-dun-men-gi*) [*Fr.*, *bourdonner*, to buzz]. Any buzzing sound. The murmur that is heard when the aortic

scoop is applied to any part of the body. It is thought to result from contraction of the muscular fibrils.

Bouveret's Disease (*hoo'-ver-a*). Paroxysmal tachycardia. **B.'s Sign in Intestinal Obstruction**, this sign is applicable only to the large gut—great distention of the cecum and a large elevation in the right iliac fossa.

Bovillæ (*bo-vill'-e*) [L.]. Measles.

Bovine (*bo'-vin*) (*bovinus*, of an ox). Ox-like. **B. Heart**, the immensely hypertrophied heart of aortic valvular disease.

Bovine (*bo'-vin-in*) [see *Bovine*]. A proprietary preparation of beef used as a food for invalids and convalescents.

Bovista (*bo-vis'-tah*) [L.]. 1. A genus of fungi closely allied to *Lycoperdon*; some of the species are edible. 2. The *Lycoperdon bovista*, a fungus or puffball. When dry it is a good styptic, and its tincture has been used in nervous diseases.

Bowdichia (*bo-dich'-e-ah*) [Edward Bowdich, an English naturalist]. A genus of plants of the order Leguminosæ. *B. virgilioides* is a South American tree, of which the bark (alcornoque or alcornoque bark) is diaphoretic, roborant, and antisyphilitic.

Bowel (*bow'-el*) [OF., *boel*, from L., *botellus*, a sausage]. The intestine.

Bow-leg [ME., *bowe*]. An arching outward of the lower limbs. See *Genu varum*.

Bowman's Capsule (*bo'-man*). The expanded portion forming the beginning of a uriniferous tubule. **B.'s Discs**, the products of a breaking up of muscle fibers in the direction of the transverse striations. **B.'s Glands**, glands found in the olfactory mucous membrane. **B.'s Membrane**, a thin, homogeneous membrane representing the uppermost layer of the stroma of the cornea, with which it is intimately connected. **B.'s Muscle**. See under *Muscle*. **B.'s Probe**, a probe used in dilating strictures of the lacrimal duct. **B.'s Sarcous Elements**, muscle-caskets; the small elongated prisms of contractile substance that produce the appearance of dark stripes in voluntary muscle. **B.'s Tubes**, artificial tubes formed between the lamellæ of the cornea by the injection of air or colored fluid.

Bowman-Mueller's Capsule. See *Bowman's Capsule*.

Boyer's Bursa (*boy'-ur*). The subhyoid bursa.

B.'s Cyst. See *Cyst*, *Boyer's*.

Boyle's Law (*boil*). See *Law*, *Boyle's*.

Bozeman's Catheter (*böz'-man*). A double-lumen catheter.

Bozzi's Foramen (*bol'-tze*). See *Soemmering's Yellow Spot*.

Bozzolo's Sign (*hot-tao'-lo*). Visible pulsation of the arteries of the nares, said to occur in some cases of aneurysm of the thoracic aorta.

Bracelets (*bräs'-lets*). Transverse lines across the anterior aspect of the wrist.

Brachia (*bra'-ke-ah*). Plural of *brachium*.

Brachial (*bra'-ke-al*) [*brachium*]. Pertaining to the arm. **B. Artery**, the continuous

tion of the axillary artery, extending along the inner side of the arm. See under *Artery*. **B. Glands**, the lymphatic glands of the arm. **B. Plexus**, the plexus of the fifth, sixth, seventh, and eighth cervical and the first dorsal nerves. **B. Veins**, the veins of the arm that accompany the brachial artery.

Brachialgia (*bra-ke-al'-je-ah*) [*brachium*; *ἄλγος*, pain]. Pain or neuralgia in the arm or in the brachial plexus.

Brachiform (*bra'-ke-form*) [*brachium*; *forma*, form]. Arm-shaped.

Brachinin (*brak'-in-in*) [*βραχίν*, short]. A substance obtained from the bombardier-beetle, *Brachinus crepitans*, of Europe. It is said to be efficacious against rheumatism.

Brachio- (*bra-ke-o-*) [*brachium*]. A prefix meaning pertaining to the brachium.

Brachiocephalic (*bra-ke-o-sel'-al'-ik*) [*brachia*; *κεφαλή*, head]. Pertaining to the arm and the head. **B. Artery**, **B. Vein**, the innominate artery and vein.

Brachio-crural (*bra-ke-o-kru'-ral*) [*brachia*; *crus*, the leg]. Pertaining to or affecting the arm and leg.

Brachio-cubital (*bra-ke-o-ku'-bit-al*) [*brachia*; *cubitus*, forearm]. Relating to the arm and forearm, as, the *brachio-cubital* ligament.

Brachio-facial (*bra-ke-o-'fa'-shaf*). Pertaining to both arm and face.

Brachiorachidian (*brak-e-o-rak-id'-e-on*) [*brachia*; *ράχης*, the spinal column]. Relating to the arm and the spinal cord.

Brachium (*bra'-ke-um*) [*βραχίον*, the arm; pl., *brachia*]. The arm, especially the upper arm; also, any arm-like object or structure. **Brachia cerebelli**, the peduncles of the cerebellum. **Brachia cerebri**, **B. of Optic Lobes**, the bands connecting the nates and testes with the optic thalamus. **B. copulativum**, the superior peduncle of the cerebellum. **B. pontis**, the brachium of the pons, being also the middle peduncle of the cerebellum.

Brach-Romberg's Sign. See *Romberg's Sign*.

Brachy- (*brak-e-*) [*βραχύς*, short]. A prefix meaning short.

Brachycardia (*brak-e-kar'-de-ah*). Same as *Bradycardia*.

Brachycephalic, **Brachycephalous** (*brak-e-sel'-al'-ik*, *brak-e-sel'-al-us*) [*brachy*; *κεφαλή*, a head]. 1. Applied to skulls of an egg-like shape, with the larger end behind. 2. Having a skull the transverse diameter of which is more than eight-tenths of the long diameter.

Brachy-cnemio, **Brachyknemic** (*brak-e-ne'-mik*) [*brachy*; *κνήμη*, the leg]. A term applied by Sir W. Turner to a leg proportionately shorter than the thigh.

Brachyglossal (*brak-e-glos'-al*) [*brachy*; *γλῶσσα*, tongue]. Having a short tongue.

Brachyhieric (*brak-e-hi'-e-rik*) [*brachy*; *ιερόν*, sacrum]. Having a short sacrum.

Brachykerkic (*brak-e-kerk'-ik*) [*brachy*; *κερπύς*, a shuttle]. Having the forearm disproportionately short as compared with the upper arm.

Brachymetropia (brak - e - met - ro' - pe-ah). See *Myopia*.

Brachynosis, Brachynsis (brak-in-o'-sis, brak-in'-sis) [brachy-, νόσος, disease]. The contraction or shortening of an organ or part by disease.

Brachystaphylic (brak-e-staf'-il-ik) [brachy-, στάφυλη, the palate]. Having a short alveolar arch.

Bracket (brak'-et) [OF., *braguellet*]. An apparatus for supporting a joint or rendering it immovable.

Brady- (brad-e-) [βραδύς, slow]. A prefix meaning slow.

Bradycardia (brad-e-kar'-de-ah) [brady-, καρδία, heart]. Slowness of the heart-beat.

Bradycausis (brad-e-kaw'-sis) [brady-, καίωσις, a burning]. A slow burning, the application of a slow caustic.

Bradydiastole (brad-e-di-as'-to-le) [brady-, διαστολή, a drawing apart]. A prolongation of the diastolic pause, it is generally associated with myocardial lesions. Syn., *Brachydiastolia*.

Bradyesthesia (brad-e-es-the'-ze-ah) [brady-, αἰσθησις, perception]. Dulness of perception.

Bradyglossia (brad-e-glos'-e-ah). See *Bradyglottis*.

Bradyglottis (brad-e-gho'-le-ah) [brady-, λήξις, to talk]. A slowness of utterance.

Bradypepsia (brad-e-pep'-se-ah) [brady-, πέψις, digestion]. Slow digestion.

Bradyphasia (brad-e-fa'-ze-ah). See *Bradyglottis*.

Bradyphrasia (brad-e-fra'-ze-ah). See *Bradyglottis*.

Bradypermaterism (brad-e-per'-mat-izm) [brady-, σπέρμα, seed]. Abnormally slow emission of semen.

Braidism (brad'-izm). The hypnotic state produced by fixation of the eyes upon a shining object, described by James Braid in 1842.

Brain (brayn) [AS., *brægan*]. That part of the central nervous system contained in the cranial cavity, and consisting of the cerebrum, the cerebellum, and the pons, and the medulla oblongata. **B., Abdominal**, the solar plexus. **B., After-**. See *Metencephalon*. **B.-axis**, that portion of the brain substance including the isthmus of Reil, the basal ganglions, the corpus, pons, medulla, and cerebellum. **B.-bladder**, a cerebral vesicle of the embryo. **B.-fever**. See *Meningitis*. **B., Fore-**. See *Proencephalon*. **B., Great**, the cerebrum. **B., Hind-**. See *Myelencephalon*. **B., Mid-**. See *Metencephalon*. **B., Railway-**, a condition analogous to railway spine, and characterized by cerebral disturbance. See *Frederick's Disease*. **B.-sand**. See *Acerulus*. **B.-tire**, a condition of brain exhaustion due to excessive functional activity. **B., 'Twixt-**. See *Intercephalon* and *Postmetencephalon*. (See illustrations on pp. 211, 212.)

Bran (brayn) [Breton, *brann*]. The epidermis or outer covering of the seeds of most cereals. **B.-bath**. See *Bath, Bran*. **B. Dressing**, a dressing formerly used for compound fracture of the

leg. The leg was placed in a fracture-box and surrounded with clean bran.

Branchiae (brang'-ke-e) [βράγχια, gills]. The gills of fishes.

Branchial (brang'-le-ah). Pertaining to the branchiae. **B. Arches**. See *Arches, Branchial*. **B. Openings**. See *Clefts, Branchial*.

Branchiogenous (brang'-le-ah-ous) [branchia, γένεσις, to produce]. Produced or developed from a branchial cleft.

Brand Method. A system of baths employed in the treatment of typhoid fever.

Brandt's Method. Treatment of affections of the fallopian tubes by massage in an endeavor to force out their contents into the uterus.

Brandy (brant'-de). See *Spiritus vini galici*.

Brassica (bray'-tik-ah) [AS.]. A group of plants of the order *Cruciferae*, including the common cabbage.

Brassy-eye. See *Chalazitis*.

Braun's Canal. See *Kowalewsky's Canal*.

B.'s Reaction for Glucose, treat the glucose solution with caustic soda, and warm until it is yellow; then add a dilute solution of picric acid and heat to boiling. A deep red color will be produced. Creatinin gives the same reaction, even in the cold, and acetone also, though slightly.

Braune's Canal. The continuous passage formed by the uterine cavity and the vagina during labor, after full dilation of the os. **B.'s Os internum**. See *Burns's Ring*.

Bravais-Jackson's Epilepsy (brav'-is). See *Jacksonian Epilepsy*.

Brawn (braun) [OF., *brawn*, flesh]. The flesh of a muscle; well-developed muscles.

Brawny (braun'-e) [see *Brawn*]. Flechy; muscular. **B. Induration**, pathological hardening and thickening of the tissues.

Braxton Hicks's Sign. See *Hicks*.

Brayera (brai'-e-ah) [see *Braun*]. See *Cassia*.

Bread (bred) [AS., *brædd*]. A mixture of flour and water rendered porous by carbon dioxide, and baked. The flour may be of wheat, corn, oat, or rye. The carbon dioxide may be introduced by fermenting the starch with yeast.

B., Brown, a kind of bread made from a mixture of corn, rye, and wheat flour. **B., Graham**, bread made from unbolthead wheat flour, it contains more gluten, diastase, and mineral phosphates than ordinary bread. **B.-paste**, a culture-medium for bacteria and molds. Stale, coarse bread is trued, ground to powder, and made into a paste with water.

B.-poultice, bread-crumbs steeped in hot water. **B., White**, bread made from bleached wheat flour, and therefore deficient in diastase, gluten, and mineral phosphates. Other cereals, such as rye or barley, corn, bran, barley, etc., indicate their composition by their name.

Break (brek) [AS., *bræcan*]. 1. In electricity, to open the circuit of a battery. 2. In surgery, a fracture. **B. Shock**, a term sometimes employed in electrotherapeutics for the physiologic shock produced on the opening or breaking of an electric circuit.

**SUPERIOR ASPECT, OR CONVEXITY
OF THE BRAIN.**

1. 1. Fissure of Rolando. 2, 2. Ascending frontal convolution. 3, 3. Ascending and superior parietal convolutions. 4, 4. First frontal convolution. 5, 5. Second frontal convolution. 6, 6. Third frontal convolution. 7, 7. First occipital convolution. 8, 8. Second occipital convolution. 9, 9. Third occipital convolution. 10. Anterior extremity of corpus callosum. 11. Posterior extremity.

INTERNAL ASPECT OF THE BRAIN.

- Anterior extremity of corpus callosum. 2. Optic chiasm. 3. Truncus cerebri and infundibulum. 4. Corpus alluvium, or aqueduct. 5. Pons varolii. 6. Fourth nerve. 7. Aqueduct of Sylvius. 8. Testes. 9. Inferior surface of frontal lobe. 10. Convolution of the fissure of Sylvius. 11. Olfactory nerve. 12. Third convolution of external surface of frontal lobe. 13. Fourth convolution. 14. Third convolution of external surface of frontal lobe. 15. External border of posterior lobe. 16. External extremity. 17. Hippocampal convolution. 18. External convolution of posterior lobe. 19. Middle convolution. 20. Internal convolution. 21. Gyrus hippocampus.

MEDIAL VIEW OF BRAIN, SHOWING IMPORTANT SINUSES.—(Holden.)

1. Falx cerebri. 2. 2 Its convex border, with the great longitudinal sinus. 3. 3 Its concave border. 4. 4 Inferior longitudinal sinus. 5. 5 Base of falx cerebri. 6. 6 Straight sinus. 7. 7 Apex of falx cerebri. 8. 8 Right half of the transverse sinus from above. 9. 9 Right lateral sinus. 10. 10 Superior petrosal sinus. 11. 11 Inferior petrosal sinus. 12. 12 Posterior occipital sinus. 13. 13 Falx cerebelli. 14. 14 Tenth nerve. 15. 15 Motor root. 16. 16 Pelvicus. 17. 17 Trigeminal. 18. 18 Abducent. 19. 19 Facial and auditory nerves. 20. 20 Glossopharyngeal, vagus, and spinal accessory nerves. 21. 21 Hypoglossal nerve. 22. 22 First cervical nerve. 23. 23 Second cervical nerve. 24. 24 Upper extremity of aqueductum denticulatum.

LATERAL ASPECT

MESAL ASPECT.

LATERAL ASPECT.—1. Falx cerebri. 2. Subcentral fissure. 3. Cuneus. 4. Cuneus. 5. Cuneus. 6. Cuneus. 7. Cuneus. 8. Cuneus. 9. Cuneus. 10. Cuneus. 11. Cuneus. 12. Cuneus. 13. Cuneus. 14. Cuneus. 15. Cuneus. 16. Cuneus. 17. Cuneus. 18. Cuneus. 19. Cuneus. 20. Cuneus. 21. Cuneus. 22. Cuneus. 23. Cuneus. 24. Cuneus.

Breakbone Fever. See *Dengue*.

Breast (*breast*) [ME, *bress*] 1. The anterior part of the chest. 2. The mamma. **B.-bone**, the sternum. **B., Broken**, abscess of the mammary gland. **B., Chicken-**, a deformity marked by prominence of the sternal portion of the chest. Syn., *Pectus carinatum*. **B., Funnel-**, a depression of the chest-walls at the sternum resembling the bowl of a funnel, it is like shoemaker's breast, only it may occur at any point. Syn., *Funnel-chest*. **B., Gathered**, mammary abscess. **B., Hyster-**, a form of mastodynia due to hysteria. **B., Irritable Tumor of**, a name given by Astley Cooper to peculiar, sharply defined fibromatous or neuromatous tumors of small size and extreme tenderness. **B.-pang**, angina pectoris. **B., Pigeon-**. Same as *B., Chicken-*. **B.-pump**, a suction-apparatus for removing the milk from the breast. **B., Shoemaker's**, a depression of the sternum in

shoemakers due to the pressure of tools against it and the xiphoid cartilage.

Breath (*breth*) [AS, *breath*] The air exhaled from the lungs. **B.-sounds**, the respiratory sounds heard upon auscultation. See *Table*.

Breathing. See *Respiration*. **B., Abdominal**, breathing in which the abdominal walls move decidedly and in which the diaphragm is actively engaged. **B., Cheyne-Stokes'**. See *Cheyne-Stokes' Respiration*. **B., Interrupted**, **B., Cog-wheel**, **B., Wavy**, a broken or interrupted inspiratory sound produced by nervousness, irregular contraction of the muscles of respiration, or irregular expansion of the lung from disease. **B., Mouth-**, habitual respiration through the mouth. **B., Puerile**, the breathing normally heard in children, and heard in adults when the respiratory murmur is exaggerated. **B., Suppressed**, entire absence of breath-sounds, as in pleuritic effusion and certain solid con-

TABLE OF BREATH-SOUNDS IN HEALTH AND DISEASE.

(Altered and enlarged from J. K. Fowler.)

TYPE OF BREATHING.	PERIOD.	PITCH.	QUALITY.	INTERVAL.	DURATION.	INTENSITY.	WHERE HEARD.	CONDITION IN WHICH HEARD.
Normal	1. Inspiration. 2. Expiration.	Low. Lower.	Vesicular. Blowing.	None. Shorter than inspiration or absent.	Variable. Faint or absent.	Over the lungs in health.	In health.
Abnormal	1. Inspiration. 2. Expiration.	High. Higher.	Tracheal. Tracheal.	Distinct. Equal to or longer than inspiration.	Variable. Greater.	In health, in regions of seventh cervical spine. In disease, over areas of consolidation.	In health; pulmonary tuberculosis, lobar pneumonia large pleuritic effusions, thoracic aneurysm, mediastinal tumors.
Emphysematous	1. Inspiration. 2. Expiration.	Higher than in vesicular breathing. Higher than in vesicular breathing.	More or less tracheal. More or less tracheal.	Slight. About equal to inspiration.	Variable. Greater.	In health, ant. over sternal portion of infraclavicular region; post., upper part of interscapular region. In disease, over slight consolidation.	In health; pneumonia, pulmonary tuberculosis.
Apneustic	1. Inspiration. 2. Expiration.	Low. Lower.	Hollow and metallic. Both characters more marked.	Distinct. Longer than inspiration.	Variable. Greater.	Over a large cavity communicating with an open bronchus.	Pulmonary tuberculosis.
Stridorous	1. Inspiration. 2. Expiration.	Low. Lower.	Blowing and hollow. Both characters more marked.	Distinct. Longer than inspiration.	Variable. Greater.	Over a cavity communicating with an open bronchus.	Pulmonary tuberculosis.
Crackling	1. Inspiration. 2. Expiration.	Higher than in bronchial breathing. Higher.	Laryngeal or whiffling. Laryngeal or whiffling.	Distinct. Equal to or longer than inspiration.	Variable. Greater.	Over consolidated areas.	Lobar pneumonia, pulmonary tuberculosis.

- ditions of the lung. **B., Thoracic**, respiration in which the thoracic walls are actively moved.
- Brecht's Cartilages.** See *Cartilages, Brecht's*.
- Breech** (*brech*) [ME., *brech*]. The buttocks.
- B. Presentation**, presentation of the buttocks of the child at the os uteri during labor.
- Bregenin** (*breg'-en-in*) [Low Ger., *bregen*, brain], $C_{60}H_{80}NO_2$. A name given by Thudichum to a viscous principle, soluble in and crystallizable from alcohol, by means of which it has been extracted from brain-tissue. It is fusible like a fat, but is miscible with water.
- Bregma** (*breg'-mah*) [*βῆγμα*, the sinciput]. The part of the skull corresponding to the anterior fontanel.
- Bregmatic** (*breg-mat'-ik*). Relating to the bregma.
- Brein** (*bre'-in*). A glucosid isolated from *Bryonia alba*. It is a powerful stimulant to the arterioles and useful in the treatment of postpartum hemorrhage and other metrorrhagias.
- Breisky's Disease** (*bri'-skē*). Kraurosis vulvæ.
- B.'s Method**, of measuring the dimensions of the pelvis at its outlet: it consists in measuring externally the distance between the tuberosities of the ischium, and also in taking the distance from the junction of the sacrum and coccyx to the lower border of the arcuate ligament.
- Bremer's Color-test for Diabetic Urine** (*bra'-mur*). See under *Tests*. **B.'s Reaction for Diabetic Blood**, the blood is prepared as in ordinary staining methods, and, after drying in a hot-air sterilizer, stained with methylene-blue and eosin. The red blood-corpuscles of diabetic blood are stained greenish-yellow, whereas in normal blood they assume a brownish color.
- Brenner's Formula** (*bren'-nur*). 1. With the same current strength the kathodal closing contraction is four times as strong as the kathodal opening contraction. 2. The normal auditory nerve reacts to the kathodal closure by a sound sensation which immediately attains its maximum and then gradually diminishes; the anodal opening causes with the same current strength a somewhat weaker sound that is of short duration.
- Brephydrocephalus** (*brej'-id-ro sef'-at-us*) [*βρεφύς*, an infant; *ὑδροκέφαλος*, hydrocephalus]. Hydrocephalus in infants.
- Breschet's Canal, B.'s Veins** (*bresh'-a*). The veins of the diploe. See under *Canal*. **B.'s Helicotrema**, the helicotrema, the foramen of communication between the scala vestibuli and the scala tympani. **B.'s Sinus**, the sphenoparietal sinus.
- Bretonneau's Diphtheria** (*bret'-on-o*). Diphtheria of the pharynx.
- Brick-dust Deposit.** A reddish sediment in the urine, consisting of urates.
- Bricklayers' Itch.** Eczema due to irritation of lime-mortar.
- Brickmakers' Anemia.** See *Ankylomiasis*.
- Bridge** (*brif*) [ME., *brigge*]. 1. The upper ridge of the nose, formed by the union of the two nasal bones. 2. In electricity, an apparatus for measuring the resistance of a conductor.
- Bridle** (*bri'-dl*) [AS., *bridel*]. A band or filament stretching across the lumen of a passage, or from side to side of an ulcer, scar, abscess, etc. **B. Stricture**, a stricture due to the presence of a delicate band stretched across the lumen of the urethra.
- Bright's Blindness.** Partial or complete loss of sight, which may be temporary, independent of any change in the optic disc or retina; it occurs in uremia. **B.'s Disease**, a generic term for acute and chronic diffuse disease of the kidneys, usually associated with dropsy and albuminuria. **B.'s Disease, Acute**, an acute inflammation of the kidney, it may be parenchymatous, interstitial, or diffuse. **B.'s Disease, Chronic**, a chronic inflammation of the kidney, affecting the parenchyma, the connective tissue, or both. Amyloid degeneration is also considered a chronic form of Bright's disease. **B.'s Friction-sound.** See *Beatty-Bright's Friction-sound*. **B.'s Granulations**, the granulations of the large white kidney.
- Brightism** (*bri'-izm*) [*Bright*, an English physician]. Chronic nephritis.
- Brim** (*brim*) [ME.]. An edge or margin, as the brim of the pelvis.
- Brimstone** (*brim'-stān*). See *Sulphur*. **B., Cane**, sublimed sulfur molded into the form of solid cylinders about an inch in diameter. Syn., *Roll-sulphur*. **B., Vegetable**, the spores of *Lycopodium clavatum*.
- Brinton's Disease** (*brin'-ton*). Linitis plastica; hypertrophy and sclerosis of the submucous connective tissue of the stomach.
- Briquet's Ataxia** (*bri'-ka*). Hysterical ataxia; astasia-abasia.
- Brisement** (*brē-mon(p)*) [Fr.]. A breaking or rupture. **B. forcé**, the forcible breaking up of structures causing ankylosis of a joint.
- Brissaud-Marie's Syndrome** (*bri-su-mar'-ē*). Hysterical glossolabial hemispasm.
- Bristle-cell** [AS., *byrst*, a bristle]. Any one of the ciliated cells at the terminations of the auditory nerve-filaments.
- British Gum.** See *Dextrin*.
- Broad** [AS., *brād*]. Wide; extensive. **B. Ligament.** See *Ligament, Broad*. **B. Tapeworm.** See *Bothriocephalus latus*.
- Broadbent's Sign** (*brad'-bent*). A visible retraction, synchronous with the cardiac systole, of the left side and back in the region of the eleventh and twelfth ribs, in adherent pericardium.
- Broca's Aphasia** (*bro'-kah*). Cortical motor aphasia. **B.'s Area**, the medial portion of the anterior olfactory lobe. Syn., *Area parolfactoria*, *Gyrus olfactorius medialis*. **B.'s Cape**, the dividing-point of the fossa sylvii. **B.'s Center**, the posterior part of the left third

frontal convolution; it is the center of speech. **B.'s Convolution**, the third frontal convolution of the left hemisphere. **B.'s Diagonal Band**, a band of gray matter forming the posterior part of the anterior perforated space and extending from the gyrus subcallosus to the anterior end of the gyrus hippocampi. **B.'s Fissure**. See *Fissure, Broca's*. **B.'s Olfactory Area**, trigonum olfactorium; the posterior end of the gyrus rectus, lying anteriorly to the mesial root of the olfactory tract. **B.'s Point**, the auricular point, the center of the external auditory meatus. **B.'s Pouch**, a pear-shaped sac lying in the tissues of the labia majora; it is analogous in structure to the dartos, but contains no muscular fibers.

Brodie's Abscess (*bro'-de*). Chronic abscess of bone, most frequently of the head of the tibia. **B.'s Disease**, pulpy disease of a joint, more especially the knee-joint. **B.'s Joint**, hysterical arthralgia. **B.'s Pain**, the pain caused by lifting a fold of the skin in the neighborhood of a joint in articular neuralgia.

Brossike's Fossa (*bres'-e-ka*). The para-jugal fossa, a recess in the peritoneal cavity which is situated in the first part of the meso-jejunum and behind the superior mesenteric artery.

Brokaw Ring (*brok'-aw*). A ring used in intestinal anastomosis, made of segments of rubber drainage-tubing and threaded with catgut strands.

Bromal (*bro'-mal*) [*βρῶμος*, a stench; aldehyd], CBr_2CHO . Tribromaldehyd, analogous to chloral, and produced by the action of bromin on alcohol. It is a colorless, oily fluid, of a penetrating odor and sharp, burning taste, boiling at $172^\circ\text{--}173^\circ\text{C}$; it has been used in medicine, having properties similar to those of chloral. **B. Hydrate**, $\text{CBr}_2\text{CH(OH)H}_2\text{O}$, a fluid of oily consistence, having a structure similar to that of chloral hydrate, but more irritating and narcotic than the latter. It is used as a hypnotic and in epilepsy. Dose 1-5 gr. (0.05-0.12 Gm.).

Bromalbacid (*bro-mal'-has-id*). A compound of bromin and albumin used as a sedative. Dose 15-30 gr. (1-2 Gm.).

Bromaldehyd (*bro-mal'-de-hyd*). A compound of bromin and aldehyd.

Bromalin (*bro'-mal-in*), $\text{C}_6\text{H}_{12}\text{N}_4\text{C}_2\text{H}_3\text{Br}$. A substance occurring as a white, crystalline powder, soluble in water, melting at 200°C . It is a nerve-sedative and antiepileptic, used as a substitute for potassium bromid. Dose 10-50 gr. (2-4 Gm.) several times a day. Syn., *Bromethylformin*; *Hexamethylenetetraminebromethylate*.

Bromaloin (*bro-mal'-o-in*), $\text{C}_{17}\text{H}_{16}\text{Br}_2\text{O}_7$. A derivative of barbaloin by the action of bromin. Syn., *Tribromaloin*.

Bromamid (*bro'-mam-id*) [*bromin*; amid]. A bromin compound of the anilin group, with the formula $\text{C}_6\text{H}_4\text{Br}_2\text{NH}_2\text{HBr}$. It contains 75% of bromin, and is used as an anti-

pyretic in doses of 10-15 grains (0.65-1.0 Gm.).

Bromargyrite (*bro-mar'-jir-it*). Native silver bromid.

Bromate (*bro'-mat*) [*bromin*]. A salt of bromic acid.

Bromateccrisis (*bro-mat-ek'-ris-is*) [*βρῶμα*, food; *ἔκκρισις*, excrement]. The passage of undigested food.

Bromated (*bro'-ma-led*). Impregnated with bromin.

Bromatometry (*bro-mat-om'-et-re*). The estimation of the daily amount of food requisite for an individual.

Bromatotoxicon (*bro-mat-o-toks'-ik-on*). A general term for the active agent in food-poisoning.

Bromatotoxin (*bro-mat-o-toks'-in*). A basic poison generated in food by the growth of microorganisms.

Brombenzoyl (*bro-m-ben'-zo-il*), $\text{C}_7\text{H}_5\text{O} \cdot \text{Br}$. A crystalline substance obtained from oil of bitter almonds by action of bromin; it is soluble in alcohol and ether. Syn., *Brombenzoylic acid*.

Bromcaffein (*bro-m-ka'-e-in*), $\text{C}_7\text{H}_5\text{BrN}_3\text{O}_2$. A compound obtained by mixing 1 part of caffen with 5 parts of bromin; melts at 76°C .

Bromelin (*bro'-mel-in*) [*Bromelia*, a genus of plants]. A digestive principle, allied to trypsin, found in the juice of pineapples. It will digest 1500 times its weight of proteins.

Bromethyl (*bröm'-eth-il*). See *Ethyl Bromid* under *Bromin*.

Bromhemol (*bröm'-he-mol*). A compound of hemol and 2.7% of bromin. It is used when continued effect of bromin is desired. Dose 15-30 gr. (1-2 Gm.). Syn., *Bromohemol*.

Bromhydrate (*bröm'-hi'-drät*). See *Hydrobromate*.

Bromhydric (*bröm hi'-drik*). See *Hydrobromic*. **B. Ether**, hydrobromic ether.

Bromic (*bro'-mik*). Containing or compounded with bromin.

Bromid (*bro'-mit*) [*bromin*]. A salt of hydrobromic acid; the bromids of calcium, iron, ammonium, potassium, and sodium are used in medicine. They allay nervous excitement and are employed as sedatives. **B., Basic**, a compound of a bromid with the oxid of the same base. **B. of Ethyl**. See *Ethyl Bromid* under *Bromin*.

Bromidrosis (*bro-mid-ro'-sis*) [*βρῶμος*, a stench; *ῥῶσις*, sweat]. Osmidrosis; an affection of the sweat glands in which the sweat has an offensive odor.

Bromin, Bromum (*bro'-min, -mum*) [*βρῶμος*, a stench]. Br = 80; quantivalence 1. A reddish-brown liquid which, at ordinary temperatures, gives off a heavy, suffocating vapor. It is a very active escharotic and disinfectant and internally a violent poison. The salts of bromin are cerebrospinal and cardiac depressants, and are employed as sedatives, particularly in epilepsy, eclampsia,

spasmodic affections, insomnia, hysteria, migraine, etc. The salts of the alkaline metals are those most commonly used. **Bromidum, Ammonii** (U. S. P.), NH_4Br . Dose 5-20 gr. (0.32-1.3 Gm.). **B. Blocks**, porous blocks of diatomaceous earth incinerated with calcium saccharate and impregnated with three times their weight of bromin, which is gradually given off by them. They are used as disinfectants. **Bromidum, Calcii** (U. S. P.), CaBr_2 . Dose 5 gr.-1 dr. (0.32-4.0 Gm.). **B. Chlorid**, BrCl (below 10°C .), a reddish-yellow, mobile, very volatile liquid. It is used as an internal and external caustic in cancer. **Bromid, Ethyl**, $\text{C}_2\text{H}_5\text{Br}$, useful in spasmodic coughs. Dose 10 min.-1 dr. (0.65-4.0 Cc.). **Bromidi, Ferri, Syrupus**, contains 10% of the salt. Dose $\frac{1}{2}$ -1 dr. (2-4 Cc.). **B. Iodid**, IBr_3 , a dark-brown liquid, soluble in water; it is used as a gargle in diphtheria, in 0.1% solution. **Bromidum, Lithii** (U. S. P.), LiBr . Dose 5-20 gr. (0.32-1.3 Gm.). **Bromidum, Nickel**. See *Nickel*. **B. Pentachlorid**, BrCl_5 , a caustic liquid. **Bromidum, Potassii** (U. S. P.), KBr . Dose 5 gr.-1 dr. (0.32-4.0 Gm.). **Bromidum, Sodii** (U. S. P.), NaBr . Dose 5 gr.-1 dr. (0.32-4.0 Gm.). **Bromidum, Strontii** (U. S. P.), SrBr_2 . Dose 15-20 gr. (1.0-1.3 Gm.). **Bromidum, Zinci** (U. S. P.), ZnBr_2 . Dose $\frac{1}{2}$ -2 gr. (0.032-0.13 Gm.).

Brominated, Brominized (*bro'-min-a-ted, -ized*). Combined with bromin.

Brominism, Bromism (*bro'-min-izm, bro'-mizm*) [*bromin*]. Certain peculiar phenomena produced by the prolonged administration of the bromids. The most marked symptoms are headache, coldness of the extremities, feebleness of the heart's action, somnolence, apathy, anesthesia of the soft palate and pharynx, pallor of the skin, and a peculiar eruption of acne which is one of the earliest and most constant symptoms. There is also anorexia, and at times there are loss of sexual power and atrophy of the testes or mammae.

Bromiodoform (*bro-mi-o'-do-form*), CHBr_3 . A substitution-compound of bromin and iodoform.

Bromipin (*bro-mi-pin*). A liquid compound of bromin and sesame oil containing 10% of bromin. It is used as a sedative in epilepsy. Dose 1-3 teaspoonfuls daily.

Bromite (*bro'-mit*). 1. Native silver bromid. 2. A salt of bromous acid.

Bromium (*bro'-me-um*). Bromin.

Bromoalbumin (*bro-mo-al'-bu-min*). A compound of bromin (10%) and albumin; it is used in epilepsy. Syn., *Bromalbumin*; *Bromosin*.

Bromocamphor (*bro-mo-kam'-for*). See *Camphor*, *Monobromated*.

Bromocoll (*bro'-mo-kol*). A product of the condensation of bromin, tannin, and gelatin; a light-brown, odorless, almost tasteless powder, containing 20% of bromin, soluble in alcoholic fluids. It is indicated when

other bromids are not well borne. Dose 15-75 gr. (1-5 Gm.) a day, in epilepsy, 123 gr. (8 Gm.). Syn., *Dibromotannic glue*.

Bromoform (*bro'-mo-form*), CHBr_3 . A bromid having a structure like that of chloroform, CHCl_3 ; it is sedative and anesthetic and is used in whooping-cough and in seasickness in doses of 2-5 min. (0.13-0.32 Cc.). Syn., *Formobromid*; *Formylbromid*, *Methanetrihydromid*; *Tribrommethane*.

Bromohyperidrosis (*bro-mo-hi-per-ih'-ro-sis*) [*βρωμος*, a stench, *ὑπερ*, over; *ἰδρως*, a perspiring]. A condition marked by excessive and offensive perspiration.

Bromol (*bro'-mol*), $\text{C}_6\text{H}_3\text{Br}_2\text{OH}$. Tribromophenol; an antiseptic substance used in the form of a powder, solution (1:30 olive oil), or ointment (1:10). Internally it is used in cholera infantum and typhoid fever. Dose $\frac{1}{16}$ - $\frac{1}{8}$ gr. (0.006-0.02 Gm.).

Bromolithia (*bro-mo-lith'-e-ah*). A proprietary remedy for gout.

Bromomania (*bro-mo-ma'-ne-ah*). Insanity from excessive use of bromids.

Bromomenorrhea (*bro-mo-men-or'-e-ah*) [*βρῶμος*, stench; *μήν*, month; *ρῆσις*, to flow]. Disordered menstruation marked by offensiveness of the flow.

Bromophenol (*bro-mo-'fe-nol*). 1. See *Bromol*. 2. $\text{C}_6\text{H}_4\text{BrOH}$. A violet-colored liquid obtained from phenol by action of bromin. It is used in a 1 to 2% ointment in treatment of erysipelas. Syn., *Orthobromphenol*.

Bromopropylene (*bro-mo-pro'-pil-ēn*). See *Allyl Bromid*.

Bromopyrin (*bro-mo-pil'-rin*). 1. $\text{C}_{11}\text{H}_{11}\text{BrN}_2\text{O}$, a substance used as is antipyrin, occurring in white needles, soluble in alcohol, chloroform, and hot water, melting at 114°C . Dose 5-15 gr. (0.3-1.0 Gm.). Syn., *Monobromoantipyrin*. 2. A proprietary mixture said to consist of antipyrin, caffeine, and sodium bromid.

Bromoseltzer (*bro-mo-selt'-ser*). A proprietary headache remedy.

Bromoserum (*bro-mo-se'-rum*). A solution of 6 parts of sodium bromid and 1.5 parts of sodium chlorid in 1000 parts of water. It is used by injection as a substitute for bromids.

Bromous (*bro'-mus*). Containing bromin united with oxygen in the same proportion as in the chlorous compounds.

Bromphenols (*bro-m-'fe-nols*). A series of bromated phenols occurring at times in the precipitates of tested urine.

Bromum (*bro'-mum*). See *Bromin*.

Bromurated (*bro'-mu-ra-ted*). Containing bromin or a bromin salt.

Broncheopyra (*brong-ke-o-pi'-rah*) [*bronchus*; *πῦρ*, fire]. A suffocative cough.

Bronchiadenosclirrhosis (*brong-ke-ad-en-o-skir'-us*) [*bronchus*; *αδην*, a gland; *σκληρός*, hard]. Scirrhosis of the bronchial glands.

Bronchial (*brong-ke-ah*) [*bronchus*]. Relating to the bronchi. **B. Arteries**. See under *Artery*. **B. Fluke**. See *Distoma ringieri*. **B. Glands**.

the chain of lymphatic glands running beside the bronchi.

Bronchiarctia (*brong-ke-ark'-she-ah*) See *Bronchostenosis*.

Bronchiectasis (*brong-ke-ek'-tas-is*) [*bronchus*; *ektasis*, dilation]. Dilation of the walls of the bronchi. It occurs in chronic bronchitis, in fibroid pneumonia, and in tuberculosis of the lung. It may involve a tube uniformly, producing the *cylindric* form; or it may occur irregularly in sacs or pockets—the *sacculated* form. The characteristic symptom of bronchiectasis is paroxysmal coughing, with the expectoration of large quantities of mucopurulent, often fetid, matter. Cavernous breathing may be heard over the dilated tubes.

Bronchiocrosis (*brong-ke-o-kri'-sis*) [*bronchus*; *crosis*]. Paroxysmal coughing in tabes dorsalis.

Bronchiole (*brong'-ke-ol*) [dim. of *bronchus*]. One of the smallest subdivisions of the bronchi.

Bronchiolectasis (*brong-ke-o-lek'-ta-sis*) [*bronchiole*; *ektasis*, dilation]. A rare form of bronchiectasis diffused to all parts of the lung, making it appear as if riddled with small cavities.

Bronchiolitis (*brong-ke-o-li'-tis*) [*bronchiole*, *itis*, inflammation]. Inflammation of the bronchioles. **B.**, *Asthmatic*. See *B.*, *Exudative*. **B.**, *Exudative*, **B.**, *exudativa*, an inflammation of the bronchioles, with exudation, a condition by some held to be the cause of bronchial asthma. **B.**, *fibrosa obliterans*, **B.**, *obliterans*, **B.**, *Obliterating Fibrous*, bronchiolitis resulting in obliteration of the finest bronchioles by connective-tissue plugs.

Bronchismus (*brong-kis'-mus*). Suffocative bronchial spasm due to spinal paralysis.

Bronchitic (*brong-kir'-ik*) [*bronchitis*]. Relating to, of the nature of, or affected with, bronchitis.

Bronchitis (*brong-ki'-tis*) [*bronchus*; *itis*, inflammation]. Inflammation of the mucous membrane of the bronchial tubes. Syn., *Pleuritis bronchialis*. **B.**, *Acute*, is due to exposure to cold, to the inhalation of irritant vapors, to certain infectious agents, etc. It is characterized by fever, cough, substernal pain, and by dry rales in the early, and moist rales in the later, stages. **B.**, *Capillary*, an acute bronchitis of the finer bronchioles; it is generally the result of a downward extension of an acute bronchitis. Children are most frequently affected. Dyspnea, nervous depression, and cyanosis are prominent symptoms. Catarrhal pneumonia is a common complication. **B.**, *Catarrhal*, a form attended with profuse mucopurulent discharges. **B.**, *Chronic*, a form of bronchitis usually occurring in middle or advanced life, characterized by cough and by dry and moist rales. It may be due to repeated attacks of acute bronchitis, to gout, rheumatism, or tuberculosis, or it may

be secondary to cardiac and renal disease. **B.**, *Croupous*, **B.**, *Fibrinous*, **B.**, *Plastic*, a rare variety attended with the expectoration of casts of the bronchial tubes, containing Charcot-Leyden crystals and eosinophil cells, after a paroxysm of dyspnea and violent coughing. **B.**, *Dry*, that unattended by expectoration. **B.**, *Mechanic*, a form caused by the inhalation of dust, etc. **B.**, *Potter's*. Same as *B.*, *Mechanic*. **B.**, *Putrid*, **B.**, *Fetid*, a variety of chronic bronchitis characterized by the discharge of a copious, half-liquid, extremely offensive sputum. **B.**, *Suffocative*, **B., *suffocans*, acute capillary bronchitis. **B.**, *Summer*, hay-fever.**

Broncho- (*brong'-ko-*) [*bronchus*]. A prefix meaning relating to the bronchi.

Bronchocavernous (*brong-ko-kav'-er-nus*). Both bronchial and cavernous; it is applied to respiration.

Bronchocele (*brong'-ko-sel* or *-se'-le*) [*broncho-*; *κηλη*, a tumor]. Really a tumor of a bronchus, but generally signifying goiter. **B.**, *Aerial*. See *Aerocele*.

Bronchocephalitis (*brong-ko-se/-al-i'-tis*). Synonym of *Whooping-cough*.

Bronchoconstrictor (*brong-ko-kon-strik'-tor*). Constricting the caliber of the air-passages of the lungs.

Bronchodilator (*brong-ko-di-la'-tor*). Dilating the caliber of the air-passages of the lungs.

Bronchohemorrhagia (*brong-ko-hem-or-a'-je-ah*). Extravasation of blood from the lining membrane of the bronchial tubes.

Broncholith (*brong'-ko-lith*) [*broncho-*; *λίθος*, a stone]. A calculus or concretion formed in a bronchial tube.

Broncholithiasis (*brong-ko-lith-i'-a-sis*) [*broncho-*; *lithiasis*]. The formation of calculi in the bronchial apparatus.

Bronchomotor (*brong-ko-mo'-tor*). Affecting the caliber of the bronchial apparatus.

Bronchomycosis (*brong-ko-mi-ko'-sis*) [*broncho-*; *mycosis*]. The growth or presence of fungi in a bronchial tube.

Bronchopathy (*brong-kop'-o-the*) [*broncho-*; *πάθος*, disease]. Any disease of a bronchus.

Bronchophony (*brong-kof'-o-ne*) [*broncho-*; *φωνή*, the voice]. The resonance of the voice within the bronchi as heard on auscultating the chest. It is normally present over the lower cervical spines, in the upper interscapular region, and over the sternal portion of the infraclavicular regions. The most frequent pathologic cause is consolidation of the lung. **B.**, *Accidental*, that due to disease. **B.**, *Pectoriloquous*. See *Pectoriloquy*. **B.**, *Whispered*, bronchophony elicited by causing the patient to whisper.

Bronchoplasty (*brong'-ko-plas-te*) [*broncho-*; *πλασσω*, to form]. The closure of a tracheal or bronchial fistula by operation.

Bronchoplegia (*brong-ko-ple'-je-ah*) [*broncho-*; *πληγή*, a blow]. Paralysis of the bronchial tubes.

Bronchopleurisy (*brong-ko-plu'-ris-e*). Bronchitis existing with pleurisy.

Bronchopleuropneumonia (*brong-ko-plu-eo-nu-mo'-ne-ah*). Coexistent bronchitis, pleurisy, and pneumonia.

Bronchopneumonia (*brong-ko-nu-mo'-ne-ah*) [*broncho-*; *pneumonia*]. Lobular pneumonia, a term applied to inflammation of the lungs, which, beginning in the bronchi, finally involves the parenchyma of the lungs. This disease is most frequently encountered in children, but may occur in old age, and may be a simple catarrhal or a tuberculous process. Syn., *Bronchiopneumonia*; *Bronchoalveolitis*; *Bronchopneumonitis*; *Catarrhal pneumonia*; *Microbronchitis*.

Bronchorrhagia (*brong-kor-a' je-ah*) [*broncho-*; *ῥήω*, to burst forth]. Hemorrhage from the bronchial tubes.

Bronchorrhea (*brong-kor-e'-ah*) [*broncho-*; *ῥέω*, to flow]. A form of bronchitis attended with profuse expectoration. Syn., *Henorrhagia pulmonum*; *Bronchiolennorrhoea*. B., Serous, a form in which the sputum is serous.

Bronchorrhoncus (*brong-kor-ong'-hus*). A bronchial rale.

Bronchoscope (*brong'-ko-skop*) [*broncho-*; *σκοπεῖν*, to look]. An instrument employed in bronchoscopy.

Bronchoscopy (*brong-kos'-lo-pe*). Inspection of the bronchial tubes through a tracheal opening.

Bronchostenosis (*brong-ko-ste-no'-tis*) [*broncho-*; *στενός*, narrow]. Contraction of a bronchus.

Bronchotome (*brong'-ko-tom*) [*broncho-*; *τεμνέω*, to cut]. An instrument for cutting the larynx or trachea in the operation of bronchotomy.

Bronchotomy (*brong kol'-o-me*) [see *Bronchotome*]. Incision into the larynx, trachea, or bronchus.

Bronchotracheal (*brong-ko-tra'-ke-al*) [*broncho-*; *τράχεια*, the windpipe]. Relating to a bronchus (or to both bronchi) and to the trachea.

Bronchovesicular (*brong-ko-ves-ik'-u-lar*) [*broncho-*; *vesicula*, a vesicle]. Both bronchial and vesicular. See *Breath-sounds*, Table of.

Bronchus (*brong'-kus*) [*ῥαγίς*, *bronchus*; pl., *bronchi*]. One of the primary divisions of the trachea. **Bronchi, Eparterial**, the bronchi situated above the pulmonary artery. **Bronchi, Hyparterial**, those situated below the pulmonary artery.

Bronzed (*bronz*) [*bronzium*, *bronz*]. Tanned; of a bronzed color. B. Skin, a symptom of Addison's disease. B.-skin Disease. See *Addison's Disease*.

Broom. See *Scoparius*.

Brossard's Type of Progressive Muscular Atrophy (*brusar'*). "Type fémorel avec rigidité des orteils" (femoral type with a claw-like appearance of the toes). See *Eichhorst's Type*.

Broth. See *Bouillon*.

Brow (*brus*) [AS., *brū*]. The forehead; the

upper anterior portion of the head. B.-ague, neuralgia of the first division of the fifth cranial nerve, generally due to malaria. B.-pang. Synonym of *Hemiparesis*. B. Presentation, presentation of the fetal brow in labor.

Brown (*broun*) [AS., *brūn*]. Having a dark color inclining toward red or yellow. B.

Atrophy, an atrophy of a tissue associated with a deposit therein of a brown or yellow pigment. B., *Bismarck*-. See *Bismarck-brown*. B. Induration of Lung, a state of the lung due to long-continued congestion, usually arising from valvular heart disease.

It is characterized by an increase in connective tissue and an excess of pigment. B. Mixture, *mistura glycythuzæ composita*.

B. Ointment, the *unguentum fuscum* (N. F.), called also *unguentum matris*, or "mother's salve." It is composed of "brown plaster," 2 parts; oil, 1 part, suet, 1 part. B. Plaster, the *emplastrum fuscum camphoratum* (N. F.), called also *emplastrum matris camphoratum*, or "camphorated mother's plaster", official in German pharmacy. It is made of red oxid of lead, 30 parts; olive-oil, 60 parts, yellow wax, 15 parts, camphor, 1 part.

Brown's Phenomenon. See *Brownian Movement*.

Browne's (Crichton) Sign. Tremor of the labial commissures and outer angles of the eyes in the early stage of paralytic dementia.

Brownian Movement. An oscillatory movement observed under the microscope in very fine granules, drops, etc., when suspended in a liquid. The movement is not locomotion, and is to be distinguished from that of the self motility of living microorganisms. Its cause is not definitely known, but it may be due to heat, light, electricity, osmosis, etc. Same as *Pedersen*.

Brown-Séguard's Paralysis (*so-br'*) Paralysis and hyperesthesia of one side and anesthesia of the other side of the body.

Brucea (*bru-se'-ah*) [*Bruce*, the Abyssinian explorer (1770-1794)]. A genus of plants of the order *Simarubaceæ*. *B. ferruginea* is an Abyssinian species, the bark and root are used in dysentery. *B. sumatrana* is a species of the Asiatic tropics and of Australia; all parts of the plant are bitter, tonic, febrifuge, vermifuge, and antilysergic.

Bruch's Glands. Lymph-follicles found in the conjunctiva about the inner canthus of ruminants. B.'s Layer, B.'s Membrane, the lamina basalis which forms the inner boundary of the choroid.

Brucin (*bru'-sin*) [*Brucea*]. $C_{17}H_{15}N_3O_7$. A poisonous alkaloid found in *Strychnos nuxvomica* and in *Strychnos ignatiua*. It crystallizes in prisms containing $4H_2O$, and melts at 178° . Its taste is exceedingly bitter and acrid. Its action on the animal economy is similar to, but much less powerful than, that of strychnia. Dose $\frac{1}{2}$ -1 gr (0.005-0.03 Gm.); maximum dose 1 gr.

(0.05 Gm.), single; 3 gr. (0.2 Gm.) a day. Antidotes: chloral, chloroform, tannic acid. Syn., *Brucia*, *Brucinum*, *Brucium*; *Pseudo-angustia*, *Vomiera*. **B. Bromhydrate**, **B. Hydrobromate**, $C_{22}H_{26}N_2O_4 \cdot HBr$, a substitute for strychnin in ophthalmic surgery; it is 40 times less poisonous. **B. Hydrochlorate**, $C_{22}H_{26}N_2O_4 \cdot HCl$, small white crystals, soluble in water; used as is brucin. **B. Nitrate**, $C_{22}H_{26}N_2O_4 \cdot HNO_3 + 3H_2O$, white crystalline powder, soluble in water; used as is brucin. **B. Phosphate**, $(C_{22}H_{26}N_2O_4)_2H_2PO_4$, white, crystalline powder, soluble in water; use and dose the same as those of brucin. **B. Sulfate**, $(C_{22}H_{26}N_2O_4)_2H_2SO_4 + 4H_2O$, white, microscopic crystals, soluble in water and alcohol; use and dosage the same as those of brucin.

Bruck's Disease. A syndrome described by Bruck as consisting of multiple fractures and marked deformity of bones, ankylosis of most of the joints, and muscular atrophy.

Bruecke's Lines. The broad bands which alternate with Krause's membranes in the fibrils of striated muscles. **B.'s Muscle.** 1. See *Boreman's Muscle*. 2. The muscularis mucosae of the small and large intestine. **B.'s Reagent for Proteids**, saturate a boiling 10% solution of potassium iodid with freshly precipitated mercuric iodid. Filter when cool, the filtrate is used with hydrochloric acid as a precipitant for the proteids. **B.'s Tunica nervea**, the layers of the retina, exclusive of the rods and cones.

Bruggiser's Hernia. See *Kroenlein's Hernia*.

Bruit (*bruse*) [Fr., "a noise or report"]. An adventitious sound heard on auscultation. For kinds *amphoric*, *rotatory*, etc. see *Murmur*. **B., Aneurysmal**, the blowing murmur heard over an aneurysm. **B. d'airain**, the ringing note heard through the stethoscope applied to the chest-wall when a coin is struck against another pressed against the surface of the chest on the opposite side. It is pathognomonic of a collection of gas in the pleural cavity. **B. de clapotement**, a splashing sound often heard in cases of well-marked dilation of the stomach when pressure is made upon the abdominal walls. **B. de cuir neuf**, the cracking sound, like that of new leather, sometimes heard in pericarditis. **B. de diable**, a humming, rushing sound heard in the veins in anemia. **B. de galop**, a cantering rhythm of the heart-sounds, in which, owing to a reduplication of the second sound, three sounds are heard. It occurs most frequently in mitral stenosis. **B. de pot fêlé**, the cracked-pot sound. **B. de rappel**, a sound resembling the double beat upon a drum. **B. de soufflet**, the bellows-murmur. **B., Leudet's**, a fine cracking sound in the ear, audible to both the observer and the patient, in catarrhal and nervous affections of the ear. It is attributed to spasm of the

external peristaphylinus muscle. **B., Placental**, the uterine souffle, a blowing sound heard over the uterus in pregnancy. **B., Verstraeten's**, a bruit heard over the lower border of the liver in some cachectic individuals.

Brun's Test for Uric Acid in Minute Particles.

Examine the particle in naphthalin monobromid, the index of refraction of which is 1.66. Compare this with indexes of refraction of uric acid, 1.73; calcium oxalate, 1.65; calcium phosphate, 1.63. If on raising the tube of the microscope the crystal becomes brilliant, the substance under the microscope has a higher index than the fluid in which it is immersed, it becomes darker if the substance has a lower index than the fluid.

Brunfelsia (*brun-fel'-se-ah*) [O. *Brunfels*, a botanist of Metz (1464-1534)]. A genus of plants of the order *Saponeae*. A syrup made from the fruit of *B. americana*, a West Indian species, is used as a tonic in recovery from diarrhea. *B. uniflora*, of Brazil, is purgative, emetic, and emmenagog. Syn., *Mercurio vegetal*.

Brunn's Cell-nests, B.'s Epithelial Nests.

Branched or solid groups of flat epithelial cells occurring in all normal ureters. **B.'s Glands.** See *Glands, Brunner's*. **B.'s Layer**, the stratum of more or less pyramidal epithelial cells forming the deep layer of the nasal mucous membrane.

Brunner's Glands. See *Glands, Brunner's*.

Brunonian Movement. See *Brunonian Movement*. **B. Theory**, Brownism; a doctrine, taught by Dr. J. Brown (1735-88), that both physiologic and pathologic phenomena are due to variations in a natural stimulus, its excess causing sthenic, and its deficiency producing asthenic, diseases.

Brush [OF., *bruce*]. An instrument consisting of a collection of some flexible material fastened to a handle. In medicine various forms of brushes are employed, as the *acid brush*, of glass threads; the *electric brush*, an electrode in the form of a brush; the *laryngeal brush*, the *nasal*, *pharyngeal*, and *stomach brush*. **B.-burn**, the injury produced by violent friction and the resulting heat; it often resembles a burn or scald. **B., Terminal.** See *Motorial End-plate*.

Bryant's Ampulla. The apparent distention of an artery immediately above a ligature, due to the contraction of the vessel above the ampulla, where it is not completely filled by the clot. **B.'s Iliofemoral Triangle**, the rectangle formed by a vertical line dropped from the anterior superior iliac spine to the horizontal plane of the body; by a second line drawn from the anterior superior iliac spine to the tip of the trochanter, and by a third, the "test-line," which joins the two at a right angle to the vertical line. Shortening of the neck of the femur will be indicated by a shortening of the test-line. **B.'s**

Line, the vertical line forming one of the boundaries of the iliofemoral triangle.

Bryce's Test. For vaccinal infection the inoculation is repeated at a certain period in the evolution of vaccinia, upon the theory that systemic infection does not take place at once, but only after the lapse of a number of days from the time of inoculation.

Bryonia (*bri-o'-ne-ah*) [*Ipomoea*, bryony]. Bryony. The root of *B. alba* and *B. dioica*, indigenous to Europe. Its properties are due to an intensely bitter glucosid, *bryonin*, $C_{28}H_{48}O_{10}$, which is a strong irritant when applied to the skin or mucous membrane, often producing vesication. It is used in pleurisy, pleuropneumonia, rheumatic fever, and colds. Dose of the powdered root 10-30 gr. (0.65-2.0 Gm.); of the infusion (1-16) $\frac{1}{2}$ oz. (15-60 Cc.), of the tincture, a 10% solution of the root in alcohol, 1-2 dr. (4-8 Cc.). All unof.

Bryonidin (*bri-on'id-in*). A glucosid isolated from *Bryonia alba*, more active than bryonin.

Bryonin (*bri-o'-nin*). See under *Bryonia*.

Bryony (*bri'-o-ni*). See *Bryonia*.

Bryson's Sign. Diminished power of expansion of the thorax during inspiration, occasionally observed in exophthalmic goiter and in neurasthenia.

Bubo (*bu'-bu*) [*Bubov*, the groin]. Inflammation and swelling of a lymphatic gland, particularly of the groin, and usually following chancreoid, gonorrhea, or syphilitic infection. Syn., *Adin*; *Inguinal adenitis*; *Symphathetic abscess*. **B.**, **Absorption**. See *B.*, *Virulent*. **B.**, **Indolent**, one with enlargement and hyperplasia without the formation of pus or any tendency to break down. Syn., *Adenitis e blennorrhoea*, *Adenitis e sclerosi*. **B.**, **Parotid**. See *Parotitis*. **B.**, **Pestilential**, that associated with the plague. **B.**, **Primary**, a slight adenitis of the groin due to mechanic irritation or other cause, formerly supposed to be due to syphilis without a chancre having preceded. **B.**, **Rheumatic**, a hard lump, occurring oftenest on the back of the neck, as a sequel of acute articular rheumatism. **B.**, **Serpiginous**, an ulcerated bubo which changes its seat or in which the ulceration extends in one direction while healing in another. **B.**, **Simple**. See *B.*, *Symphathetic*. **B.**, **Strumous**, hypertrophied glands forming a large indolent swelling in a scrofulous subject. **B.**, **Symphathetic**, one caused by irritation, friction, injury, etc., and not arising from an infectious disease. **B.**, **Syphilitic**, that which appears in syphilis a few days after the primary lesion. It runs a slow course of six months or more. Syn., *Primitive syphilitic adenitis*. **B.**, **Venereal**, that due to venereal disease. **B.**, **Virulent**, an ulcerated, suppurating bubo due to absorption of the virus of a chancre. Syn., *Chancreoid adenitis*.

d'emblée [Fr]. See *Bubo*, *Primary*.

Bubonic (*bu-bon'-ik*) [see *Bubo*]. Relating to a bubo. **B.**, **Plague**. Synonym of *Plague*.

Bubonocoele (*bu-bon'-o-sel*) [*boubon*, the groin; *coele*, hernia]. Inguinal hernia when the gut does not extend beyond the inguinal canal.

Buccal (*buk'-al*) [*bucca*, the cheek]. Pertaining to the cheek.

Buccellation (*buk-sel-a'-shun*) [*buccella*, a morsel]. Hemostasis by a lint compress.

Buccolingual (*buk-se-ling'-wah*) [*bucca*, the tongue]. Relating to the cheek and the tongue.

Buccinatorlabialis (*buk-sin-a-l-a-be-a'-lis*). The buccinator and orbicularis oris regarded as one.

Buccinator (*buk'-sin-a-tor*) [L., "a trumpeter"]. The thin, flat muscle of the cheek.

Buccolingually (*buk-o-ling'-gwah*). From the cheek toward the tongue.

Buccula (*buk'-u-lah*) [L., dim. of *bucca*]. The fleshy fold seen beneath the chin, and forming what is called a double chin.

Buchner's Albuminoid Bodies. Defensive proteids. **B.'s Humoral Theory**. See under *Immunity*.

Buchu (*bu'-ku*) [native African]. The leaves of several species of *Barosma*, yielding a volatile oil, to which its properties are probably due, and a bitter extractive, barosmin. Dose 1-5 gr. (0.05-0.32 Gm.). It causes a sensation of glowing warmth over the body, stimulates the appetite, and increases the circulation. It is useful in catarrhs and other affections of the genitourinary mucous membrane. Dose of the leaves 15-32 gr. (1-2 Gm.). **B.**, **Fluidextract of** (*fluidextractum buchu*, U. S. P.). Dose 10 min-1 dr. (0.65-4.0 Cc.). **B.**, **Infusion of** (*infusum buchu*, B. P.). Dose 1-4 oz. (30-120 Cc.). **B.**, **Tincture of** (*tinctura buchu*, B. P.). Dose 1-2 dr. (4-8 Cc.).

Buchwald's Atrophy. Idiopathic, diffuse, progressive atrophy of the skin.

Buck's Extension. An apparatus consisting of a weight and pulley for applying extension to a limb. **B.'s Fascia**, the sheath of the corpora cavernosa and the corpus spongiosum, which arises from the symphysis pubis by the suspensory ligament of the penis and is continuous with the deep layer of the superficial perineal fascia.

Buck-bean (*buk'-ban*). Hog-bean. The rhizome of *Menyanthes trifoliata*, toxic, antispasmodic, and emmenagogue. It has been recommended as a vermifuge, and has been used in functional amenorrhea. Dose of *fluidextract* 5-30 min. (0.32-2.0 Cc.).

Buckeye Bark (*buk'-i bark*). The bark of *Aesculus glabra*, astringent and tonic, used in rectal irritation, prolapse, and various uterine derangements. Dose of *fluidextract* 3-5 min (0.2-0.32 Cc.).

Buckthorn (*buk'-thorn*). See *Frangula* and *Rhamnus*. **B.**, **California**. See *Cornus sagrada*.

Buenemia (*buk-ne'-me-ah*) [*βοῦ*, increase; *αἷμα*, the leg]. Inflammation of the leg, characterized by tenseness and swelling; elephantiasis; also phlegmasia dolens. **B. tropica**, elephantiasis arabum.

Budd's Cirrhosis. See *Cirrhosis, Budd's*. **B.'s Jaundice**. See *Rokitansky's Disease*.

Budding (*bud'-ing*) [*ΜΕ.*, *budden*]. In biology, a form of reproduction or cell-division, occurring among the polyps and infusorians, in which a bud is given off by the parent and comes to resemble the latter. The process is also called gemmation.

Budge's Center. 1. The ciliospinal center in the cervical spinal cord. 2. The genitospinal center in the lumbar spinal cord.

Buehlmann's Fibers. Certain lines on decayed teeth.

Buetschili's Nuclear Spindle (*bet'-she-lē*). The spindle-shaped figure observed during karyokinesis.

Buffy Coat (*buf'-ē*). A grayish or buff-colored crust or layer sometimes seen upon a blood-clot, after phlebotomy, and once looked upon as a sign of inflammation. It is caused by the partial subsidence of the red blood-corpuscles.

Bufotalin (*bu-'fo'-tal-in*), $C_{10}H_{17}O_{23}$. A toxic substance isolated by Phisalix and Bertrand from the parotid gland and skin of the common toad, *Bufo vulgaris*; it is a transparent resin, soluble in chloroform, alcohol, and acetone. It acts on the heart and does not affect the nervous centers.

Bufotenin (*bu-'fo'-ten-in*). A toxic body found with bufotalin (*q. v.*); it exerts a powerfully paralyzing action on the nervous centers.

Bugantia (*bu gan'-she-ah*) [*L.*]. A chilblain.

Buhl's Desquamative Pneumonia. Caseous pneumonia, in which the exudate consists chiefly of desquamated alveolar epithelium. **B.'s Disease**, acute fatty degeneration of the viscera of the newborn, with hemorrhages in various parts of the body.

Buhl-Dittrich's Law. In every case of acute general military tuberculosis an old focus of caseation is to be found somewhere in the body. This law, being based upon the belief in the etiologic nonidentity of diffuse caseous and military tuberculosis, is not strictly in conformity with modern views.

Bukardia (*bu-kar'-de-ah*) [*βουκαρδία*, ox-heart]. Hypertrophy of the heart.

Bulb [*L.*, *bulbus*]. 1. An oval or circular expansion of a cylinder or tube. 2. The medulla oblongata. **B.**, **Arterial**, the anterior part of the embryonic heart from the division of which the aortic and pulmonary stems have their origin. **B.**, **Brachial**, **B.**, **Brachiorachidian**, the expansion of the spinal cord at the place of distribution of the nerves forming the brachial plexus. **B.**, **Crural**, the dilation of the spinal cord in the lumbar region. **B.s**, **Four**, the corpora quadrigemina. **B.**, **Hair-**, the swelling at the root of a hair. **B.**, **Nerve-**. See *End-bud* and *Minorial End-plate*. **B.**,

Olfactory, one of the two bulbs of the olfactory nerve situated on each side of the longitudinal fissure upon the under surface of each anterior lobe of the cerebrum.

B., **Rachidian**, the oblongata. **B.**, **Rouget's**, the bulb of the ovary; a plexus of veins lying on the surface of the ovary and communicating with the uterine and pampiniform plexuses. **B. of Spinal Cord**, **B. of Spinal Marrow**, the oblongata. **B.s**, **Tonsillar**, the lobules of the cerebellum. *Syn.*, *Bulbi tonsillares*. **B. of Urethra**, the posterior expanded part of the corpus spongiosum. **B. of Vagina**, a small body of erectile tissue on each side of the vestibule of the vagina, homologous to the bulb of the urethra of the male. **B. of Vena jugularis**, the dilation at the termination of the external jugular vein.

Bulbar (*bul'-bar*). Bulbous. Pertaining to the medulla. **B. Disease**, **B. Paralysis**, a term applied to the progressive and symmetric paralysis of the muscles of the mouth, tongue, pharynx, and sometimes those of the larynx. This paralysis is due to a disease of the motor nuclei in the medulla oblongata, an acute and a chronic form are met. The acute form is due to hemorrhage or softening; the chronic, to degeneration. There is also a pseudobulbar paralysis, due to symmetric lesions of the motor cerebral cortex. *Syn.*, *Labio-glossolaryngeal paralysis*.

Bulbi vestibuli (*bul'-bi ves-tib'-u-li*) [*L.*]. A name sometimes given to the glands of Bartholin.

Bulbocavernosus (*bul-bo-kav-ern-o'-sus*) [*bulb*; *caverna*, a cavern]. The accelerator urinæ muscle, corresponding to the sphincter vaginae of the female.

Bulbonuclear (*bul-bo-nu'-kle-ar*). Relating to the oblongata and its nerve-nuclei.

Bulbopetal (*bul-bop'-et-at*) [*bulb*; *petere*, to seek]. Moving toward the bulb, said of nerve-impulses.

Bulbourethral (*bul-bo-u-re'-thral*) [*bulb*; *οὐρήρα*, the urethra]. Relating to the bulb of the urethra.

Bulbous [*bulb*]. Terminating in a bulb.

Bulbus (*bul'-bus*) [*L.*]. A bulb. **B.**, **arteriosus**, at a certain stage in the development of the heart the upper aortic enlargement is so called. **B. cinereus**. See *Bulb, Olfactory*. **B. crinis**, a hair-bulb. **B. oculi**, the globe of the eye. **B. pili**. Same as *B. crinis*. **B. rhachidicus**, the oblongata. **B. urethrae**. See *Urethro*. **B. venæ jugularis internæ inferior**, an enlargement of the jugular vein immediately above its union with the subclavian vein. **B. venæ jugularis internæ superior**, an enlargement of the internal jugular vein at the point of exit from the jugular foramen. **B. vestibuli**, the bulb of the vagina.

Bulesis (*bu-le'-sis*) [*βουλήσις*, the will]. The will, or an act of the will.

Bulimia (*bu-lim'-ē-ah*) [*βοῦ*, increase; *λίμος*, hunger]. Excessive, morbid hunger; it

sometimes occurs in idiots and insane persons, and it is also a symptom of diabetes mellitus and of certain cerebral lesions. Syn., *Bulimixis*; *Bulimy*.

Bulimic (*bu-lim'ik*). See *Bulimia*.

Bulla (*bul'-ah*) [L., "a bubble"]. A bleb or blister, consisting of a portion of the epidermis detached from the skin by the infiltration beneath it of watery fluid, the result of a liquefaction-necrosis. **B. dolentissima**, a small, very painful cutaneous ulcer, which persists for a long time. **B. ethmoidalis**, a rounded projection into the middle meatus of the nose, due to an enlarged ethmoid cell. **B. a frigore**, a blister from the effect of cold. **Bullæ gangrenosæ**, those occurring in moist gangrene of the skin. **B. ossea**, the inflated or dilated part of the bony external meatus of the ear.

Bullation (*bul'-a-shun*) [*bullare*, to bubble]. 1. Inflation. 2. Division into small compartments.

Buller's Shield. A watch-glass in a frame of adhesive plaster or rubber worn in front of an infected eye to prevent contagion of the sound eye.

Bullet Forceps. For extracting bullets.

Bullous (*bul'-us*) [*bullosa*]. Marked by bullas; of the nature of a bulla.

Bundle (*buñ'-dl*) [AS., *bandan*, to bind]. In biology, a fascicular grouping of elementary tissues, as nerve-fibers or muscle-fibers. **B., Hemispherical**, the posterior one of the two bundles composing the anterior commissure. It originates in the pyramidal cells of the temporal lobe and amygdaloid nucleus, passes through the external capsule and lenticle, unites with the mesial part of the commissure at the point of the decussation of its fibers, and radiates to the opposite temporal lobe. **B., Krause's Respiratory**, the solitary fascicle of the oblongata. **B., Longitudinal**, a bundle of fibers outside of the optic radiation, passing from the occipital to the temporal lobe. **B., Primitive**, **B., Schwann's Primitive**, a muscular fiber. **B., Solitary**, **B., Trineural**. See under *Solitary*.

Bunge's Law. The epithelial cells of the mammary gland (of the rabbit, cat, and dog) select from the mineral salts of the blood-plasma all the inorganic substances exactly in the proportion in which they are necessary for the development of the offspring and for the building up of the latter's organism.

Bunoid (*buñ'-oid*) [*bunoid*, a bull, *oid*, like-ness]. Having a round form, applied to tumors.

Bunion (*buñ'-yun*) [*fungus unguis*]. A swelling of a bursa of the foot, especially of the great toe.

Bunogaster (*buñ-a-gas'ter*) [*bunon*, a little hill, *gaster*, stomach]. A protruding abdomen.

Bunsen Burner. See *Burner*. **B. Cell**. See under *Battery*.

Buphane (*bu'fane*) [L.]. A genus of plants of the order *Amorificales*. *B. disticha* is a native of the Cape of Good Hope; the juice of the bulb is used as an arrow-poison by the Hot-tentots.

Buphthalmia, Buphthalmos (*boo, thaf' me-ah, -mos*). See *Keratophthalmus*.

Bur, Burr (ME., *burre*) 1. In botany, a rough, prickly shell or case. 2. In dentistry, an instrument with a rounded, pointed, conical or ovoid head and a cutting blade, used in the dental engine for excavating carious dentin and for other purposes. **B., Surgical**, an instrument similar in form to a dental bur, but larger, designed for surgical operations upon the bones.

Burckhardt's Corpuscles. See *Corpuscles*. *Burckhardt's*.

Burdach's Column. The post-external column of the spinal cord. **B.'s Fissure**, a small fissure between the myelin and the operculum. **B.'s Nucleus**, the cutaneous nucleus, a small nucleus of gray matter in the funiculus cuneatus of the oblongata, forming the termination of the long fibers of Burdach's column. **B.'s Operculum**. See *Arnold's Operculum*.

Burdock (*ber'-dok*). See *Lappa*.

Buret (*bure't*) [Fr.]. A graduated tube designed for measuring small quantities of a liquid. It is usually held vertically in a stand and is provided with a stopcock.

Burgundy Pitch. See under *Pitch*.

Burma Head. A disease of the Burmese territory marked by loss of memory, delirium, homicidal mania, and inability to walk.

Burn (ME., *bernen*, to burn) 1. To become inflamed. 2. To char or scorch. 3. To have the sensation of heat. 4. An injury caused by fire or dry heat. 5. A disease in vegetables. 6. In chemistry, to oxidize. 7. In surgery, to cauterize. **B., Brush**. See *Brush-burn*.

Burner [see *Burn*]. A common name for a lamp or heating apparatus used in laboratories for chemie and pharmaceutical purposes. **B., Argand**, a burner that uses gas or oil, and contains an inner tube for supplying the flame with air. **B., Bunsen**, a form in which, before ignition, the gas is mixed with a sufficient quantity of air to produce complete oxidation.

Burnett's Disinfecting Fluid. A strong solution of zinc chlorid with a little iron chlorid.

Burns' Amaurosis. Post-mortem amblyopia. Impaired vision caused by sexual excess.

B.'s (Allan) Ligament. See *Hen's Ligament*.

Burow's Vein. An inconstant venous trunk formed by branches of the anterior epigastric veins and joining the umbilical vein.

Burrowing (*bur'-ing*) [ME., *bereng*, defense; *burrow*, burrow]. The term given to the passage of pus through the tissues after the formation of an abscess.

Bursa (*bur'-sa*) [L., "a purse"] A small sac interposed between parts that move upon one another. **B., Accidental**, **B., Adventitious**, one resembling a bursa in form, but due to friction or pressure. **B., Acromial**, **External**, one beneath the acromion, be-

tween the coracoid process, the deltoid muscle, and the capsular ligament. **B.**, **Acromial**, **Internal**, one lying above the acromion, between the tendon of the infraspinatus and the teres major. **B.**, **Gluteofascial**, **B.**, **Gluteotrochanteric**, one lying between the trochanter major and the gluteus maximus. **B.**, **Iliac**. 1. One lying between the tendon of the iliacus muscle and the trochanter minor. 2. One between the pelvic brim and the iliopsoas muscle. **B. mucosa**, a membranous sac secreting synovial fluid. **B.**, **Omental**, **B. omentalis**, a large cavity formed by the peritoneum back of the stomach and in the great omentum. It is divided into the bursa of the great omentum and the bursa of the lesser omentum. **B. patellæ**, **B. patellaris**, one lying between the patella and the skin. **B. patellaris lateralis externa**, one lying between the patella and the external lateral dilation of the tendon of the quadriceps extensor cruris; it is rarely found. **B. patellaris lateralis interna**, one between the patella and the inner lateral dilation of the quadriceps extensor cruris, it may be either deep or superficial. **B. pharyngea**, a blind pouch projecting upward from the pharynx toward the occipital bone. **B.**, **Popliteal**, a bursa situated in the popliteal space between the tendon of the semimembranosus and the tendon of the inner head of the gastrocnemius, where they rub against each other. **B.**, **Prepatellar**, a bursa situated over the patella and the upper part of the patellar ligament. **B. sacralis**, one found in the aged over the sacrocoxygeal articulation or over the spine of the fourth or fifth sacral vertebra. **B.**, **Subhyoid**. See *Subhyoid Bursa*. **B.**, **Synovial**, one found between tendons and bony surfaces.

Bursalis (*bur-sa'-lis*). The obturator internus muscle.

Bursera (*bur'-ser-ah*) [*Burser*, a German botanist]. A genus of tropical trees, several species of which afford resinous gums. *B. gummiifera* is a native of South America; the resin, chibou or cachibou, is used in plasters and salves and internally in diseases of the lungs and kidney. The leaves are vulnerary, the bark is anthelmintic and antigonorrheic, and the root is used in diarrhoea.

Burserin (*bur'-ser-in*) [see *Bursera*]. A resinous constituent of opobalsamum.

Bursin (*bur'-sin*). An alkaloid isolated from *Capella bursa-pastoris*. It is a yellow, deliquescent powder, used as an astringent, tonic, and styptic instead of ergot, and hypodermatically in aqueous solution.

Bursitis (*bur-si'-tis*) [*bursa*; *itis*, inflammation]. Inflammation of a bursa.

Burton's Line. A blue line along the margins of the gums in chronic lead-poisoning.

Butane (*bu'-tan*), C_4H_{10} . An anesthetic substance isolated from petroleum. Syn., *Butyl hydride*.

Butter of Cacao. See *Cacao-butter*.

Butterin (*but'-er-in*) [*butter*]. An artificial substitute for butter, made principally of beef-fat.

Buttocks (*but'-uks*) [dim. of *butt*, an end]. The nates. The fleshy part of the body posterior to the hip-joints, formed by the masses of the glutei muscles.

Button (*but'-un*). See *Furunculus orientalis*.

B., **Amboyna**. See *Frambesia*. **B.**, **Belly**-, the navel. **B.**, **Biskra**. See *Furunculus orientalis*.

B.-bush, the bark of *Cephalanthus occidentalis*, a tonic, febrifuge, and diuretic. Dose of *fluidextract* $\frac{1}{2}$ -1 dr. (2-4 Cc.). Unof.

B., **Chlumsky's**, an intestinal button made of pure magnesium after the pattern of the Murphy button. It remains undissolved for four weeks, only the outer part becoming softer.

B., **Corrigan's**, a steel, button-shaped cautery-iron, introduced by Sir J. C. Corrigan (1862-80).

B.-makers' Choreia. See *Chorea*.

Buttonmaker's. **B.**, **Murphy**, a device used in gastroenterostomy or intestinal anastomosis.

B.-snakeroot, the root of *Liatris spicata* and of *Eryngium yuccifolium*, a stimulant, tonic, diuretic, and emmenagogue. Dose of *fluidextract* $\frac{1}{2}$ -1 dr. (2-4 Cc.). Unof.

Buttonhole, **Mitral**. An advanced degree of constriction of the mitral orifice of the heart.

Butyl (*bu'-til*) [*butyrum*, butter], C_4H_9 . A hydrocarbon alcohol radicle.

B.-chloral, **B.-chloral Hydrate**. See *Chloral butylicum*.

B. Hydrid. See *Butane*. **B.-hypnal**, a combination of butyl-chloral and antipyrin. It is hypnotic and antipyretic.

Butylamin (*bu'-til'-am-in*) [*butyl*; *amin*], $C_4H_9NH_2$. A substance contained in cod-liver oil, possessing diuretic and diaphoretic properties.

Butylene (*bu'-til'-en*) [*butyrum*], C_4H_8 . A hydrocarbon belonging to the olefin series. It exists in three isomeric forms, all of which are gases at ordinary temperatures.

Butyphus (*bu'-ti'-fus*) [*βουφ*, an ox; *φύσ*, stupor]. The cattle-plague. Syn., *Rinderpest*.

Butyraceous (*but'-ir-ə'-se-us*) [*butyrum*]. Resembling or containing butter.

Butyrin (*bu'-tir-in*) [*butyrum*], $C_4H_7(C_2H_5O_2)_2$. A constant constituent of butter, together with olein, stearin, and other glycerids. It is a neutral, yellowish, liquid fat, having a sharp, bitter taste.

Butyroid (*bu'-tir-oid*) [*butyrum*]. Buttery; having the consistence of butter.

Bychowski's Test for Albumin. Put a drop or two of the urine into a test-tube filled with hot water and shake it. In the presence of albumin a whitish cloud is formed and is diffused through the liquid. Phosphates give the same result, but the cloud disappears on addition of a drop of acetic acid.

Byn (*bin'-in*) [*byn*, malt]. 1. A proteid, insoluble in water, found in malt. 2. A proprietary liquid extract of malt made in England. **B. amara**, a combination of

bynin (2) with the phosphates of iron, quinin, and strychnin.

Bynol (*bin'-ol*). A combination of malt extract and cod-liver oil.

Byrolin (*bir'-ol-in*). A proprietary remedy said

to be a combination of boric acid, glycerol, and lanolin, and recommended for use in skin diseases.

Byssinosis (*bis-in-o'-sis*). A pulmonary affection due to the inhalation of cotton-dust.

C

C. 1. The chemic symbol of carbon. 2. The abbreviation of *centigrade*, *conjugus*.

Caballine Aloes (*kab'-al-in al'-ds*). An inferior quality of aloes, known also as fetid or horse aloes.

Cabanis' Pallet. A shovel-shaped instrument consisting of two plates of perforated silver, jointed and movable on each other. It is used to seize the extremity of the nasal probe in Méjean's operation for lacrimal fistula.

Cabbage (*kab'-aj*). See *Brassica*. **C.-rose**. See *Rose*. **Pale C.**, **Skunk-**, a fetid plant of North America, *Symphoricarpos fetidus*. Its fruiture and flusdexte are prescribed as antispasmodics and antisthmatics.

Cabot's Ring Bodies. Intra and extra-cellular bodies having the general shape of a ring and found in the blood in severe anemia.

Cacao (*kak'-o*). See *Theobroma*. **C.-butter** (*caum theobromatis*, U. S. P.). Is obtained from seeds or ribs of *Theobroma cacao*. It is a pure white fat, with a pleasant odor and taste. It fuses at 86° F. (30° C.); its specific gravity is from 0.915 to 0.952. It is used in cosmetics and for pharmaceutical preparations. See also *Theobroma*.

Cachectic (*kak-ek'-tik*) [see *Cachexia*]. Characterized by cachexia.

Cachet (*kach'-et*) [Fr]. A pharmaceutical preparation consisting of two concave pieces of wafer, varying in size from $\frac{1}{4}$ to $\frac{1}{8}$ inches in diameter, round or oblong in shape, in one of which the powder to be administered is placed, and the other, having previously been moistened, is then laid over the powder and the two margins are pressed together, when they adhere and completely inclose the powder.

Cachexia (*kak-ek'-e-ah*) [*κακή*, bad; *ἥξις*, a habit]. A depraved condition of general nutrition, due to some serious disease, as syphilis, tuberculous carcinoma, etc. **C.**, **Cancerous C.**, **Carcinomatous**, a condition marked by weakness, emaciation, and a muddy or brownish complexion due to carcinomatous disease. Syn. *Cachexia cancerata*, *Cancerous distemper*. **C.**, **Lymphatic**. Synonym of *Hobelin's disease*. **C.**, **Miner's**. See *Laminaria*. **C.**, **Osteal**, profound cachexia seen in children and accompanied by painful swelling of one of the long bones, with hematuria or extravasation of blood into the bone and often by rachitic phenomena.

C., **Pachydermic**. See *Hvædema*. **C.**, **Paludal**. See *Malarial Cachexia*. **C.**,

Periosteal. See *C.*, *Osteal*. **C. strumipriva**, the condition allied to, if not identical with, myxedema, following the extirpation of the thyroid gland. **C. thyreopriva**. See *Myxedema*. **C. uteri**, **C. uterina**, leukorrhœa. **C. venerea**, syphilis. **C. virginum**, chlostrachia.

Cachibou (*kash'-bow*). See under *Rumex*.

Caco- (*kak'-o*) [*κακός*, bad]. A prefix meaning bad or diseased.

Cacodiacol (*kak-o-d'-ak-ol*). Guaiacol cacodolate.

Cacodyl (*kak'-o-d'il*) [*κακώδης*, ill-smelling; *ἄλς*, matter]. As(CH₃)₂. Dimethylarsan; a radicle containing arsenic, hydrogen, and carbon. It is a colorless, heavy liquid, with an extremely offensive odor; it is inflammable when exposed to air. Its protoxid is called alkarsin (q. v.).

Cacodylate (*kak-od'-il-ât*). A salt of cacodylic acid.

Cacoethes (*kak-o'-ethz*) [*caco*; *ἥθος*, a habit]. 1. Any bad habit, disposition, or disorder. 2. A malignant ulcer.

Cacoplasia (*kak-o-pla'-ze-ah*) [*caco*; *πλάσσειν*, to form]. The formation of diseased structures.

Cacoplastic (*kak-o-plas'-tik*) [see *Cacoplasia*].

1. Characterized by a low degree of organization. 2. Relating to cacoplasia.

Cacosmia (*kak-os'-me-ah*) [*caco*; *ὀσμή*, smell]. A disgusting smell.

Cacosplanchnia (*kak-o-splan'-k'-me-ah*) [*caco*; *σπλάνχον*, the viscera]. Diseased condition of the digestive tract and resulting emaciation.

Cacothesis (*kak-oth'-e-sis*) [*caco*; *ὄθεσις*, a placing]. A faulty position of a part or of the entire organism.

Cacotrophy (*kak-ot'-ro-fe*) [*caco*; *τροφή*, nourishment]. Disordered or defective nutrition.

Cactina (*kak-ti'-nah*) [*κάκτος*, a prickly plant].

A proprietary preparation said to be a proximate principle derived from night-blooming cereus (*Cactus grandiflorus* and *C. mexicanus*). It is a cardiac stimulant, recommended as a substitute for digitalis. Unof.

Cactus grandiflorus. A plant indigenous to the West Indies and cultivated in North America and Europe. It bears large white or straw-colored flowers which bloom only at night. The preparations of cactus are stimulant to the spinal cord, the vasomotor center, and the cardiac ganglions. They have been used as substitutes for digitalis. Dose of tincture 15-20 min. (1.0-1.3 Cc.), of fluidextract 5-15 min. (0.33-0.65 Cc.). Syn. *Night-blooming cereus*, *Cereus grandiflorus*.

Cacumen (kak-u'-men) [L.; pl., *cacumina*].
1. The top, as of a plant. 2. The culmen
of the vermis superior of the cerebellum.

Cadaver (kad-az'-er or kad-a'-ver) [cadere, to fall].

A dead body, especially that of a human being.
Cadaveric (kad-av'-er-ik) [cadaver]. Pertain-
ing to the cadaver. **C. Alkaloids**, ptomaines.

C. Ecchymoses, **C. Lividity**, certain post-
mortem stains, closely resembling in their
general appearance the effects of bruises or
contusions. They occur on the lowest and
most dependent parts of the body. **C. Spasm**,
the early, at times instantaneous, appearance
of rigor mortis, seen after death from certain
causes. It is also called instantaneous rigor
and tetanic rigidity.

Cadaverin (kad-az'-er-in) [cadaver], $C_8H_{10}N_2$.
A ptomain, occurring very frequently in
decomposing animal tissues. It is obtained
from human hearts, lungs, livers, etc., after
three days' decomposition at ordinary tem-
perature, also from horseflesh, from putrid
mussel, from herring, and from haddock.
It is a constant product of the growth of
the comma bacillus. It is a thick, clear,
syrupy liquid, having an exceedingly un-
pleasant odor.

Cade (kad) [a Languedoc name]. See *Juni-
per*. **C.**, Oil of (*oleum cadinum*, U. S. P.),
a fatty oil from the wood of *Juniperus oxyce-
drus*; it is used in skin diseases.

Cadet's Fuming Liquid. See *Alkarsin*.

Cadmium (kad'-me-um) [cadmita, calamin].
Cd = 112; quantitative II; sp. gr. 8.60-
8.65. A bluish-white metal resembling zinc
in its general properties. In its physiologic
action it is escharotic and astringent; inter-
nally, in large doses, it produces emesis and
violent gastritis. **C. Iodid**, CdI_2 , used as
an ointment, 1 to 8 of lard. **C. Salicylate**,
 $Cd(C_2H_3O_2)_2$, white needles, soluble in water
and alcohol. It is used in purulent ophthal-
mia, etc., and is said to be a more active
emetic than other cadmium salts. **C.**
Sulfate, $CdSO_4 \cdot 4H_2O$, an astringent in
gonorrhea and in corneal opacities; used as
a lotion in strength of $\frac{1}{4}$ gr. or 4 to 1 oz.
of water, or as an ointment in 1:40 of fresh
lard. **C. Sulfocarbonate**, $Cd(C_2H_3O_2)_2$,
white crystals, soluble in water; it is anti-
septic and astringent. Syn., *Cadmium sul-
focarbonate*.

Cecal (se'-kal). See *Cecal*.

Cecitis (se-sit'-tis). See *Cecitis*.

Cecum (se'-kum). See *Cecum*.

Cassalpinia (ses-al-pin'-e-ah) [L.]. A genus
of tropical leguminous trees. **C. bonducella** is
a prickly, trailing shrub of most tropical
countries. The seeds, Molluca beans, and the
whole plant are anthelmintic and emmena-
gog; the oil of the seeds is used in rheuma-
tism. It contains bonducin. **C. coriaria**,
American sumac, divi-divi, is a South American
shrub cultivated in India, where the dried
powdered pods are used as an antiperiodic.
Dose 10-60 gr. (2.6-3.6 Gm.) A decoction
of the pods is used as an injection in the

treatment of bleeding piles. **C. echinata**,
a tree of Brazil, furnishes brazil-wood, the
bark, rich in tannin, is used as an astringent,
roborant, and febrifuge. **C. sappanis**, a tree
of India; the brownish-red wood, sappan-
wood, contains sappanin and is used as an
astringent; it furnishes a red dye and the
root a yellow dye.

Cæsarean Operation (se-sar'-e-an). See
Cæsarean Section.

Cæsium (se'-se-um). See *Cesium*.

Caffea (ka'-e-ah) [L.]. The seeds of *Coffea
arabica*. The dried and roasted seeds are
almost universally used in infusion as a bev-
erage, forming a cerebral stimulant and
stomachic tonic. They are valuable in pro-
moting digestion and allaying hunger and
fatigue. The properties are due to an alka-
loid, *caffein*, identical with *thein*. See *Thea*
and *Coffein*. The fluidextract of *Caffea viri-
dis* is intended as a substitute for the fluid-
extract of guarana. Dose $\frac{1}{2}$ -2 dr. (2-8 Cc.).
Unof. See *Guarana*.

Caffeic Acid (ka'-e'-ik). See *Acid, Caffeic*.

Caffein (ka'-e-in or ka'-en') [caffea], $C_8H_{10}N_4O_2$,
O, + H_2O . See under *Caffea*. An alkaloid
found in the leaves and beans of the coffee-tree,
in tea, in Paraguay tea, and in guarana, the
roasted pulp of the fruit of *Paulinia sorbilis*.
It occurs in long, silky needles, slightly
soluble in cold water and alcohol, with a
feebly bitter taste. It is a cerebrospinal,
circulatory, and renal stimulant. Dose 1-3
gr. (0.06-0.2 Gm.). Syn., *Guaranin*; *Methyl-
theobromin*; *Psoralin*; *Thein*; *Trimethylxan-
thin*. **C. Borocitrate**, $(C_8H_{10}N_4O_2)_3BO_3$, a
white, crystalline powder, soluble in water, al-
cohol, and chloroform; it decomposes in
water. It has the effect of caffein combined
with the antiseptic action of boric acid. **C.**
Bromid. See *C. Hydrobromate*. **C. Car-
bolate**, $C_8H_{10}N_4O_2 \cdot HOC_6H_5$, a white, crys-
talline mass, soluble in alcohol and water
with decomposition. It is an antiseptic,
diuretic, and stimulant, having the combined
action of caffein and phenol, and is used
subcutaneously. **C. Chloral**, $C_8H_{10}N_4O_2 \cdot$
 CCl_3COH , a molecular combination
of caffein and chloral, occurring in soluble crys-
tals. It is sedative and analgesic. Dose 3-5
gr. (0.2-0.3 Gm.). **C. Citrate** (*caffaina
citrate*, U. S. P.), $(C_8H_{10}N_4O_2)_3C_6H_5O_7$, a true
salt, forming a white, crystalline powder,
used in the same manner as caffein. It is
soluble in water and alcohol with decom-
position. Dose 1-5 gr. (0.065-0.32 Gm.).
C., Citrated, this is improperly called caffein
citrate and is prepared by dissolving equal
weights of caffein and citric acid in double
the quantity of hot distilled water. Dose 3-8
gr. (0.2-0.52 Gm.). **C., Citrated, Efferves-
cent** (*caffaina citrata effervescens*, U. S. P.).
Dose 60 gr. (4 Gm.). **C. Citrosalicylate**,
 $(C_8H_{10}N_4O_2)_2C_6H_5O_2 + (C_6H_5O_2 \cdot C_6H_5O_2)_2$,
a true salt occurring as a white, crystal-
line powder, decomposing in water. It is
antiseptic and is used as is caffein. **C. Di-**

iodid. See *C. Triiodid*. **C. Hydrobromate**, caffeine bromid, a true salt, $C_8H_{10}N_4O_2 \cdot HBr$, occurring as large crystals, reddish or greenish on exposure, soluble in water on decomposition. It is used as a diuretic in injections of 4-10 min. of a solution of 10 parts caffeine hydrobromate, 1 part hydrobromic acid, and 3 parts distilled water. **Caffeine, Injectio, Hypodermatica**, 1 grain of caffeine in 3 minims. Dose 1-6 min. (0.065-0.39 Cc.). **C. Salicylate**, $C_8H_{10}N_4O_2 \cdot C_7H_5O_2$, a true salt occurring as white, crystalline masses, soluble in water and alcohol with decomposition. It is used instead of caffeine with salicylic acid. Dose as caffeine. **C. and Sodium Benzoate**, a white powder containing 45.8% of caffeine, soluble in 2 parts of water. It is used instead of caffeine by subcutaneous injection. Dose about double that of caffeine. Syn., *Caffeinum natriobenzoicum*. **C. and Sodium Salicylate**, a white powder, soluble in 2 parts of water, and containing 62.5% of caffeine. It is used in rheumatism, etc., instead of caffeine, by subcutaneous injection. Dose about double that of caffeine. Syn., *Caffeinum natriosalicylicum*. **C. and Sodium Sulfonate**, a diuretic. Dose 15 gr. (1 Gm.). Syn., *Symphorol*. **C. Tannate**, a yellow powder, more astringent than caffeine; uses and dosage as caffeine. **C. Triiodid**, $(C_8H_{10}N_4O_2 \cdot HI)_3$, + $3H_2O$, dark-green prisms, of a metallic luster, soluble in alcohol. It is a diuretic and alterative, used instead of potassium iodid, and said to be nondepressing. Dose 2-4 gr. (0.13-0.26 Gm.). Syn., *Diiodo-caffeine hydriodate*. **C. Valerianate**, $C_8H_{10}N_4O_2 \cdot C_8H_{10}O_2$, small lustrous needles, soluble in alcohol with decomposition. It is used in nervous headache, whooping-cough, etc. Dose 2-5 gr. (0.13-0.3 Gm.) several times a day.

Caffeinism (*ka'f-e-in-izm* or *ka'-en'-izm*) [*cafein*]. Chronic coffee-poisoning; a train of morbid symptoms due to excess in the use of coffee.

Caffeone (*ka'f-e-on*) [*caffea*], $C_8H_{10}O_2$. A volatile aromatic oily principle (emphyreumatic oil) produced by the roasting of coffee. Syn., *Caffool*.

Caincin (*kah-in'-sin*) [*Cainca* or *Calinca*, the South American name for several species of *Chiococca*], $C_{30}H_{44}O_{14}$. A glucosid from *Chiococca racemosa* and *C. brachiata*. In small doses it is diuretic and cathartic and in large doses emetic. It is used in dropsy. Dose, diuretic and cathartic, 2-4 gr. (0.13-0.26 Gm.); emetic, 8-15 gr. (0.5-1.0 Gm.); maximum dose 15 gr. (1 Gm.). Syn., *Caincic acid*.

Caisson-disease (*ka'-son-dis-ez*). Diver's disease or tunnel disease, a morbid condition due to increased atmospheric pressure, sometimes occurring in divers, caisson-workers, etc. Paraplegia, hemiplegia, anesthesia, and apoplectic attacks are common, coming on only after return to the normal atmosphere.

Cajal's (Ramón y) Cells. See *Ramón y Cajal's Cells*.

Cajeput Oil (*ka'j-e-put*) [Malay, *cajuputi*, white wood; *oleum*, oil]. A volatile oil (*oleum cajuputi*, U. S. P.), distilled from the leaves of *Melaleuca cajuputi*. It resembles oil of turpentine. It is used in flatulent colic, hysteria, cutaneous disorders, and toothache. Dose 1-5 min. (0.065-0.32 Cc.). **C. Spirit** (*spiritus cajuputi*, B. P.), contains 2% of the oil. Dose $\frac{1}{2}$ -1 dr. (2-4 Cc.).

Cajeputol (*ka'j-e-put'-ol*) [see *Cajeput Oil*]. The more limpid part of cajeput oil; it is found also in some other fragrant volatile oils.

Calabar Bean (*kal'-ab-ar ben*). See *Physostigma*.

Calabarin (*kal-ab'-ar-in*). An alkaloid from Calabar bean.

Calaguala (*kah-lah-gwah'-la*) [Peruvian]. The commercial name for several ferns of the order *Polypodiaceae*, especially *Polypodium calaguala*, of Peru, which is esteemed an excellent solvent and diaphoretic. It is used in chronic affections of the air-passages and in whooping-cough in doses of 30-60 gr (2-4 Gm.) daily. A decoction is used externally as a dressing for wounds.

Calamin (*kal'-am-in*) [*calamina*, a corruption of *cadmia*]. Native zinc carbonate. *Calamina preparata*, the prepared calamin, washed and pulverized, is used mainly as an external esiccant and astringent.

Calamus (*kal'-am-us*) [L., "a reed"]. Sweet-flag. The rhizome of *Acorus calamus*. It contains a volatile oil and *acarin*, a bitter nitrogenous principle. The root is an aromatic, stomachic tonic, and a common ingredient of many popular "bitters." *C. draco* is a species of ratan palm that affords a part of the so-called dragon's-blood of commerce. **C., Fluidextract of** (*fluidextractum calami*, U. S. P.). Dose 15 min.-1 dr. (1-4 Cc.). **C. scriptorius** [a writing-pen or reed], the groove on the floor of the fourth ventricle, at the end of which is the ventricle of Arantius.

Calaya (*kal-a'-yah*). A fluidextract of the fruit of *Anneslea jebrijuga* (?), used in malaria. Dose 30 gr (2 Gm.) every 2 hours.

Calcaneoastragalar (*kal-ka-ne-o-as-trag'-al-ar*). Relating to the calcaneum and the astragalus.

Calcaneotalar (*kal-ka-ne-o-ta'-lar*). See *Calcaneoastragalar*.

Calcaneotibial (*kal-ka-ne-o-tib'-e-al*) [*calcaneum*; *tibia*]. Relating to the calcaneum and tibia.

Calcaneum, Calcaneus (*kal-ka'-ne-um, -us*) See *Bones, Table of*.

Calcar (*kal'-kar*) [L., "a spur"]. 1. Any spur or spur-like point, as the hippocampus minor. 2. Ergot of rye. 3. The calcaneum. 4. The styloid process of the temporal bone. **C. avis**, the hippocampus minor. **C. femorale**, a plate of hard tissue around the neck of the femur.

Calcarata (*kal'-kar-ata*, *foetalis*). - *Calcarata foetalis*.

Calcarea, Calcaria (*kal-ka'-re-ah*) [*calx*, lime-stone]. Lime.

Calcareous (*kai-ka'-re-us*) [*calcareus*]. 1. Pertaining to or having the nature of limestone. 2. Having a chalky appearance or consistency. 3. Growing in chalk.

Calcariform (*kal-kar'-e-form*) [*calcar*; *forma*, form]. Spur-shaped.

Calcarine (*kal'-kar-en*) [*calcar*]. Spur-shaped; relating to the hippocampus minor. **C. Fissure.** See *Fissure*, *Calcarine*.

Calcic (*kal'-sik*) [*calx*]. Of or pertaining to lime.

Calcicosis (*kal'-sik-ah'-sis*) [*calx*]. Marble-cutter's phthisis; a chronic inflammation of the lung due to the inhalation of marble-dust.

Calcareous (*kal'-si'-er-us*). Containing lime, chalk, or calcium.

Calcific (*kal'-si'-ik*) [*calx*]. Forming lime.

Calcification (*kal'-si'-ik-ah'-shun*) [*calx*; *fiere*, to become]. The deposit of calcareous matter within the tissues of the body. **C., Metastatic**, that resulting from an excess of lime salts in the blood, as occurs in the rapid breaking down of bones from osteomalacia.

Calcine (*kal'-sin* or *kal'-sin'*) [*calcinare*, to calcine]. To separate the inorganic elements of a substance by subjecting it to an intense heat.

Calcium (*kal'-se-um*) [*calx*]. $\text{Ca} = 40$; quantitative II. A brilliant, silver-white metal, the basis of limestone, characterized by strong affinity for oxygen, and isolated with great difficulty. It is best known in the form of *calcium acid*, quicklime; *calcium hydroxid*, slaked lime; and *calcium carbonate*, limestone or chalk. **C. Acetate**, $\text{Ca}(\text{C}_2\text{H}_3\text{O}_2)_2$, a white, amorphous powder, soluble in water. It is used in tuberculosis and psoriasis. **C. Albuminate**, an alternative and nutrient used in rachitis. **C. Benzoate**, $\text{Ca}(\text{C}_6\text{H}_5\text{O}_2)_2$, used in nephritis and albuminuria of pregnancy. Dose 5-10 gr. (0.32-0.65 Gm.). **C. Bisulfite, Liquid**, a solution of calcium sulfite (CaSO_3) in an aqueous solution of sulfurous acid. It is used, when diluted with 4 to 8 times its amount of water, as an antiseptic gargle or wash. **C. Borate**, a very light white powder. It is used as an antiseptic and astringent, internally in children's diarrhea and externally in fetid perspiration and weeping eczema. Dose 1-5 gr. (0.06-0.32 Gm.) 3 times daily. Application, 10 to 20% ointment or dusting-powder. **C. Boroglycerid**, an antiseptic substance prepared by heating together calcium borate and glycerol. It forms a transparent, hygroscopic mass, soluble in water and alcohol. **C. Bromid** (*calcii bromidum*, U. S. P.) a nerve sedative. Dose 10-30 gr. (0.65-2.0 Gm.) twice daily. **C. Bromoiodid**, $\text{CaI}_2 + \text{CaBr}_2$, a mixture of calcium iodid and bromid in molecular proportions, forming a yellow powder soluble in water. It is alternative and sedative. Dose 10-30 gr. (0.65-2.0 Gm.) 3 times daily.

C. Carbid, CaC_2 , obtained from lime with carbon, by the electric furnace. It occurs in gray to bluish-black irregular lumps, decomposing with water, evolving acetylene, and leaving a residue of slaked lime; sp. gr. 2.22. It is used in the palliative treatment of cancer of the vagina and uterus. **C. Carbolate**, $\text{Ca}(\text{OC}_6\text{H}_5)_2$, a reddish, antiseptic powder, used as a disinfectant and internal and external antiseptic. Dose 2-5 gr. (0.13-0.32 Gm.). **C. Carbonate**, $\text{Ca}(\text{OC}_6\text{H}_5)_2$, a reddish powder used as an internal and external antiseptic. Dose 2-5 gr. (0.13-0.32 Gm.). **C. Carbonate, Precipitated** (*calcii carbonas precipitatus*, U. S. P.), CaCO_3 , a fine white powder, without odor or taste. Dose 15 gr. (1 Gm.). **C. Chlorid** (*calcii chloridum*, U. S. P.), CaCl_2 , soluble in water; used internally to increase the coagulability of the blood. Dose 10-20 gr. (0.65-1.3 Gm.). **C. Citrate**, $\text{Ca}_3(\text{C}_6\text{H}_5\text{O}_7)_2 + 4\text{H}_2\text{O}$, a crystalline powder, soluble in 1730 parts of water at 90° C., more soluble in cold water. A solution is recommended for the treatment of burns. **C. Cresylate**, a syrupy fluid obtained by treating calcium hydroxid with cresol. It is used as a disinfectant instead of phenol. **C. Eosolate**, $\text{Ca}_2(\text{C}_6\text{H}_7\text{S}_2\text{O}_{12})_2$, a sulfosalt of aliphatic creasote esters containing 25% of creasote and occurring as a gray powder soluble in 10 parts of water. Dose 4-10 gr. (0.26-0.65 Gm.) 4 or 5 times daily. **C. Ferrophospholactate**, used in the treatment of tuberculosis and rachitis. Dose 3-7½ gr. (0.2-0.5 Gm.). **C. Glyceroarsenate**, a crumbling white powder, insoluble in water and alcohol, freely soluble in mineral and organic acids, especially in dilute citric acid. It is used in treatment of tuberculosis. Daily dose ½ gr. (0.01 Gm.). **C. Glyceroborate**, an antiseptic compound of equal parts of calcium borate and glycerol. **C. Glycerophosphate**, $\text{CaC}_2\text{H}_5\text{PO}_4$, a white, crystalline powder, soluble in cold water, almost insoluble in boiling water; it is a nerve tonic. Dose 2-5 gr. (0.13-0.32 Gm.) 3 times daily. In treatment of enuresis, dose, for adults, 8 gr. (0.5 Gm.) twice daily. **C. Hippurate**, $\text{Ca}(\text{C}_6\text{H}_7\text{NO}_2)_2$, a white, crystalline powder, slightly soluble in hot water. It is alternative. Dose 5-15 gr. (0.32-1.0 Gm.). **C. Hydrate.** See *C. Hydroxid*. **C. Hydroxid, slaked lime.** **C. Hypochlorite**, $\text{Ca}(\text{ClO})_2$, white cubes decomposing readily. It is an antiseptic and is used as a disinfectant and strong bleaching agent. **C. Hypophosphite** (*calcii hypophosphitis*, U. S. P.), $\text{Ca}(\text{PH}_2\text{O}_2)_2$, a white, crystalline powder, lustrous scales, or transparent crystals, soluble in 7 parts of water, decomposing and giving out inflammable gas above 300° C. It is used in tuberculosis, chlorosis, etc. Dose 10-30 gr. (0.65-2.0 Gm.). Syn., *Calcium hypophosphorolum*. **C. Hyposulfite.** See *C. Thiosulfate*. **C. Iodate**, CaIO_3 , + $6\text{H}_2\text{O}$, a white, crystalline powder, soluble in 300 parts of water, insoluble in alcohol. It is used internally in doses of 4-5 gr. (0.26-0.32 Gm.) to check fermentation

and also as a succedaneum for iodoform. Syn., *Calcinol*. **C. Iodid**, CaI_2 , a white powder or yellowish-white hygroscopic mass, soluble in water and alcohol. It is an alternative used instead of potassium iodid. Dose 2-5 gr. (0.13-0.32 Gm.) 3 times daily in syrup. Maximum dose, daily, 15 gr. (1 Gm.) **C. and Iron Lactophosphate**, a yellowish powder used in treatment of rachitis and tuberculosis. Dose 3-8 gr. (0.19-0.52 Gm.) several times daily. **C. Lactate**, $\text{Ca}(\text{C}_2\text{H}_3\text{O}_2)_2 + 5\text{H}_2\text{O}$, white, opaque, granular masses, soluble in water and hot alcohol. It is used in treatment of rachitis and tuberculosis of children. Dose 3-10 gr. (0.19-0.65 Gm.) in syrup. **C. Lactophosphate**, a crystalline compound of calcium lactate and calcium phosphate containing 1% of phosphorus, soluble in water. It is stimulant and nutrient. Dose 3-10 gr. (0.19-0.65 Gm.) 3 times daily. **C. Oxid** (calc., U. S. P.), CaO , quicklime. **C. Oxid, Chlorinated**. See *Lime, Chlorinated*. **C. Oxy-sulfid**, a compound of calcium, oxygen, and sulfur, forming a yellowish powder, used in washing scrofulous ulcers. **C. Permanganate**, $\text{Ca}(\text{MnO}_4)_2 + 5\text{H}_2\text{O}$, deliquescent, brown crystals with violet luster, soluble in water. It is used internally in diarrhea of children and externally as a mouth lotion. Dose 1-2 gr. (0.05-0.13 Gm.) **C. Peroxid**, $\text{CaO}_2 + 2\text{H}_2\text{O}$, an antiseptic, used in acid dyspepsia and summer diarrhea. Dose (children) 1-2 gr. (0.05-0.13 Gm.) **C. Phosphate, Antimoniated**, a mixture of precipitated calcium phosphate (67 parts) and antimony oxid (33 parts), occurring as a dull white, gritty powder, without odor or taste, soluble in boiling water. It is alterative, purgative, and emetic, and is used in acute rheumatism and febrile diseases. Dose 4-8 gr. (0.19-0.52 Gm.) 4 to 6 times daily. Syn., *Antimonial powder, James' febrile powder*. **C. Phosphate, Dibasic**, $\text{Ca}_2\text{H}_2\text{P}_2\text{O}_7$ or $\text{CaH}_2\text{P}_2\text{O}_7$, a white powder, soluble in acids, insoluble in water. It is used in diseases of bone, chlorosis, etc. Dose 8-20 gr. (0.5-1.3 Gm.). Syn., *Bicalcic phosphate*. See *Anticacum phosphate*. **C. Phosphate, Monobasic**, $\text{CaH}_2\text{P}_2\text{O}_7 + \text{H}_2\text{O}$, the chief constituent of the so-called "superphosphate of lime," a decomposition-product of tribasic or dibasic phosphate and sulfuric acid, occurring as white, deliquescent, strongly acid crystals. **C. Phosphate, Precipitated** (*calcii phosphas precipitatus*, U. S. P.), $\text{Ca}_3(\text{PO}_4)_2$, a bulky white powder, odless and tasteless. Dose 15 gr. (1 Gm.) **C. Phosphate, Tribasic**, $\text{Ca}_3(\text{PO}_4)_2$, a light, white, amorphous powder without odor or taste, soluble in acids, insoluble in water. It is the basis of the dibasic. **C. Propionate**, $\text{Ca}(\text{C}_2\text{H}_3\text{O}_2)_2$, a white powder, soluble in water. **C. Quinovate**, a compound of calcium and quinine, used in malarial fever and dysentery as a tonic. Dose 1-4 gr. (0.05-0.13 Gm.) **C. Salicylate**, $\text{CaC}_2\text{H}_3\text{O}_2 + \text{H}_2\text{O}$, a white, crystalline powder with alkaline reaction, soluble with difficulty in water.

It is used in intestinal diseases. Dose 8-20 gr. (0.52-1.3 Gm.) **C. Santonate**, **C. Santoninate**, $\text{Ca}(\text{C}_{11}\text{H}_{19}\text{O}_2)_2$, a white, odorless, insipid powder, insoluble in water or chloroform. It is anthelmintic. Dose 1-1½ gr. (0.05-0.1 Gm.). **C. Sulfate**, $\text{CaSO}_4 + \text{H}_2\text{O}$, a fine white, odorless and tasteless powder, used in making plaster bandages for fractures. Syn., *Gypsum, Plaster of Paris*. **C. Sulfate, Dried** (*calcis sulphas exsiccatus*, U. S. P.), a fine white powder without odor or taste. **C. Sulfhydrate**, $\text{CaS} \cdot \text{H}_2\text{S}$, transparent crystals decomposing in the air; it is used as a depilatory. **C. Sulfid**, CaS , a compound of calcium and sulfur, a yellow-white substance with odor of hydrogen sulfid and forming a large percentage of calc sulphurata. It is recommended in treatment of influenza (dose 1 gr. (0.05 Gm.) 4 times hourly) and in treatment of diphtheria (dose ½ gr. (0.03 Gm.) every hour, under 1 year of age every ½ hour between the ages of 1 and 3, and every 15 minutes between the ages of 3 and 6). Syn., *Calcium monosulfid*. **C. Sulfid, Hydrated**, CaS ; it is used as a depilatory. **C. Sulfite**, CaSO_3 , a white powder soluble in sulfuric acid and in 800 parts of water. It is antiseptic and is used in flammant diarrhea. Dose 1-5 gr. (0.05-0.32 Gm.) **C. Sulfocarbonate**, $\text{Ca}(\text{C}_2\text{H}_3\text{SO}_4)_2 + 6\text{H}_2\text{O}$, a white, odorless, astringent powder or scales, soluble in water. It is an internal antiseptic and astringent. Dose 5-15 gr. (0.32-1.0 Gm.) in 1% solution. **C. Sulfophenate**. See *C. Sulfocarbonate*. **C. Thiosulfate**, CaS_2O_3 , white antiseptic crystals, soluble in water; it is an internal antiseptic. Dose 3-10 gr. (0.19-0.65 Gm.).

Calcoglobulin (*kal-ko-glob'-u-lin*). A combination of soluble calcium salts with an albuminous base. It has a distinct and definite form and is probably the basis of all the calcic tissues of the body.

Calculus (*kal'-ku-lus*) [*calculus*]. Of the nature of a calculus.

Calculus (*kal'-ku-lus*) [*dim. of calx, chalk*]. A calcareous or stone-like concretion found in the body, particularly in cavities. **C., Alternating**, one composed of alternate layers of the substances of which it is made up. **C., Arthritic**, a gouty concretion. **C., Articular**. See *C., Arthritic*. **C., Aural**, hardened cerumen in the external auditory canal. **C., Biliary**, a gall-stone. **C., Blood**, a fibrinous calculus containing remnants of blood-corpuscles. **C., Bronchial**, a concretion in an air-passage. **C., Chalky**, so made up mainly of calcium carbonate and calcium phosphate with small amounts of magnesium carbonate, water, and organic matter, and frequently having a foreign body as a nucleus. **C., Cutaneous**. See *Medum*. **C., Cystic**. 1. A vesical calculus. 2. A gall-stone. 3. One composed of cystine. **C., Cystic-oxid**, **C., Cystin**, a urinary calculus rarely found, and composed largely of cystine.

C., Dental, tartar on the teeth or gums. **C., Encysted**, a vesical calculus which has become invested in a pouch springing from the wall of the bladder. **C., Essential**, one having its origin within the tissue of an organ and not due to a foreign body. **C., Fatty**, a vesical calculus having a nucleus of fat or saponaceous matter. **C., Fibrinous**, a vesical calculus made up of dried coagulated albumin. **C., Fusible**, a urinary calculus composed of phosphates of ammonium, calcium, and magnesium. **C., Hemic**, a concretion of coagulated blood. **C., Incarcerated**. See **C., Encysted**. **C., Lacteal**, **C., Laminated**, one made up of layers of different materials. **C., Mammary**, a calcareous nodule sometimes obstructing the lactiferous ducts. **C., Mulberry**, the oxalate-of-lime variety, resembling a mulberry in shape and color. **C., Nasal**, one found in the nasal cavities. **C., Organic**, one with a nucleus formed of epithelium, blood, etc. **C., Pineal**, brain-sand. See **Acerulus**. **C., Podagric**. See **C. Arthritic**. **C., Prostatic**, one in the prostate gland. **C., Renal**, a calculus found in the kidney. **C., Salivary**. 1. One formed in the ducts of the salivary glands. 2. The tartar deposited on teeth. **C., Scrotal**. 1. A vesical or prostatic calculus which has made its way to the scrotum. 2. One formed in the scrotum from calcareous degeneration. **C., Secondary**, a vesical calculus formed in consequence of a diseased condition of the mucosa of the urinary tract. **C., Urinary**, a concretion composed of concentric layers of crystallized substance cemented together by mucus or other organic material, occurring in the bladder. Urinary calculi (sand, gravel, or stones, according to size) may be classified as follows: (1) Those containing a mixture of uric acid with urates, with either little or no phosphates; (2) mixed calculi, those containing more phosphates than uric acid; (3) calcium-oxalate calculi; (4) phosphatic calculi—composed of calcium phosphate, triple phosphate, or a combination of calcium and magnesium phosphates; (5) calcium-carbonate calculi; (6) cystin calculi; (7) xanthin calculi; (8) fibrinous calculi, consisting of fibrin or inspissated albumin. **C., Uterine**, an intrauterine concretion; a woman's stone; formed mainly by calcareous degeneration of a tumor. **C., Vesical**, a calculus found in the urinary bladder.

Caldani's Ligament. A fibrous band extending from the inner border of the coracoid process to the lower border of the clavicle and upper border of the first rib, where it unites with the tendon of the subclavius muscle.

Calendula (*kal-en'-du-luh*) [*calenda*, the first day of the month]. Marigold. The flowering plant known as the garden-marigold, *C. officinalis*. **C., Tincture of** (*tinctura calendulae*, U. S. P.), contains 20% of the leaves and stems. It is used as a local application to wounds, bruises, and ulcers, and has been vaunted as a cure for carcinoma.

Calendulin (*kal-en'-du-lin*) [*calendula*]. An amorphous principle obtainable from calendula.

Calentura (*kal-en'-tu'-rah*). 1. See *Calenture* (1). 2. Applied to an epidemic disease of horses in the Philippines. It is caused by a species of *Spirillum*. **C. amarilla**, **C. vomito negro**, yellow fever.

Calenture (*kal'-en-tur*) [Sp., *calentura*, heat; L., *calere*, to be hot]. 1. A tropical remittent fever with delirium; formerly, a supposed fever of this kind that attacked mariners, leading them to leap into the sea. 2. Sunstroke.

Calf (*kahf*) [Icel., *kalfr*]. The thick, fleshy part of the back of the leg, formed by the gastrocnemius and soleus muscles.

Calibrate (*kal'-ib-rat*) [Fr., *calibre*, the bore of a gun]. 1. To estimate the exact size of an opening, as of intestines to be united by anastomosis. 2. To graduate the tubes of a thermometer so that it will indicate the temperature correctly, or to determine the errors of the gradation when made; also, to determine the indication of the reading after the correction of the errors.

Calibrator (*kal'-e-bra-tor*). An instrument for determining the exact diameter of the lumen of an opening, as of the urethra. It may consist of a truncated cone supplied with a scale or some form of dilating blades.

Caliche (*kah-le'-che*) [S. A., "a flake of lime from a wall"]. The South American name for crude sodium nitrate; Chili saltpeter.

California Buckthorn. See *Cascara sagrada*.

Calipers (*kal'-ip-ers*) [corruption of *caliber*]. Compasses with curved legs.

Calisaya (*kal-is-a'-yah*) [S. A.]. Cinchona bark, especially that of *Cinchona calisaya*. See *Cinchona*.

Calisayin (*kal-e-sa'-yen*). An amorphous base consisting mostly of quinin obtained from cinchona bark.

Calisthenics, **Callisthenics** (*kal-is-then'-iks*), [*kalós*, beautiful; *sthenos*, strength]. The practice of various rhythmic movements of the body, intended to develop the muscles and produce gracefulness of carriage; light gymnastics, especially designed for the use of girls and young women.

Calix (*ka'-tik*). See *Calyx*.

Callaway's Test. In dislocation of the humerus the circumference of the affected shoulder, measured over the acromion and through the axilla, is greater than that of the sound side.

Callicsection (*kal-e-sek'-shun*) [*callus*; *sectio*, a cutting]. Vivisection of anesthetized animals.

Callosal (*kal-o'-sal*) [*callosum*]. Pertaining to the corpus callosum.

Callositas (*kal-os'-it-as*). See *Callosity*.

Callosity (*kal-os'-it-e*) [*callus*]. A hard, thickened patch on the skin produced by excessive accumulation of the horny layers. Syn., *Callositas*; *Keratoma*; *Tylosis*; *Tylosis*.

Callosomarginal (*kal-so-so-mar'-jin-al*) [*callosum*; *margo*, margin]. Relating to the callosal and marginal gyri of the brain.

Callososerrate (*kal-u-so ser'-at*) [*callus; serratus*, saw-shaped]. Having serrated callous projections.

Callosum (*kal-ol'-sum*). Same as *Corpus callosum*.

Callus (*kal'-us*) [*callus*]. Hard; tough, like callus.

Callus (*kal'-us*) [L.]. 1. A callosity, hardened and thickened skin. 2. The new growth of incomplete osseous tissue that surrounds the ends of a fractured bone during the process of repair. *C.*, **Interior**, *C.*, **Internal**, provisional callus of a fractured bone deposited in its medullary canal. *C.*, **Permanent**, the permanent bond of bony union after resorption of the *provisional callus*, or cartilage-like, plastic material first thrown out. *C.* of **Skin**, induration and thickening of the skin.

Calmative (*kal'-ma-tiv*) [OF., *calme*, still]. Calming, sedative.

Calmin (*kal'-min*). A compound of antipyrin and heroin, it is used in asthma.

Calomel (*kal'-o-mel*) [*calog*, fair, *melas*, black]. Mercurous chloride.

Calor (*kal'-lor*) [L.]. 1. Heat. 2. Moderate fever-heat, less than *feror* and *ardor*. *C.* **animalis**, animal heat. *C.* **febrilis**, fever-heat. *C.* **fervens**, boiling heat. *C.* **innatus**, natural or normal heat. *C.* **internus**, inward fever, fever not appreciable on the surface of the body. *C.* **mordax**, *C.* **mordicans**, biting or pungent heat. *C.* **nativus**, native or animal heat, blood-heat, normal heat.

Calorie (*kal'-or-ee*). See *Calory*.

Calorific (*kal-or-ij'-al-ee-ent*) [*calor*; *facere*, to make]. Heat-producing; supplied to certain bodies.

Calorimeter (*kal-or-im'-et-er*) [*calor*; *metron*, a measure]. An instrument for measuring the amount of heat that bodies produce or absorb. *C.*, **Respiration** (Atwater's), an apparatus used to determine the caloric values of various foods and their effect on metabolism.

Calorimetric Equivalent. The amount of heat necessary to raise the temperature of the calorimeter 1° C.

Calorimetry (*kal-or-im'-et-ree*). The estimation of the heat units by the calorimeter. *C.*, **Direct**, a method of estimating the amount of heat produced and given off by an animal inclosed in a ventilated cabinet, and inclosed in another cabinet filled with air or water, by paying the amount imparted to the air or water in the second cabinet. *C.*, **Indirect**, that arrived at by an estimation of the caloric value of a known quantity of food ingested by an animal in a given time.

Calory (*kal'-or-ee*) [Fr., *calorie*]. A heat-unit. *C.*, **Great**, the amount of heat required to raise the temperature of one kilogram of water one degree centigrade. *C.*, **Small**, the amount of heat required to raise the temperature of one gram of water one degree centigrade.

Calor's Method. See under *Treatment*.

Calumba (*kal-um'-bah*) (native Mozambique, *kalumb*) *Columbo*. The root of *Indopistia calumba*, native to South Africa and parts of the East Indies. It is an excellent example of a simple bitter, and contains a bitter principle, *calumbin*, $C_{22}H_{33}O_7$, of which the dose is 1-3 gr. to 0.065-0.2 Gm. It is not astringent, and may be prescribed with salts of iron. It is useful in atonic dyspepsia, and as a mild appetizing tonic in anorexia. *C.*, **Extract of** (*extractum calumbæ*, B. P.). Dose 2-10 gr. or 0.13-0.5 Gm. *C.*, **Fluidextract of** (*fluidextractum calumbæ*, U. S. P.). Dose 5-30 min. or 12-25 Cc. *C.*, **Infusion of** (*infusum calumbæ*, B. P.). Dose 1-2 oz. (30-60 Cc.). *C.*, **Tincture of** (*tinctura calumbæ*, U. S. P.), contains 10% of calumba. Dose 1-2 dr. (2-8 Cc.).

Calvaria, **Calvarium** (*kal-va'-re-ah*, *um*) [*calvus*, the scalp]. The upper part of the skull.

Calvities (*kal-vah'-ee-tee*), **Calvous** (*kal'-vus*) [*calvus*, bald]. Baldness.

Calx (*kal'-eks*) [L.]. 1. The heel. 2. Calcium oxide. *C.* **chlorinata** (U. S. P., B. P.), chlorinated lime. *C.* **sulphurata** (U. S. P., B. P.), consists largely of calcium sulphide used externally and internally in skin diseases. Dose 1-2 gr. to 0.06 Gm.

Calyciform (*kal-ik'-e-form*) [*calyx*; *forma*, shape]. Cup-shaped, resembling a calyx.

Calyx (*kal'-iks*) [L., pl., *calices*]. A cup, especially one of the cup-like divisions of the pelves of the kidney into which the pyramids project.

Camara (*kam'-ar-ah*). 1. An arched or vaulted chamber. 2. The fornix of the brain. 3. The hollow of the external ear.

Camboodia (*kam-bu'-de-ah*). See *Cambodia*.

Cambogia (*kam-bu'-jee-ah*) [*Cambodia*, or *Cambodia*, in Siam]. Gamboge. A resinous gum from *Carex hainanensis*, a tree native to southern Asia. Its properties are due to gambogic acid. It is a drastic, hydrating cathartic, decidedly diuretic. *C.*, **Compound Pill of** (*pilula cambogia composita*, B. P.), contains gambogia, aloes, hard soap, compound powder of cinnamon and syrup. Dose 5-10 gr. or 0.15-0.3 Gm. It is also officially a constituent of compound cathartic pills.

Camera (*kam'-er-ah*) [*camera*, an arched roof or chamber]. 1. See *Camara*. 2. In optics, the apparatus used for photography. *C.* **lucida**, an optic device for superimposing or combining two fields of view in one eye, invented by the chemist, Wollaston. *C.* **septi-lucida**, the fifth ventricle of the brain.

Camisia fœtus (*kam-is'-ee-ah*). The chorion. **Camisole** (*kam-ee'-ol*) [Fr.]. The strait-jacket, used for the restraint of the violently insane.

Cambridge's Test. A test for the detection of pancreatic disease by examination of the urine for a substance, probably pentose.

Camomile, **Chamomile** (*kam'-o-mil*). See *Anthemis* and *Matricaria*.

Camp Fever. Synonym of *Typhus fever*.

Camper's Chiasm. The crossing of the inner fibers of the tendons of the flexor sublimis digitorum (see under *Muscle*) after they have separated to give passage to the tendons of the deep flexor. **C.'s Ligament**, triangular ligament; the deep perineal fascia. **C.'s Line**, a line running from the external auditory meatus to a point just below the nasal spine.

Camphenes (*kam'-jēns*) [*camphor*]. The volatile oils or hydrocarbons having the general formula $C_{10}H_{16}$, isomeric with oil of turpentine. Many camphenes, as oil of cloves, etc., exist ready formed in plants. They are liquid at ordinary temperatures.

Camphenol (*kam'-je-nol*). A compound of camphor, cresols, and phenols; it is a disinfectant.

Camphin (*kam'-fin*), $C_{10}H_{16}$. A colorless oil obtained by the distillation of camphor with boron.

Camphol (*kam'-fol*). See *Borneol*.

Camphophenique (*kam'-fo-jen-ēk'*) [Fr.]. A proprietary preparation combining camphor and phenol; it is recommended as an antiseptic and local stimulant.

Camphor (*kam'-for*) [*camphora*, camphor], $C_{10}H_{16}O$. A solid, volatile oil obtained from *Cammomum camphora*, a tree indigenous to eastern Asia. It yields camphoric and camphonic acids, also camphor cymol when exposed to a high heat in close vessels. It is antispasmodic, anodyne, diaphoretic, and stimulant. Applied locally, it is rubefacient. It is used in cholera, vomiting, the typhoid state, headache, diarrhea with pain, etc., morbid depression, and affections requiring an antispasmodic. **C., Artificial**, $C_{10}H_{14}HCl$, a terpene hydrochlorate obtained from oil of turpentine by action of hydrochloric acid; it is a solid very similar to camphor. **C.-ball**, an English preparation used as an application to chapped skin. Its composition is spermaceti, 4; white wax, 12; oil of almonds, 5; melt in a water-bath, and add flowers of camphor 4; dissolve, and when nearly cold pour into boxes or mold in gallipots. **C., Borneo**. See *Borneol*. **C., Carbolated**, a mixture of 2½ parts of camphor with 1 each of phenol and alcohol, it is a good antiseptic dressing for wounds. **C. Cerate** (*ceratum camphorum*, U. S. P.), consists of camphor 10; olive-oil, 12; simple cerate, 85. It is used for itching skin affections. **C., Chloral**, a fluid prepared by mixing equal parts of camphor and chloral. It is an excellent solvent for many alkaloids, and is used externally as a sedative application. **C., Citrated**, a compound of citric acid and camphor; a white powder, antiseptic, antispasmodic, and stimulant. Dose 3-10 gr. (0.2-0.65 Gm.) several times daily. **C., Flowers of**, powdered camphor obtained by condensing sublimed camphor. **C.-ice**, a camphoric preparation made by melting 16 parts of white wax with 48 parts of benzoated cast, and then adding 8 parts of camphor and

1 part of oil of lavender. **C., Japan**, the commercial variety brought from Japan, it is also called *tub camphor*, from the receptacle in which it comes, or *Dutch camphor*, from its introduction into the market by that people.

C. Liniment (*linimentum camphora*, U. S. P.), a preparation consisting of camphor, 20 parts; cotton-seed oil, 80 parts. **C. Liniment, Compound** (*linimentum camphora composita*, B. P.), contains camphor and oil of lavender dissolved in rectified spirit, and strong solution of ammonia added. **C., Liquid**, oil of camphor. **C., Liquid Artificial**, $C_{10}H_{16}HCl$, a liquid isomer of solid artificial camphor obtained from oil of turpentine by action of gaseous hydrochloric acid at high temperatures. **C., Monobromated** (*camphora monobromata*, U. S. P.), $C_{10}H_{15}BrO$, camphor in which one atom of hydrogen has been replaced by an atom of bromine. It resembles the bromids in therapeutic action. Dose 1-10 gr. (0.065-0.65 Gm.). **C., Neroli**. See *Aurade*. **C.-resin**, $C_{20}H_{30}O_2$, a yellow, resinous body obtained from camphor by heating it with an alcoholic solution of caustic potash. **C. Salicylate**, prepared by heating together 14 parts of camphor and 11 of salicylic acid. It is used as an ointment. **C. Spirit of** (*spiritus camphora*, U. S. P.), contains camphor, 10; alcohol, 90 parts. Dose 5-20 min. (0.3-1.2 Cc.). **C., Tincture of, Compound** (*tinctura camphora composita*, B. P.), contains opium, benzoic acid, camphor, oil of anise, and proof spirit. Dose 15 min.-1 dr. (1-4 Cc.). **C., Tincture of, Rubini's**, a saturated solution of camphor in alcohol. Dose 2-5 min. (0.12-0.3 Cc.). **C.-water** (*aqua camphora*, U. S. P.), consists of camphor, 8; alcohol, 5; distilled water, sufficient to make 1000 parts. Dose 1-4 dr. (4-16 Cc.).

Camphoraceous (*kam'-for-a'-shus*). Resembling or containing camphor. Syn., *Camphoroid*; *Camphorous*.

Camphorate (*kam'-for-āt*). A basic salt of camphoric acid.

Camphorated (*kam'-for-a-ted*) [*camphor*]. Impregnated with camphor.

Camphoric (*kam'-for-ik*). Relating to camphor. **C. Acid**. See *Acid, Camphoric*. **C.-acid Phenetidin**, a compound of camphoric acid and parafenetidin. **C. Anhydrid**, $C_{10}H_{14}O_2$, the anhydrid of camphoric acid, a sticky mass obtained by heating the crude acid.

Camphorism (*kam'-for-izm*). Camphor-poisoning; a condition marked by gastritis, coma, and convulsions, due to excessive doses and enemas of camphor and its preparations.

Camphoroxol (*kam'-for-oks'-ol*). A 3% solution of hydrogen dioxide containing 32% of alcohol and 1% of camphor.

Camphyl (*kam'-fil*). The hypothetical radicle of borneol, $C_{10}H_{17}$. **C. Alcohol**, borneol.

Camphimeter (*kam'-fim'-et-er*). See *Perimeter*.

Canada Balsam (*kan'-a-dah*). See *Balsam, Canada*. **C. Hemp**. See *Apocynum*.

Canadin (*kan'-ad-in*), $C_{10}H_{11}NO_4$. An alkaloid from the rhizome of *Hydrastis canadensis*, occurring in pure white needles, soluble in alcohol and melting at 132° - 135° C.

Canadol (*kan'-ad-ol*). A transparent volatile liquid resembling benzene in smell. It is a local anesthetic used in minor surgical operations. *U.S.P.*

Canal, **Canalis** (*kan-ol'*, *kan-a'-lis*) [*L., canalis*]. A tubular channel or passage. **C., Abdominal.** See **C., Inguinal**. **C., Alcock's.** See **Alcock's Canal**. **C., Alimentary**, the whole digestive tube from the mouth to the anus. **C., Alisphenoid**, in comparative anatomy, a canal in the alisphenoid bone, opening anteriorly into the foramen rotundum, and transmitting the external carotid artery. **C., Alveolar, Anterior**, one located in the superior maxilla, it transmits the anterior superior dental nerve. **C., Alveolar, Inferior**, the inferior dental canal. **C., Alveolar, Median**, one located in the superior maxilla and transmitting the middle superior dental nerve. **C., Alveolar, Posterior**, one situated in the superior maxilla; it transmits the posterior superior dental nerve. **C., Alveolodental**, any of the dental canals. **C., Arachnoid**, a space formed beneath the arachnoid membrane of the brain; it transmits the vena magna galeni. **C. of Arantius**, the ductus venosus. **C., Archinephric**, the duct of the archinephron or primitive kidney. **C., Arnold's Innominate.** See **Arnold's Canal**. **C., Arterial.** See **Ductus arteriosus**. **C., Atrial**, the cavity of the atrium. **C., Auditory, External**, that from the auricle to the tympanic membrane. **C., Auditory, Internal**, that beginning on the posterior surface of the petrous bone, and extending outward and backward for a distance of about four lines; it transmits the auditory and facial nerves and the auditory artery. **C., Auricular.** 1 See **C., Auditory, External**. 2 The constriction between the auricular and ventricular portions of the fetal heart. **C., Avaut**, the anterior portion of the male urethra. **C., Bartholin's**, the duct of Bartholin's gland. **C., Bernard's.** See **Bernard's Canal**. **C., Bichat's.** See **Bichat's Canal**. **C., Biliary.** See **C., Hepatic**. **C., Blastoporic.** See **C., Neurenteric**. **C., Bochdalek's.** See **Bochdalek's Canal**. **C. of Bone**, a cavellulus of bone. **C., Braun's.** See **C., Neurenteric**. **C., Braune's.** See **Braune's Canal**. **C., Broschet's.** See **Cs of Diploe**. **C., Bullular.** See **C. of Petit**. **C., Caroticotympanic**, two or three short canals extending from the carotid canal to the tympanum; they transmit branches of the carotid plexus. **C., Carotid**, one in the petrous portion of the temporal bone; it transmits the internal carotid artery. **Cs of Cartilage**, the canals in ossifying cartilage during its vascularization, intended to receive prolongations of the osteogenic layer of the perosteum. They radiate in all directions from the center of ossification. **C., Central**

(**of the Modiolus**), a canal running from the base to the apex of the cochlea. **C., Central (of Spinal Cord)**, the small canal that extends through the center of the spinal cord from the conus medullaris to the lower part of the fourth ventricle. It represents the embryonic ectodermal canal. **C., Cerebrospinal.** 1 The neural or craniovertebral canal formed by the skull and the spine, and containing the brain and spinal marrow. 2 The primitive continuous cavity of the brain and spinal cord, not infrequently more or less extensively obliterated in the adult, but in the brain modified in the form of the several ventricles and other cavities. **C., Cervical.** See **C. of Cervix uteri**. **C., Cervicouterine.** See **C., Uterine**. **C. of Cervix uteri**, that portion of the uterine canal that extends between the internal and the external os. **Canalis choledochus**, the common bile-duct. **C. of Chorda tympani**, a small canal in the temporal bone, between its squamous and petrous portions, parallel with the glaserian fissure; it transmits the chorda tympani nerve. **C., Ciliary.** See **C. of Fontana**. **C., Circumepiduncular**, the lateral ventricles of the brain. **C. of Cloquet.** See **C., Hyaloid**. **C., Cochlear**, the spiral and snail-like cavity of the cochlea, 25 to 30 mm. long. The base is turned inward toward the internal auditory meatus, and the apex outward toward the tympanum. **C., Connecting**, the arched or coiled portion of a uriniferous tubule, joining with a collecting tubule. **C. of Corti**, the transverse canal formed by the pillars of Corti, the base of which corresponds to the membrane basilaris. It extends over the entire length of the lamina spiralis. **C., Cotugno's.** **C. of Cotunnus.** See **Aqueduct of Cotunnus**. **C., Cranio-pharyngeal**, a fetal canal perforating the posterior part of the sphenoid bone and extending from the pharynx to the hypophysis and the epiphysis, it sometimes persists in infancy. **C., Craniovertebral.** See **C., Cerebrospinal**, and **C., Vertebral**. **C., Crural.** See **C., Femoral**. **Cs of Cuvier.** See **Cuvier's Canals**. **C., Cystic**, the cystic duct. **C., Deferent**, the vas deferens. **Cs, Demicircular.** See **Cs, Semicircular**. **C., Dental, Anterior**, one extending into the facial portion of the superior maxilla, it transmits the anterior dental vessels and nerves. **C., Dental, Inferior**, the dental canal of the inferior maxilla; it transmits the inferior dental nerve and vessels. **Cs, Dental, Posterior**, two canals in the superior maxilla. They transmit the superior posterior dental vessel and nerves. **Cs, Dentinal**, the minute canals in dentin, extending approximately at right angles to the surface of a tooth from the pulp-chamber into which they open, to the cementum and enamel. **Cs of Derivation**, anastomosing venous branches extending from deep to superficial veins. **C., Digestive.** See **C., Alimentary**. **Cs of Diploe**, canals in the

duplex of the cranium transmitting Breschet's veins. **C., Ejaculatory.** See *Duct, Ejaculatory*. **C. of Epididymis**, a convoluted tube, about 20 feet long when straightened, forming the epididymis and continuous with the vas deferens. **C., Ethmoid, Anterior**, one between the ethmoid and frontal bones; it transmits the nasal branch of the ophthalmic nerve and the anterior ethmoid vessels. **C., Ethmoid, Posterior.** See *C., Orbital, Posterior Internal*. **C., Eustachian**, one in the petrous portion of the temporal bone, containing a portion of the eustachian tube. **C., Facial**, the aqueduct of Fallopius; it transmits the facial nerve. **C., Fallopius.** See *C., Facial*. **C. of the Fallopius Tube.** See *Aqueductus fallopii*. **C., Femoral.** 1. The inner compartment of the sheath of the femoral vessels behind Poupart's ligament. 2. See *C., Hunter's*. **C. of Ferrein**, a triangular channel, supposed to exist between the free edges of the eyelids when they are closed, and to serve for conducting the tears toward the puncta lacrimalia during sleep. **C. of Fontana**, a series of small spaces formed by the interlacing of the connective-tissue fibers of the framework of the peripheral processes of the iris, situated in the angle of the anterior chamber, and serving as a medium for the transudation of the aqueous humor from the posterior to the anterior chamber of the eye. Syn., *Canal of Hovius Ciliary canal; Fontana's spaces*. **C.s, Galactophorous**, the lactiferous tubules of the mammary gland. **Canalis ganglionaris**, the spinal canal of the nodulus. **C. of Gartner**, in the female, the remains of the main portion of the wolffian duct of the embryo; it is a tube extending transversely along the broad ligament, and is the homolog of the vas deferens. **C., Genital**, in comparative anatomy, any canal designed for copulation or for the discharge of sex. **C. of Guidi.** See *C., Vidian*. **C., Hannover's**, the artificial passage produced between the anterior and posterior fibers of the zonules of Zinn by the injection of a viscous fluid. **C.s of Havers.** See *C.s, Haversian*. **C.s, Haversian**, canals in the compact substance of bone forming a wide-meshed network, and establishing communication between the medullary cavity and the surface of the bone. Their average diameter is $\frac{1}{35}$ inch, and they are lined by a continuation of the endosteum; they transmit blood-vessels, lymph-vessels, and nerves. **C., Hemal**, the ventral of the two canals, of which, according to R. Owen, the vertebrate animal is composed. It contains the heart and the other viscera, while the neural canal incloses the central nervous system. **C. of Heale**, a portion of the uriniferous tubules. **C., Hensen's**, the short vertical tube (1 mm. long and 0.5 mm. wide) connecting the blind extremity of the cochlear canal with the snail. Syn., *Canalis reuniens*. **C., Hepatic.** 1. The excretory duct of the liver.

2. The radicles of the hepatic duct. **C., Hernial**, one transmitting a hernia. **C., His'**, the thyroglossal duct of the fetus, of which the cecal foramen of the tongue is the vestige and which may persist during postnatal life. **C. of Hovius.** See *C. of Fontana*. **C. of Huguer.** See *C. of Chorila tympani*. **C., Hunter's**, a triangular canal formed in the adductor magnus muscle of the thigh; it transmits the femoral artery and vein and internal saphenous nerve. **C. of Huschke**, one formed by the junction of the tubercles of the annulus tympanicus. This is generally obliterated after the fifth year, but may persist through life. **C., Hyaloid**, a canal running anteroposteriorly through the vitreous body, through which, in the fetus, the hyaloid artery passes, to ramify on the posterior surface of the crystalline lens. **C. of the Hypoglossus**, the anterior condylar foramen. **C., Incisor**, a canal that opens into the mouth by an aperture just behind the incisor teeth of the upper jaw; it is formed by a groove on the adjoining surfaces of the superior maxillas, and has two branches that open into the nasal fossas. **C., Infraorbital**, a small canal running obliquely through the bony floor of the orbit; it transmits the infraorbital artery and nerve. **C., Inguinal**, a canal about $\frac{1}{4}$ inches long, running obliquely downward and inward from the internal to the external abdominal ring, and constituting the channel through which an inguinal hernia descends; it transmits the spermatic cord in the male and the round ligament of the uterus in the female. **C., Innominate.** See *Arnold's Innominate Canal*. **C., Intestinal**, that portion of the alimentary canal that is included between the pylorus and the anus. **C., Intralobular, Biliary**, the radicles of the bile-ducts, forming a fine network in and around the hepatic cells, and communicating with vacuoles in the cells. **C. of Jacobson.** See *C., Tympanic*. **C. of Kowalewsky.** See *C., Neurenteric*. **C., Lacrimal.** 1. The bony canal that lodges the nasal duct. 2. One of the lacrimal canaliculi. **C., Landzert's.** See *C., Cranio-pharyngeal*. **C., Lauth's.** See *C. of Schlemm*. **C. of Loewenberg**, that portion of the cochlear canal situated above the membrane of Corti. **C., Malar**, one in the malar bone transmitting the malar division of the temporomalar branch of the superior maxillary nerve. **C.s, Mandibular.** See *C., Dental, Inferior*. **C., Mastoid**, one opening just above the stylomastoid foramen and transmitting the auricular branch of the vagus nerve. **C., Maxillary.** See *C., Dental*. **C., Median.** 1. The central canal of the spinal cord. 2. The aqueduct of Sylvius. **C., Medullary.** 1. The hollow cavity of a long bone, containing the marrow. 2. See *C., Vertebral*. 3. The central canal of the spinal cord. 4. A haversian canal. 5. In embryology, the medullary tube. **C., Medullary, Cerebrospinal**, the central canal

of the spinal cord. **C., Membranous, of the Cochlea**, a canal in the cochlea, following the turns of the lamina spiralis; it is bounded by the basilar membrane, the membrane of Reissner, and the wall of the cochlea. **C.s, Membranous, Semicircular**. See **C.s, Semicircular**. **C. of Modiolus**. See **C., Spiral, of the Modiolus**. **C., Myelonal**, the central canal of the spinal cord. **C., Nasal**. 1. See **C., Lacrimal** (1). 2. An occasional canal found in the posterior portion of the nasal bone; it transmits the nasal nerves. **C., Nasolacrimal**. See **C., Lacrimal** (1). **C., Nasopalatine**. See **C., Incisor**. **Canalis nervi petrosi profundi minoris**, one in the petrosa transmitting the deep petrosal nerve. **Canalis nervi petrosi superficialis majoris**, one opening into the fallopian aqueduct and transmitting the great superficial nerve. **C., Neural**. See **C., Vertebral**. **C., Neurenteric** (of Kowalewsky), also called blastoporic canal, in the embryo, a passage leading from the posterior part of the medullary tube into the aenteron. **C., Neurocentral**. See **C., Vertebral**. **C. of Nuck**, a pouch of peritoneum which, in the female fetus descends for a short distance along the round ligament of the uterus into the inguinal canal; it is the analog of the processus vaginalis in the male. It sometimes persists after birth. **C.s, Nutritive**. See **C.s, Haversian**. **C., Obstetric**. See **C., Parturient**. **C., Obturator**, a canal in the ilium transmitting the obturator nerve and vessels. **C.s, Olfactory**, in the embryo, the nasal fossas at an early period of development. **C., Omphaloenteric**, in the embryo, a canal that connects the cavity of the intestine with the umbilical vesicle. **C., Orbital, Anterior Internal**. See **C., Ethmoid, Anterior**. **C., Orbital, Posterior Internal**, the posterior of two canals formed by the ethmoid bone and the orbital plate of the frontal bone. It transmits the posterior ethmoid vessels. **C., Palatine, Accessory Posterior**, one or two canals in the horizontal plate of the palate bone, near the groove entering into the formation of the posterior palatine canal. **C., Palatine, Anterior**, formed by the union of the incisive canals, it opens on the palate behind the incisor teeth. **C., Palatine, Descending**. See **C., Palatamaxillary**. **C., Palatine, External, Small**, a small canal in the pyramidal process of the palate bone, close to its connection with the horizontal plate. It transmits the external palatine nerve. **C., Palatine, Posterior**. **C., Palatine, Smaller**. See **C., Palatamaxillary**. **C., Palatine, Superior**, one formed by the palate bone and the superior maxilla, transmitting the large palatine nerve and blood-vessels. **C., Palatamaxillary**, one formed by the outer surface of the palate bone and the adjoining surface of the superior maxilla. It transmits the large palatine nerve and blood-vessel. **C., Parturient**, the channel through which the fetus passes in parturition, comprising the

cavity formed by the uterus and vagina considered as a single canal. **C., Pelvic**, the canal of the pelvis from the superior to the inferior strait. **C., Perivascular**, the lymph-spaces about the blood-vessels. **C. of Petit**, a space, intersected by numerous fine interlacing fibers, existing between the anterior and posterior laminae of the suspensory ligament of the crystalline lens. It extends from the periphery of the lens nearly to the apex of the ciliary processes, and transmits the secretion from the posterior chamber. **C., Petromastoid**, a small canal, not always present, situated at the angle of union between the mastoid and petrous bones. It transmits a small vein from the middle fossa of the skull to the transverse sinus. **C.s, Petrosal**, two canals on the upper surface of the petrous portion of the temporal bone, transmitting the large and small superficial petrosal nerves. **C., Pharyngotympanic**, one in the embryo developing into the eustachian canal and the tympanum. **C., Plasmatic**, a haversian canal. **C., Pore**. See **C., Porous**. **C., Porous**, a canal in the ovule, supposed to serve for the entrance of the spermatozooids in fecundation. **C., Portal**, the space in the capsule of Glisson of the liver, in which the portal vein, hepatic artery, and bile-duct lie. **C., Primitive**, the vertebral canal of the embryo. **C.s, Pseudostomatous**, the processes of branched ends that extend from a subepithelial or endoepithelial layer to the free surface, their free ends forming the pseudostomas. **C., Pterygoid**. See **C., Vidian**. **C., Pterygopalatine**, one formed by the root of the internal pterygoid plate of the sphenoid bone and the sphenoid process of the palate bone. It transmits the pterygopalatine vessels and nerve. **C., Pulmoaortic**. See **Pulmoarteriosus**. **C. of the Quadrigemina**, the sylvian aqueduct. **Canalis radicus**, one to the root of a tooth. **C.s of Recklinghausen**, minute channels supposed to exist in all connective tissue, which are directly continuous with the lymphatic vessels, and hence may be said to form their origin. **C., Recurrent, Canalis recurrens**. See **C., Vidian**. **C., Reichert's**. See **C., Heusen's**. **C. of Reissner**. See **C., Membranous, of the Cochlea**. **C. of Rivinus**, the duct of the sublingual gland. **C. of Rosenthal**. See **C., Spiral, of the Modiolus**. **C., Sacculocochlear**, one connecting the sacculus and the cochlea. **C., Sacculotricular**, one connecting the sacculus and the utricle. **C., Sacral**, the continuation of the vertebral canal in the sacrum. **C.s, Saviotti's**, fine artificial passages formed between the secreting cells of the pancreas by the forcible injection of a colored fluid into the ducts of that organ. **C. of Schlemm**, an irregular space or plexiform series of spaces occupying the sclerocorneal region of the eye; it is regarded by some as a venous sinus, by others as a lymph-channel. **C.s, Semicir-**

cular, bony canals of the labyrinth of the internal ear. They are three in number,—the external, superior, and posterior,—and contain the membranous semicircular canals. **C., Semicircular, Anterior, C., Semicircular, Anterior Vertical.** See **C., Semicircular, Superior.** **C., Semicircular, External,** that one of the semicircular canals of the labyrinth having its plane horizontal and its convexity directed backward. **C., Semicircular, Frontal.** See **C., Semicircular, Superior.** **C., Semicircular, Horizontal.** See **C., Semicircular, External.** **C., Semicircular, Inferior, C., Semicircular Inner, C., Semicircular, Internal.** See **C., Semicircular, Posterior.** **C., Semicircular, Lateral.** See **C., Semicircular, External.** **C., Semicircular, Osseous.** See **C., Semicircular.** **C., Semicircular, Posterior,** that one of the semicircular canals having its convexity directed backward and its plane almost parallel to the posterior wall of the pyramid. **C., Semicircular, Posterior Vertical, C., Semicircular, Sagittal.** See **C., Semicircular, Posterior.** **C., Semicircular, Superior,** that one of the semicircular canals having its convexity directed toward the upper surface of the pyramid. **C.s, Seminal,** the seminiferous tubules. **C., Serous,** any minute canal connected with the lymph-vessels and supposed to be filled with lymph. **C., Sheathing,** the communication between the cavity of the tunica vaginalis of the testicle and the general peritoneal cavity. It soon closes in man, leaving the tunica vaginalis a closed sac. **C., Spermatic.** 1. The vas deferens. 2. The inguinal canal in the male. **C., Sphenopalatine.** See **C., Pterygopalatine.** **C., Spinal.** See **C., Vertebral.** **C., Spiral, of the Cochlea,** one that runs spirally around the modiolus, taking two turns and a half, diminishing in size from the base to the apex, and terminating in the cupula. **C., Spiral, of the Modiolus,** a small canal winding around the modiolus at the base of the lamina spiralis. **C., Spiroid, of the Temporal Bone.** See **C., Facial.** **C. of Steno,** the duct of the parotid gland. **C. of Stilling.** See **C., Hyaloid** and **C., Central, of Spinal Cord.** **C., Suborbital.** See **C., Infraorbital.** **C., Supraorbital,** one at the upper margin of the orbit. It transmits the supraorbital artery and nerve. **C., Tarsal,** one between and below the heads of the abductor hallucis, transmitting the vessels and nerves to the sole of the foot. **C., Temporal, C., Temporomalar.** See **C., Zygomaticotemporal.** **C., Thoracic,** the thoracic duct. **Canales tubæformes,** the semicircular canals. **Canalis tuberculorum quadrigemorum,** the aqueduct of Sylvius. **C., Tuboovarian,** the oviduct. **C., Tympanic,** that opens on the lower surface of the petrous bone, between the carotid canal and the opening for the internal jugular vein. It transmits Jacobson's nerve. **C., Uterine,** the cavity of the uterus, including the body and neck.

C., Uterocervical, the cavity of the cervix uteri. **C., Uterovaginal.** 1. The common canal formed by the uterus and vagina. 2. In embryology, the duct of Müller. **C., Vaginal,** the canal of the vagina. **C., Vaginoperitoneal,** the inguinal canal. **C., Vascular.** See **C.s, Haversian.** **C., Vector,** the oviduct. **C., Venous,** the ductus venosus. **C., Vertebral,** the canal formed by the vertebrae, it contains the spinal cord and its membranes. **C., Vidian,** a canal of the sphenoid bone at the base of the internal pterygoid plate, opening anteriorly into the sphenomaxillary fossa, and posteriorly into the lacerated foramen. It transmits the vidian nerve and vessels. **C.s, Volkmann's,** small canals found in the circumferential lamellæ of long bones and transmitting blood-vessels; they communicate with the haversian canals. **Canalis vomeris,** one lying between the vomer and the lower surface of the sphenoid, and transmitting blood-vessels to the nose. **C.s, Vomerobasilar, C.s, Vomerospheoid, Lateral,** small lateral canals lying between the vomer and the sphenoid, transmitting blood-vessels. **C., Vulvar,** the vestibule of the vagina. **C., Vulvouterine,** the vagina. **C., Vulvovaginal.** 1. The vagina and the vulva considered as a single canal. 2. The orifice of the hymen. **C. of Wirsung,** the pancreatic duct. **C. of Wolff.** See **Wolffian Duct.** **C., Zygomatic.** See **C., Zygomaticotemporal.** **C., Zygomaticofacial.** See **C., Malar.** **C., Zygomaticotemporal,** the temporal canal of the malar bone, running from its orbital to its temporal surface. It transmits a branch of the superior maxillary nerve.

Canalicular (kan-al-ik'-u-lar) [canals]. Canal-shaped.

Canaliculus (kan-al-ik'-u-lus) [L.]. 1. A small canal; especially that leading from the punctum to the lacrimal sac of the eye. 2. Any one of the minute canals opening into the lacunæ of bone. **Canaliculi accessorii,** inconstant canals at the outer edge of the anterior condylar foramen, for the transmission of veins. **C. of Communication, C. communicationis,** a canal at the junction of the petrosa and the mastoid portion of the temporal bone, transmitting a vein from the middle fossa of the skull to the transverse sinus. **Syn., Aqueductus communicationis.** **C. laqueiformis.** See **Henle's Loop.** **Canaliculi medullares.** See **Canals, Haversian.** **C. pharyngeus.** See **Canal, Pterygopalatine.** **Canaliculi, Serous.** See **Canals of Recklinghausen.** **Canaliculi vasculosi,** haversian canals.

Canalization (kan-al-eez'-shun) [canals]. 1. The formation of canals, as in tissues, etc. 2. A system of wound-drainage without tubes.

Canary-seed (kan-a'-re-sêd). The hulled seeds of *Phalaris canariensis*; it is used in emollient poultices.

Cancelloous (*kan'sel-us*) [*cancelli*, lattice-work]. Resembling lattice-work, as the tissue in the articular ends of long bones.

Cancer (*kan'ser*). 1. See *Carcinoma*. 2. Any kind of malignant growth. Syn., *Malignant disease*. **C.**, **Acinous**, **C.**, **Acute**, medullary carcinoma or medullary sarcoma. **C.**, **Adenoid**, a malignant form chiefly composed of tubules lined with epithelium; adenocarcinoma. **C. à deux**, cancer attacking both husband and wife, or successively a man's first and his second wife. **C. albus**. See *Cancerum oris* and *Noma*. **C. anthracinus**, one beginning as a black speck and developing into a mulberry-like growth. **C.**, **Apinoid**, a hard cancer, so called because of the cleanness of its section. **C.**, **Apioid**, a hard cancer resembling an immature pear in section. **C. aquaticus**. Synonym of *Gangrenous stematitis*. **C.**, **Aran's Green**, chloroma, malignant lymphoma of the orbital cavity associated with grave leukemia, and tending to form metastases through the lymphatic system. Syn., *Cancer vert d'Aran*. **C.**, **Areolar**. See *Carcinoma*, *Colloid*. **C.-bandage**, a crab-shaped bandage, a split cloth of eight tails. **C. of the Blood**, leukocythemia. **C.**, **Cavernous**, a colloid carcinoma in which the alveoli have become absorbed. **C.-cell**, an epithelial cell of peculiar, distorted shape, found in the interior of cancer-nests. It is an ordinary epithelial cell altered in outline by pressure. **C.**, **Cellular**, **C.**, **Cerebriform**. See *Carcinoma*, *Soft*, and *Sarcoma*. **Encephaloid**. **C.**, **Chimney-sweep's**. See *Carcinoma*, *Chimney-sweep's*. **C.**, **Chondroid**, a hard cancer, which on section exhibits a shining, bluish-white appearance. **C.**, **Chronic**, a scirrhous cancer. **C.**, **Cicatrizing**, a form of hard cancer marked by atrophy and shrinking. **C.**, **Clay-pipe**. See *C.*, *Smoker's*. **C.**, **Cohnheim's Theory of the Embryonic Origin of**, according to which the fetal life portions of the epithelium become nipped off and included in the connective tissue; these portions in later life, if stimulated to activity, give rise to a cancerous growth. See *Inclusion theory*. **C.**, **Colloid**. See *Carcinoma*, *Colloid*. **C.**, **Connective-tissue**. See *C.*, *Hard*. **C.**, **Dendritic**, a papilloma. **C.**, **Duct**, a form of columnar epithelioma. **C.**, **Eburneous**. See *Necroderma*. **C.**, **Embolie**, one due to embolic infection. **C.**, **Encephaloid**. See *Carcinoma*, *Encephaloid*. **C. en cuirasse**, disseminated cancer of the skin of the thorax. **C.**, **Fasciculated**, a growth called sarcoma. **C.**, **Fungoid**, **C.**, **Fungous**, **C.**, **Hematoid**. See *Sarcoma*, *Encephaloid*, *Angioma*, *Carcinoma*, and *Angiomyxoma*. **C.**, **Gelatiniform**, **C.**, **Gelatinous**, a colloid cancer. **C.**, **Glaucoid**, **C.**, **Green**. See *C.*, *Aran's Green*. **C.**, **Hard**, one containing an excess of fibrous tissue. **C.**, **Inclusion Theory of**. See *C.*, *Cohnheim's Theory of the Embryonic Origin of*. **C.**, **Jacket**, a continuously spreading cancerous infiltration of the

superficial tissues. **C.-juice**, the milky fluid yielded by the cut surface of a cancer on scraping. **C.**, **Lipomatous**, one marked by many fat-cells in the stroma. **C.**, **Mammary**. 1. One affecting a mammary gland. 2. See *C.*, *Mastoid*. **C.**, **Mastoid**, a form of medullary sarcoma presenting on section the appearance of boiled cow's tallow. **C.**, **Medullary**. See *C.*, *Soft*. **C.**, **Melanotic**, a pigmented form. **C.**, **Nephroid**, a form of carcinosarcoma having the appearance of a kidney in section. **C.-nest**, a mass of cancer cells. **C.**, **Osteoid**. 1. One containing a deposition of osseous material. 2. See *Osteosarcoma*. 3. See *Osteochondroma*. **C.**, **Osteolytic**, canceromatous infiltration of bone without distinct tumor formation. **C. phagedæna**, one beginning as a pustule which undergoes sudden ulceration and rapid progression. **C.**, **Primary**, **C.**, **Primitive**, one not due to infection from some preceding cancerous manifestation. **C. pullulans**, an ulcerating cancer which forms granulations. **C.**, **Pulpy**, **C.**, **Pultaceous**. See *C.*, *Colloid*. **C.**, **Ramose**, a form of hard cancer with branches. **C.**, **Rodent**. 1. Lupus. 2. Rodent ulcer. **C.**, **Scirrhous**. See *C.*, *Hard*. **C.**, **Smoker's**, epithelioma of the lip or mouth attributed to tobacco smoke or the irritation of a pipe. **C.**, **Soft**, one in which the cells predominate, the connective tissue being very small in amount. **C.**, **Solanoid**, one having the appearance of a potato in section. **C.**, **Soot**. See *Carcinoma*, *Chimney-sweep's*. **C.**, **Stone**, which is carcinoma. **C. terebrans**, an epithelioma. **C.**, **Tubular Epithelial**. See *Carcinoma*. **C. verrucosus**, epithelioma with wart-like epidermal hypertrophy. **C.**, **Villous**. See *Papilloma*. **C. xanthosus**. See *C.*, *Aran's Green*.

Cancerin (*kan'ser-in*) [*caner*]. The name given to a ptomain obtained from the urine in cases of carcinoma of the uterus. It is a white substance, crystallizing in fine needles and soluble in alkaline solutions. Its formula is $C_8H_{11}NO$.

Cancerism (*kan'ser-izm*). The tendency to cancerous formation.

Canceroderm (*kan'ser-o-derm*). A T. B. Harris name for acneiform cutaneous eruptions in one and number, which appear in certain people who are not aged, and which he believes bear a relation to malignant growths.

Canceromyces (*kan'ser-o-mi's-es*). See *Candidopodium cancerigenes*.

Cancerous (*kan'ser-us*). Having the qualities of a cancer, malignant.

Cancrionæba macroglossia (*kan'kre-næ'ba mak-ro-glos'si-ah*). An encysted organism to have been found in epithelial cysts, and of which the spores are identical with Plummer's bodies.

Cancrine (*kan'kre-n*). Cancerous.

Cancroid (*kan'kre-oid*) [*caner*]. 1. Cancer-like. 2. An epithelioma. 3. A variety of leiod. **C.**, **Corpuscles**. See *Corpuscles*, *Cancroid*. **C.**, **Dermic**, ephe-

fioma attacking all the layers of the skin. **C.**, **Follicular**, epithelioma arising in the hair-follicles or in the glands of the skin. **C.**, **Papillary**, epithelioma affecting the papillary layer and subsequently the other layers of the skin. **C.**, **Ulcer**. See *Rodent Ulcer*.

Cancrum (*kan'kro-in*) [*cancer*]. A substance said to be identical with neurin) introduced by Adamkiewicz as a material for hypodermatic injection in cases of malignant disease, it being regarded by him as an alexin destructive of cancer tissue.

Cancrum (*kan'krum*) [*cancer*]. A cancer or rapidly spreading ulcer. **C. oris**, a disease of childhood between the ages of one and five, characterized by the formation of foul, deep ulcers of the buccal surfaces of the cheeks or lips. There is but slight pain, but the prostration is great, and death usually results from exhaustion or blood-poisoning. The disease is bacterial, poor hygiene surroundings and a debilitated system being predisposing causes. Syn., *Canker of the mouth*; *Gangrenous stomatitis*; *Noma*; *Gangrenous ulceration of the mouth*.

Canella (*kan'el-ah*) [dim. of *canna*, a reed]. The bark of *C. alba* deprived of its corky layer and dried. It is a native of the West Indies, and is an aromatic tonic and bitter stomachic. Dose of the *powdered bark* 15-20 gr. (1-2 Gm.). It is official in the U. S. P.

Cane-sugar. See *Saccharose* (1).

Canaceaeus (*kan-e-ku'-sius*) [*canica*, a kind of bean]. *Enturus* eous.

Canine (*kan'-nin*) [*canis*, a dog]. Partaking of the nature of, relating to, or resembling a dog or the sharp tearing-teeth of mammals, located between the incisors and the molars. **C. Appetite**, bulimia. **C. Eminence**, a prominence on the outer side of the maxilla. **C. Fossa**. See *Fossa Canine*. **C. Laugh**, a sudden smile or grin. **C. Madness**, rabies; hydrophobia. **C. Muscle**, the levator anguli oris. **C. Teeth**, the cuspid teeth next to the lateral incisors, so called from their resemblance to a dog's teeth. Syn., *Canoides*; *Cynodontes*; *Dentes angulares*; *Dentes canini*; *Dentes lanjarii*; *Eye-teeth*.

Canties (*kan'-ich'-eez*) [L.]. Poliosis; whiteness, blanching of the hair.

Canker (*kan'ker*) [*cancer*, a crab]. An ulceration of the mouth, or any ulcerous or gangrenous sore; *cancrum oris*; in farriery, a fetid abscess of the horse's foot. See *Cancrum oris*. **C.-rash**. Synonym of *Scarlatina*.

Canna (*kan'-ah*) [*kanna*, a cane]. A genus of large leaved rhizomatous plants. *C. indica* has an astringent and stimulant root; it is alterative, diuretic, and diaphoretic. The rhizome of *C. speciosa* affords canna-berber a substitute for arrowroot.

Cannabene (*kan'-ah-en*). See under *Cannabis*. **Cannabin** (*kan'-ah-in*). A crystalline alkaloid from Indian hemp, it is hypnotic. Dose

1½-4 gr. (0.097-0.26 Gm.). **C. Tannate**, a yellow, astringent powder, soluble in alkaline water or alcohol; it is hypnotic and sedative. Dose 2-10 gr. (0.13-0.6 Gm.).

Cannabindon (*kan-a-bin'-don*), $C_8H_{12}O$. A dark, cherry-red syrup obtained from Indian hemp; soluble in alcohol, ether, and oils. It is hypnotic and narcotic. Dose ½-2 gr. (0.03-0.13 Gm.).

Cannabinin (*kan-ab'-in-in*) [*cannabis*]. A volatile alkaloid from Indian hemp.

Cannabinol (*kan-ab'-in-ol*), $C_{18}H_{24}O_2$. A red oil obtained by fractional distillation from Indian hemp, and supposed to be its most active ingredient.

Cannabinon, **Cannabinone** (*kan-ab'-in-on*) [*cannabis*]. An amorphous bitter resinoid from Indian hemp, used as a hypnotic. Dose 1-3 gr. (0.065-0.2 Gm.).

Cannabis (*kan'-ah-is*) [L.]. Hemp. Indian hemp. The flowering tops of *C. sativa*, of which there are two varieties, *C. indica* and *C. americana*, the former being the more potent; they contain a resin, cannabin, and a volatile oil, from which are obtained *cannabene*, $C_{18}H_{20}$, a light hydrocarbon, and *cannabene hydrid*, a crystalline body. It is antispasmodic, narcotic, and aphrodisiac. In large doses it produces mental exaltation, intoxication, and a sensation of double consciousness. It is used in migraine, in paralysis agitans, in spasm of the bladder, in sexual impotence, in whooping-cough, in asthma, and in other spasmodic affections. *Bang*, *blang*, *cunyah*, *churrus*, and *hashish* are the various Indian names by which the drug is known. **C. indica** (U. S. P.), Indian cannabis. Dose 1 gr. (0.065 Gm.). **C. indica**, **Extract of** (*extractum cannabis indica*, U. S. P.). Dose ½-1 gr. (0.01-0.065 Gm.). **C. indica**, **Fluidextract of** (*fluidextractum cannabis indica*, U. S. P.), an alcoholic preparation. Dose 1-5 min. (0.06-0.3 Cc.). **C. indica**, **Tincture of** (*tinctura cannabis indica*, U. S. P.), contains 10% of the drug. Dose 20 min.-1 dr. (1.3-4.0 Cc.).

Cannula (*kan'-u-lah*) [dim. of *canna*, a tube]. A tube used for withdrawing fluids from the body. It is generally fitted with a pointed rod for puncturing the integument.

Cannular, **Cannulate** (*kan'-u-lar*, *-lat*) [*cannula*]. Tubular; channeled.

Canor (*ka'-nor*) [L.; pl. *canores*]. A musical sound. **C. stethoscopicus**. See *Metallic Tinkling*.

Canquoin's Paste. A paste of flour, water, and zinc chlorid; it is a powerful escharotic.

Cantani's Diet. An exclusive meat-diet in diabetes.

Cantering Rhythm (*kan'-ter-ing ritm*). See *Bruit de Galop*.

Canthal (*kan'-thal*) [*xanthos*, a canthus]. Relating to a canthus.

Cantharene (*kan'-thar-en*), $C_{10}H_{12}O_4$. A compound obtained from cantharidin by action of hydriodic acid.

Cantharidal (*kan-thar'id-al*) [*cantharides*]. Relating to or containing cantharides. **C. Colloidion** (*colloidium cantharidatum*, U. S. P.). See *Colloidion*, *Cantharidal*.

Cantharidated (*kan-thar'id-a-ted*). Containing cantharides.

Cantharides (*kan-thar'id-ēz*). [*kantharidēs*, a blistering Spanish fly]. The dried body of a species of beetle, *C. vesicatoria* (nat. ord. *Coleoptera*). It contains a powerful poisonous principle, cantharidin (*q. v.*). Locally applied, cantharidis is a rubefacient and vesicant; internally it is an irritant, causing pain and vomiting. In toxic doses it produces severe gastro-enteritis, strangury, and priapism. It is used as an external counterirritant in the form of "blisters." Internally it is employed as a stimulant to the genitourinary mucous membrane, especially in cystitis, atony of the bladder, amenorrhea, etc.; also in skin diseases. **C. Cerate** (*ceratum cantharidis*, U. S. P.), cantharides, 35; resin, 20; yellow wax 20; lard, 35 parts; liquid petrolatum, *q. s.* **C. Liniment**, cantharides, 15 parts; oil of turpentine, *q. s.* ad 100. **C. Ointment** (*unguentum cantharidis*, B. P.), cantharides, yellow wax, olive-oil. **C. Paper** (*charta epispastica*, B. P.), blistering paper, contains cantharides, 1; Canada turpentine, 1; olive-oil, 4; spermaceti, 3; white wax, 8; water, 10 parts, spread on paper. **C. Plaster** (*emplastrum cantharidis*, B. P.), cantharides, yellow wax, prepared suet, prepared lard, resin. **C. Tincture** of (*tinctura cantharidis*, U. S. P.), contains 10% of the drug. Dose 3 to 10 min (10-30 mg C.). **C. Vinegar** of (*vinum cantharidis*, B. P.), of the strength of 1 to 8.

Cantharidic (*kan-thar'id-ik*). Relating to or obtained from cantharides. **C. Anhydrid**. Synonym of *Canthariden*.

Cantharidin (*kan-thar'id-in*) [*cantharides*], $C_{10}H_{12}O_4$. The bitter principle contained in Spanish flies and other insects; it crystallizes in prisms or leaflets, and melts at 218°. It has an extremely bitter taste, and produces blisters on the skin. See *Canthares*.

Cantharidism (*kan-thar'id-izm*) [*cantharides*]. Cantharidal poisoning. **C.**, External, poisoning by absorption from a cantharidal blister.

Cantharis (*kan'thar-is*). See *Cantharides*.

Canthectomy (*kan-thek'to-me*) [*canthus*; *ectomy*, a cutting out]. Excision of a canthus.

Canthitis (*kan-thi'tis*) [*canthus*; *itis*, inflammation]. Inflammation of a canthus.

Canthoplasty (*kan'-tho-plas-tye*) [*canthus*; *plastis*, to form]. An operation for increasing the size of the palpebral fissure by cutting the outer canthus.

Canthorrhaphy (*kan-thor'-a-fe*) [*canthus*, *rhaphe*, a suture]. An operation to reduce the size of the palpebral fissure by suture of the canthus.

Canthotomy (*kan-thal'-o-me*) [*canthus*; *tomē*, a cutting]. Surgical division of a canthus.

Canthus (*kan'thus*) [*canthos*, canthus]. The angle formed by the junction of the eyelids.

Canula (*kan'-u-lah*). See *Cannula*.

Caoutchouc (*kaot'chook*) [S. A.] Rubber. The chief substance contained in the milky juice that exudes upon incision of a number of tropical trees belonging to the natural order *Euphorbiaceae*, *Artocarpaceae*, and *Apocynaceae*. The juice is a vegetable emulsion, the caoutchouc being suspended in it in the form of minute translucent globules. When pure, caoutchouc is nearly white, non-elastic, and glutinous; it swells up in water without dissolving; the best solvents are carbon disulfide and chloroform. It melts at about 150° C. and decomposes at 200° C.

Cap (*kaf*) [AS., *cappe*]. 1. See *Tegmenium*. 2. The tissue covering the outer end of a lymph follicle. **C.**, Enamel, the cutaneous enamel organ covering the top of the growing tooth-papilla. **C.**, Nuclear, a collection of chromophile substance on one side of the nucleus of a cell.

Capacity (*kapas'ite*) [*capax*, capacity]. 1. The power of holding or containing mental or physical ability. 2. *Capacitas*. **C.**, Testamentary, a legal term signifying the degree of mental ability requisite for making a valid will. **C.**, Vital, the total amount of air that can be expelled by the most forcible expiration after the deepest inspiration.

Capillaraneurysm (*kap-i-lar-ā-neu-rizm*) [*capillus*; *aneurysma*, a widening]. Excessive dilatation of a capillary.

Capillarectasia (*kap-i-lar-ek'tā-zi-ah*) [*capillus*; *ectasia*, a stretching out]. Dilatation of the capillaries.

Capillarity (*kap-i-lar'itee*) [*capillary*]. 1. Capillary attraction, the force that causes fluids to rise in fine tubes or pores. 2. The condition of being capillary.

Capillary (*kaf'il-a-ree*) [*capillus*]. 1. Hair-like, relating to a hair to a hair-like filament, or to a tube with a hair-like bore.

FROM A SECTION OF THE PANCREAS OF ADULT MAN.—JACOBI.

2. A minute blood vessel connecting the smallest ramifications of the arteries with

these of the veins. **C. Attraction.** See *Capillarity*. **C. Bronchitis.** See *Bronchitis*, *Capillary*. **C. Fissure, C. Fracture,** a linear fracture, without displacement. **Capillaries, Meigs',** the branching capillaries discovered by A. V. Meigs between the muscular fibers of the human heart. **C. Nevus.** See *Nevus* (2). **C. Pulse,** pulsation of the capillaries sometimes seen in aortic regurgitation. **C. Vessels,** the capillaries.

Capillitium (*kap-il-ish'e-um*) [L.]. The hair of the head, or the portion of the scalp thus covered.

Capillose (*kap'il-dz*) [*capillosus*]. Hairy.

Capistratum (*kap-is-tra-shun*). See *Phimosis*; also *Trismus*.

Capistrum (*kap-is'-trum*) [L., "a muzzle or halter"; pl., *capistra*]. 1. A bandage for the head or lower jaw. Syn., *Capelina*. 2. *Trismus*.

Capital (*kap'il-ol*) [*caput*]. 1. Pertaining to the head, or to the summit of a body or object. 2. Of great importance, as a *capital* operation in surgery.

Capitatum (*kap-it-a'-tum*). The large bone of the carpus, the os magnum.

Capitellum (*kap-it-el'-um*) [dim. of *caput*]. The rounded, external surface of the lower end of the humerus.

Capitium (*kap'e'-she-um*) [L.]. A bandage for the head, it may be triangular or four-cornered. **C. magnum, C. quadrangulare, C. quadratum,** a four-cornered head bandage. **C. minus, C. triangulare,** a three-cornered head bandage.

Capitones (*kap'il-dn-ez*) [L.]. Fetuses with heads too large for unassisted delivery.

Capitulum (*kap-it'-u-lum*) [L., "a small head"]. A little head. **C. of Santorini,** a small elevation on the apex of the arytenoid cartilage, corresponding in position to the posterior extremity of the vocal band.

Capnomor (*kap'-na-mor*) [*καπνός*, smoke; *μορφα*, form]. $C_{10}H_{12}O_2$. A transparent, colorless, oily fluid, a constituent of smoke obtained from the heavy oil of tar. It dissolves caoutchouc.

Caparris (*kap'-ar-is*) [L., "the caper-bush"]. A genus of shrubs including the caper-bush, *C. spinosa*. Its flower-buds (*capers*) are pickled or made into sauce. The bark of the root and the flowers are official remedies in some countries. It is diuretic, cathartic, depurative, stimulant. *C. aphylla*, a shrub of India, is esteemed in the treatment of fevers and affections of the joints. *C. coriaria* is a native of Peru; the fruit is antispasmodic and antihysterical. The root-bark of *C. foveolensis*, of South America, is rubefacient, the root diuretic, the leaves and flowers antispasmodic.

Capranica's Reaction for Bile-pigments. Add to the solution chloroform containing some bromin, and shake; it becomes first green, blue-violet, yellowish red, and finally colorless. If the green or blue solution is shaken with HCl, the color is destroyed by

the acid. **C.'s Reaction for Guanin.** 1. A warm solution of guanin hydrochlorid with a cold saturated solution of picric acid gives a yellow precipitate occurring as silky needles. 2. Add to a guanin solution a concentrated solution of potassium ferricyanid, a yellowish-brown prismatic precipitate is formed. 3. On the addition of a concentrated solution of potassium chromate to guanin solutions an orange-red crystalline precipitate is formed. It is very insoluble in water.

Caprate (*kap'-rdi*). A salt of capric acid.

Capric (*kap'-rik*) [*capra*, a goat]. Relating or belonging to, or having the odor of, a goat.

C. Acid. See *Acid, Capric*.

Caprin (*kap'-rin*) [see *Capric*]. An oily and flavoring constituent of butter; glycerol caprate.

Caprinic (*kap'-rin-ik*). See *Caprate*.

Caprinic (*kap'-rin-ik*). See *Capric*.

Caprizant (*kap'-ri-zant*) [see *Capric*]. Leaping; of irregular motion, applied to the pulse.

Caproate (*kap'-ro-ät*). A salt of normal caproic acid.

Caproic (*kap-ro'-ik*). See *Capric*. **C. Acid.** See *Acid, Caproic*. **C. Anhydrid,** $C_{12}H_{22}O_2$, a neutral oily liquid.

Caproin (*kap'-ro-in*). A fat, resembling caprin, found in goat's butter.

Caprone (*kap'-rön*) [see *Capric*], $C_{12}H_{22}O_2$. Caproic ketone; a clear, volatile oil found in butter, and forming the larger part of the oil of rue.

Caproyl (*kap'-ro-il*). 1. $C_6H_{11}O$. A hypothetical radicle. Syn., *Hexoyl*. 2. C_6H_{13} , a radicle. Syn., *Hexyl*.

Caproylamin (*kap-ro-il'-am-in*) [*caproyl*; *amin*], $C_6H_{13}N$. Hexylamin. A ptomain formed in the putrefaction of yeast.

Caprylic Acid (*kap-ril'-ik*). See *Acid, Caprylic*.

Capsaicin (*kap-sa'-is-in*). See *Capsicin*.

Capsicin (*kap'-sis-in*). 1. $C_8H_8O_2$. The active principle of Cayenne pepper, found in the pericarp and placenta of *Capsicum fastigiatum*, and soluble in alcohol, ether, benzene, and fixed oils. It is a thick, yellowish-red substance, and its vapors are intensely acrid. Dose $\frac{1}{10}$ – $\frac{1}{4}$ gr. (0.006–0.016 Gm.). 2. A volatile alkaloid from capsicum, occurring as an oily liquid devoid of pungency.

Capsicol (*kap'-sik-ol*) [*capsicum*; *oleum*, oil]. A red oil obtainable from the oleoresin of capsicum.

Capsicum (*kap'-sik-um*) [*capsa*, a box]. Cayenne pepper. The fruit of *C. fastigiatum*, native to tropical Africa and America. Its odor and hot taste are due to a volatile oil, *capsicin*, $C_8H_8O_2$, which is irritant to the skin and mucous membranes. Internally it is a stomachic, tonic, diuretic, and aphrodisiac. It is useful in atonic dyspepsia, flatulent colic, and intermittent fever. *C. annuum* is the common red pepper of the garden. **C., Fluidextract of** (*fluidextractum capsici*, U. S. P.). Dose 5 min.–1 dr. (0.3–4.0 Cc.).

- C. Liniment**, 1 in 10, for chest affections, rheumatism, etc. **C., Oleoresin of** (*oleoresina capsici*, U. S. P.). Dose $\frac{1}{2}$ gr. (0.03 Gm.). **C. Plaster** (*emplastrum capsici*, U. S. P.), prepared from the oleoresin and adhesive plaster. **C., Tincture of** (*tinctura capsici*, U. S. P.), contains 10% of capsicum. Dose 5-30 min. (0.3-2.0 Cc.).
- Capsitis** (*kapsi'tis*). Same as **Capsulitis**.
- Capsotomy** (*kaps-ot'o-mi*). See **Capulotomy**.
- Capsula** (*kaps'u-lah*) [L., "a small box"]. 1. The internal capsule of the brain; it is the thick layer of fibers between the caudatum and thalamus mesial and the lenticula lateral, it is continuous with the crura caudad, and its expansion is called the *corona*. 2. See **Capule**.
- Capsular** (*kaps'u-lar*) [*capule*]. Pertaining to a capsule. **C. Cataract**, an opacity of the capsule of the crystalline lens. **C. Hemiplegia**, a hemiplegia due to a lesion in the internal capsule.
- Capsulation** (*kaps-u-la'shun*) [*capsule*]. The act or process of inclosing in capsules.
- Capule** (*kaps'ul*) [L., *of capsula*, a chest]. A receptacle or bag. In pharmacy, a small, spheroid shell composed of glycerol and gelatin, divided so that the parts fit together like a box and cover. It is used for the encapsulation of nauseous medicines. **C., Acoustic**. See **C., Auditory**. **C., Adipose**. See **C. of the Kidney**. **C., Aqueous**, **C. of the Aqueous Humor**, Descemet's membrane. **C., Articular**. See **Ligament, Articular**. **C., Atrabiliary**. See **C., Suprarenal**. **C., Auditory**, the primitive auditory organ, formed by the invagination of the nervous stratum of the epiblast. See also **Vestibule, Auditory**. **C., Bonnet's**, the posterior portion of the sheath of the eyeball. **C., Bowman's**, the covering of the tuft of vessels of a renal glomerule. It is the beginning of the uriniferous tubule. **C., Bowman-Müller's**. See **C., Bowman's**. **C., Brain**. See **Caput** (1). **C., Cartilage**, **C. of a Cartilago-cell**, the lining cartilage cavity containing the cartilage-cells. **C., Crystalline**. See **C. of the Lens**. **C., External**, a layer of white nerve fibers forming part of the external boundary of the lenticular nucleus. **C., Fibrous**. See **Ligament, Capsular**. **C. of Glisson**. See **Glisson's Capsule**. **C.s., Glutoid**, gelatin capsules treated with formaldehyde. **C., Hemorrhoidal**, a metal, cone-shaped device for applying Vienna paste to a hemorrhoid. **C., Hyaloid**. See **Hyaloid membrane**. **C., Internal**, a layer of nerve fibers on the inner side of the optic thalamus and on the nucleus which it separates from the lenticular nucleus, and constituting the continuation upward of the crura caudal. **C. of the Kidney**, the fat-containing connective tissue encasing the kidney. **C. of the Lens**, a transparent, structureless membrane inclosing the lens of the eye. **C., Malpighian**, the commencement of the uriniferous tubule. See **C., Bowman's**.
- Müller's**. See **C., Bowman's**. **C., Nasal**, the embryonic cartilage which becomes the nose. **C. of a Nerve-cell**, that part of the neurilemma which covers a ganglion-cell. **C., Optic**, the embryonic structure forming the sclera. **C., Periotic**, the structure surrounding the internal ear. **C., Renal**. See **C., Suprarenal**. **C.s., Seminal**, expansion of the vasa deferentia near the seminal vesicles, applied by some authorities to the seminal vesicles. Syn., **Caputeres seminales**. **C.s., Sense**, the cartilaginous or bony masses containing the organs of sense. **C., Suprarenal**, the ductless, glandular body at the apex of each kidney. **C., Suprarenal Accessory**, an additional capsule attaining the size of a pea and sometimes attached to the suprarenal capsule by connective tissue. **C., Synovial**. See **Membrane, Synovial**. **C. of Tenon**, the tunica vaginalis of the eye.
- Capsulitis** (*kaps'u-lit'is*) [*capsule; itis*, inflammation]. Inflammation of the capsule of the lens or of the fibrous capsule of the eyeball.
- Capsulolenticular** (*kaps'u-lo-len-tik'u-lar*) [*capsule, lenticula, a lentil*]. Relating to the lens and to its capsule.
- Capsulotome** (*kaps'u-lo-tom*). 1. See **Cystotome**. 2. An instrument used by Baly in capsulotomy to steady the capsule; it consists of two fine needles fixed parallel to each other in a handle.
- Capsulotomy** (*kaps'u-lof'o-mi*) [*capsule, ityema, to cut*]. The operation of rupturing the capsule of the crystalline lens in cataract-operations.
- Captation** (*kapt'a'shun*) [*capture, to debase*]. The first or opening stage of the hypostomatous.
- Capitol** (*kaps'ul*). A product of the condensation of tannin and chloral; it is used in 1 to 2% solution as an antischleral agent and lotion for the hair. See **Tannin-chloral**.
- Capuron's Cardinal Points**. Four fixed points of the pelvic inlet, the two iliopectineal eminences anteriorly, and the two sacrotuberous joints posteriorly.
- Caput** (*kaps'ut*) [L.; pl., *capita*]. The head, also the chief part or beginning of an organ. Syn., **Caput musculi caudati**. **C. breve**, the transversus pedis muscle. **C. caecum coli**, the caecum. **C. caudati**, the base of the corpus striatum. **C. coli**, the head of the colon. **C. cordis**, the base of the heart. **C. cornu posterioris**. Same as **C. gelatinosum**. **C. gallinaginis**. See **Verumontanum**. **C. gelatinosum**, the name given to the translucent gray matter covering the dorsomedial periphery of the dorsal horn of the spinal cord. It is a peculiar, striated substance composed of numerous closely crowded cellular elements, in part connective tissue cells, in part nerve-cells. **C. medullæ**, **C. medullæ oblongatæ**, Bartholin's name for the cerebellum as distinguished from the oblongata. **Capita medullæ oblongatæ**, the flolami. **C. medusæ**, the presat plexus of some ctenophores.

ing the umbilicus in periportal cirrhosis of the liver. It represents collateral paths for the return of the venous blood from the abdominal viscera. **C. obstipum**. Synonym of *Wry-neck*. **C. quadratum**, the rectangular head of rickets, flattened upon the top and at the sides, with projecting occiput and prominent frontal bosses. **C. succedaneum**, a tumor composed of a serosanguineous infiltration of the connective tissue situated upon the presenting part of the fetus. **C. tali**, the head of the astragalus. **C. testis**, the epididymis. **C. transversum**. The same as *C. breve*.

Caramel (*kar'-am-el*) [Fr., "burnt sugar"]. Cane-sugar deprived of two molecules of water. It is a viscid, brown-colored liquid.

Carapa (*kar'-ap-ah*) [*carapi*, the Guiana name]. A genus of tropical mellaceous trees. *C. guianensis* has an antispasmodic and febrifuge bark, and its seeds afford *carap-oil*, a protective against insects and vermin. *C. moluccensis* is an East Indian tree; the bitter bark is used in diarrhea and the seeds in colic. The fruit and bark of *C. procera*, of the tropics of Asia and Africa, are antiperiodic; the oil from the seeds is anthelmintic and expectorant.

Carapin (*kar'-ap-in*). An alkaloid from the bark of *Carapa guianensis*.

Caraway (*kar'-ah-wed*). See *Corum*.

Carbamate (*kar'-bam-at*). A salt of carbamic acid.

Carbamic (*kar'-bam'-ik*). Obtained from carbamid. **C. Acid**. See *Acid, Carbamic*.

Carbamid (*kar'-bam-id*) [*carbo*, a coal; *amid*], $\text{CH}_4\text{N}_2\text{O}$. Urea.

Carbamin (*kar'-bam-in*). See *Acetonitril*.

Carbazotic Acid (*kar'-baz-ot'-ik*). See *Acid, Furoic*.

Carbid (*kar'-hid*). A compound formed by the direct union of carbon with some radicle or element.

Carbimids (*kar'-him-ids*). Bodies isomeric with cyanates, but distinguished from true cyanates in that alkalis decompose them into carbon dioxid and amin. Syn., *Carbonylamines*.

Carbinol (*kar'-bin-ol*) [*carbo*]. Methyl-alcohol, CH_3OH . Also a generic term for the alcohols formed by substituting hydrocarbon radicles for the hydrogen in the methyl radicle of carbinol.

Carbo (*kar'-bo*) [L.]. A coal; charcoal. **C. animalis** (U. S. P.), animal charcoal; bone-black; it is used in pharmacy and in manufacturing chemistry largely as a decolorizing agent and as a filter. **C. animalis purificatum** (U. S. P.), purified animal charcoal. Dose 20 gr.-1 dr. (1.3-4.0 Gm.). **C. ligni** (U. S. P.), wood-charcoal; an absorbent, disinfectant, and deodorizer, used in poulticing wounds and dressing ulcers. It is used internally in gastrointestinal irritation.

Carboformal (*kar'-bo-form'-al*). A combination of carbon and paraformaldehyd in the form of blocks (*Gluh blocks*) for purposes of

disinfection, the formaldehyd being liberated by the burning of the carbon.

Carbohemia (*kar'-bo-he'-me-ah*) [*carbo*; *aima*, blood]. Imperfect oxidation of the blood.

Carbohydrate (*kar'-bo-hi'-drät*) [*carbo*; *bdap*, water]. An organic substance containing 6 carbon atoms or some multiple of 6, and hydrogen and oxygen in the proportion in which they form water; that is, twice as many hydrogen as oxygen atoms. The carbohydrates form a large class of organic compounds, and may be arranged into three groups: the glucoses (*monoses*); the disaccharids, or sugars; and the polysaccharids. The glucoses are the aldehyd derivatives or ketone derivatives of the hexahydric alcohols, into which they may be converted by the absorption of two hydrogen atoms. They are mostly crystalline substances, very soluble in water, but dissolving with difficulty in alcohol. They possess a sweet taste. The disaccharids and polysaccharids are ethereal anhydrids of the glucoses. They may all be converted into the glucoses by hydrolytic decomposition. The disaccharids are ether-like anhydrids of the hexoses.

Carbohydric (*kar'-bo-hi'-drik*). Containing carbon, hydrogen, and oxygen.

Carbolate (*kar'-bol-at*). 1. A salt of phenol.

2. To impregnate with phenol.

Carbolfuchsin (*kar'-bol-fook'-sin*) [*carbo*; *fuchsin*]. A staining fluid consisting of 90 parts of a 5% aqueous solution of phenol and 1 part of fuchsin dissolved in 10 parts of alcohol.

Carbolic (*kar'-bol'-ik*) [*carbo*; *oleum*, oil]. Containing or derived from coal-tar oil. **C. Acid**. See *Acid, Carbolic*, and *Phenol*.

Carbolism (*kar'-bol-izm*) [see *Carbolic*]. Phenol poisoning; a diseased state induced by the misuse or maladministration of phenol. **C., Cutaneous**, dry gangrene due to the action of liquid phenol or to prolonged application of a solution of it upon the skin.

Carbolize (*kar'-bol-iz*) [see *Carbolic*]. To impregnate with phenol.

Carbolmarasmus (*kar'-bol-mar-as'-mus*) [*carbolic*; *μαρasmus*, decay]. Chronic carbolism: a condition marked by vomiting, vertigo, headache, salivation, nephritis, and general marasmus.

Carbolxylene (*kar'-bol-gi'-lën*). A clearing mixture composed of phenol, 1 part, and xylene, 3 parts; used for clearing microscopic sections which are to be mounted in Canada balsam or other resinous medium.

Carbon (*kar'-bon*) [*carbo*]. Charcoal. $\text{C} = 12$; quantivalence II, IV. A nonmetallic element occurring in the various forms of diamond, graphite or "black lead," charcoal, and lamp-black. It is the central or characteristic element of organic compounds. **C. Dioxid**, the acid, gaseous product, having the composition of CO_2 , commonly known as "carbonic-acid gas" or carbonic acid. It is a colorless gas, having a sp. gr. of 1.52, soluble in cold water, and possessing a pungent smell and an acid taste. Inhaled, it

destroys animal life by asphyxiation. **C. Disulfid** (*carbonyl disulphidum*, U. S. P.), carbon bisulfid, CS_2 , a colorless, transparent liquid, of offensive odor, highly inflammable, very poisonous. It is used as a solvent for caoutchouc and as a reagent. **C. Monoxid**, CO, carbonic oxid, a colorless, tasteless, and inodorous gas, one of the products of imperfect combustion. It is actively poisonous. **C. Nitrid**, CN, cyanogen. **C. Oxid**, CO_2 , a colorless, inodorous gas, having neither acid nor alkaline properties, and very poisonous. The pale lavender flame seen over a coal fire burning without smoke is due to its combustion. Chemically it is produced by passing carbonic acid over red-hot pieces of charcoal contained in a tube of iron and porcelain, and by several other processes. **C. Oxysulfid**, a body, COS, formed by conducting sulfur-vapor and carbon monoxid through red-hot tubes, it is a colorless gas, with a faint and peculiar odor. It unites readily with air, forming an explosive mixture, and is soluble in an equal volume of water. It is present in the waters of some mineral springs. **C. Tetrachlorid**, CCl_4 , anesthetic, used in asthma by inhalation.

Carbonate [*carbon*]. A salt of carbon dioxide. **C., Acid**, a substitution-compound of carbonic acid in which there is replacement of but one of its hydrogen atoms with a base. **C., Basic**, a compound of a carbonate with the oxid of the same base. **C., Hydric**. See **C., Acid**. **C., Hydrogen**. 1. Carbon dioxid. 2. Acid carbonate. **C., Neutral**, **C., Normal**, a substitution-compound of carbonic acid in which a base replaces all its hydrogen.

Carbonated (*kar'-ho-na-ted*). 1. Containing carbonic acid. 2. Changed into a carbonate.

Carbone (*kar'-bon*). A carbuncle.

Carbonemia (*kar-bon'e-mi-ah*) [*carbo*; *alpha*, blood]. An accumulation of carbon dioxide in the blood.

Carboneum (*kar-bon'e-um*). Carbon.

Carbonic (*kar-bon'ik*). Relating to, obtained from, or containing carbon. **C. Acid**. See **Carbon Dioxid**. **C. Anhydrid**, carbon dioxide. **C. Snow**, carbon dioxide in crystal form.

Carbonid (*kar'-bon-id*). 1. See **Carbat**. 2. A mineral which contains carbon. 3. An oxalate freed from its hydrogen by heat.

Carbonite (*kar'-bon-it*). An oxalate.

Carbonization (*kar-bon-iz-a'-shun*) [*carbon*]. The process of decomposing organic substances by heat without air, until the volatile products are driven off and the carbon remains.

Carbonometer (*kar-bon-om'e-t'er*) [*carbon*; *meter*, a measure]. An apparatus for indicating the degree to which the air of a room is vitiated by carbon dioxide.

Carbonometry (*kar-bon-om'e-t'ree*). The determination of the amount of carbon dioxide exhaled in the breath.

Carbonous (*kar'-bon-us*). Containing carbon.

Carbonyl (*kar'-hun-il*) [*carbon*]. A hypothetical organic radicle having the formula CO.

Carbonylamins (*kar-bon-il'-am-ins*). See **Carbamins**.

Carbosapol (*kar-bo-so'-pol*) [*carbo*, soap]. A clear distillate solution obtained by warming together phenol, 50 parts, soda-sap, 25 parts; and soft potash-sap, 25 parts.

Carbosulfid, **Carbosulfuret** (*kar-bo-sul'-fid*, *-fur-et*). A compound of carbon and sulfur with a radicle.

Carbothialdin (*kar-bo-thi-al'-din*), $C_4H_4NS_2$. White crystals obtained on evaporating carbosulfid with an alcoholic solution of aldehyd ammonia. It is soluble in acids.

Carbovinat (*kar-bo-vin'-at*). An ethyl carbonate.

Carboxyhemoglobin (*kar-boks-e-hem-o-glo'-bin*) [*carboxy*, hemoglobin]. The compound of carbon monoxid and hemoglobin formed when CO is present in the blood. The carbon monoxid displaces the oxygen and checks the respiratory function of the red corpuscles.

Carboxyl (*kar-boks'-il*) [*carbo*; *deig*, sharp]. 1. The group, CO.OH, characteristic of the organic acids. The hydrogen of this can be replaced by metals, forming salts. 2. Same as **Carbonyl**.

Carboy (*kar'-boy*) [*Turk*, karaboya]. A large bottle protected by wickerwork and a wooden box, used in the transportation of corrosive and other liquids.

Carbuncle (*kar'-bung-kli*) [*carbo*]. A hard, circumscribed, deep-seated, painful suppurative inflammation of the subcutaneous tissue. It differs from a boil in being of greater size, having a flat top, and several points of suppuration. It is erroneously called anthrax.

Carcassonne's Ligament. See **Coulet's Ligament**.

Carceag. A disease of sheep described by Babes in Rumania; it is probably a form of trypanosomiasis.

Carcinocosis (*kar-sin-el-ko'-sis*) [*karakos*, a crab; *iknos*, ulceration]. A cancerous ulcer. **C. fungosa**. See **Cancer verrucosus**.

Carcinoma (*kar-sin-o'-mah*) [*karpato-ma*, *karpato*, a crab; *ma*, tumor]. Cancer. A malignant epithelial tumor composed of a connective-tissue stroma surrounding groups or nests of epithelial cells. Three varieties are generally described—the squamous, the cylindrical, and the glandular. See **Boat's Sign**, **de Morgan's Spot**, **Simon's Symptom**, **Spiegelberg's Sign**. **C., Acinous**. See **Cancer**, **Acinous**. **C., Adenoid**, **C. adenodes**, **C. adenoides**. See **Cancer**, **Adenoid**. **C. asbolicum**. See **C., Chimney-sweep's**. **C., Chimney-sweep's**, epithelioma of the scrotum, occurring among chimney-sweepers, and supposed to be caused by the irritant action of soot. See **Soot cancer**. **C., Colloid**, one in which the delicate connective-tissue stroma is filled with colloid matter, the result of a colloid degeneration of the epithelial cells. In some cases the degeneration is mucoid instead of colloid. It affects chiefly the ad-

mentary canal, uterus, etc. **C.**, **Cylindric**, one in which the cells tend to assume a cylindric or columnar shape. This shape is best seen in the cells nearest the periphery of the nests. **C.**, **Encephaloid**, one of rapid growth, with a small amount of stroma, large alveoli, and greater amount of cells and blood-vessels. **C.**, **Fibrosomedullary**, one containing about an equal portion of cells and stroma. **C. fibrosum**, **C.**, **Fibrous**. See **C.**, **Scirrhus**. **C.**, **Glandular**, a carcinoma in which the cells are of the glandular or secreting type. **C.**, **Hyaline**. See **C.**, **Colloid**. **C. nigrum**. See **Melanocarcinoma**. **C. psammosum**, one in which stratified calcareous concretions differing from those found in psammomas have replaced the epithelial elements. **C.**, **Reticulated**, one which has undergone fatty metamorphosis and exhibits its stroma more distinctly. **C. sarcomatodes**, **C.**, **Sarcomatous**, an adenocarcinoma which has undergone sarcomatous degeneration of the connective tissue. **C.**, **Scirrhus**, a form which occurs most commonly in the breast; it has a stout, fibrillated stroma, closely packed with large nucleated cells. **Syn.**, **Hard carcinoma**. **C. scroti**, **C. scroti asbolicum**. See **C.**, **Chimney-sweep's**. **C.**, **Squamous**, one derived from squamous epithelium; the cells are cuboid in shape. **C.**, **Villous**. See **Papilloma**.

Carcinomatosis (*kar-sin-o-mat-o'-sis*). The pathologic condition giving rise to carcinomas. **Carcinomatous** (*kar-sin-o'-mat-us*) [*carcinoma*]. Relating to or affected with carcinoma.

Carcinomelcosis (*kar-sin-om-el-ko'-sis*). See *Carcinosis*.

Carcinonium (*kar-sin-o'-me-um*). Cancerous mass.

Carcinopolypus (*kar-sin-o-pol'-e-pus*). A cancerous polyp.

Carcinosis (*kar-sin-o'-sis*) [*carcinoma*]. 1. A carcinomatous cachexia; a tendency to the development of malignant disease. 2. A form of carcinoma, usually fatal, beginning generally in the uterus or the stomach and spreading to the peritoneum. **C.**, **Acute**, rapidly fatal carcinosis. **C.**, **Miliary**, one in which there are many secondary nodules the size of miliary tubercles. **C.**, **Miliary**, **Acute**, the rapid formation of minute cancerous nodules, either primary or secondary, within an internal organ or upon its surface.

Carcinous (*kar'-sin-us*). Cancerous.

Cardamom, **Cardamomum** (*kar'-dam-om*, *kar-dam-o'-mum*) [*L.*]. The fruit of *Elettaria cardamomum*, cultivated in Malabar. Its properties are due to a volatile oil, $C_{10}H_{16}$. It is an aromatic, carminative stomachic, used as an ingredient of several "bitters." When combined with purgatives it is useful to prevent griping. **C.**, **Infusion of**. Dose 2 oz. (64 G.). **C.**, **Tincture of** (*tinctura cardamomi*, U. S. P.), 20% strength. Dose $\frac{1}{2}$ -2 dr. (2-8 G.). **C.**, **Tincture of, Compound** (*tinctura cardamomi composita*, U. S. P.), cardamom,

20; cinnamon, 20; caraway, 10; cochineal, 5; glycerol, 60; dilute alcohol, q. s. ad 1000 parts. Dose $\frac{1}{2}$ -2 dr. (2-8 Cc.).

Cardarelli's Symptom. See *Oliver's Symptom*.

Cardia (*kar'-de-ah*). The heart. **C. of the Stomach**, the esophageal orifice of the stomach.

Cardiac (*kar'-de-ah*) [*cardia*]. 1. Pertaining to the heart or to the cardia of the stomach. 2. A drug acting especially on the heart. **C. Cycle**, the period included between the beginning of one heart-beat and the beginning of another. **C. Dropsy**, a dropsical effusion due to heart disease with loss of compensation. **C.**

Ganglions, ganglions lying in the grooves and substance of the heart

—the principal ones are Remak's and Bidder's, the first on the surface of the sinus venosus, and the latter (2) at the auriculoventricular groove. **C.**

Impulse, the elevation caused by the movement of the heart, usually seen in the fifth left intercostal space. **C.**

Murmur. See *Murmur*, *Cardiac*. **C. Orifice** (of the stomach), the esophageal orifice. **C.**

Passion. See *Cardialgia*. **C. Plexus**. See *Plexus*, *Cardiac*. **C. Rhythm**, the term given to the normal regularity in the force and volume of the individual heart-beats.

Cardialgia (*kar-de-ol'-je-ah*) [*cardia*; *algos*, pain]. Pain in the region of the heart, usually due to gaseous distention of the stomach; heartburn. **Syn.**, *Morbus cardiacus*; *Morsus stomachi*; *Morsus ventriculi*. **C. icterica**, heartburn with jaundice. **C. inflammatoria**, gastritis. **C. sputatoria**, pyrosis.

Cardianesthesia (*kar-de-an-es-the'-ze-ah*) [*cardia*; *anæsthesia*, want of feeling]. A condition of the heart marked by lack of sensation.

Cardianeuryisma (*kar-de-an-u-riz'-mah*) [*cardia*; *anæurosmos*, a widening]. Aneurysm of the heart.

Cardiant (*kar'-de-ant*) [*cardia*]. 1. Affecting the heart. 2. A remedy that affects the heart.

Cardiaortic (*kar-de-ah-or'-tik*). Relating to the heart and the aorta.

Cardioplegia (*kar-de-ah-ple'-je-ah*). See *Cardioplegia*.

Cardiasthenia (*kar-de-as-the'-ne-ah*) [*cardia*; *dathēna*, weakness]. A peculiar weakness of the heart due to neurasthenic conditions.

Cardielcosis (*kar-de-el-ko'-sis*) [*cardia*; *ἔλκος*, ulceration]. Ulceration of the heart.

CARDIAC CYCLE.

The inner circle shows the events that occur in the heart. The outer circle shows the relations of the sounds and silences to the events.

Cardiethmoliposis (*kar-de-eth-mo-lip-o'-sis*) [*cardio*; *ἵπλος*, a sieve, *λίπος*, fat]. A deposit of fat in the connective tissue of the heart.

Cardinal (*kar'-din-al*) [*cardo*, a hinge]. Important, prominent. **C.-flower**, a common name for several species of *Lobelia*, chiefly *Lobelia cardinalis*. **C. Points of Capuron**. See *Capuron's Cardinal Points*. **C. Veins**, the venous trunks which, in the embryonic stage, form the primitive jugular veins.

Cardine (*kar'-din*). A fluid preparation of sheep-hearts digested in glycerol and boric acid, used subcutaneously as a heart-tonic and diuretic. Dose 50 min.-1½ dr. (3.5 Gm.).

Cardio- (*kar-de-o-*) [*cardia*]. A prefix meaning relating to the heart.

Cardioaccelerator (*kar-de-o-ak-sel'-er-a-tor*). Hastening the action of the heart. **C. Center**. See *Center, Cardioaccelerator*.

Cardioarterial (*kar-de-o-ar-te-ri-al*). Pertaining to the heart and the arteries.

Cardiocele (*kar'-de-o-sel*) [*cardia*; *κήλη*, hernia]. Hernia of the heart. **C. abdominalis**, hernial protrusion of the heart into the abdomen.

Cardiocentesis (*kar-de-o-sen-tē'-sis*) [*cardia*; *κέντρον*, puncture]. Puncture of one of the chambers of the heart to relieve engorgement.

Cardiodynia (*kar-de-o-din'-e-ah*) [*cardia*; *δύνη*, pain]. Pain in or about the heart.

Cardiodysesthesia, Cardiodysesthesia (*kar-de-o-dis-es-thē'-ze-ah, -sis*) [*cardia*; *δυσ*, bad; *αἰσθησις*, perception]. Defective innervation of the heart.

Cardiodysneuria (*kar-de-o-dis-nū'-re-ah*). See *Cardiodysrhythmia*.

Cardiogram (*kar'-de-o-gram*) [*cardia*; *γράφω*, a writing]. The tracing of the cardiac impulse made by the cardiograph.

Cardiograph (*kar'-de-o-graph*) [*cardia*; *γράφω*, to write]. An instrument for registering graphically the modifications of the pulsations of the heart.

Cardiographer (*kar-de-o-graph-er*) [see *Cardiograph*]. An authority upon diseases of the heart.

Cardioid (*kar'-de-oid*) [*cardia*; *εἶδος*, likeness]. Like a heart.

Cardioinhibitory (*kar-de-o-in-hib'-it-o-ry*) [*cardia*; *ἡμιθρα*, to restrain]. Inhibiting or diminishing the heart's action. The cardioinhibitory fibers pass to the heart through the pneumogastric nerves.

Cardiokinetic (*kar-de-o-kin-et-ik*) [*cardia*; *κίνησις*, to move]. 1. Exciting the heart-action. 2. An agent which excites the action of the heart.

Cardiology (*kar-de-ol'-o-je*) [*cardia*; *λόγος*, discourse]. The anatomy, physiology, and pathology of the heart.

Cardiomalacia (*kar-de-o-mal-ah'-she-ah*) [*cardia*; *μαλακία*, softening]. Softening of the heart.

Cardiomelanosia (*kar-de-o-mel-an-oh'-sis*) [*cardia*; *μελάνωσις*]. Melanosis of the heart.

Cardiomyoliposis (*kar-de-o-mi-o-lip-o'-sis*) [*cardia*; *μύς*, muscle; *λίπος*, fat]. Fatty degeneration of the heart-muscle.

Cardiomyomalacia (*kar-de-o-mi-o-mal-ah'-she-ah*). See *Cardiomalacia*.

Cardioncus (*kar-de-on'-gus*) [*cardia*; *ὄγκος*, a tumor]. An aneurysm in the heart or one in the aorta close to the heart.

Cardionecrosis (*kar-de-o-nek-oh'-sis*) [*cardia*; *νεκρωσις*, a killing]. Gangrene of the heart.

Cardionosis, Cardionosis (*kar-de-on-oh'-sis*) [*cardia*; *νόσος*, disease]. Any pathological affection of the heart.

Cardioparaplasia, Cardioparaplasma (*kar-de-o-par-a-plā'-sia, -plā'-ma*) [*cardia*; *παράπλασις*, to wander from the right way]. Cardiac malformation.

Cardiopathy (*kar-de-oh'-a-the*) [*cardia*; *πάθος*, disease]. Any disease of the heart.

Cardiopericarditis (*kar-de-o-per-e-kar-de-itis*) [*cardia*; *pericardium*; *itis*, inflammation]. Associated cardiac and pericardial inflammation of the heart tissues and of the pericardium.

Cardiophtharsis (*kar-de-oh-thar'-sis*) [*cardia*; *φθίρεσις*, to corrupt]. Any affection of the heart causing destruction of its substance.

Cardioplegia (*kar-de-oh-plē'-je-ah*) [*cardia*; *πληγή*, a stroke]. Paralysis of the heart.

Cardiopneumatic (*kar-de-o-nū-mat-ik*) [*cardia*; *πνεῦμα*, breath]. Pertaining to the heart and respiration. **C. Movements**, those movements of the air in the lungs that are caused by the pulsations of the heart and larger vessels.

Cardiopneumograph (*kar-de-o-nū-mo-graph*) [*cardia*; *πνεῦμα*, breath, *γράφω*, to write]. An instrument designed for graphically recording cardiopneumatic movements.

Cardiopsis (*kar-de-o-oh'-sis*) [*cardia*; *εἶδος*, falling]. Prolapse of the heart. Syn. *Ranvier's disease*.

Cardiopulmonary (*kar-de-o-pul-mō-nā-ry*) [Relating to the heart and lungs, cardio-pulmonary].

Cardiopuncture (*kar-de-o-punk'-chūn*) [*cardia*; *punctura*, a puncture]. Cardiocentesis, especially on lower animals.

Cardiorrhaphy (*kar-de-oh'-at-e*) Suturing of the heart.

Cardiorrheuma (*kar-de-oh-u'-mah*) [*cardia*; *ῥευματισμός*]. Rheumatism of the heart.

Cardiorrhesis (*kar-de-oh-ek'-is*) [*cardia*; *ῥήσις*, a tearing]. Rupture of the heart.

Cardiospasm (*kar'-de-o-spazm*) [*cardia*; *σπασμός*, a drawing]. A spasm of the heart.

Cardiospermum (*kar-de-o-sper'-mum*) [*cardia*; *σπέρμα*, seed]. A genus of plants of the order *Sapindaceae*. *C. halimifolium* is a climbing tropical annual, the leaves and mucilaginous root are diuretic and diaphoretic.

Cardiosphygmograph (*kar-de-o-sfig'-mo-graph*). See *Cardiograph*.

Cardiotomy (*kar-de-oh'-o-mē*) [*cardia*; *τομή*, cutting]. The anatomy or dissection of the heart.

Cardiotromus (*kar-de-oh'-o-mū*) [*cardia*; *τρεμω*, to tremble]. Fluttering of the heart.

Cardiotrophe, Cardiotrophia (*kar-de-oh'-ro-fe, kar-de-oh'-ro-je-ah*) [*cardia*; *τροφή*, nourishment]. 1. Heart-nutrition. 2. The volume of the heart.

Cardiovascular (*kar-de-o-vas'-ku-lar*) [*cardio-*; *vasculum*, a small vessel]. Pertaining to the heart and the blood-vessels.

Cardipericarditis (*kar-de-per-e-kar-di'-tis*). See *Cardiopercarditis*.

Carditis (*kar-di'-tis*) [*cardia*; *itis*, inflammation]. Inflammation of the heart. **C., Internal.** Synonym of *Endocarditis*.

Cardialvulvitis (*kar-de-val-vu-lit'-tis*). Endocarditis confined to the valves.

Cardiypertrophy, Cardiypertrophia (*kar-de-i-per'-tro-fe*, *kar-de-i-per'-tro'-je-ah*) [*cardia*; *hyper*trophy]. Hypertrophy of the heart.

Cardol (*kar'-dol*). See *Anacardium*.

Carduus (*kar'-du-us*) [L., "a thistle"]. The seeds of *C. marianus*, St. Mary's-thistle, and *C. benedictus*, blessed thistle. A decoction of the former, 2 oz. to 1 pint, constitutes an old and popular remedy for hemoptysis. The latter is also a popular cure-all, used mainly as a tonic bitter. Dose of decoction 1 dr. ½ oz. (4-16 Cc.); of tincture 10-20 min. 10.6-1.2 Cc.).

Cargile-membrane [*Cargile*, the inventor]. An animal membrane resembling gold-beaters' foil, made from the peritoneum of the ox and used in surgery for packing and to prevent adhesions; when applied to the raw surface of the bowel it adheres without supporting stitches and forms an artificial peritoneum. Syn. *Animal velum*.

Cariated (*ka'-re-a-ted*). Carious.

Carica (*kar'-ik-ah*) [*carica*, a dry fig, so called from *Caria* in Asia Minor]. A genus of plants of the order *Papayaceae*. *C. papaya*, the papaw-tree of tropical America, contains in its leaves and fruit the alkaloid carpain, besides the ferment papain or papayotin, the leaves also contain the glucosid carposid. The milky juice and the seeds are anthelmintic. **C.-cocoa**, a preparation of cocoa containing papain.

Caricin (*kar'-is-in*). See *Papain*.

Caries (*ka'-re-es*) [L., "rotteness"]. A molecular death of bone, corresponding to ulceration in the soft tissues. See *Sign, Rust's*. **C. articularum**. See *C. fungosa*. **C., Atonic**, a form described by Billroth, attended with but little swelling and a thin, tend discharge. **C. callosa**, syphilitic chancre. **C. cariosa**, fungous caries, marked by large granulation-masses. **C. centralis**, circumscribed chronic osteomyelitis, which, working from within, causes disease of the cortical substances. Syn., *Osteitis interna*. **C. dentis**, *C. dentium*. See *C. of Teeth*. **C. fungosa**, tuberculosis of a bone with attached sequestrum, the meshes of the latter being filled with granulations growing into them from the inner surface of the cavity. **C. gallica**, syphilitic chancre. **C. granulosa**. See *C. fungosa*. **C. interna**. See *C. centralis*. **C., Lacunar**, a form in which the undermined bone is full of lacunae. **C. mollis**. See *C. fungosa*. **C., Necrotic**, a form in which portions of the bone lie in a suppurating cavity. **C. nongal-**

lica, simple chancre. **C. profunda**. See *C. centralis*. **C. sicca**, a form of tuberculous caries characterized by absence of suppuration, obliteration of the cavity of the joint, and sclerosis and concentric atrophy of the articular extremity of the bone. **C. of Spine**, tuberculous osteitis of the bodies of the vertebrae and intervertebral fibrocartilage, producing curvature of the spine. Syn., *Pott's disease*. **C. of Teeth**, a chemie decomposition of the earthy part or any portion of a tooth, accompanied by partial or complete disorganization of the animal framework of the affected part. Syn., *Odontonecrosis*.

Carina (*kar-i'-nah*) [L., "the keel"]. 1. Any keel-like structure. 2. A mesial ridge on the lower surface of the fornix cerebri. 3. The spinal column. **C. aqueductus sylvii**, the carinate inferior margin of the sylvian aqueduct. **C. vaginae**, the anterior column of the vagina.

Carinate (*kar'-in-ah*) [*carina*]. Keeled.

Cariosity (*kar-es'-it-e*). See *Caries*.

Carious (*ka'-re-us*) [*caries*]. 1. Pertaining to or affected with caries. 2. Marked by irregular pits or perforations so as to present the appearance of carious bone.

Carissa (*kar-is'-ah*) [L.]. A genus of shrubs. See *Oubain*.

Carissin (*kar-is'-in*). According to Bancroft, a glucosid from the bark of *Carissa ovala*, resembling ouabain in action.

Carmalum, Mayer's. A stain consisting of carminic acid, 1; alum, 10; water, 100 parts. It is well adapted for sections cut on the freezing microtome.

Carmin (*kar'-min*), $C_{17}H_{16}O_{10}$. A coloring-matter extracted from cochineal.

Carminative (*kar-min'-at-iv*) [*carminare*, to card; hence, to cleanse]. Having the power to cure flatulence and colic. Carminatives are generally aromatics.

Carnal (*kar'-nal*) [*carnalis*, fleshy]. Pertaining to flesh. **C. Knowledge**, sexual intercourse.

Carnallite (*kar'-nal-it*) [v. *Carnall*, a Prussian mineralogist (1804-1874)]. Potassium-magnesium chlorid.

Carnation (*kar-na'-shun*) [*carnatio*]. The natural color of flesh.

Carnauba (*kar-na-oo'-bah*) [Braz.]. 1. The root of *Copernicia cerifera*, a wax-producing palm-tree of tropical America. It is used in Brazil as an alternative and resembles sarsaparilla in its properties. Dose of the fluid-extract 30 min.-1 dr. (2-4 Cc.). 2. See *C. Wax*. **C. Wax**, the wax obtained from *Copernicia cerifera*.

Carneoaponeurotic (*kar-ne-o-ap-on-u-rot'-ik*). Fleshy and pertaining to an aponeurosis.

Carneopapillosus (*kar-ne-o-pap-il-o'-us*). Composed of fleshy papillae, as the columns of the vagina.

Carneotendinous (*kar-ne-o-ten'-din-us*). Both muscular and tendinous.

Carniferrin (*kar-ne-fer'-in*). A tasteless meat preparation containing phosphocarnic acid

- and 30% of iron. Dose for adults 8 gr. to 52 Gm.). Syn., *Iron phosphorenlactate*.
- Carniferrol** (*kar-nif'er-ol*) A preparation of meat-peptone with iron; it is used as a stimulant dietetic. Syn., *Liquor carnis ferropentonatus*.
- Carnification** (*kar-nif-ik-a'-shun*) [*carno*, flesh; *facere*, to make] A term indicating the alteration of tissue, especially the lung, to a dense, fleshy appearance. **C. of Bone.** See *Osteonecrosis*. **C. of the Lung, Congestive**, brown induration of the lung. **C. of the Lungs, C., Pulmonary.** 1. The change of the parenchyma of the lungs into a red material resembling muscle. 2. A consolidation of the lung from action of inflammation.
- Carniformis** (*kar-ne-for'mi-tis*) [see *Carnification*] Having a flesh-like appearance, e. g., *abscessus carnisformis*.
- Carnigen** (*kar'-ne-jen*). A dietetic albumose.
- Carnin** (*kar'-nin*) [*carno*], $C_7H_9N_3O_2$. A leuko-mann isolated from American meat-extract, but not from muscle tissue itself, also obtained from yeast and wine.
- Carnivorous** (*kar-niv'-o-rus*) [*carno*; *vorare*, to devour]. Flesh-eating.
- Carnogen** (*kar'-no-jen*) [*carno*; *generare*, to produce]. Glycerite of bone-marrow, containing 60% of red marrow and 25% of unaltered fibrin of ox-blood, with albumin, suspended in glycerol. It is a hematinic and used chiefly in pernicious anemia. Dose 1-2 tablespoonfuls 3 times daily.
- Carnolin** (*kar'-nol-in*). A solution of 15% of formaldehyd, it is a food-preservative and disinfectant.
- Carnosin** (*kar'-nos-in*), $C_7H_{11}NO_2$. A base, soluble in water, isolated from Liebig's meat-extract, it melts with decomposition at $730^\circ C$.
- Caro** (*kar'-ro*) [L.] 1. Flesh. 2. *Strychnos max-ima*. **C. luxurians**, exuberant granulation.
- Caroba** (*kar'-o-bah*) [L.]. The leaflets of *Jacquinia prenera* and of *Cybiloxia antyphilitica*. It is a popular Brazilian remedy as an emetico-cathartic, alterative, and tonic in syphilis and in yaws. Dose of the fluid-extract 15 min. to dr. (1-4 Gm.).
- Caroid** (*kar'-oid*). A digestive ferment obtained from *Carica papaya*, a pale-yellow powder. Dose 1-4 gr. (0.065-0.2 Gm.).
- Carolinium** (*kar-a-lin'-e-um*). The provisional name given by Baskerville to a supposed new element obtained by the fractionation of thorium oxide.
- Carony Bark** (*kar'-o-ne*) [*Carony*, a river in Venezuela]. *Angustura bark*.
- Carotid** (*kar'-oid*) [*carpos*, to produce sleep] 1. The carotid arteries, the principal large arteries on each side of the neck. See under *Artery*. 2. Oil or relating to the carotid artery.
- Carotis** (*kar'-oid*) [L.]. The carotid artery. **C. cephalica**, **C. cerebralis**, the internal carotid artery. **C. communis**, the common carotid artery. **C. externa**, **C. facialis**, the external carotid artery. **C. interna**, the internal carotid artery. **C. primitiva**, the common carotid artery.
- Carpain** (*kar'-pa'-in*), $C_{15}H_{15}NO_2$. An alkaloid extracted from the leaves of *Carica papaya*. It is recommended for the subcutaneous treatment of heart disease. Dose $\frac{1}{10}$ gr. (0.006-0.01 Gm.) subcutaneously, every day or every second day. **C. Hydrochlorate**, $C_{15}H_{15}NO_2HCl$, bitter white crystals soluble in water. It is used in mitral insufficiency and aortic stenosis. Dose $\frac{1}{10}$ gr. (0.006-0.01 Gm.) daily. Injection, $\frac{1}{10}$ gr. to 0.005-0.01 Gm.) daily.
- Carpal** (*kar'-pal*) [*carpos*, the wrist]. Pertaining to the wrist.
- Carphologia** (*kar-jol'-o-je-ah*). See *Carphology*.
- Carphology** (*kar-jol'-o-je*) [*carpos*, hand; *logos*, to collect]. The aimless picking at the bedclothes, seen in grave fevers, particularly in the so-called typhoid state.
- Carpipes** (*kar'-pi-pes*) [*carpus*, pes, foot]. C. French's term for a condition of the interior leg in four footed animals similar to club-foot.
- Cargo-** (*kar'-po-*) [*carpus*] A prefix meaning relating to the carpus.
- Carpocarpal** (*kar-po-kar'-pal*). Applied to the articulation between the two rows of carpal bones, also to different parts of the carpus in relation to each other.
- Carpocervical** (*kar-po-ser'-vak-al*). Relating to the wrist and the neck.
- Carpometacarpal** (*kar-po-met-a-kar'-pal*) [*carpo-*, *metacarpus*]. Relating to the carpus and to the metacarpus.
- Carpolecranial** (*kar-po-o-le-kra'-nal*) [*carpo-*, *olecranon*]. Relating to the wrist and the lower portion of the upper arm.
- Carpopedal** (*kar-po-pe'-dal*) [*carpo-*, *pes*, *pedis*, a foot]. Affecting the wrists and feet, or the fingers and toes. **C. Contraction**. See *Contraction*, *Carpopedal*. **C. Spasm**, a spasm of the hands and feet, or of the thumbs and great toes, associated with laryngismus stridulus of children.
- Carpophalangeus**, **Carpophalanginus** (*kar-po-jal-an'-je-us*, *kar-po-jal-an-j'-us*) 1. Relating to the wrist and to a phalanx. 2. See under *Muscle*.
- Carpophilous** (*kar-pof'il-us*) [*carpos*, fruit; *philos*, to love]. Parasitic upon fruit.
- Carposid** (*kar'-po-sid*). A crystalline glucoside from *Carica papaya*.
- Carpozyma** (*kar-po-z'-mah*) [*carpos*, fruit; *zuma*, ferment]. A genus of microorganisms producing fermentation.
- Carpus** (*kar'-pus*) [L.]. The eight bones collectively forming the wrist.
- Carrageen**, **Carrageen** (*kar'-ag-ien*) [*Carrageen* in Ireland]. Irish moss. See *Chondrus*.
- Carrion's Disease**, *Aeruga peruviana*, Peruvian wart.
- Carron Oil** (*kar'-on*). See *Oil, Carron*.
- Car-sickness**. The symptoms of seasickness produced by journeying in railway cars.
- Carswell's Grapes**. Pulmonary tubercles when they occur in a racemose distribution at the extremities of several adjacent bronchioles.

Carthagena Bark. *Cinchona* from Carthagena.

Cartilage (*kar'-til-aj*) [*cartilago*, gristle]. Gristle, a white, semiopaque, nonvascular connective tissue composed of a matrix containing nucleated cells which lie in cavities or lacunae of the matrix. When boiled, cartilage yields a substance called chondrin. **C.**, **Annular**. 1. Any ring-shaped cartilage. 2. The cricoid cartilage. **C.**, **Anonymous**, the cricoid cartilage. **C.**, **Aortic**, the second costal cartilage on the right side. **C.**, **Arthrodic**, **C.**, **Arthrodial**. See **C.**, **Articular**. **C.**, **Articular**, that lining the articular surfaces of bones. **C.**, **Asternal**, the costal cartilages which are detached from the sternum. **C.-bone**. 1. See *Ossein*. 2. See *C.*, *Calcified*. **C.s**, **Brecht's**, the ossa suprasternalia, two small cartilaginous or bony nodules near each sternoclavicular joint, above the sternum. They are regarded as the rudiments of the episternal bone that is well developed in some animals. **C.**, **Bronchial**, plates of cartilage, in some instances very minute, found in the bronchial tubes. **C.**, **Calcified**, that in which a calcareous deposit is contained in the matrix. *Syn.* *Cartilage-bone*; *Cruet cartilage*; *Primary bone*. **C.**, **Cellular**. See **C.**, *Parenchymatous*. **C.**, **Ciliary**. See **C.**, *Palpebral*. **C.**, **Corniculate**. See *C. of Santorini*. **C.**, **Costal**, that occupying the interval between the true ribs and the sternum or adjacent cartilages. **C.s**, **Cuneiform**. See *C.s of Wrisberg*. **C.**, **Dentinal**. See *Ossein*. **C.**, **Diarthrodial**. See **C.**, *Articular*. **C.**, **Embryonal**. See **C.**, *Parenchymatous*. **C.**, **Ensiform**, the third piece of the sternum. *Syn.* *Xiphoid appendix*; *Xiphoid cartilage*. **C.s**, **Epactal**, small cartilaginous nodules on the upper edge of the alar cartilages of the nose. **C.**, **Epiphyseal**. See **C.**, *Intermediary* (2). **C.**, **Fetal**. See **C.**, *Temporary*. **C.**, **Fibro-**. See *Fibrocartilage*. **C.**, **Float-ing**. See *Arthrolith*. **C.**, **Huschke's**. See *Jacobson's Cartilage*. **C.**, **Hyaline**, is distinguished by a granular or homogeneous matrix. **C.**, **Innominate**, the cricoid cartilage. **C.s**, **Interarticular**, flat fibrocartilages situated between the articulating surfaces of some of the joints. *Syn.* *Interarticular fibrocartilages*. **C.**, **Interarytenoid**, an inconsistent cartilage found between the arytenoid cartilages. **C.s**, **Interhemal**, nodules of cartilage which aid in the formation of the hemal arch of a vertebra. **C.**, **Intermediary**. 1. Cartilage-bone in process of transformation into true bone. 2. That interposed between the epiphysis and diaphysis of a bone. **C.s**, **Interneural**, nodules of cartilage which aid in the formation of the neural arch of a vertebra. **C.s**, **Intervertebral**. See *Intervertebral Discs*. **C.**, **Investing**. See **C.**, *Articular*. **C.**, **Jacobson's**. See *Jacobson's Cartilage*. **C.**, **Luschka's**. See *Luschka's Cartilage*. **C.**, **Luschka's Subpharyngeal**. See under *Luschka*. **C.**, **Meckel's**, the axis

of the first branchial arch (mandibular arch) of the fetus. It disappears during the fifth or sixth month, with the exception of its posterior (tympanic) portion, which becomes the incus, malleus, and folian process. A vestige of this cartilage (pinna cartilage) is occasionally found in tumors of the parotid gland. **C.s**, **Morgagni's**. See *C.s of Wrisberg*. **C.**, **Palpebral**, the connective tissue forming the framework of the eyelids. **C.**, **Parenchymatous**, that in which cells form the main part of the tissue. **C.s**, **Pyramidal**, the arytenoid cartilages. **C.s**, **Quadrata**, several small cartilages passing out from the alar cartilages in the external part of the nostril. **C.**, **Reticular**, a peculiar cartilage found in the auricle of the ear, the epiglottis, and eustachian tubes. Its peculiarity consists in a network of yellow elastic fibers pervading the matrix in all directions. **C.**, **Retiform**. See **C.**, *Reticular*. **C. of Santorini**, a nodule at the apex of each arytenoid cartilage—the corniculum laryngis. **C.**, **Seiler's**, a small cartilaginous rod attached to the vocal process of the arytenoid cartilage. It is more fully developed in the female than in the male. **C.s**, **Semilunar**, two interarticulating cartilages of the knee. **C.**, **Sesamoid**. See *Sesamoid Bone*. **C.**, **Sesamoid (of the Larynx)**, Luschka's cartilage. **C.s**, **Sesamoid (of the Nose)**. See **C.s**, *Epactal*. **C.s**, **Sigmoid**. See **C.s**, *Semilunar*. **C.**, **Synarthrodial**, that of any fixed or slightly movable articulation. **C.**, **Tarsal**. See **C.**, *Palpebral*. **C.**, **Temporary**, that which is ultimately replaced by bone. **C.**, **Tubal**, a rolled triangular cartilage running from the osseous part of the eustachian tube to the pharynx. **C. of Weitbrecht**, the interarticular fibrocartilage that exists in the acromioclavicular articulation. **C.s of Wrisberg**, the cuneiform cartilages, one on each side of the fold of membrane stretching from the arytenoid cartilage to the epiglottis. **C.**, **Xiphoid**. See **C.**, *Ensiform*. **C.**, **Yellow**. See **C.**, *Reticular*.

Cartilaginous (*kar'-til-aj'-in-us*) [*cartilage*]. Made up of or resembling cartilage.

Cartilago (*kar'-til-aj'-go*) [*L.*]. See *Cartilage*. **C. triticea**, a small oblong cartilaginous nodule often found in the lateral thyrohyoid ligament.

Carum (*ka'-rum*) [*καρυον*, caraway]. Caraway. It is official in the U. S. P. in the form of the dried fruit of *C. carvi*, indigenous to Europe, and an allied species native to the Pacific coast of America. Its odor and taste are due to a volatile oil. It is used chiefly as a flavor. **C. petroselinum**, parsley, is diuretic and sedative. **Carui, Aqua** (B. P.), caraway water. Dose 1-2 oz. (30-60 Cc.). **Carui, Infusum**, 2 dr. to 1 pint. Dose ½-2 oz. (15-60 Cc.). **Unof. Cari, Oleum** (U. S. P.), oil of caraway. Dose 1-5 min. (0.06-0.3 Cc.).

Caruncle (*kar'-ung-kl*) [*caruncula*]. A small, fleshy growth. **C.**, **Lacrimal**, one upon the

conjunctiva near the inner canthus. **C., Urethral**, a small, bright red growth situated on the posterior lip of the meatus urinarius, a frequent condition in women. The caruncle varies in size from a hempseed to a filbert, it is very painful, especially during micturition and coitus, and bleeds readily.

Caruncula (*kar-ung'-ku-lah*) [dim. of *caro*, flesh, pl., *caruncula*]. A caruncle. In the plural, the nymphs. **C. innominata**, the lacrimal gland. **C. major**, a caruncle marking the common orifice of the common bile-duct and the pancreatic duct. **C. mammillaris**, 1. The olfactory tubercle, between the roots of the olfactory nerves. 2. The enlarged ends of the galactophorous ducts in the nipple. **C. minor**, one in the duodenum in the center of which a supplementary pancreatic duct occasionally opens. **C. morgagnii**, the middle lobe of the prostate. **Carunculae myrtiformes**, the projections of membrane near the orifice of the vagina, thought to be the remains of the hymen after its rupture. **Carunculae papillares**. See *Papilla*. **Renal**. **C. salivaris**. See *C. sublingualis*. **C. sublingualis**, one marking the orifice of Wharton's duct. Syn., *Papilla sublingualis inferior*. **C. urethrae**. See *Caruncle*, *Urethral*.

Carunculate, Carunculated (*kar-ung'-ku-lat', -ed*). Furnished with a caruncle.

Carus' Curve. The longitudinal axis of the pelvic canal, which forms a curved line, having the symphysis pubis as its center.

Carvacrol (*karv'-ak-rol*) [Ital., *carvi*, caraway; *dapoc*, sharp], $C_{10}H_{12}O$. A liquid body occurring in the oil of certain varieties of satureja. Syn., *Cymophenol*, *Cymophenol*; *Metacymophenol*; *Oxyzymol*. **C. iodid**, $C_{10}H_{11}OI$, a brown powder, slightly soluble in alcohol, readily soluble in olive-oil, ether, and chloroform, melting at $90^{\circ}C$; it is used as a substitute for iodoform. Syn., *Iodoform*.

Carya (*kar'-e-ah*) [*nupin*, the walnut-tree]. Hickory, a genus of trees of the order *Juglandaceae*, indigenous to North America. *C. tomentosa* yields a crystalline principle, *caryin*, believed to be identical with quercitrin. The leaves of most of the species are aromatic and astringent and the bark bitter and astringent. The inner bark is used in dyspepsia and intermitt. fever.

Caryin (*kar'-e-in*). See under *Carya*.

Caryinum (*kar'-e-in'-um*). Nut oil.

Caryochrome (*kar'-e-o-krom*). See *Karyochrome*.

Caryocinesis (*kar'-e-o-sin'-e-iss*). See *Karyocinesis*.

Caryocinetic (*kar'-e-o-sin'-e-tik*). 1. See *Karyocinetic*. 2. Amoeboid.

Caryolysis (*kar'-e-ol'-e-iss*). See *Karyolysis*.

Caryomitosis (*kar'-e-o-mis'-is*). See *Karyomitosis*.

Caryophyllin (*kar'-e-o-fil'-in*) [*caryophyllus*], $C_{15}H_{18}O$ or $C_{15}H_{16}O$. The neutral crystalline principle of cloves.

Caryophyllus (*kar'-e-o-fil'-us*) [*akpau*, a nut; *phad-lah*, a leaf]. Clove. The unexpanded flowers of *Eugenia aromatica*, distinguished by their pungent, spicy taste. Its properties are due to a volatile oil, which is antiseptic, stimulant, and irritant. It also contains a crystalline body, *eugenin*, $C_{15}H_{14}O_2$, and a camphor, *caryophyllin*, $C_{15}H_{16}O$. It is useful as a stomachic and to prevent "griping" when combined with purgatives. **Caryophylli, Infusum** (B. P.), a strength of 1 to 40 is recommended. Dose 1-2 oz. (30-60 Cc.). **Caryophylli, Oleum** (U. S. P.), oil of cloves, contains an acid and a phenol compound. Dose 1-4 min. (0.06-0.24 Cc.). It is used also by microscopists to clarify preparations and tissues for mounting.

Caryoplasm (*kar'-e-o-plazm*). See *Karyoplasm*.

Casanthrol (*kas-an'-throl*). A mixture of casein ointment with a coal-tar product, it is used as a varnish in skin diseases.

Casca-bark (*kas'-kah*). Sassa bark, neutral bark. The bark of *Erythrophloeum guineense*, a tree native to Africa. Its properties are due to an alkaloid. It is valuable in intermittent fevers and as a heart-tonic, in overdoses it produces nausea and vomiting. *Erythrophlein*, the active alkaloid, is a local anesthetic. Dose of the aqueous extract 1 gr. (0.065 Gm.); of the fluidextract 5-15 min. (0.3-0.9 Cc.); of the tincture (25% strength) 10 min. (0.6 Cc.).

Cascara (*kas-kar'-ah*). Spanish for "bark."

C. amarga, Honduras bark. The bark of a tree native in Mexico, much used as an alterative tonic in syphilis and skin affections. **C. Cordial**, a trade preparation. Dose 15 min-2 dr. (1-8 Cc.). **C. sagrada** (*rhamnus purshiana*, U. S. P.), the bark of *Rhamnus purshiana*, or California buckthorn.

Its properties are due to a volatile oil. It is useful in chronic constipation. Syn., *Chiltem bark*; *Sacred bark*. **C. sagrada, Extract of** (*extractum rhamni purshiana*, U. S. P.). Dose 4-1 dr. (2-4 Cc.). **C. sagrada, Fluidextract of** (*fluidextractum rhamni purshiana*, U. S. P.). Dose 15 min (1 Cc.). **C. sagrada, Fluidextract of, Aromatic** (*fluidextractum rhamni purshiana aromatum*, U. S. P.). Dose 15 min (1 Cc.).

Cascarilla (*kas-kar'-ill*) [*Sp.*, dim. of *casca*, bark]. The bark of *Croton eluterio*, native to the Bahama Islands, an aromatic bitter, increasing the natural secretions of the digestive organs. Unof. **Cascarilla, Infusum** (B. P.). Dose 1-2 oz. (30-60 Cc.). **Cascarilla, Tinctura** (B. P.). Dose 4-2 dr. (2-8 Cc.).

Cascarillin (*kas-kar'-ill-in*) [*cascarilla*], $C_8H_8O_2$. The active principle of cascarilla; a white, crystalline, bitter substance, waterily soluble in water.

Cascarin (*kas'-kar-in*), $C_{22}H_{10}O_{10}$. A substance isolated by Leprieux from the bark of *Rhamnus purshiana* (*cascara sagrada*), and believed by him to contain the active tonic and laxative principles of that bark; it occurs

in granular masses or prisms. Dose 1½-3 gr. (0.099-0.198 Gm.). According to Phipson, this is identical with rhamnotoxin.

Casearia (kas'-a'-re-ah) [J. *Casearius*, Dutch botanist]. A genus of tropical trees of the order *Samydaceae*. *C. esculenta* is a native of the Asian tropics and Australia; its bitter roots are said to be a valuable remedy in hepatic torpor. *C. avata*, the *anavingah* of the Malays, is a large tree, bitter in all its parts. The fruit is diuretic. *C. tomentosa* is a tree of India; the bitter leaves are used by the natives in medicated baths and the fruit is diuretic.

Casease (ka'-se-az). An enzyme which digests casein, found by Duclaux and produced by bacteria, notably *Tyrophthrix tenuis*.

Caseate (ka'-se-ah). 1. A lactate. 2. To undergo cheesy degeneration.

Caseation (ka-se-a'-shun) [casein]. The precipitation of casein during the coagulation of milk. Also a form of degeneration in which the structure is converted into a soft, cheese-like substance.

Caseiform (ka'-se-ij-form). Resembling cheese or casein.

Casein (ka'-se-in) [caseum, cheese]. A derived albumin, the chief proteid of milk, precipitated by acids and by rennet. It is closely allied to alkali-albumin, but contains more nitrogen and a large amount of phosphorus. It constitutes most of the curd of milk. Syn., *Caseum*; *Lacterin*. **C. Dyspepton**, an insoluble, semigelatinous substance, separated in the first stages of gastric digestion. **C., Gluten**. See *C., Vegetable*. **C.-mercury**, a compound of casein and mercury bichlorid, soluble in water with a trace of ammonia added; it is antiseptic. **C. Ointment**, an ointment-base consisting of casein, 14 parts; potassium hydroxid and sodium hydroxid, each, 0.43 part; glycerol, 7 parts; vaselin, 21 parts; borax, 1 part; water, 56 or 57 parts. **C.-peptone**, a light-brown, soluble powder used as a nutrient. **C. Saccharid**, a compound of dry casein, 1 part, cane-sugar, 9 parts, and sodium bicarbonate enough to render it slightly alkaline. It is useful in preparing emulsions of oils, balsams, terpenes, resins, or gum-resins. **C. of the Saliva**, ptyalin. **C.-sodium**, a compound of casein and sodium hydroxid, used as a nutrient. **C., Vegetable**, a nitrogenous substance resembling the casein of milk; two varieties have been described—*legumin*, in peas, beans, etc., and *conglutin*, in hops and almonds.

Caseiodin (ka-se-o'-i'-o-din). A compound of casein and iodine (8 or 9%) forming a white powder, soluble in dilute hot alcohol and in hot alkalis. It is used in myxedema.

Caseous (ka'-se-us) [caseum]. Having the nature or consistence of cheese.

Casimiroa (kas-im-i'-o'-ah) [after *Casimiro Gomez*]. A genus of plants belonging to the order *Rutaceae*. *C. edulis* is the *zapote blanco* of Mexico; the edible fruit is anthelmintic;

the bitter bark with the leaves and seeds are incinerated and used medicinally.

Cassareep, Cassaripe (kas'-a-rép) [South American name]. The concentrated juice of the cassava, the root of *Jatropha manihot*, made innocuous by boiling; it is a condiment, and as an ointment (10%) is recommended in the treatment of purulent conjunctivitis, corneal ulcers, and other diseases of the eye.

Cassava (kas-a'-vah) [Sp., *casabe*]. 1. The manioc plant (*Jatropha manihot* and other species of *Jatropha*). 2. Tapioca.

Casser's (Casserius') Fontanel. The fontanel formed by the temporal, occipital, and parietal bones. **C.'s Muscle**, ligamentous fibers attached to the malleus and formerly described as the laxator tympani minor muscle. **C.'s Perforating Nerve**, the external cutaneous nerve of the arm.

Casserian (kas-e'-re-an). See *Gasserian*.

Cassia (cash'-a-ah) [cassia, a perfume]. 1. A genus of leguminous plants, several species of which afford senna. 2. An old name, still used commercially, for the coarser varieties of cinnamon. See *Cinnamon*. *C. alata*, the ringworm-shrub, is a widely diffused tropical shrub. The juice of the leaves mixed with lime-juice is used in the treatment of ringworm, and the wood and bark are alterant. *C. bear, eana* is a species of East Africa. A decoction of the root is highly recommended in black-water fever, and the powdered bark is applied as a dressing to ulcers. *C. marilandica*, of North America, produces the leaves called American senna, which are less active as a cathartic than the true senna. **C.-bark**, *cassia-lignea*. See *Cinnamon*. **C.-buds**, the immature fruit of Chinese cinnamon; used chiefly as a spice. **C., Oil of**, a variety of oil of cinnamon, used in pharmacy and in perfumery. **C., Purging** (*cassia fistula*, U. S. P.), the dried fruit of a tree growing in tropical regions. The pulp (*cassia pulpa*, B. P.) is a mild laxative. Dose 1-2 dr. (4-8 Gm.).

Cast (kast) ME., *casten*, to throw]. 1. A mass of fibrous or plastic material that has taken the form of some cavity in which it has been molded. From their source, casts may be classified as bronchial, intestinal, nasal, esophageal, renal, tracheal, urethral, vaginal, etc. Of these, the renal casts, by reason of their significance in diseases of the kidney, are the most important. Classed according to their constitution, casts are epithelial, fatty, fibrinous, granular, hyaline, mucous, sanguineous, waxy, etc. See *Tube-casts*. 2. Strabismus. **C.s, Kùlz's**, very short, generally hyaline, but sometimes granular, casts, occurring at the onset and during the course of diabetic coma, disappearing with the coma, and considered by Kùlz as diagnostic of impending coma. **C.s, Tubular Exudation** (of the intestine), a pathognomonic symptom of mucous colitis.

Castanea (kas-to'-ne-ah) [L.]. Chestnut. The leaves of *C. vesca*. They contain tannic and gallic acids and other principles the

value of which is not known. They are used in infusion or decoction as a remedy for whooping-cough. Dose of the *fluidextract* 5-60 min. (0.3-3 Cc.).

Castellino's Sign. See *Oliver's Symptom*.

Castor (*kas'tor*). See *Castoreum*. **C.-bean**, **C.-oil**. See under *Ricinus*. **C.-xylene**, a mixture composed of castor-oil, 1 part, and xylene, 3 parts, used for clearing or clarifying the collodion or celloidin of objects embedded in collodion.

Castoreum (*kas-to' re-um*) [*kastrop*, the beaver]. The dried preputial follicles and their secretion, obtained from the beaver, *Castor fiber*. It is a reddish-brown substance with a strong odor. It is antispasmodic and stimulant, its action resembling that of musk. Dose of the *tincture* $\frac{1}{2}$ -1 dr (2-4 Cc.).

Castration (*kas-tra'shun*) [*castrare*, to cut]. Orchidectomy; the excision of one or both testicles. **C., Female**, removal of the ovaries, oophorectomy; spaying.

Castrensis (*kas-tren'sis*) [*castra*, a camp]. 1. Relating to camps. 2. Camp fever or dysentery due to unsanitary living in camps.

Casualty (*kas'u-al-ty*) [*casus*, chance]. An accidental injury, a wound, or loss of life, accidentally incurred; an injury in a battle.

Casuarina (*kas-u-ar'-e-nah*) [*casuarinus*, the casowary, from the resemblance of the stems to the heavy feathers of this bird]. A genus of plants of the order *Casuarinaceae*. The tonic and styptic bark of *C. equisetifolia*, of Malaya, is used in the treatment of beriberi. *C. montana* is a native of Malaya; the bark is used in beriberi; the leaves in colic, the seeds in a salve in the treatment of headache.

Casustics (*kas-us't-iks*) [*casus*, a case]. The study of individual pathologic cases as a means of arriving at the general history of a disease.

Casumen (*kas'-u-men*). A proprietary dietetic said to contain 93% of proteid.

Cata-. For words thus beginning and not found under C see *Kata-*.

Catabasial (*kat-ah-bas'-e-al*) [*kata*, down; *basion*]. Applied to skulls having the basion lower than the opisthion.

Catabasis (*kat-ab'-as-is*) [*kata*, down; *basis*, a descent]. The decline of a disease.

Catabiotic (*kat-ab'-i-ot-ik*). See *Katabiotic*.

Catabolergy (*kat-ab'-ol'-er-je*). See *Katabol-ergy*.

Catabolic (*kat-ab'-ol-ik*). See *Katabolic*.

Catabolin, **Catabolite** (*kat-ab'-o-lin*, *-ite*). See *Katabolin*.

Catabolism (*kat-ab'-o-lizm*). See *Katabolism*.

Cataclasis (*kat-ak'-las-is*) [*kata*, down, *klassein*, to break]. A fracture.

Catacleisis (*kat-ak'-li-sis*) [*kata*, down, *klein*, to close]. Closure of the eyelids by adhesion or spasm.

Cataclysm (*kat'-ak-lizm*) [*kata*, down, *klassein*, to break]. 1. An effusion. 2. A sudden shock.

Catalase (*kat'-al-az*). See *Milk-catalase*.

Catalepsy (*kat'-al-ep-se*) [*kata*, down, *leipsein*, to seize]. A condition of morbid sleep, associated with a loss of voluntary motion and a peculiar plastic rigidity of the muscles, by reason of which they take any position in which they are placed and preserve it for an indefinite time. The condition is associated with hysteria, with forms of insanity, and is a stage of the hypnotic sleep. **C., Local**, that affecting a single organ or group of muscles.

Cataleptic (*kat'-al-ep'-tik*) [see *Catalepsy*]. 1. Relating to, affected with, or of the nature of, catalepsy. 2. A person affected with catalepsy.

Cataleptiform (*kat'-al-ep'-ti-form*) [*catalepsy*, *forma*, form]. Resembling catalepsy.

Cataleptize (*kat'-al-ep'-tiz*). To reduce to a state of catalepsy.

Cataleptoid (*kat'-al-ep'-to'id*) [*catalepsy*, *allos*, likeness]. Like catalepsy. **C., State**, a condition due to neuromuscular excitability and differing from true catalepsy in that the limbs must be held in fixed attitudes for a few seconds before they maintain themselves and friction causes them to become limp.

Cataleptolethargic (*kat'-al-ep'-to-leth-er'-ik*). Having the nature of catalepsy and lethargy.

Catamenia (*kat-am'-e-ne-ah*) [*kata*, according to, *men*, month]. The recurrent monthly discharge of blood during sexual life from the genital canal of the female.

Catamenial (*kat-am'-e-ne-ah*) [*catamenia*]. Pertaining to the catamenia.

Cataphonics (*kat-ah-fon'-iks*) [*kata*, after, *phōnē*, sound]. That branch of physics treating of reflected sounds.

Cataphoresis (*kat-af'-or'-e-sis*) [*kata*, down, *pherein*, to carry]. The introduction of drugs into the system through the skin by means of ointments or solutions applied by the electrode of a battery. **C., Anemic**, the application of cataphoresis upon a part from which the blood-supply has previously been cut off by an Eschmarch bandage or a rubber ring. **C., Static**, a method of introducing into the body gaseous medicaments that have been inclosed within a bell jar or tube into which enters a brush electrode connected with the positive pole of an influence machine.

Cataphoria (*kat-af'-or'-e-ah*). See *Kataphoria*.

Cataplasis (*kat-ap'-las-is*) [*kata*, down, *plassein*, formation]. 1. The stage of decline in the individual life. 2. The application of a plaster or coating.

Cataplasma, **Cataplasma** (*kat'-ap-laz-ma*, *kat-ap-las'-mah*) [*kata*, down, *plassein*, to form (q. v.)]. **Cataplasma carbonis** (B. P.), a poultice made of wood-charcoal, 1; bread-crumbs, 1; linseed-meal, 3; boiling water, 20 parts. **Cataplasma fermenti** (B. P.), a mixture of beer, yeast, wheat flour, water at 100° F. It is a stimulant and antiseptic for indolent ulcers. **Cataplasma kaolini** (U. S. P.), a mixture of kaolin, boric acid,

thymol, methyl salicylate, oil of peppermint, and glycerol.

Cataract (*kat'-ar-akt*) [*katappaktis*, a waterfall]. Partial or complete opacity of the crystalline lens or its capsule. **C.**, **Adherent**, opacity of the lens, due to disturbed nutrition, in which it is attached by exudates to the adjacent parts, as in cyclitis. **C.**, **Aridosiliqueous**, an overripe cataract with a dry, wrinkled capsule. **C.**, **Capsular**, cataract due to opacity of the capsule. **C.**, **Capsulo-lenticular**, one involving both the capsule and the lens. **C.**, **Chalky**. See **C.**, **Aridosiliqueous**. **C.**, **Cholesterin**, one containing what are apparently crystals of cholesterol. **C.**, **Concussion**, a soft cataract due to an explosion or some other concussion. **C.**, **Cortical**, one due to loss of transparency of the outer layers of the lens. **C.**, **Cystic**. See **C.**, **Morgagnian**. **C.**, **Diabetic**, a form associated with diabetes. **C.**, **dissection**, an operation preliminary to absorption, or extraction by suction, consisting in rupturing the capsule, so that the aqueous humor gains access to the lens. **C.**, **extraction**, removal of the cataractous lens by surgical operation. **C.**, **Fibrinous**, a false cataract consisting of an effusion of plastic lymph on the capsule and into the field of vision. **C.**, **Fibroid**, a false cataract consisting of an opacity in the axis of the visual rays though not in the lens. **C.**, **Fluid**, the breaking-up of an opaque lens into a milky fluid. **C.**, **Green**, a name given to a grayish-green reflex seen in glaucoma; it is also seen when the pupil is dilated and the mediums are not completely transparent. **C.**, **Grumous**, a spurious cataract from hemorrhage into the cornea or into the vitreous. **C.**, **Gypseous**, an overripe cataract presenting a white appearance from having undergone degeneration. **C.**, **Hard**. See **C.**, **Senile**. **C.**, **Hyaloid**, a spurious cataract attributed to opacity of the anterior part of the vitreous. **C.**, **Immature**, one in which only a part of the lens substance is cataractous. **C.**, **Incipient**, forked linear opacities in the equatorial region of the lens seen in middle-aged persons and sometimes remaining unchanged for years. Syn., *Arcus senilis lentis*, *Gerontoxon lentis*. **C.**, **Interstitial**. See **C.**, **Lenticular**. **C.**, **Lacteal**. See **C.**, **Fluid**. **C.**, **Lamellar**, one due to opacity of certain layers between the cortex and nucleus, the remaining layers being transparent. **C.**, **Lenticular**, one occurring in the lens proper. **C.**, **Lymph**, **C.**, **Lymphatic**. See **C.**, **Morgagnian**. **C.**, **Mature**, one in which the whole lens substance is cataractous. **C.**, **Membranous**, a fibrinous deposit from the iris upon the capsule, which becomes opaque. **C.**, **Mixed**, one which ultimately affects the whole lens, but begins as a cortical opacity in sharply demarcated streaks or triangular patches. **C.**, **Morgagnian**, one in which an overripe cataract shrinks and leaves a nucleus floating in the dissolved outer layers.

C., **Myelin**, one containing a semitransparent, yellowish, friable substance. **C.**, **Nuclear**, one of moderate extent beginning in the nucleus. **C.**, **Pigmented**, **C.**, **Pigmentous**, a spurious cataract due to an injury by which the pigment from the posterior surface of the iris has been detached, forming a tree-like appearance. **C.**, **Polar** (anterior or posterior), a form in which the opacity is confined to one pole of the lens. **C.**, **Pseudomembranous**, a condition marked by white spots on the lens due to iritis. **C.**, **Pupillary**, congenital closure of the pupil. **C.**, **Pyramidal**, one in which the opacity is at the anterior pole and is conoid, the apex extending forward. **C.**, **Recurrent Capsular**, **C.**, **Secondary**, capsular cataract appearing after the extraction of the lens. **C.**, **Ripe**. See **C.**, **Mature**. **C.**, **Senile**, the cataract of old persons, the most frequent form, and that understood when not specified as *congenital*, *juvenile*, *traumatic*, *soft*, etc. **C.**, **Siliculose**, **C.**, **Siliqueous**. See **C.**, **Aridosiliqueous**. **C.**, **Soft**, a form occurring especially in the young; the lens-matter is of soft consistence and milky appearance. **C.**, **Spontaneous**, one not dependent upon some other lesion or disease. **C.**, **Stony**, one that has undergone degeneration and become of stony hardness. **C.**, **Tremulous**, **C.**, **Vacillating**, one associated with laceration of the zonule of Zinn, causing trembling of the iris and of the cataract on movement of the eyeball. **C.**, **True**, lenticular cataract. **C.**, **Unripe**. See **C.**, **Immature**. **C.**, **Zonular**. See **C.**, **Lamellar**.

Cataractous (*kat-ar-ak'-tus*) [*cataract*]. Of the nature of or affected with cataract.

Catarrh (*kat-ahr'*) [*katappeiv*, to flow down]. Inflammation of a mucous membrane. The term is also applied to certain inflammations of the tubules of the kidney and the air-vesicles of the lung. **C.**, **Alveolar**, a condition occurring in bronchopneumonia in which the alveoli of the lungs contain a granular liquid exudate holding modified epithelial cells and blood-corpuscles. **C.**, **Atrophic Nasal**, chronic nasal catarrh resulting in dryness and atrophy of the membrane. **C.**, **Dry**, bronchitis in which there are frequent, severe attacks of coughing, with pain and but little expectoration. **C.**, **Epidemic**. See *Influenza*. **C.**, **Gastric**, gastritis. **C.**, **Hemorrhagic**, bronchial catarrh attended with a superficial extravasation of blood into the mucous tissue. **C.**, **Infectious**, that caused by pathogenic microorganisms either by direct invasion or by the effect of toxins generated by them. **C.**, **Intestinal**, enteritis. **C.**, **Intoxication**, that caused by chemie poison—(a) introduced with the ingesta; (b) developed from the ingesta through putrefaction; (c) that developed from the blood. **C.**, **Laennec's**. 1. See **C.**, **Dry**. 2. See **C.**, **Pituitous**. **C.**, **Membranous Nasal**, a form of nasal catarrh marked by the formation of a thick pseudomembrane. **C.**, **Mycotic**, that caused by a fungus. **C.**, **Nasal**,

- coryza. **C.**, **Papillary**, catarrh of the renal papillas. **C.**, **Pituitous** (of Laennec), chronic serous bronchorrhoea attended with copious secretion discharged by severe paroxysms of coughing. **C.**, **Pulmonary**, bronchitis. **C.**, **Rarefying Dry** (of the nasopharynx), a state of malnutrition marked by pale, dry mucosa and at times the occurrence of varicose veins in the pharyngeal wall and about the orifices of the eustachian tubes. **C.**, **Rose-**, hay-fever. **C.**, **Russian**, influenza. **C.**, **Serous**, that marked by secretion consisting chiefly of a serous fluid. **C.**, **Suffocative**. Synonym of *Capillary bronchitis*. **C.**, **Summer-**, hay fever. **C.**, **Uterine**, endometritis. **C.**, **Vasomotor**, hay fever. **C.**, **Venereal**. Synonym of *Gonorrhoea*. **C.**, **Vesical**, cystitis.
- Catarrhal** (*kāt-ahr'-al*) [*catarrh*]. Of the nature of, affected with, or relating to catarrh. **C.** **Fever**. Synonym of *Influenza*. **C.** **Inflammation**, an inflammation of an epithelial surface, characterized by proliferation and desquamation of the epithelium.
- Catarrhæctic** (*kāt-ahr-ek'-ish*) [*catarrhæctis*]. Purgative.
- Catatonía** (*kāt-at-ō'-ne-ah*). See *Katatonía*.
- Catatriopia** (*kāt-at-ō'-pe-ah*). See *Katatriopia*.
- Catavertebral** (*kāt-ah-er'-te-bral*) [*katá, down; vertebra*]. Located on the side of a centrum of a vertebra next to the blood-vessels.
- Catechin** (*kāt'-e-chin*) [*catechu*]. $C_{15}H_{10}O_2 + 5H_2O$. Catechinic acid, the active principle of catechu. It crystallizes in shining needles of a snow white, silky appearance.
- Catechol** (*kāt'-e-chol*). See *Pyrocatechin*. **C.** **Dimethylate**, **C.** **Dimethyl-ether**. See *Venitrol*. **C.** **Monomethylate**, **C.** **Monomethyl-ether**. See *Caminal*.
- Catechu** (*kāt'-e-choo*) [*E. Ind.*]. An extract prepared from the wood of *Acacia catechu*, a native of the East Indies. It contains 50% of tannic acid, and hence is a powerful astringent. It is used in the diarrhea of children and as a gargle and mouth-wash. Dose of the powdered extract 10 gr.-½ dr. (2.65-2.0 Gm.). Unof. The catechu of the Pharmacopœia of 1890 has been replaced by gamboge. **C.**, **Infusum** (B. P.). Dose 1-½ oz. (42-45 Cc.). **C.**, **Pulvis**, **Compositus** (B. P.), contains catechu, kino, and rhubarb. Dose 20-30 gr. (1.3-2.6 Gm.).
- Catelectrode** (*kāt-el-ek'-trod*). See *Kathode*.
- Catelectrotonus** (*kāt-el-ek'-trof'-o-nus*). See *Kathode-tonus*.
- Catenating** (*kāt-en-a-ting*) [*catenare*, to chain together]. Connecting, linking, e. g., *catenating* apparatus associated with another disease.
- Caigut** (*kāt'-gut*). The intestine of various animals, particularly the sheep, treated to make ligatures. **C.**, **Carbolized**, caigut rendered aseptic by soaking in a solution of phenol. **C.**, **Chromicized**, gut treated with chromium trioxide. **C.** **plate**, an appliance for uniting intestinal edges in intestinal anastomosis. It is made of a solid caigut sheet, is thin, large, and flat, and resembles the bean decalcified bone-plates.
- Catharsis** (*kath-ar'-sis*) [*kathairō, to purge*]. Purgation.
- Cathartate** (*kath-ar'-tat*). A salt of cathartic acid.
- Cathartic** (*kath-ar'-tik*) [see *Catharsis*]. 1. Purgative. 2. A medicine used to produce evacuations of the bowels, a purgative. **C.** **Acid**. See *Scena*. **C.** **Pill**, **Compound**. See under *Compound*.
- Cathartogenin** (*kath-ar-toj'-en-in*). A yellow-brown substance obtained from cathartin acid by decomposition with hydrochloric acid. Syn. *Cathartogenic acid*.
- Cathartomannite** (*kath-ar-to-man'-it*). See *Scena*.
- Cat-head** (*kāt'-hed*). A term applied by Roeb to certain skulls the bones of which are too thin, the form round, with the occiput markedly projecting, while all prominences and muscular impressions are inconspicuous. Cf. *Apple Head*.
- Cathelineau's Sign**. See *Uiles de la Tourette's Sign* under *Tourette*.
- Catheter** (*kath'-et-er*) [*kathēō, a thing put down*]. A hollow tube for introduction into a cavity through a narrow canal. **C.**, **Bozeman's**, a double-current uterine catheter. **C.**, **Eustachian**, an instrument for examining, distending, or making applications to the eustachian tube. **C.** **Fever**, systemic disturbance with fever, following the introduction of a catheter into the urethra. **C.**, **Gouley's**, a solid curved, steel instrument, grooved on its inferior aspect, for passing over a guide, through a stricture, into the bladder. **C.** **life**, continuous dependence upon the catheter for evacuation of the bladder. **C.**, **Lung**, a soft-rubber tube that may be passed down the trachea. **C.**, **Schrötter's**, instruments of hard rubber and of varying caliber, somewhat triangular on section, used for the dilation of laryngeal strictures. **C.**, **Self-retaining**, one that will hold itself within the bladder without other appliances to assist it.
- Catheterism, Catheterization** (*kath'-et-er-izm, kath-et-er-iz'-shun*) [*catheter*]. The introduction of a catheter.
- Cathodal** (*kath'-o-dal*). See *Kathodal*.
- Cathode** (*kath'-od*). See *Kathode*.
- Cathodic** (*kath'-od'-ik*). See *Kathodic*.
- Cathypnosis** (*kath-ij'-no-zis*) [*kathēō, to put to sleep*]. Synonym of *African Triborgy*.
- Cation** (*kāt'-e-on*). See *Kation*.
- Cativi, Cativia** [*Carib. for manihot root*]. A skin disease of Central America said to be caused by an animal parasite and resembling in its lesions grated manihot root.
- Catlin, Catling** (*kāt'-lin, kāt'-ling*) [*clin, of cut*]. A long, pointed, two-edged knife used in amputation.
- Catnip** (*kāt'-nep*) [corruption of *catmint*]. The leaves and tops of the herb *Nepeta cataria*, a stimulant and tonic; a popular remedy for chlorosis, hysteria, etc. Dose of fluid extract 1-2 dr. (4-8 Cc.).

Catoptric Test. The diagnosis of cataract by means of the reflection of images from the cornea and lens-capsules.

Catoptrics (*kat-op'triks*) [*katoptron*, a mirror]. The laws of the reflection of light.

Catramin (*kat'-ram-in*). A turpentine obtained from *Tuuga canadensis* and other conifers. It is recommended as a stimulant, diuretic, and expectorant in chronic respiratory troubles, and is used in tuberculosis and lupus subcutaneously and as an embrocation.

Cat's-purr. A peculiar purring bruit heard on auscultation, due to a defect of the mitral valve. Syn., *Frémissement cataire*.

Cattle-plague. See *Rinderpest*.

Cauda (*kaw'-dah*) [L.]. 1. A tail. 2. The part of a muscle forming its insertion. **C. cerebelli**, the vermiform process. **C. epididymidis**, the inferior part of the epididymis. **C. equina**, a term applied collectively to the roots of the sacral and coccygeal nerves, from their resemblance to a horse's tail. **C. medullæ** (of Bartholin), a collective term for the oblongata and spinal cord. **C. striati**, the narrow posterior portion of the caudate nucleus.

Caudad (*kaw'-dad*) [*cauda*; *ad*, to]. Toward the tail or cauda, opposed to cephalad; in man, downward.

Caudal (*kaw'-dal*) [*cauda*]. Pertaining to a cauda or tail.

Caudate (*kaw'-dāt*) [*cauda*]. Having or resembling a tail. **C. Lobe of Liver**, a small lobe of the liver. **C. Nucleus**, the intraventricular portion of the corpus striatum. **Caudation** (*kaw'-dā'-shun*) [*cauda*]. 1. The condition of being furnished with a tail. 2. Elongation of the clitoris.

Caudolenticular, Caudolenticular (*kaw'-dāt-len-tik'-u-lar*, *kaw'-dō-len-tik'-u-lar*). Pertaining to both the caudate and the lenticular nuclei.

Caudatum (*kaw'-dat'-um*). See *Corpus striatum*.

Caudex (*kaw'-deks*) [L., "a tree-stem"] 1. In biology, applied to the scaly, unbranching trunk of a palm-tree or tree-fern. 2. The main portion of the brain-stem, the fibers running from the spinal cord to the hemispheres of the brain. **C. dorsalis**. 1. The spinal cord. 2. The oblongata. **C. encephali**, the cerebral peduncle. **C. encephali communis**, the oblongata and crus cerebri. **C. encephali pontilis**, the pons. **C. medullaris**, the cerebral peduncle.

Caudiferous (*kaw'-dīf'-er-us*) [*cauda*; *ferre*, to bear]. Having a tail or tail-like appendage.

Caul (*kawl*) [M.E., *calle*, a hood]. 1. A portion or all of the fetal membranes covering the head and carried out in advance of it in labor. 2. The great omentum.

Cauliflower Excrescence. A tumor with an irregular surface resembling the cauliflower.

Caulophyllum (*kaw'-lo-fīl'-um*) [*καυλός*, stalk; *φύλλον*, leaf]. Blue cohosh; "squaw-root"; the rhizome and rootlets of *C. thal-*

ictroides, growing in Canada and the northern United States. It contains a glucosid, saponin, and two resins, one of which is caulophyllin. It produces intermittent contractions of the gravid uterus, and possesses diuretic, emmenagog, and antispasmodic powers. There are no official preparations. Dose of the powdered drug 5-20 gr. (0.32-1.3 Gm.); of caulophyllin 2-5 gr. (0.13-0.32 Gm.).

Cauloplegia (*kaw'-lo-ple'-je-ah*) [*καυλός*, a stalk; *πληγή*, a stroke]. Paralysis affecting the penis.

Caulosterin (*kaw'-los'-ter-in*) [*καυλός*, n stalk; *στερίος*, solid], $C_{26}H_{44}O$. An aromatic compound occurring in the root and stem of seedlings of the yellow lupine which have grown in the dark. It is levorotary, forming lustrous plates which melt at 158°-159° C.

Causalgia (*kaw'-zāl'-je-ah*) [*καυσός*, a burning; *άλγος*, pain]. The burning pain that is sometimes present in injuries of the nerves.

Caustic (*kaw'-tik*) [*causticum*, caustic]. 1. Very irritant; burning; capable of destroying tissue. 2. A substance that destroys tissue. **C. Alkali**, a pure alkaline hydrate or oxid. **C., Lunar** (*argenti nitras fusus*, U. S. P.), silver nitrate. **C., Metallic**, one containing a metal or a metallic salt. **C., Mitigated** (*argenti nitras mitigatus*, U. S. P.), silver nitrate made less active by fusion with potassium nitrate or argentic chloride. **C., Perpetual**, fused silver nitrate. **C. Potash**, potassium hydroxid. **C. Soda**, sodium hydroxid.

Cauterant (*kaw'-ter-ant*) [*καυτήρ*, a burner]. 1. Caustic; escharotic. 2. A caustic substance.

Cauterism (*kaw'-ter-izm*). See *Cauterization*.

Cauterization (*kaw'-ter-iz-ā'-shun*) [see *Cautery*]. The application of a cautery; the effect of such an application. **C., Distant**, that performed by holding the cautery at some distance from the surface to be cauterized. **C., Galvanochemic** (Apostoli's), the destruction of the mucosa by means of electrolytic action. **C., Inherent**, deep cauterization by means of the actual cautery. **C., Neapolitan**, deep cauterization through an incision. **C., Objective**. See *C., Distant*. **C. by Points**, **C., Punctate**, deep cauterization with a pointed cautery. **C., Slow**, that performed with moxa. **C., Subcutaneous**, deep cauterization by injection of caustics or by inclosing the cautery in a tube so as not to affect the superficial parts. **C., Tubular**, Tripler's operation of charring the walls of an opening made into a cyst by means of an instrument connected with the negative pole of a battery.

Cauterize (*kaw'-ter-iz*) [see *Cautery*]. To sear or burn with a cautery or a caustic.

Cautery (*kaw'-ter-e*) [*καυτήριον*, a branding-iron]. A metal instrument heated by the electric current or in a flame, used to destroy tissue or for producing counter-irritation. Syn., *Inustorium*. **C., Actual**, the white-hot iron. **C., Button-**, an iron heated in hot

- water. **C.**, **Galvanic**, a platinum wire heated by electricity. **C.**, **Nummular**, a cautery iron fitted with a coin-shaped disc. **C.**, **Paquelin's**, a hollow platinum point kept at a uniform temperature by a current of benzene vapor; a thermocautery. **C.**, **Potential**, **C.**, **Virtual**, the application of caustic substances. **C.**, **Solar**, a lens for concentrating the rays of the sun upon a part to be cauterized. **C.**, **Steam**. See *Atmocautis*. **C.**, **Thermo-**. See *Thermocautery*.
- Cava** (ka'-vah) [L.]. 1. A vena cava. 2. Any external cavity or hollow of the body.
- Caval** (ka'-val) [cava]. Relating to a vena cava.
- Cavalry-bone** (ka'-val-ri-bōn). A bony deposit in the adductor muscles of the thigh.
- Cavascop** (ka'-a-skop) [cava; *scop*, to view]. An apparatus for illuminating a cavity.
- Cavern** (ka'-ern) [caverna, a hollow]. A cavity in the lung due to necrosis of the parenchyma; also the cavity of a dilated bronchus. **C.**, **Brand**, one due to gangrenous destruction of a circumscissed segment of the lung parenchyma.
- Cavernitis** (ka'-er-ni'-tis). Inflammation of the corpora cavernosa.
- Cavernoma** (ka'-ern-ō'-mah) [cavern; *ōma*, a tumor]. A cavernous tumor, a cavernous angioma.
- Cavernous** (ka'-er-nus) [cavern]. Having hollow spaces. **C.**, **Bodies**, the corpora cavernosa of the penis. **C.**, **Breathing**, the breath-sounds heard over a pulmonary cavity. **C.**, **Groove**, the carotid groove. **C.**, **Plexus**. See *Plexus*, *Cavernous*. **C.**, **Sinus**, a venous sinus situated at the side of the body of the sphenoid. **C.**, **Tissue**, erectile tissue. **C.**, **Tumor**, a cavernous angioma.
- Cavitary** (ka'-it-ee) [cavitaris, hollow]. Hollow, having or forming cavities.
- Cavité Fever**. See *Fever*, *Cavité*.
- Cavity** (ka'-it-ee) [cavum]. A hollow. See under *Abdominal*, *Amniotic*, *Cotylod*, *Glenoid*, and *Serous*. **Cavities**, **Cerebral**, the ventricles of the brain. **C.**, **Cranial**, the hollow of the skull. **C.**, **Epiploic**, the omentum. **C.**, **Oral**, that of the mouth. Syn., *Cavum oris*; *Spatium oris*. **C.**, **Pleural**, the closed space of the pleura included between its parietal and visceral layers. **C.**, **Pleuroperitoneal**, the celom or body cavity. **C.**, **Preperitoneal**. See *Retzius' Space*. **C.**, **Sigmoid**, one of two depressions on the head of the ulna for articulation with the radius and humerus.
- Cavum** (ka'-vum) [L.]. A cavity.
- Cayaponin** (ka-ap'-ō-nin) [Cayaponia, Brazilian name]. An alkaloid extracted from *Cayaponia glabra*, a cunduribaceous plant of Brazil. It is said to purge without griping. Dose: 1 gr. (0.06 Gm.).
- Cayenne Pepper** (hi'-en). See *Capivum*.
- Cazenave's Lupus**. *Lupus erythematosus* *C.'s Vitiligo*. See *Celsus' Area*.
- Cc.**, **c.c.** Abbreviations of *cubic centimeter*.
- Cd.** Symbol for *cadmium*.
- Ce.** Symbol for *cerium*.
- Ceanothin** (se-an-ō'-thin). 1. A brown powder obtained from *Ceanothus americanus*. It is purgative and alterative, and is used in syphilis, dysentery, and sore throat. Dose: 1-2 gr. (0.065-0.13 Gm.). 2. An alkaloid isolated from *Ceanothus americanus*, slightly soluble in alcohol and ether.
- Cearin** (se'-ar-in). An ointment-base consisting of carnauba wax, 1 part, paraffin, 1 part, melted together and mixed with 4 times its weight of liquid petrolatum.
- Cebocephalus** (se-bo-sef'-al-us) [*keph*, a monkey, *ceph*, head]. A variety of *Amelobaptis* monkeys of the species *Cebrocephalus*, in which there is entire absence of the nose, with, however, two orbital cavities and two eyes, the region between the eyes being narrow and perfectly flat.
- Cebur** (se'-bur). See *Baboon*, *Tagideus*.
- Cecal** (se'-kal) [cecum]. Pertaining to the cecum.
- Cecectomy** (se-sek'-tō-mē) [cecum, *tomē*, a cutting]. Excision of part of the cecum.
- Cecitis** (se-si'-tis) [cecum; *itis*, inflammation]. Inflammation of the cecum.
- Cecoceles** (se'-ku-sē) [cecum; *celes*, hernia]. A hernia into the cecum. Syn., *Typlocele*.
- Cecostomy** (se-kos'-tō-mē) [cecum, *stoma*, a mouth]. The formation of an artificial anus in the cecum.
- Cecum** (se'-kum) [caecus, blind]. The large blind pouch or cul-de-sac in which the large intestine begins.
- Cedar** (se'-dar) [cedrus, cedar]. One of the genus of coniferous trees, *Cedrus*. **C.-oil**, a transparent oil obtained from *Juniperus virginiana*, and used as a clearing agent in histology and for oil immersion lenses.
- Celandin** (sel'-an-din). See *Chelidonium*.
- Celarium, Celarium** (se-la'-ee-um). The epithelium of the cecum.
- Celastrin** (se-las'-trin). 1. Mossé's name for a poisonous alkaloid obtained from the leaves of *Catha edulis*. It resembles caffeine physiologically, though more energetic, and differing essentially from it. Syn., *Alkaloid*. 2. A bitter principle found in *Thapsia* and in the leaves of *Celastrus scandens*. 3. A substance forming minute white crystals found by Wayne in *Celastrus scandens*.
- Celastrus** (se-las'-trus) [*kystron*, an evergreen tree]. A genus of trees and shrubs, closely allied to *Euonymus*. *C. paniculatus* is a climbing shrub of India; the oil from the seeds (oleum nigrum) is a powerful emollient and diaphoretic in gout and fevers. *C. scandens*, of North America, is cathartic, diuretic, and alterative. *C. occidentalis* is a native of Abyssinia, the leaves, and root are used in malaria, they contain also a bitter principle, *celastrin*, and a volatile oil.
- Celia** (se'-le-ah) [celia, belly]. 1. The belly, the stomach. 2. A ventricle of the brain.

Celiac (*se'-le-ah*) [*celia*]. Abdominal; pertaining to the belly. **C. Artery**. Same as **C. Axis**. **C. Axis**, a branch of the abdominal aorta; it divides into the gastric, hepatic, and splenic arteries. See under **Artery**. **C. Ganglion**. See **Ganglion**, **Semilunar**. **C. Plexus**, a sympathetic nerve-plexus situated about the origin of the celiac axis.

Celiacomesenteric (*se-le-ah-o-mes-en-ter'-ik*). Relating to the celiac and mesenteric regions.

Celialgia (*se-le-ah'-je-ah*) [*celia*; *ἀλγος*, pain]. Pain in the abdomen.

Celian, **Celine** (*se'-le-an*, *se'-lin*). Same as **Celiac**.

Celiacneurysm (*se-le-an'-u-rizm*) [*celia*; *διεύρυσμα*, a widening]. An abdominal aneurysm.

Celiectasia (*se-le-ek'-la'-se-ah*) [*celia*; *ἐκτασις*, a stretching-out]. Abnormal distention of the abdominal cavity.

Celiectomy (*se-le-ek'-to-me*) [*celia*; *ἐκτομή*, a cutting]. Excision of an abdominal organ.

Celiemia (*se-le-e'-me-ah*) [*celia*; *αἷμα*, blood]. Hyperemia of the abdominal viscera.

Celiitis, **Cœliitis** (*se-le-i'-tis*) [*celia*; *εἰς*, inflammation]. Inflammation of the abdominal organs.

Celiocèle, **Cœliocèle** (*se'-le-o-sel*) [*celia*; *κῆλη*, a hernia]. Abdominal hernia.

Celiodynia, **Cœliodynia** (*se-le-o-din'-e-ah*) [*celia*; *δύνη*, pain]. Pain in the abdomen.

Celiogastrotomy (*se-le-o-gas-trot'-o-me*) [*celia*; *γαστήρ*, stomach; *τομή*, cutting]. The opening of the stomach through abdominal incision.

Celiohysterectomy (*se-le-o-his-ter-ek'-to-me*) [*celia*; *ὕστερα*, womb; *ἐκτομή*, a cutting out]. 1. Excision of the uterus through an abdominal cut. 2. Porro-cesarean section.

Celiomyitis, **Cœliomyitis** (*se-le-o-mi-i'-tis*) [*celia*; *μῦς*, muscle; *εἰς*, inflammation]. Inflammation of the muscles of the abdomen.

Celioschisis (*se-le-os'-his-is*). Same as **Gastroschisis**.

Celioscope (*se'-le-o-skōp*) [*κοίλος*, a hollow; *σκοπεῖν*, to examine]. An apparatus for illuminating and inspecting body-cavities.

Celioscopy, **Cœlioscropy** (*se-le-os'-ko-pe*). Kelling's method of examining the peritoneal cavity by filling it with sterile filtered air through a hollow needle, plunging a trocar through the distended abdominal wall, and passing through the trocar a cystoscope by means of which the adjacent peritoneal surface may be inspected.

Celiotomy (*se-le-of'-o-me*) [*celia*; *τομή*, a cutting]. Surgical opening of the abdominal cavity.

Cell (*sel*) [*cella*, a small, hollow cavity]. 1. A granular mass of protoplasm containing a nucleus. The typical adult cell consists of protoplasm or cell-contents, a nucleus, and, within the latter, one or more nucleoli. The cell may or may not have a cell-wall. The protoplasm consists of two parts—the *spongoplasm* and the *hyaloplasm*. The

nucleus is made up of a nuclear membrane, nuclear fibrils (*chromatin*), and nuclear matrix (*achromatin*). The *nucleolus* is a highly refracting body the function of which is not known. 2. A galvanic element or single member of a galvanic battery without the connecting wire between the metals. **C.**, **Acidophil**, one which attracts acid dyes. **Syn.**, *Oxyphil cell*. **C.s**, **Adelomorphous**, epithelial cells composing the chief part of the lining of the glands of the stomach, particularly the pyloric region. They are supposed to secrete pepsinogen. **Syn.**, *Central cell*; *Peptic cell*. **C.**, **Adventitial**. 1. A branched cell peculiar to the perithelium. 2. A stellate cell of the *membrana propria* of glands. **C.**, **Air**-. See *Air-cell*. **C.s**, **Amacrine**, spongioblasts of the inner nuclear layer of the retina; they lack long processes, though sometimes axis-cylinder processes are given off which may extend into the nerve-fiber layer. The bodies of these cells are often partly in the inner molecular layer. **C.**, **Ameboid**, a cell capable of changing its form and of moving about like an ameba. **C.**, **Apolar**, a nerve-cell without processes. **C.**, **Beaker**-. See *C.*, *Goblet*-. **C.**, **Binary Nerve**-, two pyriform nerve-cells contained in a single sheath and each provided at its pointed end with a single nerve-fiber; these radiate in opposite directions. **C.**, **Bone**-. See *Osteoblast*. **C.**, **Brush**-. See *C. of Deiters*. **C.s**, **Calcigerous**. 1. Cells containing earthy salts found in dentin. 2. Muller and Henle's name for the lacunas of bone and their canaliculi. **C.-capsule**, a thick or unusually strong cell-wall. **C.s**, **Centroacinar**, **C.s**, **Centroacinous**, little cellular masses found by Robert Langerhans in the interstitial connective tissue of the pancreas. **Syn.**, *Langerhans' islets*; *Renaut's follicular points*. **C.**, **Chromatophore**, a cavity directly beneath the epidermis containing pigment and changing its shape and color by means of attached radiating muscular bands. **C.**, **Ciliated**, one provided with cilia. **C.**, **Cleavage**, a segmentation-cell. **C.**, **Columnar**, one of the elongated cells forming columnar epithelium. **C.s**, **Commissural**. Same as *C.*, *Heteromeral*. **C.-cones**, the cancer-nests of a squamous epithelioma—so called from their conic shape. **C.**, **Constant**, the galvanic element of a constant battery. **C. of Corti**, any one of the hair-cells on the outer surface of the organ of Corti. **C.-cover**, the cuticular layer. **C.**, **Cover**-. See *C.*, *Tegmental*. **C.**, **Cylindric**, a variety of epithelial cell shaped like a miniature cylinder. **C.**, **Cytochrome**, a nerve-cell having a cell-body very small in proportion to its nucleus. **C.**, **Daughter**-, a cell originating from the division of the protoplasm of a mother-cell. **C.s**, **Decidual**, a proliferation of young connective-tissue cells above the uterine glands taking place after the ovum is impregnated. **C. of Deiters**, one of the cells with fine processes resting on the basilar

membrane of the cochlea, beneath the air-cells, also a neuroglia cell. **C.s., Delomorphous**, Rollet's name for granular cells which stain deeply, occurring next the basement-membrane in the glands of the stomach in the cardiac region. They are supposed to secrete acid. **C.s., Demilune**, granular protoplasmic cells found in mucous glands, lying between the mucous cells and the basement-membrane. **Syn., Cells of Giannuzzi**. **C., Dentin**, **C., Dentinal**. 1. An odontoblast. 2. One of the lacunas in dentin similar to those in bone. 3. One of the bodies forming the matrix in dentin. **C.-doctrine**, the theory that the cell is the unit of organic structure, and that cell-formation is the essential process of life and its phenomena. **C., Eleinentary**, an embryonic cell, also a leukocyte. **C., Embryo**, **C., Embryonic**, one arising from the division of the ovum. **Syn., Elementary cell; Formative cell; Primary cell; Primitive cell; Primordial cell**. **C.s., Embryoplastic**, cells originating from the mesoblast and becoming stellate or fusiform; they comprise the fixed connective-tissue corpuscles in developing connective tissue. **Syn., Fibroplastic bodies or cells**. **C.s., Endothelial**, flat cells found on the inner surface of vessels and spaces that do not communicate directly with the external air. **C., Epidermic**, **C., Epithelial**. See *Epithelium*. **C., Epithelioid**, one of the flattened cells forming an epithelial or endothelial covering in forms of membranous connective tissue. **C.s., Ethmoid**, the cellular cavities of the lateral masses of the ethmoid bone. **Syn., Ethmoidal sinuses**. **C., External Ciliated**. See *C. of Corti*. **C., Fiber-**, a cell elongated into a fiber. **C., Fibrillated**. 1. See *Heidenhain's Rods*. 2. One of the fibrillated cells lining the interlobular ducts of the salivary glands. **C.-fusion**, cell-fusion. **C.s., Follicular**. 1. Those of which the membrana granulosa is composed. 2. See *Serres's Columns*. **C.s., Foale's**, large cells containing one or more nuclei as large as or larger than a red blood-corpuscle, with regular or irregular outline, they have been supposed to be diagnostic of malignant ovarian cysts. **C., Fusiform**, a spindle-cell. **C., Ganglion-**, a large nerve-cell, especially that found in the spinal ganglia. **C., Giant-**, large multinuclear cells occurring in tuberculosis and other infection granulomas, in bone, in giant-cell tumors, etc. **C. of Giannuzzi**. See *C.s., Demilune*. **C.s., Glia-**, neuroglia. **C., globulina**, Haffkisson's name for forms of globulin that occur in lymph-corpuscles and can be extracted from them by solutions of sodium chloride. **C., Goblet-**, an epithelial cell that has been bulged out like a goblet by the presence of mucus. **C.s., Golgi's**, nerve cells with very short processes found in the gray matter of the brain and spinal cord. **C., Grove**, a two-fluid battery cell, the fluids being dilute sulfuric and nitric

acids and the metals immersed in them respectively zinc and platinum. **C., Hecateromeric**, **C., Hecatomer**, a nerve-cell of the cortex of the spinal cord whose processes divide into two, one going to each side of the cord. **C., Heckle**, a prickle cell. **C.s., Heidenhain's**. 1. See *C.s., Delomorphous*. 2. See *C.s., Adelomorphous*. **C., Heteromeric**, **C., Heteromer**, a nerve-cell in the cortex of the spinal cord, the axons of which pass through one of the commissures and enter the white matter of the other side of the cord. **Syn., Commissural cell**. **C., Histogenetic Wandering**, a migratory connective-tissue cell or glandular cell, a wandering cell that is not a leukocyte. **C.s., Horn-**, **C.s., Horny**, those comprising the stratum corneum of the epidermis, they are homogeneous cells containing keratin, and are modified to form nails, hoofs, hair, etc. **C.s., Imbricated**, those overlapping like roof tiles. **C.-islets**, the centers of most active growth in young cellular tissues. They contain the stores of nutriment that are gradually dissolved and digested. **C.s., v. Kölliker's**. 1. Little cells of the seminiferous tubules which are transformed into spermatozoa. 2. See *Myeloplax*. **C.s., v. Kölliker's Tract-**, ganglion-cells the axons of which pass as longitudinal fibers into the white columns of the spinal cord. **C.s., Liver-**, nucleated polyhedral or spheroid cells containing granules of glycogen and pigment and more or less fat, forming the glandular substance of the liver. **C., Locomotive**, one endowed with power of movement, especially a ciliated cell. **C., Lymphoid**, a small, round, connective-tissue cell containing a relatively large nucleus. **C.s., Mast-**, leukocytes containing coarse basophilic granules. They are occasionally present in the peripheral circulation as the result of certain pathological influences, but are totally foreign to the normal blood of man. They are commonly found in the splenomedullary type of leukemia. The granules of the mast-cell show an intense affinity for basic aniline dyes, toward which they react metachromatically. In view of their distinctive behavior toward selective stains for mucin, Harris suggests for the mast-cell the term *mucinolast*. **C.s., Medullary**. 1. Marrow-cells. 2. The amorphous cells of cartilage-bone. **C., Mother-**, a cell that divides its protoplasm and gives each part a new cell-wall. **C., Motor**, a nerve-cell generating impulses. **C., Mucin-**, **C., Mucous**, **C., Mucus-**, a cell which secretes mucus, particularly a kind of salivary cell secreting mucus, but no albumin. **C.-multiplication**, cytogenesis, a name given to the process of reproduction of cells. It may be *direct*, as when a cell constrains and cuts off a part of itself, or *indirect*, when the division is preceded by the cycle of nuclear changes known as karyokinesis. **C.s., Musculo-**, a general term for cells the

substance of which is contractile. **C., Myeloid.** 1. See *Myeloplax*. 2. Applied, from its resemblance to a cell of the red marrow of bone, to one of the oval multinuclear cells of myeloid tumors. **C., Naked,** one unprovided with a cell-wall. **C.-nests,** a collection of epithelial cells closely packed together and surrounded by a connective-tissue stroma. Cell-nests are found in carcinomas. **C., Neuroglia,** one of the cells of the neuroglia; flat, round cells, especially numerous about blood-vessels and the pia mater. **C., Neutrophil.** See *C., Acidophil.* **C., Nuclear,** a nucleated dendritic nerve-cell. **C., Nucleated,** a cell containing one or more nuclei. Syn., *Karyote*. **C.s, Oxyntic.** See *C.s, Delomorphous*. **C., Oxyphil.** See *C., Acidophil.* **C.s, Palatine,** the cells formed by the junction of the palatine and ethmoid bones. **C.s, Plasma-** 1. (Of Unna.) Cubic or rhombic cells, the protoplasm of which stains deeply with methylene-blue, while the nucleus, which has usually an eccentric situation, is readily decolorized (by eosinate or styrene). They are probably derived from lymphocytes, and play an important part in inflammatory reactions, especially in granulomatous processes. 2. (Of Waldeyer.) Nucleated cells of varying size and shape, with voluminous, coarsely granular protoplasm, found in connective tissue, especially about the blood-vessels. **C.-plate.** 1. The equatorial plate in which division of the nucleus occurs during karyokinesis. 2. (Of Strasburger.) The equatorial thickening of the spindle-fibers from which the septum arises during the mitosis of plant-cells. **C.-plate, Subendothelial,** a small granular cell of unknown function occurring in the intima of blood-vessels. **C., Porous.** 1. One containing an opening in the side. 2. A porous jar containing one of the liquids of a galvanic battery. **C., Prickle-** See *Prickle-cell*. **C., Primary.** 1. An embryonic cell. 2. Any undifferentiated cell. **C., Protective.** See *C., Tegmental*. **C.s, Pseudoplasma,** cells found in normal human spleen and differing from plasma-cells in that they are larger, and possess twisted nuclei which do not present the characteristic chromatin arrangement. They appear to be a variety of large mononuclear leukocyte, the protoplasm of which has become basophilic. **C.s, Ranvier's,** connective-tissue corpuscles occurring in tendon. **C., Roof.** 1. See *C., Tegmental*. 2. One found on the convexity formed by the junction of the two rows of arches in the organ of Corti. **C., Salivary,** one of those forming the lining of the alveoli of the salivary glands. **C., Sarcogenic,** an embryonic cell which develops into a muscular fiber. **C., Segmentation.** See *Blastomere*. **C.s, Sense-, C.s, Sensory,** those adapted for the reception and transmission of sensory impressions. **C.s, Sensory Epithelial,** modified epithelial cells in an organ

of sense connected with the fibrils of the nerves of that organ. **C., Sensory Nerve-** a nerve-cell the axis-cylinder process of which is supposed to be continued as a sensory nerve. **C., Septate,** one with a septum across its lumen. **C., Serous Fat-** a fat-cell occurring in emaciated individuals, in which the fat is reduced to a few small globules and in its place there is a pale protoplasm mixed with a mucoid fluid, the cell is no longer spheric. **C., Simple,** one which has not undergone differentiation. **C., Sister-** one formed simultaneously with another in the division of a mother-cell. **C., Sorby Tubercular,** for spectroscopic examination of blood. It is a narrow-lumen glass receptacle made of barometer tubing, both ends of which are accurately ground to parallel surfaces, one end being cemented to a small polished glass plate. **C.-spaces.** See *Canals of Recklinghausen*. **C., Spider-** See *C. of Deiters*. **C., Spindle-** a cell having a fusiform shape. **C., Spiral Fiber-** a motor cell of the heart, having a spiral fiber coiled around a larger straight one. These separate, after a short distance, proceeding in different directions. The cell constantly disengages the excitation which the spiral fiber transmits to the heart-muscle. Syn., *Beale's cell; Spiral fiber ganglion-cell*. **C.s, Splanchnic,** those of the splanchnic layer of the mesoderm. **C.s, Squamous,** a variety of epithelial cells found on the surface of the skin and certain mucous membranes and characterized by their scale-like flatness. **C.-stations,** cells in the sympathetic ganglion around which the nerve-fibers arborize. **C., Sterile,** one occurring in a reproductive organ, but not participating in reproductive processes. **C.s, Stilling's,** groups of multipolar cells near the gray commissure in the posterior cornua of the cervical and lumbar spinal cord. They correspond to Clarke's vesicular column. **C.s, Stroma,** those forming the mass of an organ. **C., Swarm,** a naked ciliated cell. **C., Sympathetic,** a nerve-cell of the sympathetic nervous system as distinguished from one of the cerebrospinal system. **C., Tapetal, C., Tapetum,** one which forms or aids others in forming an investment over an organ. **C., Tegmental,** one covering and protecting another cell of special function, as, e. g., these forming the outer layer of the taste-buds. Syn., *Cover-cell*. **C., Twin,** a single cell resulting from the fusion of two cells. **C., Two-fluid,** a galvanic element in which two fluids are used. **C., Vasoactive, C., Vasoformative,** a cell that anastomoses with other similar cells so as to form blood-vessels. **C.s, Vortex,** Meyer's term for cortex cells which show a peculiar whorl-like and very regular arrangement of the chromophilic material. **C.-wall,** the membrane surrounding a cell. **C., Wandering,** a leukocyte. **C., Whip-** a cell furnished with flagella. **C., Zinc-carbon,** a galvanic cell in which zinc

- and carbon are the two elements employed. **C., Zinc-copper**, a galvanic cell in which zinc and copper are the elements employed.
- Celloidin** (sel-oid'-in) [cell., eldoid, form]. A concentrated form of colloidal for use in embedding objects for histologic purposes.
- Cellular** (sel'-u-lar) [cell]. Relating to or composed of cells. **C. Pathology**. See *Pathology*, *Cellular*.
- Cellule** (sel'-ul) [cellula, a small cell]. A small cell.
- Cellulic** (sel'-u-lik). Relating to cells; derived from cell-walls by action of acids or alkalis.
- Cellulicidal** (sel'-u-lis' id-ul) [cellule; cedere, to kill]. Destructive to cells.
- Cellulifugal** (sel'-u-lis' u-gul) [cellule; fugere, to flee]. Pertaining to the transmission of impulses from a nerve-cell.
- Cellulipetal** (sel'-u-lip'e-tal) [cellule; petere, to seek]. Relating to the transmission of impulses toward a nerve-cell.
- Cellulitis** (sel'-u-lis' tis) [cellule; erig, inflammation]. A diffuse inflammation of cellular tissue. Syn. *Erimyphytia*. **C., Ischiorectal**, inflammation of the cellular tissue lying below the anal levator muscle or anal fascia. **C., Pelvic**. See *Parametritis*. **C., Pneumococcus**, that due to the invasion of pneumococci.
- Cellulodipose** (sel'-u-lis' ip-ōs). Relating to loose connective tissue containing fat-cells.
- Cellulocutaneous** (sel'-u-lis' ku-tā-ne-us) [cellule, cutis, skin]. Relating to cellular tissue and the skin.
- Cellulofibrinous** (sel'-u-lis' brin-us). Both cellular and fibrinous.
- Cellulosa** (sel'-u-lis' sah) [L.]. A cellular coat. **C. chorioideæ**, the external layer of the choroid coat of the eye.
- Cellulose** (sel'-u-lis' sah) [cellule; C₆H₁₀O₅]. Wood-fiber, lignose, the principal ingredient of the cell-membranes of all plants. It is a white, amorphous mass, insoluble in most of the usual solvents. **C., Reagent for**. See *Schulze*, *Schulze*.
- Cellulosity** (sel'-u-lis' e-ty). The condition of being cellular.
- Celom, Celoma** (se-lō-m, se-lō'-mah) [analog, a cavity]. The embryonic body-cavity.
- Celosis** (se-lō'-sis) [analog, hollow]. The formation of any cavity. **C., Endocytic**, the formation of a cavity within a cell. **C., Paracytic**, the formation of a cavity between cells.
- Celosoma** (se-lō'-sō-mah) [analog, hollow; soma, the body]. A species of single ant-kitt mon-ster characterized by more or less extensive body-defect, with evagination, associated with various anomalies of the extremities, of the genitourinary apparatus, of the intestinal tract, and even of the whole trunk.
- Celotomy** (se-lō'-sō-mah) [analog, hernia; to cut]. The operation for strangulated hernia by incision of the stricture.
- Celsus' Area**. At pectus areata. **C.'s Chancre**, the soft chancre or chancroid. **C.'s Kerion**, suppurating ringworm, a pustular inflamma-
tion of the hair-follicles of the scalp in trico-
tonsurans. **C.'s Papules**, a form of acute-
papular eczema (lichen agrius).
- Cement** (sem'-ent) [cimentum, a rough stone].
1. Any plastic material capable of becoming
hard and of binding together the objects that
are contiguous to it. 2. Filling material for
the teeth, the crista petrosa of the teeth.
C.-substance, the substance holding together
the endothelial cells of the intima of blood
vessels.
- Cementation** (sem-en-tā' shun) [cement].
1. A process of causing a chemical change
in a substance by surrounding it with the
powder of other substances and exposing
the whole to red heat in a closed vessel for
a length of time. 2. In biology, the con-
crescence of hyphae.
- Cementum** (se-mēnt'-um). A layer of bone
developed by ossification of the dental fol-
licle over the root of the tooth. It differs
from ordinary bone by the greater number
of Sharpey's fibers in it. Its development
begins on the milk-teeth during the fifth
month.
- Cenadelphus, Coenadelphus** (sen-a-del' f-us)
[kenadē, common; adelphos, a brother]. A
double monster with the halves capable of de-
veloped or having one or more vital organs
in common.
- Cenencephalocoele** (sen-en-sef' a-lō-sē-ty). See
Kenencephalocoele.
- Cenesthesia** (sen-es-the'-ze-ah). See *Kenesthe-
sia*.
- Cenesthesia** (sen-es-the'-ze-ah). See *Kenesthe-
sia*.
- Cenosis** (sen-o-sis). See *Kenosis*.
- Cenotic** (sen-o-tik). See *Kenosis*.
- Centaurea** (sen-tau'-re-ah) [centaurus, centaur].
A genus of composite-flowered herbs. See
Carduus.
- Centaury** (sen'-tau-ry) [centaurus]. A popular
name for various plants of the genera *Cen-
taurea*, *Erythraea*, *Sabbatia*, *Chelidonium*, etc.,
especially *Erythraea centaureum*, which is
used as a simple, bitter tonic. Dose: ʒ i
dr. (2-4 Gm.) in decoction several times a day.
Umf.
- Center** (sen'-ter) [centrum, the center].
1. The middle point of any surface or of a body.
2. The ganglion or plexus whence issue the
nerves controlling a function. **C., Accelerating**, a center in the medulla sending
accelerating fibers to the heart. These leave
the cord through the branches of communication
of the lower cervical and upper six dorsal
nerves, passing thence into the sympathetic.
C., Anovesical, one in the spinal cord near
the point of origin of the third and fourth
sacral nerves. Incontinence of urine and
feces is due to paralysis of this center. **C.,
Arm**, the cortical center controlling the
movement of the arm, supposed to be in the
cortex occupying the middle third of the
anterior and posterior central gyri as well
as the base of the superior and middle frontal
gyri. **C., Articulate Language**, the speech-
coordinating center, which is supposed to

include Broca's gyrus, the anterior gyri of the insula, the intervening cortical area, the supramarginal gyrus, the first temporal gyrus, and the angular gyrus. **C., Auditory**, a center in the first temporosphenoid convolution upon each side. **C., Broca's**. See **C., Speech**. **C., Cardiac**. 1. One in the lower cervical and upper dorsal portions of the spinal cord which controls the movements of the heart. 2. That portion of the oblongata embracing the cardioaccelerator and cardioinhibitory centers. **C., Cardioaccelerator**, that of the spinal cord which through the cardiac nerves and plexus sends impulses to the heart, causing it to beat more rapidly. These impulses are not constantly emitted, as are the inhibitory impulses which travel by the pneumogastric. **C., Cardioinhibitory**, in the medulla, efferent impulses being carried by the vagus. **C., Cerebral Inspiratory**, one said to exist in the thalamus, which by direct stimulation causes deeper and more rapid inspirations. **C., Cerebrospinal**, the cerebrospinal axis. **C., Ciliospinal**, connected with the dilation of the pupil; it is in the lower cervical part of the cord, and extends downward from the first to the third dorsal. **C., Color**, a center for perception of colors, said to be situated in the occipital cortex anterior to the apical region. **C., Convulsional**, a hypothetic center said to lie in the floor of the fourth ventricle. **C., Coordinating**, the cerebellum, the ganglions at the base of the brain, and in some degree the cinerea of the spinal cord, are regarded as controlling coordination. **C., Cortical**, the parts of the cerebral cortex concerned in motor, sensory, and psychic functions. **C., Coughing**, in the medulla, above the inspiratory center. **C., Deglutition**. See **C., Swallowing**. **C., Deputy**, a secondary ganglion-cell in the spinal cord; also a nucleus of one of the cranial nerves. **C., Diabetic**, in the posterior part of the anterior half of the floor of the fourth ventricle, in the median line. **C., Erection**. See **C., Genitourinary**. **C., Excitomotor**, the sensitive centers of the brain considered as one; these are the crura, the pons, the oblongata, the deeper parts of the cerebellum, and the corpora quadrigemina. **C.s, Facial Movement**, one in the ascending frontal gyrus and one in the angular gyrus. **C., Genitourinary**, one in the lumbar portion of the spinal cord, but controlled from the medulla, controlling erection of the penis and emission of semen. **C., Glycogenic**, the diabetic center. **C., Half-vision**, one in the apex of the occipital lobe, receiving impressions from corresponding halves of the two retinas. **C., Head and Neck Movement**, one in the posterior end of the second frontal gyrus and in the corresponding part of the first frontal gyrus. **C., Heat-regulating**, **C., Temperature**, the center for the control of body-temperature. See **C., Ther-**

motaxic. **C., Higher Visual**, one regarded as lying in the angular gyrus, in which there is effected a combination of the impressions received from the half-vision centers, making a complete image. **C., Hitzig's**, a center in the supramarginal gyrus which is supposed to govern the voluntary movements of the eyeballs. **C.s of Inhibition**, **C.s, Inhibitory**. See **C.s of Moderation**. **C., Inspiratory**. 1. A reflex center in the oblongata forming part of the respiratory center. 2. See **C., Cerebral Inspiratory**. 3. A reflex center in the postgeminum. **C., Intracardiac**, three small nerve-ganglions connected with the cardiac plexus, to which is due the automatic beating of the heart after separation from the body. **C., Kinesthetic**, one in the third left frontal convolution presiding over the motor element in speech. **C., Laryngeal Cortical**, one in the posterior end of the inferior frontal gyrus. **C., Leg**, one in the upper portion of the ascending frontal convolution. **C. for Mastication and Sucking**, one in the medulla. **C., Median** (of Luys). See **Nucleus of Luys**. **C., Medullary**. 1. The interior white matter of the cerebral hemispheres. 2. See **C., Neural**. **C.s of Moderation**, **C.s, Moderator**, nervous centers in the spinal cord and the cerebral peduncle which restrain, generally by reflex action, various functions of the body. **C., Motor**, a nervous center controlling motion. **C., Musculotonic**, that which is continually discharging impulses which keep the muscular system in a condition of slight contraction. It is regarded by some as a special center of the cord, but it is questionable whether this condition is attributable to any special center rather than to the action of all those cells whose function it is to send out motor impulses. **C., Nerve-**, **C., Nervous**, any group of nerve-cells acting in unison for the performance of some function. **C., Neural**, in the embryo, that part of the epiblast ultimately developing into the brain and spinal cord. **C., Nutrition**. See **C., Trophic**. **C., Olfactory**, probably in the hippocampal region of the temporal lobe. **C., Opisthotic**, the center of ossification of petrous bone. Huxley's name for the part of the periotic cartilage surrounding the fenestra rotunda and the cochlea. **C. of Ossification**, the place in bones at which ossification begins. **C., Parenchymatous Nerve-**, Körner's name for a nerve-cell existing in the substance of an organ and controlling its action. **C., Parturition**, in the spinal cord, at the level of the first and second lumbar vertebrae. **C., Peristaltic**, one in the oblongata controlling peristalsis. **C., Phonation**. See **C., Laryngeal Cortical**. **C., Psychomotor**, that portion of the cortex from which motor impulses originate. **C., Psychosmic**, the olfactory center. **C., Reflex**, any nerve-cell or group of cells in the brain, cord, or ganglionic system which receives an impression through centrifugal

nerve-fibers and transforms it into an impulse which is transmitted through centrifugal nerve-fibers. **C., Respiratory**, in the medulla, between the nuclei of the vagus and accessorius. **C. for Secretion of Saliva**, on the floor of the fourth ventricle. **C., Setschenow's**, a hypothetic reflex-inhibitory center in the brain; in the frog it is located in the optic lobes. **C., Sneezing**, in the medulla. **C., Spasm**, in the medulla, at its junction with the pons. **C., Speech**, in the third left frontal convolution in right-handed people; probably the island of Reil has some influence also. **C., Sudoral**. See **C., Secret**. **C., Supreme**, Spitzka's name for the cortical centers of the brain as a whole. **C., Swallowing**, on the floor of the fourth ventricle. **C., Sweat**, the dominating center is in the medulla, with subordinate centers in the spinal cord. **C., Tactile**, one for the sense of touch, located by Ferrier in the hippocampus and the gyrus hippocampus. **C., Thermal Cortical**, one discovered in the cerebral cortex of the dog, stimulation of which caused a change in the temperature of the opposite limbs. **C., Thermoexcito**, **C., Thermogenic**. 1. A hypothetic center of the cord concerned in the changes in body temperature. 2. The medial portion of the striatum and the parts directly beneath it. **C., Thermotaxic**, six heat-regulating cerebral centers, of the four principal centers, one is located in the caudatum, one in the subjacent cinereus, one in the cinerea surrounding the most anterior portion of the third ventricle, and one at the anterior inner extremity of the thalamus. **C., Trophic**, a nerve center regulating nutrition. **C., Upper, for Dilator pupillæ**, in the medulla. **C.s, Vascular**, **C.s, Vasoconstrictor**, centers in the cord controlling the contractility of the smaller blood-vessels. **C., Vasodilator**, in the medulla. **C., Vasomotor**, in the medulla. **C., Visual**, in the occipital lobe, especially in the calcarus. **C., Vomiting**, an area in the oblongata concerned in the reflex act of vomiting; stimulation of the terminal filaments of the vagi excites its action. **C., Winking**, the reflex center concerned in winking, situated in the oblongata. **C.s, Words**. 1. One in the left superior temporoparietal gyrus controlling the perception of words heard. 2. A center in the posterior part of the left parietal lobe and one in the second left frontal gyrus governing the perception of printed or written words.

Centering (*sen-tēr-ing*) [*center*]. In microscope, the arrangement of an object or an accessory so that its center coincides with the opt. axis of the microscope. In optics, having the pupil and the optic center of the refracting lens in the same axis.

Centesimal (*sen-tē-sim-əl*) [*centum*, a hundred]. In the proportion of 1 to 100.

Centesia (*sen-tē-si-ā*) [*centisag*, a pricking]. Puncture, perforation.

Centi- (*sen-ti-*) [*centum*]. A prefix meaning one hundred.

Centifidous (*sen-tif-id-uſ*) [*centi-*, *findere*, to split]. Cleft into many or two parts.

Centigrade (*sen-tē-grād*) [*centi-*, *gradus*, a step]. Having 100 divisions or degrees. Abbreviation, **C.** **C. Thermometer**, a thermometer with zero as the freezing point and 100° as the boiling point of water. See under **Thermometer**.

Centigram (*sen-tē-gram*) [*centi-*, *gramm*, a small weight]. The hundredth part of a gram, equal to 0.154123 grain Troy.

Centiliter (*sen-tē-lī-ter*) [*centi-*, *litro*, a pound]. The hundredth part of a liter, equal to 0.0102 of a cubic inch.

Centimeter (*sen-tē-mē-ter*) [*centi-*, *metron*, a measure]. The hundredth part of a meter, equal to 0.3937 or about $\frac{1}{25}$ of an inch.

Centinormal (*sen-tē-nor-māl*) [*centi-*, *norma*, normal]. The $\frac{1}{100}$ of the normal, applied to a solution the $\frac{1}{100}$ of the strength of a normal solution.

Centrad (*sen-trād*) [*centrum*; *ad*, to]. Toward the center, or toward the median line.

Central (*sen-trāl*) [*centrum*]. Relating to the center; passing through the center. **C. Artery**, an artery in the optic nerve and retina; it passes to the optic papilla and then divides. See under **Artery**. **C. Ganglions**, the corpora striata and optic thalami. **C. Ligament**, the terminal filum of the spinal cord. **C. Lobe**, the island of Reil.

Centrality (*sen-trāl'itē*). Applied to the condition of nervous phenomena originating in the central nervous system and not in the peripheral nerves.

Centraphose, Centrophose (*sen-trāsh-fō*, *sen-trō-fō*). See under **Phase**.

Centric (*sen-trik*) [*centrum*]. Relating to a center, especially to a nerve center.

Centrifugal (*sen-trif-u-gal*) [*centrum*, *fugere*, to flee]. Revolving from the center to the periphery. **C. Machine**, one by which tubes of liquid are rapidly revolved for the purpose of driving particles floating in the liquid to the distal ends of the tubes.

Centrifugalization (*sen-trif-u-gal-iz-ā-shun*) [*see Centrifuge*]. The use of a centrifuge.

Centrifuge (*sen-trif-ū*) [*see Centrifuge*]. A centrifugal machine, an apparatus for separating substances by centrifugal force.

Centriole (*sen-trē-ol*) [*centrum*]. Rowley's term for a minute body, central horn, contained within the centrosome in some cases. It is not distinguishable from the latter.

Centripetal (*sen-trif-ē-āl*) [*centrum*, *petere*, to seek]. Traveling toward the center from the periphery.

Centro- (*sen-trō-*) [*centrum*]. A prefix meaning central.

Centrodasmus (*sen-trō-des-mus*) [*centro-*, *dasmus*, a band]. Hensen's term for the band primarily connecting the centrosomes and giving rise to the central spindle.

Centrodorsal (*sen-trō-dor-sāl*). Pertaining to the central dorsal region.

Centrolecithal (*sen-tro-les'ith-al*) [*centro-*; *lecithos*, yolk]. In embryology, having the food-yolk located centrally.

Centrosclerosis, Centroosteosclerosis (*sen-tro-skler-ō'sis*, *sen-tro-ōs-te-ō-skler-ō'sis*) [*centro-*; *sclerosis*]. Osteosclerosis of the central cavities of bones.

Centrosome (*sen'tro-sōm*) [*centro-*; *σῶμα*, body]. 1. A highly refractive body lying in the protoplasm of the ovum and other cells, and taking an active part in cell-division. Syn., *Pole-capsule*. 2. An organ of the cell, usually diminutive, lying within the nucleus or near by in the cytoreticulum. It is regarded as the especial organ of cell-division, and in this sense as the dynamic center of the cell. Syn., *Attraction-particle*; *Daughter-periplast*; *Polar corpuscle*. **C.s.**, **Quadrille of**, the conjugation of paternal with maternal centrosomes, based upon the view that each germ-cell contributes a centrosome that divides into two daughter-centrosomes. Syn., *Quadrille of centers*.

Centrosphere (*sen'tro-sfēr*). See *Sphere of Attraction*.

Centrostaltic (*sen-tro-stal'tik*) [*centro-*; *στέλις*, constriction]. Relating to the action of nervous force in a spinal center. **C.** **Motion**, the motion of nervous force in the spinal center.

Centrum (*sen'trum*) [L.]. 1. The center or middle part, the body of a vertebra, exclusive of the bases of the neural arches. 2. A spine, a pointed projection. **C.** **cinereum**, the gray commissure of the spinal cord. **C.** **commune**, the solar plexus. **C.** **geminum**, the capsule. **C.** **ovale majus**, the large mass of white matter appearing when either of the cerebral hemispheres is cut down to the level of the corpus callosum. **C.** **ovale minus**, the white matter appearing when the upper part of a hemisphere of the brain is removed. **C.** **ovale vieussensii**, the central white matter seen on making a section of the brain at the level of the upper surface of the callosum. Syn., *Centrum medullare*; *Centrum ovale majus et minus*; *Centrum semiovale vieussensii*; *Centrum ovale of Vicq d'Azyr*; *Medulla*; *Tegmentum ventriculorum*. **C.** **rubrum**. See *Nucleus tegmentii*.

Cephaelin (*sef'a'el-in*). See *Emetin*.

Cephaelis (*sef'a'el-is*). See *Ipecacuanha*.

Cephal- (*sef'al-*). See *Cephalo-*.

Cephalad (*sef'al-ad*) [*cephal-*; *ad*, to]. Toward the head.

Cephalalgia (*sef'al-al'je-ah*) [*cephal-*; *ἄλγος*, pain]. Headache.

Cephalanthus (*sef'al-an'thus*) [*cephal-*; *ἄνθος*, a flower]. A genus of rubiaceous plants. **C.** **occidentalis** is the button-bush or crane-willow of North America; its bitter bark is laxative and tonic and is used in periodic fevers and paralysis. The bark contains cephalin, cephaelin, and a toxic principle cephalanthin, which, according to Mohrberg, causes destruction of the red blood-corpuscles, vomiting, convulsions, and paralysis.

Cephaledema, Cephalœdema (*sef'al-e-de-mah*) [*cephal-*; *οἰδῆν*, to swell]. Edema of the head; cerebral edema.

Cephalhematocele (*sef'al-hem-at'-a-sēl*) [*cephal-*; *hematocele*]. A hematocele situated beneath the scalp, and communicating with a dural sinus. **C.**, **Stromeyer's**, subperiosteal cephalhematoma, communicating with veins and becoming tensely filled during strong expiratory efforts.

Cephalhematoma (*sef'al-hem-at'-o'-mah*) [*cephal-*; *hematoma*]. 1. A collection of blood beneath the pericranium, forming a tumor-like swelling. 2. **Caput succedaneum**. **C.**, **External**, an effusion between the pericranium and the skull. **C.**, **Internal**, an effusion between the dura and the skull.

Cephalic (*sef'al'ik*) [*κεφαλή*, head]. 1. Pertaining to the head. 2. Any remedy for headache. **C.** **Index**. See *Index, Cephalic*.

C. **Version**. See *Version, Cephalic*.

Cephalitis (*sef'al-i'tis*). See *Encephalitis*. **C.** **ægyptiaca**, an epidemic form of encephalitis occurring in Egypt during the hot winds of early summer. **C.** **littriana**, inflammation of the epiphyses. **C.** **meningica**, meningitis.

C. **nervosa**, pertussis.

Cephalo- (*sef'al-o-*). A prefix denoting relating to the head.

Cephaloclasia (*sef'al-o-kla'-se-ah*). See *Cephalotripsy*.

Cephalodynia (*sef'al-o-din'-e-ah*) [*cephalo-*; *δύνη*, pain]. Rheumatism affecting the occipitofrontalis muscle, the pain being chiefly experienced in the forehead or occiput, and at times involving the eyeballs.

Cephalogaster (*sef'al-o-gas'ter*) [*cephalo-*; *γαστήρ*, stomach]. The anterior division of the enteric canal, as in certain parasitic worms, where it is continued into a second division, the typhlosole.

Cephalohemometer (*sef'al-o-hem-om'-et-er*) [*cephalo-*; *αἷμα*, blood; *μέτρον*, a measure]. An instrument for noting changes in the intracranial blood-pressure.

Cephalology (*sef'al-ol'-o-jē*) [*cephalo-*; *λόγος*, science]. The science of cranial measurements and indications.

Cephalomelus (*sef'al-om'-el-us*) [*cephalo-*; *μέλος*, a part]. A form of double monster in which there is a supernumerary limb attached to the head.

Cephalomenia (*sef'al-o-me'-ne-ah*) [*cephalo-*; *μήν*, a month]. Vicarious menstruation through the nose.

Cephalometer (*sef'al-om'-et-er*) [*cephalo-*; *μέτρον*, a measure]. An instrument for measuring the head.

Cephalomyitis (*sef'al-o-mi-i'tis*) [*cephalo-*; *μῦς*, a muscle; *εἰς*, inflammation]. Inflammation of the muscles of the head.

Cephalonia (*sef'al-o'-ne-ah*) [*κεφαλή*, head]. Macrocephaly with hypertrophy of the brain.

Cephalopagus (*sef'al-op'-ag-us*) [*cephalo-*; *παῖς*, joined]. A double monstrosity having the heads united at the top.

Cephalopharyngeus (sef-al-o-far-in'-je-us). 1. Relating to the head and pharynx. 2. See under *Muscle*.

Cephaloplegia (sef-al-o-pie'-je-ah) [cephalo-; πηγή, a stroke]. Paralysis of the muscles about the head and face.

Cephalorachidian (sef-al-o-rak-id'-e-an). Same as *Cerebrospinal*.

Cephaloscopy (sef-al-oh'-ko-pe) [cephalo-; σκοπέω, to examine]. 1. Auscultation of the head. 2. Examination of the head with a view to ascertaining the condition of the mental faculties.

Cephalothoracopagus (sef-al-o-tho-rak-op'-ag-us) [cephalo-; θώραξ, thorax; παρῆς, joined]. A double-headed monster with united thoraxes and necks. These monsters are divided by Verr into *protophthoracopagus* and *syncephalus*.

Cephalotomy (sef-al-oh'-o-me) [cephalo-; τέμνω, section]. The opening or division of the head of the fetus to facilitate labor.

Cephalotribe (sef-al-o-trih) [cephalo-; τριβή, to crush]. An instrument for crushing the fetal head.

Cephalotridymus (sef-al-o-trid'-im-us) [cephalo-; τριπλός, triple]. A three-headed monster.

Cephalotripsy (sef-al-o-trip-se) [cephalo-; τριβή, a crushing]. The operation of crushing the fetal head when delivery is otherwise impossible.

Cephalotrypsis (sef-al-o-tri-pe'-sis) [cephalo-; τρυπήσις, a boring]. A trephining of the skull.

Captor (sep'-tor) [capere, to take]. A term suggested by Ehrlich in place of intermediary body. According to the manner of action he distinguishes *anticaptors* and *ambocaptors*.

Cera (se'-rah) [L.]. Wax. A mixture of cerotic acid, cerolin, and myricin, gathered by the honey bee from the pollen of flowers and the leaves of plants. *C. alba* (U. S. P.), white wax, prepared by bleaching yellow wax. It is valuable as an ingredient of cerates and ointments. *C. flava* (U. S. P.), yellow wax; it possesses an agreeable balsamic odor, and is soluble in ether, in hot alcohol, and in chloroform.

Cerasin (ser'-as-in) [ceravus, a cherry tree]. 1. An ingredient of the gum of cherry-, peach-, and plum-trees, apparently identical with bassorin. 2. A white precipitate from tincture of chokeberry.

Cerate (se'-rat) [cera]. In pharmacy, an unctuous preparation consisting of wax mixed with oils, fatty substances, or resins, and of such a consistency that at ordinary temperatures it can be readily spread upon linen or muslin, and yet is so firm that it will not melt or run when applied to the skin. *C.*, Camphor. See *Camphor Cerate*. *C.*, Cantharides. See *Cantharides Cerate*. *C.*, Goulard's. See *Goulard's Cerate*. *C.* of Lead Subacetate. See *Goulard's Cerate*. *C.*, Rosin. See *Rosin Cerate*. *C.*, Rosin, Compound. See *Rosin Cerate*.

Compound. C., Touch, a lubricant used in vaginal inspection, consisting of spermaceti, white wax, and caustic soda, each 1 part; olive-oil, 16 parts. Syn. *Ceratum penicilli*.

Cerated (se'-ra-ted) [cera]. Coated with wax.

Cerato- (ser-al-o-) See *Kerato-*.

Ceratonia (ser-al-o'-ne-ah) [carotium]. 1. A genus of leguminous trees. 2. The fruit of *C. siliqua*, the carob tree, a native of the regions about the Mediterranean. The falcate, fleshy pods, called carob pods, sugar-pods, and St. John's bread, are demulcent and pectoral and contain carolin, carobone, and carobic acid. They are used as food and form the chief constituent of much of the patented food for cattle. The seeds are used as a substitute for coffee.

Ceratum (se'-ra-tum) See *Cerate*.

Cercomonad (ser-kom'-o-nad) A member of the genus *Cercomonas*.

Cercomonas (ser-kom'-o-nas) [κέρως, tent, monad]. A genus of flagellate infusorians. *C. intestinalis*, a protozoön, occasionally found in the fecal discharges of patients suffering with typhoid fever, chronic diarrhea, or cholera. Its pathologic significance has not yet been ascertained.

Cerea flexibilitas (se'-re-ah flet'-ih-bil'-i-tas) That condition of muscular tension in the insane in which the limbs may be molded into any position.

Cereal (se'-re-ah) [Ceres, the goddess of agriculture]. 1. Relating to edible grains. 2. Any edible grain.

Cerealin (se'-re-al-in) An enzyme converting starch into glucose, isolated from brain-extract.

Cerebellar (ser-e-bel'-ar) [cerebellum] Relating to the cerebellum. *C. Tonsil*. See *Angioma* (25).

Cerebellifugal (ser-e-bel'-ah fugal) [cerebellum; fugere, to flee]. Tending from the cerebellum.

Cerebellipetal (ser-e-bel'-ah petal) [cerebellum; petere, to seek]. Tending toward the cerebellum.

Cerebellum (ser-e-bel'-um) [dim. of cerebrum]. The inferior part of the brain lying below the cerebrum and above the pons and medulla. It consists of two lateral lobes and a middle lobe.

Cerebral (ser-e-bral) [cerebrum] Relating to the cerebrum. *C. Fornix*. See *Fornix Cerebral*. *C. Gyri*, the convolutions of the brain. *C. Index*. See *Index Cerebral*. *C. Pneumonia*. See *Pneumonia Cerebral*. *C. Vesicles*, the embryonic vesicles from which the brain is developed.

Cerebrasthenia (ser-e-bras-the-ne-ah) [cerebrum; asthenia] Cerebral asthenia, cerebral neurasthenia.

Cerebration (ser-e-bral'-shun) [cerebrum] Mental activity. *C.*, Unconscious, mental activity of which the subject is not conscious.

Cerebriform (ser-e-bral'-form). See *Cerebroid*.

Cerebrin (ser-e-brin) [cerebrum] $C_{12}H_{22}NO_2$. A rancigenous glucosid obtained from brain-tissue, nerves, and pus-corpuscles.

It is a light, colorless, exceedingly hygroscopic powder. 2. A preparation from the gray matter of the brain of sheep and calves, made with equal parts of glycerol and 0.5% of phenol solution. It has been used in cholera. Dose 5-10 min. (0.3-0.6 Cc.). Syn., *Cerebrin-alpha*; *Cerebrinin*. 3. A proprietary antineuralgic elixir, said to contain analgesin, ether, caffeine, and eocain.

Cerebritis (*ser-e-bri't-is*) [*cerebrum*; *itis*, inflammation]. Inflammation of the proper substance of the cerebrum. **C.**, Local, softening of the brain.

Cerebro- (*se-re-bro-*) [*cerebrum*]. A prefix denoting relating to the cerebrum.

Cerebrocardiac (*ser-e-bro-kar'-de-ak*) [*cerebro-*; *cardia*, the heart]. Applied to diseases characterized by both cerebral and cardiac symptoms.

Cerebroid (*ser'-e-broid*) [*cerebro-*; *eidōs*, likeness]. Resembling brain-substance.

Cerebrology (*ser-e-bral'-o-jē*) [*cerebro-*; *lōgos*, science]. The science of the brain; encephalology.

Cerebromalacia (*ser-e-bro-mal'-a-se-ah*) [*cerebro-*; *malacia*, softness]. Softening of the brain tissue.

Cerebrometer (*ser-e-bram'-et-er*) [*cerebro-*; *metron*, a measure]. An instrument for recording cerebral impulses.

Cerebroolein (*ser-e-bro-o'-le-in*). A compound of olein and lecithin forming a yellow oil; it is obtained from brain tissue.

Cerebropathy (*ser-e-brap'-a-the*) [*cerebro-*; *pathos*, illness]. 1. A train of symptoms following overwork, and approaching the character of insanity. 2. Cerebral disease in general. **C.**, **Psychic**, mental disease resulting from primary lesion of the brain or spinal cord, but presenting distinct symptoms of its own.

Cerebropontile (*ser-e-bro-pon'-til*). Relating to the cerebrum and pons.

Cerebroscopy (*ser-e-bros'-ko-pe*) [*cerebro-*; *σκοπέω*, to inspect]. 1. Bouchut's term for opthalmoscopy employed by neurologists. 2. Encephaloscopy.

Cerebrose (*ser'-e-brōs*) [*cerebrum*]. $C_6H_{12}O_6$. A crystallized sugar isomeric with glucose, occurring in brain tissue.

Cerebrosid (*ser'-e-bro-sid*) [*cerebrum*]. One of a class of substances occurring in brain tissue, containing cerebrose, just as glucosids contain glucose.

Cerebrospinal (*ser-e-bro-spi'-nal*) [*cerebro-*; *spina*, the spine]. Pertaining to the brain and spinal cord. **C.**, **Axis**. See *Axis*, *Cerebrospinal*. **C.**, **Fluid**, the fluid between the arachnoid membrane and the pia mater. **C.**, **Meningitis**. See *Fever*, *Cerebrospinal*. **C.**, **System**, the brain, spinal cord, and nerves.

Cerebrosuria (*ser-e-bro-su'-re-ah*). The presence of cerebrose in the urine; cerebral diabetes.

Cerebrum (*ser'-e-brum*) [L.]. The chief portion of the brain, occupying the whole upper part of the cranium, and consisting of the right and left hemispheres. **C.**, **abdominale**, the solar plexus. **C.**, **exsiccatum**,

the dried and powdered gray substance of the brain of calves; one part represents five parts of the fresh organ. Dose 30-60 gr (2-4 Gm.) a day. **C.**, **posterius**, the cerebellum.

Cerecloth (*ser'-kloth*) [*cera*]. Cloth impregnated with wax and rendered antiseptic; used as a dressing for wounds.

Cereus (*ser'-re-us*) [L., "a wax candle"]. A genus of cactaceous plants. **C.**, **grandiflorus**. See *Cactus grandiflorus*.

Cerevisia (*ser-e-vis'-e-ah*). See *Cervisia*.

Cerevisin (*ser-e-vis'-in*). Dried yeast used internally in furunculosis (dose 1 teaspoonful before each meal) and for application in leukorrhea and gonorrheal vaginitis (15-30 gr. (1-2 Gm.) in suppository of cacao-butter).

Ceric (*ser'-rik*) [*cera*]. 1. Relating to wax. 2. Containing cerium as a quadrivalent radicle.

Cerin (*ser'-rin*) [*cera*]. 1. An ether of cerotic acid; one of the substances found in wax. 2. (Of Chevreul.) A crystalline precipitate from an aqueous extract of cork by action of hot alcohol.

Cerite (*ser'-rit*). A Swedish mineral formerly called the heavy stone of Bastnas, from which cerium is obtained.

Cerium (*se'-re-um*) [named from the planet *Ceres*]. $Ce = 140$: quantivalence II, IV. (One of the rarer metals. It forms two series of salts (*cerous* and *ceric* salts) corresponding to the two oxids. See *Elements*, *Table of Chemic*.

C. Nitrate. 1. $Ce_2(NO_3)_6 \cdot 12H_2O$, white crystals, soluble in water; an antiseptic used in solutions of 1:1000. Syn., *Cerous nitrate*. 2. $Ce(NO_3)_4$, a reddish-yellow mass of crystals, soluble in water and alcohol. It is used as a nerve-tonic in irritable dyspepsia and chronic vomiting. Dose 1-3 gr. (0.065-0.2 Gm.). Syn., *Ceric nitrate*. **C.**, **Oxalate** (*cerii oxalas*, U. S. P.), $Ce_2(C_2O_4)_3 \cdot 9H_2O$, a white, granular powder, insoluble in water or alcohol, but soluble in hydrochloric acid. It is useful in the vomiting of pregnancy. Dose 1-10 gr. (0.065-0.65 Gm.) in pill. **C.**, **Valerianate**, has been used in the same class of cases as the oxalate. Dose 1½ gr. (0.1 Gm.).

Ceroceric (*se-ro-se'-rik*). Containing cerium both as a trivalent and as a quadrivalent radicle.

Ceroma (*se-ro'-mah*) [*cera*; *hyma*, a tumor]. A cystic tumor the tissue of which has undergone fatty degeneration.

Cerostroma, **Cerostrosis** (*ser-o-stro'-mah*, -sis). See *Ichthyosis hystrix*.

Cerotate (*ser'-ro-tāt*). A salt of cerotic acid.

Cerotic (*se-ro'-tik*). Derived from wax. **C.**, **Acid**. See *Acid*, *Cerotic*.

Cerous (*ser'-rus*). Containing cerium as a trivalent radicle.

Cerumen (*ser-u'-men*) [*cera*]. The wax of the ear.

Ceruminosis (*ser-u-min'-o-sis*). An excessive secretion of cerumen.

Ceruminous (*ser-u'-min-us*) [*cera*]. Pertaining to cerumen.

Ceruse (*ser'-rūs*) [L., *cerussa*]. 1. White lead.

- basic carbonate and hydrate of lead. 2. A white face powder. **C.**, Antimony, white oxid of antimony, also antimonic acid.
- Cerussa** (se-rus'-sh). See *Ceruse*.
- Cervical** (ser'-vik-ul) [*cervix*, the neck]. Pertaining to the neck or to the cervix uteri. **C. Carcinoma**, carcinoma of the neck of the uterus. **C. Endometritis**. See *Endocervicitis*. **C. Pregnancy**, a rare condition in which, from atrophy of the decidua membranes, the impregnated ovum is not properly held in place, and, dropping, lodges in the cervical canal, where it develops until the uterus expels it.
- Cervicalis** (ser'-vik-ul'-tis) [*cervix*]. 1. Cervical. 2. A cervical artery, muscle, nerve, or vein.
- Cervicospinal** (ser'-vis-es-pi'-nāl). Relating to the neck and spinal cord.
- Cervicitis** (ser'-vis-i'-tis) [*cervix*; *itis*, inflammation]. Inflammation of the cervix uteri.
- Cervicoauricular** (ser'-vik-o-aw'-rik'-u-lar). Relating to the back of the neck and the outer ear.
- Cervicohumeral** (ser'-vik-o-hu'-mer-ul). Relating to the neck and the upper arm.
- Cervicomuscular** (ser'-vik-o-mus'-ku-lar). Relating to the muscles of the neck.
- Cervicospicular** (ser'-vik-o-skap'-u-lar). 1. Relating to the back of the neck and the scapula. 2. The transverse artery or vein of the neck.
- Cervicovesical** (ser'-vik-o-ves'-ik-ul). Pertaining to the bladder and the cervix uteri.
- Cervimeter** (ser'-vim'-et-er) [*cervix*; μέτρον, a measure]. An instrument for measuring the cervix uteri.
- Cervisia** (ser'-vis'-e-sh) [L]. Ale or beer.
- Cervisie fermentum**, beer-yeast. The ferment obtained in brewing beer, and produced by *Saccharomyces cerevisie*.
- Cervix** (ser'-viks) [L]. A constricted portion or neck. **C. obstipa**, **C. rigida**, wry-neck. **C. uteri**, the neck of the uterus. **C. vesicæ**, the neck of the bladder.
- Cesarean Section** (from *Cæsar*, the Roman consul, whose delivery is said to have been effected in this way). Extraction of the fetus through an incision made in the abdomen. **C. Section, Postmortem**, extraction of the child after the mother's death.
- Cesium** (se'-ze-um) [L., "bluish-gray"]. Cs = 132.6, quantitative 1. A rare alkaline metal resembling potassium in physical and chemical properties. **C. and Ammonium Bromid**, CsBr, 3NH₄Cl, a sedative used in epilepsy. Dose 15-45 gr. (1-3 Gm.); maximum dose 90 gr. (6 Gm.). **C. Bitartrate**, CsHC₄H₄O₆, used in nervous heart-palpitation. Dose 3-5 gr. to 18-20 gr. (Gm.). **C. Bromid**, is a good sedative, but its cost is very great. **C. Carbonate**, Cs₂CO₃, used in epilepsy. **C. Chlorid**, lowers the pulse-rate and raises arterial pressure. Dose 2-5 gr. to 13-12 Gm. **C. Hydrate**, **C. Hydroxid**, CsOH, is used in epilepsy. **C. and Rubidium and Ammonium Bromid**, CsBr, RbBr, 6(NH₄Br), a nervine. Dose 15-45 gr. (1-3 Gm.) once or twice daily; maximum dose 90 gr. (6 Gm.). **C. Sulfate**, (Cs₂SO₄), used as an antiepileptic.
- Cestode**, **Cestoid** (ses'-toid, ses'-toid) [*cestox*, a girdle; *oidos*, likeness]. Shaped like a girdle or ribbon; applied to worms, of which *Tænia* is a type.
- Cetacea** (se-ta'-se-ah) [*κῆτος*, a whale]. An order of mammals living in the sea, as the whale, dolphin, etc.
- Cetaceum** (se-ta'-se-um) [see *Cetacea*]. Spermaceti. A fatty substance somewhat resembling paraffin in its physical properties. It is obtained from the head of the sperm whale, *Physeter macrocephalus*. It is soluble in ether, in chloroform, and in boiling alcohol, and is employed as an emollient. **Cetacei**, **Ceratum**, contains spermaceti, 10, white wax, 35; olive-oil, 55 parts. **Unof Cetacei**, **Unguentum** (H. P.), contains spermaceti, white wax, almond-oil, and benzoin.
- Cetin** (se'-tin) [see *Cetacea*], C₅₈H₁₁₄O₂. The chief constituent of commercial purified spermaceti. It is a fatty, crystalline substance, soluble in alcohol and ether, insoluble in water, melting at 40° C., and volatilizing at 360° C. Syn., *Cetinum*.
- Cetraria** (se-ta'-re-ah) [*cetra*, a short Spanish shield]. 1. A genus of lichens. 2. Iceland moss—a lichen, *C. islandica*, found in Iceland and other northern countries. It contains a form of starch, *lichenin*, that gelatinizes when boiled with water. It is a feebly tonic demulcent, sometimes used in pulmonary affections. **Cetrarie**, **Decoctum** (H. P.), contains 5% of the lichen. Dose 2-4 oz. (to 120 Gm.).
- Ceylon Sickness**. Beriberi.
- Ceyssatite** (se'-s-a-tit) [*Ceyssat*, a village of Puy-de-Dôme, France]. A fossil earth from the village of Ceyssat, France, composed almost entirely of pure silica. It is used as an absorbent dusting powder.
- Chabert's Disease**. Sympathetic anthrax; black-leg.
- Chagres Fever**. See *Feber*, *Chagres*.
- Chalaza** (kal'-a'-zah) [*chalazion*]. One of the twisted cords binding the yolk bag of an egg to the lining membrane of the shell, or that part of a seed where its coats unite with each other and the nucleus.
- Chalazia** (kal'-a'-ze-sh) [*chalazion*]. 1. The so-called hailstone sputa. 2. A chalazion.
- Chalazion** (kal'-a'-ze-an) [*χαλῆζων*, a small hailstone]. A tumor of the eyelid from retained secretion of the meibomian glands, a meibomian cyst. Syn., *Parasit palpebræ*. **C. terreum**, one in which there is degeneration of the contents and change to calcareous carbonate and cholesterol. Syn., *Lithæus palpebræ*.
- Chalcitis** (kal'-si'-tis) [*χάλις*, anything made of metal]. A severe inflammation of the eyes, marked at first by excessive lachrimation and sensitiveness to light, resulting in blurred vision and continued flow of mucus. It is due to rubbing the eyes after the bands

have been used on brass, as is done by trolley-car conductors and workmen. Syn., *Brassy eye*; *Chalkitis*.

Chalcosis (*kal-ko'-sis*) [*χαλκός*, copper]. A deposit of copper particles in the tissues.

Chalcosis (*kal-ik-o'-sis*) [*χάλις*, gravel]. A disease of the lungs caused by the inhalation of dust or sand.

Chalinoplasty (*kal-in-o-plas'-te*) [*χαλινός*, a bridle or rein, *πλασάω*, to form]. An operation to form a new frenum of the tongue.

Chalk (*chawk*) [*calx*, limestone]. Carbonate of lime. See *Calcium*. **C.-stone**, gout-stone — a deposit beneath the skin in gouty patients.

Chalchitis (*kal-ki'-tis*). See *Chalchitis*.

Chalybeate (*ka-lib'-e-at*) [*χάλυξ*, steel]. 1. Containing iron. 2. Having the color or taste of iron. 3. A substance or medicine containing iron.

Chamaelirium (*kam-e-lir'-e-um*) [*χαμαί*, on the earth; *λίρον*, a lily]. A genus of plants of the order *Liliacea*. The rhizome of *C. luteum*, devil's-bit, of the United States and Canada, is a uterine tonic, anthelmintic, diuretic, and febrifuge. Dose of aqueous infusion (1 oz. to 1 pint) a wineglassful.

Chamber (*chām'-ber*) [*camera*, a chamber]. A cavity or space. **C.**, **Anterior** (of the eye), the space between the cornea and the iris. **C.**, **Aqueous** (of the eye), the space between the cornea and lens. **C.**, **Posterior** (of the eye), the space between the iris and the lens. The chambers of the eye contain the aqueous humor. **C.**, **Resonance**, a resonant chamber attached to a tuning-fork for acoustic investigation.

Chameleon-phenomenon (*kam-e'-le-on-jen-om'-e-non*). A peculiar reaction shown by *Bacillus pyocyaneus*; when grown on agar, a light green color is imparted to the medium, which after 48 hours turns very dark green. On potato a yellowish-brown growth is formed, which turns green when the superficial portion is removed by scraping, but it soon resumes its brown color.

Champacol (*sham'-pa-kol*) [*champaka*, Bengalese name]. A camphor, $C_{15}H_{12}O$, from the wood of the champak-tree, *Michelia champaca*. Syn., *Champaca camphor*.

Champagne (*sham-pān*) [Fr.] An effervescent wine useful as a remedy for nausea and vomiting.

Chancre (*shang-ker*) [Fr.]. A term formerly used indiscriminately for any primary venereal ulcer, but now generally applied to the initial lesion of syphilis (*q. v.*). **C.**, **Arsenical**, ulceration resembling a syphilitic chancre, but due to arsenic. **C.**, **Hard**, **C.**, **Hunterian**, **C.**, **Indurated**, **C.**, **Infecting**, **C.**, **Non-suppurating**, **C.**, **True**, the ulcer of venereal origin, which is followed by constitutional syphilis. **C.**, **Nonincubatory**, **C.**, **Non-infecting**, **C.**, **Simple**, **C.**, **Soft**, a contagious, suppurating, nonsyphilitic venereal ulcer, properly called *chancroid*. **C.**, **Sahara**, the Aleppo boil.

Chancroid (*shang'-kroid*) [*chancre*; *εἶδος*,

form]. A local, infective process, transmitted by sexual intercourse, and characterized by ulceration, local glandular involvement, and often suppuration. It has been variously termed the soft, nonindurated, simple, or nonsyphilitic chancre. See *Chancre*. **C.**, **Phagedenic**, chancroid with a tendency to slough. **C.**, **Serpiginous**, phagedenic chancroid that spreads superficially in curved lines.

Chancrous (*shang'-krus*). Of the nature of a chancre.

Change (*chānſ*) [*cambiare*, to change]. The word is colloquially used for either the establishment or the cessation of the menstrual function. **C. of Life**, the menopause.

Channel (*chan'-el*) [ME., *chanel*]. See *Canal*. **C.s**, **Intercellular**. 1. Irregular canals of communication between the intercellular spaces interposed between prickly-cells, and thought to be connected with the lymph-capillaries. 2. Tiny canals between gland-cells. **C.s**, **Intracellular**, the minute canals which connect vacuoles in the cell-body of liver-cells with the biliary canaliculi or intercellular channels. **C.**, **Lymphatic**, **C.**, **Plasmatic**. See *Canal of Recklinghausen* and *Canal, Serous*.

Chautreuil's Method (*shang-tree'l*). In pelvimetry, a method of ascertaining the distance between the tuberosities of the ischiums (11 cm.) in estimating the size of the pelvic outlet. The two thumbs are placed upon the tuberosities, while an assistant measures the distance between them.

Chap [ME., *chappen*, to cleave]. A slight or superficial fissure of the skin, usually upon the lips, hands, or nipples.

Chappa (*chap'-ah*). The name among the Popo people in the colony of Lagos for a disease believed to be neither tuberculous nor syphilitic, marked by severe initial pains in muscles and joints, followed by swelling and the formation of round multiple nodules the size of a pigeon's egg; without forming abscesses these are exposed by ulceration of the skin. The disease finally attacks the bones.

Charbon (*shar'-bon*) [Fr., "charcoal"]. Anthrax (*q. v.*).

Charcoal (*char'-kōl*) [ME., *charren*, to turn; *col*, coal]. Coal made by subjecting wood to a process of smothered combustion. See under *Carbo*.

Charcot's Artery (*shar-ko'*). The "artery of cerebral hemorrhage," one of the lenticulostriate arteries that passes through the outer part of the putamen. **C.'s Cirrhosis**. See *Hanol's Disease*. **C.'s Crystals**. See *Crystals, Charcot's*. **C.'s Disease**. 1. Angiotrophic lateral sclerosis. 2. Arthropathy of tabes dorsalis. 3. Multiple cerebrosplinal sclerosis. **C.'s Fever**, a septic fever occurring in cases of jaundice due to impacted gall-stones. **C.'s Gait**, the gait of Friedrich's ataxia. **C.'s Joint**. See *C.'s Disease (2)*. **C.'s Method**. See *Hypnotism*. **C.'s Pain**, hysteric pain in the ovarian region. **C.'s**

- Posterior Root-zone.** See *Burdach's Column*. **C.'s Sensory Crossway**, the posterior third of the posterior limb of the internal capsule. Syn., *Carrefour sensitif*. **C.'s Sign**, in facial paralysis the eyebrow is raised; in facial contracture it is lowered. Syn., *Signe du sourcil*. **C.'s Syndrome**, intermittent claudication, an affection connected with arteriosclerosis of the lower extremities. **C.'s Zones**, the hysterogenic zones.
- Charcot-Guignon's Disease** (*shar-ko'-gwe-no'(n)*). Dementia complicating some cases of progressive muscular dystrophy.
- Charcot-Leyden's Crystals** (*shar-ko-li'-den*). See *Crystals, Charcot-Leyden's*.
- Charcot-Marie's Symptom.** See *Marie's Symptom*. **C.-M.'s Type of Progressive Muscular Atrophy**, the neurotic type of progressive muscular atrophy; progressive neural muscular atrophy, commencing in the muscles of the feet and the peroneal group. **C.-M.-Tooth's Type of Progressive Muscular Atrophy.** See *C.-M.'s Type of Progressive Muscular Atrophy*.
- Charcot-Neumann's Crystals.** See *Crystal, Charcot-Neumann's*.
- Charcot-Robin's Crystals.** See *Crystals, Charcot-Robin's*.
- Charcot-Vigouroux's Sign.** See *Vigouroux's Sign*.
- Chariot** (*char'-e-ol*). The movable coil of an induction apparatus.
- Charlatan** (*shar'-lat-an*) [Ital., *ciarlatano*, a quack]. A quack; a pretender to medical skill; an advertising doctor.
- Charles' Law.** See *Law, Charles'*.
- Charleyhorse** (*char'-le-hors*). Stiffness of the right arm and leg in baseball players.
- Charpie** (*shar'-pe*) [*carpere*, to pluck]. Picked or shredded lint; linen shreds for dressing wounds.
- Charrière's Guillotine** (*shar-re-dr'*). An instrument for excising tonsils.
- Charta** (*kar'-tah*) [*χάρτης*, paper]. A paper. In pharmacy, a strip of paper the fibers of which are impregnated with a medicinal substance. Also a wrapper for holding powders. **C. cantharidis**, **C. epispastica**, blistering-paper. **C. emporctica**, porous or bibulous paper. **C. exploratoria**, test-paper. **C. sinapis** (U. S. P.), mustard-paper.
- Chartula** (*kar'-u-lah*) [dim. of *charta*]. A little paper, especially a paper containing a single dose of a medicinal powder.
- Chasma**, **Chasmus** (*kaz'-mah*, *kaz'-mus*) [*χασμός*, a gaping]. A yawn.
- Chassaignac's Axillary Muscle.** A nonconstant muscular bundle that extends across the axillary hollow from the lower border of the latissimus dorsi to the lower border of the pectoralis minor or to the brachial fascia. **C.'s Tubercle**, the carotid tubercle on the transverse process of the sixth cervical vertebra.
- Chaulmugra Oil** (*chawl-moog'-rah*) [E. Ind.]. A fixed oil expressed from the seeds of *Gynocardia odorata*, a tree native to the East Indies. It is soluble in alcohol, and its properties are due to gynocardic acid. It is used in leprosy, in scaly eczema, psoriasis, and syphilitic skin affections. For external use, 1 part of the acid to 24 of petroleum. Internally, 5-10 min. (0.32-0.65 Cc.) of the oil or $\frac{1}{2}$ -3 gr. (0.032-0.2 Gm.) of the acid, in capsules.
- Chaussier's Areola** (*sho-se-dr'*). The areola of inflammatory induration of a malignant pustule. **C.'s Line**, the raphe of the corpus callosum.
- Chautard's Test for Acetone** (*sho-tar'(t)*). Allow sulfurous acid to pass through a solution of 0.25 Gm. of fuchsin in 500 Cc. of water until the solution becomes yellow. On the addition of a portion of this to the liquid to be tested for acetone it will assume a violet color if acetone is present.
- Chauveau's Retention Theory** (*sho-vo'*). See under *Immunity*.
- Chaya**, **C.-root** (*chi'-ah*). The plant, *Aceris lanata*. Syn., *Shaya root*.
- Cheadle-Barlow's Disease.** See *Barlow's Disease*.
- Check** (*chek*) [OF., *eschec*, from Pers. *shah*, a king]. A sudden stop. **C.-experiment.** See *Control Experiment*. **C.-ligament.** See *Ligament, Check-*.
- Checkerberry** (*chek'-er-ber-e*). A popular name for *Gaultheria procumbens*.
- Cheek** (*chek*) [AS., *cedce*]. The side of the face; it is composed of fat, areolar tissue, muscles, etc.
- Cheese** (*chêz*) [AS., *cêse*]. A food prepared from the casein of skimmed or unskimmed milk.
- Cheesy** (*chêz'-e*) [*cheese*]. Of the nature of cheese. **C. Degeneration**, **C. Necrosis**, caseous degeneration or caseation; the conversion of the tissues into a substance resembling cheese. **C. Tubercle**, a tubercle that has undergone cheesy necrosis.
- Cheil-, Cheilo-** (*kil-, ki-lo-*). For words thus beginning see *Chil-* or *Chilo-*.
- Cheiranthin** (*ki-ran'-thin*). A glucosid from the leaves and seeds of *Cheiranthus cheiri*, with action similar to that of digitalis.
- Cheiro-** (*ki-ro-*). For words thus beginning see *Chiro-*.
- Chekan, Cheken** (*chek'-en*) [Chilian]. 1. The leaves of *Eugenia chekan*, a South American shrub. It is diuretic and expectorant and similar in action to eucalyptus. It is used in chronic pharyngitis, laryngitis, etc. Dose of the *fluidextract* $\frac{1}{2}$ -1 dr. (2-4 Cc.). Unof. 2. The crude resin obtained from *Cannabis indica*.
- Chelate** (*ke'-lāt*) [*χηλή*, a claw]. 1. Claw-shaped. 2. Having claw-shaped appendages or processes.
- Chelen** (*ke-lên'*). Ethyl chlorid.
- Chelerythrin** (*kel-er'-ih-rin*), $C_{10}H_{17}NO_8$. A poisonous alkaloid obtained from *Chelidonium*.
- Chelidonin** (*kel-id'-o-nin*) [*Chelidonium*], $C_{19}H_{17}N_3O_8 + H_2O$, or $C_{19}H_{15}NO_8$. A crystalline alkaloid of celandin (*Chelidonium majus*). **C. Phosphate**, a white, crystalline powder,

soluble in water; it is used as an analgesic. **C. Sulfate**, $(C_{20}H_{19}NO_6)_2H_2SO_4$, a white, crystalline substance, soluble in water; it is a narcotic like morphin, but less toxic. Dose 1½-3 gr. (0.1-0.2 Gm.)

Chelidonium (*kel-id'-on-izm*). Poisoning by *Chelidonium majus*; it is marked by inflammation of the mouth and gastrointestinal tract and hematuria. It is due to the action of chelerythrin.

Chelidonium (*kel-id'-o-ne-um*) [*χελιδόνιον*, celandin]. Celandin. The leaves and stems of *C. majus*, with properties due to a number of alkaloids and acids. It is a drastic cathartic and externally an irritant, and has been used in jaundice, whooping-cough, and catarrhal pneumonia. Dose of the plant 10-30 gr. (0.65-2.0 Gm.); of the juice 5-20 min. (0.12-1.3 Cc.). Unof.

Chelidoxanthin (*kel-id'-o-san'-thin*) [*chelidoxanthin*]. One of the bitter, crystalline constituents of celandin.

Cheloid (*kel'-loid*). See *Keloid*.

Chelotomy (*ke-lot'-o-mie*). See *Kelotomy*.

Chemic, Chemical (*kem'-ik, kem'-ik-ol*) [*chem-istry*]. Of or pertaining to chemistry.

Chemicity (*kem-is'-ite*). The state of having chemic properties.

Chemicoanalytic (*kem-ik-o-an-al-iz'-ib*). Relating to chemic analysis.

Chemicocautery (*kem-ik-o-kaw'-ter-e*). Cauterization by means of chemic agents.

Chemiotaxis, Chiniotaxis (*kem'-e-o-taks-is, kem'-e-o-taks-is*). See *Chemotaxis*.

Chemistry (*kem'-is-try*) [*χημεία*, chemistry]. The science of the molecular and atomic structure of bodies. **C.**, **Actinic**, **C.**, **Actino-**, that treating of decomposition of light. **C.**, **Analytic**, that concerned in the determination of the constituents and decomposition products of substances; also in the estimation of the relative proportion of their elements and the number and interrelation of the atoms contained in a molecule. **C.**, **Animal**, that dealing with animal substances. **C.**, **Atomic**, that concerned in the structure of molecules, the relations of their contained atoms, and the laws governing their combination. **C.**, **Electro-**. See *Electrochemistry*. **C.**, **Empiric**, **C.**, **Experimental**. 1. The sum of chemic knowledge established by experiments. 2. The carrying on of experiments for determining chemic laws and knowledge. **C.**, **Forensic**, that concerned in legal investigations. **C.**, **Galvano-**. See *Galvanochemistry*. **C.**, **Pneumatic**, the chemistry of vapors and gases. **C.**, **Stoichiometric**. See *C.*, **Atomic**. **C.**, **Synthetic**, that which deals with the building-up of compounds from their elements.

Chemosis (*ke-mo'-sis*) [*χημωσις*, a gaping]. Swelling of the conjunctiva.

Chemosmosis (*kem-as-mo'-sis*) [*chemistry*; *ωσμωσις*, an impulse]. Chemic action resulting from osmosis.

Chemotactic (*kem-o-tak'-tik*) [*chemotaxis*]. Pertaining or relating to chemotaxis.

Chemotaxis (*kem-o-taks'-is*) [*chemistry*; *τάξις*, to order, arrange]. The property of cellular attraction and repulsion. It is displayed by the proteid constituents of the protoplasm of various species of bacterin, as well as by proteids from a great variety of sources. The qualifications positive and negative are added according as the phenomenon is one of attraction or repulsion.

Chemotic (*ke-mot'-ik*) [*chemosis*]. Pertaining to or marked by chemosis.

Chemotropism (*kem-ot'-ro-pizm*) [*chemistry*; *τροπή*, a turning]. The destruction of bacteria by phagocytes; the victory of the phagocytes over bacteria, or of bacteria over phagocytes. In biology, the attraction of leukocytes by certain chemic substances held in solution in the blood. Cf. *Chemotaxis*.

Chenopodium (*ken-o-po'-de-um*) [*χένπ*, a goose; *πόδιον*, a little foot]. American wormseed; the fruit of *C. ambrosioides*, or *anthelminticum*, a plant native to the United States, with properties due to a volatile oil, which is the only preparation used. It is an efficient anthelmintic against the roundworm. **C.**, **Oil of** (*oleum chenopodii*, U. S. P.). Dose 5-15 min. (0.32-1.0 Cc.).

Cherchewsky's Disease. Nervous ileus. An affection, closely simulating intestinal obstruction, that has been observed in neurasthenia.

Cherry (*cher'-e*) [*κεράσις*, cherry-tree]. The bark of the common cherry, *Prunus serotina*, a mild bitter and tonic containing tannin. Dose of fluidextract ½-1 dr. (2-4 Cc.). **Prunin**, a concentrated extract; dose 1-3 gr. (0.065-0.2 Gm.). See also *Choke-cherry* and *Prunus virginiana*. **C.-laurel**, the European evergreen cherry, *Prunus laurocerasus*. Water distilled from its leaves is used in the same way as dilute hydrocyanic acid. Dose 30 min.-1 dr. (2-4 Cc.). **C.**, **Wild**. See *Prunus*.

Chest. See *Thorax*. **C.**, **Alar**, **C.**, **Paralytic**, **C.**, **Phthisical**, **C.**, **Pterygoid**, a narrow thorax having a winged appearance from abnormal projection of the wings of the scapula. **C.**, **Barrel-**, a peculiar formation of the chest observed in cases of long-standing emphysema of the lungs; it is round, like a barrel, and in respiration is lifted vertically instead of being expanded laterally. **C.**, **Emphysematous**. See *C.*, *Barrel-*.

Chestnut. See *Castanea*.

Cheyne's Nystagmus. See *Cheyne-Stokes' Nystagmus*. **C.'s Symptom**. See *Cheyne-Stokes' Respiration*.

Cheyne-Stokes' Asthma. Dyspnea due to pulmonary congestion in an advanced stage of chronic myocarditis. **C.-S.'s Nystagmus**, a variety of nystagmus in which the oscillations of the eyeball have a rhythmic variation similar to the rhythm of Cheyne-Stokes' respiration. **C.-S.'s Respiration**, arrhythmic breathing of a periodic type occurring in certain grave affections of the central nervous system, heart, and lungs, and in intoxications.

Chiasm, Chiasma (*ki'-asm, ki-as'-mah*) [*χίασμα*, to make a cross, as an X]. 1. The optic commissure. 2. A crossing. **C., Camper's.** See *Camper's Chiasm*.

Chiasmal (*ki'-as-mal*). Pertaining to the optic chiasm.

Chickabominy Fever (*chik-a-hom'-in-e*). A synonym of *Typhomalarial fever*.

Chicken (*chik'-en*) [*AS., cicon*]. The domestic fowl. **C.-breast**, an abnormally prominent condition of the sternum and of the sternal region; pigeon-breast, it is seen in rachitic persons, etc. **C. Cholera.** See *Cholera*, *Chicken*. **C.-fat Clot**, a clot of blood, yellowish in color, consisting largely of fibrin, and containing but few red cells. **C.-pox.** See *Varicella*.

Chicle. See *Balsam*.

Chicory (*chik'-or-e*) [*alxopa, chicory*]. *Cichorium intybus*, a composite plant of Europe and Asia, naturalized and growing in the United States. Its ground root is used to adulterate coffee.

Chielin (*chi'-elin*). A thick, nontoxic, brown, viscous substance isolated from the bulb of the tulip. It is recommended in eczema and in skin diseases in veterinary practice.

Chiene's Lines. Imaginary lines designed to aid in localizing the cerebral centers in operations upon the brain.

Chilalgia, Cheilalgia (*chi-lal'-je-ah*) [*χίλος, lip; άλγος, pain*]. Neuralgia affecting the lips.

Chilblain (*chil'-blain*) [*AS., cold; blägen, a boil*]. A congestion and swelling of the skin, due to cold, and attended with severe itching or burning; vesicles and bullas may form, and these may lead to ulceration. Syn., *Erythema pernio*; *Pernio*.

Childbed. The popular term for the puerperal state. **C. Fever**, puerperal fever.

Childbirth. Parturition.

Child-crowing. The crowing sound of the respiration that characterizes laryngismus stridulus.

Chil Salt-peter. Sodium nitrate.

Chill (*chil*) [*AS., cold; chilina*]. A sensation of cold accompanied by shivering, usually appearing shortly after exposure to cold or wet. It is frequently the initial symptom of acute disorders, as pneumonia, etc. It is a prominent symptom of various forms of malarial fever.

Chills and Fever. A popular term for intermittent fever.

Chilo- (*ki-lo*) [*χίλος, lip*]. A prefix meaning relating to the lip.

Chilognathopalatoschisis, Chelognathopalatoschisis (*ki-log'-nata-a-pal-at-us'-ki-us*) [*chilos, lip; gnathos, jaw; palatum, the palate; schisis, a splitting*]. Marchand's term for a malformation marked by fissure of the lip, alveolar process, and palate.

Chiloplasty, Chelloplasty (*ki'-lo-plas-te*) [*chilos, lip; πλαστικός, to form*]. Any plastic operation upon the lip.

Chiloschisis (*ki-log'-kissis*) [*chilos, lip; schisis, a splitting*]. Harelip. **C. complicata**, harelip

attended with fissure of the palate or of the alveolar arch.

Chilostomatoplasty, Cheilostomatoplasty (*ki-lo-stom'-at-o-plas-te*) [*chilos, lip; stoma, mouth; πλαστικός, to form*]. Chioplasty including restoration of the mouth.

Chimaphila (*ki-maf'-il-ah*) [*χίμα, winter; φιλος, loving*]. Pips-sawa; prince's pine, the leaves of *C. umbellata*, an evergreen found in the United States, an astringent tonic and excellent diuretic. The bruised leaves are used as a rubefacient. It is valuable in dropsy, in renal disease, and in affections of the urinary passages. **C., Decoction of** (*decoctum chimaphilae*, B. P.) Dose: 1-2 dr. (30-90 C.). **C., Fluidextract of** (*fluid extractum chimaphilae*, U. S. P.) Dose: 4-12 dr. (2-8 Cc.).

Chimney-sweep's Cancer. See *Carcinoma, Chimney-sweep's*.

Chimogene (*ki'-mo-jen*) [*χίμα, cold winter weather; γένω, to produce*]. A highly volatile liquid proposed by Vanderweide as a substitute for rhig-dene, ether, etc., producing cold in local anesthesia.

Chin [*AS., cin*]. The mentum; the lower part of the face, at or near the symphysis of the lower jaw. **C.-jerk, C.-reflex.** See *Jaw-jerk* and under *Reflex*.

China (*kin'-ah* or *ke'-nah*). Same as *Cinchona*.

Chinaphthol (*kin-af'-thol*). A yellow bitter insoluble powder, used as an intestinal antiseptic. Dose: 74-75 gr. (6.5-5.0 Gm.) daily. Syn., *Quinin benzinaphthol-a-monium sal*.

Chinaseptol (*kin-a-sep'-tol*). See *Disinfectant*.

Chinoform (*kin'-o-form*). A compound of ferromaldehyd with cinchonin. Syn., *Quinoseum*.

Chinoidin, Chinoidinum (*kin-oi'-din, kin-oi'-de-num*) [*Sp., china*]. Quinoidin. A mixture of amorphous alkaloids obtained in the manufacture of quinin. It has the therapeutic properties of quinin. Dose: 1-20 gr. (6.0-5.0 Gm.). **C., Animal**, a substance giving, like quinin, a blue fluorescence in solutions of dilute acids, first obtained by Hance-Jones from the liver, but found in all the organs and tissues of the body, especially in the nerves. **C. Borate**, yellowish scales, soluble in water and alcohol, used as a chinoidin. Dose: 8-15 gr. (0.6-1.0 Gm.). **C. Citrate**, reddish scales, soluble in water and alcohol. Dose: 5-25 gr. (0.4-2.0 Gm.). **C. Tannate**, a yellow or brown powder, slightly soluble in alcohol; antipyretic, astringent, and tonic. Dose: 2-12 gr. (0.15-0.8 Gm.). In veterinary practice it is given in hog cholera in 24 gr. (1.5 Gm.) doses 3 times daily.

Chinol (*kin'-ol*). Quinolol metachrysochlorite. C_8H_5NClO , a white, crystalline, odorless powder, with a pungent taste; soluble in alcohol, almost insoluble in cold or hot water. It is antipyretic and analgesic. Dose: 3-5 gr. (0.10-0.12 Gm.).

Chinolin, Chinolina (*kin'-o-lin, kin-o'-li'-nah*). See *Quinolin*.

Chinon (*kin'-on*). See *Quinon*.

Chinopyrin (*kin-o-pi'-rin*). See *Quinopyria*.

Chinoral (*kin'-or-al*). An oily, bitter liquid containing quinin and chloral; antiseptic and hypnotic. Dose 1-15 gr. (0.06-1.0 Gm.) Syn., *Quinochloral*.

Chinosol (*kin'-o-sol*). See *Quinosol*.

Chionablepsia (*ki-on-ab-lep'-se-ah*) [*χίων*, snow; *ἀσθένεια*, without sight]. Loss of sensibility of the retina resulting from the exposure of the eyes to reflection of the sunlight upon snow, snow-blindness.

Chionyphe (*ki-on' i-e*). Madura-foot.

Chirata, **Chiretta** (*ke-ra'-tah*, *ke-re'-tah*) [Hind., *chirāṭā*, a species of gentian]. The dried plant of *Sweetia chirayita*. It resembles gentian in its therapeutic properties, and is an excellent tonic. It does not contain tannin. Dose of the powdered plant 15-30 gr. (1-2 Gm.) **C.**, **Fluidextract of** (*fluidextractum chirata*, U.S.P.) Dose 15-30 min. (1-2 Cc.). **C.**, **Infusion of** (*infusum chirata*, B. P.). Dose 2 oz. (64 Cc.). **C.**, **Tincture of** (*tinctura chirata*, B. P.) (10% strength). Dose ½-2 dr. (2-8 Cc.).

Chiro, **Cheiro** (*ki-ro*) [*χῆρ*, the hand]. A prefix meaning hand.

Chirokinesthetic, **Cheirokinesthetic** (*ki-ro-kin-es'tet-ik*) [*chiro*; *kinesthetic*]. Relating to the subjective perception of the motions of the hand, particularly in writing.

Chiorol (*ki'-rol*). A solution of resins and fatty oils in a mixture of ethers and alcohols, used as a protective varnish for the hands in surgery.

Chiromegaly (*ki-ro-meg'-al-e*) [*chiro*; *μεγέλη*, large]. Enlargement of one, two, or three extremities, in whole or in part, but not of akromegalic nature. Syn., *Pseudoakromegaly*.

Chirometer, **Cheirometer** (*ki-rom'-et-er*) [*chiro*; *μέτρον*, a measure]. Oslander's instrument for measuring a distance on the finger or hand in manual pelvimetry.

Chiropelvimeter, **Cheiopelvimeter** (*ki-ro-pel-vim'-et-er*) [*chiro*; *pelvis*; *μέτρον*, a measure]. In manual pelvimetry, an instrument for measuring the hand.

Chiropodalgia, **Cheiopodalgia** (*ki-ro-pod-al'-je-ah*). See *Acrodynia*.

Chiropodist (*ki-ro-pod'-ist*) [*chiro*; *πόδ*, foot]. A surgeon or person who professionally treats diseases of the hands and feet, especially corns, bunions, etc.

Chirospasm, **Cheirospasm** (*ki'-ro-spazm*) [*chiro*; *σπασμός*, a drawing]. Writers' cramp.

Chirotheca, **Cheirotheca** (*ki-ro-the'-ka*) [*chiro*; *θήκη*, case]. A long, narrow roller bandage for wrapping the fingers. **C.** **completa**, one for all the fingers of a hand. **C.** **incompleta**, one for a single finger only.

Chirurgion (*ki-rur'-jon*) [*χειρουργός*, a surgeon]. A surgeon.

Chirurgia (*ki-rur'-je-ah*) [see *Chirurgion*]. Surgery.

Chitin (*ki'-tin*) [*χίτων*, a tunic]. $C_{12}H_{19}N_2O_{10}$. A colorless substance, the animal analog of the cellulose of plants.

Chitinous (*ki'-tin-us*). Resembling chitin. **C.** **Degeneration**, amyloid degeneration.

Chitonitis (*ki-ton-i'-tis*) [*χίτων*, a tunic; *τις*, inflammation]. Inflammation of any investing membrane.

Chittim-bark (*chit'-im-bark*). See *Cascara sagrada*.

Chloasma (*klo-as'-mah*) [*χλωζερν*, to be pale green]. A deposit of pigment in the skin, occurring in patches of various sizes and shapes, and of a yellow, brown, or black color. Syn., *Discolorations*; *Melanoderma*; *Melasma*. **C.** **hepaticum**, liver-spots; a form following dyspepsia and popularly associated with hepatic disturbance. **C.** **phthisicorum**, the brown patches upon the skin of the forehead or upper portions of the cheeks in tuberculous patients. **C.** **uterinum**, chiefly located on the forehead, temples, cheeks, nipples, and median line of abdomen. They are marked during pregnancy, and often during menstruation.

Chloracetic Acid (*klo-ras-e'-tik*). See *Acid*, *Chloracetic*.

Chloracetization (*klo-ras-et-iz-a'-shun*). The production of local anesthesia by chloroform and glacial acetic acid.

Chloracetyl (*klor-as'-et-il*). 1. C_2Cl_2 . A radicle formed from acetyl by the replacement of hydrogen with chlorine. 2. Acetyl chloride.

Chloral (*klo'-ral*) [*chlorium*; *aldehyd*]. C_2Cl_2HCl . A pungent, colorless, mobile liquid.

The name is often misapplied to chloral hydrate. Syn., *Acetochloral*; *Trichlorated* or *Trichloroacetic aldehyd*. **C.**, **Anhydroglyco-**, chloralose. **C.**, **Anhydrous**, chloral as distinguished from chloral hydrate. **C.** **Antipyrin**. See *Hypnal*. **C.**, **Butyl-** (*butyl-chloral hydrous*, B. P.), croton-chloral, $C_4H_9Cl + (HO)_2$, a solid occurring in crystalline scales, resembling chloral hydrate, but made with butyl, C_4H_9 , as a base, instead of ethyl, C_2H_5 . Its properties are similar to those of chloral, but are much feebler. Dose 5-20 gr. (0.32-1.3 Gm.) in syrup. **C.**, **cafein**, the residue upon evaporation of a concentrated aqueous or alcoholic solution of chloral hydrate 7.8 parts and cafein 10 parts; hypnotic, sedative, and analgesic. Injection, 3-6 gr. (0.2-0.4 Gm.) 2 or 3 times daily. **C.** **Hydrate** (*chloralum hydratum*, U.S.P.), a colorless, crystalline solid having the composition $C_2HCl_3 \cdot (HO)_2$; the hydrate of chloral. It is a powerful hypnotic, antispasmodic, and depressant to the cerebral, medullary, and spinal centers, and to a limited extent is an anesthetic. It is serviceable in fevers accompanied by cerebral excitement, in chorea, convulsions, and in delirium tremens, but should be used with great caution. Dose 5-20 gr. (0.32-1.3 Gm.). **C.**, **Syrup of** (B. P.). Dose ½-2 dr. (2-8 Cc.). **C.** **Urethane**. See *Urethium*.

Chloralacetaldoxim (*klo-ral-as-et-al-doks'-im*), $C_6H_5NO_2Cl_2$. A white, crystalline powder, soluble in alcohol and ether, melting at 74° C. It is hypnotic.

Chloralacetophenonoxim (*klo-ral-as-et-a'-fe-non-oks'-im*), $C_6H_5 \cdot CH_2 \cdot C_6H_5$. A substance forming colorless prisms, soluble in alcohol.

and ether, melting at 81° C. It is used in tetanus and epilepsy.

Chloralacetoxim (*klo-ral-as-et-oks'im*), $C_6H_5NO_2Cl_2$. A white, crystalline powder, soluble in alcohol and ether, and melting at 72° C. It is hypnotic.

Chloralamid (*klo-ral'am-id*). See *Chloralformamid*.

Chloralbacid (*klo-ral-bas'id*). A compound of chlorin and albumin. It is used as a tonic in gastric disorders. Dose 7½-15 gr. (0.5-1.0 Gm.). **C. Sodium**, a compound of chloralbacid and sodium; it is used in gastric and intestinal affections. Dose 15-30 gr. (1-2 Gm.) before meals.

Chloralbenzaldoxim (*klo-ral-ben-zal-doks'im*), $C_6H_5NO_2Cl_2$. A white, crystalline powder, soluble in alcohol and ether, melting at 62° C. It is hypnotic and antiseptic.

Chloralcamphoroxim (*klo-ral-kam-for-oks'im*), $C_{12}H_{11}NO_2Cl_2$. A white, crystalline powder, soluble in alcohol and ether, melting at 68° C. It is hypnotic, stimulant, and antiseptic.

Chloralformamid (*klo-ral-form'am-id*). A crystalline solid (*chloralformamidum*, U. S. P.), $C_6H_5Cl_2NO_2$. Used as a hypnotic. Dose 30-45 gr. (2-3 Gm.).

Chloralic (*klo-ral'ik*). Relating to chloral.

Chloralimid (*klo-ral'im-id*) [*chloral*; *imid*], $CCl_3 \cdot CH \cdot NH$. A hypnotic allied to chloral, soluble in alcohol. The dose is the same as that of chloral hydrate.

Chloralin (*klo-ral-in*). An antiseptic fluid containing monochlorophenol and bichlorophenol. It is used in a 2 to 3% solution; as a gargle, in a 5 to 1% solution.

Chloralism (*klo-ral'izm*) [*chloral*]. 1. Chloral poisoning, the morbid state caused by the injudicious use of chloral. 2. The habit of using chloral.

Chloralization (*klo-ral-iz-a'shun*). 1. See *Chloranesthesia*. 2. Anesthesia by means of hydrated chloral.

Chloralose (*klo-ral'os*) [*chloral*; *glucose*], $C_6H_5Cl_2 \cdot C_6H_{12}O_5$. Anhydrous chloral, a product of the action of anhydrous chloral upon glucose. It is used as a hypnotic. Dose 3-14 gr. (0.2-0.9 Gm.).

Chloraloxims (*klo-ral-oks'im*). A series of chemically compounds the physiologic activities of which are claimed to be due to their splitting up in the system into chloral hydrate and their respective oxims. See *Chloralacetoxim*, *Chloralbenzaldoxim*, etc.

Chloraloxylene (*klo-ral-ox'yen*) [*chloral*; *xylene*]. A combination of hydrated chloral and xylene. A convulsant.

Chloralum (*klo-ral'um*). Crude aluminium chloral mixed with various sodium and calcium salts, a disinfectant.

Chloramid (*klo-r'am-id*). Same as *Chloralamid*.

Chloranemia (*klo-ran'e-me-ah*). Synonym of *Chlorosis*.

Chloranodyne (*klo-ran'od-in*) [*chlorin*; *anodyne*]. A proprietary remedy, introduced as an improvement on chlorodyne. It contains

morphin hydrochlorid, tincture of capsicis indica, chloroform, dilute hydrocyanic acid, and aromatics. Dose for an adult 15 min. (1 Cc.).

Chlorargentate (*klor-ar'gen-tat*). A combination of silver chlorid with the chlorid of some other radicle or element.

Chlorarsenous (*klor-ar'se-nus*). Arsenous and also containing chlorin.

Chlorate (*klo-rat*) [*chlorin*]. A salt of chloric acid.

Chlorated (*klo-rat-ed*). Containing, combined with, or charged with chlorin.

Chlorazol (*klo-r'az-ol*). A highly toxic, oily liquid, obtained from albumin, gluten, or dried muscle by action of strong nitric and hydrochloric acids.

Chlorbenzoyl (*klor-ben'zoi-l*). See *Benzoyl Chlorid*.

Chlorbromid (*klor-br'om-id*). A combination of a radicle with chlorin and bromine.

Chlorcamphor (*klor-kam'for*). A name for several compounds of chlorin and camphor.

Chlorepatitis (*klor-e-pa'ti-tis*) [*chlorin*, *hepatitis*]. Chronic hepatitis combined with chlorosis.

Chlorephidrosis (*klor-e-f'id-ro'sis*) [*chlorin*, *hepatozoe*, *perspiration*]. A condition characterized by greenish perspiration.

Chlorethylene (*klor-et'hil-en*). A substance formed from ethylene by replacing one, two, or more atoms of hydrogen with chlorin. **C. Chlorid**, **C. Dichlorid**, $C_2H_2Cl_2$, an oil with odor like that of ethene chlorid, boiling at 115° C., employed as an anesthetic.

Chlorethylidene (*klor-et'hil'id-en*). A chlorin substitution-compound of ethylidene. **C. Chlorid**, **C. Dichlorid**, $C_2H_2Cl_2$, a liquid used as an anesthetic. See *Chloroform* and *ethyl chlorid*; *Monochloroethene dichlorid*.

Chlorethone (*klor-et'on*). See *Arene Chloroform*.

Chlorhematin (*klor-hem'a-tin*). See *Hematin*.

Chlorhydria (*klor-hi'dri-ah*). An excess of hydrochloric acid in the stomach.

Chlorhydric (*klor-hi'drik*). Composed of chlorin and hydrogen, hydrochloric.

Chloric (*klor'ik*) [*chlorin*]. Pertaining to or containing chlorin. **C. Acid**. See *Chloric Acid*. **C. Ether**. 1. See *Amyl Chlorid*. 2. See *Chloroform*, *Spirit of*.

Chlorid (*klor'id*) [*chlorin*]. A binary compound, one of the elements of which is chlorin. **C.**, **Methyl-**. See under *Anesthetics*, *Fixed*.

Chlorin (*klo-rin*) [*yl'opogreen*]. Chlorine. $Cl = 35.5$, quantitative 1. A greenish-yellow gas, prepared by decomposing calcium chlorid, $NaCl$. It is highly irritative to the skin and mucous membranes, producing stomatoclosure of the glottis. It is a powerful disinfectant. The *Sigmar chlorid* (H. P.) contains 1 pound of the gas to a gallon of water. Chlorid of lime (*calc. chlorid*), L. & P., a hypochlorite of calcium, contains free chlorin and is a valuable disinfectant. Dose, internally, 3-6 gr. (0.2-0.4 Gm.). **C. Hunger**, the condition of the body when

chlorin (usually in the form of common salt) is lacking. Among the immediate results of this deficiency are indigestion and albuminuria. **C.-vapor** (B. P.), used for inhalation. **C.-water** (*liquor chlori compositus*, U. S. P.), contains 4% of the gas in solution. It is a good antiseptic wash. Dose internally 10-30 min. (0.65-2.0 Cc.).

Chlorinated (*klo' - rin - a - ted*). Containing chlorin or combined with it.

Chloriodoform (*klo-ri-o'-do-form*), CHCl_3I . A yellow oil obtained from chloroform by replacement of one atom of chlorin by an atom of iodine; it boils at 131°C . and does not solidify.

Chloriodolipol (*klo-ri-o'-do-lip'-ol*). A combination of creasote and chlorinated phenols, a disinfectant and antiseptic; in surgery, 2 to 3% solution is employed; for inhalation in diseases of the air-passages, 5% solution.

Chloroalbumin (*klo-ro-al'-bu-min*). A derivative of peptone, protogen, or albumoses by action of chlorin.

Chlorobrom (*klo'-ro-bröm*) [*chlorin*; *bromin*]. A solution each ounce of which contains 30 grains of chloralamid and of potassium bromid. It is hypnotic and useful in sea-sickness.

Chlorobromhydrin (*klo-ro-brom-hi'-drin*). A substance formed from glycerol by replacement of two molecules of hydroxyl with one atom of chlorin and one of bromin. Syn., *Allyl chlorobromhydrin*.

Chlorodyne (*klo'-ro-din*) [*chlorin*; *δδιν*, pain]. An English proprietary remedy supposed to contain chloroform, ether, morphin, cannabis indica, hydrocyanic acid, and capsicum. It is anodyne and narcotic. Dose 10-30 min. (0.65-2.0 Cc.).

Chloroform (*klo'-ro-form*) [L., *chloroformum*]. Methyl trichlorid, CHCl_3 . A heavy, colorless liquid obtained by the action of chlorinated lime on methyl alcohol. The commercial article, *chloroformum venale*, contains 2% of impurities. Administered internally in large doses, chloroform produces narcosis and violent gastroenteritis. In small doses it is antispasmodic and carminative. Chloroform has an agreeable odor and a sweetish taste. It solidifies in the cold, boils at 62°C ., and has a specific gravity at 15°C . of 1.502. Externally it is much employed as an ingredient of rubefacient and anodyne liniments. Mixed with a large percentage of air and inhaled, it is one of the most valuable of general anesthetics, but occasionally (1:3000) causes death by cardiac paralysis. See under *Anesthetic*. Deep injections of chloroform in the vicinity of the sciatic nerve have been recommended in sciatica. Syn., *Chloroformum*, *Chloroformyl*. **C., Alcoholized**, a mixture of chloroform and alcohol. **C., Ammoniated**, equal parts of ammonia in alcohol and chloroform; antipyretic and anodyne. **C., Anschütz's**,

a crystalline substance which liberates pure

chloroform on application of gentle heat. Syn., *Salicylid chloroform*. **C., Emulsion of** (*emulsum chloroformi*, U. S. P.), chloroform, 4; expressed oil of almond, 6; tragacanth, 1.5; water sufficient to make 100 parts. **C., Gelatinized**, equal parts of chloroform and white of egg shaken together. **C. Liniment** (*linimentum chloroformi*, U. S. P.), chloroform, 300 Cc.; soap liniment, 700 Cc. **C. and Morphin, Tincture of** (B. P.), a substitute for chlorodyne. Each dose of 10 min. (0.65 Cc.) contains chloroform, $1\frac{1}{2}$ min.; ether, $\frac{1}{2}$ min.; alcohol, $1\frac{1}{2}$ min.; morphin hydrochlorid, $\frac{1}{4}$ gr.; dilute hydrocyanic acid, $\frac{1}{2}$ min.; oil of peppermint, $\frac{1}{8}$ min.; fluidextract of licorice, $1\frac{1}{2}$ min.; treacle and syrup q. s. **C., Pictet's**, chloroform obtained in a pure state by crystallizing at a low temperature. **C., Spirit of** (*spiritus chloroformi*, U. S. P.), pure chloroform, 10, alcohol, 90 parts. Dose 10 min.-1 dr. (0.65-4.0 Cc.). **C., Tincture of, Compound** (*tinctura chloroformi composita*, B. P.), chloroform, 2; alcohol, 8; compound tincture of cardamom, 10. Dose 20 min.-1 dr. (1.3-4.0 Cc.). **C.-water** (*aqua chloroformi*, U. S. P., B. P.). Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.).

Chloroformin (*klo-ro-form'-in*). A poison extracted by Auclair from tubercle bacilli. Syn., *Chloroformobacillin*.

Chloroformism (*klo'-ro-form-izm*) [*chloroform*]. 1. The use of chloroform to excess for its narcotic effect. 2. The symptoms produced by this use of the drug.

Chloroformization (*klo-ro-form-i-za'-shun*). 1. The act of administering chloroform as an anesthetic. 2. The anesthetic results from the inhalation of chloroform.

Chlorol (*klo'-rol*). A solution of sodium chlorid, mercury bichlorid, and hydrochloric acid, each, 1 part, and 3% of copper sulfate in 100 parts of water; it is disinfectant and antiseptic.

Chlorolin (*klo'-ro-lin*). A solution said to consist mainly of the chlorophenols; recommended as a disinfectant and as an antiseptic wash in 2 to 3% solution.

Chloroma (*klo-ro'-mah*) [*χλωρός*, green; *ἄμα*, a tumor]. "Green cancer"; a rare variety of sarcoma, of a greenish tint, usually seated upon the periosteum of the bones of the head.

Chlorophan (*klo'-ro-fan*) [*χλωρός*, green; *φάνερν*, show]. A yellowish-green chromophan. See *Chromophan*.

Chlorophthisis (*klo-ro-fi'-sis*). Pulmonary tuberculosis associated with chlorosis.

Chlorophyl (*klo'-ro-fil*) [*χλωρός*, green; *φύλλον*, leaf]. The green coloring-matter of plants. It decomposes carbon dioxide, setting free oxygen and forming new organic compounds. This decomposition takes place only or chiefly in the presence of sunlight. The chlorophyl is contained in certain parts of the protoplasm of the plant. It is the substance by the agency of which carbohydrates are formed in green plants.

Chloropia, Chloropsia (*klo-ro'-pa-ah, klo-ro'-se-ah*) [*χλωπία*, green, *ὄψις*, vision]. Disordered or defective vision in which all objects appear green.

Chloroplastin (*klo-ro-plas'-tin*) [*χλωπία*, green; *πλαστός*, formed]. Schwartz's name for the protoplasm in chlorophyll grains.

Chloroquinon (*klo-ro-quin'-on*). Any chlorin substitution-compound of quinon.

Chlorosarcoma (*klo-ro-sar-ko'-mah*). See *Chloroma*.

Chlorosin (*klo'-ro-sin*). A compound of albumin and chlorin, used in gastric catarrh.

Chlorosis (*klo-ro'-sis*) [*χλωπία*, green]. The "green sickness." A form of anemia, most common in young women, and characterized by a marked reduction of hemoglobin in the blood, with but a slight diminution of red corpuscles. In some cases there is a hyperplasia of the sexual organs and the heart and large blood vessels. The symptoms are those of anemia—a greenish color of the skin, gastric and menstrual disturbances. Syn., *Chloranemia*; *Chloromia*; *Green sickness*; *Morbus virginis*; *Pallor luteus*; *Pallor virginum*; *Parthenosis*. **C. adularum**, that occurring between 30 and 40 years of age. Syn., *Acanthosis*; *Chlorosis tarda*. **C. ægyptiaca**, **C. æthiopum**, **C., Egyptian**, *undulans*. **C. florida**, a rare form of chlorosis in which the color is high. **C. pituitosa**. Synonym of *Mucosa colitis*. **C. tarda**. See *C. adularum*. **C., Tropical**, **C. tropica**, *undulans*.

Chlorosonin (*klo-ro'-son-in*). A compound of chloral and hydnocyanin; it is hypnotic.

Chlorostigma (*klo-ro-sig'-mah*) [*χλωπία*, green; *στίγμα*, stigma]. A genus of plants of the order *Euphorbiaceæ*. **C. stuebelianum** is a plant of South America, the root, stem, and leaves are said to possess powerful galactagogue properties. An alkaloid, *chlorostigmin*, has been extracted.

Chlorotic (*klo-ro'-tik*) [*chlorosis*]. 1. Relating to chlorosis. 2. A person affected with chlorosis.

Chlorous (*klo'-us*). Containing or combined with chlorin; generally restricted to compounds containing chlorin combined with oxygen, but containing less oxygen than the chlorin compounds.

Chlorphenol (*klo'-fe-nol*) [*chlorin*; *phenol*]. $C_{12}H_7ClOH$. Monochlorphenol, a substance possessed of anesthetic properties. It is recommended for inhalation in diseases of the respiratory passages.

Chlorphenyl (*klo'-fen'-il*). A substance obtained from trichlorphenyl acid by action of nitric acid. **C. Salicylate**, $C_{12}H_7ClO \cdot HCO \cdot OC_2H_5$, a crystalline substance obtained from a mixture of orthochlorphenol and parachlorphenol by action of phosphorus pentachloride. The ortho-compound *chlorphenol* is used as a surgical antiseptic, the para-compound as a substitute for phenyl salicylate. Dose (to 15 gr. (4-6 Gm.) daily. Syn., *Salicylic chlorphenol ester*.

Chlorsalol (*klo'-sal-ol*). See under *Chlorophenyl Salicylate*.

Chlorum (*klo'-rum*) [*chlorin*]. The official pharmacologic name of chlorine. See *Chlorin*.

Chloryl (*klo'-ril*). A mixture of ethyl and methyl chlorida, an anesthetic. Syn., *Ethyl*.

Choana (*ko'-an-ah*) [*χωνία*, a funnel]. 1. A funnel-like opening. 2. A name applied to the posterior nasal orifices.

Choanoid (*ko'-an-oid*) [*choana*; *ειδος*, likeness]. Funnel-shaped.

Chocolate (*chok'-el-ai*) [Mex., *chocolatl*, chocolate]. A dried paste prepared from the powder of cacao-seeds (see *Cacao*) with various mucilaginous and amylaceous ingredients. It is used to prepare a beverage, and also as a vehicle, especially for quinine. **C., Acorn-**, a mixture of ground acorns with pure chocolate, prepared according to the formula of Liebreich by Stollwerk, of Cologne. It contains nearly 2% of tannic acid and is used in the dietetic management of diarrhea in enteritis.

Choke (*chok*) [ME., *choken*, to choke]. To suffocate; to prevent access of air to the lungs by compression of or by obstructing the trachea. **C.-cherry**, the fruit of *Prunus virginiana* (not of the Pharmacopœia), common in the United States. It is antispasmodic, tonic, and slightly astringent.

Choked Disc (*chokd*). See *Papillitis*.

Chol-, Cholo- (*kol-, kolo-*) [*χολή*, bile]. Prefixes meaning bile.

Cholagog, Cholagogue (*kol'-ag-og*) [*chol-*; *αγωγέω*, leading]. 1. Stimulating the flow or the secretion of bile. 2. Any agent that promotes the flow of bile.

Cholalic Acid (*kol-a'-ik*). See *Acid, Cholic*. **Cholangiostomy** (*kol-an-je-ot'-to-me*) [*chol-*; *αγγειον*, vessel, *στομία*, mouth]. The formation of a fistula into the gall bladder.

Cholangiotomy (*kol-an-je-ot'-o-me*) [*chol-*; *αγγειον*, vessel, *τομή*, a cutting]. The incision of an intrabiliary bile duct for the removal of a calculus.

Cholangitis (*kol-an-je-tis*) [*chol-*; *αγγειον*, vessel, *τις*, inflammation]. Inflammation of a bile duct. **C., Obliterative**, closure of the bile ducts the result of inflammation.

Cholecyanin (*kol-e-si-an'-in*). Synonym of *Bile cyanin*.

Cholecyst (*kol'-e-sist*) [*chol-*; *κύστις*, a bladder]. The gall-bladder.

Cholecystectomy (*kol-e-sis-tek'-to-me*) [*chole-*, *κύστις*, a bladder, *εκτομή*, a cutting off]. Excision of the gall-bladder.

Cholecystenterorrhaphy (*kol-e-sist-en-ter-or'-a-fo*) [*cholecyst*; *enterorrhaphy*]. The operation of suturing the gall bladder to the small intestine.

Cholecystenterostomy (*kol-e-sist-en-ter-or'-a-me*) [*cholecyst*; *enterostomy*]. The artificial establishment of a communication between the gall bladder and the intestine.

Cholecystitis (*kol-e-sis-tis*) [*cholecyst*; *τις*, inflammation]. Inflammation of the gall-bladder. **C., Eberth's**, that due to *Bacillus typhi abdominalis*.

Cholecystocolotomy (*kol-e-sis-to-ko-lot-o-me*) [*cholecyst*; *colotomy*]. Incision into the gall-bladder and colon.

Cholecystoduodenostomy (*kol-e-sist-o-du-od-en-us'-to-me*) [*cholecyst*; *duodenostomy*]. The establishment of an artificial communication between the gall-bladder and the duodenum.

Cholecystogastrostomy (*kol-e-sist-o-gus-tros'-to-me*) [*cholecyst*; *gastrostomy*]. The formation of an opening between the gall-bladder and the stomach.

Cholecystoileostomy (*kol-e-sist-o-il-e-os'-to-me*) [*cholecyst*; *ileostomy*]. The formation of an opening between the gall-bladder and the ileum.

Cholecystojejunostomy (*kol-e-sist-o-je-jun-us'-to-me*) [*cholecyst*; *jejunostomy*]. The establishment of a communication between the gall-bladder and the jejunum.

Cholecystolithotripsy (*kol-e-sis-to-lith-ot'-rip-se*) [*cholecyst*; *λίθος*, a stone; *τριβειν*, to crush]. The crushing of gall-stones in the gall-bladder.

Cholecystorrhaphy (*kol-e-sist-ot'-a-je*) [*cholecyst*; *ῥαφή*, a seam]. Suture of the gall-bladder, especially suture to the abdominal wall.

Cholecystostomy (*kol-e-sist-ot'-to-me*) [*cholecyst*; *στόμα*, mouth]. The establishment of an opening into the gall-bladder.

Cholecystotomy (*kol-e-sist-ot'-o-me*) [*cholecyst*; *τομήν*, to cut]. Incision of the gall-bladder to remove gall-stones, etc.

Choledocholithiasis (*kol-e-dok-o-lith-i'-as-is*) [*choledochus*; *lithiasis*]. The formation of a calculus in the common bile-duct.

Choledocholithotomy (*kol-e-dok-o-lith-ot'-o-me*) [*choledochus*; *lithotomy*]. The incision of the common bile-duct for the removal of gall-stones.

Choledochotomy (*kol-ed-o-ko'-o-me*) [*choledochus*; *τομή*, section]. An incision into the common bile-duct.

Choledochus (*kol-ed'-o-kus*) [*χολή*, bile; *δέχομαι*, to receive]. Receiving or holding bile. **C.**, **Ductus communis**, the common excretory duct of the liver and gall-bladder.

Choleglobin (*kol-e-glo'-bin*) [*χολή*, bile; *globin*]. Latschenberger's name for the antecedent of bile-pigment, resulting, in his estimation, from the decomposition of the coloring-matter of blood.

Choleic (*kol-e'-ik*) [*χολή*, bile]. Pertaining to the bile.

Cholelithiasis (*kol-e-lith-i'-as-is*) [*χολή*, bile; *λίθος*]. The presence of, or a condition associated with, calculi in the gall-bladder or in a gall-duct.

Cholelithotomy (*kol-e-lith-ot'-o-me*) [*cholelithiasis*; *τομήν*, to cut]. An incision for the removal of gall-stones.

Cholelithotripsy (*kol-e-lith-ot-rip'-se*) [*cholelithiasis*; *τριβειν*, a rubbing]. The operation of crushing a gall-stone.

Cholelithotripsy (*kol-e-lith-ot'-re-te*). See *Cholelithotripsy*.

Cholemia (*kol-e'-me-ah*) [*χολή*, bile; *αἷμα*, blood]. The presence of bile in the blood.

Choleplania (*kol-e-pla'-ne-ah*) [*χολή*, bile; *πλῆνι*, a wandering]. Jaundice.

Cholepyrrhin (*kol-e-pir'-in*) [*χολή*, bile; *πυρρός*, orange-colored]. 1. The brown coloring-matter of bile. Syn., *Bilepyrrhin*. 2. Bilirubin.

Cholera (*kol'-er-ah*) [*χολέρα*, from *χολή*, bile].

1. A name given to a number of acute diseases characterized mainly by large discharges of fluid material from the bowels, vomiting, and collapse. 2. A synonym of *Asiatic cholera*. **C.**, **Asiatic**, **C.**, **Algid**, an acute, specific, highly malignant disease, existing in India and the tropics of Asia during the entire year, and occasionally spreading as an epidemic over large areas. It is characterized by vomiting, alvine discharges resembling flocculent rice-water, severe cramps, and collapse. The rate of mortality varies from 10 to 66%, the average being over 50%. The cause is the comma bacillus of Koch, which is always found in the rice water discharges. The germs commonly gain entrance into the system by means of the drinking-water. **C.** **asphyctica**, Asiatic cholera marked by early collapse and speedy death. **C.**, **Barbel**. See under *Barbel*. **C.**, **Bilious**, a form of the disease attended with excessive discharge of bile. **C.** **blue**. See under *Pigment*. **C.** **cells**, **C.** **corpuscles**, fungi found in dejecta of cholera patients. **C.**, **Chicken**, a very fatal epidemic disease of fowls, marked by tumefaction of the lymphatic glands, with inflammation and ulceration of the digestive organs. **C.**, **English**. See *C. morbus*. **C.**, **Epidemic**. Synonym of *Asiatic cholera*. **C.** **fever**. 1. Cholera-typoid. 2. Intermittent cholera. **C.**, **Hog**, an infectious disease attacking swine and characterized by a patchy redness of the skin, with inflammation and ulceration of the bowels, enlargement of the abdominal glands, and congestion of the lungs. **C.** **infantum**, the "summer complaint" of infants and young children; an acute disease occurring in warm weather, and characterized by pain, vomiting, purgation, fever, and prostration. The disease is supposed to be caused by the bacillus of Shiga, and is favored by the prolonged action of heat, together with errors in diet and hygiene. It is most common among the poor and in hand-fed babes. The disease is of short duration, death frequently ensuing in from 3 to 5 days. **C.**, **Intermittent**, a form of simple cholera sometimes accompanying the onset of tertian fevers. **C.**, **Malignant**, Asiatic cholera. **C.** **morbus**, an acute catarrhal inflammation of the mucous membrane of the stomach and intestine, with pain, purging, vomiting, spasmodic contractions of the muscles, etc. It is a disease of the heated term and is very similar to Asiatic cholera in its symptomatology. **C.** **nostras**. Same as *C. morbus*. **C.** **orientalis**, Asiatic cholera. **C.** **red**. See under *Pigment*. **C.** **sicca**, a term applied to those cases of Asiatic cholera in which rice-water liquid is found in the intestine after

death, though none had been voided during life. **C. suppressa.** See **C. stecci**. **C. typhoid**, a septic condition resembling typhus, lasting from 2 to 7 days, and attributed to uremia resulting from acute nephritis. It frequently follows Asiatic cholera.

Choleraic (*kol-er-ə-ik*) [*cholera*]. Pertaining to or resembling cholera. **C. Diarrhea**, diarrhea characterized by a profuse, exhausting discharge of watery material.

Cholerae (*kol-er-ə-iz*). The special bacteriolytic enzyme of the cholera vibrio. Cf. *Pyocyanase* and *Typhase*.

Choleric (*kol-er-ik*). 1. Having abundant bile. 2. Applied to a temperament easily excited to anger. 3. Choleraic.

Cholerine (*kol-er-ē-nē*) [*dim. of cholera*]. A mild form of Asiatic cholera, or the initial stage of a more severe form.

Cholerytyphus (*kol-er-o-tif-us*). 1. See (*Cholera typhoid*). 2. The most malignant type of Asiatic cholera.

Cholerythrin (*kol-er-ith-rin*). See *Bilirubin*.

Cholestearin (*kol-es-ter-ē-in*). See *Cholesterin*.

Cholesteatoma (*kol-es-ter-at-ō-mah*) [*cholesterin*; *ōma*, tumor]. A teratoid tumor containing plates of cholesterol, epithelial cells, hair, and other dermal structures, and occurring most frequently in the brain.

Cholestegnosis (*kol-es-teg-nō-sis*) [*cholē*, bile; *stēgnoō*, a making close]. Thickening of the bile.

Cholesteremia, Cholesterinemia (*kol-es-ter-ē-mē-ah*, *kol-es-ter-in-ē-mē-ah*) [*cholesterin*; *ēmia*, blood]. The morbid state resulting from the retention of cholesterol in the blood. The condition is probably due to the retention of the bile acids.

Cholesterilins (*kol-es-ter-il-ins*). Hydrocarbons formed from cholesterol by action of concentrated sulfuric acid, and supposed to stand in close relationship to the terpene group.

Cholesterin (*kol-es-ter-in*) [*cholē*, bile; *stērē*, fat]. $C_{26}H_{46}O$ or $C_{26}H_{44}O$. A monatomic alcohol, a constituent of bile, gall stones, nervous tissue, egg-yolk, and blood, and sometimes found in food of fatty degeneration. It is a glistening, white, crystalline substance, soapy to the touch, crystallizing in fine needles and rhombic plates. It is insoluble in water, soluble in hot alcohol, ether, or chloroform. It is held in solution in the bile by the bile-salts; it is levorotatory. The power of immunizing against and neutralizing snake venom is attributed to it. **C., Tests for.** See *Lebermann Burchard*, *Ohermueller*, *Salkowski*, *Schiff*, *Schulze*.

Choletelin (*kol-et-ē-lin*) [*cholin*; *ēlin*, completion]. $C_{26}H_{44}N_2O_2$. An amorphous, soluble, yellow pigment derived from bilirubin. It is the final product of the oxidation of bile pigments. It is readily soluble in alkalis, alcohol, and chloroform.

Choletherapy (*kol-es-ther-ə-p-ē*) [*cholin*; *therapy*]. The remedial use of bile.

Choleuria (*kol-e-ur-ē-ah*) [*cholē*, bile; *ōuria*, urine]. The presence of bile in the urine.

Cholic (*kol-ik*) [*cholē*, bile]. Pertaining to the bile. **C. Acid.** See *Acid Cholic*.

Cholicele (*kol-iz-ēl*) [*cholē*, bile; *ēlē*, a tumor]. A tumor of the gall-bladder, due to accumulation of bile.

Cholin (*kol-in*) [*cholē*, bile]. $C_8H_{15}NO_2$. A substance found among the products of the decomposition of hog's bile and ox bile. It is also found in the extracts of the suprarenals, and is a product of the decomposition of lecithin.

Choloidinic Acid (*kol-oid-in-ik*). $C_{20}H_{35}O_2$. A decomposition-product of cholic acid.

Chololith (*kol-ō-lith*) [*cholē*, bile; *lithos*, stone]. A gall stone.

Cholosis (*kol-ō-sis*) [*cholē*, bile]. 1. Any disease caused by or associated with a perversion of the biliary secretion. 2. Lameness. **C. americana**, yellow fever.

Chondral (*kon-dral*) [*chondrus*]. Cartilaginous, relating to or composed of cartilage.

Chondrification (*kon-dri-fik-ə-shun*) [*chondrus*, *facere*, to make]. The process of being converted into cartilage.

Chondrin (*kon-drin*) [*chondrus*]. A substance obtained from the matrix of hyaline cartilage by boiling. It resembles gelatin in general properties, but differs from it in not being precipitated by tannic acid. **C. Balls**, a substance found in cartilage and composed of chondromucoid and chondronic acid.

Chondritis (*kon-dri-tis*) [*chondro*; *itis*, inflammation]. Inflammation of a cartilage.

Chondro- (*kon-dro-*) [*chondrus*]. A prefix meaning relating to cartilage.

Chondroblast (*kon-dro-blant*) [*chondro*; *blastō*, to germinate]. A cell of developing cartilage.

Chondrocele (*kon-dro-sēl*) [*chondro*; *celē*, a tumor]. A sarcocele containing masses resembling cartilage.

Chondrocoracoid (*kon-dro-kor-ak-oid*). Relating to a costal cartilage and to the coracoid process of the scapula.

Chondrocostal (*kon-dro-kost-āl*) [*chondro*; *costa*, a rib]. Relating to the ribs and their cartilages.

Chondrocranium (*kon-dro-kra-ne-um*) [*chondro*; *cranium*]. The cartilaginous cranium, as of the embryo.

Chondrocrasis (*kon-dro-kra-sis*) [*chondro*; *crasis*, a mixing]. The diseased state of the cartilages accompanying leprosy.

Chondrodendron (*kon-dro-dēn-dron*) [*chondro*; *dendron*, a tree]. A genus of South American monispermaceous climbing plants. **C. puberulum** and **C. tomentosum** are among the plants that furnish garrins.

Chondrodialysis (*kon-dro-di-āl-iz-iz*) [*chondro*; *dialysis*]. The decomposition of cartilage.

Chondroepiphysis (*kon-dro-ep-iz-iz*) [*chondro*; *epiphysis*]. A cartilage which later develops into a bony epiphysis.

Chondrogen (*kon-dro-jen*) [*chondro*; *gennē*, to beget]. A substance forming a part of the tissue of imperfectly developed cartilage.

Chondroma (kon-dro'-mah) [chondro-; *μα*, tumor]. A cartilaginous tumor.

CHONDROMA OF HAND—(Moulton.)

Chondromalacia (kon-dro-mal-a'-se-ah) [chondro-, *μαλακία*, softening]. Softening of a cartilage. **C. auris**. Same as *Hæmatoma auris*.

Chondromucoid (kon-dro-mu'-koid). A mucin found in cartilage. *C. Osseomucoid*; *Tendomucoid*.

Chondromyoma (kon-dro-mi-o'-mah) [chondro-; *μυομα*]. A neoplasm presenting the characteristics of both chondroma and myoma.

Chondrophyma (kon-dro-fi'-mah) [chondro-; *φύμα*, a growth]. 1. A tumor of a cartilage. 2. A neoplasm with cartilaginous elements. 3. See *Chondrophyte*.

Chondrophyte (kon'-dro-jit) [chondro-; *φυτεν*, a plant]. A fungous neoplasm springing from a cartilage.

Chondroplast (kon'-dro-plast). See *Chondroblast*.

Chondroporosis (kon-dro-por-o'-sis) [chondro-; *πόρος*, a passage]. The thinning of cartilage by the formation of spaces, occurring during the process of ossification.

Chondrosarcoma (kon-dro-sar-ko'-mah) [chondro-; *σάρcoma*]. A tumor composed of cartilaginous and sarcomatous tissue.

Chondrosis (kon-dro'-sis) [chondrus]. 1. Formation of cartilage. 2. A cartilaginous tumor.

Chondrosternal (kon-dro-ster'-nal). Pertaining to the sternum and costal cartilages.

Chondrosyndesmus (kon-dro-sin-dez'-mus). See *Synchondrosis*.

Chondrotome (kon'-dro-tōm) [chondro-; *τέμνω*, to cut]. An instrument for cutting cartilage.

Chondrotomy (kon-dro'-o-me) (see *Chondrotome*). The division of a cartilage.

Chondroxiphoid (kon-dro-zi'-foid). Pertaining to the costal cartilages and the ensiform cartilage.

Chondrus (kon'-drus) [χόνδρος, a grain; cartilage]. 1. Irish moss. The substance of the algæ *C. crispus* and *C. mammillosus*. These yield, on boiling with water, a soluble colloid consisting mainly of mucilage. This is demulcent and somewhat nutrient. Dose indefinite. 2. A cartilage; the ensiform cartilage.

Chopart's Amputation (sho-par(r)). An amputation of the foot consisting of a disarticulation through the tarsal bones, leaving only the os calcis and the astragalus. **C.'s Joint**, the mediotarsal articulation; the line of articulation which separates the astragalus and os calcis from the remaining tarsal bones.

Chorda (kor'-dah) [L.]. A cord, tendon, or nerve-filament. **Chordæ arteriarum umbilicalium**, the lateral ligaments of the bladder. **C. dorsalis**. See *Notochord*. **C. spermatica**, the spermatic cord. **C. tendinea**, any one of the tendinous strings connecting the papillary muscles of the heart with the auriculoventricular valves. **C. tympani**. See under *Nerve*. **C. venæ umbilicalis**, the round ligament of the liver. **C. vocalis**, a vocal band.

Chordee (kor-de') [chorda]. A painful curved erection of the penis with concavity downward. The corpus spongiosum being infiltrated from urethral inflammation, does not fill with blood during erection, and so acts like a bow-string.

Chorditis (kor-di'-tis) [chorda; *ίτις*, inflammation]. Inflammation of a vocal band. **C. nodosa**, inflammatory growths occurring on the free edge of the vocal cord at the junction of the anterior and middle third. Syn., *Singers' nodes*.

Chordurethritis (kor-du-re-thri'-tis). See *Chordee*.

Chorea (ko-re'-ah) [χορεία, dancing]. St. Vitus' dance. A functional nervous disorder, usually occurring in youth, characterized by irregular and involuntary action of the muscles of the extremities, face, etc., with general muscular weakness. Frequently a mitral systolic murmur is heard, often hemiplegic, but in a large proportion of cases due to endocarditis, and there seems to be a close relation between the two diseases. Rheumatism often coexists. Chorea may be caused by a number of conditions, among which are fright and reflex irritation. It affects girls about three times as frequently as boys. Occasionally a form of chorea is seen in the adult, and may become a serious complication of pregnancy, resulting in the death of both fetus and mother. When it occurs late in life, it generally resists treatment. Syn., *Chorea anglicorum*; *Chorea sancti viti*; *Epilepsia saltatoria*; *St. John's dance*. **C., Bilateral**, that due to cerebral lesions causing development of choreic symptoms on both sides of the body. **C., Buttonmaker's**, a form of chorea occurring in persons employed in making buttons. **C., Cardiac**, a

form marked by palpitation and other cardiac disorders. **C.**, **Chronic Progressive**, Hoffmann's name for Huntington's chorea. **C.**, **Congenital**. Synonym of *Birth-palsy*. **C. cordis**. See **C.**, *Cardiac*. **C.-corpuscles** (Ehrlicher), peculiar cells found in the brain in cases of chorea and regarded as pathognomonic, they have, however, been found in the brains of those who have never had the disease. **C.**, **Dancing**, hysteric chorea marked by rhythmic dancing movements. **C.-demonomania**, epidemic chorea. **C.**, **Diaphragmatic**, spasm of the diaphragm. **C. dimidiata**, hemichorea. **C.**, **Electric**. See *Dubini's Disease*. **C.**, **Epidemic**. See *Chorea minor*. **C.**, **Essential**, that occurring independently and not as a symptom of some other disease. **C.**, **Facial**, convulsive tic. **C.**, **False**. See **C.**, *Symptomatic*. **C.**, **General**, a form of chorea in which all or almost all of the voluntary muscles are subject to irregular contractions. **C. gravidarum**, intractable chorea occurring during pregnancy, toward its close sometimes aggravated and attended with fever. **C. gravis**, severe and dangerous cases of chorea. **C.**, **Habit-**. See *Habit-spasm*. **C.**, **Hammering**, a form marked by coordinated rhythmic spasm in consequence of which persistent hammering with the fist upon some object will be indulged in. **C.**, **Hereditary**. See **C.**, *Huntingdon's*. **C.**, **Huntingdon's**, a hereditary affection of adult or middle life, characterized by irregular movements, disturbance of speech, and gradual dementia. **C.**, **Hysteric**. See **C. major**. **C.**, **Imaginative**, choromania. **C.**, **Imitative**, choreic movements developed in children from association with choreic subjects. **C.**, **Infantile**. See **C. minor**. **C. insanienis**, maniacal chorea, a grave form of chorea usually seen in women, and associated with mania, and generally ending fatally. It may develop during pregnancy. **C. laryngea**, **C.**, **Laryngeal**, **C. laryngis**. 1. A condition attended with clonic spasm of the laryngeal muscles and marked by inability to sustain coordinate action. 2. A condition marked by spasmodic motions of some of the muscles of expiration, causing a cry. **C.**, **Limp**, West's name for a sequel of motor paralysis in children marked by very slight choreic movements. **C. major**, a form of hysteria in which there are continual regular oscillatory movements. **C.**, **Maniacal**. See **C. insanienis**. **C.**, **Metaparetic**, **C.**, **Metahemiplegic**. See **C.**, *Postparalytic*. **C.**, **Methodic**. See **C. major**. **C.**, **Mimetic**. See **C. Imitative**. **C. minor**, simple chorea. **C.**, **mollis**. See *Hemiplegia chorea*. **C.**, **Morvan's**, fibrillary contractions of the muscles of the calves and posterior portion of the thighs, often extending to the trunk and upper extremities, but leaving the face and neck intact. See *Chorea fibrillaris de Morvan*. **C. neuralgica**, convulsive tic. **C. nu-**

tans, that attended with nodding motions. **C. oculi**, choreic movements of the eyes due to cerebral lesions. **C. pandemica**. See *Dubini's Disease*. **C.**, **Paralytic** (Gowers). See *Hemiplegia chorea*. **C.**, **Partial**, imperfect choreic movements associated with contractures, due to cerebral lesion. **C.**, **Posthemiplegic**, **C.**, **Postparalytic**, a form of involuntary movement seen in patients after an attack of hemiplegia. **C.**, **Prehemiplegic**, **C.**, **Prohemiplegic**, choreic spasms of the hands or feet fortuitously hemiplegic. **C. procursiva**. Synonym of *Paralytic agitans*. **C.**, **School-made**, chorea resulting from overstimulation of children at school. **C.**, **Secondary**. See **C.**, *Symptomatic*. **C. semilateralis**, hemichorea. **C. senilis**. 1. Paralysis agitans. 2. The trembling incident to age. **C.**, **Sydenham's**, *Chorea minor*; infectious chorea. **C.**, **Symptomatic**, that dependent upon some organic disease. **C.**, **Unilateral**. See *Hemichorea*.

Choreic (ko-re'-ik) [*chorea*] Relating to, of the nature of, or affected with chorea.

Choreiform (ko-re'-i-j-um) [*chorea*, *forma*, form] Resembling chorea.

Choreomania, **Choreomania** (ko-re-may'-ne-ah, ko-re-o-may'-ne-ah) [*chorea*, *mania*, madness] Synonym of *Choromania*.

Choriocapillaris (ko-re-o-kap-il-a'-ris) [*chorion*, *capillus*, a hair] The network of capillaries over the inner portion of the choroid coat of the eye.

Chorioepithelioma (ko-re-o-ep-i-the-li-o-mah) See *Decidua*.

C. benignum, degenerated relics of fetal epithelium or epiblast in the maternal tissues. **C. malignum**, Malignant (1895) name for an epithelioma due to malignant degeneration of fetal epiblast left in the maternal tissues. Syn. *Decidua malignum*, *Sarcoma deciduocellulare*, *Synchythoma malignum*.

Choroid (ko'-re-oid). See *Choroid*.

Chorioidal (ko-re-oid'-al). See *Choroid*.

Chorioidal Tubercle (ko-re-oid'-e-al tu'-ber-kl). See *Choroid Tubercle*.

Chorioideremia (ko-re-oid'er-ee-me-ah). See *Chorioideremia*.

Chorioiditis (ko-re-oid'-it-is). See *Chorioiditis*.

Chorioma (ko-re-oid'-mah) [*chorion*, *ma*, tumor] A neoplasm developed from the chorion.

Chorion (ko'-re-on) [*typos*, skin; fetal membrane] The outermost of the fetal membranes, formed from the vesicular membrane, the false amnion, and the allantois. The chorion lies between the amnion and the decidua (reflexa and vera). **C.**, **Cystic Degeneration of**, a myxoma of the chorion, producing the so-called "hydatid mole." It is characterized by rapid increase in the size of the uterus, hemorrhage, often profuse, beginning during the second month of pregnancy, and the discharge of small cysts, which in appearance, surrounded by bloody clots. These cysts vary in size from a pin-head to a filbert. **C. frondosum**, **C.**, **Shaggy**, the part covered by villi. It helps to form the placenta. **C.**

laeve, the membranous portion of the chorion.

Chorionic (*ko-re-on'-ik*) [*chorion*]. Relating to the chorion.

Chorionin (*ko-re-on'-in*). A name given by Branchacourt (1922) to a preparation made from sheep's placenta by submitting it to pressure without heat. The juice thus expressed is made palatable with syrup after being sterilized with ammonium fluorid; employed as a galactagog.

Chorionitis (*ko-re-on-i'-tis*). See *Scleroderma*.

Chorioretinitis (*ko-re-o-ret-in-i'-tis*). See *Choroidoretinitis*.

Choroid (*ko'-roid*) [*chorion*; *ειδος*, likeness].

1. The vascular tunic of the eye, continuous with the iris in front, and lying between the sclerotic and the retina. 2. Pertaining to the choroid; choroidal. **C. Plexus**, a vascular plexus in the ventricles of the brain. **C. Tubercle**, a diagnostic sign of tuberculous meningitis found by ophthalmoscopic investigation.

Choroideremia (*ko-roid-er-e'-me-ah*) [*choroid*; *ιριδα*, desolation]. Absence of the choroid.

Choroiditis (*ko-roid-i'-tis*) [*choroid*; *ιτις*, inflammation]. Inflammation of the choroid coat of the eye. It may be anterior, the foci of exudation being at the periphery of the choroid, or central, the exudate being in the region of the macula lutea; diffuse or disseminated, characterized by numerous round or irregular spots scattered over the fundus, exudative or nonsuppurative, when there are isolated foci of inflammation scattered over the choroid; metastatic, when due to embolism, and suppurative, when proceeding to suppuration. **C.**, **Areolar**, **C. areolaris**, that in which the first foci occur near the fovea and extend toward the periphery in constantly increasing distances. **C. guttata senilis**. See *Tay's Choroiditis*. **C. serosa**. Synonym of *Glucoma*.

Choroidocyclitis (*ko-roid-o-si-kl'i'-tis*) [*choroid*; *αἷματος*, a circle; *ιτις*, inflammation]. Inflammation of the choroid and of the ciliary body.

Choroidoiritis (*ko-roid-o-i-ri'-tis*) [*choroid*; *ιρις*]. Inflammation of the choroid and the iris.

Choroidoretinitis (*ko-roid-o-ret-in-i'-tis*) [*choroid*, *retinitis*]. Choroiditis associated with retinitis. **C.**, **Ametropic**, that caused by ametropia.

Choromania (*ko-ro-ma'-ne-ah*) [*χορος*, a dance; *μανια*, madness]. A nervous disorder characterized by dancing or other rhythmic movements, epidemic chorea; dancing mania.

Choronosologia, **Choronosology** (*ko-ro-no-sol o'-je-ah*, *ko-ro-no-sol-o'-je*) [*χορος*, a region; *λογία*, a disease, *λογος*, science]. The science of the geographic distribution of diseases or of endemic diseases of some region.

Christian Science. An alleged system of therapy; a form of faith-cure, Eddyism.

Christison's Formula. A formula for estimating the amount of solids in the urine; multiply the last two figures of the specific gravity expressed in four figures by 2.33 (or

by 2, *Trapp*; or by 2.2, *Loebisch*). This gives the amount of solids in every 1000 parts.

Chroatol (*kro'-at-ol*), $C_{10}H_{16}O$, 2H. A greenish-yellow, crystalline substance obtained by action of turpentine on iodine; used in powder or ointment in treatment of skin diseases. Syn., *Terpinodohydrate*.

Chroma-, **Chromato-** [*χρῶμα*, color]. Prefixes meaning colored.

Chromaffin Cells (*kro'-ma'-fin*) [*chroma-*; *αφίνις*, akin to]. Cells that have an affinity for chromium, which makes them yellow. Syn., *Phaeochrome*, *Paraganglia*.

Chromate (*kro'-māt*) [*χρῶμα*, color]. Any salt of chromium trioxid.

Chromatopsia, **Chromatopsia** (*kro-mat-e-lop'-se-ah*, *-sis*) [*chroma-*; *δραψις*, imperfect; *ὄψις*, vision]. Color-blindness.

Chromatic (*kro-mat'-ik*) [*χρῶμα*, color]. Relating to or possessing color. **C. Aberration**. See *Aberration*, *Chromatic*. **C. Audition**, luminous sensations aroused by sound.

Chromatin (*kro'-mat-in*) [see *Chromatic*]. The portion of the protoplasm of a cell that takes the stain, forming a delicate reticular network or plexus of fibrils permeating the achromatin of a cell. Syn., *Karyomitome*.

Chromatogenous (*kro-mat-oj'-en-us*) [*chromato-*; *γενᾶν*, to beget]. Producing color.

Chromatolysis (*kro-mat ol'-is-is*) [*chromato-*; *λύσις*, a loosing]. Flemming's term for the breaking-down of the nucleus at the death of the cell. Syn., *Karyolysis*.

Chromatophore (*kro-mat'-o-for*) [*chromato-*; *φορος*, bearing]. Any colored cell-plastid.

Chromatoplasm (*kro-mat'-o-plasm*) [*chromato-*; *πλάσμα*, anything formed]. The substance of the chromatoplasts as distinguished from the other cell-substances, karyoplasm, cytoplasm, metaplasm, paraplasma, etc.

Chromatoplast (*kro-mat'-o-plast*). See *Chromatophore*.

Chromatopsia (*kro-mat-op'-se-ah*) [*chromato-*; *ὄψις*, vision]. A disorder of vision in which color-impressions arise subjectively. It may be due to disturbance of the optic centers, or to drugs, especially *santonin*.

Chromatoskiameter (*kro-mat-o-ski-an'-et-er*) [*chromato-*; *σκία*, a shadow; *μετρον*, a measure]. Holmgren's apparatus for testing color-sense, consisting of a lamp and a white screen, on which is cast the shadow of a pencil placed in front of different colored glasses. A scale indicates when the shadows are of equal brightness.

Chrome (*krōm*). See *Chromium*. **C.-alum**, $CrK_2(SO_4)_2 + 12H_2O$. A compound of chromium and potassium sulfate, forming large, dark-violet crystals soluble in five parts of water, the solution turning green when heated; used as a pigment.

Chromic (*kro'-mik*) [*chromium*]. Pertaining to or made from chromium. **C. Acid**, **C. Anhydrid**, chromium trioxid.

Chromidrosis (*kro-mid ro'-sis*) [*χρῶμα*, color; *ιδρῶς*, sweat]. A rare condition of the sweat in which it is variously colored, being blue-

ish, blackish, reddish, greenish, or yellowish. *Black sweat* (*schorrrha nigricans*) occurs usually in hysteric women, the face being most often affected. It is associated with chronic constipation and is due to the presence of indican in the sweat. *Red sweat* (*hematidrosis*) may be due to an exudation of blood into the sweat-glands, or to the presence of a microorganism in the sweat.

Chromism (*kro'-mizm*). Excessive or abnormal coloration.

Chromite (*kro'-mit*). 1. A combination of chromium sesquioxide with the oxide of some other metal. 2. Any organic pigment.

Chromium (*kro'-me-um*) [*χρῶμα*, color]. Cr = 52.2; quantivalence II and IV. One of the elements of the iron group. The various salts of chromium, especially the derivatives of chromium trioxide, CrO_3 , are much used in the manufacture of pigments and as a caustic. All are poisonous. **C. and Potassium Sulfate**. See *Chrome-alum*. **C. Sesquioxide**, Cr_2O_3 , a green pigment occurring in nature as chromesochre; it can be prepared artificially. **C. Trioxide**. See *Acid, Chromic*.

Chromo- (*kro-mo-*) [*χρῶμα*, color]. A prefix meaning colored.

Chromocyte (*kro'-mo-sit*) [*chromo-*; *κύτος*, a cell]. Any colored cell.

Chromocytometer (*kro-mo-si-tom'-et-er*) [*chromocyte*; *μέτρον*, a measure]. An instrument for estimating the proportion of hemoglobin present in the blood.

Chromodermatitis (*kro-mo-dee-mat'-o'-sis*) [*chromo-*; *dermatitis*]. A skin disease characterized by discoloration of the surface.

Chromodiagnosis (*kro-mo-di-ag'-no'-sis*) [*chromo-*; *διαγνώσις*] Seward's term (1901) to designate the diagnosis of hemorrhages of the neuraxis by yellow discoloration of the cephalorachidian fluid (xanthochromia), due, according to Tullier, to the normal lumen of the serum.

Chromogen (*kro'-mo-jen*) [*chromo-*; *γενᾶναι*, to produce]. Any principle of the animal or vegetable economy which is susceptible, under suitable circumstances, of being changed into a coloring-matter.

Chromogenic (*kro-mo-jen'-ik*) [see *Chromogen*]. Producing color or pigment; applied generally to pigment-producing bacteria.

Chromolume (*kro'-mo-lum*) [*chromo-*; *λumen*, light]. An apparatus for the production of colored rays for therapeutic purposes. **C., Electro-arc**, a special device for solarization by means of the arc light.

Chromomere (*kro'-mo-mér*) [*chromo-*; *μέρος*, a part]. One of the minute granules composing the chromosomes. Syn., *Id.*

Chromoparic, Chromoparous *kro-mop'-ar-ik, -us* [*chromo-*; *παίρειν* to furnish]. Excreting a colored transformation product which is diffused out upon and into the surrounding medium. It is said of certain bacteria.

Chromophan *kro'-mo-fan* [*chromo-*; *φαίνω*, to appear]. The pigment of the inner segments of the retinal cones of certain ani-

mals. There are at least three varieties, chlorophan, rhodophan, xanthophan.

Chromophil (*kro'-mo-fil*) Same as *Chromophilous*.

Chromophilous (*kro-mo'-fil-us*) [*chromo-*; *φιλος*, loving]. Readily stained, easily absorbing color.

Chromophobic (*kro-mo'-fo-bik*) [*chromo-*; *φοβος*, fear]. Not stainable; not readily absorbing color. Cf. *Chromophilous*.

Chromophoric, Chromophorous (*kro-mo'-for-ik, kro-mo'-for-us*) Applied to chromogenic bacteria in which the pigment is stored in the cell-protoplasm of the organism.

Chromophose (*kro'-mo-fos*) [*chromo-*; *φως*, light]. A subjective sensation of color. See *Phose*.

Chromophytosis (*kro-mo-fit'-o'-sis*) [*chromo-*; *φυτόν*, a plant]. 1. Any necromorphic plant-growth that produces a discoloration of the skin in which it grows, and pigmented skin disease caused by a vegetable parasite. 2. A synonym of *Tinea versicolor* or *Eichstedt's disease*.

Chromoplasm (*kro'-mo-plazm*) [*chromo-*; *πλάσμα*, anything formed]. The network of a nucleus, so called because it stains readily.

Chromoproteid (*kro-mo-pro'-te-id*) [*chromo-*; *πρωτεΐν*]. Any proteid capable of being broken up into albumin and a coloring-matter.

Chromosochromic (*kro-mo-to-kro'-sokh*) Containing chromium both as a trivalent and as a bivalent radicle.

Chromosome (*kro'-mo-sóm*) [*chromo-*; *σώμα*, body]. A chromatin fiber formed during karyokinesis. Syn., *Karyomita*. **C., Bivalent**, one representing two chromosomes joined end to end. Cf. *C.s., Pseudoreduction of*. **C., Plurivalent**, one having the value of two or more chromosomes. Cf. *C.s., Pseudoreduction of*. **C.s., Pseudoreduction of**, apparent reduction of the number of chromosomes through increase of bivalent or plurivalent chromosomes. **C.s., Reduction of**, the halving of the number of chromosomes in the germ-nuclei during maturation.

Chromospermism (*kro-mo-sperm'-izm*) [*chromo-*; *σπέρμα*, seed]. A condition in which the semen is colored. Cf. *Cytospermism*.

Chronic (*kron'-ik*) [*χρόνος*, time]. Long continued; of long duration; opposed to acute.

Chronicity (*kron'-is-ee-tee*) [*chronos*]. The state of being chronic or long-continued.

Chronograph (*kro'-no-graf*) [*χρόνος*, time; *γράφω*, to write]. An instrument for graphically recording intervals of time in physiologic and psychologic experiments.

Chrotopsia, Chropsia (*kro-top'-o'-sia, krops'-o'-sia*) See *Chromatopsia*.

Chrysarobin, Chrysarobinum (*kris-ar-oh'-bin, kris-ar-oh'-bin-um*) [*χρῶμα*, gold; *αράβη*, East Ind.], bark of a leguminous tree, $\text{C}_{12}\text{H}_{10}\text{O}_7$. A reduction-product of chrysophanic acid; it occurs in Goa powder and araroba powder. It is a yellow-colored powder, the product of

the decay of *Vouacoupa araroba*, a Brazilian tree. It is a gastrointestinal irritant; locally and internally it is useful in psoriasis, but stains the skin a dark yellowish-brown color. Dose, internally, $\frac{1}{4}$ - $\frac{1}{2}$ gr. (0.008-0.032 Gm.). **C. Ointment** (*unguentum chrysarobini*, U. S. P.), contains 10% of the drug with 90% benzoated lard. **C. Oxid**, a brownish-black powder obtained from chrysarobin in boiling water by the action of sodium peroxid. It is recommended in treatment of eczema and acne rosacea in 5 to 10% ointment.

Chrysolein (*kris-o'-le-in*). Sodium fluorid.

Chrysophan (*kris'-o'-fan*) [*χρυσός*, gold; *φαίνω*, to show]. $C_{16}H_{14}O_6$. A glucosid found in rhubarb.

Chrysophanic Acid (*kris-o'-fan'-ik*). See *Acid*, *Chrysophanic*.

Chrysoretin, **Chrysorrhutin** (*kris-o'-ret'-in*). A yellow pigment found in senna and identical with chrysophan.

Chuchuarin (*chu-chu'-ar-in*) [*Chuchua*, Indian name]. $C_{20}H_{18}N_2O_2$. An alkaloid obtained from the seeds and wood of *Semecarpus anacardium*, an anacardiaceous aphrodisiac plant of the East Indies. It is extremely poisonous, acting somewhat like strychnin.

Chvostek's Symptom. Increase of the mechanical irritability of the motor nerves, especially the facial, in tetany. See also *Weiss' Sign*.

Chyle (*ki*) [*χυλός*, juice]. The milk-white fluid absorbed by the lacteals during digestion. On standing, it separates into a thin, jelly-like clot and a substance identical with serum. **C.-corpuscle**, any floating cell of the chyle. These cells resemble, and are probably identical with, the colorless blood-corpuscles. **C., Granular, C., Molecular Base of**, the minute particles of fat which give the milky appearance to chyle.

Chylemia (*ki-le'-me-ah*) [*chyle*; *αἷμα*, blood]. The presence of chyle in the blood.

Chylification (*ki-le'-fik'-shun*) [*chyle*; *facere*, to make]. The forming of chyle from food.

Chyliferous (*ki-lif'-er-us*) [*chyle*; *ferre*, to carry]. Containing or carrying chyle.

Chylification (*ki-le'-fik'-shun*) [*chyle*; *facere*, to make]. The process by which chyle is formed, separated, and absorbed by the villi of the small intestine.

Chylivorous (*ki-liv'-er-us*) [*chyle*; *vorare*, to devour]. Applied to parasitic organisms subsisting on chyle.

Chylodochium (*ki-lo-do'-ke-um*) [*chyle*; *δοχεῖον*, receptacle]. The receptaculum chyli.

Chyloperitoneum (*ki-lo-per-it-on'-e-um*). A condition marked by an effusion of chyle in the peritoneum.

Chylopoiesis (*ki-lo-poi'-e-sis*) [*chyle*; *ποιεῖν*, to make]. Chylification.

Chylopoietic (*ki-lo-poi'-e'-ik*) [see *Chylopoiesis*]. Making or forming chyle.

Chylorrhœa (*ki-lor'-e'-ah*) [*chyle*; *ρεῖν*, to flow]. An excessive flow of chyle, also, a diarrhea characterized by a milky color of the feces.

Chylothorax (*ki-lo-tho'-raks*) [*chyle*; *θώραξ*, the chest]. The presence of chyle in the pleural cavity.

Chylous (*ki'-lus*) [*chyle*]. Relating to or resembling chyle.

Chyluria (*ki-lu'-re-ah*) [*chyle*; *οὐρὸν*, urine]. The passage of chyle in the urine. It is thought to be caused by a disordered condition of the lacteals, and is also connected with the presence in the blood of *Filaria sanguinis-hominis*, which blocks up the lymph-channels.

Chyme (*kim*) [*χυμός*, chyme]. Food that has undergone gastric digestion and has not yet been acted upon by the biliary, pancreatic, and intestinal secretions.

Chymification (*ki-me'-fik'-a'-shun*) [*chyme*; *facere*, to make]. The change of food into chyme by the digestive process.

Chymosin (*ki'-mo-sin*) [*chyme*]. Rennin; the rennet ferment.

Ciamician and Maguanini's Test for Skatol. Skatol warmed with sulfuric acid produces a purple-red color.

Cibarian (*sib-a'-re-an*) [*cibus*, food]. Relating to food and the organs concerned in mastication and deglutition.

Cibation (*si-ba'-shun*) [*cibus*]. 1. The act of receiving nourishment. 2. The process of condensing a liquid.

Cibophobia (*si-bo-fa'-be-ah*) [*cibus*; *φόβος*, fear]. Morbid aversion to food.

Cibotium (*sib-of'-e-um*) [*κίβωτος*, a chest]. A genus of ferns of the East Indies, the long, soft hairs of the rhizome are an efficient hemostat. **C. barometz**, under the name of *Agnus scythicus*, the astringent rhizome with attached petioles and scales, cut into shapes of different animals, was held in high repute as a drug in the middle ages. See *Penghawar djambi*.

Cicatricial (*sik-at-rish'-al*) [*cicatrix*]. Pertaining to or of the nature of a cicatrix.

C. Deformities, abnormal contractions caused by cicatrices. **C. Tissue**, a form of dense connective tissue seen in cicatrices.

Cicatricose, **Cicatrissate** (*sik-at'-re-kös*, *sik-at'-riz-ät*). Marked with cicatrices or cicatricial impressions.

Cicatrix (*sik-at'-triks*) [L.]. A scar. The connective tissue which replaces a localized loss of substance. Its color is usually whitish and glistening when old, red or purple when newly developed. **C., Exuberant, C., Hypertrophic, C., Keloid**, one that hypertrophies after the healing of a wound and becomes red and prominent. **C., Vicious**, one that impairs the function of a part.

Cicatrization (*sik-at-riz-a'-shun*) [*cicatrix*]. The process of healing of a wound.

Cicatrose (*sik'-at-rös*). See *Cicatricose*.

Cichorium (*sik-of'-ee-um*) [*κίχόριον*]. A genus of plants of the order *Compositæ*. *C. intybus*, chicory, succory, bunk, is a hardy perennial of Europe; the root of the wild plant is said to be a powerful alterative. **C. Glucosid**, $C_{22}H_{34}O_{10} + 4H_2O$ (?), a bitter glucosid obtained from the flowers of *C. intybus*.

Cicuta (sik'-u'-tah) [L., "hemlock"]. A genus of umbelliferous plants. *C. virosa* is a poisonous species of northern Europe. It is never used internally, but has been applied externally in rheumatism.

Cicutism (sik'-u'-tizim) [*Cicuta*]. Poisoning with water-hemlock, *Cicuta virosa*. It is marked by epileptiform convulsions, dilation of the pupils, cyanosis of the face, and coma.

Cilia (sil'-e-ah) [pl. of *cilium*, the eyelid or eyelash]. 1. The eyelashes. 2. The locomotor and prehensile organs of certain microorganisms. 3. The hair-like appendages of certain epithelial cells, the function of which is to propel fluid or particles.

Ciliary (sil'-e-a-re) [*cilia*]. 1. Pertaining to the eyelid or eyelash. 2. Relating to ciliary movement. 3. Pertaining to the ciliary apparatus. **C. Apparatus**, the structure related to the mechanism of accommodation. **C. Arteries**, anterior, posterior long, and posterior short, branches of the ophthalmic artery, supplying the recti muscles, the ciliary apparatus, and the posterior structures of the eye, with the exception of the retina. See under *Artery*. **C. Body**, the ciliary muscle and processes. **C. Canal**, the canal of Fontana. **C. Ganglion**, the ganglion at the apex of the orbit, supplying the ciliary muscle and iris. **C. Ligament**. See *Ligamentum pectinatum*. **C. Movement**, movement by means of vibratory cilia. **C. Muscle**, the muscle of accommodation, the contraction of which lessens the tension upon the suspensory ligament of the lens. **C. Nerves**, branches of the ophthalmic ganglion supplying the anterior structures of the eyeball and the accommodative apparatus. **C. Neuralgia**, neuralgic pain of the eye, brow, temple, etc. **C. Processes**, circularly arranged choroid foldings continuous with the iris in front. **C. Region**, the pericorneal or "danger zone," corresponding to the position of the ciliary body. **C. Zone**, the ciliary processes collectively.

Ciliated (sil'-e-a-ted) [*cilia*]. Having cilia.

Ciliospinal (sil'-e-u-spi'-nāl) [*cilia*; *spina*, the spine]. Relating to the ciliary zone and the spine. **C. Center**. See *Center*, *Cilio-spinal*.

Cilium (sil'-e-um). See *Cilia*.

Cimex (si'-mek) [L., "a bug"]. A genus of hemipterous insects. **C. lectularius**, the common bedbug.

Cimicifuga (sim'-is-e-ju'-gah) [*cimex*; *fugare*, to drive away]. Black snakeroot; black cohosh. The root of *C. racemosa*, ord. *Ranunculaceae*. A stomachic, antispasmodic, aphrodisiac, expectorant, and diuretic. Its action on the heart is similar to that of digitalis. It has been used in cardiac diseases, functional impotence, chorea, and ovarian neuralgia. **C., Extract of** (*extractum cimicifugæ*, U. S. P.) Dose 4 gr. (0.25 Gm.). **C., Fluidextract of** (*fluidextractum cimicifugæ*, U. S. P.) Dose 5-30 min. (0.32-2.0 Cc.). **C.,**

Liquid Extract of (*extractum cimicifugæ liquidum*, B. P.) Dose 3-30 min. (0.3-2.0 Cc.).

C., Tincture of (*tinctura cimicifugæ*, U. S. P.) (20% strength). Dose 15 min.-1 dr (1-4 Cc.).

Cimicol (sim'-ol) See *Aldehyd*, *Cinnamic*.

Cina (si'-nah) [L.]. The plant *Artemisia santonica*. See *Santonica*.

Cinchamidin (sin-kam'-id-in) [*cinchona*, *amidin*], $C_{22}H_{27}N_3O_7$. An alkaloid found in the mother-liquor from which cinchonidin has been extracted.

Cincholin (sin'-ko'-lin) [*cinchona*]. A pale yellow liquid alkaloid isolated from the mother-liquors of quinin.

Cinchona (sin'-ko'-nah) [from the Countess *Chinchon*]. Peruvian bark. The bark of several varieties of cinchona, a tree native to the eastern slopes of the Andes, the most valuable being *C. calisaya*. Other varieties are *C. condaminea*, pale bark, *C. pitayensis*, Pitayo bark, and *C. micrantha*. Cinchona bark contains 21 alkaloids, of which four—quinin, cinchonin, quinidin, and cinchonidin—are the most important. Cinchona has the same physiologic action and therapeutic uses as its chief alkaloid, quinin. See *Quinin*. It is also an astringent, bitter, and stomachic tonic, stimulating appetite and promoting digestion, beneficial in atonic dyspepsia and adynamia, but especially useful in malarial affections. **C., Decoction of** (*decoctum cinchona*, B. P.) Dose 1-2 oz. (30-60 Cc.). **C., Fluidextract of** (*fluidextractum cinchona*, U. S. P.) Dose 10 min.-1 dr (0.65-4.0 Cc.). **C., Infusion of** (*infusum cinchona*, B. P.) Dose 1 dr-1 oz. (4-30 Cc.). **C., Liquid Extract of** (*extractum cinchona liquidum*, B. P.) Dose 5-10 min. (0.3-0.6 Cc.). **C., Red** (*cinchona rubra*, U. S. P.), the dried bark of *C. succirubra*. Dose 15 gr. (1 Gm.). **C., Tincture of** (*tinctura cinchona*, U. S. P.) (20% of bark). Dose 1-2 dr. (2-8 Cc.). **C., Tincture of Compound** (*tinctura cinchona composita*, U. S. P.), Huxham's tincture. Dose 1 dr-1/2 oz. (4-16 Cc.).

Cinchonamin (sin-kon'-am-in) [*cinchona*; *amin*], $C_{19}H_{21}N_3O$. An alkaloid of cuprea bark. It occurs in glistening, colorless crystals that are nearly insoluble in water and but slightly soluble in ether.

Cinchonin (sin-kon'-is-in) [*cinchomin*], $C_{19}H_{21}N_3O$. An artificial alkaloid derived from cinchonin.

Cinchonidin (sin-kon'-id-in), $C_{19}H_{21}N_3O$. An alkaloid derived from cinchona. It is a crystalline substance resembling quinin in general properties. **C. Bisulfate**, **C. Disulfate**, $C_{19}H_{21}N_3O \cdot H_2SO_4$ or $5H_2O$, prisms soluble in water and alcohol; antiperiodic. Dose 15-30 gr. (0.97-1.94 Gm.). Syn., *Acid cinchonidin sulfate*. **C. Salicylate**, has decided antiperiodic properties. **C. Sulfate** (*cinchonidina sulphas*, U. S. P.), $(C_{19}H_{21}N_3O)_2 \cdot H_2SO_4$ or $3H_2O$, less bitter than quinin, and valuable as an antipyretic. Dose 1-20 gr. (0.065-1.3 Gm.) or more. **C. Tannate**, a tasteless, yellow, amorphous powder, solu-

ble in alcohol; it is used in intermittent fevers. Dose 8-16 gr. (0.52-1.04 Gm.).

Cinchonin (*sin'-ko-nin*) [*cinchona*]. $C_{19}H_{21}N_3O$. An alkaloid derived from cinchona. It is a colorless, crystalline body, similar to quinin in therapeutic effects, but less active. **C. Bisulfate**, $C_{19}H_{21}N_3O \cdot H_2SO_4$, used as is cinchonin. **C. Dihydrochlorate**, is said to contain 60% of cinchonin; antipyretic and antiseptic. **C. Herapathit**, **C. Iodosulfate**. See *Antiseptol*. **C. Hydrochlorate**, **C. Hydrochlorid**, used as is cinchonin. **C. Nitrate**, $C_{19}H_{21}N_3O \cdot HNO_3 + H_2O$, used as is cinchonin. **C. Salicylate**, $C_{19}H_{21}N_3 \cdot C_7H_5O_2$, used in rheumatism in malarial regions. Dose 5-20 gr. (0.32-1.3 Gm.). **C. Sulfate** (*cinchonine sulphas*, U. S. P.), $(C_{19}H_{21}N_3O)_2 \cdot H_2SO_4 + 2H_2O$. It is soluble with difficulty in water, but soluble in acidulated water. Dose 5-30 gr. (0.32-2.0 Gm.). **C. Tannate**, yellow powder, soluble in alcohol; used in the same manner as is cinchonin.

Cinchonism (*sin'-ko-nizm*) [*cinchona*]. The systemic effect of cinchona or its alkaloids when given in full doses. The symptoms produced are a ringing in the ears, with deafness, headache, giddiness, dimness of sight, and a weakening of the heart's action.

Cinchonize (*sin'-ko-niz*) [*cinchona*]. To bring under the influence of cinchona or its alkaloids.

Cinchotannin (*sin'-ko-tan'-in*), $C_{14}H_{16}O_8$. A glucosid existing in cinchona bark in the proportion of 3 to 4%; a brownish-red substance, soluble in water and alcohol, and forming white precipitates with tartar emetic and gelatin. Syn., *Cinchotannic acid*; *Quinotannic acid*.

Cinclisis (*sin'-klis-is*) [*κλίσσις*, any quick, repeated motion]. Quick, spasmodic movement of any part of the body, but particularly applied to rapid winking. Hippocrates' term for quick motion of the chest, as in dyspnea. Syn., *Cinchesmus*.

Cincture (*sin'-k'tūr*) [*cinctura*, a girdle]. A belt or girdle. **C.-feeling**, a sensation as if the waist were encircled by a tight girdle. See *Girdle pain*.

Cinereaceous (*sin'-er-ə'-shus*) [*cinerea*]. Ash-gray in color.

Cinerea (*sin'-er-ə-sh*) [*cinereus*, ashen]. The gray substance of the brain, spinal cord, and ganglions. **C., Lamina**, a thin layer of gray substance extending backward above the optic commissure from the termination of the corpus callosum to the tuber cinereum.

Cinereal (*sin'-er-ə-sh*). Ashy.

Cinesia (*sin'-er-ə-sh*). See *Kinesis*.

Cingula (*sin'-gu-lā*). 1. A band, girdle, or zone. 2. Burdach's name for the upper part of the fornicate gyrus.

Cingule (*sin'-gūl*) [*cingulum*]. The groove separating the primitive cusp or tubercle frequently found on the lingual face of the upper incisor teeth. Syn., *Cingulum*; *cusculus*.

Cingulum (*sin'-gu-lum*) [*cingere*, to gird]. 1. A girdle or zone; the waist. 2. Herpes zoster or shingles. 3. See *Cingule*. 4. A fibrous bundle in the fornicate gyrus of the brain. Syn., *Bundle of the gyrus fornicatus*; *Fasciculus arcuatus*. **C. halleri**, the abdominal muscles. **C. veneris**. See *Corona veneris*.

Cinnabar (*sin'-ab-ar*) [*κιννάβρις*, a pigment]. Mercuric sulfid, HgS.

Cinnamene (*sin-am'-en*). See *Styrol*.

Cinnamic (*sin-am'-ik*) [*cinnamon*]. Pertaining to or derived from cinnamon. **C. Acid**. See *Acid, Cinnamic*. **C. Aldehyd** (*cinnaldehydum*, U. S. P.). See *Aldehyd, Cinnamic*.

Cinnamol (*sin'-am-ol*). 1. See *Styrol*. 2. See *Aldehyd, Cinnamic*.

Cinnamomum (*sin-am-ō'-mum*). See *Cinnamon*.

Cinnamon (*sin'-am-on*) [*κιννάμωμον*, cinnamon].

The inner bark of the shoots of several species of *Cinnamomum*, native to Ceylon and China, the latter variety being known in commerce under the name of *cassia*. Two varieties are official: *Cinnamomum Saigonicum*, Saigon cinnamon, and *C. zeylanicum*, Ceylon cinnamon. Its properties are due to a volatile oil. It is an agreeable carminative and aromatic stimulant, used in flatulence, colic, enteralgia, etc. **C., Aromatic, Fluidextract of**, contains aromatic powder, 10; alcohol, 8 parts. Dose 10-30 min. (0.65-2.0 Cc.). **C., Aromatic, Powder of**, made up of aromatic powder, cinnamon, of each, 35; cardamom, nutmeg, of each, 15. Dose 10-30 gr. (0.65-2.0 Gm.). **C., Compound Powder of** (*pulvis cinnamomi compositus*, B. P.), cinnamon-bark, cardamom-seeds, and ginger. Dose 3-10 gr. (0.2-0.65 Gm.). **C., Oil of** (*oleum cinnamomi*, U. S. P.), the volatile oil of cinnamon. Dose 1-5 min. (0.005-0.32 Cc.). **C., Spirit of** (*spiritus cinnamomi*, U. S. P.), 10% of the oil in spirit. Dose 5-30 min. (0.32-2.0 Cc.). **C., Tincture of** (*tinctura cinnamomi*, U. S. P.), 20% of powdered Saigon cinnamon in glycerol, alcohol, and water. Dose 4-2 dr. (2-8 Cc.). **C. Water** (*aqua cinnamomi*, U. S. P.), 2 parts of oil in 1000 of water. Dose 1-2 oz. (30-60 Cc.).

Cinnamyl (*sin'-am-il*) [*cinnamou*], C_9H_9O . The radicle believed to exist in cinnamic acid. **C. Cinnamate**. See *Styracin*. **C.-eugenol**, $C_{15}H_{13}O_3$. It is antiseptic and is used hypodermatically instead of eugenol in tuberculosis. Injection, 2-8 min. (0.12-0.5 Cc.) of olive-oil solution. **C. Hydrate**, cinnamic acid. **C. Hydrid**, cinnamic aldehyd. **C.-metacresol**, the metacresol ester of cinnamic acid; a nontoxic, nonirritating antiseptic substance recommended in treatment of tuberculosis. Syn., *Heterocresol*.

Circellus (*ser-sel'-us*) [L.; pl., *circelli*]. A small circle. **Circelli cerebelli**, the laminas of the cerebellum. **C. venosus hypoglossi**, a venous plexus encircling the hypoglossal nerve in the anterior condylar foramen; a

communicates with the occipital sinus and with the jugular vein.

Circle (*ser'-kl*) [*kirkos*, a circle]. A ring; a line, every point of which is equidistant from a point called the center. **C.**, **Ciliary**, the ciliary ligament. **C. of Diffusion**. See *Diffusion-circle*. **C. of Haller**. 1. The plexus of vessels formed by the short ciliary arteries upon the sclerotic, at the entrance of the optic nerve. 2. The *circulus venosus mammae*, situated beneath the areola of the nipple. **C.**, **Huguier's**, the inconstant anastomosis formed

CIRCLE OF WILLIS.

1. Middle cerebral artery. 2. Internal carotid artery. 3. Posterior communicating artery. 4. Posterior cerebral artery. 5. Superior cerebellar artery. 6. Anterior inferior cerebellar artery. 7. Anterior communicating artery. 8. Anterior-lateral perforating. 9. Anterior choroid. 10. Posterior communicating. 11. Posterior choroid. 12. Basilar artery. 13. Crus cerebri cut.

by the branches of the uterine arteries around the uterus, at the junction of the body with the cervix. **C. of Willis**, the arterial anastomosis at the base of the brain, formed by the anterior communicating artery between the anterior cerebral arteries, the internal carotids and middle and posterior cerebral arteries, and the posterior communicating arteries. **C. of Zinn**. See *C. of Haller* (1).

Circuit (*ser'-bit*) [*circuitus*, a going round]. The course of an electric current.

Circular (*ser'-kular*). 1. Ring-shaped. 2. Marked by alternations of despondency and exaltation, as in circular insanity. **C. Insanity**. See *Insanity, Circular*. **C. Sinus**. See *Sinus, Circular*.

Circulation (*ser'-kula'-shun*) [*circulatio*, a circular course]. Passage in a circle, as the circulation of the blood. **C.**, **Collateral**, that taking place through branches and secondary channels after stoppage of the principal route. **C.**, **Fetal**, that of the fetus, including the circulation through the placenta and umbilical cord. **C.**, **First**, **C.**, **Primitive**, that of the embryo, a closed system, carrying nutriment and oxygen to the embryo. **C.**, **Placental**, the fetal circulation. **C.**, **Portal**, the passage of the blood from the gastrointestinal tract and spleen through the liver, and its exit by the hepatic vein. **C.**, **Pulmonary**, the circulation of blood through the lungs by means of the pulmonary artery and veins, for the purpose of oxygenation and

purification. **C.**, **Second**, the fetal circulation, replacing the omphalomesenteric system. **C.**, **Systemic**, the general circulation, as distinct from the pulmonary circulation. **C.**, **Third**, that of the adult. **C.**, **Vitelline**, first or primitive circulation.

Circulus (*ser'-kulus*) [L.]. 1. A circle. 2. See *Circle of Willis*. **C. arteriosus halleri**, the circle of Haller. **C. articuli vasculosus**, that formed by the blood-vessels in the synovial membrane about the cartilages of a joint. **C. gangliosis ciliaris**, a circular nerve-plexus in the ciliary muscle. **Syn.** *Orbicular gangliosis*. **C. osseus**, the tympanic ring. **C. venosus mammae**, an anastomosis of veins around the nipple.

Circum- (*ser'-kum-*) [L.]. A prefix meaning around, about.

Circumaxile (*ser'-kum-aks'-il*) [*circum-*, *axis*]. Encircling an axis.

Circumbuccal (*ser'-kum-buk'-al*) [*circum-*, *bucca*, the cheek]. Surrounding the mouth.

Circumcision (*ser'-kum-sish'-un*) [*circum-*, *cadere*, to cut]. The removal of the foreskin.

Circumduction (*ser'-kum-duk'-shun*) [*circum-*, *ducere*, to lead]. The movement of a limb in such a manner that its distal part describes a circle, the proximal and being fixed.

Circumflex (*ser'-kum-fleks*) [*circum-*, *flexere*, to bend]. Winding around. The name given to a number of arteries, veins, and nerves, on account of their course.

Circumscribed (*ser'-kum-skribd*) [*circum-*, *scribere*, to write]. Strictly limited or marked off; well defined; distinct from surrounding parts, as a *circumscribed* inflammation or tumor.

Circumvallate (*ser'-kum-val'-at*) [*circum-*, *vallum*, wall]. Surrounded by a wall or prominence. **C. Papillae**, certain papillae at the base of the tongue.

Cirrhosis (*ser'-siz*) [*kirkos*, reddish-yellow from the color of the cirrhotic liver]. Chronic inflammation of an organ, characterized by an overgrowth of the connective tissue. **C.**, **Alcoholic**. See *C.*, *Atrophic*. **C.**, **Annular**. See *C.*, *Multilobular*. **C.**, **Atrophic**, a form of cirrhosis of the liver occurring in hard drinkers, characterized by great overgrowth of the interstitial substance, with atrophy of the parenchyma. **C.**, **Biliary**, a form of cirrhosis of the liver due to chronic retention of bile from long-continued obstruction of the bile-ducts. **C.**, **Budd's**, hepatic cirrhosis due to auto-intoxication from the gastrointestinal tract. **C.**, **Cardiac**, *C. cordis*, hypertrophy of the connective tissue between the muscular fibers of the heart. **C.**, **Cardiotuberculous**, that accompanied by tuberculosis and symptoms of cardiac disease. **C.**, **Charcot's**. See *Hanot's Disease*. **C.**, **Glissonian**, perihepatitis. **C.**, *Hanot's*. See *Hanot's Disease*. **C. hepatis**, interstitial hepatitis. **C.**, **Hypertrophic**, a form of cirrhosis in which the liver is permanently enlarged. The disease is probably infectious, and is characterized by an overgrowth of

- the connective tissue which has no tendency to contract. **C., Irritative**, interstitial hepatitis due to irritation by some toxic substance which has been carried to the liver by the hepatic or portal veins. **C., Laennec's**. See *Laennec's Disease*. **C. of the Lung**, interstitial pneumonia. **C., Mixed**, that presenting features of both the atrophic and the hypertrophic form. **C., Monolobular**. See *C., Unilobular*. **C., Multilobular**, a form of interstitial hepatitis in which many lobules are surrounded by a fibrous ring. **C., Muscular**, the induration of connective tissue, fatty degeneration, and atrophy of the muscular fibers which take place in muscular contraction. **C., Obstructive**, cirrhosis of the liver due to the obstruction of the passage of blood or bile from the liver. **C., Periportal**, atrophic cirrhosis, so called because the hyperplasia of the connective tissue follows the portal vessels. **C., Pigmentary Diabetic**, cirrhosis of the liver with pigmentation of the skin. **C., Pulmonary**. **C. pulmonum**, interstitial pneumonia. **C., Renal**, **C. renum**, interstitial nephritis. **C. of the Spleen**, chronic hypertrophy and induration of the spleen, with thickening of the capsule. **C. of the Stomach**, chronic interstitial gastritis. **C., Todd's**, hypertrophic cirrhosis of the liver. **C., Tuberculous**, cirrhosis of the liver due to tuberculosis. It is rare; the majority of cases have occurred in children. **C., Turbinate**, defective turbinated bodies due to disappearance or diminishment of the erectile structure in cases of atrophic rhinitis. **C., Unilobular**, a form of cirrhosis of the liver in which the proliferation of the connective tissue occurs between the individual lobules. **C. ventriculi**. See *C. of the Stomach*.
- Cirrhotic** (*sir'-ot-ik*) [*cirrhosis*]. Affected with, or relating to, cirrhosis. **C. Kidney**, chronic interstitial nephritis.
- Cirsaneurysma** (*sirs-an-u-ris'-mah*). See *Aneurysm, Cirsoid*.
- Cirsocoele** (*sir'-so-sēl*) [*cirsoid*; *κίρλη*, tumor]. A varicose tumor, especially of the spermatic cord.
- Cirsoid** (*sir'-soid*) [*κίρλος*, a varix; *εἶδος*, form]. Resembling a varix or dilated vein.
- Cirsocephalos** (*sir'-som'-fēl-os*) [*cirsoid*; *κυρσεφάλος*, navel]. A varicose condition of the navel.
- Cirsotomy** (*sir'-sot'-o-me*) [*cirsoid*; *κίρσω*, to cut]. Excision of a varix.
- Cis-**. A prefix proposed by Baeuer to designate relative asymmetry in unsaturated carbon compounds.
- Cistern** (*siv'-tern*) [*cisterna*, a vessel; receptacle]. 1. A reservoir. 2. Any dilation of the space between the pia and arachnoid. **C. of Pecquet**, the receptaculum chyli. **C., Seminal**, the posterior culdesac of the vagina. Syn., *Receptaculum seminis*.
- Citrate** (*sit'-rāt*) [*citric acid*]. Any salt of citric acid.
- Citric** (*sit'-rik*) [*citrus*]. Pertaining to or derived from lemons or citrons. **C. Acid**. See *Acid, Citric*.
- Citrine** (*sit'-rin*) [*citrus*]. Yellow; of a lemon-color. **C. Ointment** (*unguentum hydrargyri nitratis*, U. S. P.), a preparation consisting of mercury dissolved in nitric acid and mixed with some fatty substance. It is made by adding 7 parts of nitric acid to 76 parts of warmed lard oil, and then mixing it with 7 parts of mercury dissolved in 10 parts of nitric acid.
- Citrol** (*sit'-rol*). Silver citrate.
- Citrophen** (*sit'-ro-fen*). $C_9H_7OH - CONH - OC_2H_4C_6H_5$. Paraphenetidin citrate. It is antipyretic and antineuralgic. Dose 3-15 gr. (0.2-1.0 Gm.).
- Citrullin** (*sit'-rul'-in*). A resinoid from *Citrullus colocynthis*. It is a cathartic extensively used in veterinary practice. Syn., *Amorphous colocynthinin*; *Colocynthinin*.
- Citrullus** (*sit'-rul'-lus*) [L.]. A genus of the *Cucurbitaceae*, comprising but two species, indigenous to tropical Asia and southern Africa. *C. colocynthis*, the bitter cucumber or gourd, furnishes colocynth.
- Citrurea** (*sit'-ru'-re-ah*). A combination of citric acid, urea, and lithium.
- Citrus** (*sit'-rus*) [L.]. A genus of aurantiaceous trees. See *Aurantium*, *Bergamot*, *Lime*, *Limo*.
- Civinini's Spine**. A small spine on the outer border of the external pterygoid plate, giving attachment to the pterygospinous ligament.
- Cladosporium cancerogenes** (*klad'-o-spo'-re-um kan-ser-ōj'-en-es*). A fungus said to be the cause of carcinoma. Syn., *Canceromyces*.
- Cladotrix** (*klad'-o-thriks*) [*κλάδος*, branch; *ἵψις*, a hair]. A genus of bacteria having long, apparently branching filaments.
- Clamp** (*klamp*) [Ger., *Klampe*]. An instrument for compressing the parts in surgical operations to prevent hemorrhage, etc.
- Clap** (*klap*) [D.F., *clapoir*, a venereal sore]. Gonorrhea. **C.-threads**, slimy threads consisting of mucus and pus-cells in the urine of gonorrheal patients.
- Clapton's Line**. Greenish discoloration of the gums and teeth, especially the incisors, in chronic copper-poisoning.
- Clapton-Havers' Glands**. See *Havers' Glands*.
- Claret** (*klar'-et*) [*clarus*, clear]. A light wine of a red color.
- Clarify** (*klar'-if-i*) [*clarus*; *facere*, to make]. To free a liquid or solution from insoluble substances; to make clear.
- Clark's Sign**. A tympanitic sound over the hepatic region in tympanites due to perforative peritoneal inflammation.
- Clarke's Corroding Ulcer**. Progressive ulcer of the cervix uteri. **C.'s Tongue**, the hard, fissured, and nodular tongue of syphilitic glossitis sclerosa. **C.'s Vesicular Column**. See *Column of Clarke*.
- Clasmatocyte** (*klas-mat'-o-sit*) [*κλάσμα*, fragment; *κύτος*, cell]. A form of very large connective-tissue corpuscles that tend to break up into granules or pieces.

Clonograph (*klo'n-o-graf*) [*clonus*; *γράφειν*, to write]. An apparatus for recording the spasmodic movements of the head, extremities, lower jaw, and trunk, as well as the tendon-reflexes.

Clonus (*klo'n-us*) [*κλόνος*, commotion]. A series of movements characterized by alternate contractions and relaxations, a clonic spasm. Involuntary, reflex, irregular contractions of muscles when put suddenly upon the stretch. According to the part affected, the phenomenon is spoken of as *ankle*-, *post*-, *rectus*-, or *versif-clonus*, etc. See under *Reflex*.

Cloquet's Canal. See under *Canal*. **C.'s Fascia,** the crural septum. **C.'s Ganglion,** the nasopalatine ganglion. **C.'s Hernia,** subpubic hernia; a femoral hernia passing behind and internally to the femoral vessels and resting on the pectineus muscle. **C.'s Ligament.** See *Haller's Habenula*.

Clostridium (*klos-trid'e-um*) [*κλωστήρ*, a spindle]. A genus of bacteria differing from bacilli in the fact that their spores are formed in enlarged rods.

Closure (*klo'shūr*) [*clausura*, a closing]. The act of completing or closing an electric circuit.

Clot (*klot*) [*AS*, *clate*, a bur]. A peculiar solidification of the blood, such as takes place when it is shed. It is due to the formation of fibrin, which entangles the blood-corpuscles and, contracting, squeezes out the liquid portion of the blood.

Cloudy Swelling. Parenchymatous degeneration, a swelling up of the elements of a tissue, with the formation in them of fine granules due to the change of soluble albuminates into insoluble.

Clove (*klov*). See *Caryophyllus*. **C.-hitch Knot,** a form of double knot in which two successive loops are made close to each other on the same piece of cord or bandage, a half twist being given to the junction of each loop at the time of making it.

Clownism (*kloen'izm*) [*heel*, *Mummi*, a boorish fellow]. That stage of hysteroc epilepsy in which there is an emotional display with a remarkable series of contortions.

Clubbed Fingers. Knobbed deformity of the finger-tips, with curvature of the nails over the finger ends, seen in some cases of pulmonary and cardiac disease.

Club-foot. See *Talipes*. **C., Heel,** talipes calcaneus. **C., Inward,** talipes varus. **C., Outward,** talipes valgus.

Club-hand. A deformity of the hand similar to that of club-foot.

Club-moss (*klu'f-mos*). See *Lycopodium*.

Clumping (*klu'mp'ing*). See *Agglutination*.

C. **Serum.** See under *Serum*.

Clupein (*klu'p-e-in*) [*clupea*, a kind of small river fish], $C_{12}H_{15}N_3O_4 + 4H_2O$. A protein from the herring. Syn., *Solmin*.

Clusia (*klu'se-ah*) [*Charles de l'Escluse* (1526-1604)]. A genus of plants of the order *Guttiferae*, many species of which yield a gum-resin called West Indian balsam. **C.**

flava, of the West Indies, yields the milky sap used as a substitute for copraha. **C. insignis**, of Brazil, yields a milky sap used as a salve. **C. hibernica**, of the West Indies and South America, yields a gum used as a drastic and vulnerary, the fruit is edible and the astringent bark is employed in diarrhea.

Clysis (*kli'z-is*) [*κλύειν*, to cleanse]. The administration of an enema, the cleansing by means of an enema.

Clyisma (*kli'z-mah*). See *Clyster*.

Clysmic (*kli'z-mik*). Relating to an enema, suitable for cleansing or washing.

Clyster (*kli'z-ter*) [*κλύστρον*, an injection]. An enema. See *Alimentation*. **Rectal C., Meat-bouillon-wine-** (Flammar) 80 Gm of beef-tea and 40 Gm of mild white wine. Invert 2 or 3 times a day at body heat. **C., Meat-pancreas-** (Leube) 150 Gm good beef scraped and chopped fine, 80 Gm fresh pancreas (cow or hog) free from fat, mix with 150 Gm lukewarm water, inject from 50 to 100 Gm at a time by means of a simple funnel, and at blood-heat. **C., Nutritive** (Bous) warm 250 Gm of milk, stir in 2 egg-yolks, 1 tea-spoonful of common salt and 1 table-spoonful of wheat-starch and afterward add 1 table-spoonful of red wine. If the mucous membrane is easily irritated, 1 or 5 drops of tincture of opium may be added. **C., Nutritive** (Ewald) wheaten starch 1 tea-spoonful is boiled with a cup (100 Gm) of water, addition of grape-sugar, and 1 wineglass (150 Gm) of red wine added. Then the solution is cooled to 35° C. and 2 or 3 eggs beaten smooth with 1 tea-spoonful of cold water and a little salt are stirred in slowly. Inject at blood heat. **C., Nutritive** (Jaccoud) bouillon, 250 Gm, wine 100 Gm, yolk of 2 eggs, and peptone 5 to 20 Gm. **C., Nutritive** (Rosenheim) peptone 4 to 10 Gm, 2 egg-yolks, glucose 15 Gm, and sometimes, if desired, emulsions of cod liver oil.

Cnemial (*knē'mē-ah*) [*κνέμιον*, the leg]. Relating to the tibia or leg; crural.

Cnemioscoliosis (*knē-mō-skōlō'sis*) [*κνέμιον*, the leg, *σκολιός*, curved]. Lateral curvature of the legs.

Coagulated (*kō-ag'u-lat-ed*) [*coagulare*, to curdle]. Curdled, curdled. **C. Proteids,** a class of proteids produced by heating solutions of egg-albumen or serum-albumin up to 70° C or higher. At the body temperature they are readily converted into peptones by the action of the gastric juice in an acid medium, or of pancreatic juice in an alkaline medium.

Coagulation (*kō-ag'u-lā-shun*) [*coagulum*]. The formation of a coagulum or clot, as in blood or in milk.

Coagulative (*kō-ag'u-lā-tiv*) [*coagulum*]. Causing or marked by coagulation. **C. Necrosis.** See *Necrosis*. *Coagulatio*.

Coagulin (*kō-ag'u-lin*) [*coagulum*]. A substance endowed with capacity to precipitate certain albuminous bodies contained in the

culture-fluid injected into an inoculated animal.

Coagulometer (*ko-ag-u-lom'-et-er*) [*coagulum*; *μέτρον*, a measure]. An apparatus for the determination of the rapidity of coagulation of the blood. **C.**, **Wright's**, a cylinder surrounded by pockets for thermometer and coagulation-tubes.

Coagulum (*ko-ag'-u-lum*) [*coagulare*, to curdle]. A clot. The mass of fibrin, inclosing red and colorless corpuscles and serum, that forms from the blood after the latter has been drawn from the body. Also, the curd of milk and the insoluble form of albumin.

Coal-tar (*kôl'-tar*). A by-product in the manufacture of illuminating gas; it is a black, viscid fluid, of a characteristic and disagreeable odor. The specific gravity ranges from 1.10 to 1.20. Its composition is extremely complex, and its principal constituents are separated, one from the other, by means of fractional distillation. Among the principal products manufactured from coal-tar are anthracene, benzol, naphtha, creasote, phenol, pitch, etc. From the basic oil of coal-tar are manufactured the anilin or coal-tar colors or dyes.

Coalescence (*ko-al-es'-ens*) [*coalescere*, to grow together]. The union of two or more parts or things previously separate.

Coalescent (*ko-al-es'-ent*). In a condition of coalescence.

Coalitus (*ko-al-i'-tus*) [L.]. Coalescent; coalescence. **C.** **artuum**, adhesion of limbs to each other. See *Ankylosis*.

Coaptation (*ko-ap-ta'-shun*) [*con*, together; *aptare*, to fit]. The proper union or adjustment of the ends of a fractured bone, the lips of a wound, etc.

Coarctate (*ko-ark'-tât*) [*coarctare*, to press together]. Crowded together.

Coarctation (*ko-ark-ta'-shun*) [*coarctate*]. A compression of the walls of a vessel or canal, narrowing or closing the lumen, reduction of the normal or previous volume, as of the pulse; shriveling and consequent detachment, as of the retina. A stricture.

Coarse (*kors*) [ME., *course*]. Not fine; gross.

C. **Adjustment**. See *Adjustment*, *Coarse*.

C. **Features of Disease**, macroscopic organic lesions, such as swelling, hemorrhage, etc.

Coat (*kôl*) [*cottus*, a tunic]. A cover or membrane covering a part or substance. **C.**, **Buffy**, the upper fibrinous layer of the clot of coagulated blood, characterized by its pale color, due to absence of red corpuscles. **C.**, **Internal Elastic**. See *Henle's Fenestrated Membrane*. **C.**, **Internal Fibrous**. See *C.*, *Subepithelial*. **C.**, **Middle**, the tunica media. **C.**, **Subepithelial**, the middle layer of the intima, composed of fusiform and stellate cells and finely granular substances with longitudinal and transverse fibrils. Syn., *Innermost longitudinal fibrous coat*; *Intermediate layer*; *Internal fibrous coat*; *Striated layer of the internal coat*. **C.**, **Uveal**, the

uvea. **C.**, **Vaginal**. 1. The fibrous capsule of the eyeball. 2. See *Tunica vaginalis*.

Cobalt (*ko'-bawlt*) [*kobold*, a German mythologic goblin]. A tough, heavy metal having some of the general properties of iron. Its oxides have been employed in medicine, but are now very little used. See *Elements*, *Table of Chemie*. **C.** **Nitrate**, $\text{CO}(\text{NO}_2)_2 + 6\text{H}_2\text{O}$. It is said to be a successful antidote in poisoning by hydrocyanic acid and potassium cyanid. **C.** and **Potassium Nitrite**, $\text{COK}_2(\text{NO}_2)_2$, cobalt yellow, a powder, slightly soluble in water; antispasmodic and antidyspneic. Dose $\frac{1}{4}$ – $\frac{1}{2}$ gr. (0.016–0.032 Gm.). Syn., *Potassium cobaltinitrite*. **C.** **Salipyrin**, a salicylate of cobalt and antipyrin.

Cobelli's Glands. See *Glands*, *Cobelli's*.

Cobra (*ko'-brah*) [Port.]. A venomous snake of India, *Naja tripudians*. **C.-lysin**, Myers' term for the hemolytic poison of cobra venom. It is destroyed by heat and neutralized by antivenin. Cf. *Cobra Nerveine*; *Echidnase*; *Echidnotoxin*. **C.** **Nervine**, one of the principles isolated by Myers from cobra venom. It is not decomposed by heat nor neutralized by antivenin.

Coca (*ko'-kah*). See *Erythroxylon*.

Cocaethylin (*ko-kah-eth'-il-in*), $\text{C}_{18}\text{H}_{21}\text{NO}_4$. A white powder obtained from benzoyllecgonin by action of ethyl iodid. It is soluble in alcohol and ether and almost insoluble in water; it is a local anesthetic, milder than cocain. Syn., *Benzoyllecgonineethyl ester*; *Ethylbenzoyllecgonin*; *Homococain*.

Cocain (*ko'-koh-in* or *ko-kân'*) [S.A., *coca*], $\text{C}_{17}\text{H}_{21}\text{NO}_4$. Cocain (*cocaina*, U. S. P.) is the chief alkaloid of *Erythroxylon coca*. It is at first stimulant and afterward narcotic, and resembles caffeine in its action on the nerve-centers, and atropin in its effects on the respiratory and circulatory organs. Its long-continued use (*cocain-habit*) is followed by insomnia, decay of moral and intellectual power, emaciation, and death. It is a local anesthetic when applied to the surface of mucous membranes or given hypodermatically. Applied to the conjunctiva of the eye, it causes also dilation of the pupil and paralysis of the function of accommodation. Dose $\frac{1}{4}$ –2 gr. (0.008–0.13 Gm.). Syn., *Methylbenzoyllecgonin*. **C.** **Aluminium Citrate**, a double salt consisting of three molecules of aluminium citrate and one of cocain; it is used as an astringent and as a local anesthetic. **C.** **Aluminium Sulfate**, a compound of aluminium sulfate and cocain. It is used as is cocain aluminium citrate. **C.** **Benzoate**, $\text{C}_{17}\text{H}_{21}\text{NO}_4 \cdot \text{C}_6\text{H}_5\text{O}_2$, anodyne and anesthetic. **C.** **Borate**, a white, crystalline powder containing 68.7% of cocain. It is used in eye-douches and subcutaneous injections. **C.** **Cantharidate**, $(\text{C}_{17}\text{H}_{21}\text{NO}_4)_2 \cdot \text{C}_{10}\text{H}_7\text{O}_5$. It is used hypodermatically in tuberculosis; injection, $\frac{1}{10}$ – $\frac{1}{5}$ gr. (0.0013–0.0016 Gm.) in 500 parts of chloroform-water. **C.** **Carbolate**, a crystalline mass containing 75% of cocain; it is analgesic, antieatarrhal, and a local as-

esthetic. Dose $\frac{1}{32}$ – $\frac{1}{8}$ gr. (0.005–0.01 Gm.), once or twice daily in capsules. Injection, 10 min. (1 C.) of 1:1250 solution in dilute alcohol. Application, 1 to 3% solution with 30% alcohol, 5% powder, or pure C.

Cerate, 1:30, for burns, etc. **C. Chlorid**. See **C. Hydrochlorid**. **C. Citrate**, used to stop toothache. **C. Hydrobromate**, $C_{17}H_{21}NO_4 \cdot HBr$, small white crystals, soluble in water. It is used instead of cocaine hydrochlorid and the dosage is the same. **C. Hydrochlorid** (*cocaine hydrochloridum*, U. S. P.), $C_{17}H_{21}NO_4 \cdot HCl$, most commonly used for local anesthesia in 2 to 8% solution. Dose, internally, $\frac{1}{2}$ –2 gr. (0.008–0.13 Gm.).

C. Hydrochlorid, Solution of (*liquor cocaine hydrochloratis*, B. P.). Dose 2–10 min. (0.13–0.05 Cc.). **C. Hydroiodate**, $C_{17}H_{21}NO_4 \cdot HI$, a suggested substitute for cocaine hydrochlorid in producing electroanesthesia. **C. Lactate**, $C_{17}H_{21}NO_4 \cdot C_3H_5O_2$, a white liquid of the consistency of honey; it is used particularly in tuberculous cysts of the bladder.

Injection (into the bladder), $\frac{1}{4}$ gr. (0.1 Gm.) dissolved in 5 parts each of lactic acid and distilled water. **C. Lamellas** (*lamella cocaine*, B. P.), each contains $\frac{1}{10}$ gr. (0.0005 Gm.) of cocaine hydrochlorid. **C. Muriate**. See **C. Hydrochlorid**. **C. Nitrate**, $C_{17}H_{21}NO_4 \cdot HNO_3$. It is used in combination with silver nitrate in treatment of disorders of the genitourinary tract. Dose, as the hydrochlorid, maximum dose $\frac{1}{2}$ gr. (0.049 Gm.), single, $\frac{1}{4}$ gr. (0.146 Gm.) a day. **C. Oleate** (*oleum cocaine*, U. S. P.), a 10% solution in oleic acid, for external use.

C. Phenate, a topical application in catarrhs and in rheumatism, used as a 5 to 10% alcoholic solution, also internally. Dose $\frac{1}{32}$ – $\frac{1}{8}$ gr. (0.005–0.01 Gm.). **C. Phthalate**, contains 0.6% of the alkaloid. It is used hypodermatically instead of cocaine hydrochlorid. **C. Saccharate**, moist crystalline plates used in diseases of the throat; a 5% solution corresponds to a 4% solution of cocaine hydrochlorid. **C. Salicylate**, $C_{17}H_{21}NO_4 \cdot C_7H_5O_2$, is used in spasmodic asthma in the same manner as cocaine hydrochlorid. **C. Tartrate**, $(C_{17}H_{21}NO_4)_2 \cdot C_4H_4O_6$. Uses and dose same as of cocaine hydrochlorid.

Cocainism (*ko-ka-in-izm*) [*cocain*]. The cocaine habit.

Cocainization (*ko-ka-in-iz-a'shun*) [*cocain*]. The bringing of the system or an organ under the influence of cocaine. **C.**, **Endome-nigeal**, **C.**, **Intraspinal**, **C.**, **Spinal-canal**, **C.**, **Spinal Subarachnoid**, **C.**, **Subarachnoid**. See *Corning-Bier Method* under *Anesthetic*.

Cocapryin (*ko-ka-pi-rin*). A mixture of cocaine, 1 part, antipyrin, 100 parts; used as an analgesic and antipyretic. Dose $\frac{1}{4}$ gr. (0.22 Gm.).

Coccaceæ (*kok-ka'e'e*) [see *Coccus*]. A group of schizomycetous fungi or bacteria, including as genera the *Micrococcus*, *Sarcina*, *Allopyrococcus*, and *Leuconostoc*.

Coccidioides immitis pyogenes (*kok-sid-i-oid'-es im-mi'tis py-og'-en-es*). A pathogenic microorganism discovered by C. G. Chubb and Moffitt (1938). It produces in human beings chronic suppurative processes or coccidiosis.

Coccidiosis (*kok-sid-i'-o-sis*) [*coccidium*; *phlegm*, *disease*]. The group of symptoms produced by the presence of coccidia in the body.

Coccidium (*kok-sid'-e-um*) [*coccus*, pl. *coccidia*]. A genus of protozoans, by name referred to as the so-called protozoans. See *Protozoa*. **C. oviforme**, has been found in intestinal epithelium and in the liver of man, and often in the liver of the rabbit. True coccidia are nonmotile cell parasites. **C. sarkolytus**, the name given by Adamkiewicz to the so-called parasite of carcinoma.

Coccinella (*kok-sin'-e-lah*). See *Cochineal*.

Coccineous (*kok-sin'-e-us*) [*coccineus*, scarlet].

In color, pure carmin tinged with yellow.

Coccobacillus (*kok-o-ba-sil'-us*). See under *Bacteria*.

Coccobacteria (*kok-o-bak-te'-re-ah*) [*coccus*; *bacillus*, a little rod]. The rod-like or spheroid bacteria found in putrefying liquids, and called *C. septicus*. See under *Bacteria*.

Coccogenous (*kok-og'-en-us*) [*coccus*, *pus*, to produce]. Caused by the presence of pus-cocci.

Cocculus indicus (*kok'-u-lus in'-dik-us*).

The dried fruit of *Anamirta cocculus*. It is an active narcotic poison. It is employed as a destroyer of vermin. See *Picrotoxin*.

Coccus (*kok'-us*) [*κόκκος*, a berry]. 1. A genus of insects including *C. cacti*, the cochineal insect. 2. A spheric bacterium—a micrococcus.

Coccycephalus (*kok-se-sef'-al-us*) [*coccyx*; *κεφαλή*, the head]. 1. Having a beaked process for a head. 2. A monstrosity with such a head.

Coccydynia (*kok-se-din'-e-ah*). See *Coccygodynia*.

Coccygeus (*kok-sij'-e-us*) [*coccyx*]. One of the pelvic muscles. See under *Muscle*.

Coccygodynia (*kok-og'-din'-e-ah*) [*coccyx*, *berry*, *pain*]. Pain referred to the region of the coccyx; confined almost exclusively to women who have given birth to children.

Coccyx (*kok'-sika*) [*κόκκυξ*, cuckoo (resembling the bill)]. The last bone of the spinal column, formed by the union of four rudimentary vertebrae.

Cochineal (*kok'-in-il* or *kok'-in-il'*) [*MF*, *cukkanee*]. The dried insects of a species of plant-lice, *Coccus cacti*, parasitic upon a cactus of Mexico and Central America. It contains a rich red coloring matter, carmin, used mainly as a dyeing agent. It is thought to be valuable in whooping cough. Dose $\frac{1}{2}$ gr. (0.03 Gm.).

Cochinilin (*kok'-in-il'-in*). The same as *Carmine acid*.

Cochin-leg (*kok'-chin*). Synonym of *Elaeagnus arbutum*.

Cochlea (*kak'-le-ah*) [*κόχλος*, a conch-shell]. A cavity of the internal ear resembling a snail-shell. It describes $2\frac{1}{2}$ turns about a central pillar called the modiolus or columella, forming the spiral canal, about $1\frac{1}{2}$ inches in length. See also *Ear*.

Cochlear, Cochleare (*kak'-le-ar, kak'-le-a'-re*) [*L.*]. A spoon; a spoonful. **C. magnum**, a tablespoon. **C. medium**, a dessertspoon. **C. minimum**, a teaspoon.

Cochleariform (*kak'-le-ar'-e-form*) [*cochlear; forma, shape*]. 1. Spoon-shaped. 2. [*κόχλος*, a conch-shell.] Having the shape of a snail-shell.

Cocinin (*ko'-sin-in*). A peculiar fatty principle, the chief constituent of cocoanut oil. Syn., *Cocoin; Coenstearin; Cocostearyl; Cocyl*.

Cock's Peculiar Tumor. Extensive septic ulceration of the scalp, resembling an epithelioma and developed from a neglected sebaceous cyst.

Cockroach (*kak'-röch*). See *Blatta*.

Coco (*ko'-ko*). See *Coko Disease*.

Cocoa, Coco (*ko'-ko*). See *Cacao* and *Theobroma*. **C.-butter**. See *Cacao-butter*.

Cod (*kod*) [*ME.*]. The *Gadus morrhua*, a fish furnishing cod-liver oil. **C.-liver Oil**, an oil derived from the liver of the *Gadus morrhua*, and ranging in color, according to the method of its preparation, from pale straw to dark brown; its specific gravity is 0.923 to 0.924 or even 0.930 at 15° C. See *Morrhua*.

Codeia (*ko-de'-ah*). See *Codein*.

Codein (*ko'-de-in*) [*κώδεα*, the poppy-head], $C_{18}H_{21}NO_3 + H_2O$, *codeina* (U. S. P.). A white, crystalline alkaloid of opium resembling morphin in action, but being weaker. It is used in cough and in diabetes mellitus. Dose $\frac{1}{4}$ -2 gr. (0.032-0.13 Gm.). Syn., *Codeia; Methylmorphin*. **C. Acetate**, $C_{18}H_{21}NO_3 \cdot C_2H_3O_2$, use and dose same as codein. **C. Citrate**, used as is codein. **C. Hydrobromate**, $C_{18}H_{21}NO_3 \cdot HBr + 2H_2O$, used as is codein. **C. Hydrochlorate**, $C_{18}H_{21}NO_3 \cdot HCl + 2H_2O$, use and dose same as codein. **C. Hydroiodate**, $C_{18}H_{21}NO_3 \cdot HI + H_2O$, use and dose same as codein. **C. Nitrate**, $C_{18}H_{21}NO_3 \cdot HNO_3$, use and dose same as codein. **C. Phosphate** (*codeina phosphas*, U. S. P.), soluble in water. It is similar to morphin in action, but less toxic. Dose, hypodermatically, $\frac{1}{4}$ gr. (0.032 Gm.). **C. Salicylate**, a white powder, soluble in water, used in rheumatism. **C. Sulfate** (*codeina sulphas*, U. S. P.), the sulfate of the alkaloid. Dose $\frac{1}{4}$ - $\frac{1}{2}$ gr. (0.01-0.016 Gm.). **C. Valerianate**, an antispasmodic and sedative. Dose $\frac{1}{4}$ gr. (0.016 Gm.).

Coefficient (*ko-el'-ish'-ent*) [*con, together; effice, to produce*]. A figure indicating the degree of physical or chemic alteration characteristic of a given substance under stated conditions. **C., Baumann's**. See under *Baumann*. **C., Bouchard's**. See under *Bouchard*. **C., Haeser's**. See *Christison's Formula*. **C., Trapp's**. See *Trapp's Formula*. **C., Yvon's**. See under *Yvon*.

Cœliac (*se'-le-ak*). See *Celiac*.

Cœliotomy (*se-le-ot'-o-me*). See *Celiotomy*.

Cœlom, Cœloma (*se'-lom, se-lo'-mah*). See *Celom*.

Coelomate (*ko-e-lom'-gât*) [*con, together; elongatus, elongated*]. Of equal length.

Cœnesthesis (*sen-es-the'-sis*). See *Cenesthesis*.

Cœnurus (*se-nûr'-us*) [*κοινός*, common; *οὐρά*, tail]. The larva of *Tania cœnurus*, producing the disease of sheep called staggers. **C. cerebrealis**, a hydatid found mainly in the brain and spinal canal of the ox and sheep (mostly in young animals). Occasionally it has been discovered in the muscles of man. It is known to be the larva of the tape-worm, *Tania cœnurus*.

Coercible (*ko-ers'-ib-il*) [*coercere, to curb*]. Applied to gases which are capable of being liquefied.

Coercive (*ko-ers'-iv*). Capable of being rendered magnetic and continuing so.

Coetaneous (*ko-el-a'-ne-us*) [*con, together; ætas, age*]. Reaching maturity simultaneously.

Coffea (*kol'-e-ah*). The coffee tree. **C. arabica**, the common coffee plant, is the original source of most of the coffee cultivation.

Coffee (*kol'-e*). See *Coffea*. **C.-ground Vomit**, the material ejected by emesis in gastric carcinoma and other conditions that give rise to a slow hemorrhage into the stomach. It consists of blood changed by the action of the gastric juice, and mixed with other contents of the stomach.

Coffeon (*kol'-e-on*). A product obtained by condensing the material volatilized when coffee is roasted. The pleasant flavor of coffee is due to it.

Cognac (*kôn-yak*) [a district in France]. French brandy distilled from wines produced in the district of Cognac.

Cog-wheel Breathing, C. Respiration. A type of breathing characterized by a jerky, wavy inspiration.

Cohabitation (*ko-hab-it-a'-shun*) [*con, together; habitare, to dwell*]. 1. The living together of a man and woman, with or without legal marriage. 2. Sexual connection.

Cohen's Test for Albumin. To the acid solution of albumin add a solution of potassium bismuthic iodid and potassium iodid. The albumin and the alkaloids are precipitated.

Cohesion (*ko-he'-zhun*) [*coherere, to stick together*]. The force whereby molecules of matter adhere to one another; the attraction of aggregation.

Cohn's Law. The specific form of bacteria has a fixed, immutable basis. **C.'s Stigmas**, minute gaps in the intervalveolar walls of the normal lung.

Cohnheim's Areas, C.'s Fields. Small polygonal fields visible on optic section of a sarcois element prism. **C.'s Frog**. See *Salt-frog*. **C.'s Terminal Arteries, terminal arteries without anastomoses**. **C.'s Theory**.

a theory that all true tumors are due to faulty embryonal development. The embryonal cells do not undergo the normal changes, are displaced, or are superfluous. When the favorable conditions are presented later in life, they take on growth, with the formation of tumors of various kinds. See *Cancer*, *Cohnheim's Theory of C's Tumors*—germs, small aberrant or heterotopic masses of embryonic tissue from which newgrowths may originate.

Cohosh (*ko'-hosh*) [Am. Ind.]. A name given to several medicinal plants. **C., Black.** See *Cimicifuga*. **C., Red.** See *Actaea rubra*. **C., White.** See *Actaea alba*.

Coil (*koil*) [*colligere*, to gather together]. A spiral formed by winding. **C.-gland.** See *Sweat-gland*. **C., Induction-**, rolls of wire used to produce an electric current by induction. **C., Leiter's.** See *Lleiter's Tubes*. **C., Primary**, the inner coil of an induction apparatus. **C., Resistance-**, a coil of wire of known electric resistance, used for estimating resistance. **C., Secondary**, the outer coil of an induction apparatus.

Coinosite (*ko-in'-a-sit*) [*κοινός*, common; *οστρίον*, to feed]. An animal parasite capable of separating itself from its host at will, a free commensal organism.

Coin-sign, Coin-test (*ko-in'-sin, ko-in'-test*). See *Bell-sound*.

Coition (*ko-igh'-un*). Same as *Coitus*.

Coitophobia (*ko-it-o-fo-bia*) [*coitus*; *φόβος*, fear]. Morbid dread of coitus from disgust or dyspareunia.

Coitus (*ko-it-us*) [*coire*, to come together]. The act of sexual connection, copulation.

Coko Disease (*ko'-ko*). A name applied in the Fiji Islands to a disease resembling framboesia.

Cola-nut (*ko'-lah-nut*). See *Kola-nut*.

Colauze (*kolau-ze*) [*κόλον*, colon; *αἰμα*, increase]. Distention of the colon.

Colchicine (*kol-chi-sin*) [*colchicum*]. $C_{20}H_{21}NO_5$. A crystalline decomposition-product of colchicin. It is used subcutaneously in treatment of gout. Dose $\frac{1}{10}$ – $\frac{1}{8}$ gr. (0.001–0.002 Gm.).

Colchicin (*kol'-chis-in*) [*colchicum*]. $C_{20}H_{21}NO_5$. *colchicine* (U. S. P.). An alkaloid of colchicum. It is a pale, brownish-yellow, exceedingly bitter powder, freely soluble in water. It is a very active poison. Its dose is $\frac{1}{10}$ gr. (0.002 Gm.) hypodermatically. **C. Salicylate.** See *Colchisal*.

Colchicum (*kol'-chik-um*) [*κόλχικον*, colchicum]. Meadow-saffron. The corn and seed of *C. autumnale*, the properties of which are due to an alkaloid, *colchicin*. It is an emetic, diuretic, diuretic, and drastic cathartic. It is valuable in acute gout and in some forms of rheumatism. Dose of the powdered corn (*colchici cornus*, U. S. P.) 2–8 gr. (0.13–0.52 Gm.), of the powdered seeds (*colchici semen*, U. S. P.) 1–5 gr. (0.065–0.32 Gm.). **C. Corn, Extract of** (*extractum colchici corni*, U. S. P.). Dose 1 gr. (0.065 Gm.). **C., Ex-**

tract of, Acetic (*extractum aceticum colchici*, B. P.). Dose $\frac{1}{2}$ –1 gr. (0.033–0.13 Gm.). **C. Seed, Fluidextract of** (*fluidextractum colchici seminis*, U. S. P.). Dose 3 min. (0.3 Cc.). **C. Seed, Tincture of** (*tinctura colchici seminis*, U. S. P.), 10% strength. Dose 10–30 min. (0.6–2.0 Cc.). **C. Seed, Wine of** (*vinum colchici seminis*, U. S. P.), 10% in strength. Dose 10–30 min. (0.6–2.0 Cc.).

Colchiflor (*kol'-chi-flor*). A remedy for gout prepared from a tincture made from the fresh flowers of *Colchicum autumnale* and powdered kola. It is said to be free from the drastic properties contained in preparations from the bulb and seeds of colchicum.

Colchisal (*kol'-chis-al*) [*Colchicin salicylate*]. A yellow, amorphous powder, soluble in alcohol, ether, and water. It is used in gout and arthritis. Dose $\frac{1}{10}$ gr. (0.0065 Gm.).

Cold (*kold*) [AS., *cauld*]. 1. The comparative want of heat. 2. A term used particularly for coryza and catarrhal conditions of the respiratory tract. Cold is employed largely in various forms as a therapeutic agent, mainly for the purpose of lowering temperature and allaying irritation and inflammation. It may be used in the form of affusion, that is, the sudden application of a considerable volume of cold water to the body. Cold may be used as an anesthetic in baths (see *Bath*), in the form of compresses applied over the affected part, in the form of irrigation, especially in the treatment of bruised and injured members, as a lotion, for the purpose of relieving local heat, pain, and swelling; as an injection, in the form of ice-water, into the vagina or rectum, for various conditions; and as the cold pack, which is a valuable means of reducing the body-temperature in cases of hyperpyrexia. Cold may be applied in the dry form by means of the ice-cap or bladder, an india-rubber bag filled with ice, snow, or a freezing mixture. **C. Abscess.** See *Abscess*. **C. Cream** (*unguentum aqua rose*, U. S. P.), spermaceti, 125 Gm.; white wax, 120 Gm.; expressed oil of almond, 560 Gm.; stronger rose-water, 100 Gm., in which finely powdered sodium borate 5 Gm. has been dissolved. When used as a vehicle for metallic salts the sodium borate should be omitted. Used for chapping of face and hands, abrasions, etc. **C. Pack.** See *Pack*. **C., Rose-**, hay fever. **C., Sore**, herpes labialis. **C., St. Kilda's**, **C., Strangers'**, in the Hebrides, a form of malarial fever ascribed by the natives to the arrival of a ship and the presence of outsiders.

Colectomy (*ko-lek'-to-me*) [*colec*, to cut out]. Excision of a portion of the colon.

Coley's Fluid, C's Mixture. A combination of the toxins of *Streptococcus erysipellatus* and *Bacillus prodigiosus*, it has been used as a remedy for cancer in the early stage.

Colibacillosis (*ko-le-bat'-o-sis*). The morbid condition due to infection with *Bacterium coli*.

Colibacteriuria (*ko-le-bak-te-re-u'-re-ah*). The presence in the urine of *Bacterium coli*.

Colic (*kol'-ik*) [*colon*]. 1. Pertaining to the colon. 2. A severe griping pain in the bowels, due to spasm of the intestinal walls, also any severe spasmodic pain in the abdomen. **C.**, **Biliary**, that due to the passage of a gall-stone through the gall-ducts. **C.**, **Crapulent**, **C.**, **Crapulous**, that due to excess in eating and drinking. **C.**, **Cystic**, colicky pain in the urinary bladder. **C.**, **Devonshire**. Synonym of **C.**, **Lead-**. **C.**, **Hemorrhoidal**, intense pain near the anus and sacrum preceding a discharge from the hemorrhoidal vessels. **C.**, **Hepatic**, biliary colic. **C.**, **Herniary**, the pain attending hernia. **C.**, **Inflammatory**, the intense pain attending colitis. **C.**, **Lead-**, **C.**, **Saturnine**, intestinal colic due to lead-poisoning. It is characterized by excruciating abdominal pain, a hard and retracted condition of the abdomen, slow pulse, and increased arterial tension. Syn., *Colica pictorum*; *Painter's colic*. **C.**, **Menstrual**, the pain of menstruation. **C.**, **Metastatic**, that due to metastasis of gout or to suppression of the menses or the hemorrhoidal flow. **C.**, **Renal**, that due to the presence of a calculus in the ureter. **C.**, **Saburral**, that resulting from over-eating. **C.**, **Sénégal**, lead-colic. **C.**, **Uterine**, colicky pains experienced at the menstrual epochs, often coming on in paroxysms. **C.**, **Vermicular**. 1. Pain in the vermiform appendix, due to catarrhal inflammation resulting from stoppage of its outlet. 2. That due to intestinal worms. Syn., *Vermineous colic*; *Worm colic*.

Coliccolitis (*ko-le-kol-i'-tis*). See *Dysentery*.

Colicystitis (*ko-le-sist-i'-tis*) [*colon*; κύστις, bladder; *itis*, inflammation]. Cystitis dependent upon the pathogenic activity of the colon bacillus.

Colicystopyelitis (*ko-le-sist-a-pi-e-li'-tis*). Combined cystitis and pyelitis due to *Bacillus coli communis*.

Colliform (*kol'-e-form*) [*colum*, a sieve; *forma*, form]. Sieve-like.

Colipuncture (*ko-le-punk'-chur*). See *Colocentesis*.

Colitis (*ko-li'-tis*) [*colon*; *itis*, inflammation]. Inflammation of the colon. **C.**, **Croupous**, **C.**, **Desquamative**, **C.**, **Diphtheric**, **C.**, **Follicular**, **C.**, **Membranous**, **C.**, **Mucomembranous**, **C.**, **Plastic**. See **C.**, **Mucous**. **C.**, **Idiopathic Ulcerative**, a specific affection due to microorganisms, beginning in and throughout its course, invariably limited to the colon. **C.**, **Mucous**, a clinical combination of symptoms characterized by periodic abdominal pains associated generally with abnormalities of the secretory and absorptive functions, and with the discharge of peculiarly formed mucous masses, sometimes resembling exact casts of the intestine. Syn., *Chronic exudative enteritis*, *Chronic mucocolitis*; *Diarrhœa tubularis*; *Fibrinous diarrhœa*; *Follicular-colonic dyspepsia*; *Follicular duodenal dyspepsia*;

Intestinal croup; *Pellicular enteritis*; *Pseudo-membranous enteritis*. **C.**, **Ulcerative**. Synonym of *Dysentery*.

Collacin, **Collastin** (*kol'-as-in, -sin*). A substance found abundant, by Unna, in colloidal degeneration of the skin.

Collaform (*kol'-a-form*). A formaldehyd-gelatin preparation intended as a vulnerary.

Collagen (*kol'-aj-en*) [*κόλλα*, glue; *γεννάν*, to produce]. A substance existing in various tissues of the body, especially bone and cartilage; it is converted into gelatin by boiling.

Collapse (*kol'-aps'*) [*collabere*, to fall together]. Extreme depression and prostration from failure of the circulation, as in cholera, shock, hemorrhage, etc. **C. of Lung**, return of a portion or the whole of a lung to its fetal or airless condition from some mechanic hindrance to the entrance of air. It is characterized by dyspnea, with more or less cyanosis, and is mainly encountered in bronchopneumonia.

Collapsing (*kol'-aps'-ing*) [*collapse*]. Suddenly breaking down. **C. Pulse**. See *Corrigan's Pulse*.

Collar-bone. The clavicle.

Collargol, **Collargolum** (*kol-ar'-gol, kol-ar'-gol-um*). See *Silver, Colloidal*.

Collateral (*kol-ar'-er-al*) [*com*, together; *lateralis*, of the side]. 1. Accessory or secondary; not direct or immediate. 2. One of the first branches of an axis-cylinder of a nerve-cell passing at a right angle.

Collecting Tubes of the Kidney. A name given to the ducts discharging into the calices of the kidneys.

Collema, **Collœmia** (*kol-e'-me-ah*) [*κόλλα*, glue; *αἷμα*, blood]. Haig's term for a condition of capillary obstruction which he attributes to a clogging of the capillaries by urates or colloid deposits.

Colles' Fascia. The deep layer of the perineal fascia. It is attached to the base of the triangular ligament, to the anterior lips of the rami of the pubes and ischiums laterally, and anteriorly it is continuous with the dartos of the scrotum. **C.'s Fracture**, transverse fracture of the lower extremity of the radius, with displacement of the hand backward and outward. **C.'s Law**, the child of a syphilitic father will render its mother

COLLES' FRACTURE.—(Gould and Pyle's *Cyclopedic*.)

immune against syphilis. In Colles' original words: "A new-born child affected with congenital syphilis, even although it may have symptoms in the mouth, never causes ulceration of the breast which it sucks, if it be the mother who suckles it, though containing, capable of infecting a strange nurse." **C.'s Ligament**, the fibers which pass from the outer portion of Poupart's ligament behind

the internal pillar of the abdominal ring and are inserted into the linea alba, where they interlace with those of the opposite side. **C.'s Space**, the space beneath the perineal fascia containing the ischioavernosus, transversus perinei, and bulbocavernosus muscles, the bulbous portion of the urethra, the posterior scrotal (labial) vessels and nerves, and loose areolar tissue.

Colles-Beaumès' Law. See *Colles' Law*.

Collidin (*kol' id-in*) [*kollā*, glue]. C_8H_9N . A ptomain, isomeric but not identical with collidin aldehyd. The ptomain was obtained from pancreas and gelatin allowed to putrefy together in water. **C. Aldehyd.** See *Aldehyd, Collidin*.

Collier's Lung. Synonym of *Anthraxosis*.

Colligamen (*kol ig'-a-nen*) [*colligare*, to bind]. 1. A ligament. 2. A name given to a variety of bandages prepared with glycerol and a glycerol-zinc paste.

Collin (*kol'-in*) [*kōlin*, glue]. Gelatin in soluble form.

Collinic (*kol-in'-ik*). Relating to or obtained from gelatin.

Collinsonia (*kol-in-so'-ne-ah*) (after Peter Collinson, an English gentleman). A genus of labiate herbs. *C. canadensis*, stoneroot, headail, is a coarse plant with a disagreeable smell, it has tonic, diuretic, and diaphoretic properties. Dose 15-60 gr. (1-3 Gm.) in decoction; of the *fluidextract* 10 min. 1 dr. (0.95-1.0 Gm.); of the *tincture* (1:10) 4-2 dr. (2-8 Gm.).

Colligation (*kol ik'-wa'-shun*) [*con*, together; *lique*, to melt]. The liquefaction or breaking down of a tissue or organ.

Colligative (*kol ik'-wa-tiv*) [*colligation*]. Profuse or excessive; marked by excessive fluid discharges. **C. Diarrhea**, a profuse watery diarrhea. **C. Necrosis**. See *Necrosis, Liquefaction*. **C. Sweat**, a profuse clammy sweat.

Colligation (*kol ik'-wa'-shun*) [*colligation*]. A melting or fusing together.

Collocated (*kol'-o-lee-ah-tis*) [*collocare*, to place]. Corresponding with in respect to location, applied especially to parts of the brain that are adjacent, one central and the other ental; e. g., the calcarine fissure and the calcar.

Collodion (*kol'-o-de-on*) [*collodium*, glue-like]. *Collodium* (U. S. P.). A dressing for wounds made by dissolving gumcamphor in ether, it is used as a substitute for adhesive plaster. See *Pyracanthin*. **C., Acetone**, one prepared from gumcamphor, 5 parts; ether, 10 parts; alcohol, 10 parts; acetone, 20 parts; castor-oil, 6 parts. It is more elastic than ordinary flexible collodion. **C., Cantharidal** (*collodium cantharidatum*, U. S. P.), a blistering solution of collodion and cantharides. **C., Flexible** (*collodium flexile*, U. S. P.), collodion with the addition of castor-oil and Canada balsam. **C., Iodized**, flexible collodion with the addition of 2% of iodine. It is used in chubdians. **C., Iodoform**, flexible collodion with 5% of iodoform. **C., Styptic** (*collodium stypticum*,

U. S. P.), a mixture of collodion with tannic acid, ether, and alcohol.

Collodium (*kol'-o-de-on*). See *Collodion*.

Colloid (*kol'-oid*) [*kollā*, glue]. 1. A non dialyzable organic substance. See *Doty*. 2. A substance formed by colloid degeneration of epithelium. See *Degeneration, Colloid*. 3. Having the nature of glue. 4. In chemistry, amorphous and noncrystalline. **C. Cancer**. See *Cancer, Colloid*. **C. Degeneration**. See *Degeneration, Colloid*.

Colloidin (*kol'-oid-in*) [*colloid*]. $C_8H_9NO_2$. A jelly-like substance obtained from colloid tissue.

Colloma (*kol'-o-mah*) [*kollā*, glue; *ōma*, a tumor]. A cystic tumor containing a gelatiniform substance.

Collosin (*kol'-o-sin*) [*kollā*, glue]. A skin varnish made by the addition of camphor to acetone collodion.

Collum (*kol'-um*) [L.]. The neck, especially the anterior part of the neck. **C. distortum**. Synonym of *Torticollis*.

Collutory (*kol'-u-tore*) [*colluere*, to rinse]. A gargle or mouth wash.

Collyrium (*kol'-i'-e-um*) [*collyrium*, an eye-salve]. A lotion for the eyes.

Coloboma (*kol'-o-bo'-mah*) [*kolō*, to mutilate]. A congenital fissure of the iris, choroid or eyelids. **C., Fuchs'**, a small crescentic defect of the choroid at the lower border of the optic disc. **C. palpebræ**, **C. palpebrarum**, a form of partial anophthalmia consisting in a fissure of the eyelid, most frequently the upper lid. Syn. *Blepharocoloboma*.

Colocentesis (*kol'-o-sen-tē'-sis*) [*colōn*, *centēsis*, puncture]. Surgical puncture of the colon.

Colocolocystostomy (*ko-lo-kol'-e-sis-tōs-tō-me*). See *Cholecystocolotomy*.

Colocleisis (*ko-lo-klē'-sis*) [*colōn*; *aklōsis*, closure]. Occlusion of the colon.

Coloclyster (*ko-lo-klis'-ter*) [*colōn*, *claster*]. An enema in the colon.

Colocolostomy (*ko-lo-kol'-ōs-tō-me*). The operation of forming a connection between two portions of the colon.

Colocynth (*kol'-o-sin-th*). Same as *Colocynthis*.

Colocynthidism (*kol'-o-sin-th-id-izm*) [*colocynth*, *th*]. Poisoning from undue use of colocynth. A condition marked by violent inflammation of the digestive tract, watery and bloody stools, bilious vomiting, cramps in the calves of the legs, and collapse.

Colocynthin (*kol'-o-sin'-then*) [*colocynthis*]. The bitter principle of colocynth. See *Colocynthis*.

Colocynthis (*kol'-o-sin'-this*) [*colocynthis*, *colocynth*]. *Colocynth*. Bitter apple. The fruit of *Citrullus colocynthis*, from which the seeds and rind have been removed. Its properties are due to a bitter glycoside, *colocynthisin*, $C_{28}H_{44}O_{11}$, the dose of which is 1/2-1 gr. (0.05-0.03 Gm.). It is a tonic and astringent purgative, and is used mainly as an ingredient of compound cathartic pills. **Colocynthis, Extractum** (U. S. P.) alcoholic. Dose 4-2 gr. (0.05-0.03 Gm.).

- Colocynthis, Extractum, Compositum** (U. S. P.), contains colocynth extract, 16; aloes, 50; cardamom, 6; resin of scammony, 14; soap, 14; alcohol, 10 parts. Dose 5-20 gr. (0.32-1.3 Gm.). **Colocynthis, Pilula, Composita** (B. P.), contains colocynth, aloes, scammony, potassium sulfate, and oil of cloves. Dose 5 to 10 gr. (0.32-0.65 Gm.). **Colocynthis, Pilulae, et Hyoscyami** (B. P.), pills of colocynth and henbane. Dose 5-10 gr. (0.32-0.65 Gm.).
- Coloenteritis** (*ko-lo-en-ter-i'tis*) [*colon*; *enteritis*]. Inflammation of the small and large intestine. See *Enterocolitis*.
- Colomba, Colombo** (*kol-om'-bah, kol-om'-bo*). See *Columba*.
- Colon** (*kol'-lon*) [*κόλον*, the colon]. The part of the large intestine beginning at the cecum and terminating at the end of the sigmoid flexure. In the various parts of its course it is known as the *ascending colon*, the *transverse colon*, the *descending colon*, and the *sigmoid flexure*.
- Colonometer** (*kol-on-om'-e-ter*) [*colony*; *μέτρον*, a measure]. An apparatus for estimating the number of colonies of bacteria on a culture plate.
- Colonoscope** (*ko-lon'-o-skōp*) [*colon*; *σκοπεῖν*, to view]. An instrument for examining the colon.
- Colony** (*kol'-o-ne*) [*colonia*, colony]. A collection or assemblage, as of microorganisms in a culture.
- Colopexia, Colopexy** (*ko-lo-peks'-e-ah, kol'-lo-peks'-e*) [*colon*; *πέξω*, a fixing]. Suturing of the sigmoid flexure to the abdominal wall.
- Colopexotomy** (*ko-lo-peks-ot'-o-me*) [*colon*; *πέξω*, a fixing; *τέμνειν*, to cut]. Incision into and fixation of the colon.
- Colophony** (*kol'-o-fō-ne*) [*Κολοφών*, a city of Ionia]. Rosin. The solid residue left on distilling off the volatile oil from crude turpentine. See *Rosin*.
- Coloptosis** (*ko-lo-ō'-sis*) [*colon*; *πτῶσις*, a falling]. Descent or displacement of the colon.
- Color** (*kul'-or*) [L.]. 1. A visual sensation due to radiated or reflected light. 2. That quality of an object perceptible to sight alone. 3. A pigment. **C.-analysis**, Ehrlich's method of identifying the various forms of leukocytes. It depends upon the distinctive manner in which the protoplasmic granules react toward the acid, basic, and so-called neutral solutions of the anilin dyes. Five varieties of granules are recognized and designated by the Greek letters, *α*, *β*, *γ*, *δ*, *ε*: (1) *α-granules* (eosinophil, oxyphil, or coarse oxyphil granules); (2) *β-granules* (amphophil granules); (3) *γ-granules* (mast-cell or coarse basophil granules); (4) *δ-granules* (fine basophil granules); (5) *ε-granules* (neutrophil or fine oxyphil granules). **C.-blindness**. See *Blindness, Color-*. **C.-gustation**. See *Pseudogustesthesia*. **C.-hearing**, the excitation of the visual center for color through the auditory nerve. **C.-sensation**, the perception of color; it depends on the number of vibrations of the ether.
- Colorimeter** (*kol-or-im'-e-ter*) [*color*; *μέτρον*, a measure]. An instrument for determining the quantity of coloring-matter in a mixture, as in the blood.
- Colorimetric** (*kol-or-im'-e-rik*). Relating to methods of color-measuring.
- Colostomy** (*ko-lōs'-to-me*) [*colon*; *στόμα*, a mouth]. 1. The formation of an artificial anus by an opening into the colon. 2. Any surgical operation upon the colon that makes a permanent opening into it, whether internal or external.
- Colostrum** (*kol-ōs'-trum*) [L.]. The first milk from the mother's breasts after the birth of the child. It is laxative, and assists in the expulsion of the meconium. **C. Corpuscles**, small microscopic bodies contained in the colostrum. They are the epithelial cells of the mammary glands, full of oil-globules. After about the third day these cells burst and set free the fat-globules before they leave the gland, and in this way the true milk is formed.
- Colotomy** (*ko-lō'-o-me*) [*colon*; *τέμνειν*, to cut]. Incision of the colon, abdominal, lateral, lumbar, or iliac, according to the region of entrance.
- Colotyphoid** (*ko-lo-ti'-foid*). Typhoid accompanied with follicular ulceration of the colon and lesions in the small intestine.
- Colpeurynter** (*kol-pu-rin'-ter*) [*κόλπος*, vagina; *εὐρύω*, to widen]. An inflatable bag or sac used for dilating the vagina and the cervix.
- Colpeurysis** (*kol-pu'-ris-is*) [see *Colpeurynter*]. Dilation of the vagina, especially that effected by means of the colpeurynter.
- Colpitis** (*kol-pē'-tis*) [*κόλπος*, vagina; *εἰς*, inflammation]. Inflammation of the vagina.
- Colpo-** (*kol-po-*) [*κόλπος*, vagina]. A prefix denoting relation to the vagina.
- Colpocoele** (*kol'-po-sēl*) [*colpo-*; *κλήη*, hernia]. Hernia of the vagina.
- Colpoceliotomy** (*kol-po-se-le-ot'-o-me*) [*colpo-*; *celi*, incision]. Vaginal celiotomy. **C., Anterolateral**, Dührssen's name for a new vaginal operative route into the abdomen. It consists in a combination of vaginal celiotomy with complete division of one broad ligament.
- Colpocleisis** (*kol-po-klē'-sis*) [*colpo-*; *κλείω*, a closure]. The surgical closure of the vagina.
- Colpocystoplasty** (*kol-po-sist'-o-plas-te*) [*colpo-*; *κύστις*, bladder; *πλαστέω*, to form]. Plastic surgery of the vagina and bladder.
- Colpocystoureterocystotomy** (*kol-po-sist-o-ure-ter-o-sist-ot'-o-me*) [*colpo-*; *κύστις*, bladder; *ureter*; *cyst*, incision]. Exposure of the orifices of the ureter by incision of the walls of the bladder and vagina.
- Colpodesmorrhaphy** (*kol-po-des-mor'-af-e*) [*colpo-*; *δεσμός*, a fastening; *ρῆψις*, a seam]. Suturing of the vaginal sphincter.
- Colpohyperplasia** (*kol-po-hi-per-pla'-ze-ah*) [*colpo-*; *hyperplasia*]. Hyperplasia of the vagina. **C. cystica**, a form of degeneration of the vaginal mucosa, occurring during pregnancy, and characterized by the formation of gas-cysts, due, according to Lin-

- dental, to an organism which he calls *Bacillus emphysematis vagina*. Syn., *Colpitis vesiculosa emphysematosa*; *Emphysema vagina*.
- Colpohysterectomy** (*kol-po-his-ter-ek'-to-me*) [*colpo*; *hysterectomy*]. Removal of the uterus through the vagina.
- Colpohysteropexy** (*kol-po-his'-ter-o-pek-se*) [*colpo*; *hysteropexy*]. Vaginal hysteropexy; supravaginal amputation of the cervix and anastomosis of the uterus and the vaginal mucosa. Syn., *Hysteropexy vaginalis*.
- Colpomymectomy** (*kol-po-mi-o-mek'-to-me*) [*colpo*; *mymectomy*]. Mymectomy through the vagina.
- Colpomymotomy** (*kol-po-mi-o'-o-me*). See *Colpomymectomy*.
- Colpoperineorrhaphy** (*kol-po-per-in-e-or'-a/-e*) [*colpo*; *perineorrhaphy*]. Repair of a perineal laceration by denuding and in part suturing the posterior wall of the vagina.
- Colpopptosis** (*kol-po-to'-sis*) [*colpo*; *πτῶσις*, a falling]. Prolapse of the vaginal walls.
- Colporrhaphy** (*kol-por'-a/-e*) [*colpo*; *ῥαφή*, a seam]. Suture of the vagina.
- Colpospasmus** (*kol-po-spaz'-mus*) [*colpo*; *σπασμός*, spasm]. Spasm of the vagina.
- Colpostenosis** (*kol-po-sten-o'-sis*) [*colpo*; *στένωσις*, a narrowing]. Constriction of the vagina.
- Colpostenotomy** (*kol-po-sten-o'-o-me*) [*colpo*; *stenosis*, narrow; *τομή*, a cutting]. Surgical repair of colpostenosis.
- Colposynizesis** (*kol-po-sin-iz-e'-sis*) [*colpo*; *σύνεσις*, a falling in]. Narrowness of the vagina.
- Colpoureterotomy** (*kol-po-ure-ter-o'-o-me*). Incision of the ureter through the vagina.
- Coltsfoot** (*kolts'-fut*). The leaves of *Tussilago farfara*, a demulcent and tonic, sometimes prescribed in chronic cough. Dose of a decoction (1 oz. to 1 pint) a teaspoonful; of fluidextract 1 to 2 dr. (4-8 Cc.). Und.
- Columbin** (*kol-um'-bin*). See *Columbin* under *Columba*.
- Columbo** (*kol-um'-bo*). See *Columba*.
- Columella** (*kol-u-mel'-ah*) [L., "a little column"]. The nodulus or central axis of the cochlea of the human ear. See *Cochlea* and *Modiolus*.
- Column** (*kol'-um*) [*columna*]. A name given to several parts of the body that furnish support to surrounding parts, or that have the shape of pillars. C., **Anterior**, the layer of white matter in either half of the spinal cord included between the anterior horn and nerve-root and the anterior median fissure. C., **Anterolateral Ascending**. See C., *Gowers'*. C. of *Burdach*. See C., *Posteroexternal*. C. of *Clarke*, a column of gray substance occupying the region to the outer and posterior side of the central canal of the spinal cord, at the inner part of the base of the posterior cornu. It contains fusiform cells, and is the trophic center for the direct cerebellar tract. C., **Commissural**, one of nerve-substance extending along the bottom of the horizontal

fissure of the cerebellum and connecting the anterior and posterior superior lobes. C., **Crossed Pyramidal**, C., **Crossed**, of *Türk*, C., **Cuneiform**. See C., *Posteroexternal*. C., **Direct Cerebellar**, in the spinal cord, is situated outside of the lateral pyramidal tract. C., **Direct Pyramidal**, C., **Direct**, of *Türk*. See C. of *Türk*. C. of the **External Ring**, the free border of the aponeurosis of the external oblique muscle, forming the edges of the external abdominal ring. C. of *Goll*, the posteromedian column of the spinal cord. C., *Gowers'*, in the spinal cord, a group of fibers lying in front of the direct cerebellar tract and reaching around upon the periphery of the anterior pyramidal tract. C., *Gray, Anterior*, the ventral cornu of the spinal cord. C., *Gray, Posterior*, the dorsal cornu of the spinal cord. C. of the **Intermediolateral Tract**, a column of motor cells in the intermediolateral tract of the spinal cord; it is best seen in the dorsal region. C., **Lateral**, the layer of white matter in either half of the spinal cord included between the posterior horn and nerve-roots and the anterior horn and nerve-roots. C.s of *Morgagni*, vertical folds of the rectal mucous membrane seen at the point of union of the latter with the skin of the anus. C., **Posterior**, a collection of white matter situated in the spinal cord on either side between the posterior horns and posterior nerve-roots and the posterior median fissure. C., **Posteroexternal**, the outer wider division of the posterior column of the cord, the column of *Burdach*. C., **Postero-median**, the median division of the posterior column of the cord, the column of *Goll*. C., **Postero-vesicular**. See C. of *Clarke*. C. of *Spitzka-Lissauer*, in the spinal cord, a group of nerve-fibers lying just in front of and just behind the posterior horns. C. of *Türk*, the anterior or direct pyramidal tract.

Columna (*kol-um'-nah*) [L.; pl., *columnæ*]. A column or pillar. C. *bertini*, that part of the cortical structure of the kidneys that separates the sides of any two pyramids. **Columnæ carnae**, the muscular columns projecting from the inner surface of the ventricles of the heart. **Columnæ quintæ**, a bundle of nerve-fibers apparently originating in the upper nucleus of the fifth cranial nerve and decussating along the sylvian aqueduct. **Columnæ recti**. See *Columnæ of Morgagni*.

Columnella (*kol-um-nel'-ah*). See *Columella*.

Columning (*kol'-um-ing*) [*column*]. The placing of vaginal tampons to support a prolapsed uterus.

Coma (*ko'-mah*) [*kōma*, a deep sleep]. Unconsciousness from which the patient cannot be aroused by external stimulus. C., **Alcoholic**, that due to poisoning by alcohol. C., **Apoplectic**, that due to apoplexy. C., **Uremic**, that due to uremia. C. **Vigil**, a comatose condition in which the patient lies with open eyes, but is unconscious and delirious. The

occurs occasionally in typhoid and typhus fevers and in delirium tremens.

Comatose (*ko'-mat-ös*) [*coma*]. In a condition of coma.

Combiner (*kom-bi'-ner*) [*combinare*, to join]. That which combines. *C.*, **Galvanofaradic**, an instrument by means of which the galvanic and faradic currents can be used alternately or in combination in electrotherapeutics.

Combustion (*kom-bus'-chun*) [*comburere*, to burn up]. The process of oxidation, attended with the liberation of heat and sometimes of light. The term is loosely used as a synonym of inflammation.

Comedo (*kom'-e-do*) [*L.*, "a glutton"; pl., *comedones*]. A chronic disorder of the sebaceous glands characterized by yellowish or whitish elevations, the size of a pinpoint or of a pin-head, containing in their center exposed blackish points. They are found usually on the face, back of the neck, chest, and back, and are often associated with acne. They occur, as a rule, in the young. Occasionally a parasite, *Demodex folliculorum*, is found in each comedo. *Syn.*, **Blackheads**; *Grubs*; *Grub-worms*.

Comes (*ko'-mēs*) [*L.*; pl., *comites*]. A companion, as a vein to an artery, or an artery to a nerve.

Comestible (*kom-est'-e-bl*) [*L.*, *comestibilis*]. Edible.

Comma Bacillus (*kom'-ah bas-il'-us*). See *Spirillum cholerae asiatica* under *Bacteria*.

Commensal (*kom-en'-sal*) [*com*, together; *mensa*, table]. In biology, the harmonious living together of two animals or plants. One of two such organisms.

Commensalism (*kom-en'-sal-izm*). The intimate association of two different living organisms dependent on each other.

Comminuted (*kom'-in-u-ted*) [*comminuere*, to break into pieces]. Broken into a number of pieces.

Commiphora (*kom-i'-o-rah*) [*κόμμη*, gum; *φύλον*, to bear]. A genus of shrubs and trees of the order *Burseraceæ*, found in Africa and the East Indies. *C. africana* yields African bdellium. *C. agallocha* yields Indian bdellium. *C. myrrha* yields myrrh. *C. opobalsamum* yields balsam of Mecca or of Gilead.

Commissura (*kom-is-u'-rah*). See *Commissure*. *C. magna*, the corpus callosum. *C. magna cerebelli*, the superior peduncles of the cerebellum. *C. maxima*, *C. maxima cerebri*, the corpus callosum.

Commissural (*kom-is'-u-rad*) [*commissure*]. Having the properties of a commissure: uniting symmetric parts, as commissural fibers of the brain.

Commissure (*kom'-is-ur*) [*com*, together; *mittere*, to send]. That which unites two parts. *C.*, **Anterior** (of third ventricle), a rounded cord of white fibers placed in front of the anterior crura of the fornix. *C.*, **Arcuate**, the posterior optic commissure. *C.*, **Gray** (of

spinal cord), the transverse band of gray matter connecting the masses of gray matter of the two halves of the spinal cord. *C.*, **Gray, Anterior**, nerve-fibers in the gray columns of the cord, which, crossing to the opposite side in front of the central canal, decussate in two directions, part of the fibers entering into the opposite cornu ventrale, part into the cornu dorsale. *C.*, **Gray, Posterior**, that portion of the gray commissure of the spinal cord lying dorsal to the central canal. *C.*, **Gudden's Inferior**, fibers of the optic tract which come from the internal geniculate body and cross in the posterior portion of the chiasm to the opposite tract. *C.*, **Horseshoe**. See *C.*, **Wernekink's**. *C.*, **Inferior**. See *C.*, **Gudden's Inferior**. *C.*, **Meynert's**, a tract of nerve-fibers crossing from the tuber cinereum dorsally to the mesial half of the chiasm to the opposite side; it is probably connected with Luys' body. *C.*, **Middle**, a band of soft gray matter connecting the optic thalami. *C.*, **Optic**, the union and crossing of the two optic nerves in front of the tuber cinereum. *C.*, **Posterior** (of third ventricle), a flattened white band connecting the optic thalami posteriorly. *C.*, **Soft** (of the brain). Same as *C.*, **Middle**. *C.*, **Wernekink's**, the decussating fibers of the middle cerebellar peduncle. *Syn.*, *Decussatio tegmenti caudicis cerebri*; *Horseshoe commissure*. *C.*, **White, Anterior** (of spinal cord), a layer of fibers separating the posterior gray commissure from the bottom of the anterior median fissure. *C.*, **White, Posterior** (of spinal cord), a band of fibers separating the gray commissure from the bottom of the posterior median fissure.

Commotio (*kom-o'-sha-o*) [*L.*]. A commotion or shock. *C. cerebri*, concussion of the brain. *C. retinae*, concussion or paralysis of the retina from a blow on or near the eye. It is characterized by sudden blindness, but there is little or no ophthalmoscopic evidence of any lesion. The sight is usually regained, and its loss is supposed due to disturbance of the retinal elements. *C. spinalis*, railway spine.

Communicans (*kom-u'-nik-ans*) [*L.*]. 1. Communicating; 2. Alternating; connecting. *C. noni*. See under *Nerve*. *C. willisii*. See *Artery*, *Communicating*, *Posterior*.

Commutator (*kom'-u-ta-tor*) [*commutare*, to exchange]. An instrument for automatically interrupting or reversing the flow of an electric current.

Compact Tissue. The external, hard part of bone.

Comparative Anatomy. See *Anatomy*, *Comparative*.

Compatibility (*kom-pat-ih-il'-it-e*) [*Fr.*, *compatibilité*]. Of medicines, the relation of one substance to another, so that they may be mixed without chemie change or loss of therapeutic power.

Compensating (*kom'-pen-sa-ting*) [see *Compensation*]. Making good a deficiency. *C.*

- Ocular.** See under *Ocular*. **C. Operation,** in ophthalmology, tenotomy of the associated antagonist in cases of diplopia from paresis of one of the ocular muscles.
- Compensation** (*kom-pen-sa'-shun*) [*compensare*, to equalize]. The act of making good a deficiency; the state of counterbalancing a functional or structural defect.
- Compensatory** (*kom-pen'-sa-tu-ree*) [see *Compensation*]. Making good a deficiency. Restoring the balance, after failure of one organ or part of an organ, by means of some other organ or part of an organ.
- Complaint** (*kom-plant'*) [*complangere*, to lament]. A disease or ailment. **C., Bowel-**, diarrhea. **C., Summer-**, summer diarrhea.
- Complement** (*kom'-ple-ment*) [*completo*, to complete]. Ehrlich's term for one of the two substances of a hemolytic serum. It resembles in its constitution and action a toxin, and has a haptophore group which unites with the immune body and a zymotoxin complex which acts on the red blood-cells saturated with immune body in a manner partly toxic and partly fermentative. It can act on the red blood-corpuscles only in the presence of the immune or intermediary body. Syn., *Addiment*; *Alexin*; *Cytase*.
- Complemental, Complementary** (*kom-ple-men'-tal*, *kom-ple-men'-tu-ree*) [*complement*]. Supplying a deficiency. **C. Air.** See *Air*. **Complemental C. Colors**, a term applied to any two colors which combined produce white light, as, e. g., blue and yellow.
- Complementoid** (*kom-ple-men'-oid*). That substance which results from the destruction of a complement (q. v.); it can go to form an anticomplement.
- Complementophil** (*kom-ple-men'-o-fil*). The haptophore group of the intermediary body by means of which it combines with the complement.
- Complementophilic** (*kom-ple-men'-o-fil'-ik*). Showing a special affinity for the complement.
- Complexus** (*kom-plek'-us*) [L., "complex"]. The totality of symptoms, phenomena, or signs of a morbid condition. **C. Muscle.** See under *Muscle*.
- Complication** (*kom-plik-a'-shun*) [*complicare*, to fold together]. A disease occurring in the course of some other disease and more or less dependent upon it.
- Compos mentis** (*kom'-pos men'-tis*) [L.]. Of sound mind.
- Composite** (*kom-poz'-it*) [*compound*]. Composed of distinct portions.
- Compound** (*kom'-pound* or *kom-pound'*) [*com*, together; *ponere*, to put]. 1. To mix, as drugs. 2. A mixture composed of several parts. **C., Addition**, one formed from two other substances by direct union. **C., Binary**, a substance composed of two elements or of an element and a compound behaving as an element. **C. Cathartic Pills** (*pilule cathartice compositae*, U. S. P.), pills of colocynth, mild mercurous chloride, resin of jalap, gamboge, and diluted alcohol. Dose 2 pills.
- C., Endothermic**, one absorbing heat in its formation. **C., Exothermic**, one in which there is no elevation of temperature attending its formation. **C., Explosive**, an unstable organic product containing much oxygen and readily decomposing. **C. Fracture.** See *Fracture*. **Compound C., Quaternary**, a substance composed of four elements. **C., Saturated**, a chemie compound in which the combining capacities of all the elements are satisfied. **C., Substitution**, a compound formed from another body by replacement of one or more of its elements by another body or bodies. **C., Ternary**, a compound composed of three elements.
- Compress** (*kom'-pres*) [*compressus*, pressed together]. A folded cloth, wet or dry, applied firmly to the part for relief of inflammation or to prevent hemorrhage. **C., Electrothermic**, an appliance consisting of flexible pillows and of thin wires isolated by asbestos and covered with canvas. This, when connected with a strong electric current, serves to supply a modified form of dry heat. **C., Fenestrated**, a compress with a hole for drainage. **C., Graduated**, a compress composed of folds of a gradually increasing size.
- Compression** (*kom-presh'-un*) [*compress*]. The state of being compressed. **C.-atrophy**, atrophy of a part from constant compression. **C.-myelitis.** See *Myelitis*, *Compression*.
- Compressor** (*kom-pres'-or*) [*compress*]. 1. An instrument for compressing an artery, vein, etc. 2. A term applied to muscles having a compressing function. **C. sacculi laryngis**, the inferior arytenoid muscle. See under *Muscle*. **C. urethra.** See under *Muscle*.
- Conalbumin** (*kon-al'-bu-min*). A protein body obtained by Osborne and Campbell from white of egg, and so designated "on account of its close relation in properties and composition to ovalbumen."
- C H N S O
53 256 6 996 26.116 1 706 22 956
- Cf *Ovalbumen*, *Ovomucin*, *Ovomucoid*.
- Conarium** (*ko-na'-re-um*) [*conareon*, dim. of *konos*, a cone]. The pineal gland.
- Concato's Disease.** Tuberculosis affecting successively various serous membranes terminating usually in pulmonary tuberculosis.
- Concave** (*kon-kav'*) [*com*, together; *causa*, hollow]. Hollow; incurved, as the inner surface of a hollow sphere.
- Concavoconvex** (*kon-ka-va-kon-vek's*). Having one surface concave, the other convex, the convexity exceeding the concavity. See *Lens*, *Concavoconvex*.
- Conceive** (*kon-shi'*) [*conspicere*, to take in]. To become pregnant.
- Concentration** (*kon-sen-tra'-shun*) [*com*, together; *centrum*, the center]. 1. The act of making denser, as of a mixture, by evaporating a part of the liquid. 2. Afflux toward a part.
- Concentric** (*kon-sen'-trik*). Arranged in an equidistant manner about a center. **C. Hy-**

peritrophy of the Heart, increase in the muscular texture of the heart, the capacity of the cavities remaining unchanged.

Conception (*kon-sep'-shun*) [*concipere*, to conceive]. 1. The fecundation of the ovum by the spermatozoid. 2. The abstract mental idea of anything; the power or act of mentally conceiving. **C., Imperative**, a false idea that a person dwells upon and cannot expel from his mind, even when he knows it to be absurd. It dominates his actions and is a symptom of insanity.

Concha (*kon'-kah*) [*κόρυς*, a shell]. A shell. Applied to organs having some resemblance to a shell, as the naris, vulva, etc. **C. auris**, the hollow part of the external ear. **C. inferior**, the inferior turbinated bone. **C. media**, the middle turbinated bone. **C., Morgagni's**, the superior turbinated bone of the ethmoid. **C. superior**, the superior turbinated bone. **Conchæ turbinatæ**, the turbinated bones.

Conchinin (*kon'-kin-in*). See *Quinidin*.

Conchoscope (*kon'-ko-skōp*) [*concha*; *σκοπεῖν*, to inspect]. A speculum and mirror for inspecting the nasal cavity.

Conchotome (*kon'-ko-tōm*) [*concha*; *τομή*, a cutting]. An instrument for the surgical removal of the middle turbinated bone.

Concomitant (*kon-kom'-it-ant*) [*concomitari*, to accompany]. Accompanying. **C. Strabismus**. See under *Strabismus*. **C. Symptoms**, symptoms that are not in themselves essential to the course of a disease, but that may occur in association with the essential symptoms.

Concrescence (*kon-kres'-ens*) [*com*, together; *crescere*, to grow]. 1. See *Concretion* (3). 2. Held's term for the plunging of the terminal of one neuron deep into the cell-body of another. **C. of Teeth**, a growing together of the roots of two teeth after complete development.

Concretion (*kon-kre'-shun*) [see *Concrescence*]. 1. The solidification or condensation of a fluid substance. 2. A calculus. 3. A union of parts normally separate, as the fingers.

Concussion (*kon-kush'-un*) [*concussio*, a violent shock]. Shock; the state of being shaken, a severe shaking or jarring of a part; also, the morbid state resulting from such a jarring. **C. of Brain**, a condition produced by a fall or blow on the head, and marked by unconsciousness, feeble pulse, cold skin, pallor, at times the involuntary discharge of feces and urine; this is followed by partial stupor, vomiting, and headache, and eventually recovery. In severe cases inflammation of the brain or a condition of feeble-mindedness may follow. **C. of Spinal Cord**, a condition caused by severe shock of the spinal column, with or without appreciable lesion of the cord. It leads to functional disturbances analogous to railway spine.

Condensed (*kon-densd'*) [*condensare*, to make thick]. Made compact; reduced to a denser

form. **C. Milk**, milk that has had most of its watery elements evaporated. Condensed milk prepared with the addition of cane-sugar is a white or yellowish-white product of about the consistence of honey, and ranging in specific gravity from 1.25 to 1.41. It should be completely soluble in 4 or 5 times its bulk of water, without separation of any flocculent residue, and then possess the taste of fresh, sweetened milk. Condensed milk prepared without the addition of cane-sugar is not boiled down to the same degree, and therefore remains liquid.

Condenser (*kon-den'-ser*). A lens or combination of lenses used in microscopy for gathering and concentrating rays of light.

Conductibility (*kon-dukt-i-bil'-e-ite*) [see *Conductor*]. 1. Capacity for being conducted. 2. Conductivity; conducting power. **C., Centrifugal**, the power of carrying centrifugal impulses from the nervous centers to the periphery. **C., Centripetal**, the power of conducting centripetal impulses from the periphery to the nervous centers.

Conduction (*kon-duk'-shun*) [see *Conductor*]. The passage or transfer of force or material from one part to another.

Conductor (*kon-duk'-tor*) [*conducere*, to draw together]. 1. A body that transmits fore-vibrations, such as those of heat or electricity. 2. A term applied to the electrodes and cords by which they are joined to the battery. 3. An instrument serving as a guide for the surgeon's knife. 4. In physiology, any part of the nervous system that transmits impulses. **C., Sonorous**, a term applied to certain nerve-fibers which interlace with the auditory strais.

Condurangin (*kon-du-ran'-gin*) [*condurango*]. A mixture of glucosids from *condurango* bark, occurring as an amorphous yellow powder of an aromatic bitter taste, soluble in water, alcohol, and chloroform. It is used as a stomachic and astringent in gastric cancer and chronic dyspepsia. Dose $\frac{1}{10}$ - $\frac{1}{2}$ gr. (0.006-0.016 Gm.) 3 times daily.

Condurango Bark (*kon-du-ran'-go*) [Peruvian]. Bark of *Gmelinobus tetragonus* or of *Conglobus condurango*; a remedy much used in South America as an alterative in syphilis. It was introduced into the United States as a remedy for carcinoma of the stomach, but yielded uncertain results. It is a stomachic tonic. Dose of the fluidextract $\frac{1}{2}$ -1 dr. (2-4 Cc.); of the tincture 1-2 dr. (4-8 Cc.). Unof.

Condyl's Fluid. One part of sodium or potassium permanganate dissolved in 500 parts of water; it is a useful disinfectant.

Condylarthrosis (*kon-dil-ar-thro'-sis*) [*condyle*; *ἄρθρον*, a joint]. A form of diarthrosis wherein a condyle is set in a shallow and elliptic cavity and free and varied movement of the joint is possible; condylar articulation.

Condyle (*kon-dil*) [*κνῦδλος*, a knuckle]. Any rounded eminence such as occurs in the

joints of many of the bones, especially the femur, humerus, and lower jaw.

Condylectomy (*kon-dil-ek'-to-me*) [*condyle*; *ektomē*, excision]. Excision of a condyle.

Condylion (*kon-dil'-e-on*) [*condyle*]. In craniometry, the point at the lateral tip of the condyle of the jaw.

Condylloid (*kon'-dil-oid*) [*condyle*; *eidōs*, likeness]. Resembling or pertaining to a condyle.

Condyloma (*kon-dil'-o-mah*) [*κωνδύλωμα*, a swelling]. A wart-like growth or tumor usually near the anus or pudendum. **C. acuminatum**, the pointed condyloma or wart of the genital organs, often of non-syphilitic origin. Syn., *Acrothymion*; *Acrothymosis*. **C. endocysticum**, **C. endofolliculare**, **C. porcelaneum**, **C. subcutaneum**. See *Molluscum contagiosum*. **C. latum**, the flat, broad, moist syphilitic or mucous patch. Syn., *Papula mollidans*. Cf. *C. acuminatum*. **C.**, Syphilitic, **C. syphiliticum**. See *C. latum*. **C.**, Thymic, condyloma that assumes the form of a papilloma; so called from its resemblance to thymic blossoms.

Condyloma (*kon-dil'-o-sis*). The formation of a condyloma.

Cone (*kōn, kō'-nus*) [*κωνος*, a cone]. 1. A solid body having a circle for its base, and terminating in a point. 2. The mechanic element of the tooth-crown. 3. See *Conus*. **C.**, Antipodal, in mitosis the cone of astral rays opposite the spindle-fibers. **C.-bipolars**, bipolar cells of the inner nuclear layer of the retina, connected with the cones of the retina externally and ramifying internally in the middle of the molecular layer. **C.-element**, a cell of the sensory or nerve epithelium of the retina, consisting of a conic tapering external part, the *cone proper*, prolonged into a nucleated enlargement from the farther side of which the *cone-fiber* passes inward to terminate by an expanded arborization in the outer molecular layer. **C.-fiber**, one of the fibers of the retinal cones. **C.-foot**, one of the bulbous processes of the cone-granules of the retina. **C.-granules**, those of the outer nuclear layer of the retina, connected with the cones of the ninth layer externally, and internally by a thick process which becomes bulbous (the cone-foot); they terminate in fine fibers in the outer molecular layer. Cf. *Rod-granules*. **C. of Light**, the triangular reflection from the normal tympanic membrane; also the bundle of light-rays entering the pupil and forming the retinal image. **C.**, Retinal, one of the rod-like bodies which, with the associated rods, forms one of the outer layers of the retina, the so-called rod-and-cone layer.

Confection (*kon-fek'-shun*) [*confectio*, a preparation]. In pharmacy, a mass of sugar and water, or of honey, used as an excipient with a prescribed medicinal substance.

Confectioner's Disease. A disease of the finger-nails occurring in confectioners. The

nail loses its polish and becomes black, and the periungual portion becomes loosened and raised.

Confertus (*kon-fert'-tus*) [*confervire*, to press close together]. Pressed together, dense, crowded, applied to cutaneous eruptions.

Confinement (*kon-fin'-ment*) [*com*, together, *finis*, boundary; limit]. The condition of women during childbirth.

Confluent (*kon'-flu-ent*) [*confuere*, to flow together]. Running together. The opposite of discrete. In anatomy, coalesced or blended, applied to two or more bones originally separate, but subsequently formed into one.

Confrontation (*kon-fron-to'-shun*) [*confringere*, to be contiguous to]. The examination of a person by whom a diseased person may have been infected as a means of diagnosing the disease in the latter.

Confusion (*kon-fu'-shun*) [*com*, together, *fundere*, to pour]. Mixing, confounding.

C. Colors, a set of colors so chosen that they cannot be distinguished by one who is color-blind. **C. Letters**, test-type letters, such as C, G, O, or F, P, T, liable to be mistaken for one another.

Congelation (*kon-jel'-a'-shun*) [*congelare*, a freezing]. 1. Freezing, frost-bite; intense cold or its effect on the animal economy of any organ or part. 2. The chilling or benumbing effect of any freezing mixture or application, mainly employed for its local anesthetic effect. 3. Congulation.

Congenerous (*kon-jen'-er-us*) [*congener*, of the same race]. Of the same genus. **C. Muscles**, muscles producing one action.

Congenital (*kon-jen'-it-al*) [*com*, together, *gignere*, to be born]. Existing at birth.

Congestion (*kon-jes'-chun*) [*congerere*, to heap up]. An abnormal collection of blood in a part or organ. Congestion may be active or passive, atonic or inflammatory, functional or hypostatic. It is also named from the parts affected; the most important varieties of morbid congestion are the cerebral, spinal, pulmonary, hepatic, and renal. **C.**, Pleuro-pulmonary, **C.**, Pulmonary, Potain's Type of, congestion of the lungs marked by symptoms similar to those of pleurisy.

Congestive (*kon-jes'-tiv*) [*congestion*]. Marked by, due to, or of the nature of congestion.

Congius (*kon-je'-us*) [L.]. A Roman measure; a gallon.

Conglomerate (*kon-glom'-er-ut*) [*conglomerare*, to heap up]. 1. Massed together, aggregated. 2. A mass of units without order. **C. Glands**, acinous glands.

Conglutin (*kon-glu'-tin*) [*com*, together, *gluten*, glue]. One of the proteins found in peas, beans, and other kinds of pulse.

Conglutination (*kon-glu-tin-a'-shun*) [*conglutinare*, to glue together]. The abnormal union of two contiguous surfaces or bodies, as of two fingers, or of the opposed surfaces of the pleural or pericardial sac.

Congo Red. A red coloring matter which becomes blue in the presence of free HCl.

It is used in chemie investigation of the gastric juice. **C. Root**, the root of *Psoralea melilotoides*, a leguminous herb of the United States. It is an aromatic bitter tonic, recommended in chronic diarrhea.

Coni vasculosi. A series of conic masses of tubules that together form the globus major of the epididymis.

Conic, **Conical** (*kon'ik*, *kon'ik-al*) [*cone*].

Cone-shaped. **C. Cornea**. See *Keratoglobus*.

Conicin (*kon'is-in*). See *Conin*.

Coniin (*ko-ni'in*). See *Conin* and *Conium*.

Coniism (*ko-ni'izm*) [*conium*]. Poisoning by conium. It begins with paralysis of the legs, which extends to the arms and respiratory muscles, leading to unconsciousness and death.

Conin (*ko-nin*) [*conium*], $C_8H_{10}N$. A liquid alkaloid which is the active principle of *conium*. Dose $\frac{1}{10}$ – $\frac{1}{4}$ gr. (0.001–0.006 Gm.). **Unof. C., Animal**. See *Cadaverin*. **C. Hydrobromate**, $C_8H_9(C_2H_3)$, recommended in spasmodic affections. Dose $\frac{1}{10}$ – $\frac{1}{4}$ gr. (0.002–0.004 Gm.). All preparations are of uncertain strength. **C. Hydrochlorid**, $C_8H_9N.HCl$, the principal salt of conin, is used as is conin hydrobromate.

Conium (*ko-nel-un*) [*κόνιον*, hemlock]. Hemlock. Both the leaves and the fruit are official in the B. P. The *conium* of the U. S. P. is the full grown but unripe fruit of the spotted hemlock, *C. maculatum*. It contains three alkaloids and a volatile oil. Its properties are mainly due to the alkaloids *conin*, $C_8H_{10}N$, and *methylconin*, $C_8H_9NCH_3$. It produces motor paralysis, without loss of sensation or of consciousness. Toxic doses cause death by paralysis of the organs of respiration. It is valuable in acute mania, delirium tremens, tetanus, blepharospasm, asthma, and whooping-cough. **Conii, Abstractum**, made from *conium*, 200, dilute hydrochloric acid, 6; sugar of milk and alcohol, q. s. to make 100 parts of abstract. Dose $\frac{1}{2}$ –3 gr. (0.032–0.2 Gm.). **Conii, Cataplasma** (B. P.), made from the leaves; for external use. **Conii, Fluidextractum** (U. S. P.). Dose 1–2 min. (0.005–0.013 Gm.). **Conii, Pilula, Composita** (B. P.), contains extract of hemlock and ipecac. Dose 5–10 gr. (0.32–0.65 Gm.). **Conii, Succus** (B. P.), made from the leaves. Dose 30 min.–2 dr. (2–8 Gm.). **Conii, Tinctura**, 15% strength. Dose 10 min.–1 dr. (0.65–4.0 Gm.). **Coniæ, Vapor** (B. P.), for inhalations.

Conjugal (*kon'ju-gal*) [*com*, together; *jugare*, to yoke]. Pertaining to marriage; affecting both husband and wife. **C. Diabetes**, diabetes affecting husband and wife together; this is said to be not infrequently observed.

Conjugate (*kon'ju-gat*) [see *Conjugal*]. 1. Yoked or coupled. 2. The anteroposterior diameter of the brim of the pelvis, the plane of the brim being regarded as an ellipse. **C., Anatomic**. See *Conjugate* (2). **C. Deviation**. See *Deviation, Conjugate*. **C. Diameter** (of the pelvis). See *Diameter, Pelvic*.

C., Obstetric, C., True, the minimum diameter of the pelvic inlet.

Conjunctiva (*kon-junk-tiv-vah*) [*conjunctivus*, connecting]. The mucous membrane covering the anterior portion of the globe of the eye, reflected upon the lids and extending to their free edges. Its parts are called palpebral and bulbar or ocular. **C., Bulbar, C., Ocular**, that covering the anterior third of the eyeball, from the retrotarsal fold to the margin of the cornea. **C., Palpebral**, the conjunctiva of the eyelid.

Conjunctivitis (*kon-junk-tiv-i'tis*) [*conjunctiva*; *itis*, inflammation]. Inflammation of the conjunctiva. Syn., *Ophthalmia externa*, *Ophthalmia mucosa*. **C., Catarrhal, C., Catarrhal, Acute**, the most common form, usually mild, resulting from cold or irritation. See *Ophthalmia*. **C. catarrhalis æstiva**. See *Vernal Conjunctivitis*. **C., Contagious, Acute**, that due to the presence of *Bacterium agypticum*, Chester. See *Trachoma*. **C., Croupous**, a variety associated with the formation of a whitish-gray membrane that is easily removed. **C., Diphtheric**, a specific purulent inflammation of the conjunctiva due to the Klebs-Löffler bacillus. **C., Egyptian**. See *Trachoma*. **C., Follicular**, a form characterized by numerous round, pinkish bodies found in the retrotarsal fold. **C., Gonorrheal**, a severe form of purulent conjunctivitis caused by infection with gonococci. **C. granulosa**. See *Trachoma*. **C., Hemorrhagic**. See *Pink-eye*. **C., Hypertrophic, C. hypertrophica**, chronic catarrhal conjunctivitis attended with enlargement of the conjunctival papillae. **C., Lacrimal**, a form due to the presence of irritating secretion from the conducting part of the lacrimal apparatus. **C., Lithiasis**, irritation of the conjunctiva due to deposition of calcareous matter in the tissue of the palpebral conjunctiva. **C., Parinaud's**, a mucopurulent form marked by the presence of large granules which are sometimes pediculated. The condition is accompanied by chills, fever, and swelling of the preauricular, retromaxillary, and cervical glands, which sometimes suppurate. **C., Phlyctenular**, a form characterized by the presence on the ocular conjunctiva of small vesicles surrounded by a reddened zone. **C., Purulent**, conjunctivitis characterized by a thick, creamy discharge. **C., Subacute**, redness and thickening of the conjunctiva, largely confined to the conjunctiva of the lids and fornices, a scanty secretion of mucus, with some pus-corpuscles, due to the presence of a bacillus.

Connective Tissue. See *Tissue, Connective*.

Conoid, Conoidal (*ko'-noid*, *ko-noid'*) [*κωνος*, cone; *ειδος*, shape]. Of a conic shape.

C. Ligament, the lower and inner part of the coracoclavicular ligament. **C. Tubercle**, the eminence on the inferior surface of the clavicle to which the conoid ligament is attached.

Conquinamin (*kon-kwin'-a-min*). An alkaloid of cuprea-bark.

Conradt's Line. A line drawn from the base of the xiphoid process to the point of the apex-beat, marking, under normal conditions, the upper limit of percussion-dulness of the left lobe of the liver.

Consanguinity (*kon-san-gwin'-it-e*) [*com*, together; *sanguinis*, of blood]. The relationship arising from common parentage; blood-relationship.

Consciousness (*kon' - shus - nes*) [*consciens*, knowing]. The state of being aware of one's own existence, of one's own mental states, and of the impressions made upon one's senses; ability to take cognizance of sensations. **C., Double**, that morbid condition in which there are two separate and alternating states of mental consciousness, in either one of which the events that have occurred in the other state are not remembered by the patient.

Consensual (*kon-sen'-su-al*) [*consensus*, agreement]. Excited reflexly by stimulation of another part, usually a fellow organ, as the consensual reaction of one pupil when the iris of the other eye is stimulated.

Conservation (*kon-ser-va'-shun*) [*conservare*, to keep]. Preservation without loss. **C. of Energy.** See under *Energy*.

Consolidation (*kon-sol-id-a'-shun*) [*consolidare*, to make firm]. The process of becoming firm or solid, as a lung in pneumonia.

Consonant, Consonating (*kon'-so-nant, kon-so-na'-ting*) [*com*, together; *sonare*, to sound]. Applied to pulmonary sounds heard on auscultation which sound in unison with some other sound.

Constant (*kon'-stant*) [*constans*, steady]. Fixed. **C. Current**, one that goes continuously in one direction.

Constipation (*kon-stip-a'-shun*) [*constipare*, to crush tightly together]. A condition in which the bowels are evacuated at long intervals or with difficulty.

Constitutio (*kon-sti-tu'-she-o*). See *Constitution*. **C. lymphatica**, Paltauf's term for a pathologic condition marked by hyperplasia of the entire lymphatic system, including the thymus gland, and frequently by a hyperplasia of the vascular system, and, in females, of the genital organs.

Constitution (*kon-stit-u'-shun*) [*constituere*, to dispose]. In chemistry, the atomic or molecular composition of a body. In pharmacy, the composition of a substance. In physiology, the general temperament and functional condition of the body.

Constitutional (*kon-stit-u'-shun-al*). Pertaining to the state of the constitution. **C. Diseases**, such diseases as are inherent, owing to an abnormal structure of the body. Also, a condition in which the disease pervades the whole system. General diseases, in contradistinction to local.

Constrictor (*kon-strik'-tur*) [*constringere*, to bind together]. Any muscle that contracts or tightens any part of the body. See under *Muscle*.

Consumption (*kon-stump'-shun*) [*consumere*, to consume or wear away]. A wasting away, especially a wasting disease like tuberculosis, particularly pulmonary tuberculosis or tuberculosis of the bowels.

Contact (*kon'-takt*) [*contactus*, a touching]. A touching. **C.-action**, katalysis. **C.-bed**, a large open basin containing a layer of coke or cinders, for the purification of sewage by bringing it into contact with bacteria which set up rapid decomposition and destruction of the organic matter. Cf. *Septic Tank*. **C.-breaker**, an instrument by means of which a galvanic circuit is broken. **C.-substance**, a catalyst.

Contagion (*kon-ta'-jun*) [*contingere*, to touch]. 1. The process by which a specific disease is communicated from one person to another, either by direct contact or by means of an intermediate agent. 2. The specific germ or virus from which a communicable disease develops.

Contagious (*kon-ta'-jus*) [*contagion*]. Communicable or transmissible by contagion or by a specific contagium.

Contagium (*kon-ta'-je-um*) [L.]. Any virus or morbid matter by means of which a communicable disease is transmitted from the sick to the well.

Contiguity (*kon-tig-u'-it-e*) [*contingere*]. Proximity. **C., Amputation in the**, one performed at a joint, without section of a bone.

Continence (*kon'-li-nens*) [*continere*, to hold together]. Self-restraint, especially in regard to the sexual passion.

Continued (*kon-tin'-ud*) [*continuuere*, to make continuous]. Persisted in. **C. Fever**, a fever that is long continued, without intermissions.

Continuity (*kon-tin-u'-it-e*) [*com*, together; *tenere*, to hold]. The state of being continuous or uninterrupted. **C., Amputation in the**, amputation in which a bone is divided.

Contraaperture (*kon-trah-ap'-er-chur*). A counteropening.

Contract (*kon-trakt*) [*contrahere*, to draw together]. 1. To draw the parts together; to shrink. 2. To acquire by contagion.

Contractility (*kon-trak-til'-it-e*) [see *Contract*]. That property of certain tissues, especially muscle, of shortening upon the application of a stimulus. **C., Faradic.** See *Galvanofaradization*. **C., Galvanic.** See *Galvanoccontractility*. **C., Idi muscular**, that peculiar to degenerated muscles. **C., Neuromuscular**, normal contractility as distinguished from idi muscular contractility.

Contraction (*kon-trakt'-shun*) [see *Contract*]. Approximation of the elements of a tissue or organ, thus diminishing its volume or contents. **C., Anodal Closing**, **C., Anodal Opening**, the contraction taking place at the anode on closing or opening the circuit. **C., Carpopedal**, a variety of tetany occurring in infants, generally associated with dentition or seat-worms. There is a flexing of the fingers, toes, elbows, and knees

and a general tendency to convulsions. **C.**, **Clonic**, alternate muscular contraction and relaxation. **C.**, **Closing**, muscular contraction produced at the instant that the electric current is closed. **C.**, **Dupuytren's**, a contraction of the palmar fascia causing the fingers to fold into the palm. **C.**, **Dupuytren's, False**, contraction of the palm and fingers due to injury of the palmar fascia. **C.**, **Front-tap**, a phenomenon often observed in cases with exaggerated knee-jerk. When the foot is placed at a right angle to the leg and the muscles of the front of the leg are tapped, the foot is extended. See under *Reflex*. **C.**, **Gowers'**. See *C.*, *Front-tap*. **C.**, **Hour-glass**, a contraction of an organ, as the stomach or uterus, at the middle. **C.**, **Kathodal Duration**, one occurring at the cathode and continuing during the whole time of closure of the circuit. Syn., *Kathodal-closure tetanus*. **C.**, **Myoclonic**, the convulsive spasmodic contraction of a muscle. **C.**, **Opening**, the muscular contraction produced by opening or breaking the circuit. **C.**, **Palmar**, Dupuytren's contraction. **C.**, **Paradoxic**, a phenomenon that consists in the contraction of a muscle, caused by the passive approximation of its extremities. **C.-remainder**, the stage of elastic after-vibration or residual contraction persisting in a muscle after withdrawal of the stimulus. **C.-ring**, the boundary-line between the upper and lower segments of the parturient uterus. **C.**, **Tonic**. See *Tonic Spasm*. **C.**, **Vermicular**, peristaltic contraction.

Contractor (*kon-trakt'-or*). A tensor muscle.

Contracture (*kon-trak'-chur*) [*contraction*]. Contraction; permanent shortening, as of a muscle; distortion or deformity due to the shortening of a muscle or of various muscles. **C.**, **Nurse's**. See *Nurse's Contracture*. **C.**, **Thomsenean**, that occurring in Thomsen's disease.

Contradolin (*kon-trad'-ol-in*). A compound of antamid, salicylic acid, and phenol; analgesic. Dose 4-8 gr. (0.25-0.5 Gm.) hourly.

Contraindication (*kon-trah-in-dik-a'-shun*) [*contra*, against; *indicare*, to point out]. That modifying condition in which a remedy or a method of treatment is forbidden.

Contralateral (*kon-trah-lat'-er-al*) [*contra*; *latus*, side]. Opposite; applied to a muscle acting in unison with another on the opposite side of the body.

Contre-coup (*kän-tr-koo*) [Fr.]. Counter-stroke. The transmission of a shock from the point struck to a point on the opposite side of the body or the part.

Control (*kon-tröl'*) [*contra*; *rotula*, a roll]. A standard by which to check observations and insure the validity of their results. Colloquially, the term is sometimes used as a noun for control animal or control experiment. **C.** **Animal**, one used in a control experiment. **C.** **Experiment**, an experiment carried out under normal or common

circumstances or conditions, to serve as a standard whereby to test the variation or value of another experiment carried out under peculiar or abnormal circumstances.

Controller (*kon-tröl'-er*). An apparatus for regulating the electric current to the operation of small lamps, faradic coils, small motors, etc.

Contunding (*kon-tund'-ing*) [see *Contusion*]. Producing a contusion; bruising.

Contusion (*kon-tu'-chun*) [*contundere*, to bruise]. A bruise or injury inflicted without the integument being broken. **C.-pneumonia**, a form of pneumonia following traumatism.

Conus (*ko'-nus*) [*κωνος*, a cone]. 1. A cone. 2. A crescentic patch of atrophic choroid tissue near the optic papilla in myopia. **C.** **arteriosus**, the cone-shaped eminence of the right ventricle of the heart, whence arises the pulmonary artery. **C.** **cochleæ**, the modiolus. **C.** **cordis**, the ventricular part of the heart. **C.** **corporis striati**, the ventral extremity of the corpus striatum. **Coni malpighii**, **C.** **tubulosi**, the malpighian pyramids. **C.** **medullaris**, the cone-like termination of the spinal cord, continuous as the filum terminale. **Coni retinæ**. See *Cone, Retinal*. **C.** **terminalis**. See *C. medullaris*. **Coni testiculi**. See *Coni vasculosi*. **Coni vasculosi**, a series of conic masses that together form the globus major of the epididymis.

Convalescence (*kon-val-es'-ens*) [*convalescere*, to become well]. A term applied to the restoration to health after disease.

Convallamaretin (*kon-val-am-ar-e'-tin*), $C_{20}H_{36}O_8$. A crystalline substance obtained by heating convallamarin with dilute sulfuric acid.

Convallamarin (*kon-val-am'-ar-in*) [*convallaria*; *amarus*, bitter], $C_{22}H_{44}O_{12}$. A glucosid derived from *Convallaria majalis*. It is soluble in water and is used as a cardiac stimulant. Dose $\frac{1}{2}$ gr. (0.05 Gm.). Syn., *Convallamarinum*.

Convallaretin (*kon-val-ar-e'-tin*), $C_{14}H_{22}O_4$. A substance obtained from convallarin by prolonged boiling in dilute acids.

Convallaria (*kon-val-a'-re-ah*) [*convallis*, a valley]. A genus of liliaceous plants. *C. majalis* is the lily-of-the-valley. All parts of the plant are used in medicine. Its properties are due to convallarin, $C_{24}H_{40}O_{11}$, and convallamarin, $C_{22}H_{44}O_{12}$, glucosids. It is a cathartic, diuretic, and cardiac stimulant. **C.**, **Extract of**. Dose 2-10 gr. (0.13-0.65 Gm.). **C.**, **Fluidextract of** [*fluidextractum convallariae*, U. S. P.]. Dose 2-11 min. (0.13-0.7 Cc.). **C.**, **Infusion of**, prepared with three times its weight of water. Dose $\frac{1}{2}$ -2 oz. (15-60 Cc.).

Convallarin (*kon-val'-ar-in*) [*convallaria*], $C_{24}H_{40}O_{11}$. A crystalline purgative glucosid derived from *Convallaria majalis*.

Convection (*kon-vek'-shun*) [*convehere*, to carry together]. A transmission or carrying, as of heat or electricity. **C.-current**, a current

of a liquid or gas heated to a temperature above that of the surrounding medium; it rises to the surface because of its lesser density, and thus the entire fluid or gas acquires the same temperature.

Convergence (*kon-ver'-jens*) [*com*, together; *vergere*, to incline]. Inclination or direction toward a common point, center, or focus, as of the axes of vision upon the near-point. **C.-stimulus Adduction**, the power of adduction of the eyes, provoked by fixation of the gaze upon an object placed at the near-point.

Convergent (*kon-ver'-jent*) [*see Convergence*]. Tending to a common center. **C. Strabismus**. *See Strabismus, Convergent*.

Converter (*kon-vert'-er*). *See Alternator*.

Convex (*kon-vek'-s*) [*convexus*, vaulted]. Having a surface approximating more or less a part of the surface of a sphere.

Convexity (*kon-vek'-s-i-ty*) [*see Convex*]. A surface rounding outward; the quality of being convex.

Convexoconcave (*kon-vek'-s-o-kon-kav'-*). *See Concavoconvex*.

Convexoconvex (*kon-vek'-s-o-kon-vek'-*). Having two convex surfaces; biconvex. *See Lens, Biconvex*.

Convolution (*kon-vo-lu'-shun*) [*convolvere*, to roll together]. A fold, twist, or coil of any organ, especially any one of the prominent convex parts of the brain, separated from each other by depressions or sulci. **C., Angular**, the posterior part of a convolution situated between the intraparietal fissure in front and above, and the horizontal limb of the sylvian fissure and the hinder part of the first part of the first temporal fissure below. The anterior part is called the supramarginal convolution. **C.s, Annectant**, small convolutions which connect the occipital with the temporal; bend and parietal lobes. **C., Anterior Central, C., Ascending Frontal**, the convolution in front of the fissure of Rolando. **C., Ascending Parietal**, the convolution just behind the fissure of Rolando. **C., Broca's**, the inferior or third frontal convolution. **C., Fornicate**, a long convolution on the mesial surface of the brain above the corpus callosum. **C.s, Frontal**, the convolutions of the frontal lobe. **C., Hippocampal**, the part of the fornicate convolution that winds around the splenium of the corpus callosum. **C.s, Insular**, the small convolutions composing the island of Reil. **C., Marginal**, the mesial surface of the first frontal convolution. **C.s, Occipital**, the convolutions making up the occipital lobe. **C., Paracentral**, a convolution on the mesial surface of the brain, representing the junction of the upper ends of the ascending frontal and ascending parietal convolutions. **C.s, Parietal**, the convolutions of the parietal lobe. **C., Posterior Central**. *See C., Ascending Parietal*. **C., Supramarginal**. *See C., Angular*. **C.s, Temporal**, the convolutions of the temporal lobe. **C., Uncinate**,

the hook-like termination of the fornicate convolution.

Convolvulin (*kon-vul'-vulin*) [*convolvere*, to roll together]. $C_{25}H_{40}O_{16}$. A glucosid derived from the roots of jalap (*Convolvulus purpurea*). It is a gummy mass, with active purgative properties.

Convulsant (*kon-vul'-sant*) [*see Convulsion*]. A medicine that causes convulsions.

Convulsion (*kon-vul'-shun*) [*convolvere*, to convulse]. An involuntary general paroxysm of muscular contraction. It is either tonic (without relaxation) or clonic (having alternate contractions of opposite groups of muscles). **C., Epileptiform**, one characterized by total loss of consciousness. **C., Hysterie**, one due to hysteria; consciousness is only apparently lost. **C., Local**, one affecting one muscle, member, or part of a member. **C., Mimetic, C., Mimic**, a facial convulsion. **C., Oscillating, C., Oscillatory**, one in which the separate fiber-bundles of a muscle are affected successively and not simultaneously. **C., Suffocative**, laryngismus stridulus. **C., Tetanic**, general tonic convulsion without loss of consciousness. **C., Tonic**, one due to the action of some toxin upon the nervous system. **C., Uremic**, one that occurs in kidney disease due to retention in the blood of matters that should be eliminated by the kidney.

Cooper's Disease. *See Reclus' Disease*.

C's Fascia. 1. The fascia transversaria.

2. The cellular layer beneath the fascia.

C's Hernia, encysted hernia of the tunica vaginalis.

C's Irritable Breast, mastodynia neuralgica; neuralgia of the mamma.

C's Irritable Testicle, neuralgia of the testis.

C's Ligament. 1. The lower, thickened portion of the fascia transversaria,

which is attached to the spine of the psoas and the iliopectineal eminence. 2. Another

ligamentous fibers extending from the base

of the olecranon to the coronoid process on

the inner aspect of the elbow joint. **C's**

Suspensory Ligaments, the fibrous processes

that connect the capsule of the mamma with

the overlying skin.

Coordination (*ko-or-di-na'-shun*) [*com*, to

gather; *ordinare*, to regulate]. The har-

monious activity and proper sequence of

operation of those parts that cooperate in

the performance of any function.

Coordinator (*ko-or-di-na'-tor*) [*see Coordination*].

The part of the nervous system

regulating coordination. **C., Oculonuclear**,

Spatzka's name for the part of the pre-

longitudinal fasciculus below the floor of

the fourth ventricle.

Copaiba (*ko-pa'-e-ba*) [*S.*] Balsam of

copaiba. The oleoresin of *Copaiba* espe-

cialis, *C. coriacea*, *C. guianensis*, *C. mar-*

juga, *C. cordifolia*, *C. hirsuta*, *C. nitida*, *C.*

oblongifolia, and *C. langsdorffii*, leguminosae

trees, native to South America. It is a

stimulant, diuretic, diaphoretic, and an ex-

torant, and is much used in gonorrhea. Syn., *Copivas*. **C., Balsam of.** See *Copaiba*. **C., East Indian.** See *Gurjun Balsam*. **C., Mass of,** copaiba, 94; magnesia, 6 parts. Dose 10 gr.-1 dr. (0.65-4.0 Gm.). Unof. **C., Mixture of, Compound,** Lafayette's mixture: copaiba, 7 dr.; oil of cubebs, 1 dr.; glycerite of yolk of egg, 7 dr.; triturate and add syrup, 2½ oz.; then add, with constant stirring, solution of potassium hydroxid, ½ oz.; compound tincture of cardamom, 2 dr.; sweet spirit of niter, ½ oz.; enough peppermint-water to make 8 oz. Dose 1 dr.-½ oz. (4-16 Cc.). Unof. **C., Oil of** (*oleum copaiba*, U. S. P.), a colorless substance constituting about one-half of copaiba, and used for the same purposes. Dose 10-15 min. (0.65-1.0 Cc.). **C., Resin of,** the residue after distilling off the volatile oil of copaiba, mainly copalivic acid. Dose 1-5 gr. (0.065-0.3 Gm.). Unof.

Copiopia (*kop-i-o'-pe-ah*). See *Kopiopia*.

Copper (*kop'-er*) [ME., *coper*]. Cuprum. A reddish-brown metal existing in nature chiefly in the form of copper pyrites, which is a double salt of copper and iron sulfid. Various salts are used in medicine. In toxic doses they are gastrointestinal irritants. In therapeutic doses they are used as astringents in inflammation of mucous membranes. They are also employed as emetics, and, externally, as caustics. See *Elements, Table of Chemic.* **C. Acetate**, $\text{Cu}(\text{C}_2\text{H}_3\text{O}_2)_2$, verdigris, used in pulmonary diseases and as a lotion in skin diseases. Dose ½-1 gr. (0.0065-0.016 Gm.). **C. Acetoarsenite**, paris-green, used as a pigment and an insecticide. **C. Acetophosphate**, employed in chlorosis and amenorrhea. **C.-alum.** See *C., Aluminated*. **C., Aluminated**, a combination of sulfates of copper and aluminium and potassium nitrate, occurring as a green powder; a mild caustic used in ophthalmia. Syn., *Copper-alum*; *Lapis dissimilis*. **C. Amalgam**, a metallic filling-material composed of copper and mercury. **C. Ammoniate**, ammonium carbonate, 3; copper sulfate, 4 parts; useful in chorea, hysteria, etc. Dose ½-1 gr. (0.01-0.065 Gm.). **C. Ammoniosulfate**, **C. and Ammonium Sulfate**, obtained by dissolving copper sulfate in ammonia-water and precipitating with alcohol. It is antispasmodic and astringent. Dose ½-2 gr. (0.03-0.13 Gm.) 3 or 4 times daily with tincture of opium after meals; maximum dose 5 gr. (0.3 Gm.) single; 10 gr. (0.6 Gm.) a day. Application for gleet, etc., 0.2 to 1% solution or ointment. **C. Arsenate**, a blue powder obtained from ammonium arsenate with copper sulfate. It is used as an alternative in syphilis. Dose ½-1 gr. (0.002-0.008 Gm.). **C. Arsenite**, a salt valuable in intestinal diseases. Dose 1½ gr. (0.00065 Gm.). **C. Carbonate**, a compound of copper and carbonic acid. **C. Nitrate** $\text{Cu}(\text{NO}_3)_2 \cdot 3\text{H}_2\text{O}$, is used for the same purposes as the sulfate. **C.-nose.** Synonym of *Aeno rosacea*. **C. Nucleinate**, a compound of nucleol and copper oxid containing 6% of copper; it occurs as a fine

powder and is used in chronic conjunctivitis. Syn., *Cuprol.* **C. Oleate**, $\text{Cu}(\text{C}_{18}\text{H}_{33}\text{O}_2)_2$, a mixture of 10% copper oxid dissolved in oleic acid, forming a greenish-blue, granular powder, soluble in ether. It is applied to indolent ulcers; ointment, 10 to 20% in lanolin. **C. Oxid**, a compound of copper and oxygen. **C. Oxid, Black**, CuO , a brownish-black, amorphous powder obtained from copper nitrate or copper carbonate by ignition. It is used as a teniafuge. Dose 7-1½ gr. (0.05-0.11 Gm.) 3 or 4 times daily in pills for two weeks, abstaining from acid food. Externally it is used as an ointment with lard in treatment of chronic glandular induration. It is also employed in organic analysis. Syn., *Copper monoxid*. **C. Oxid, Red**, Cu_2O , a dark-brown, crystalline powder. Syn., *Copper hemioxid*; *Copper suboxid*. **C. Phosphate**, CuHPO_4 , a bluish-green powder. It is used in tuberculosis. Dose 1-½ gr. (0.008-0.032 Gm.) several times daily. **C., Reaction for.** See *Schoenbein*. **C. Sulfate** (*cupri sulphas*, U. S. P.), $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, soluble in water, valuable as an emetic, tonic, and astringent. Dose, as an emetic, 2-5 gr. (0.13-0.32 Gm.); as a tonic, 1-½ gr. (0.01-0.032 Gm.). **C. Sulfocarbonate**, $\text{Cu}_2\text{C}(\text{HSO}_4)_4 \cdot 6\text{H}_2\text{O}$, green crystals soluble in water and alcohol. Syn., *Cupriaseptol*.

Copperas (*kop'-er-as*) [*cupri rosa*, rose of copper (?)]. A common name for ferrous sulfate.

Copraol (*kop'-ra-ol*) [*copra*, the dried kernel of the cocoanut]. A solid fat, derived from the cocoanut, and used as a substitute for cacao-butter in making suppositories. It melts at 30.3° C.

Copremia (*kop-re'-me-ah*) [*κόπρος*, dung; *αἷμα*, blood]. A form of general blood-poisoning arising from chronic constipation. The symptoms are anemia, sallow complexion, anorexia, frontal headache, vertigo, nausea, flatulence, thirst, fetid breath, lassitude, hypochondriasis, and irritability of temper.

Copro- (*kop-ro-*) [*κόπρος*, dung] A prefix meaning relating to the feces or to dung.

Coprolalia (*kop-ro-la'-le-ah*) [*copro-*; *λαλέω*, speech]. The use of filthy and offensive language when a manifestation of disease.

Coprolith (*kop'-ro-lith*) [*copro-*; *λίθος*, a stone]. A hard mass of fecal matter in the bowels.

Coprophagy (*kop-rof'-a-je*) [*copro-*; *φαγέιν*, to eat]. The eating of dung, a symptom seen in insane and hysterical patients.

Coproplanesis (*kop-ro-plan'-e-sis*) [*copro-*; *πλανήτης*, wandering]. Escape of feces through a fistula or other abnormal opening.

Coprostasis (*kop-rost'-tas-is*) [*copro-*; *στένω*, a standing]. The accumulation of fecal matter in the bowel.

Coptis (*kop'-tis*) [*κόπτειν*, to cut]. Goldthread. The root of *C. trifolia*, a simple bitter tonic resembling quassia. It contains *coptin*, an alkaloid closely allied to berberin. Dose 10-30 gr. (0.65-2.0 Gm.).

Copulation (*kop-u-lá'-shun*) [*copulare*, couple]. The act of sexual intercourse.

Cor (*kor*) [L.; gen., *cordis*]. The heart. See *Heart*. **C. adiposum**, a heart with a simple excess of the normal subpericardial fat. **C. bovinum**. See *Bovine Heart*. **C. hirsutum**, **C. hispidum**, **C. tomentosum**. See *C. villosum*. **C. membranaceum**, the auricular part of the heart. **C. mobile**, a heart which changes its position with the change of posture of the individual. **C. villosum**, hairy heart; the peculiar shaggy appearance presented by the heart in acute plastic pericarditis, with the deposited fibrin existing in long shreds.

Coraco- (*kor-ak-o-*) [*akrotis*, a crow]. Pertaining to the coracoid process.

Coracobrachialis (*kor-ak o-bras-ke-ol'-is*). See under *Muscle*.

Coracohyoid (*kor-ak o-hi'-oid*). 1. Relating to the coracoid process and the hyoid bone. 2. The omohyoid muscle.

Coracoid (*kor'-ak-oid*) [*coraco-*; *akros*, likeness]. 1. Having the shape of a crow's beak. 2. The coracoid process. **C. Ligament**, a triangular ligament joining the coracoid process to the acromion. **C. Process**, a beak-shaped process of the scapula.

Coracoscapular (*ko-rak-o-skap'-u-lar*). Relating to the coracoid process of the scapula and to some other portion of the scapula.

Cord [*chorda*, a string]. 1. A tendon, any string-like body. 2. Used as a synonym for the *umbilical cord*, the vascular, cord-like structure connecting the placenta and fetus. **C., Axis-**. See *Primitive Streak*. **C., Bioplasson**, a reticulum formed by branching cells. **C., Colic**, **Transverse**, Glénard's term for that portion of the transverse colon which becomes hard and rigid as the result of a stoppage of fecal matter by the kinking of the colon near its attachment by the pylorocolic ligament. **C., Dorsal**, the notochord. **C., False**, **C., Superior** (vocal), a fold of mucous membrane on either side of the middle line of the larynx, including the superior thyroarytenoid ligament. **C., Genital**, Thiersch's name for an embryonic structure formed from the two Wolffian ducts and the müllerian ducts. **C. of Hippocrates**, the achilles tendon. **C., Lumbosacral**, a nerve-trunk formed from the divisions of the fourth and fifth lumbar nerves. **C., Muscular**, a cord-like prominence of a muscle due to morbid excitability of its fibers. **C., Presentation of**, descent of the umbilical cord between the presenting part and the membranes at the beginning of labor. **C., Prolapse of**, descent of the umbilical cord at the rupture of the bag of waters; incomplete, if remaining in the vagina, complete, if protruding therefrom. **C., Sonorous**, the semicircular canals of the internal ear. **C., Spinal**. See *Spinal Cord*. **C., True Vocal**, **C., Vocal**, the vocal band. See under *Larynx*.

Cordate (*kor'-de*) [*cor*]. Heart-shaped.

Cordein (*kor'-de-in*). A white, crystalline substance used as an analgesic and antiseptic. *Syn.*, *Methyltribromosalol*.

Cordia (*kor'-de-ah*) [E. and V. *Cordia*, German physicians (1486-1535 and 1515-1544)]. A genus of shrubs and trees of the order *Boraginaceae*. *C. alliodora* is indigenous to Guyana; the leaves are used as an application to tumors and skin diseases. *C. myxa* is indigenous to the East Indies, but cultivated in Arabia and Egypt. The fruit is used in coughs, the powdered bark in ringworm, the root as a purgative.

Cordial (*kor'-dial*) [*cor*]. 1. Pertaining to the heart, exhilarant, stimulant. 2. An aromatic, spirituous stimulant.

Cordiform (*kor'-di-form*) [*cor*; *forma*, form]. Cordate, shaped like a heart.

Cordite (*kor'-dit*). A smokeless gun-powder consisting of gun-cotton dissolved in acetone and nitroglycerin.

Cordol (*kor'-dol*). See *Salol Tribromid*.

Cordyl (*kor'-dil*). See *Acetyl Tribromidol*.

Core (*hor*) [*cor*]. The central slough of a boil or carbuncle. 2. [*akro*, the pupil] The pupil of the eye.

Coreclisis (*kor-ek-lis'-is*). See *Coreolysis*.

Corectasis (*kor-ek'-ta-sis*) [*akro*, the pupil, *taraxo*, a stretching out]. Dilatation of the pupil.

Corectome (*kor-ek'-töm*) [*core*, *latere*, to cut out]. An instrument used in iridectomies.

Corectopia (*kor-ek'-to'-pe-ah*) [*core*; *taraxo*, misplaced]. An anomalous position of the pupil, displacement of the pupil.

Coreclialysis (*ko-re-di-al'-is-is*) [*core*; *diaklysis*, dialysis]. The production of an artificial pupil at the ciliary border of the iris.

Coreclisis (*kor-el'-is-is*) [*core*; *taraxo*, a loosening]. The detachment of lentic adhesions to the lens or to the cornea.

Coreomorphosis (*kor-e-mor'-fo-sis*) [*core*, *piro*, formation]. The operation for establishing an artificial pupil.

Coreometer (*kor-e-om'-e-ter*) [*core*; *metron*, a measure]. An instrument for measuring the pupil of the eye.

Coreometry (*kor-e-om'-e-ter*) [*cor*, *metron*, a measure]. The measurement of the pupil of the eye.

Coreoplasty (*kor'-e-plas-ti*) [*core*, *plassein*, to form]. Any operation for forming an artificial pupil.

Coriamyrtin (*ko-re-am-er'-tin*) [*Coraria*; *myrtin*, myrtle]. $C_{20}H_{28}O_{10}$. An extremely poisonous principle, a glucoside, obtained from the fruit of *Coraria myrtifolia*. A cardiac stimulant. Maximum dose $\frac{1}{10}$ gr. (0.005 Gm.).

Coriander, Coriandrum (*ko-re-an'-der*, *ko-re-an'-drum*) [*coriandrum*, coriander]. *Coriander seed*. The *coriandrum* of the U. S. P. is the dried ripe fruit of *Coriandrum sativum*, an aromatic, carminative, and stimulant, used mainly to give flavor to other remedies and as a corrective to griping purgatives. Dose 10-20 gr. (0.65-1.3 Gm.). **C., Oil of** (*oleum coriandri*, U. S. P.), the volatile oil. Dose 2-5 min. (0.13-0.32 Cc.).

Coriandrol (*ko-re-an'-droil*), $C_{20}H_{28}O$. The chief constituent of oil of coriander, a liquid homomerid of borneol.

Coridin (*kor'-id-in*), $C_{10}H_{19}N$. A liquid base obtained from the distillation of bones.

Corium (*ko'-re-um*) [L., "a hide; leather"]. The deep layer of the skin. See *Skin*.

Corm (*korm*) [*καρμύς*, the trunk of a tree]. The bulbous underground part of certain plants, as the crocus.

Corn (*korn*) [*cornu*, horn]. A local induration and thickening of the skin from friction or pressure. See *Clavus*. **C.-silk**. See *Zea mays*. **C.-smut**. See *Ustilago*. **C.-starch**, the commercial name of a starch derived from maize, and extensively used as an article of food, especially for invalids.

Cornaro's Diet. A diet for indigestion and the results of riotous living, devised by Luigi Cornaro, a Venetian gentleman of the seventeenth century. It consisted of a daily allowance of bread, meat, and yolk of egg, amounting to 12 ounces in all. With this he took 14 ounces of a light Italian wine each day.

Cornea (*kor'-ne-ah*) [*corneus*, horny]. The transparent anterior portion of the eyeball, its area occupying about one-sixth the circumference of the globe. It is continuous with the sclerotic, and is nourished by lymph from the looped blood-vessels at its peripheral border. **C.**, **Conic**. See *Keratoglobus*. **C.**, **Transplantation of**, the operation of engrafting a section of transparent cornea from some animal into the space of an excised portion of human cornea.

Corneal (*kor'-ne-al*) [*cornea*]. Relating to the cornea.

Corneitis (*kor-ne-i'-tis*). See *Keratitis*.

Corneobupharon (*kor-ne-o-ble'-ar-on*) [*cornea*, *bupharon*]. Adhesion of the surface of the eyelid to the cornea.

Corneoritis (*kor-ne-o-i'-tis*). See *Keratiritis*.

Corneosclera (*kor-ne-o-skle'-rah*) [*cornea*; *sclera*]. The cornea and sclera taken together.

Corneous (*kor'-ne-us*) [*corneus*, horny]. Horny or horn-like. **C. Tissue**, the substance of the nails.

Cornet (*kor-net*) [*cornu*]. 1. A small ear-trumpet worn within the ear and sometimes concealed by the hair of the wearer. 2. A bony layer. **C.**, **Bertin's**, **C.**, **Sphenoid**, the anterior part of the body of the sphenoid bone.

Corniculate (*kor-nik'-u-lât*) [*cornu*]. Furnished with horns or horn-shaped appendages.

Corniculum (*kor-nik'-u-lum*) [*cornicula*, a little horn]. A small cornu or horn-like process.

Cornification (*kor-ni'-ik-a'-shun*) [*cornu*; *facere*, to make]. The process of hardening or making horny.

Cornstalk Disease of Cattle and Horses. A disease caused by feeding on dry stalks left standing in the field after the corn has been gathered in the fall. It has been attributed (1) to corn-smut; (2) to scarcity of salt and water; (3) to "dry murrain," a hard and dry condition of the third stomach, supposed to be morbid, though really nor-

mal; (4) to the presence of potassium nitrate in the fodder; (5) to the presence of a bacterium. Syn., *Bronchopneumonia bovis*.

Cornu (*kor'-nu*) [L.; pl., *cornua*]. A horn. A name applied to any excrescence resembling a horn. **C. ammonis**, the hippocampus major of the brain. **C. cervi**, hartshorn or ammonium hydroxid. **C. cutaneum**, a horn-like excrescence arising from the skin. Syn., *Cornu humanum*. **C.**, **Dental**, a horn of the dental pulp. These extensions form the body of the dental pulp, which corresponds with the positions of the cusps of the teeth. **C. descendens**, **C. inferius**, **C. laterale**, **C. magnum**, **C. medium**, **C. sphenoidale**, the medicornu, that prolongation of the lateral ventricle which, curving outward around the back of the thalamus, descends beneath it, and, extending forward and inward, ends in the anterior extremity of the hippocampal gyrus. **C. dorsale**, the dorsal projection of the mass of cinerea seen upon each half of the spinal cord in transverse section. Syn., *Crus posticum*; *Posterior cornu*. **C. humanum**. See *C. cutaneum*. **C. occipitale**, **C.**, **Posterior** (of the lateral ventricle), the postcornu, a conic prolongation of the lateral ventricle, curving outward, backward, and inward into the occipital lobe. Syn., *Cavitas digitata*; *Cornu ancyroide*. **Cornua of the Uterus**. 1. The lateral fundibuliform prolongations of the uterine cavity into which the fallopian tubes open. 2. The oviducts. **C. ventrale**, the ventral projection of the mass of cinerea seen upon each half of the spinal cord in transverse section. Syn., *Crus anterius*.

Cornual (*kor'-nu-al*) [*cornu*]. Relating to a cornu. **C. Myelitis**, myelitis affecting the anterior cornua of the spinal cord.

Cornus (*kor'-nus*) [L.]. Dogwood. The bark of the root of *C. florida*, the properties of which are due to a crystalline principle, *cornin*. It is a simple stomachic bitter and slightly antiperiodic. Dose of the *fluidextract* 10 min.-1 dr. (0.65-4.0 Gm.).

Cornutin (*kor-nu'-tin*). An alkaloid, the active principle of ergot. Dose $\frac{1}{2}$ gr. (0.005 Gm.). **C. Citrate**. Dose $\frac{1}{16}$ - $\frac{1}{8}$ gr. (0.003-0.006 Gm.) in spermatorrhea.

Corocleisis, **Corocleisis** (*ko-ro-kle'-sis*) [*κόρη*, the pupil; *κλείω*, a closure]. Pathologic closure or obliteration of the pupil.

Corona (*ko-ro'-nah*) [L., a "crown"]. 1. A crown. 2. The corona radiata. **C. dentis**, the crown of a tooth. **C. glandis**, the ridge of the glans penis. **C. radiata**, a radiating mass of white nerve-fibers ascending from the internal capsule to the cortex cerebri. **Coronæ tubulorum**. See *Crypts of Lieberkühn*. **C. veneris**, a circle of syphilitic blotches occurring on the forehead.

Coronal (*kor-o'-nal*) [*corona*]. Encircling like a crown; pertaining to the crown of the head. **C. Suture**, the suture joining the frontal with the two parietal bones.

Coronale (*kor-o-nal'-e*) [L.]. The frontal bone.

Coronary (*kor'-o-na-re*) [*corona*]. A term applied to vessels, nerves, or attachments that encircle a part or an organ.

Coroner (*kor'-o-ner*) [*corona*]. An officer who inquires by authority of the law into the causes of sudden or violent deaths. **C.'s Inquest**, the legal inquiry before a jury into the cause of a sudden or violent death.

Coronilla (*kor'-o-nil'-ah*) [dim. of *corona*]. A genus of leguminous herbs. *C. scorpioides*, an annual of southern France, furnishes **coronillin** (q. v.). *C. varia* is diuretic, purgative, and poisonous. It is used as a succedaneum for digitalis in cardiac disease. An aqueous extract and a powder of the fresh plant are given in doses of 1½ gr. (0.098 Gm.).

Coronillin (*kor'-o-nil'-in*) [see *Coronilla*]. An alkaloid, $C_7H_{12}O_2$, from *Coronilla scorpioides*; it is a cardiac tonic and diuretic. Dose 1-2 gr. (0.06-0.13 Gm.).

Coronoid (*kor'-o-noid*) [*corona*; *eidōs*, likeness]. Crown-shaped, as the coronoid process of the ulna or of the jaw.

Coroparelysis (*kor'-o-par-ell'-rī-sis*) [*κόρη*, the pupil, *παράσσειν*, a drawing aside]. Operative displacement of the pupil to remedy partial opacity of the cornea by bringing it opposite a transparent part.

Coroscopy (*kor'-os'-ko-pe*). See *Retinoscopy*.

Corpora (*kor'-pur-ah*) [pl. of *corpus*, a body]. A general term applied to certain parts of the body having a rounded or ovoid shape. **C. albicantia**, two white masses in the interpeduncular space at the base of the brain, the projections of the anterior pillars of the fornix. **C. aranacea**, a granular substance occurring at times in the masses of papillomas. Syn., *Sand-bodies*. **C. arantii**, the fibrous tubercles in the center of each segment of the semilunar valves. **C. cavernosa**, the cylindrical bodies of erectile tissue forming the chief part of the penis. Also, the two masses of erectile tissue composing the clitoris. **C. geniculata**, See *Crenulate Bodies*. **C. quadrigemina**, the optic lobes of the brain, the four rounded eminences situated under the corpus callosum. The anterior pair are called the nates, and the posterior, the testes. **C. sesamioidea**. See *C. arantii*.

Corpulence, **Corpulency** (*kor'-pu-lens*, -se) [*corpulentus*, corpulent]. Obesity, fatness of the body.

Corpulin (*kor'-pu-lin*). A remedy for obesity said to consist of bladderwrack (*Fucus vesiculosus*), tamarinds, and casarea sagrada.

Corpus (*kor'-pus*) [L., "a body"; pl., *corpora* (q. v.)]. A body, the human body. **C. callosum**, the broad band of white matter uniting the hemispheres of the cerebrum. **C. caudatum**, a ganglion or free ring of gray matter circling around the lentiform of the brain. It is massive in the frontal portion, but becomes attenuated caudad; the anterior portion is called the head; the posterior, the tail. **C. cavernosum vaginae**, the spongy tissue of the vagina. **C. dentatum**. 1. See *Olivary Body*. 2. The

central folded gray nucleus of the cerebellum.

C. fibrosum, a tough, semiopaque body occurring in the ovary, due to some fibrous change in the corpus luteum. **C. imbratum**, the lateral thin edge of the terna hypacantha. **C. highmorianum**. See *Highmore, Botrol*. **C. luteum**, the yellow body formed in the ovary in the site of a granular vesicle after the escape of the ovum. **C. luteum, False**, that resulting when pregnancy does not occur. Syn., *Corpus luteum of menstruation*. **C. luteum, True**, that resulting when pregnancy takes place. Syn., *Corpus luteum of pregnancy*. **C. spongiosum**, the spongy part of the penis encircling the urethra. **C. striatum**, a mass of gray matter extending into the lateral ventricles of the brain and composed of the caudate and lenticular nuclei.

Corpuscle (*kor'-pus-ŭ*) [dim. of *corpus*]. 1. A small body or particle. 2. A cell. **C., Axile**, **C., Axis-**, the central portion of a tactile corpuscle. Syn., *tactile body*. **C.s, Babes-Ernst's**. See *Babes-Ernst's Bodies*. **C.s, Bennett's**, large epithelial cells, filled with fatty detritus, found in the contents of some ovarian cysts. **C.s, Bizzozero's**. See *Bizzozero's Blood-platelets*. **C.s, Blood-**, **Red**, biconcave, nonnucleated discs, circular in outline, and containing red coloring-matter, termed hemoglobin, to which the color of the blood is due. Red corpuscles have been divided, according to their size, into normocytes (normal in size), megacytes (of excessive size), microcytes (abnormally small), and poikilocytes (of irregular shape and size). The red corpuscles in the blood of man are about $\frac{1}{2500}$ inch in diameter and $\frac{1}{2500}$ inch thick, and their number is about 4,000,000 to each cubic millimeter of blood. They consist of a colorless stroma infiltrated with the coloring-matter (hemoglobin). **C.s, Blood-**, **White** (or colorless), flattened cells, about $\frac{1}{2500}$ inch in diameter, existing in the ratio of 1:500 compared with red corpuscles. Their protoplasm is granular; they have one or more nuclei and no cell-wall. They possess contractile power and alter their shape readily. The colorless corpuscles are variously designated as eosinophil, basophil, neutrophil, mononuclear, polynuclear, lymphocytes, transitional, large, small, etc. **C., Bone-**, an osteoblast. **C.s, Burckhardt's**, peculiar angular or roundish bodies of a yellowish color found in the secretion of trachoma. **C.s, Canceroid**, the pearly bodies of squamous epithelioma. **C.s, Chorea**. See under *Chorea*. **C.s, Chromophil**. See *Nissl's Bodies*. **C.s, Chyle**, lymph corpuscles. **C.s, Colostrum**. See *Colostrum Corpuscles*. **C.s, Concentric**. See *Hassall's Bodies*. **C.s, Corneal**, connective tissue corpuscles containing an oval nucleus and furnished with numerous branching processes occurring within the fibrous groundwork of the cornea. Syn., *Toyne's corpuscles*, *Virchow's corpuscles*. **C., Cytoid**, a leukocyte. **C., Davaine's**. See *Bacillus anthracis* under

Bacteria. C.s of Donne. See *Colostrum Corpuscles*. C.s, Drysdale's Ovarian, granular cells, nonnucleated and of varying sizes, which were regarded by Drysdale as peculiar to ovarian fluid. C.s, Genital, special nerve-endings in the external genitalia. C.s, Ghost-, phantom-corpuscles. C.s, Gierke's, roundish, colloid bodies, of a significance not yet determined, sometimes found in the central nervous system; they appear to be identical with Hassall's corpuscles. C.s, Golgi's, tendon-spindles; small fusiform bodies resembling the pacinian corpuscles, existing in tendons at the junction of the tendinous fibers with the muscular fibers. They have not been found in the ocular muscles. C., Golgi-Mazzoni's. See C., Mazzoni's. C.s, Grandry's, minute ovoid or spheric taste-corpuscles found in the papillas of the beak and tongue of birds. C.s, Hassall's. See *Hassall's Bodies*. C., Hayem's. See *Achromacyte*. C.s, Herbst's, small bodies resembling pacinian corpuscles, found in the mucosa of the tongue of some animals and birds. C.s, Jaworski's, spiral bodies of mucus found in the gastric secretion in cases of pronounced hyperchlorhydria. C.s, Key and Retzius', encapsulated corpuscles found in the bill of some aquatic birds and representing transition forms between Herbst's and Pacini's corpuscles. C.s, Krause's. See *Krause's Corpuscles*. C.s, Langerhans' Stellate, terminations of nerve-fibers which have been observed in the rete mucosum of the epidermis. C.s, Leber's. See C.s, Gierke's. C.s, Losterfer's, granular masses alleged by Losterfer to have been found in the blood of syphilitic patients. C.s, Lymph-, nucleated amoeboid cells found in lymph and chyle. Upon entering the blood with the lymph they are called white blood-corpuscles. The smaller ones have little if any amoeboid movement, and are sometimes spoken of as free nuclei on account of their small cell-body, some of these corpuscles are coarsely granular and are therefore called granular cells. C., Malpighian (of the Kidney), the tuft of blood-vessels surrounded by the expanded portion of the uriniferous tubule, the capsule of Bowman. C.s, Malpighian (of the Spleen). See *Malpighian Corpuscles*. C., Mazzoni's, a peripheral ending of a sensory nerve closely resembling Krause's end-bulb. C.s, Meissner's. See C.s, Tactile- (1). C.s, Merkel's. See C.s, Grandry's. C.s, Miescher's. See *Miescher's Tubes*. C.s, Milk-, of v. Kolliker, cells containing fat-globules observed in the acini of the mammary gland and breaking up into milk-globules on reaching the lactiferous ducts. C.s, Montgomery's. See *Glands, Montgomery's*. C., Morgagni's. See *Morgagni's Globules*. C.s, Norris' Invisible, colorless, transparent, bi-concave discs of the same size as the red corpuscles, invisible in the serum because their color and refractive index are the same as those of the liquor sanguinis. C.s, Nunn's. See C.s, Bennett's. C.s, Pacinian, certain

small corpuscles occurring in the subcutaneous cellular tissue of the fingers and toes. They consist of concentric lamellas of connective tissue surrounding the termination of a sensory nerve. C.s, Patterson's, the molluscum bodies: oval, shiny bodies found in the contents of the tubercles of molluscum contagiosum. C., Pavement-. See *Cells, Endothelial*. C.s, Phantom-. See *Blood-platelets*. C., Polar-, the centrosome. C.s, Reissner's, the epithelial cells covering Reissner's membrane. C., Rollett's Nerve-. See C., Mazzoni's. C.s, Shadow-. See *Achromacyte*. C.s, Spleen-, C.s, Splenic. See *Malpighian Corpuscles*. C.s, Tactile-. 1. (Of Wagner.) The small, oval bodies found in the papillas of the skin and enveloped by nerve-fibers. 2. See C.s, Grandry's. C., Taste-. See *Taste-bud*. C.s, Terminal. See C.s, Krause's. C.s, Touch-. See C.s, Tactile-. C.s, Toynbee's, the corneal corpuscles. C.s, Transparent, of Norris. See C.s, Norris' Invisible. C.s, Traube's. See *Achromacyte*. C.s, Typhic, the epithelial cells of Peyer's patches which in typhoid fever have become granulated through degeneration. C.s, Vater's, C.s, Vater-Pacini's. See C.s, Pacinian. C.s, Virchow's. See C.s, Corneal. C., Zimmermann's, an achromacyte.

Corpuscular (*kor-pus'-ku-lar*) [*corpuscle*]. Relating to or of the nature of a corpuscle.

Corpusculum lamellosum (*kor-pus'-ku-lum lam-el-lo'-sum*). See C.s, Pacinian.

Corradiation (*kor-ra-de-a'-shun*). The act of radiating together, as focused rays.

Correctant, Corrective (*kor-ek'-iant, kor-ek'-tiv*) [*corrigeré, to correct*]. 1. Modifying favorably. 2. A substance used to modify or make more pleasant the action of a purgative or other remedy.

Corrigan's Disease. 1. Aortic insufficiency. 2. Cirrhosis of the lung. C.'s Line, the purple or brownish-red line on the margin of the gums in chronic copper-poisoning. C.'s Pulse, "water-hammer pulse"; the abrupt, jerking pulse of aortic insufficiency. C.'s Respiration, "nervous or cerebral respiration." Frequent shallow and blowing breathing in low fevers—e. g., in typhus. C.'s Sign, an expansive pulsation felt in cases of aneurysm of the abdominal aorta.

Corrigent (*kor'-ij-ent*). See *Correctant*.

Corroborant (*kor-ob'-a-rant*) [*corroborans, strengthening*]. A tonic invigorating remedy.

Corrosion (*kor-a'-shun*) [*com, together; rodere, to gnaw*]. The process of corroding or the state of being corroded. C.-anatomy, that branch of anatomy which demonstrates an anatomic specimen by means of a corrosive process that eats away those parts which it is not desired to preserve. In some cases a resisting-substance is injected, so as to preserve the vessels and ducts from corrosion. C.-preparation, one in which the vessels, ducts, or cavities of organs are filled by a fluid that will harden and preserve the shape of the vessel or cavity after the organ itself is corroded, digested, or otherwise destroyed.

Corrosive (*kor-ə'-siv*) [see *Corrosion*]. 1. Eating away. 2. A substance that destroys organic tissue either by direct chemit means or by causing inflammation and suppuration. **C. Chlorid**, **C. Sublimato**. See *Mercury Bichlorid*.

Corrugator (*kor'-u-ga-tor*) [*corrugere*, to wrinkle]. That which wrinkles. See under *Muscle*.

Corsican Moss. A mixture of fragments of various seaweeds brought from Corsica. It is said to be alterative, febrifuge, anthelmintic, and nutritious. Unof. Syn., *Helminthochorton*.

Cortex (*kor'-teks*) [L., "bark"]. 1. The bark of an exogenous plant. 2. The surface-layer of an organ. 3. The external gray layer of the brain, the substantia corticalis, or cortical substance. 4. The peripheral portion of an organ, situated just beneath the capsule. **C. aurantii**, orange-peel. **C. cerebri**. See *Cortex* (3). **C. corticis**, the outer sheath of the kidney. **C. Degeneration**. Synonym of *General paralysis of the insane*. See under *Paralysis*. **C. renalis**, the cortical substance of the kidney.

Corti's Arch. The arch formed in the organ of Corti by the two files of rods. **C.'s Canal**. See *Canal of Corti*. **C.'s Cells**, the outer hair-cells of Corti's organ. **C.'s Fibers**. See *C.'s Rods*. **C.'s Ganglion**, the ganglion spirale, an aggregation of ganglion-cells in the spiral canal of the cochlea. **C.'s Membrane**, the membrana testoria of the cochlea. **C.'s Organ**, a complicated organ, the product of differentiation of the epithelial lining of the cochlear canal, resting on the basilar membrane of the cochlea and containing the end-organs of the cochlear nerves. **C.'s Rods**, the pillars of the arch of the organ of Corti. **C.'s Teeth**, the auditory teeth, the tooth-like projections on the edge of the limbus laminae spiralis of the ear. **C.'s Tunnel**. Same as *C.'s Canal*.

Cortical (*kor'-tik-al*) [*cortex*]. Pertaining to the cortex or bark or to the cortex of the brain or of the kidney. **C. Epilepsy**, **C. Paralysis**, such as is due to a lesion of the cortical substance of the brain.

Corticate (*kor'-te-kat*) Furnished with a bark or cortex.

Corticifugal (*kor-te-si'-u-gal*) [*cortex*; *fugere*, to flee]. Conducting away from the cortex.

Corticipetal (*kor-te-si'-pet-al*) [*cortex*; *petere*, to seek]. Conducting toward the cortex.

Corticoafferent (*kor-te-ko-af'-er-ent*). See *Corticifugal*.

Corticoefferent (*kor-te-ko-ef'-er-ent*). See *Corticifugal*.

Corticospinal (*kor-tik-o-spi'-nal*). Pertaining to the cortex of the brain and the spinal cord.

Corundum (*ko-run'-dum*) [Hind., *kurand*]. A native crystalline aluminum oxide, Al_2O_3 . Mixed with melted shellac, it is formed into wheels for use in the dental laboratory and for grinding in general.

Coruscation (*kor-us-ka'-shun*) [*coruscare*, to glitter]. A glittering or flashing of light, also the subjective sensation of light flashes.

Corvisart's Disease. Idiopathic cardiac hypertrophy. **C.'s Facies**, the facies of Beau's disease.

Corydalin (*kor-id'-al-in*) [*corydalis*]. 1. An extract from the root of *Corydalis formosa* (*Dicentra canadensis*), it is used in syptoms and scrofula. 2. An alkaloid, $C_{12}H_{17}NO_4$ (Freund) from *Corydalis tuberosa*, it is used as a heart-tonic. Dose 1-5 gr. (0.065-0.032 Gm.).

Corydalis (*kor-id'-al-is*) [*corydallis*, the crested lark]. 1. Turkey-root. The tuber of *C. formosa* (*Dicentra canadensis*), a tonic, detergent, and alterative. Dose of fluidextract 10-30 min. (0.6-2.5 Cc.). 2. A genus of plants of the order *Papaveraceae*. *C. tuberosa*, hollowwort, hollowwort, is an herb indigenous to Europe, the rhizome is antihelmintic and emmenagogue. It contains corydalin and corydin.

Corydin (*kor-id'-in*). An amorphous alkaloid from *Corydalis tuberosa*.

Coryl (*kor'-il*). The name given to an anesthetic composed of ethyl Chlorid and methyl chlorid in such proportions that the boiling-point of the mixture should be about 42° F.

Coryleur (*kor-il-ur'*). An apparatus for spraying with coryl.

Coryza (*kor-i'-zah*) [*ἀρροζα*, a catarrh]. Catarrh of the mucous membrane of the nasal passages and adjacent sinuses, popularly called "cold in the head." See *Rhinitis*.

Cosaprin (*kos-ap'-rin*). $C_{12}H_{17}SO_3Na$ $\begin{matrix} \diagup \\ NH \\ \diagdown \end{matrix}$ $\begin{matrix} CO \\ | \\ CH_2 \end{matrix}$. A sulfoderivative of acetanilid, it is a whitish gray powder with a slightly saline taste, freely soluble in water. It is used as an antipyretic instead of acetanilid. Dose 5-8 gr. (0.3-0.5 Gm.) 3 times daily.

Cosmetic (*kos-met'-ik*) [*κοσμητις*, to adorn]. 1. Beautifying. 2. A remedy designed to hide defects of the skin or other external parts. **C. Operation**, a surgical operation to give a natural appearance to a defective or unsightly part.

Cosmic (*kos'-mik*) [*κόσμος*, the universe]. Worldwide; of wide distribution, as a cosmic disease.

Cosmolin (*kos'-mo-lin*). See *Petrolatum*.

Costa (*kos'-tah*) [L.]. A rib.

Costal (*kos'-tal*) [*costa*]. Pertaining to the ribs. **C. Arch**, the arch of the ribs. **C. Cartilages**, the twelve cartilaginous extensions of the ribs. **Costate** (*kos'-tat*). Ribbed, furnished with ribs or connecting structures.

Costiform (*kos'-te-form*). Rib-shaped.

Costive (*kos'-tiv*) [*constipare*, to be bound]. Constipated.

Costiveness (*kos'-tiv-nes*) [*constipare*]. Constipation.

Costo- (*kos-to-*) [*costa*]. A prefix denoting connection with the ribs.

Costoabdominal (*kos-to-ab-dom'-in-al*). Relating to the ribs and the abdomen.

Costochondral (*kos-to-kon'-dral*). Pertaining to the ribs and their cartilages.

Costoclavicular (*kos-to-klav-ik'-u-lar*). Pertaining to the ribs and the clavicle.

Costocolic (*kos-to-ko'-lik*). Relating to the ribs and the colon.

Costoinferior (*kos-to-in-fe'-re-or*). Relating to the lower ribs; applied to a form of respiration in which the lower ribs move more than the upper.

Costoscapular (*kos-to-skap'-u-lar*). 1. Relating to the ribs and the scapula. 2. The serratus magnus muscle.

Costosuperior (*kos-to-su-pe'-re-or*). Relating to the upper ribs.

Costotome (*kos-to-tōm*) [*costo-*; *τέμνω*, to cut]. A strong knife or heavy shears with the under blade in the shape of a hook, for cutting the costal cartilages in dissection, etc.

Costotracheal (*kos-to-tra-ke'-le-an*). Relating to the ribs and to the transverse processes of the cervical vertebrae.

Costotransverse (*kos-to-trans-vers*). 1. Pertaining to the ribs and transverse vertebral processes. 2. The scalenus lateralis. See under *Muscle*.

Costotransversectomy (*kos-to-trans-vers-ek'-to-me*) [*costotransverse*; *ἐκτομή*, a cutting out]. Excision of part of a rib and a transverse vertebral process.

Costoxiphoid (*kos-to-zif'-oid*). Relating to the ribs and to the ensiform cartilage.

Cot (*kot*) [AS., *cote*]. 1. A small bed. 2. The finger of a glove. See *Finger-cot*. **C., Fever-**, **C., Kibbee's**, a bed devised especially for applying cold-water treatment to fever patients.

Cotard's Syndrome. A form of paranoia characterized by delusions of negation, with sensory disturbances and a tendency to suicide. Syn., *Délire chronique des négations*.

Cotarnin (*ko-tar'-nin*) [an anagram of narcotin], $C_{12}H_{15}NO_4$. An oxidation-product of narcotin. **C. Hydrochlorate**, $C_{12}H_{15}NO_4 \cdot HCl \cdot H_2O$, small yellow crystals, soluble in water and alcohol. It is an internal hemostatic. Dose $\frac{1}{2}$ -2 gr. (0.03-0.13 Gm.). Syn., *Stypticin*.

Coto (*ko'-to*) [Sp., "a cubit"] Coto bark. The bark of a tree native to Bolivia. It contains a bitter principle, *cotoin*, $C_{22}H_{34}O_8$, irritant to the skin and mucous membranes. It is recommended for diarrhea and zymotic fevers, and for the night-sweats of pulmonary tuberculosis. Dose of the *powder* 1-15 gr. (0.065-1.0 Gm.); of the *fluidextract* 5-15 min. (0.32-1.0 Cc.); of the *tincture* (1:10) 10-30 min. (0.65-2.0 Cc.).

Cotoin (*ko'-to-in*) [*coto*], $C_{22}H_{34}O_8$. An astringent alkaloid from *coto* (q. v.). It is employed in dysentery and cholera. Dose $\frac{1}{2}$ -5 gr. (0.03-0.3 Gm.). *Paracotoin* is one-half as strong as cotoin.

Cotton (*kol'-n*) [Ar., *qāṭun*, cotton]. *Gossypium*, a white, fibrous seed-hair that envelops the seeds of the cotton-plant. **C., Absorbent**, cotton so prepared that it readily absorbs water. See also *Gossypium*. **C.,**

Gun-. See *Pyroxylin*. **C.-oil**. See *C.-seed Oil*. **C.-root**, **C.-root Bark**. See under *Gossypium*. **C.-seed Oil**, an oil obtained by pressure from the hulled seeds of several species of *Gossypium* (q. v.).

Cotugno's Canal. The aqueductus vestibuli. Syn., *Canalis cotunnii*. **C.'s Disease**, sciatica. Syn., *Malum cotunnii*. **C.'s Liquor**, the perilymph of the osseous labyrinth of the ear. Syn., *Liquor cotunnii*. **C.'s Nerve**, the nasopalatine nerve. **C.'s Space**. See *Boettcher-Cotugno's Space*.

Cotyledon (*kol-il'-don*) [κοτύληδών, a socket]. 1. Any one of the enlarged, vascular villi of the chorion which project into depressions of the decidua vera. 2. Any one of the numerous rounded portions into which the uterine surface of the placenta is divided. 3. A genus of plants of the order *Crassulaceae*. **C. umbilicus**, navelwort of Europe, has been highly recommended in epilepsy, but its medicinal properties are feeble.

Cotyloid (*kol-il'-oid*) [κοτύλη, a cup; *ειδός*, form]. Cup-shaped. **C. Cavity**, **C. Fossa**, the acetabulum. **C. Ligament**, a ligament surrounding the acetabulum. **C. Notch**, a notch in the anterior and lower border of the acetabulum.

Cotylopubic (*kol-il-o-pu'-bik*). Relating to the acetabulum and the os pubis.

Cotylosacral (*kol-il-o-sa'-kral*). Relating to the acetabulum and the sacrum.

Couch-grass (*kowtch'-gras*). See *Triticum*.

Couching (*kowtch'-ing*) [Fr., *coucher*, to depress]. The operation, now fallen into disuse, of depressing a cataractous lens into the vitreous chamber, where it was left to be absorbed.

Cough (*kawf*) [ME.]. A sudden, violent expulsion of air after deep inspiration and closure of the glottis. **C., Dry**, that unattended by expectoration. **C., Ear-**, cough excited reflexly from some morbid condition of the ear. **C., Moist**, cough with free expectoration. **C., Morton's**, cough followed by the vomiting of food, occurring frequently in pulmonary tuberculosis. **C., Pleuritic**, the dry, short, frequent cough of pleurisy, pneumonia, and phthisis, which accompanies the pain and friction-sounds of pleurisy and disappears with effusion or when bronchitis supervenes. **C., Reflex**, cough produced by irritation of a remote organ. See *C., Ear-*, and *C., Stomach-*. **C., Stomach-**. See *C., Reflex*. **C., Sydenham's**, spasm of the respiratory muscles in hysteria. **C., Uterine**, a reflex cough occurring in sufferers from genital disease due to irritation of the uterovaginal fibers of the hypogastric plexus supplying the fornix vaginae and cervix uteri and the nerves and ganglions supplying the fundus uteri and ovaries. **C., Winter-**, a short troublesome cough of old people due to chronic bronchitis, and recurring every winter.

Coulomb (*koo-lōm'*) [after de Coulomb, a French physicist]. The unit of measurement of electric quantity; the quantity of electricity

AURICULAR POINT, the point vertically over the auricular point at the root of the zygomatic process. **SUPRANASAL POINT**, **SUPRA-ORBITAL POINT**. Same as *Ophryon*. **SYM-Physion**, the median point of the outer border of the alveolus of the lower jaw. **VERTEX**, the superior point of the skull. In obstetrics, that conic portion of the skull the apex of which is at the posterior fontanel and the base of which is formed by the biparietal and trachelocephalic diameters.

Craniometry (*kra-ne-om'-et-re*) [*see Craniometer*]. The ascertainment of the proportions and measurements of skulls.

Craniorrachischisis (*kra-ne-or-rak-is'-kis-is*) [*cranio*; *ráxis*, spine; *axine*, a cleaving]. Congenital fissure of the skull and spine.

Craniosischisis (*kra-ne-os'-kis-is*) [*cranio*; *axine*, a cleaving]. Congenital fissure of the skull.

Craniotabes (*kra-ne-o-tat'-bez*) [*cranio*; *tabes*, a wasting]. An atrophy of the cranial bones occurring in infancy, with the formation of small, shallow, conic pits in the bone substance. Craniotabes results from rachitis, syphilis, or marasmus.

Craniothoracic (*kra-ne-o-thor-as'-ik*). Relating to the skull and the thorax, applied to temperaments showing a predominance of cerebral and thoracic influences.

Craniotomy (*kra-ne-ol'-o-mé*) [*cranio*; *tomé*, a cutting]. The operation of reducing the size of the fetal head by cutting or breaking it up, when delivery is otherwise impossible.

C., **Linear**. *See* Craniectomy.

Craniotomography (*kra-ne-o-ton-ol'-ko-pe*) [*cranio*; *tomé*, to cut; *graphein*, to examine]. An auscultatory method devised by Gahrtschewsky for the localization of changes in the bones of the skull (thinning or thickening) by means of the variations in sound transmitted through the bones and a special resonator (pneumatoscope) placed in the mouth.

Craniotrypsis (*kra-ne-o-trip-s'-is*) [*cranio*; *trypsis*, a boring]. Trephining.

Craniotympanic (*kra-ne-o-tim-pán'-ik*) [*cranio*; *tympanum*]. Pertaining to the skull and the tympanum.

Craniovertebral (*kra-ne-o-ver'-te-bral*). Same as *Cerebrospinal*.

Cranitis (*kra-né'-tis*). Inflammation of a cranial bone.

Cranium (*kra'-ne-um*) [*skapion*, the skull]. The skull. The cavity that contains the brain, its membranes, and vessels.

Crapulent, **Crapulous** (*krap'-u-lent*, *-lus*) [*crapula*, drunkenness, surfeit]. Marked by excess in eating and drinking.

Crassamentum (*kra'-sm-en'-tum*) [*L.*, "thick-ness"]. A clot, as of blood.

Cratægus (*kra-té'-gus*) [*sphaerægus*, the hawthorn]. A genus of rosaceous shrubs. *C. oxyacantha*, a European shrub, contains a crystallizable principle, *cratægin*, in the bark. A strong tincture in doses of 3 drops is used in heart disease.

Cravat (*kra-vat'*) [*Fr.*, *cravate*]. A bandage of triangular shape, used as a temporary dressing for a wound or fracture. The middle is applied to the injured part, and the ends are brought around and tied.

Crealbin (*kre-ál'-bin*). An internal antiseptic said to consist of creolin and albumin. Syn., *Creolalbin*.

Cream (*krem*) [*cremor*, thick juice or broth]. The rich fat part of milk. **C.** of Tartar. *See* *Potassium Bitartrate*.

Crease (*kred*) [*Celtic*]. A line made by folding. **C.**, **Gluteofemoral**, **C.**, **Iliofemoral**, the crease that bounds the buttock below, corresponding nearly to the lower edge of the gluteus maximus muscle. It is of supposed significance in the diagnosis of hip disease.

Creasol (*kres'-as-ol*) [*spha*, flesh; *oleum*, oil]. $C_8H_{10}O_2$. One of the principal phenols contained in creasote. It is formed from guaiacum-resin, and is found in beechwood tar. It is a colorless, oily liquid of an agreeable odor and a burning taste, boiling at $220^\circ C$. It is very similar to guaiacol.

Creasote, **Creasotum** (*kres'-a-ot*, *kres'-a-ot'-tum*) [*spha*, flesh; *aióteiv*, to preserve]. The product of the distillation of wood tar, preferably that from the beech, *Fagus sylvatica*, consisting of a mixture of phenol-compounds. It is an inflammable oily liquid, differing in this respect from phenol. It does not coagulate albumin or gelatin. Most of the commercial creasote consists of phenol or contains a large percentage of it. It is antiseptic, astringent, styptic, anesthetic, and escharotic. It is used extensively in pulmonary tuberculosis. Dose 1-3 min. (0.06-0.2 Gm.). **C.**, **Alpha**, a preparation containing the constituents of normal creasote mixed in such proportion that it contains 25% of crystalline guaiacol. **C.**, **Beechwood**, that obtained from beechwood. **C.**, **Benzoate**, an antiseptic used as a spray in diseases of the throat and nose. **C.**, **calcium Chlorhydrophosphate**, a white, syrupy mass used in tuberculosis. Dose 3-8 gr. (0.16-0.40 Gm.) twice daily. **C.**, **Carbonate**, guaiacol carbonate with other carbonates containing 90% of beechwood creasote. Maximum daily dose in tuberculosis 80 min. (5 Gm.). It is recommended in treatment of creapneumonia. Dose 15 gr. (1 Gm.) every 2 hours. Syn., *Creosotal*. **C.**, **magnesia**, a mixture of creasote and calcined magnesia, free from color and taste of creasote. It is a nonirritant antiseptic. Dose 8 gr. (0.52 Gm.). Syn., *Creosolul*. **Magnesium creosotate**. **C.**, **Mixture** (*mistura creosoti*, B. P.), creasote and glacial acetic acid, of each, 16 min. (1 Gm.), dissolved in 15 oz. (455 Gm.) of water to which 1 oz. (30 Gm.) of syrup and $\frac{1}{2}$ dr. (2 Gm.) of spirit of juniper have been added. Dose 1-2 dr. (4-8 Gm.). **C.**, **Ointment** (*unguentum creosoti*, B. P.), creasote, 1; simple ointment, 12; for local application. **C.**, **Oleate**, a yellowish, oily liquid used in the same manner as creasote. Dose 40-60 min. (2.5-

3.8 Cc.) daily. Syn., *Creasoteleic ether*; *Oleocreasote*. **C. Phosphate**, $\text{PO}_4(\text{C}_6\text{H}_5)_3$, a syrupy fluid containing 80% of creasote and 20% of phosphoric acid anhydride; it is used as a substitute for creasote. Syn., *Tricreasote phosphate*. **C. Tannophosphate**, an amber-colored fluid used in tuberculosis. **C. Valerianate**, a noncaustic fluid which is used in all forms of tuberculosis. Dose 3 min (0.2 Cc.), increasing to 18-28 min. (1.1-1.7 Cc.) daily, in milk. Syn., *Eosot*. **C. Vapor** (*vapor creosoti*, B. P.), for inhalation. **C. Water** (*aqua creosoti*, U. S. P.), a 1% solution. Dose 1-3 dr. (4-16 Cc.).

Creatin (*kre'-at-in*) [*aphug*, flesh], $\text{C}_4\text{H}_6\text{N}_4\text{O}_2$. A neutral organic substance that occurs in the animal organism, especially in the juice of muscles. **C.**, *Dehydrated*, creatinin.

Creatinemia (*kre-at-in-e'-me-ah*) [*creatin*; *alga*, blood]. An excess of creatin in the blood.

Creatinin (*kre-at-in-in*) [*creatin*], $\text{C}_4\text{H}_6\text{N}_4\text{O}$. An alkaline substance, a normal constituent of urine. It crystallizes in rhombic prisms and is a strong base. It is much more soluble than creatin. **C.**, *Reaction for*. See *Jaffé*, *Kerner*, *v. Maschke*, *Weyl*.

Credé's Method. 1. A prophylactic measure against ophthalmia neonatorum by the instillation, into the eyes of new-born children, of a few drops of a 1 or 2% solution of silver nitrate. 2. A method of expelling the placenta by grasping the uterus firmly through the abdominal walls, kneading it to excite contraction, and then pressing downward toward the sacrum. **C.'s Ointment**, a soluble silver ointment made from colloidal silver, applied by inunctions in septicemia and pyemia. Dose $\frac{1}{2}$ dr. (2-4 Gm.), repeated every 12 hours until abatement of symptoms.

Creek Dots. Small shining dots, of unknown nature and often hereditary, occurring at times in the retina anterior to the retinal vessels; they were so named by Marcus Gunn, who first described them.

Cremaster (*kre-mas'-ter*) [*speiōm*, to support]. The muscle that draws up the testis. See under *Muscle*.

Cremasteric (*kre-mas-ter'-ik*) [*cremaster*]. Pertaining to the cremaster muscle. **C. Reflex**. See under *Reflex*.

Cremation (*kre-ma'-shun*) [*cremare*, to burn]. The destruction of the dead body by burning, as distinguished from interment.

Cremnophobia (*kre-m-no-fō'-be-ah*) [*κρημνός*, a crag, *φόβος*, fear]. Morbid fear of precipices.

Cremometer (*kre-m-om'-et-er*) [*cream*; *μετρου*, a measure]. A graduated tube for determining the percentage of cream in milk.

Cremor (*kre'-mor*) [L., "broth"]. Cream. Any thick substance formed on the surface of a liquid. **C. tartari**, cream of tartar.

Crenation (*kre-na'-shun*) [*crena*, a notch]. A notched or mulberry-like appearance of the red corpuscles of the blood. It is seen when

they are exposed to the air or strong saline solutions.

Crenothrix (*kre'n-oth-riks*) [*κρηνη*, a spring; *ὄψις*, hair]. A genus of *Schizomyces* the filaments of which are enveloped in a gelatinous sheath.

Creoform (*kre'-o-form*). A solid, tasteless antiseptic consisting of guaiacol, creasote, and formaldehyd.

Creolalbin (*kre-ol-al'-bin*). See *Crenalbin*.

Creolin (*kre'-o-lin*) [*κρηνη*, flesh; *oleum*, oil]. A coal-tar product deprived of phenol; it is an antiseptic, used especially as a douche in obstetric practice. It has also been used in a solution of 5 : 1000 for irrigation of the bowel in dysentery and enterocolitis.

Creosal (*kre'-o-sal*). A dark-brown, hygroscopic powder, with odor and taste of creasote, obtained by heating beechwood creasote with tannic acid and phosphorous oxychlorid. It is an antiseptic and astringent, and is used in bronchial inflammations. Dose 15-135 gr. (1-9 Gm.) daily. Syn., *Tannosal*.

Creosin (*kre'-o-sin*). A compound of creasote, iodine, calcium hypophosphite, and balsam of peru; it is used like creasote.

Creosoform (*kre'-o-so-form*). A combination of creasote and formaldehyd, occurring as a greenish powder.

Creosolid (*kre'-o-sol'-id*). See *Creasote-magnesia*.

Creosomagnesol (*kre'-o-so-mag'-ne-sol*). A dry mixture of potassium hydroxid, creasote, and magnesia; antiseptic. Dose 2 gr. (0.13 Gm.) in pill with honey.

Creosotal (*kre'-o-so-tal*). See *Creasote Carbonate*.

Creosote, Creosotum (*kre'-o-sōt*, *kre'-o-sōt'-tum*). See *Creasote*.

Crepitant (*kreep'-it-ant*) [*crepitare*, to crackle]. Possessing the character of crepitation. **C. Rale**. See under *Rale*.

Crepitation, Crepitus (*kreep'-it-a'-shun*, *kreep'-it-us*) [*crepitare*]. 1. The grating of fractured bones. 2. The crackling of the joints. 3. The noise produced by pressure upon tissues containing an abnormal amount of air or gas, as in cellular emphysema. 4. The sound heard at the end of inspiration in the first stage of croupous pneumonia. It closely resembles the sound produced by rubbing the hair between the fingers held close to the ear. **Crepitus indur**, a crepitant rale heard in pneumonia at the beginning of hepatization. **Crepitus redux**, a crepitant rale heard in pneumonia during the stage of resolution; usually the first manifestation of the recession of the disease. **C.**, *Silken*, a sensation such as is produced when two surfaces of silk are rubbed together, felt by the hand when manipulating a joint affected with hydrarthrosis.

Crepitus. See *Crepitation*.

Cresalol (*kes'-al-ol*) [*cresol*; *salol*]. Cresol salicylate, an intestinal antiseptic.

Cresamin (*kes'-am-in*). An antiseptic and germicide mixture of ethylenediamine and tricresol.

Cresaprol (*kes-ap'-rol*). See *Cresin*.

Crescent (*kres'-ent*) [*crescere*, to grow]. 1. Sickle-shaped, or shaped like the new moon. 2. A form of *Plasmodium malariae*, one of the crescentic, nonflagellate, refractive, pigmented bodies seen in the blood of persons suffering from protracted forms of malarial poisoning; i. e., after the second week in estivoautumnal fever, in malarial remittent fever, and in the cachectic victims of chronic malaria. **C.s of Gianuzzi**, groups of deeply staining cells in the acinus of a gland, pushed to one side by the secreting cells, and probably representing exhausted cells. **C., Myopic**. See *Myopic Crescent*. **C.-sphere**, Lambertin's term for that phase of development of the malarial parasite when it becomes sausage-shaped or crescent-shaped. It constitutes a sexual phase of the parasite and is destined to be swallowed by *Anopheles* and to carry on the further life-history of the parasite. **C.s of the Spinal Cord**, the lateral gray bands of the spinal cord as seen in horizontal section.

Cresin (*kres'-in*). A mixture of cresol, 25%, and sodium cresoylacetate, a brown, clear fluid, said to be less poisonous than phenol. It is used in 0.5 to 1% solution as a wound antiseptic. Syn., *Cresaprol*.

Cresol (*kres'-ol*) [*aphos*, flesh, *oleum*, oil], C_6H_3O . Cresylic acid; a body obtained from the distillation of coal-tar. It is a colorless, caustic liquid, with properties similar to those of phenol, but is superior as an antiseptic. Syn., *Paramethyl phenol*. **C.-anitrol**, a compound of anitol and cresol, used as a bactericide. **C. Iodid**. See *Losophon*. **C.-naphthol**, a brown, viscous, tar-like liquid, insoluble in water; it is used as a germicide. **C. Salicylate**, **C.-salol**. See *Cresalol*. **C., Solution of, Compound** (*liquor cresolis composuit*, U. S. P.). See under *Solution*.

Crest (*krest*) [*crista*, a crest]. A ridge or linear prominence, especially of bone. See *Crista*. **C., Deltoid**, a ridge on the humerus at the attachment of the deltoid muscle. **C., Ethmoid**. 1. A transverse ridge on the inner aspect of the nasal process of the superior maxilla. 2. The turbinate crest. **C., Frontal**, a ridge along the middle line of the internal surface of the frontal bone. **C. of Ilium**, the thickened and expanded upper border of the ilium. **C., Incisor** (of Henle), the forward prolongation of the nasal crest, terminating in the anterior nasal spine; the cartilage of the nasal septum rests upon it. Syn., *Crista incisiva*. **C., Infratemporal**, one on the outer aspect of the great wing of the sphenoid and separating the part of the bone which partly forms the temporal fossa from that which aids in forming the zygomatic fossa. **C., Lacrimal**, a vertical ridge dividing the external surface of the lacrimal bone into two parts. **C., Lambdoid**. See *C., Occipital*. **C., Nasal**, a crest on the internal border of the nasal bone and forming part of the septum of the nose. **C., Ob-turator**, a bony ridge running from the spine

of the os pubis to the anterior end of the cotyloid notch. **C., Occipital**, a vertical ridge on the external surface of the occipital bone, extending from the occipital prominence to the foramen magnum. **C. of Pubes**, a crest extending from the spine to the inner extremity of the pubes. **C., Sacral**, **C. of Sacrum**, a series of eminences forming a longitudinal ridge on the middle line of the posterior surface of the sacrum. **C., Sphenoid**, a thin ridge of bone in the median line of the anterior surface of the body of the sphenoid bone. **C., Sphenomaxillary**, an arched crest formed in part by the anterior surface of the great wing of the sphenoid and in part by the pterygoid process forming the border of the sphenomaxillary fissure. **C., Supramastoid**, a bony ridge above the external auditory meatus. **C. of Tibia**, the prominent border or ridge on the front of the tibia; the shin. **C., Turbinate**, a prominent horizontal ridge on the internal surface of the palate bone. **C., Zygomatic**, the anterior border of the great wing of the sphenoid, it articulates with the malar bone and separates the orbital from the temporal surface.

Cresyl (*kres'-il*), C_6H_5 . The radicle of cresol. **C. Alcohol**, $C_6H_4(OH)CH_3$, formed from phenyl alcohol by the substitution of a molecule of methyl for an atom of the hydrogen of the phenyl. **C. Hydrate**. See *C. Alcohol*.

Cresylate (*kres'-il-ate*). Any compound of cresol with a metallic radicle.

Creta (*kre'-tah*) [L.] Chalk. Native calcium carbonate. **Cretæ, Mistura** (U. S. P.), consists of compound chalk powder, 20, cinnamon-water, 40; water, 30. It is used in diarrhea. Dose $\frac{1}{2}$ or (15 Cc) **C. preparata** (U. S. P.), prepared chalk; chalk freed from impurities by washing. Dose $\frac{1}{2}$ to 20 gr. (0.32-1.3 Gm.). **Cretæ, Pulvis, Aromaticus** (B. P.). Dose 10 gr. 1 dr. (0.65-4.0 Gm.). **Cretæ, Pulvis, Compositus** (U. S. P.), compound chalk powder, consists of prepared chalk, 30, acacia in powder, 20; sugar, 50. Dose 5 gr.-1 dr. (0.32-4.0 Gm.). **Cretæ, Trochiscæ**, each contains prepared chalk, 4 gr.; acacia, 1 gr.; sugar, 6 gr.; with a little nutmeg.

Cretaceous (*kre-ta'-she-us*) [*creta*]. 1. Chalky. 2. Chalky-white in color.

Cretin (*kre'-tin*) [Fr., *cretin*, a simple-minded person]. A person affected with cretinism.

Cretinism (*kre'-tin-izm*) [*cretin*]. A congenital disease, characterized by absence of the thyroid gland, diminutiveness of size, thickness of neck, shortness of arms and legs, prominence of abdomen, large size of face, thickness of lips, large and protruding tongue, and imbecility or idioty. It occurs endemically in the goitrous districts of Switzerland, and sporadically in other parts of Europe and in America. Lack of the secretion of the thyroid gland seems to be the cause. **C., Acquired**, **C., Adult**. Synonym of *Myxedema*.

Cretinoid (*kre'-tin-oid*) [*cretin*]. 1. Resembling a cretin, resembling cretinism. 2. A person who resembles a cretin. **C. State**, the morbid state presented by a sufferer from cretinism, cretinism.

Cribration (*krih'-ra'-shun*) [*cribrum*]. 1. The state of being cribriform or perforate. 2. The act of sifting.

Cribriform (*krih'-re-form*) [*cribrum*]. Perforated like a sieve, as the *cribriform* plate of the ethmoid bone.

Cribrum (*krih'-rum*) [L.; pl. *cribra*]. A sieve. **C. benedictum**, a perforate septum, supposed by the ancients to separate two hypothetic cavities of the kidneys, by which the blood in the upper one was strained and freed from impurities. **Cibra orbitalia**, inconstant porosities behind the edge of the orbit on the inferior surface of the orbital plate of the frontal bone; they may be culdesacs or, when developed more fully, may communicate.

Crichton Browne's Sign. See *Browne's Sign*.

Crico- (*kri'-ko-*) [*κρικός*, a ring]. A prefix denoting connection with the cricoid cartilage.

Cricoarthyrenoid (*kri'-ko-ar-i'-te-noid*) [*crico-*; *arthyrenoid*]. Pertaining to the cricoid and arthyrenoid cartilages.

Cricohyoid, **Cricohyoideus** (*kri'-ko-hi'-oid*, *kri'-ko-hi'-oid'-e-us*). Relating to the cricoid cartilage and the hyoid bone.

Cricoid (*kri'-koid*) [*crico-*; *εἶδος*, form]. Ring-shaped. **C. Cartilage**, the ring-shaped cartilage of the larynx.

Cricoidectomy (*kri'-koid-ek'-to-me*) [*cricoid*; *εκτομὴ*, to cut out]. The excision of the cricoid cartilage.

Cricothyroid (*kri'-ko-thi'-roid*) [*crico-*; *thyroid*]. Pertaining to the cricoid and thyroid cartilages. **C. Artery**, a small branch of the superior thyroid, crossing the cricothyroid membrane. **C. Membrane**, a ligamentous membrane that lies between the cricoid and thyroid cartilages. **C. Muscle**. See *under Muscle*.

Cricothyrotomy (*kri'-ko-thi-rot'-o-me*). Cricotomy with division of the cricothyroid membrane.

Cricotomy (*kri kot'-o-me*) [*crico-*; *τομή*, to cut]. Surgical laryngotomy by cutting through the cricoid cartilage.

Cricotracheal, **Cricotrachealis** (*kri'-ko-tra'-ke-ol*, *-tra-ke-ol'-is*). Relating to the cricoid cartilage and to the trachea.

Cricotracheotomy (*kri'-ko-tra-ke-ol'-o-me*) [*crico-*; *tracheotomy*]. Tracheotomy through the cricoid cartilage.

Crinate, **Crinated** (*krin'-ät*, *krin-a'-ted*) [*crinis*, a hair]. Bearded with long hairs or hair-like processes; crinite.

Criniform (*krin'-e-form*) [*crinis*, a hair; *forma*, form]. Filiform; resembling horsehairs.

Crinose (*krin'-ös*). Hairy.

Crinosity (*krin-ös'-ite-e*). Hairiness.

Crisis (*kri'-sis*) [*κρίσις*, a decisive point]. 1. A turning-point, as that of a disease or fever;

especially, the sudden favorable termination of the acute symptoms of an infectious disease. 2. Paroxysmal disturbance of function accompanied with pain. **C., Bronchial**, a paroxysm of dyspnea sometimes occurring in tabes. **C., Cardiac**, a paroxysm of cardiac distress or disordered action. **Crises**, **Dietl's**, paroxysms of gastric distress occurring in nephropthisis. **C., Doctrine of**, the theory that the gradual climax of morbid phenomena was announcement of the completion of the union of morbid material—which could then be evacuated by the sweat, urine, or stools—spontaneously or by the administration of diuretics, purgatives, etc. **C., Enteralgic**, a paroxysm of pain in the lower part of the abdomen occurring in tabes. **Crises**, **Gastric**, attacks of intense, paroxysmal pain in the abdomen, often attended with vomiting. They occur in locomotor ataxia. **C., Hematic**, **C., Hemic**, the crisis in a fever marked by increase in the number of blood-plates. **C., Nephralgic**, **C., Nephritic**, a ureteral paroxysm of pain observed in tabes. **C., Rectal**, paroxysmal rectalgia occurring in tabes dorsalis and in diabetes. **C., Tabetic**, paroxysmal pain occurring in the course of tabes dorsalis.

Crismer's Test for Glucose. An alkaline solution of glucose when heated to boiling with a solution of 1 part safranin in 1000 parts water decolorizes the safranin solution or renders it pale yellow. It is not decolorized when heated with uric acid, creatinin, or creatin in an alkaline solution.

Crispation (*kris-pa'-shun*) [*crispare*, to curl]. 1. See *Crispatura*. 2. A slight involuntary quivering of the muscles.

Crispatura (*kris-pah-tu'-rah*) [L.]. A puckering; a contracture. **C. tendinum**, Dupuytren's contraction.

Crista (*kris'-tah*) [L.]. Crest. **C. acustica**, a yellow elevation projecting into the equator of the ampulla of the ear. **C. ampullaris**. See *C. acustica*. **C. basilaris**. See *Pharyngeal Tubercle*. **C. buccinatoria**, a ridge giving origin to the fibers of the buccinator muscle, found in the groove on the anterior surface of the coronoid process of the lower jaw. **C. capituli**, one on the head of a rib dividing its articular surface into two parts. **C. colli inferior**, one on the lower aspect of the neck of a rib. **C. colli superior**, one on the upper aspect of the neck of a rib. **C. galli**, cock's-crest, the superior triangular process of the ethmoid bone. **C. illi**, the crest of the ilium. **C. vestibuli**, an almost vertical bony ridge on the inferior and median walls of the vestibule of the ear, separating the fovea hemielliptica from the fovea hemispherica. Syn., *Pyramis vestibuli*.

Cristallin (*kris'-tal-in*). A kind of collodion, in which the ether and alcohol employed as solvents for pyroxilin are replaced by methyl-alcohol. It does not dry so readily as ordinary collodion. Syn., *Crystallin*.

Cristate (*kris'-tät*). Crested.

Crith (*krith*) [*apth*, barley-corn]. The assumed unit of mass for gases. It is the weight of one liter of hydrogen, which is 0.0896 of a gram, or 1.37 grains.

Critical (*krit'-ik-ul*) [*aplog*, a decisive point]. Pertaining to a crisis.

Crocated (*kro'-ka-ted*) [see *Crocus*]. Containing saffron.

Croceous (*kro'-se-us*). Saffron-colored; containing saffron.

Crocidism, Crocidismus, Crocidixis (*kro'-sid-izm, kro-sid-iz'-mus, -iks'-is*). See *Carphology*.

Croconic (*kro-kon'-ik*). Saffron-colored.

Crocus (*kro'-kus*) [*apdanc*, *crocus*; saffron]. Saffron. The stigmas of the flowers of *C. sativus*. It is an aromatic stimulant, emmenagogue, and antispasmodic. Dose of the tincture (10% in strength) 1-2 dr. (4-8 Cc.); of the drug 5-20 gr. (0.32-1.3 Gm.) in infusion.

Crookes' Tube. A highly exhausted vacuum-tube used in producing roentgen-rays.

Cross-birth. Shoulder-presentation or other presentation requiring version.

Crossed (*kross*) [*cross*, a cross]. Having the shape of a cross. Affecting alternate sides of the body. **C. Anesthesia**. See *Anesthesia*. **C. Hemiplegia**. **C. Paralysis**. See *Paralysis*. **C. Reflexes**, reflex movements on one side of the body, excited by stimulation of a part on the opposite side.

Cross-eye. See *Strabismus*.

Cross-legged Progression. A method of walking in which one foot gets over or in front of the other.

Crotchet (*kroch'-et*) [ME., *crochet*, a little hook]. A hook used in extracting the fetus after craniotomy.

Croton (*kro'-tin*). A mixture of toxic albuminoids contained in croton seeds. It is a yellowish powder containing about 21% of ashes, soluble in water and in a 10% solution of sodium chloride; it is a protoplasmic poison.

Croton (*kro'-ton*) [*apdanc*, a tick]. A great genus of euphorbiaceous plants. *C. eleuteria* yields crotonilla, *C. tiglium* yields croton oil. **C. Aldehyd**, (C_4H_6O), a compound obtained by the condensation of acetaldehyd when heated with HCl, with water and zinc chloride. **C. chloral**. See *Chloral*, *Butyl*. **C. Oil** (*oleum tigli*, L. S. P.), a fixed oil expressed from the seeds of *C. tiglium*. See under *Tiglium*.

Crotonism (*kro'-ton-izm*). Poisoning by croton oil, a condition marked by hemorrhagic gastroenteritis.

Crounotherapy (*kru-no-ther'-ap-e*) [*apov*, a spring, *therapy*]. Russian's term for the employment of mineral waters for drinking-cures.

Croup (*kroop*) [A., *kropin*, to cry aloud]. A disease of the larynx and trachea of children, prominent symptoms of which are a harsh, "croupy" cough and difficulty in breathing; it is often accompanied by the development

of a membranous deposit or exudate upon the parts. It is usually caused by the diphtheria bacillus, sometimes by other microorganisms. Syn., *Membranous croup*, *Pseudomembranous croup*. True croup, **C. Artificial**, traumatic membranous laryngitis. **C. Bronchial**. See *Bronchitis*. **Croupous C.**, **Catarrhal**, a simple noncontagious inflammation of the larynx accompanied by the formation of membrane. **C. Diphtheric**, laryngeal diphtheria. **C. False**, a spasm of the muscles of the larynx with a slight inflammation. **C. Intestinal**. See *Croup Mucous*. **C.-kettle**, a small boiler heated by a lamp and contained within a metal cylinder. The boiler is furnished with an inhaling tube, and water or any medicament may be placed within it and the escaping steam inhaled. **C. Spasmodic**. See *C. False*.

Croupine (*kroop'-in*). Laryngismus stridulus.

Crowd-poison (*krowd'-po-ison*). Volatile organic matter recognizable in the air of ill ventilated places where many persons are congregated.

Crown (*krown*). See *Comma*. **C. of a Tooth**, the exposed part of the tooth above the gums.

Crucial (*kru'-shal*) [*crux*, a cross]. Resembling or pertaining to a cross, as a *crucial* motion.

Cruciform (*kru'-se-form*) [*crux*, *forma*, form]. Crucial, shaped like a cross.

Crudivorous (*kru-div'-or-us*) [*crudus*, raw, *vorare*, to devour]. Applied to scavages subsisting entirely upon uncooked food.

Cruentous (*kru-en'-tus*) [*crurus*]. Bloody.

Cruenturesis (*kru-en-tur'-is*) [*cruentus*, bloody, *urine*, urine]. Hematuria.

Cruor (*kru'-or*) [L., "blood"]. Blood, especially coagulated blood.

Crura (*kru'-ra*) [pl. of *crus*]. See *Crus*. **C. anethelics**, **C. bifurcata**, two ridges on the inner aspect of the external ear converging at the anethelics. Syn., *Ridges anethelics*. **C. of the Fornix**. See *Fornix*. **Anterior and Posterior, of the Fornix**. **C. of the Penis**, the corpora cavernosa.

Cruræus (*kru'-re-us*) [L.]. See *Vastus internus* under *Muscle*.

Crural (*kru'-ral*) [*crura*]. Pertaining to the thigh. **C. Arch**. See *Esquimaux*. **Crural C. Hernia**, femoral hernia. **C. Ring**, the femoral ring, the upper opening of the femoral canal, bounded in front by Poirart's ligament and the deep crural arch behind by the pubis, internally by Gimbernat's ligament, externally by a fibrous band separating it from the femoral vein. **C. Septum**. See *Septum crurale*.

Cruritis (*kru-rī'-tis*). See *Phlegmaria albedula*.

Crurogenital (*kru-en-jeu'-stid-je-nal*, *cruro-genital*, relating to generation). Relating to the thighs and the genitalia.

Cruroinguinal (*kru-ro-in'-je-nal*). Relating to the thigh and the groin.

Crus (*kruus*) [L.; pl., *crura* (q. v.)]. A leg, limb, or support. **C. cerebelli**, any one of the cerebellar peduncles. **C. cerebri**, either of the two peduncles connecting the cerebrum with the pons. **C. of the Diaphragm**, either of the two fibromuscular bands arising in front of the vertebrae and inserted into the central tendon of the diaphragm.

Crusocreatinin (*kru-so-kre-at'-in-in*), $C_8H_8N_4O$. A leukoamin isolated from muscle tissue.

Crust (*kruust*) [*crusta*]. A covering, especially a dried exudate on the skin.

Crusta (*kruus' tah*) [L., "a crust"]. 1. See *Crust*.

2. The inferior portion of the crus cerebri. **C. lamellosa**, psoriasis. **C. osteoides** (*radicis*), **C. petrosa**, a thin layer of bone covering the fang of a tooth. **C. phlogistica**, the yellowish layer of the upper stratum of a blood clot, coagulating slowly.

Crutch (*krutch*) [ME., *crutche*]. A staff with a concave cross piece fitting under the armpit, and often with a grip for the hands midway on the staff, used as a support in walking. **C. Paralysis**, paralysis of an upper extremity due to the pressure of the crutch-head upon the nerves of the axilla, especially the musculospiral nerve. **C., Perineal**, a support or brace of various forms by means of which the leg of a patient in the lithotomy position may be adjusted or held at any height or angle.

Cruveilhier's Atrophy. Progressive muscular atrophy. **C.'s Fascia**, the superficial layer of the perineal fascia. **C.'s Plexus**. 1. A plexus of the posterior cervical region which is derived from the great occipital nerve and the first and second cervical nerves. 2. The plexus of varicose veins in a variety of angioma. **C.'s Ulcer**, simple ulcer of the stomach.

Cryalgnesia (*kri-al-je'-ze-ah*) [*κρυός*, cold; *ἀλγία*, pain]. Pain from the application of cold.

Cryotherapy (*kri-mo-ther'-ap-e*) [*κρυός*, icy cold; *θεραπεία*, therapy]. Ribard's term for the therapeutic use of great cold applied locally. A bag filled with carbonic snow at a temperature of -176° F. is applied daily for half an hour to the pit of the stomach. It is previously surrounded by cotton to prevent injury to the skin.

Cryogenin (*kri-ij'-en-in*). Metabenzamino-sulfoncarbrazid. It is given in treatment of tuberculosis for diminishing the fever, being innocuous and effective.

Cryoscopy (*kri-oi'-ko-pe*) [*κρυός*, cold; *σκοπεῖν*, to examine]. The process whereby the freezing-point of certain liquids, blood, urine, etc., may be compared with that of distilled water.

Cryostase (*kri'-as-tās*). A compound of equal parts of phenol, camphor, saponin, and traces of oil of turpentine. It solidifies when heated, and becomes liquid when cooled to below 0° C. Recommended as an antiseptic.

Crypt (*kript*) [*κρυπτός*, hidden]. A small sac or follicle. **C.s of Lieberkühn**, minute tubular glands in the mucosa of the large

and small intestine. **C.s, Multilocular**. 1. Sharpey's name for simple glands with pouched or sacculated walls. 2. The lobules of a racemose gland. **C.s, Sebaceous**, the sebaceous glands. **C., Synovial**. See *Bursa mucosa*. **C.s, Synoviparous**, extensions of the synovial membranes sometimes perforating the capsule of the joints and occasionally becoming shut off from the main sac. **C.s of the Tongue**, small pits in the mucosa of the tongue with walls studded with globular projections, each of which contains a vascular loop and is furnished with lymph-follicles.

Crypto- (*krip-to-*) [*κρυπτός*]. A prefix meaning relating to a crypt, or a small sac or follicle.

Cryptobiotic (*krip-to-bi-oi'-ik*) [*crypto-*; *βίος*, life]. Having dormant life; applied formerly to calculi, crystals, or any inanimate objects which increase in size. Syn., *Lithobiotic*.

Cryptocephalus (*krip-to-sel'-al-us*) [*crypto-*; *κεφαλή*, head]. A fetal monster with an imperfectly formed and concealed head.

Cryptococcus (*krip-to-kok'-us*). See under *Bacteria*.

Cryptogam (*krip'-to-gam*) [*crypto-*; *γάμος*, marriage]. In biology, one of the *Cryptogamia*, a division of the vegetable kingdom comprising all plants with concealed sexual organs, without pistils or stamens.

Cryptogenic (*krip-to-jen'-ik*) [*crypto-*; *γενᾶν*, to produce]. 1. Obscure as to origin. 2. Parasitic from the outset within another living organism.

Cryptolithiasis (*krip-to-lith-i'-o-sis*) [*crypto-*; *lithiasis*]. The calcification and ossification of tumors of the skin and subcutaneous tissue.

Cryptomerorrachischisis (*krip-to-mer-o-rak-is'-kis-is*) [*crypto-*; *μέρος*, a part. *ρίχαις*, the spine; *σχίζειν*, to cleave]. Spina bifida occulta, a variety with bony deficiency but without a tumor.

Cryptophthalmos (*krip-to-'thal'-mos*) [*crypto-*; *ὀφθαλμός*, the eye]. 1. Congenital union of the eyelids, usually over imperfect eyes. 2. A person who has congenital union of the eyelids.

Cryptopin (*krip'-to-pin*) [*crypto-*; *ὄπιον*, opium]. $C_{21}H_{23}NO_3$. One of the alkaloids of opium, colorless and odorless. It is said to be anodyne and hypnotic, but it is less safe than morphin. Dose $\frac{1}{4}$ gr. (0.008 Gm.).

Cryptoporous (*krip-top'-o-us*) [*crypto-*; *πόρος*, a pore]. Having hidden or obscure pores.

Cryptorchid, **Cryptorchis** (*krip-tor'-kid, -kis*) [*crypto-*; *ὄρχις*, testicle]. A person with retained testicles, i. e., not descended into the scrotum.

Cryptorchidism (*krip-tor'-kid-izm*) [see *Cryptorchid*]. Retention of the testes in the abdomen or inguinal canal.

Crystal (*kris'-tal*) [*κρυστάλλος*, clear ice]. In chemistry, a substance that assumes a definite geometric form. **C.s, Bizzozero's**. See *C.s, Charcot's*. **C.s, Boettcher's**. See *C.s, Spermin*. **C.s, Charcot's**, **C.s, Charcot-Leyden's**, octahedral or hexahedral crystals found in the sputum of asthma and fibrinous bronchitis and in other forms of sputum.

in the blood in leukemia, in the intestine in infection with parasites, and in nasal polyps; they are stained yellow with iodine. **C.s.**, **Charcot-Neumann's**, **C.s.**, **Charcot-Robin's**. See **C.s.**, **Charcot's**. **C.s.**, **Coffin-lid**, crystals of triple phosphate found in the urine in dyspepsia and cystitis. **C.s.**, **Ear**. See **Otolith**. **C.s.**, **Florence's**, brown crystals in the shape of needles or plates obtained by treating semen with a strong solution of iodine and potassium iodide (Florence's reaction); they are also formed in the secretions of the prostate, uterus, vagina, etc. **C.-gazing**, gazing into the depths of a crystal globe or the surface of a clear vessel of water in order to produce self-hypnotism or autosuggestion with a view to obtaining so-called telepathic impressions. **C.s.**, **Hedgehog**. See **Hedgehog Crystals**. **C.s.**, **Hemin**. See **Hemin Crystals**. **C.s.**, **Knife-rest**, peculiar indented crystals of triple phosphate occasionally found in urine. **C.s.**, **Lead-chamber**, those found in the lead-chambers in which sulfuric acid is manufactured, and having the composition $\text{HSO}_4(\text{NO}_2)$. **C.s.**, **Leyden's**. See **C.s.**, **Charcot's**. **C.s.**, **Lubarsch's**, minute crystals found postmortem in the epithelial cells of the testis, and regarded as distinct from Böttcher's and Charcot's crystals. **C.s.**, **Neumann's**. Same as **C.s.**, **Charcot's**. **C.s.**, **Schweiner's**. See **C.s.**, **Charcot's**. **C.s.**, **Spermin**, a combination of phosphoric acid with a base, spermin ($\text{C}_4\text{H}_8\text{N}_2$), forming long, monoclinic, prism-like crystals with curved edges, found in spermatic fluid after drying it or allowing it to stand and in desiccated white of egg. A strong solution of iodine and potassium iodide stains them a deep brown or violet. Syn., **Böttcher's crystals**. **C.s.**, **Teichmann's**. See **Hemin Crystals**. **C.s.**, **Venus**, copper sulfate crystals. **C.s.**, **Virchow's**, bright yellow or orange-colored crystals of hematin sometimes found in extravasated blood. **C.s.**, **Zenker's**. See **C.s.**, **Charcot's**.

Crystallin (*kris'tal-in*) [*crystal*]. 1. The globulin of the crystalline lens. 2. See **Cristallin**.

Crystalline (*kris'tal-en* or *-in*) [*crystal*]. Like a crystal. **C. Lens**. See **Lens**, **Crystalline**.

Crystallization (*kris'tal-iz-a'shun*) [*crystal*]. The process by which the molecules of a substance arrange themselves in geometric forms when passing from a gaseous or a liquid to a solid state. **C.**, **Alcohol of**, an alcohol uniting molecule by molecule with a crystalline substance and aiding in the preservation of the crystalline form of the latter. **C.**, **Water of**, the water of salts that cannot be extracted without destruction of their crystalline nature.

Crystallographic Test for Blood. The use of sodium iodide as a reagent forming characteristic blood-crystals. Its use depends on the formation of iodine-hematin.

Crystallose (*kris'tal-oz*). Sodium saccharinate.

Crystalluridrosis (*kris'-tal-u-rid-ro'-sis*) [*crystal*; *obrov*, urine; *idrov*, sweat]. A condition marked by excretion of urinary elements in the sweat which crystallize on the skin.

Cubeb, **Cubeba** (*ku'deb*, *ku-be'-bah*) [*Peru*, *kubaba*, cubeb]. The name fruit of *Piper cubeba*, cultivated in Java. Its properties are due to a volatile oil, $\text{C}_{10}\text{H}_{18}$, and an organic acid. It is an aromatic stimulant, active in small doses, and is useful in affections of the bladder and urethra. It is also employed in catarrh of the air-passages, etc. Dose 10 gr-2 dr. (5 to 80 grains). **C.**, **Fluidextract of** (*fluidextractum cubeba*, U. S. P.), alcoholic. Dose 5-30 min. (15-120 grains). **C.**, **Oil of** (*oleum cubeba*, U. S. P.), the volatile oil. Dose 5-20 min. (15-120 grains). **C.**, **Oleoresin of** (*oleoresina cubeba*, U. S. P.), ethereal. Dose 5-30 min. (15-120 grains). **C.**, **Tincture of**, 10% in strength. Dose 10 min-4 dr. (15-65-120 grains). **C.**, **Troches of** (*trochisci cubeba*, U. S. P.), oleoresin, 4 gr.; oil of cassia, 4 gr.; extract of licorice, 4 gr.; acacia, 2 gr.; syrup of tolu q. s., in each troche. Dose 1-3.

Cubebic Acid (*ku-beb'-ik*). See **Acid**, **Cubebic**.

Cubebin (*ku-beb-in*) [*cubeb*], $\text{C}_{10}\text{H}_{18}\text{O}_2$. An odorless, crystalline substance obtained from cubeb.

Cubebism (*ku-beb-izm*). Poisoning by cubeb; it is marked by acute gastric enteritis.

Cubiform (*ku-be'-form*). Cuboid.

Cubit (*ku'-bit*) [*cubitus*]. 1. The forearm-cubitus. 2. The ulna. 3. The elbow.

Cubitodigital (*ku-bit-o-dij'-i-tal*). Relating to the forearm or the ulna and to the fingers.

Cubitometacarpal (*ku-bit-o-met-a-kar'-pal*). Relating to the forearm or the ulna and to the metacarpus.

Cubitosupraphalangeal (*ku-bit-o-su-pah'-al-an'-je-al*). Relating to the forearm or the ulna and the bases of the phalanges.

Cubitus (*ku'-bi-tus*) [*Lu*, "the elbow"]. The forearm. **C. valgus**, a deformity consisting of an abnormal curvature of the humerus at the diaphysis. **C. varus**. See **Goniodyspharmia**.

Cubocuneiform (*ku-bu-ku-ne'-i-form*). Relating to the cuboid bone and to one or more of the cuneiform bones.

Cuboid (*ku'-boid*) [*kylog*, cube, *oidos*, like]. Resembling a cube. **C. Bone**, a bone of the foot situated at the outer anterior part of the tarsus.

Cuca (*ku'-kah*). See **Erythroxylon**.

Cucumis (*ku'-ku-mis*) [*Lu*, "a cucumber"]. A genus of plants. See **Cucurbitaceae**. *C. melo*, muskmelon, is a species indigenous to the old-world tropics and widely cultivated. The root is emetic and diuretic, and contains melonemurin. The juice of the leaf of *C. sativus*, cucumber, is purgative, laxative, and resolvent. It is used in skin diseases and as a cosmetic.

Cucurbita (*ku'-kurb'-itah*) [*Lu*, "a gourd"]. A genus of plants of the order **Cucurbitales**.

C. foetidissima is a species of North America; the leaf, root, and seeds are edible and the bitter fruit is recommended in the treatment of hemorrhoids. The ripe seed of *C. pepo*, the pumpkin, is the *pepo* of the U. S. P., an anthelmintic. See *Pepo*.

Cuirass (*kuir'-ras*) [Fr.]. A close-fitting or immovable bandage for the front of the chest. **C. Cancer.** See *Cancer en cuirasse*. **C., Tabetic**, an anesthetic area encircling the chest in tabetic patients.

Culdesac (*kul'-de-sak*) [Fr.]. A closed or "blind" pouch or sac. **C., Douglas'**, a pouch between the anterior wall of the rectum and the posterior wall of the uterus, formed by the reflection of the peritoneum.

Culex (*ku'-leks*) [L., "a gnat"]. A mosquito. **C. fasciatus.** See *Stegomyia fasciata*.

Culicide (*ku'-lis-id*) [*culex*; *cadere*, to kill]. Any agent which destroys mosquitos.

Culicifuge (*ku'-lis' i'-fuj*) [*culex*; *fugare*, to drive away]. An agent to drive away mosquitos.

Culmen (*ku'-men*) [L., "summit"]. A part of the cerebellum on the cephalic side of the vermis.

Culture (*kul'-chur*) [*colere*, to till]. The growth of microorganisms on artificial mediums. The art of cultivating microorganisms on artificial mediums. **C., Fractional.** See *C., Pure*. **C., Hanging-drop**, a culture in which the microorganism is inoculated into a drop of fluid on a cover-glass and the latter is inverted over a glass slide having a central concavity. **C.-medium**, a substance used for cultivating bacteria. Culture-mediums are either liquid or solid, bouillon and milk being the important liquid mediums, and gelatin, agar, blood serum, and potato, the principal solid mediums. **C., Needle-**. See *C., Stab-*. **C., Plate-**, a culture of bacteria on a medium spread upon a flat plate or in a double dish. **C., Pure**, a culture of a single microorganism. **C., Stab-**, one in which the medium is inoculated by means of a needle bearing the microorganisms, and which is inserted deep down into the medium.

Cumarin (*ku'-mar-in*). See *Coumarin*.

Cumene (*ku'-men*) [*cumin*], C_6H_8 . A compound made by distilling cumic acid with lime.

Cumic (*ku'-mik*) [*cumin*]. Derived from or pertaining to cumin. **C. Acid.** See *Acid, Cumic*.

Cumin (*ku'-min*) [*cuminum*, *cumin*]. An umbelliferous plant, *Cuminum cyminum*, native in Egypt and Syria. The fruit possesses well-marked stimulating and carminative properties. Its active principle is an oil.

Cuminic (*ku'-min'-ik*). See *Cumic*.

Cumol (*ku' mol*). See *Cumene*.

Cumulative (*ku'-mu-la-tiv*) [*cumulare*, to heap up]. Increasing; adding to. **C. Action**, **C. Effect**, the production of a marked and sudden result, after the administration of a considerable number of comparatively ineffective doses.

Cundurango (*kun-du-ran'-go*). See *Condu-rango*.

Cuneal, Cuneate (*ku'-ne-al*, *ku'-ne-at*) [*cuneus*]. See *Cuneiform*.

Cuneiform (*ku'-ne'-i'-form*) [*cuneus*; *forma*, shape]. Wedge-shaped; cuneate. **C. Bones**, three wedge-shaped bones at the anterior part of the tarsus. **C. Column.** See *Column of Burdach*.

Cuneocuboid (*ku'-ne-o-ku'-boid*). See *Cubocuneiform*.

Cuneoscapoid (*ku'-ne-o-ska'-oid*). Relating to the cuneiform bones and to the scapoid bone.

Cuneus (*ku'-ne-us*) [L., "a wedge"]. A wedge-shaped convolution on the median aspect of the occipital lobe. Syn., *Cuneate lobule*; *Internal occipital lobule*; *Lobulus cerebri cuneatus*; *Lobulus cerebri occipitalis (internus)*; *Lobulus cuneatus*; *Lobulus cuneiformis*; *Lobus cuneus*; *Lobus pyriformis*; *Triangular lobule*. **C. cinereus.** See *Ala cinerea*. **C. thalami optici intergenicularis**, that part of the thalamus lying between the external and internal geniculate bodies.

Cuniculus (*ku'-nik'-u-lus*) [L., "a subterranean passage"]. The burrow of the itch-mite. In the plural, *cuniculi*, the semicircular canals of the ear.

Cunisset's Test for Bile-pigments. Addition to the urine of half its volume of chloroform imparts a yellow color to the latter.

Cup (*kup*) [AS., *cuppe*]. 1. To bleed. 2. A cupping-glass. 3. A drinking-vessel or the contents of such a vessel. **C.s, Antimonial**, cups made of antimony which impart emetic properties to the contained liquid. **C., Bitter**, a drinking-cup of quassia wood. **C., Chinese**, a drinking-vessel of red arsenic which imparts cathartic properties to wine left standing in it during the night. **C., Dry-**, a cup for merely drawing the blood to the surface. **C., Favus-**, a depression in a favus-scale surrounding a hair. **C., Glaucomatous**, a deep depression in the optic papilla seen in cases of glaucoma. **C.s, Montgomery's.** See *Montgomery's Cups*. **C., Physiologic**, the normal concavity of the optic papilla. **C., Wet-**, a cup for abstracting blood through incisions in the skin.

Cuphea (*ku'-je-ah*) [*kinpus*, a hump, from the shape of the calyx]. A genus of plants of the order *Lythraceae*. *C. antispythetica*, *C. balsamana*, *C. ingrata*, and *C. microphylla* are employed in decoction in the American tropics in the treatment of syphilis. *C. viscosissima*, a viscid annual of the United States, is a homeopathic remedy used in the treatment of cholera infantum.

Cuphosis (*ku'-jo'-sis*). See *Kyphosis*.

Cupola (*ku'-po-lah*) [L., "a dome"]. The dome-shaped extremity of the canal of the cochlea; also the summit of a solitary gland of the small intestine.

Cupped (*kupd*). Having the upper surface depressed; applied to the conglutium of blood after phlebotomy. **C. Disc**, excavation of the optic papilla, normally present in slight degree, but pathologic if excessive.

Cupping (*ku'ping*) [*cup*]. 1. A method of blood-derivation by means of the application of cupping-glasses to the surface of the body. 2. The formation of a cup-like depression. **C., Dry-**, a form of counter-irritation in which the blood is drawn to the surface by means of a cup. This is used mainly in inflammatory affections of the lung. **C.-glass**, a small bell-shaped glass capable of holding three to four ounces, in which the air is rarefied by heat or by exhaustion, and the glass applied to the skin, either with or without scarification of the latter. **C., Wet-**, the abstraction of blood after scarification.

Cupragol (*ku'pra-gol*). A compound of copper and albumin used in solutions of 1 to 5% as an antiphlogistic and secretory stimulant.

Cupram (*ku'pram*) [*cuprum*]. A solution of copper carbonate in ammonia-water used as a fungicide.

Cuprammonic (*ku'pram-on'ik*). Containing copper and ammonia.

Cuprargol (*ku'pra-argol*). A cupronucleic acid compound, occurring as a gray powder, slowly soluble in water. It is used in the treatment of conjunctivitis by instillation of a 1 to 5% solution once or several times daily; in trachoma used as an astringent in 20% aqueous solution.

Cuprate (*ku'prat*). A double salt containing a cupric compound.

Cupratin (*ku'pra-tin*). A preparation of copper albuminoid, similar to ferratin.

Cuprea Bark (*ku'pre-ah*). The bark of certain species of *Romera*. It affords quinin and the associated alkaloids.

Cuprein (*ku'pre-in*), $C_{18}H_{20}N_2O_2$. An alkaloid derived from cuprea bark.

Cuprene (*ku'pre-n*), C_2H_2 . A nonvolatile insoluble hydrocarbon, a yellow, bulky solid consisting of matted filaments resembling a mass of hair, obtained by passing a current of pure acetylene gas over bright copper filings.

Cuprescent (*ku'pres'ent*). Having the appearance of copper.

Cupressin (*ku'pres'in*). Cypress oil.

Cupriaseptol (*ku'pre-ah-sep'tol*). Copper sulphate.

Cupric (*ku'prik*). Containing copper as a bivalent element. **C. Oxid.** See *Copper Oxid. Red.*

Cuprocitrol (*ku'pro-sit'rol*). A copper and citral derivative used in trachoma in 5 to 10% saline.

Cuprohemol (*ku'pro-he'mol*). A compound of copper and hemol used in tuberculosis. Dose: 1/2 gr. to 1.000 gr. (Gm.).

Cuprol (*ku'pro-l*). See *Copper Nucleinate*.

Cuprosopotassic (*ku'pro-to-pot-as'ik*). Resulting to a combination of cuprous salt and potassium.

Cuprosulfate (*ku'pro-sulf'fat*). A double sulfate containing copper.

Cuprotartrate (*ku'pro-tar'trat*). A combination of copper and tartaric acid.

Cuprous (*ku'prous*). Containing copper as a univalent element. **C. Oxid.** See *Copper Oxid. Red.*

Cuprum (*ku'prum*) [*L.*]. Copper. See *Copper*.

Cupula (*ku'pu-lah*) [*L.*, "a little cup"]. An invisible substance on the crista semina that on the application of fixation fluid coagulates and becomes visible. **C. terminalis**. See *Membrana testacea*.

Cupular, Cupulate (*ku'pu-lar, -lat*). Cup-shaped.

Curacao, Curaçoa (*ku-ra-sa*) [Island of Curacao, north of Venezuela]. A medical or elixir prepared from brandy, and flavored, principally with orange-peel. It is used as a vehicle for certain medicines.

Curage (*ku-rahzh*) [*Fr.*]. 1. Curettage, cleansing of the eye or of an ulcerated or cancerous surface. 2. A term used by some authorities for clearing the uterine cavity by means of the finger, as distinguished from the use of the curet.

Curara, Curare, Curari (*ku-rah'-rah, -er*) [*S. A.*]. Woorara. A vegetable extract obtained from *Poullina curare* and certain members of the *Strychnos* family. It is a powerful paralyzant of the motor nerves and of the voluntary muscles. Its active principle is curarin, $C_{10}H_{12}N_2$. Dose: 1/2 gr. (0.0006 Gm.) hypodermatically. It is used in South America and elsewhere as an arrow-poison. Toxic doses cause death by paralysis of the organs of respiration. It has been reported effectual in cases of hydrophobia and tetanus. The initial dose is 1/2 gr. (0.0006 Gm.) given hypodermatically in a watery solution; this may be gradually increased to 4 gr. (0.02 Gm.), but the latter dose should be given with caution.

Curarization (*ku-rah-riz-ah'shun*) [*curara*]. The state of one subjected to the full influence of curara by hypodermatic injection. Voice and power of motion are generally abolished, but not sensibility to pain. See *Curarism*. **C., Spontaneous**, condition of auto-intoxication occasioned by the paralyzing influence upon the circulation and upon the end-plates of the neuromuscular system of toxic substances produced in the body by the tetanization of the muscles.

Curarize (*ku-rah-riz*). To bring a subject under the influence of curara.

Curcuma (*ker'ku-mah*) [*L.*]. Turmeric. The rhizome of *Curcuma longa*, of India, a plant of the *Zingiberacea*, with action similar to that of ginger. It contains a yellow coloring matter, curcumin, $C_{16}H_{14}O_6$, and is employed as a yellow dye in pharmacy, occasionally, to color ointments and other preparations, and in chemistry its solution in alcohol is used as a test for alkali, which turns it brown. Paper tinged with an alcoholic solution (*turmeric paper*) may be used instead.

Curd (*kurd*) [*ME.*]. The coagulum of milk that separates on the addition of rennet or acid to milk.

Cure (*kūr*) [*cura*, *care*]. The successful treatment of a disease, also, a system of treatment, as *juith-cure*, *mind-cure*, *grape-cure*, *water-cure* (see *Hydrotherapy*), *hunger-cure*, *rest-cure*, etc. **C., Potato**, a method of treating foreign bodies in the alimentary tract by the ingestion of mashed potatoes. The body becomes embedded in the potato-mass that is formed.

Curet, Curette (*ku-rel'*) [Fr.]. An instrument, shaped like a spoon or scoop, for scraping away tubercular or dead tissue.

Cureting (*ku-rel'-ing*). See *Curettment*.

Curettment (*ku-rel'-ment*) [Fr., *curettement*]. The removal of vegetations, retained placenta, etc., by means of a curet. Syn., *Curetage*; *Cureting*, *Curellage*; *Curellement*.

Curettagé (*ku-rel'-äj*). See *Curettment*.

Curling's Ulcer. A duodenal ulcer produced by extensive burns of the skin.

Current-jelly Clot. A soft, red clot seen postmortem in the heart and blood-vessels.

Current (*kur'-ent*) [*currere*, to run]. A term applied to the transference of electric force, which is likened to the flow of a liquid in a tube. **C., Abterminal**, the secondary current observed at any point in the nerve or muscle on the passage of a single induction shock. **C., Adterminal**, the negative current observed at any point in a nerve or muscle on the passage of a single induction shock. **C., After-**, a current produced in nervous or muscular tissue when a constant current which has been flowing through the same has been stopped. **C., Alternating**, a term applied to a current which, by means of an interrupter, is alternately direct and reverse. **C., Anelectrotonic**, that observed at the anode on passage of a constant current through a nerve. **C.s, Angular**, those which are in lined to each other at some angle. **C., Ascending**, the current formed by placing the positive electrode upon the periphery of a nerve and the negative higher up on the trunk of the nerve, or on the surface over the nerves enter in the spinal cord. **C., Battery**, a galvanic current. **C., Branch**. See *C., Derived*. **C.-breaker**, a rheotome. **C., Centrifugal**, a descending current. **C., Centripetal**, an ascending current. **C.-changer**, a rheotrope. **C., Combined**, that obtained by the combined action of the galvanic and faradic currents. **C.-condenser**, an apparatus for collecting the extra currents generated by an induction machine in operation which it combines to form a current of opposite direction to that of the battery current, and which upon being transmitted to the core demagnetizes it and thus increases the rapidity of the interruption and the strength of the induced current. **C., Constant**. See *C., Continuous*. **C., Continuous**, a constant, uninterrupted current in one direction. **C., d'Arsonval**, the high potential discharge of a current-condenser through a large solenoid of wire. **C., Derived**, a current drawn off by a derivation-wire from the main current. **C., De-**

scending, one passing through a nerve centrifugally, the anode being placed proximally, the kathode, distally. **C., Direct**, a current constant in direction, in contradistinction to an alternating current. **C., Faradic**, the current produced by an induction-coil or by a magnetolectric machine. **C., Galvanic**, a current generated by the decomposition of acidulated water by means of metallic plates. **C.s, Induced**. See *C.s, Secondary*. **C., Inducing**, a primary current, one which, by its opening or closure, produces a faradic current in an adjoining circuit. Cf. *C.s, Induced*. **C.s, Induction**, **C.s, Inductive**. See *C.s, Secondary*. **C., Interrupted**, a current that is alternately opened and closed. **C.-interrupter**, a rheotome. **C., Kat-electrotonic**, that observed at the kathode on passage of a constant current through a nerve. **C., Labile**, a current applied while moving one or both electrodes over the surface treated. **C., Magnetolectric**, a faradic current generated by a magnet. **C., Primary**. See *C., Inducing*. **C., Primitive**, an electric current from which a derived current has not been drawn off. **C.-regulator**, a rheostat. **C., Reversed**, that produced by changing the poles. **C.-reverser**, a rheotrope. **C.s, Secondary**, momentary currents produced in a coil of insulated wire, introduced within the field of another coil, when the circuit is made or broken in the second coil. **C., Sinuous**, one sent in a curved line. **C., Sinusoidal**, an alternating induced electric current in which the electromotive force is so varied that its rise and fall in a positive direction are immediately succeeded without a break by an exactly corresponding fall and rise in the negative direction, and the rise and fall in both directions would, if graphically illustrated, describe a sine curve. **C., Spinal-cord**, an electric current applied by placing both the electrodes on the spine. **C., Spinal-cord Muscle**, an electric current in the application of which one electrode is placed over the spine, the other over a muscle. **C., Spinal-cord Nerve**, an electric current in the application of which one electrode is placed on the spine, the other on a nerve. **C., Stable**, a current applied with both electrodes in a fixed position. **C., Static**, the current from a static machine. **C., Uniform**, an electric current which retains the same strength throughout its application. **C., Voltaic**, the continuous current.

Curschmann's Spirals. Spiral threads of mucin contained in the small, thick pellets that are expectorated during an asthmatic paroxysm. They are supposed to be casts of the bronchioles, and contain Charcot-Leyden crystals and eosinophil cells.

Curvature (*kur'-va-tūr*) [*currere*, to curve]. A bending or curving. **C., Angular**. See *C., Pull's*. **C., Compensatory**, in spinal curvature, a secondary curve occurring as the result of the efforts of the trunk to main-

tain its upright position. **C.**, **Lateral**, scoliosis. **C.**, **Pott's**, angular curvature of the spine, with a posterior projection, it is due to spondylitis. **C. of Spine**, a bending of the vertebral column.

Curve (*bera*) [*curvus*, bent]. A bending or flexure. **C.**, **Barnes'**. See *Barnes' Curve*. **C.-basis**, a common level from which spring the ascending lines of a sphygmographic tracing. **C. of Carus**. See *Carus' Curve*. **C.s**, **Chauveau's**, in electrophysiology curves which show that with closing shocks the amount of stimulation obtained at first with the kathode grows with the strength of the current, then remains stationary and sometimes decreases. The degree of stimulation obtained with the anode regularly increases with the current and overtakes and surpasses that obtained with the kathode. With opening shocks the results are reversed. **C.**, **Ellis-Damoiseau's**, **C.**, **Garland's S.**. See *Ellis' Sign*. **C.**, **Staircase-**, the myographic curve produced by repeated stimulation. **C.**, **Temperature-**, a graphic curve showing the variations of the temperature for a given period. **C.s**, **Traube's**, **C.**, **Traube-Hering's**. See under *Traube*.

Cuscamin (*kus'-kam-in*). A crystalline substance found in cinchona.

Cusp (*kusp*) [*cuspis*, a point]. The eminence on the crown of a tooth.

Cusso (*kus'-a*). Brayera. The *cusso* of the U. S. P. is the dried panicles of the pastillate flowers of *Hagenia abyssinica*. It contains tannic acid, a volatile oil, and a crystalline principle, *koussin*, $C_{10}H_{12}O_5$. It is a valuable anthelmintic against tape-worms. In large doses it produces nausea and emesis. Dose 240 gr (16 gm.). Syn., *Cusso*; *Kosso*; *Koussio*. **C.**, **Infusion of** (*infusum cusso*, B. P.). Dose 3-8 oz. (118-235 C.).

Cutal (*ku'-tal*). See *Aluminium Borotannate*.

Cutaneous (*ku-ta'-ne-us*) [*cutis*]. Pertaining to the skin. **C.**, **Emphysema**. See *Emphysema*, *Cutaneous*. **C.**, **Respiration**, the transpiration of gases through the skin.

Cuticle (*ku'-tik-ul*) [*cutis*]. The epidermis or scarf skin.

Cuticolar (*ku'-ti-kul-ar*) [*cutis*; *color*]. A term descriptive of various ointments and powders simulating the color of the skin and used in the treatment of skin diseases.

Cuticulous (*ku'-tik'-ul-us*) [*cutis*; *colere*, to inhabit]. Living under the skin; said of parasitic larvae.

Cuticular (*ku'-tik'-u-lar*). Pertaining to, resembling, or of the nature of cuticle.

Cutification (*ku'-ti-fik'-a-shun*) [*cutis*; *facere*, to make]. The formation of skin.

Cutin (*ku'-tin*) [*cutis*]. 1. In biology, cork-substance, a modification of cellulose, also called suberin. 2. A preparation of the mouselar layer of the intestine of cattle. It is used for dressing wounds and as a substitute for catgut.

Cutis (*ku'-tis*) [*l.*]. The derma or true skin. **C.**, **ærea**, the bronze color of the skin in Addison's disease. **C.**, **anserina**. See *Goose-flesh*.

C. laza. See *Dermatolysis*. **C. testacea**, a variety of seborrhea in which the trunk and extensor surfaces of the extremities are covered with large, thick plates of greasy, inspissated sebum, usually greenish or blackish, from accumulation of dirt upon them. **C. unctuosa**. Synonym of *Seborrhea*.

Cutisector (*ku'-le-sek'-tor*) [*cutis*, *sectare*, to cut]. An instrument for taking small sections of skin from the living subject.

Cutol (*ku'-tol*). See *Aluminium Borotannate*.

Cuvier's Canals. In the embryo, two short vessels opening into the common trunk of the omphalomesenteric veins, each being formed by the union of two veins, the anterior cardinal, or jugular, and the posterior cardinal veins.

Cyanacetyl (*si-an-ut'-et-id*). See *Acetyl Iso-cyanid*.

Cyanate (*si'-an-id*). A salt of cyanic acid.

Cyanemia (*si-an-e'-me-ah*). Bluish blood, due to imperfect oxygenation.

Cyanformic (*si-an-jern'-ik*). Containing formic acid and cyanogen.

Cyanic (*si-an'-ic*) [*kyanos*, blue]. 1. Blue or bluish. 2. Relating to or containing cyanogen. **C. Acid**. See *Acid*, *Cyanic*.

Cyanid (*si'-an-id*) [*kyanos*, blue]. Any compound of cyanogen with a metal or a radicle.

Most of the cyanids are actively poisonous.

Cyano- (*si-an-a*) [*kyanos*]. A prefix meaning blue.

Cyanogen (*si-an'-o-jen*) [*kyanos*; *genna*, to produce]. A radicle having the structure CN, an acid compound of carbon and nitrogen, existing as a colorless, combustible gas, it is exceedingly poisonous. Syn., *Prussic*. **C. Iodid**, a poisonous crystalline substance produced by combining cyanogen and iodine.

Cyanophil (*si-an'-o-phil*) [*kyanos*; *phileo*, to love]. Auerbach's term for the blue-staining nuclear substance of cells of plants and animals.

Cyanophilic, **Cyanophilous** (*si-an-o-phil'-ik*, *-o'-ph-us*). Having an especial affinity for blue or green dyes.

Cyanopia, **Cyanopsia** (*si-an-o'-pe-ah*, *-op'-ie-ah*) [*kyanos*; *opsis*, eye]. A perverted state of the vision rendering all objects blue.

Cyanosis (*si-an-o'-sis*) [*kyanos*, blue]. A bluish discoloration of the skin from deficient oxidation of the blood, caused by local or general circulatory disturbances. **C.**, **Congenital**, blue disease; cyanosis due to a congenital lesion of the heart or of the great vessels. **C.**, **Local**, the preferred term for local anemia, *digiti mortui*, regional ischemia, or local syncope.

Cyanospermia (*si-an-o-sper'-me-ah*) [*kyanos*; *sperma*, sperm]. Semen of a bluish tint.

Cyanurea (*si-an-u'-re-ah*, $C_2H_2N_2O$). An amorphous body obtained from urea by action of cyanogen bicid with heat.

Cyclarthrosis (*si-kul-ar-thro'-sis*) [*kyklos*, a circle; *arthrosis*, a joint]. A circular or rotatory articulation.

Cycle (*si'-kel*) [*kyklos*, a circle]. A period in which a round of operations or events is repeated, a succession of events or symptoms.

C., Aberrant, the establishment of communication between the pulmonary and bronchial vessels from congestion due to mitral stenosis.

C., Cardiac, the complete cardiac movements embracing the systolic and diastolic movements, with the interval between them. **C., Cardiacovascular**, the circuit of the blood through the organism. **C. of Generation**, **C., Generations**, Haeckel's term for the successive changes through which an individual passes from its birth to the period when it is capable of reproducing its kind.

C. of Golgi, that phase of development of *Plasmodium malariae* which occurs in human blood. Cf. *C. of Ross*. **C. of Ross**, that phase of development of *Plasmodium malariae* which occurs in the mosquito. Cf. *C. of Golgi*.

Cyclic (sil'-kik) [cycle]. 1. Having cycles or periods of exacerbation or change; intermittent. 2. Having a self-limited course, as certain diseases. **C. Albuminuria**. See *Albuminuria*. **Cyclic**. **C. Insanity**. See *Insanity*, *Circular*.

Cyclitis (si-ki'-tis) [κύκλος, a circular body; εἶς, inflammation]. Inflammation of the ciliary body, manifested by a zone of congestion in the sclerotic coat surrounding the cornea. It may be serous, plastic, or suppurative. *Iridocyclitis* is the involvement of both iris and ciliary body in the inflammatory process.

Cyclo- (si-klo-) [κύκλος, a circle]. A prefix meaning relating to a circle or to the ciliary body.

Cyclocephalus (si-klo-sel'-al-us) [cyclo-; κεφαλή, head]. A species of single autostic monsters characterized by a more or less complete absence of the olfactory organs, together with an intimate union of imperfectly developed or rudimentary visual organs, situated in the median line.

Cyclochoroiditis (si-klo-ko-roid-i'-tis) [cyclo-; χοροειδίτις]. Combined inflammation of the ciliary body and the choroid.

Cycloplegia (si-klo-ple'-je-ah) [cyclo-; πλῆξις, a stroke]. Paralysis of the ciliary muscle of the eye.

Cycloplegic (si-klo-ple'-jik). 1. Relating to cycloplegia. 2. A drug which paralyzes the ciliary muscle.

Cyclops (sil'-klops) [cyclo-; ὤψ, eye]. A congenital malformation consisting in a fusion of the two eyes into one.

Cyclotomy (si-klot'-o-me) [cyclo-; τομή, section]. An operation for the relief of glaucoma, consisting of an incision through the ciliary body.

Cydonium (si-do'-ne-um) [κυδώνιον, a quince]. Quince-seed. The seeds of *Cydonia vulgaris*, employed mainly for the mucilage contained in the covering, which consists of a compound of gum and glucose, and is a bland demulcent, it is also used as a hair-dressing.

Cyesis (si-e'-sis) [κύεσις, pregnancy]. Pregnancy.

Cyclic (si-el'-ik) [cyesis]. Relating to pregnancy.

Cylinder (sil'-in-der) [κύλινδρος, a cylinder]. 1. An elongated body of the same transverse diameter throughout and circular on trans-

verse section. 2. See *Cast*. **C.s, Bence Jones'**, long, cylindric formations derived from the seminiferous tubules, sometimes seen in the urine.

Cylindroadenoma (sil-in-dro-ad-en-o'-mah). An adenoma containing cylindric masses of hyaline matter.

Cylindroid (sil'-in-droid) [cylinder; εἶδος, likeness]. A name given to a mucous cast frequently found in the urine in cases of mild irritation of the kidney. Cylindroids are ribbon-like forms, usually of great length, and of about the same diameter as renal casts. They may assume various shapes. One extremity is usually pointed and may be drawn out into a long tail.

CYLINDROIDS.
a and b Cast like forma.
c Filamentous forms

Cylindroma (sil-in-dro'-mah) [cylinder; ὄμα, a tumor]. A myxosarcoma in which the degeneration is confined to areas surrounding the blood-vessels.

Cylindrosarcoma (sil-in-dro-sar-ko'-mah). A tumor containing both cylindromatous and sarcomatous elements.

Cylindruria (sil-in-dru'-re-ah) [cylinder; οὖρον, urine]. The discharge of urine containing hyaline casts or cylindroids.

Cylosomus (sil-o-sol'-mus) [κυλλός, crooked; σῶμα, body]. A monster characterized by an evagination in the side of the lower abdominal region and imperfect development of the corresponding leg.

Cynanche (sin-ang'-ke) [κύων, dog; ἄγειν, to strangle]. An old name for any acute affection of the throat, as diphtheria, croup, tonsillitis, etc., in which the patient struggles for breath (as a panting dog). **C. dysarthritica**, sore throat sometimes resulting in abscess occurring during the course of an attack of arthritis. Syn., *Arthritic angina*.

C. maligna, a fatal form of sore throat. **C. suffocativa**. Synonym of *Croup*. **C. tonsillar**. See *Quinty*.

Cynanthropia (sin-an-thro'-pe-ah) [κύων, dog; ἀνθρωπος, a man]. A mania in which the patient believes himself a dog, and imitates the actions of one.

Cynic (sin'-ik) [κυνικός, dog-like]. Pertaining to a dog. **C. Spasm**, a contraction of the facial muscles upon one side so as to expose the teeth, in the manner of an angry dog.

Cynoglossum (sin-o-glos'-um) [κύων, dog; γλῶσσα, the tongue]. A genus of *Scrophulariaceae*.

plants. The powdered root, leaves, and flowers of *C. officinale*, hound's-tongue, are recommended as a cure for ulcerated epitheliomas; application twice daily.

Cynurenic Acid (*sin-u-ren'-ik*) [see *Cynurin*], $C_{10}H_{14}N_2O_6 + 2H_2O$. A crystalline acid found in dog's urine. It is a decomposition-product of proteids. On heating it cynurin is evolved.

Cynurin (*sin'-u-rin*) [*κύνων*, dog; *οὖρον*, urine], $C_{10}H_{14}N_2O_6$. A base from cynurenic acid.

Cytotrophy (*si-ol'-ra-je*) [*κύω*, fetus; *τροφή*, nourishment]. Nutrition of the fetus.

Cyperus (*si-pe'-rus*) [*κύπερος*, a sweet-smelling marsh-plant]. A genus of sedges. *C. articulatus*, adruce, a species of South America, is antiemetic and tonic. Dose of *fluidextract* 10-30 min. (0.6-1.8 Cc.). *C. rotundus* is a tropical species, the tubers of which are tonic and stimulant and are used in treatment of cholera.

Cyprian (*sip'-re-on*) [island of *Cyprus*, the original source of copper]. Containing copper.

Cypridol (*sip'-rid-ol*). A 1% solution of nascent mercuric iodid in aseptic oil; it is used in syphilis (dose 3 gr. 0.2 Gm.) and as an application in skin diseases.

Cypridopathy (*sip'-rid-op'-ath-e*) [*Κύπρις*, Venus; *πάθος*, disease]. An adenopathy of venereal origin.

Cypripedium (*sip'-re-pe'-de-um*) [*Κύπρις*, Venus; *πόδιον*, a slipper]. Lady's-slipper. The roots of *C. pubescens* and *C. parviflorum*, American valerian, the properties of which are due to a volatile oil and an acid. It is an antispasmodic and stimulant tonic, used instead of valerian, which it resembles. Dose of the *fluidextract* 10-30 min. (0.6-1.8 Cc.). Unof.

Cyrtoid (*sir'-toid*) [*κυρτός*, curved; *εἶδος*, likeness]. Hump-like.

Cyrtometer (*sir-tom'-et-er*) [*κυρτός*, curved; *μέτρον*, a measure]. An instrument adapted for measuring curves. One form is used to locate the fissures of the brain.

Cyrtosis (*sir-to'-sis*) [*κυρτός*, curved]. Spinal curvature.

Cyst (*sist*) [*κύστις*, a pouch]. A cavity containing fluid and surrounded by a capsule. **C.s.** **Adgenic**, congenital dermoid cysts adhering to the genital tubercles. **C.s.** **Adhyoid**, dermoid cysts adherent to the hyoid bone. **C.** **Adventitious**, one inclosing a foreign body. **C.** **Air-**, one containing gas. **C.** **Allantoic**, cystic dilation of the urachus. **C.** **Apoplectic**, one inclosing a cerebral effusion of blood. **C.** **Arachnoid**, a meningeal hematoma. **C.** **Atheromatous**. See *Atheroma* (1). **C.s.** **Baker's**, hernial protrusions of the synovial membrane of the joints through the fibrous capsule. **C.** **Blood-**. See *Hematoma*. **C.** **Boyer's**, cystic enlargement of the subhyoid bursa. **C.** **Branchial**, one formed from incomplete closure of a branchial cleft in an embryo. **C. of the Broad Ligament**, one originating in the ovary and developing between the layers of broad ligament. **C.** **Butter-**, a cystic

tumor of the mammary gland containing semisolid contents of yellowish-brown color and of buttery consistence, that may harden with exposure to the air. **C.** **Chyle**, one in the mesentery containing chyle. **C.** **Colloid**, a cyst with jelly-like contents. **C.** **Compound**. See *C.* **Multilocular**. **C.** **Conjunctival**, a rare congenital cyst, transparent and of the size of a pea, occurring near the corneal margin. **C.** **Cowperian**, **C.** **Cowper's**, a retention cyst formed in Cowper's gland. **C.s.** **Crab's-eye**, small vesicles which appear over Heberden's nodosities. **C.** **Cutaneous**. See *C.* **Dermoid**. **C.** **Daughter-**, any one of the small cysts developed by secondary growth from the walls of a large cyst. **C.** **Dentigerous**, one containing teeth. **C.** **Dermoid**, a congenital cyst containing bone, hair, teeth, etc. **C.** **Distention**, a normal serous cavity distended with a collection of watery fluid. **C.** **Echinococcus**, a cyst formed in various tissues and organs of man by the larva of the *Tania echinococcus* of the dog, taken into the stomach. **C.** **Extravasation**, a cyst formed by the encapsulation of a hemorrhage or other fluid into the tissues. **C.** **Exudation**. See *C.* **Extravasation**. **C.** **False**. See *C.* **Adventitious**, and *C.* **Exudation**. **C.** **Follicular**, one due to the occlusion of the duct of a small follicle or gland. **C.** **Gartnerian**, a cystic tumor originating in Gartner's duct. **C.** **Hydatid**. See *C.* **Echinococcus**. **C.** **Intraligamentous**. See *C. of the Broad Ligament*. **C.** **Involution-**, multiple cystic dilation of the milk-ducts after the menopause. **C.** **Kobelt's**, a small, pedunculated cyst formed by one of Kobelt's tubes. **C.** **Meibomian**. See *Chalazion*. **C.** **Morgagnian**. See *Hydatid of Morgagni*. **C.** **Mucoid**, a retention cyst in a mucous follicle or in the duct of a muciparous gland. **C.** **Mucous**, a retention cyst containing mucus. **C.** **Multilocular**, one composed of many separate compartments. **C.s.** **Nabothian**, small retention cysts formed by the nabothian follicles. **C.** **Neural**, a cyst-like distention of a lymph-space of the brain or spinal cord. **C.** **Nevoid**, one with vascular walls. **C.** **Pilous**, **C.** **Pilocystic**. See *Pilonidal Fistula*. **C.** **Proligerous**, **C.** **Recurring** **Proliferous**, a cystic adenocarcinoma; one that has undergone cystic degeneration. **C.** **Renal**, a cyst-like dilation of the kidney. **C.** **Retention**, one that is due to the retention of the secretion of a gland, in consequence of closure of the duct, as in mucous or sebaceous cysts. **C.** **Rice-grain**, cystic distention of a synovial sheath containing rice-seed bodies. **C.** **Sebaceous**, a retention cyst of a sebaceous gland. **C.** **Serous**, one containing transparent watery fluid. **C.** **Softening**, one due to encapsulation of the fluid after liquefactive necrosis. **C.** **Sterile**, a true hydatid cyst which fails to reproduce. **C.** **Sublingual**. See *Ranula*. **C.** **True**, an abnormal cyst not formed by the dilation

of some canal or cavity. **C., Umbilical**, a congenital cyst in the umbilical region said to be due to shutting-off of a portion of the fetal stomach. **C., Unilocular**, one having but a single cavity. **C., Urinary**, a thin-walled cyst of the cortical substance of the kidney, projecting beneath the capsule and containing a clear yellow fluid. **C.-worm**. See *Cysticercus*.

Cystadenoma (sist-ad-en-o'-mah) [cyst; adenoma]. 1. An adenoma containing cysts. 2. Adenoma of the bladder. **C. papilliferum**, an adenoma containing cysts with papillas on the inner aspect of the cyst-walls. **Cystadenosarcoma** (sist-ad-en-o-sar-ko'-mah). See *Cyst*, *Proliferous*.

Cystalgia (sist-al'-je-ah) [cyst; άλγος, pain]. Pain in the bladder.

Cystamin (sist-am-in). A compound of formaldehyd and ammonia, used as a bactericide and antiseptic in cystitis and gout. Dose 5-10 gr. (0.33-0.66 Gm.).

Cystanastrophe (sist-an-as'-tra-je). See *Inversion of Bladder*.

Cystauchenotomy (sist-aw-ken-o'-o-me) [cyst; αὐχίη, neck of bladder; τέμνω, to cut]. A surgical incision into the neck of the bladder.

Cystectomy (sist-ek'-to-me) [cyst; ἐκτέμνω, to cut out]. Excision of the cystic duct.

Cystin (sist'-e-in) [cyst], $C_2H_7NO_2S$. A compound obtained by reducing cystin; it is a crystalline powder, soluble in water, yielding an indigo-blue color with ferric chloride; in the air it rapidly oxidizes to cystin. **C., Reaction for**. See *Andreass's Reaction for Cystin*.

Cystencephalus (sist-en-sef'-al-us) [cyst; ἐγκεφαλός, the brain]. A form of monstrosity in which the brain is replaced by a cyst-like structure.

Cysterethism (sist-er'-eth-izm) [cyst; ἐρεθισμός, irritation]. Irritability of the bladder.

Cysthypersarcosis (sist-hi-per-sar-ko'-sis) [cyst; ὑπερ, over; σάρκωμα, a fleshy excrescence]. Hypertrophy of the muscular walls of the bladder.

Cystic (sist'-ik) [cyst]. 1. Pertaining to or resembling a cyst. 2. Pertaining to the urinary bladder or to the gall-bladder.

Cysticeroid (sist-e-ser'-koid). Resembling *Cysticercus*: applied to any encysted tape-worm larva.

Cysticercus (sist-e-ser'-hus) [cyst; κέρκος, a tail]. The embryo of a tape-worm when it has reached the encysted stage. A hydatid. **C. cellulose**, the larval parasite inhabiting the intermuscular connective tissue of the pig, producing the condition known as "measles." It is rarely found in the tissues of man. Its progenitor is the *Ternia solium*.

Cysticolithectomy (sist-ik-o-lith-ek'-to-me) [cystic duct; λίθος, a stone; ἐκτέμνω, to cut out]. Von Greiffenhagen's operation for removal of calculi from the gall-bladder, consisting in opening the cystic duct alone and leaving the gall-bladder intact.

Cysticotomy (sist-ik-o'-o-me) [cystic duct; τομή, a cutting]. Incision into the cystic duct.

Cystidolaparotomy (sist-id-o-lap-ar-o'-o-me) [cystic duct; laparotomy]. An abdominovescal incision.

Cystidotrachelotomy (sist-id-o-trak-el-o'-o-me). See *Cystauchenotomy*.

Cystin (sist'-in) [cyst], $C_2H_7NO_2S$. A substance found in the urine. It occurs in regular, colorless, six-sided tables, of very characteristic appearance. **C., Test for**. See *Baumann and Goldmann*, *Liebig*, *Mueller*.

Cystinemia (sist-in-e'-me-ah) [cystin; αἷμα, blood]. The occurrence of cystin in the blood.

Cystinuria (sist-in-u'-re-ah) [cystin; οὖρον, urine]. The presence of cystin in the urine.

Cystitis (sist-i'-tis) [cyst; εἶς, inflammation]. Inflammation of the bladder.

Cystitome (sist'-it-ōm). See *Cystatome*.

Cysto- (sis-to-) [κύστης, bladder]. A prefix denoting relation to the bladder.

Cystocele (sist-o-sel) [cysto-; κήλη, a hernia]. A hernia of the bladder.

Cystocolostomy (sist-o-kol-os'-tom-e) [cysto-; colostomy]. The surgical establishment of a permanent passage from the bladder to the colon.

Cystoenterocele (sist-o-en'-ter-o-sel) [cysto-; ἔντερον, an intestine; κήλη, a hernia]. A hernia containing a part of the bladder and intestine.

Cystoepiplocele (sist-o-ep-ip'-lo-sel) [cysto-; ἐπένχοον, the omentum; κήλη, a hernia]. Hernia of the bladder and of the omentum.

Cystoepithelioma (sist-o-ep-ilh-e-le'-o-mah) [cysto-; epithelioma]. An epithelioma containing cysts filled with fluid.

Cystogen (sist'-o-jeu). See *Formin*.

Cystogenia, Cystogenesis (sist-o-je'-ne-ah, sist-o-je'-e-sis) [cysto-; γέννω, to produce]. The formation or genesis of cysts.

Cystohemia (sist-o-he'-me-ah) [cysto-; αἷμα, blood]. A congested condition of the bladder.

Cystoid (sist'-oid) [cyst; εἶδος, likeness]. 1. Having the form or appearance of a cyst. 2. Composed of a collection of cysts. 3. A pseudocyst.

Cystoma (sist-o'-mah) [cyst; ὄμα, a tumor]. A newgrowth made up of cysts; applied especially to ovarian cysts. **C. glandulare proliferum**, **C. proliferum papillare**, proliferating cystoma, a cystic formation derived from gland-ducts and acini. It is the most common form of ovarian and pancreatic cystoma; the lining of the inner wall consists of epithelium showing papillomatous growths or crypts resembling the acini of a gland. Syn., *Cylindrocellular adenoma*.

Cystomyoma (sist-o-mi-o'-mah). A myoma containing cysts.

Cystomyxoadenoma (sist-o-miks-o'-ad-en-o'-mah). Cystomyxoma with adenoma.

Cystomyxoma (sist-o-miks-o'-mah). A myxoma containing cysts.

Cystoneuralgia (sist-o-nu-rall'-je-ah) [cysto-; neuralgia]. Neuralgia of the bladder; cystalgia.

Cystopexy (sist-o-peks-e) [cysto-; πῆξις, fixation]. Fixation of the bladder, an operation for the cure of cystocele.

Cystophlegmatic (sist-o-fleg-mat'-ik) [cysto-; φάγμα, phlegm]. Pertaining to vesical mucus.

Cystopyelitis (sist-o-pi-el-i-tis) [cysto-; pyelitis]. Inflammation of the urinary bladder and the pelvis of the kidney.

Cystopyelonephritis (sist-o-pi-e-to-ne-'ri-tis). See *Cystopyelitis*.

Cystopyic (sist-o-pi-'ik). Relating to suppuration of the bladder.

Cystorectostomy (sist-o-rek-to-'to-me) [cysto-; *rectum*; *stoma*, a mouth]. The formation of a fistula between the rectum and bladder.

Cystorrhaphy (sist-or-'a-ē) [cysto-; *rhaphē*, a suture]. Suture of the bladder.

Cystorrhea (sist-or-'e-uh) [cysto-; *rhoe*, a flow]. 1. Vesical catarrh. 2. Vesical hemorrhage. 3. Polyuria.

Cystosarcoma (sist-o-sar-'ko-mah) [cysto-; sarcoma]. Müller's name for a sarcoma containing cysts.

Cystoschisis (sist-ask-'is-is) [cysto-; *schizein*, a cleaving]. A congenital fissure of the urinary bladder from imperfect development.

Cystoscirrhus (sist-o-skir-'us) [cysto-; *cirrhus*, an induration]. Scirrhus of the urinary bladder.

Cystoscope (sist-o-'skop) [cysto-; *σκοπεῖν*, to examine]. An instrument for inspecting the interior of the bladder.

Cystose (sist-'es) [cyst]. Cystic; full of cysts.

Cystospermittis (sist-o-sperm-i-'tis) [cysto-; *sperma*, a seed; *itis*, inflammation]. Inflammation of the seminal vesicles.

Cystosteoma (sist-o-ste-at-'mah). See *Cyst*, *Schwannoma*.

Cystotome (sist-o-'tōm) [see *Cystotomy*]. A knife used in cystotomy, also a knife used in rupturing the capsule of the lens in cataract operations.

Cystotomy (sist-of-'o-me) [cysto-; *τομή*, a cutting]. 1. Incision of the bladder. 2. Surgical division of the anterior capsule.

Cystotrachelotomy (sist-o-trak-el-of-'o-me). See *Cystotracheotomy*.

Cytameba, **Cytamœba** (sit-am-'e-bah). See *Plasmodium malarie*.

Cytase (sit-'ās). Metchnikoff's name for complement.

Cytaster (sit-'ast-ter). The same as *Aster*.

Cytisin (sit-'is-in) [*κίτις*, a kind of clover]. $C_{10}H_{11}N_2O$. A poisonous alkaloid from *Cytisus laburnum*, the common laburnum, indigenous to the higher mountains of Europe and widely cultivated. **C.** Hydrochlorate, $C_{10}H_{11}N_2O \cdot HCl$. It is a nerveine. Dose $\frac{1}{10}$ gr. (0.005-0.005 Gm.) subcutaneously. **C.** Nitrate, $C_{10}H_{11}N_2O \cdot (HNO_3) + 3H_2O$, used as a cytin hydrochlorate.

Cytitis (sit-'it-is) [cysti, *itis*, inflammation]. Dermatitis.

Cyto- (sit-'ō) [*κύτος*, a cell]. A prefix denoting relating to a cell.

Cytoblast (sit-'to-blast) [cyto-; *βλαστός*, a germ]. 1. In biology, applied to the nucleus of a cell, also one of the amoeboid cytodexes going to make up the cytoblastema of sponges. 2. One of the hypothetical ultimate vital units of the cell. See *Bioblast*. 3. Any naked cell or protoblast.

Cytoblastema (si-to-blas-te-'mah). See *Blastema*.

Cytochemism (si-to-kem-'izm) [cyto-; *χημεία*, chemistry]. The reaction of the living cell to chemie reagents, antitoxins, etc.

Cytochemistry (si-to-kem-'is-ree). The chemistry of living cells.

Cytochrome (sit-'to-krom) [cyto-; *χρῶμα*, color]. A term applied by Nissl to nerve cells deficient in cell-protoplasm, the nucleus not being completely surrounded. The nucleus stains well, and is about the size of the leukocyte nucleus.

Cytoclasia (si-to-kla-'sis) [cyto-; *κλάω*, to break, to weaken]. Cell-necrosis.

Cytode (sit-'dō) [cyto-; *εἶδος*, form]. The simplest, most primitive form of cell, without nucleus or nucleolus.

Cytodendrite (si-to-den-'drit) [cyto-; *δένδρον*, a tree]. Lendhousék's term for a true medullated, cellulifugally conducting collateral fibril of a nerve-cell. Cf. *Axodendrite*.

Cyodiagnosis (si-to-di-ag-'no-'sis). The determination of the nature of a pathogen based by the study of the cells it contains.

Cytodistal (si-to-dis-'tal) [cyto-; *distare*, to stand apart]. Applied to that portion of an axon furthest removed from its cell of origin.

Cytogenesis (si-to-jen-'es-is) [cyto-; *γενεσις*, production]. The formation or genesis of the cell.

Cytoglobin (si-to-glo-'bin) [cyto-; *globin*, a blood]. An albuminoid, obtainable in the form of a white, soluble powder. It forms about 3% of the pulp of the lymphatic glands.

Cytohydrolist (si-to-hi-'dro-list) [cyto-; *hydrolysis*]. An agent producing hydrolysis of cellular substance.

Cytolymph (sit-'to-lim) [cyto-; *lymph*, clear water]. The ground-substance or matrix of the cytoplasm of cells.

Cytolysin (si-to-'li-sin) [cyto-; *λύω*, a loosing]. A substance capable of destroying cells, and resulting from inoculation by organic products (cf. *Epitheliolysin*, *Leukocytolysin*, *Nephrolysin*, *Spermolysin*).

Cytolysis (si-to-'li-sis). Cell dissolution.

Cytolytic (si-to-'li-'ik). Relating to or concerned in cell destruction.

Cytometer (si-tum-'et-er) [cyto-; *μέτρον*, a measure]. A device for counting cells, especially blood corpuscles. See also *Pleurocytometer*.

Cytomicrosome (si-to-mi-'ro-sōm) [cyto-; *μικρός*, small, *σώμα*, body]. A microsome of cytoplasm.

Cytomitoma (si-to-mi-'to-mah) [cyto-; *μίτος*, a fiber]. The fibrillar part of a cell-body. See *Mitoma*.

Cytomorphosis (si-to-mor-'fo-sis) [cyto-; *μορφή*, a shaping]. A term proposed by Minot to designate comprehensively all the structural alterations which cells or successive generations of cells may undergo from the earliest undifferentiated stage to their final destruction.

Cytophagy (si-to-'a-ē) [cyto-; *φαγῆναι*, to devour]. The engulfing of cells by other cells.

Cytophil (sit-'to-fil-'i-to) [cyto-; *φιλέω*, to love]. The haptophorous group of the intermediary body.

with which it combines with the receptor of the cell.

Cytoplasm, Cytoplasma (si'-to-plazm, -plaz'-mah) [cyto-; πλάσμα, anything formed]. 1. Protoplasm. 2. Cell-plasm other than that of the nucleus; the paraplasma and endoplasm of a cell.

Cytoplastin (si-to-plas'-tin) [cyto-; πλάσσειν, to mold]. Schwartz's name for cell-protoplasm.

Cytoproximal (si-to-proks'-im-al) [cyto-; proximate, to draw near]. A term applied to that portion of an axon nearest its cell of origin.

Cytoreticulum (si-to-ret-ik'-u-lum) [cyto-; reticulum, a little net]. Same as Cytomitama.

Cytoryctes (si-tor-ik'-tēz) [cyto-; δόρυξ, a digger]. Name given by Guarneri (1892) to intracellular bodies produced by inoculating vaccine lymph into the cornea of rabbits. They are regarded by him and by Wasielewsky as cellular parasites and as the causative agents of vaccinia. Huchel regards them as the products of a specific degeneration of the cytoplasm induced by the vaccine virus. Syn., Guarneri's vaccine-bodies.

Cytoscopy (si-tox'-ku-pe). See Cytodiagnosis.

Cytosome (si'-to-sōm) [cyto-; σῶμα, a body]. A cell-body as distinguished from the nucleus.

Cytospongium (si-to-spun'-je-um) [cyto-; σπόγγος, sponge]. The cell network or spongio-plasm containing in its meshes the hyaloplasm. Cf. Milome and Paramilome.

Cytothesis (si-to-the'-sis) [cyto-; θέσις, a placing or arranging]. Cell-repair.

Cytotoxin (si-to-tox'-in) [cyto-; ζῆλον, animal]. A protoplasmic cell-mass, probably parasitic in nature, with independent movement; found by Gaule in defibrinated blood and other structures.

Cytozoon (si-to-zo'-on) [cyto-; ζῷον, animal]. A protoplasmic cell-mass, probably parasitic in nature, with independent movement; found by Gaule in defibrinated blood and other structures.

Czermak's Interglobular Spaces. Irregular branched spaces in the crista petrosa and enamel of the teeth.

Czerny-Trunczek's Method. A method of treating cutaneous epitheliomas: by cauterization, or by the application, with a brush, after scarification, of the following solution: arsenic trioxid, 1 Gm.; ethyl-alcohol and distilled water, each, 40-50 Cc.

D

D. An abbreviation of *dexter*, right; *diopler*; and *deur*, let it be given.

Da Costa's Disease. Retrocedent gout.

Dacry-, Dacryo- (dak-re-, dak-re-o-) [δάκρυον, a tear]. Prefixes signifying pertaining to the tears or tear-ducts.

Dacryadenitis, Dacryoadenitis (dak-re-ad-en-i'-tis, dak-re-o-ad-en-i'-tis) [dacry-; αδέν, a gland; ιτις, inflammation]. Inflammation of a lacrimal gland.

Dacryadenoscleritis (dak-re-ad-en-o-scler'-us) [dacry-; αδέν, a gland; σκληρός, hard]. An indurated tumor of the lacrimal gland.

Dacryagog, Dacryagogue (dak'-re-o-gog) [dacry-; ἀγώγος, leading]. 1. Inducing tears. 2. An agent causing a flow of tears.

Dacrygelosis (dak-re-jel-o'-sis) [dacry-; γέλω, laughter]. Alternate weeping and laughing.

Dacryocyst (dak'-re-o-sist) [dacry-; cyst]. The lacrimal sac.

Dacryocystalgia (dak-re-o-sist-al'-je-ah) [dacryocyst; άλγος, pain]. Pain in the lacrimal sac.

Dacryocystitis (dak-re-o-sist-i'-tis) [dacryocyst; ιτις, inflammation]. Inflammation of the lacrimal sac. **D. blennorrhoea**, purulent inflammation of the lacrimal sac. **D. phlegmonosa**, inflammation of the tissues composing the lacrimal sac and of the surrounding soft parts.

Dacryocystoblennorrhoea (dak-re-o-sist-to-blenn-or-e'-ah) [dacryocyst; blennorrhoea]. Chronic inflammation of the lacrimal sac with a mucopurulent discharge.

Dacryocystotome (dak-re-o-sist-to-tōm) [dacryocyst]. An instrument for dividing strictures of the lacrimal passages.

Dacryocystotomy (dak-re-o-sist-o'-o-me). Incision of the lacrimal sac.

Dacryohemorrhoea (dak'-re-o-hem-or-e'-ah) [dacry-; αἷμα, blood; ῥοια, a flow]. The weeping of bloody tears.

Dacryolin (dak'-re-o-lin). The albuminous material in tears.

Dacryolite (dak'-re-o-lit). See Dacryolith.

Dacryolith (dak'-re-o-lith) [dacry-; λίθος, a stone]. A calcareous concretion in the lacrimal passages.

Dacryoma (dak-re-o'-mah) [dacry-; ὄμα, tumor]. 1. A lacrimal tumor. 2. Obstruction of the lacrimal puncta, causing epiphora.

Dacryon (dak'-re-on). See under *Cranimetric Point*.

Dacryops (dak'-re-ops) [dacry-; ὄψ, eye]. 1. watery eye. 2. A cyst of the duct of a lacrimal gland.

Dacryopyorrhoea (dak-re-o-pi-or-e'-ah) [dacry-; pyorrhoea]. Purulent lacrimation.

Dacryorrhoea (dak-re-or-e'-ah) [dacry-; ῥοια, a flow]. An excessive flow of tears.

Dacryosolenitis (dak-re-o-sol-en-i'-tis) [dacry-; σωλήν, a pipe; ιτις, inflammation]. Inflammation of a lacrimal duct.

Dacryuria (dak-re-u'-re-ah) [dacry-; οὖρον, urine]. The enuresis which accompanies weeping in cases of hysteria, fright, or nervousness.

Dactyl (*dak't-il*) [*dáκτυλος*, a finger]. A digit; a finger or a toe.

Dactylate (*dak't-il-āt*) [*dactyl*]. Resembling a finger. Possessing five rays or appendages.

Dactylic (*dak't-il-ik*). Pertaining to a finger or a toe.

Dactyliferous (*dak't-il-īf'er-us*) [*dactyl*; *ferre*, to bear]. 1. Having fingers or finger-like parts, organs, or appendages. 2. [*dáκτυλος*, a date, so called because shaped like a dactyl.] Date-bearing, as *Phoenix dactylifera*, the date-palm.

Dactylion (*dak't-il'-e-on*). See *Syndactylia*.

Dactylitis (*dak't-il-ī-tis*) [*dactyl*; *itis*, inflammation]. Inflammation of a finger or a toe.

D. syphilitica, a rare tertiary-syphilitic affection of the fingers and toes, consisting of a gummatous infiltration of the subcutaneous connective tissue and of the fibrous portions of the joints and bones. It is accompanied by great deformity, and should be distinguished from a similar affection of the muscular tissues, called by Lewin phalangitis syphilitica. Syn., *Paronychia syphilitica*.

Dactylocampsodynia (*dak't-il-o-kamp-so-dīn'-e-ah*) [*dactyl*; *kámpē*, a bending; *dīnā*, pain]. Painful flexion of the fingers or toes.

Dactylose, **Dactylous** (*dak't-il-ōs, -us*). See *Dactylate*.

Dactyl (*dak't-il*). Blanchet and Self's name for a camphene produced by the action of lime on artificial camphor.

Dæmonorops (*de-mōn'-o-rops*) [*dāmon*, a devil; *rops*, a shrub]. A genus of plants of the order *Palme*. The inspissated juice of *D. draca*, a palm of Malaya, constitutes the finest dragon's blood. *D. grandis*, same habitat as *D. draca*, affords a variety of dragon's blood.

Dahlia (*dahl'-ya*) [*Dahl*, a Swedish botanist]. A genus of composite plants. The roots of several species are edible, diuretic, diaphoretic, and carminative, and furnish a purple coloring matter. The bulbs of *D. variabilis*, a Mexican species, yield white inulin. **D.-paper**, a purple tint paper made from several species of *Dahlia*; acids change its color to red and alkalis to green. Syn., *Georgina paper*. **D.-violet**. See *Pyoktanin*, *Blue*.

Dahlin (*dah'-lin*). 1. An anilin dye obtained by the action of ethyl iodid on mauvein. It gives a reddish-purple color. 2. A form of inulin obtained from the roots of *Inula helenioides*. See *Inulin*. Syn., *Alantin*; *Menturan*; *Sinistrin*; *Syntheron*.

Dalbergia (*dai-bur'-e-ah*). A genus of tropical leguminous, pseudomacroseous plants. *D. sissoo* is a species of India and Afghanistan. The bastons of the wood are employed as an alterative. *D. roxburghiana* is a tree of the East Indies. An infusion of the bark is administered in dyspepsia; the leaves are applied externally in leprosy and other cutaneous diseases, and internally as an alterative. The seeds yield an oil used in rheumatism, and the milky juice of the root is applied to ulcers.

Dal fil [Ar., "swollen leg"]. A native name for elephantiasis arabum.

Dalrymple's Sign. See *Stellwing's Sign*.

Dalton's Law, **Dalton-Henry's Law**. Although the volume of a gas absorbed by a liquid remains constant, the weight (volume multiplied by the density) of the absorbed gas rises and falls in proportion to its pressure.

Daltonian (*dal-ton'-e-an*). 1. Pertaining to John Dalton, an English chemist (1766-1844). 2. A color-blind person.

Daltonism (*dal'-ton-izm*). Color-blindness.

Dam. See *Rubber-dam*.

Damar, **Damarina** (*dam'-ar, dam-a'-re-ah*). See *Dammar*.

Dambose (*dam'-bōs*) [*n'dambo*, the African name]. $C_6H_{12}O_6$. A glucose derived from Gaboon caoutchouc. It forms hexagonal prisms, melts at $212^{\circ}C$, and is soluble in water.

Damiana (*dam-e-an'-ah*). The leaves of *Tournefortia apurhancensis*, found in Mexico and lower California, a stimulant tonic and aphrodisiac. It is the basis of a great number of quack remedies. Dose of the extract 2-10 gr. (0.13-0.65 Gm.); of the fluidextract 10 min.-1 dr. (0.65-4.0 Cc.); of the leaves 1 oz. (3 Cc.) daily. All used.

Dammar (*dām'-ar*) [Hind., *dāmar*, resin]. A gum or resin produced by various species of *Dammara* and other trees. Syn., *Damar*; *Dammara*; *Resina damara*. **D., True**, is obtained from the *Dammara orientalis*, a coniferous tree indigenous in the East Indies, and also from *Dammara australis*, in New Zealand. **D.-varnish**, a mounting medium used in microscopy; it is made by adding 10 parts of white dammar to 20 parts of benzene, decanting after 24 to 48 hours, and adding 4 parts of pure oil of turpentine.

Dammaran (*dām-ar'-an*). A neutral resin obtained from dammar.

Dammarin (*dām'-ar-in*). A resin extracted from dammar.

Damoiseau's Curve. See *Ellis's Sign*.

Damper (*damp'-er*) [ME., *dampen*, to choke].

1. A shutter placed in a flue to control draft. 2. A device attached to a galvanometer to control the secondary current.

Dance, **St. Vitus'**. See *Chorea*.

Dance's Sign. A depression about the right flank or iliac fossa, regarded by Dance as indicating invagination of the cecum.

Dancing Mania. See *Cheromania*.

Dandelion (*dān'-de-li-on*). See *Taraxacum*.

Dandruff (*dān'-druf*) [origin unknown]. The scurf or scales formed upon the scalp in seborrhea.

Dandy Fever (*dān'-de*). See *Dengue*.

Danielssen's Disease. Anesthetic leprosy.

Dansomania (*dān-so-mā'-ne-ah*). See *Cheromania*.

Danta (*dān'-tah*) [Sp.]. The American tapir, *Tapirus americanus*; the powdered hoofs are employed as a sudorific and as a remedy for epilepsy.

Daphne (*dāf'-ne*). See *Manzanilla*.

Daphnin (*da-f'niin*) [*dāphn*, laurel], $C_{14}H_{16}O_6 + 2H_2O$. A glucosid from the bark of several species of *Daphne*.

D'Arcet's Metal. See *Metal, D'Arcet's*.

Darier's Disease. Psoriasis folliculata, keratosis follicularis.

Darkschewitsch's Fibers. A tract of nerve-fibers extending from the optic tract to the ganglion of the habenula. **D.'s Nucleus**, a nucleus situated on each side of the median line in the gray matter near the junction of the sylvian aqueduct with the third ventricle.

Dartoid (*dar'-oid*) [*dartos*; *eidōs*, likeness]. Resembling or consisting of the dartos.

Dartos (*dar'-tos*) [*daptyōs*, flayed]. The contractile musculofibrous layer beneath the skin of the scrotum.

Dartrous (*dar'-trus*) [Fr., *dartre*]. Of the nature of tetter or herpes; herpetic.

Darwin's Ear. A congenital deformity of the ear in which the helix is absent at the upper outer angle of the ear so that the free border forms a sharp point upward and outward. In another form a blunt point (*Darwin's tubercle*) projects from the upper portion of the helix toward the center of the ear.

Darwinism (*dar'-win-izm*). The doctrine that higher organisms have been developed from lower forms by the influence of natural selection, a theory advocated by Charles Darwin.

Datura (*da-tu'-rah*) [Hind., *dhatard*, a certain plant]. A genus of *Solanaceae*, or nightshade family. *D. arborea* is a South American species; the leaves are used as an emollient. *D. ceratocaula* is indigenous to tropical America; its properties are similar to those of *D. stramonium*. *D. fastuosa* is found throughout the tropics of the old world. The root is administered by Mohammedan physicians in epilepsy. The fruit, seeds, and leaves are used in poultices for boils, carbuncles, and in the treatment of herpetic diseases. A tincture and decoction are given as a remedy for asthma. The plant is poisonous and soporific, and is used in India as an intoxicant, and by professional poisoners for killing newborn female infants. Cf. *Phatureas*. *D. metel* possesses qualities similar to *D. fastuosa*. *D. sanguinea* is a South American species, the *floripondio* of Peru, from the seeds of which an intoxicating beverage called *tooga* is prepared. Taken alone and in large doses it produces furious delirium, but diluted is a soporific. The seeds are used in the preparation of an ointment. *D. stramonium* is the thorn-apple. See *Stramonium*.

Daturin (*da-tu'-rin*) [see *Datura*], $C_{17}H_{27}NO_4$. A poisonous alkaloid from *Datura stramonium*, identical with hyoscyamin and isomeric with atropin. It is employed in the treatment of mania, epilepsy, neuralgia, rheumatism, syphilis, cancer, pains, spasms, asthma, and as a hypnotic in insanity. Dose: $\frac{1}{16}$ – $\frac{1}{4}$ gr. (0.003–0.001 Gm.). Treatment in case of poisoning: emetics, stomach-pump, castor-oil. **D. Hydrochlorate**, $C_{17}H_{27}NO_4.HCl$. Uses and dose same as of da-

turin. **D., Light**, hyoscyamin, obtained by Ladenburg from *Datura stramonium*. **D. Sulfate**, $(C_{17}H_{27}NO_4)_2H_2SO_4$. Uses and dose same as of daturin.

Daturism (*dat'-u-rizm*) [see *Datura*]. Stramonium-poisoning.

Dauciform (*daw'-si-form*). See *Daucoid*.

Daucoid (*daw'-koid*) [*daikon*, the carrot; *eidōs*, likeness]. Resembling a carrot, dauciform.

Daucus (*daw'-kus*) [*daikon*, the carrot]. A genus of plants of the order *Umbelliferae*. *D. carota*, the carrot, is a cultivated biennial indigenous to Europe and the Orient. The root contains sugar, starch, pectin, malic acid, albumin, a volatile oil, and a crystalline coloring-matter (*carotin*). It is a stimulant when applied to indolent ulcers, and is fed to horses to render the coat glossy. The aromatic seeds (fruit) are diuretic and are used in dropsy and nephritic complaints. *D. gingidium*, a species indigenous to Europe and northern Africa, yields a gum-resin, bdellium siculum.

Daughter (*daw'-ter*). A female child or descendant. **D.-cell**. See *Cell, Daughter*. **D.-cyst**. See *Cyst, Daughter*. **D.-nuclei**. See *Karyokinesis*. **D.-star**, an amphister. See *Karyokinesis*.

Davidsohn's Sign. The illumination of the pupil obtained on placing an electric light in the mouth will be less marked on the side on which there is a tumor or empyema of the antrum of Highmore.

Davy's Test for Phenol. To 1 or 2 drops of the phenol solution add 3 or 4 drops of a solution of 1 part molybdic acid in 10 or more parts of concentrated sulfuric acid. A pale yellowish-brown coloration is produced, which passes to reddish-brown and then to a beautiful purple.

Day-blindness. See *Nyctalopia* and *Hemeralopia*.

Deacidification (*de-as-id i-f'ik o' shun*). The act or process of neutralizing an acid.

Deaf (*def*) [AS., *dedf*]. Lacking the sense of hearing; in a condition of impaired hearing.

D.-mutism, the state of being both deaf and dumb; the deafness may be congenital or acquired, and prevent the individual from learning to speak. **D.-mutism, Hysteric**, a condition of deaf-mutism of sudden development, due to hysteria.

Deafness (*def'-nes*) [*deaf*]. The state of being deaf. Deafness may be due to disease of the external auditory canal, the middle ear, the internal ear, the auditory nerve, or the brain. **D., Boilermakers'**, deafness resulting from working among machinery, and characterized by inability to hear ordinary conversation, while hearing power is increased amid loud noise. **D., Cerebral**, that due to a brain-lesion. **D., Cortical**, that due to disease of the cortical centers for hearing. **D., Psychic**, inability to recognize or understand the sounds heard, due to destruction of the central area of the auditory center. **D., Speech-**, a variety of psychic deafness resembling word deafness, except that the faculty of repeating and writing

- after dictation is not lost. **D., Word-**
D., Psychic.
- Dealbate** (*de-al'-bat*) [*dealbatus*, whitewashed].
In biology, coated with a fine white down or powder.
- Dealbation** (*de-al-ba'-shun*) [see *Dealbate*].
The process or act of becoming or being made white, as by bleaching.
- Dealcoholization** (*de-al'-ko-hol-i-za'-shun*).
The removal of alcohol from an object or compound used in microscopic technic.
- D-agent**, a liquid employed for the purpose of getting rid of the alcohol in preserved specimens, and to facilitate the penetration of paraffin in microtomy.
- Deambulation** (*de-am-bu-la'-shun*) [*deambulare*, to take a walk]. Gentle exercise as by walking.
- Deanesthesiant** (*de-an-es-the'-ze-ant*) [*de*, from; *anæsthesia*, want of feeling]. A means for arousing the system from a state of anesthesia.
- Deaquaion** (*de-ak-wa'-shun*) [*de*, from; *aqua*, water]. The act or process of removing water from a substance.
- Deargentation** (*de-ar-jen-ta'-shun*) [*deargentare*, to plate with silver]. The act or process of silvering.
- Dearterialization** (*de-ar-te-re-al-i-za'-shun*) [*de*, from; *arterialization*]. The transformation of the blood from the arterial to the venous state. Cf. *Atmospherization*.
- Dearticulation** (*de-ar-ti-ku-la'-shun*). See *Disarthrosis*, *Disarticulation*, *Dislocation*.
- Death** (*deth*) [AS., *death*]. The cessation of life. **D., Binsical**, death preceded by mania. **D., Black**, an exceedingly fatal epidemic called the "plague," which occurred in Europe during the fourteenth century, and during which it is estimated, 20,000,000 persons died. **D., Local**, death of a part. **D., Molecular**, death of individual cells; ulceration. **D., Muscular**, a state of the muscles in which they no longer react to stimuli. **D., Somatic**, death of the organism as a whole.
- Deauration** (*de-aw-er'-shun*) [*deaurare*, to gild]. The act or process of gilding.
- Debilant** (*de-bil'-at-ant*) [*debilitare*, to weaken].
1. An agent allaying excitement. 2. Weakening.
- Debility** (*de-bil'-i-ty*). See *Asthenia*. **D., Nervous**. See *Neurasthenia*.
- Débove's Disease**. Splenomegaly. **D.'s Membrane**. See *Membrane*, *Debove's*.
- Débridement** (*de-bri-d-men'(g)*) [Fr.]. The enlargement of a wound or hernia in operating.
- Deca-** (*dek-a*) [*deka*, ten]. Ten, prefixed to the units of weight, capacity, and length in the metric system, it signifies a measure ten times as large as the unit. See *Metric System*.
- Decalcification** (*de-kal-si-fik-a'-shun*) [*de*, priv; *calc*, lime, *facere*, to make]. The withdrawal of the lime-salts of bone.
- Decalcify** (*de-kal'-si-fai*) [see *Decalcification*]. To remove lime-salts from tissues.
- Decalvant** (*de-kal'-vant*) [*decalvans*, depilatory]. Destroying hair.
- Decantation** (*de-kan-ta'-shun*) [*de*, down, *cantus*, a side]. The operation of removing the supernatant fluid from a sediment.
- Decapitation** (*de-kap-i-ta'-shun*) [*de*, from, *caput*, head]. The act of beheading, especially as performed on the fetus when other means of delivery have failed.
- Decarbonated** (*de-kar'-bon-a-ted*). Deprived of carbonic acid.
- Decarbonization, Decarburation, Decarburation** (*de-kar-bon-i-za'-shun*, *de-kar-bu-ra'-shun*, *de-kar-bu-ri-za'-shun*). The act or process of freeing a substance from carbon.
- Decay** (*de-ka'*) [*de*, down; *cadere*, to fall].
1. Putrefactive change. 2. The ultimate catabolic state, decline of life, of health, or of one or more functions.
- Decemcostate** (*de-sem-kos'-tat*) [*decem*, ten, *costa*, a rib]. Having ten ribs.
- Decemfid** (*de'-sem-fid*) [*decem*; *findere*, to divide]. Cut into ten parts.
- Decemipara** (*de-sem-ipt'-ar-ah*) [*decem*, pareri to bring forth]. A woman pregnant for the tenth time.
- Decentered** (*de-sent'-erd*) [*de*, from, *crater*]. Out of common center; said of lenses as to focus, or of masses as to equilibrium, etc.
- Decentration** (*de-sen-ta'-shun*) [see *Decentered*]. Removal from a center.
- Decerebrated** (*de-ser'-e-bra-ted*). Decerebrized.
- Decerebrize** (*de-ser'-e-briz*) [*de*, from, *cerebrum*]. To remove the brain, as of a frog, in physiologic experiments, decerebrate.
- Deci-** (*des-e*) [*decem*, ten]. A prefix which, joined to the metric units of length, capacity, and weight, signifies a measure one-tenth as large as the unit. See *Metric System*.
- Decidua** (*de-sid'-u-ah*) [*decidua*, a falling off]. The mucous membrane which lines the uterus and surrounds the ovum during pregnancy. Syn., *Decidua membrana*, *Decidua tunica*. **D., Catamenial**. See *D., Menstrual*. **D., Epichorial**. See *D. reflexa*. **D. graviditatis**, the menstrual decidua during pregnancy. **D., Interuteroplacental**. See *D. serotina*. **D. membrana**. See *Decidua*. **D., Menstrual**, the outer layer of the uterine mucosa which is shed during menstruation. In membranous dysmenorrhoea it is discharged in pieces before disintegration. Syn., *Connatal decidua*. **D. placentalis subchorialis**, the layer of the maternal placenta lying next the chorion. Syn., *Decidua subchorialis*. **D. reflexa**, that part of the decidua growing about the ovum and enclosing it as a sac. **D. serotina**, that part of the decidua vera upon which the ovum lies, and from which the placenta is subsequently formed. **D. serotina, Glandular**. See *D. serotina, Uterine*. **D. serotina, Placental**, that portion of decidua serotina which is in contact with the parts or cotyledons of the placenta, as distinguished from the uterine decidua serotina. **D. serotina, Uterine**, the outer layer of the decidua serotina, the glandular

decidua serotina. **D. subchorialis**. See *D. placentalis subchorialis*. **D. tuberosa et polyposa**, a form of decidual endometritis characterized by a roughened condition and polypoid growths of the uterine mucosa. **D. vera**, the thickened, vascular, spongy mucous membrane of the gravid uterus.

Deciduation (*de-sid-u-a'-shun*). The act or process of dropping off or shedding.

Deciduitis (*de-sid-u-i'-tis*). Inflammation of the decidual membranes of the gravid uterus.

Deciduoma (*de-sid-u-o'-mah*) [*decidua*; *ēma*, a tumor]. An intrauterine tumor containing decidual relics, and believed to arise from some hyperplasia of a retained portion of the decidua. By some it is considered a sarcoma. **D. malignum**, a variety of uterine sarcoma first described by Sanger, which in its microscopic characters strongly resembles decidual tissues. Syn., *Chorioepithelioma malignum*, *Sarcoma deciduocellulare*; *Syncytioma malignum*.

Deciduosa sarcoma (*de-sid-u-o-sar-ko'-mah*). See *Deciduoma malignum*.

Deciduous (*de-sid-u-us*) [*de*, away from; *cadere*, to fall]. Falling off. **D. Teeth**, the temporary teeth or milk-teeth.

Decinormal (*des-e-nor'-mal*) [*deci*; *norma*, normal]. Having one-tenth the strength of the normal.

Declination (*dek-lin-a'-shun*) [*decline*]. The dip of the magnetic needle.

Declinator (*dek-lin-a-tor*) [*decline*]. An instrument for holding the dura apart during trephining.

Decline (*de-klīn'*) [*declinare*, to bend]. A gradual decrease, as of a fever; a wasting away of the bodily strength.

Declive (*de-klīv'*) [*declivis*, sloping]. 1. A lower or descending part. 2. See *Declivis cerebelli*.

Declivis cerebelli (*de-klīv-īs ser-e-bel'-ī*) [L.]. The sloping posterior aspect of the monticulus.

Decoction (*de-ko'-shun*) [*decoquere*, to boil down]. A liquid preparation obtained by boiling vegetable substances in water.

Decollation (*de-kol-a'-shun*). See *Decapitation*.

Decollator (*de-kol'-a-tor*) [*decollare*, to behead]. An instrument for fetal decapitation.

Decolorant (*de-kul'-or-ant*) [*de*, priv.; *color*]. An agent for the altering or removal of color.

Decoloration (*de-kul or a'-shun*) [*decolorare*, to deprive of color]. Removal of color.

Decombustion (*de-kom-bust'-yun*). See *Deoxidation*.

Decompensation (*de-kom-pen-sa'-shun*) [*de*, priv.; *compensare*, to compensate]. Failure of compensation (as of the circulation or of the heart).

Decompose (*de-kom-pōz'*). 1. To cause a compound to break up into its simpler constituents. 2. To undergo putrefaction.

Decomposition (*de-kom-po-zīsh'-un*) [*decomponere*, to decompose]. 1. The separation of the component principles of a body. 2. Putrefactive fermentation.

Decompression (*de-kom-presh'-un*). The removal of compression or pressure.

Decortication (*de-kor-tik-a'-shun*) [*de*, from; *cortex*, the bark]. 1. The stripping of the bark or husk of a plant. 2. The stripping off of portions of the cortical substance of the brain from the summits of the gyri.

Decostate (*de-kos'-tāt*) [*de*, from; *costa*, a rib]. Without ribs.

Decrement (*dek'-re-ment*). See *Decline*.

Decrepitation (*de-krep-it-a'-shun*) [*decrepitare*, to crackle]. A crackling or crepitation.

Decrustation (*de -krust - a' - shun*) [*de*, from; *crusta*, a crust]. The detachment of a crust.

Decubital (*de-ku'-bit-al*). Relating to a decubitus or to a bed-sore.

Decubitus (*de-ku'-bit-us*) [*decumbere*, to lie down]. 1. The recumbent or horizontal posture. 2. A bed-sore. **D., Acute**, a form of bed-sore due to cerebral lesions. **D., Andral's**. See under *Sign*.

Decurtation (*de-kur-ta'-shun*) [*decurtare*, to curtail]. The ablation or shortening of a structure or usual duration of a condition.

Decurvature (*de-kur'-a-chor*) [*decurvatus*, bent back]. A descending curvature.

Decussate (*de-kus'-āt*) [see *Decussation*]. To intersect; to cross.

Decussation (*de-kus-a'-shun*) [*decussatio*, a crossing]. A chiasma or X-shaped crossing, especially of symmetric parts, as of nerve-fibers, nerve-tracts, or nerve-filaments. The principal decussations are that of the optic nerve and that of the lateral pyramidal tracts in the medulla. **D., Forel's**, the ventral tegmental decussation. **D., Fountain**, Spitzka's term for such a decussation of nerve-fibers as is seen in the cortex of the anterior quadrigeminum. **D., Motor**. See *D. of the Pyramids*. **D. of the Optic Nerve**, the chiasm. **D., Pineal**, Spitzka's term for the crossing of certain fibers of the inner division of the reticular formation. **D., Piniform**. See *D. of the Pyramids, Sensory*. **D., Pyramidal, Superior**, **D., Pyramidal, Upper**. See *D. of the Pyramids, Sensory*. **D. of the Pyramids**, **D., Pyramidal**, the oblique crossing of the bundles of the anterior pyramids of the oblongata from opposite sides of the median fissure. Syn., *Inferior decussation*; *Motor decussation*; *Piniform decussation*; *Ventral decussation of the pyramids*. **D. of the Pyramids, Sensory**, a crossing of certain fibers having their origin in the funiculi cuneati of the spinal cord, which occurs in the upper part of the oblongata, between the anterior pyramids and the gray floor of the fourth ventricle. Syn., *Decussation of the fillet*; *Interolivary decussation*; *Pyramidal posterior decussation*. **D. of the Pyramids, Ventral**. See *D. of the Pyramids*. **D., Sensory**. 1. See *D. of the Pyramids, Sensory*. 2. The crossing of the outer bundles of the anterior pyramids of the spinal cord. Syn., *Superior decussation*. **D., Sensory, Middle**, a crossing in the median line of certain fibers between the upper and lower pyramids. **D., Tegmental**,

- of Meynert, the crossing of the fibers in the cortex of the anterior quadrigenium.
- Decussorium** (*de-kus-o'-re-um*) [L.]. An instrument for depressing the dura after trephining.
- Dedalous, Dædalous** (*ded'-al-us*) [*daidalos*, curiously wrought]. Labyrinthiform, intricately wrought.
- Dedentition** (*de-den-tish'-un*) [*de*, down; *dens*, a tooth]. The shedding of the teeth.
- Dedolation** (*ded-o-la'-shun*) [*dedolatio*, a hewing off]. A cutting off obliquely.
- Deep** (*dep*). Not superficial. **D. Reflexes.** See under *Reflex*. **D. Water**, water obtained from a porous layer beneath the first imperious stratum.
- Defecation** (*de-fek-a'-shun*) [*defecare*, to separate from the dregs]. 1. The evacuation of the bowels. 2. Clarification, as of wine. Cf. *Decantation*.
- Defensive Proteids.** See *Proteids*, *Defensive*.
- Deferent** (*de-f'er-ent*) [*deferens*, carrying away]. Carrying away or down; efferent.
- Deferentectomy** (*de-f'er-ent-ek'-to-me*). Excision of the vas deferens.
- Deferential** (*de-f'er-ent-shal*). Pertaining to the vas deferens.
- Deferentovesical** (*de-f'er-en-sho-o-ves'-ik-ul*). Pertaining to both the vas deferens and the bladder.
- Deferentitis** (*de-f'er-en-ti'-tis*) [*deferens*; *itis*, inflammation]. Inflammation of the vas deferens.
- Defervescence** (*de-f'er-ves'-ens*) [*defervescere*, to cease boiling]. Disappearance of fever.
- Defibrination** (*de-f'i-brin-a'-shun*) [*de*, from; *fibrin*, a fiber]. The removal of fibrin from blood or lymph.
- Defining Power** (*de-f'i'-ning*). See *Definition*.
- Definition** (*de-f'in-ish'-un*) [*definire*, to bound by limits]. In optics, the power of a magnifying lens to show clear outlines of the object examined, free from aberration or distortion.
- Deflagration** (*de-f'lag-ra'-shun*) [*deflagrare*, to be consumed]. A sudden, violent combustion, such as accompanies the oxidation of certain inorganic substances by mixing them with an easily decomposing salt, such as the alkaline chlorates and nitrates.
- Deflagrator** (*de-f'la-gra'-tor*) [see *Deflagration*]. An apparatus for producing very rapid combustion. **D., Hare's.** See *Battery*, *Hare's*.
- Deflect** (*de-f'lect*) [*deflecto*, to bend away]. To turn or bend from a straight course.
- Desluvium capillorum** (*de-flu'-ax-um kap-il-lor'-um*). Alopecia.
- Desfluxion** (*de-fluk'-shun*) [*de*, down; *fluere*, to flow]. A discharge.
- Deformation** (*de-for-ma'-shun*) [*deformare*, to deform]. The process of disfigurement. **D., Sprengel's**, congenital upward displacement of one of the scapulae. **D., Volkmann's**, congenital tibial dislocation.
- Deformity** (*de-for'-mity*). Abnormal shape or structure of a body or part. **D., Anterior.** See *Lordosis*.
- Defunctionalization** (*de-funk-shun-al-iz-a'-shun*). The act of destroying a function.
- Defurfuration** (*de-fur-fur-a'-shun*) [*de*, from; *furfur*, bran]. Desquamation.
- Defuselation** (*de-fu-sel-a'-shun*). The removal of fusel oil from spirits.
- Defusion** (*de-fu'-zhun*). See *Decantation*.
- Deganglionate** (*de-gan'-gle-on-ate*). To remove ganglia.
- Degenerate** (*de-jen'-er-ate*) [see *Degeneration*]. 1. To revert to a lower type. 2. An individual who has reverted to a lower type.
- Degeneration** (*de-jen-er-a'-shun*) [*degenerare*, to become base]. 1. A morbid process consisting in the conversion of the elements of a tissue into some inert substance. 2. A term indicating imperfect or abnormal development of the psychic faculties. **Sen. Degeneration**. **D., Abercrombie's**, amyloid degeneration. **D., Albuminoid**. Synonym of *Amyloid Degeneration*. **D., Albuminous**, albuminous infiltration. **D., Amyloid**. See *Amyloid degeneration*. **D., Armanni-Ehrlich's**, hyaline degeneration of the epithelial cells of Hinkle's looped tubes in diabetes. **D., Ascending**, a trophic degeneration of nerve fibres or tracts progressing from the site of the original lesion toward the cerebrum. **D., Calcareous**. See *Infiltration*, *Calcareous*. **D., Cellulose**. See *Amyloid Degeneration*. **D., Cheesy**. See *Cazeation*. **D., Chitinous**. See *Amyloid Degeneration*. **D., Colloid**, the change of the protoplasm of epithelial cells into a substance that resembles mucus, but is not precipitated by alcohol or acetic acid. **D., Cystic**, degeneration with cyst formation. **D., Cystoid, of the Retina**, round or oval cystal spaces surrounded by hypertrophied radial fibers found in the retina at all ages as described by Iwanoff. **D., Descending**, a degeneration of nerve-fibers or tracts extending peripherally from the original lesion. **D., Earthy**. See *Calcification* and *Infiltration*, *Calcareous*. **D., Fascicular**, that form of atrophy of paralyzed muscles following pathologic change in the motor ganglion cells of the central tube of the gray matter of the spinal cord or their efferent fibers. **D., Fatty**, a change of the products of the tissues into fat. **D., Fibrofatty, of the Placenta**, an association of fatty degeneration of the placenta with fibromatous degeneration of the chorionic villi and of the decidual serotina. **D., Fibrous, of the Heart**, hypertrophy of the cardiac contractile tissue accompanying chronic interstitial inflammation. **D., Gelatiniform**. See *D., Gelatin*. **D., Granular**, parenchymatous degeneration distinguished by a deposit of albuminous particles. **D., Hoen's**, degenerative change in striated muscles with nuclear proliferation. **D., Hyaline**, a degeneration affecting particularly the connective tissue of the walls of blood-vessels, and giving rise to a substance resembling amyloid material, but lacking its reactions. See *Amyloid Degeneration*. **D.,**

Hyaloid. See *Amyloid Degeneration*. **D.**, **Hydrocarbonaceous**, Paschutin's term for a special degeneration peculiar to diabetes. Syn., *Paschutin's degeneration*. **D.**, **Liquefactive**, a process resembling fatty degeneration, a accompanying fibrinous exudations. **D.**, **Meckel's**, cholesterol disease or waxy degeneration. **D.**, **Mineral**. See *Calcification*. **D.**, **Mucoid**, the degeneration of tissue into a jelly-like, transparent substance containing mucin. **D.**, **Myelin**, a process sometimes occurring in chronic pneumonia in which there is a formation of myelin coincident with fatty degeneration in the pulmonary alveoli. **D.**, **Myxomatous**. See *D.*, *Mucoid*. **D.**, **Parenchymatous**. See *Cloudy Swelling*. **D.**, **Parenchymatous, of the Kidney**, a degeneration of the parenchyma of the kidney following the acute nephritis of pregnancy, diphtheria, or an acute attack of fever. It is accompanied by 10 to 25% of albumin in the urine, which remains of normal quantity. **D.**, **Paschutin's**. See *D.*, *Hydrocarbonaceous*. **D.**, **Pigmentary**, **D.**, **Pigment**, a pigmentation of the muscles accompanying the atrophy due to cachexia, insufficient food, or the marasmus of old age. **D.**, **Putrid**. See *Hospital Gangrene*. **D.**, **Reaction of**. See *Reaction of Degeneration*. **D.**, **Signs of**, physical imperfections, such as asymmetry of corresponding parts, adherent lobules of the ear, stammering, supernumerary or deficient digits, etc., observed in persons presenting psychic degeneration. **D.**, **Theroid**, in psychiatry, the lowering or approximation of the human mental faculties and instincts to those of the lower animal. **D.**, **Trabecular**, a degeneration of the bronchial wall in which there is a hypertrophy of the elastic and inelastic tissues of the fibrous sheath of the bronchus and its cartilages. **D.**, **Türk's**, secondary parenchymatous degeneration of the spinal nerve-trunks. **D.**, **Uratic**, the deposition of uric acid and the urates in the tissues. **D.**, **Virchow's**. See *Amyloid Degeneration*. **D.**, **Vitreous**. See *Albuminoid Disease and Amyloid Degeneration*. **D.**, **Wallerian**. See under *Wallerian*. **Deglubration** (*deg-la-bra'-shun*) [*deglubrare*, to make smooth]. The process of becoming bald. **Deglutitio impedita** (*de-glu-tish'-e-o im-ped-i-tah*). Synonym of *Dysphagia*. **Deglutition** (*deg-lu-tish'-um*) [*deglutitio*, a swallowing]. The act of swallowing. **Degustation** (*de-gus-ta'-shun*) [*degustare*, to taste]. The act of tasting. **Dehiscence** (*de-his'-ens*) [*de*, off; *hiscere*, to gape or yawn]. The act of splitting open. **D.s**, **Zuckerkindl's**, small gaps sometimes existing in the papyraceous lamina of the ethmoid bone, and bringing the lining membrane of the latter in contact with the dura. They are not pathologic. **Dehydration** (*de-hi-dra-ta'-shun*). The removal of hydrogen from a compound by means of reducing agents, by heating, or by

the action of strong acids on hydrocarbons. Cf. *Dehydration*.

Dehydration (*de-hi-dra'-shun*) [*de*, away from; *idrap*, water]. The removal of water.

Dehydrogenize (*de-hi'-dro-jen-iz*). To deprive of hydrogen.

Dehydrotriacetoneamin (*de hi dro tri as et on am'-in*). A substance acting as a base obtained from acetone by action of ammonia. Syn., *Acetonin*.

Deintoxication (*de-in-toks-ik-a'-shun*) [*de*, from; *intoxication*]. The process of overcoming the effects of toxic substances.

Deintoxification (*de-in-toks-ij-ik-a'-shun*). See *Deintoxication*.

Deiters' Cells. 1. The branched, flattened cells of the neuroglia. 2. The cyhndricconic cells resting upon the basilar membrane of Corti's organ and supporting the hair-cells. **D.'s Nucleus**, a large nucleus situated in the oblongata between the inner portion of the cerebral peduncles and the restiform body. **D.'s Phalanges**, the phalangeal processes of Deiters' cells in the organ of Corti. **D.'s Process**, the axis-cylinder process of a nerve-cell; the neuraxon.

Dejecta (*de-jek'-tah*) [L.]. Feces.

Dejection (*de-jek'-shun*) [*dejecta*]. The discharge of fecal matter; the matter so discharged.

Dejecture (*de-jek'-chur*) [*dejecta*]. Matter evacuated from the intestine; feces.

Déjérine's Disease. Hypertrophic interstitial neuritis of infancy.

Déjérine-Sottas' Disease, D.-S.'s Type of Muscular Atrophy. See *Déjérine's Disease*.

Delaceration (*de-las-er-a'-shun*) [*delacerare*]. To tear to pieces or lacerate severely.

Delactation (*de-lak-ta'-shun*). See *Ab lactation*.

Delamination (*de-lam-in-a'-shun*) [*de*, away; *lamina*, a plate]. The splitting into layers.

Delhi Boil (*del'-he*). See *Furunculosis orientalis*.

Deligation (*del-ig-a'-shun*) [*deligatio*, a binding]. Ligation, as of an artery.

Delimitation (*de-lim-it-a'-shun*) [*delimitare*, to mark out]. The determination of the limits of areas, regions, or organs in physical diagnosis.

Deliquation, Deliquiation (*del ik-wa'-shun, del-ik-wi-a'-shun*). Deliquescence.

Deliquescence (*del-ik-wes'-ens*) [*deliquescere*, to melt away]. A liquefaction by absorption of water from the atmosphere.

Deliquescent (*del-ik-was'-ens*) [see *Deliquescence*]. Dissolving; applied especially to salts that absorb moisture from the air and liquefy.

Delire à Java. See *Lata*.

Deliriant, Delirifacient (*de-le'-re-ant, de-le-re-ju'-she-ent*) [*delirium*]. Producing delirium.

Delirious (*de-le'-re-us*) [*delirium*]. Affected with delirium.

Delirium (*de-le'-re-um*) [L., "madness"]. A condition of mental excitement with confusion and usually hallucinations and illusions. **D.**, **Alcoholic**. See *D. tremens*. **D. constantium**,

the constant repetition and expression of a single fixed idea, characteristic of the delirium of insane persons having fever. **D. cordis**, a violent, tumultuous beating of the heart. **D., Depressive**, a form of general delirium in which there is a marked torpidity as to ideas, feelings, and determinations. **D., Dupuytren's**. See *D. nervosum*. **D., Febrile**, the delirium of fever. **D. of Grandeur**, a condition in which an individual has insanely exaggerated ideas of his own importance or of his possessions. **D., Inanition**. That occurring in a person weakened by a febrile affection. **D. nervosum**, the delirium following severe surgical operations or injuries. **D. of Persecution**, that in which the patient imagines himself the object of persecution. **D., Primordial**, a form marked by ideas which persistently dominate the mind. **D., Toxic**, delirium caused by poisons. **D., Traumatic**. See *D. nervosum*. **D. tremens**, that arising from alcoholic poisoning. Characterized by constant tremor, insomnia, great exhaustion, distressing illusions, and hallucinations.

Delitescence (*del-it-es-ens*) [*delitescere*, to lie hid]. The sudden disappearance of inflammation by resolution.

Deliver (*de-liv'er*) [*de*, from; *liberare*, to free]. To free from something, especially to deliver a woman of a child or of the afterbirth. The word is also applied to the part removed, as to deliver the placenta or a tumor.

Delivery (*de-liv'ery*) [see *Deliver*]. The act of delivering or freeing from something, especially the relieving of a woman from the contents of the uterus; parturition; childbirth. **D., Postmortem**, the birth of a fetus after the death of the mother.

Delomorphous (*del-o-mor'fus*) [*δελος*, conspicuous, *μορφή*, form]. Having a conspicuous form. **D. Cells of Rollet**, large, well-defined cells between the membrana propria and the chief cells of the fundus glands of the gastric mucous membrane. They are supposed to secrete the hydrochloric acid.

Delphinin, Delphinium, Delphinoidin, Delphisin (*del'fin-in, del-fin'e-um, del-fin-oid'in, del'fin-in*). See *Stropharia*.

Deltoid (*del'toid*) [*delta*, the Greek letter Δ; *eidōs*, likeness]. Having the shape of the Greek letter *delta*; triangular, as the *deltoid muscle*. See under *Muscle*.

Delusion (*de-lu'zhun*) [*de*, from; *ludere*, play]. A false belief, the falsity of which is apparent, but out of which the person cannot be reasoned by indubitable evidence. **D.s, Expansive**, **D.s, Large**, a symptom of the second stage of general paralysis of the insane, in which the patient conceives ideas involving colossal size, magnificent wealth, or extravagant numbers.

Delusional (*de-lu'zhun-əl*) [*delusion*]. Of the nature of a delusion. Characterized by delusions. **D. Stupor**. See *Insanity, Confusional*.

Demagnetize (*de-mag'net-iz*). To deprive an object of magnetic properties.

Demarcation (*de mark'at-shun*) [*demarcare*, to set the bounds of]. Separation. **D., Line of**, a red line forming at the edge of a greenish area and marking the limit of the process.

Demasquay's Symptom. Inmobility or lowering of the larynx during deglutition and phonation. It is characteristic of tracheal syphilis.

Demedication (*de-med-ik-a'-shun*). The removal of deleterious drugs from the system, as lead, arsenic, or phosphorus, by the reversal of the electric current used in cataphoresis, in a suitably arranged bath.

Dement (*de'ment*) [*dementia*]. A person suffering with dementia.

Dementation (*de-men-ta'-shun*) [*dementia*]. Loss of mind, insanity.

Demented (*de-ment-ed*). Deprived of reason.

Dementia (*de-men'te-ah*) [*de*, from *mens*, the mind]. A form of insanity characterized by a deterioration or loss of the intellectual faculties, the reasoning power, the memory, and the will. **D., Paralytic**, general paralysis of the insane. **D. præcox**, a form which appears at the age of puberty in children previously intellectually bright, there are various delirious symptoms at the beginning, constant sudden impulses and rapid termination in a dementia which is more or less complete. **D., Primary**, that occurring independently of other forms of insanity. **D., Secondary**, that following another form of insanity. **D., Senile**, that due to the degenerations of old age. **D., Terminal**, that coming on toward the end of other forms of insanity or certain nervous diseases.

Demi [*demi*, half]. A prefix meaning half.

Demifacet (*dem'e-fa'-et*) [*demi*, from]. One-half of an articulation surface adapted to articulate with two bones.

Demilune Cells, Heidenhain's (*dem'e-lūn*). Crescentic bodies lying between the cell and the membrana propria of an acinus of a salivary gland.

Demipenniform (*dem'e-pen'e'-vorn*) [*demi*, penna, a wing]. Applied to structures or organs which have one of two narrow winged.

Demodex (*dem'e-odex*) [*δημῶς*, lat. *deus*, or insect]. A genus of parasitic insects. **D. folliculorum**, the pimple-mite, a parasite found in the sebaceous follicles particularly of the face. It probably does not produce any symptoms.

Demography (*de-mog'ra-fi*) [*demos*, the people; *γραφειν*, to write]. The science of peoples collectively considered, social science, including that of vital statistics and the consideration of questions of state and race. **D., Dynamic**, a study of the relations of human communities, their rise, progress and fall. **D., Static**, a study of the anatomy of a human community, its numbers, sex, age, wealth, calling, etc., of the people.

Demonomania (*de-mon-o-ma'-ne-ah*) [*δαίμων*, a devil, *μανία*, madness]. A form of madness in which a person imagines himself possessed of a devil.

Demonomy (*de-mon'-om-e*) [*δήμος*, the people; *νόμος*, a law; a custom]. The science of humanity.

Demonophobia (*de-mon-o-fo'-be-ah*) [*δαίμων*, a devil; *φόβος*, fear]. Morbid dread of devil and demons.

(*de*) **Morgan's Spots**. See *Morgan's (de) Spots*.

Demorphinization (*de-morf-in-i-sa'-shun*) [*de*, from; *morphin*]. Treatment of morphinism by gradual withdrawal of the drug.

Démours' Membrane. See *Descemet's Membrane*.

Demulcent (*de-mul'-sent*) [*demulcere*, to soothe]. 1. Soothing; allaying irritation of surfaces, especially mucous membranes. 2. A soothing substance, particularly a slippery, mucilaginous liquid.

(*de*) **Mussey's Point, de M.'s Symptom**. See *Mussey's (de) Point*.

Denarcotized (*de-nar'-ko-tized*) [*de*, priv.; *ναρκωτικός*, narcotic]. 1. Deprived of narcotizing qualities. 2. Of opium, deprived of narcotin.

Denaturization (*de-nat-u-ri-sa'-shun*) [*de*, priv.; *νатура*, nature]. Alteration in the characteristics of an organic substance by chemical action, boiling, or addition.

Dendraxo (*den-draks'-on*) [*dendron*; *axon*]. Von Lenhossék's term for a neuron with a short axon, its axonal processes being for the most part devoid of sheaths.

Dendric (*den'-drik*) [*dendron*]. Provided with *dendrites*.

Dendrite (*den'-drit*). See *Dendron*.

Dendritic (*den-drit'-ik*) [*dendron*]. Branching like a tree.

Dendron (*den'-dron*) [*δένδρον*, a tree]. One of the short, free projections or so-called protoplasmic processes of a nerve-cell.

Dengue (*den'-gu*) [West Ind.]. An acute, epidemic, infectious disease, characterized by a febrile paroxysm, severe pains in the bones, joints, and muscles, and, at times, a cutaneous eruption. The period of incubation is from 3 to 5 days, the invasion is sudden, with high fever (106° F.), severe pains in the muscles, bones, and joints, the last being swollen and reddened. After the fever has lasted 3 or 4 days it subsides, but at the end of from 2 to 4 days a second paroxysm accompanied with pain occurs. Convalescence is slow; complications are rare. Syn., *Breakbone fever*; *Dandy fever*.

Denguis (*den'-guis*). Synonym of *Dengue*.

Denidation (*de-ni-da'-shun*) [*de*, priv.; *nidus*, a nest]. The disintegration and ejection of the superficial part of the uterine mucosa.

Denigé's Test for Formaldehyd in Milk. Make a solution of 30 Cc. of 0.5% solution of fuchsin; 250 Cc. distilled water; 10 Cc. of sodium bisulfite, sp. gr. 1.375; 10 Cc. pure sulfuric acid. To 1 Cc. of this solution add 10 Cc. of the suspected milk and let it

stand 5 minutes. Then add 2 Cc. of pure hydrochloric acid and shake. In the presence of formaldehyd a violet color will appear, a yellowish-white color in its absence. **D.'s Test for Uric Acid**, convert uric acid into alloxan by the action of nitric acid; expel the excess of nitric acid by gentle heat, and treat with a few drops of sulfuric acid and a few drops of commercial benzol (containing thiophen); a blue coloration will result.

Denigration (*de-ni-gra'-shun*) [*denigrare*, to blacken]. The act or process of rendering black; the state of having become black.

Denisensko's Method. The subcutaneous injection of a watery extract of *Chelidonium majus* in the treatment of cancer.

Denitration (*de-ni-tra'-shun*). The process of taking away nitric acid from a compound.

Denitrify (*de-ni'-tre-fi*) [*de*, priv.; *nitrogen*]. To remove nitrogen.

Denitrifying (*de-ni'-tre-fi-ing*). Applied to bacteria which reduce nitric acid to nitrous acid and ammonia.

Dénonvilliers' Fascia. The rectovesical fascia between the prostate gland and rectum.

Densimeter (*den-sim'-et-er*) [*densus*, dense; *μέτρον*, a measure]. An appliance for ascertaining the specific gravity of a liquid.

Density (*den'-sit-e*) [*densitas*, thickness]. Closeness; compactness, especially the degree of closeness of one body compared with an equal volume of another taken as a standard; specific gravity. In electricity, the amount of electricity accumulated on a unit of surface during a given time.

Dentagra (*den-ta'-grah*) [*dens*, a tooth; *ἀγρα*, a seizure]. 1. Toothache. 2. A tooth-forceps.

Dental (*den'-tal*) [*dens*]. Pertaining to the teeth. **D. Engine**, a machine worked by a treadle and possessing a flexible cable and adjustable arm and hand-piece, which afford great facility of movement and adaptation. By means of attachments to the hand-piece drills can be operated at various angles. **D. Tubuli**, the minute wavy tubes occurring in the dentin of teeth.

Dentaphone (*den-ta'-fōn*) [*dens*; *φωνή*, sound]. An instrument placed on the teeth to aid in hearing.

Dentata (*den-ta'-tah*). See *Axis* (2).

Dentate (*den'-tāt*) [*dens*]. Toothed; having a toothed or serrated edge. **D. Body**. See *Corpus dentatum*. **D. Convolution**, a convolution found in the hippocampal fissure. **D. Fascia**, the serrated free edge of the dentate convolution. **D. Fissure**, the hippocampal fissure.

Dentation (*den-ta'-shun*). The formation of tooth-like structures, as on the margin of a leaf.

Dentatum (*den-ta'-tum*) [L.]. The dentate nucleus of the cerebellum.

Dentelation (*den-tel-a'-shun*). The condition of being furnished with tooth-like processes.

Dentes (den'-tēz) [L. plural of *dens*, a tooth]. Teeth. **D. sapientiae**, wisdom-teeth; the third molar teeth.

Denticle (den'-tik-l) [*denticulus*, a small tooth]. A small tooth or projecting point.

Denticulate (den'-tik'-u-lāt) [*denticle*]. Having minute dentations; furnished with small teeth or notches.

Dentifrice (den'-ti'-ris) [*dens*; *fricare*, to rub]. A substance for cleansing the teeth.

Dentigerous (den'-tij'-er-us) [*dens*; *gerere*, to carry]. Bearing or containing teeth, as a *dentigerous* cyst.

Dentilave (den'-te-lāv) [*dens*; *lavare*, to wash]. A mouth-wash or tooth-wash.

Dentin, Dentine (den'-tin) [*dens*]. A modified osseous tissue forming the principal part of a tooth, and consisting, histologically, of dental tubuli and intertubular tissue, chemically, of the phosphates of calcium and magnesium, the carbonate and fluorid of lime, and organic matter, chiefly gelatin. The bony structure of the tooth lying under the enamel of the crown and the cement substance of the root. **D., Secondary**, adventitious deposits of dentin which occur in or upon the dental pulp after tooth-formation is complete.

Dental (den'-tin-al) [*dentin*]. Pertaining to or composed of dentin.

Dentinification (den'-tin-i'-k-a'-shun) [*dentin*; *facere*, to make]. The formation of dentin through the agency of specialized cells, the odontoblasts.

Dentinoid (den'-tin-oid). 1. Similar to dentin. 2. Pertaining to an odontoma.

Dentinosteoid (den'-tin-os'-te-oid) [*dentin*; *osteos*, bone]. A tumor of dentin and bone.

Dentiporous (den tip'-or-us) [*dens*; *πῶρος*, a pore]. Having pores with toothed edges.

Dentist (den'-tist) [*dens*]. One who practises dentistry.

Dentistry (den'-tis-tree). Dental surgery, embracing everything pertaining to the treatment of diseases of the teeth.

Dentition (den'-tish'-un) [*dens*]. Teething;

the cutting of the teeth. **D., Primary**, the cutting of the temporary or milk-teeth. **D., Secondary**, the eruption of the 32 permanent teeth.

Dentoiletta (dent'-wah-let'-sh). A device consisting of two mirrors so arranged that persons may examine their own teeth.

Dentola (den'-to-lah). A solution used on swollen gums, said to consist of cocaine hydrochlorid, 1 part, potassium bromid, 10 parts; glycerol and water, each, 200 parts.

Dentolingual (den'-to-ling'-wal). Pertaining to the teeth and the tongue or lingual nerve.

Dentoliva (den'-tol'-iv-ah) [*dens*, *oliva*, an olive]. The olivary nucleus.

Dentomental (den'-to-ment'-al). Pertaining to the teeth and chin.

Dentonasal (den'-to-na'-zal). Pertaining to the teeth and nose.

Denture (den'-chur) [*dens*]. 1. The entire set or group of teeth; the whole assemblage of teeth in both jaws. 2. A set, or plate, of artificial teeth.

Denucé's Ligament. A short and broad fibrous band in the wrist-joint, connecting the radius with the ulna.

Denucleated (de-nu'-kle-a-ted). Deprived of the nucleus.

Denudation (den-u-da'-shun) [*denudare*, to denude]. A stripping or making bare.

Denutrition (de-nu'-trish'-un) [*de*, from, *nutrire*, to nourish]. 1. Faulty or absent nutrition. 2. An atrophy and degeneration of tissue arising from lack of nutrition.

Deobstruent (de-ob'-stru-ent) [*de*; *obstruere*, to obstruct]. 1. Removing obstruction. 2. A medicine that removes obstruction, an aperient.

Deodorant (de-o'-dor-ant) [*de*; *odorare*, to smell].

1. Removing or concealing offensive odors. 2. A substance that removes or conceals offensive odors.

Deodoriferant (de-o'-dor-if'-er-ant) [see *Deodorant*]. 1. Possessing the power of overcoming bad odors. 2. See *Deodorant*.

Deodorized (de-o'-dor-ized) [see *Deodorant*]. Deprived of odor.

Deopillant, Deopillative (de-op'-il-ant, -at-iv) [*de*; *opillare*, to stop]. The same as *Deobstruent*.

Deorsum (de-or'-sum) [L.]. Downward.

Deorsumduction (de-or-sum-duk'-shun). A downward movement, as of the eye.

Deoxidation (de-oks-id-a'-shun) [*de*, from, *oxygen*]. The removal of the oxygen from a chemical compound.

Deoxygenation (de-oks-e-jen-a'-shun). See *Deoxidation*.

Dephlegmation (de-fleg-ma'-shun) [*de*, from, *phlegma*, to burn]. The removal of water by distillation.

Dephlegmator (de-fleg'-mat-or). That part of a still adapted to receive the vapors of such compounds as are condensed at successively lower and lower temperatures.

Depigmentation (de-pig-ment-a'-shun). The

THE TEMPORARY TEETH.

The top section of illustration is the upper set and the

or from microscopic preparations by the action of weak solutions of bleaching or oxidizing solutions.

Depilate (dep'-il-*il*) [*depilare*, to remove the hair]. To remove the hair.

Depilation (dep'-il-u'-*shun*) [*depilate*]. The removal or loss of the hair.

Depilatory (de-pil'-u'-*re*) [*depilate*]. 1. Having the power to remove the hair. 2. A substance, usually a caustic alkali, used to destroy the hair.

Depilous (dep'-il-*us*) [*depilate*]. Hairless.

Deplanate (dep'-lan-*at*) [*deplanare*, to level]. Levelled, flattened.

Depletion (de-ple'-*shun*) [*deplere*, to empty]. 1. The act of diminishing the quantity of fluid in the body or in a part, especially by bleeding. 2. The condition of the system produced by the excessive loss of blood or other fluids.

Deplumation (de-plu-ma'-*shun*) [*de*, down; off; *pluma*, feather]. The loss of the eyelashes.

Depolarization (de-po-lar-iz-a'-*shun*) [*de*; *potus*, pole]. The neutralization of polarity.

Depolarizer (de-po-lar-i-*zer*). A refracting plate used with a polarizer which resolves the polarized ray into ordinary and extraordinary rays.

Deportation (de-por-us'-*shun*) [*de*; *portare*, to bear]. Vent's term for the process in which the chorionic fringes are detached and lose all connection with the fetal placenta.

Deposit (de-pos'-*it*) [*de*; *ponere*, to place]. A sediment; a collection of morbid particles in a body.

Depositive (de-pos'-it-*iv*) [*deposui*]. A term applied to that state of the skin in which lymph is poured out and papules arise.

Depravation (de-prav-a'-*shun*) [*deprivare*, to vitiate]. A deterioration or morbid change in the secretions, tissues, or functions of the body.

Depressant (de-pres'-*ant*) [*see Depression*]. 1. Lowering. 2. A medicine that diminishes functional activity.

Depressed (de-pres'-*t*) [*see Depression*]. 1. Referring to a state of lowered vitality; affected with depression. 2. Having the dorso-lateral diameter reduced. 3. Flattened from above downward.

Depression (de-pres'-*un*) [*deprimere*, to depress]. 1. A hollow or fossa. 2. Inward displacement of a part, as of the skull. 3. Lowering of vital functions under the action of some depressing agent.

Depressomotor (de-pres-o-mo'-*tor*) [*depression*; *movere*, to move]. An agent that diminishes the action of the motor apparatus.

Depressor (de-pres'-*or*) [*depression*]. 1. A muscle, instrument, or apparatus that depresses. 2. A nerve, stimulation of which lowers the functional activity of a part, as the depressor nerve of the heart. 3. One of two substances found in the infundibular part of the hypophysis, having distinct physiologic properties. It produces a fall of blood-pressure. Cf. *Pressor*.

Deprimens (dep'-rim-*ens*) [L.]. Depressing. A depressing muscle. D. oculi, the rectus inferior muscle of the eye.

Depurated (dep'-u-ra-*ted*). Purified; cleansed.

Depurative (dep'-u-ra-*tiv*) [*see Depurator*]. Purifying or cleansing.

Depurator (dep'-u-ra-*tor*) [*depurare*, to purify]. A drug or device for cleansing.

DeR. A contraction and symbol of the term *Reaction of Degeneration*.

Deradelphus (der-ad-el'-*us*) [*δέρην*, neck; *ἀδελφός*, brother]. A monocephalic dual monstrosity, with fusion of the bodies above the umbilicus, and with four lower extremities and three or four upper.

Deradenitis (der-ad-en-i'-*tis*) [*δέρην*, neck; *ἀδήν*, a gland; *εἶς*, inflammation]. Inflammation of the cervical glands.

Deradenoncus (der-ad-en-on'-*cus*) [*δέρην*, neck; *ἀδήν*, a gland; *ὄγκος*, mass]. Swelling of a neck-gland.

Derangement (de-ran'-*ment*). Disorder of intellect; insanity.

Derbyshire Neck (der'-be-shir). *See Goiter*.

Dercum's Disease. *Adiposis dolorosa*, a painful dystrophy of the subcutaneous connective tissue, somewhat resembling myxedema.

Derencephalocoele (der-en-sef'-al-o-*cel*) [*δέρην*, neck; *encephalocoele*]. Hernia of the brain through a fissure in the cervical vertebrae.

Derencephalus (der-en-sef'-al-*us*) [*δέρην*, neck; *ἐγκέφαλος*, brain]. A variety of single autostitic monsters of the species anencephalus, in which the bones of the cranial vault are rudimentary, the posterior portion of the occiput absent, and the upper cervical vertebrae bifid, the brain resting in them.

Deric (der'-*ick*) [*δέρμας*, the skin]. External.

Derivant (der'-iv-*ant*) [*see Derivation*]. Derivative; a derivative drug.

Derivation (der-iv-a'-*shun*) [*derivare*, to turn a stream from its banks]. The drawing away of blood or liquid exudates from a diseased part by creating an extra demand for them in some other part.

Derivative (de-riv'-*at-iv*). 1. Producing derivation. 2. An agent that produces derivation.

Derm, Derma (derm, der'-*mah*) [*δέρμα*, skin]. The true skin.

Derinacenter andersoni. The tick responsible for the spread of the infecting principle of Rocky Mountain fever.

Dermad (der'-*mad*) [*derm*; *ad*, to]. Externally; toward the skin; ectad.

Dermagra (der-ma'-*grah*). *See Pellagra*.

Dermal (der'-*mal*). Pertaining to the skin.

Dermalaxia (der-mal-aks'-*e-ah*) [*derm*; *μαλακία*, softness]. Morbid softening of the skin.

Dermalgia (der-mal'-*je-ah*). *See Dermatalgia*.

Dermanoplasty (der-man'-o-plas-*te*) [*derm*; *αναπλασσειν*, to form anew]. Skin-grafting.

Dermapostasis (der-ma-pos'-*ta-sis*) [*derm*; *προστασις*, a falling away]. A skin disease with focal induration.

Dermatagra (der-mat-a'-*grah*). *See Pellagra*.

Dermatalgia (der-mat-al'-*je-ah*) [*derm*, *ἄλγος*, pain]. Pain in the skin unaccompanied by

any structural change, and caused by some nervous disease or reflex influence.

Dermataneuria (*der-mat-ah-nu'-ee-ah*) [*derm*; *ā*, priv., *νῆρον*, a nerve] Derangement of the nerve-supply of the skin, giving rise to anesthesia or paralysis.

Dermatrophia (*der-mat-ah-tro'-fe-ah*) [*derm*; *atrophy*] Atrophy of the skin.

Dermathemia (*der-mat-he'-me-ah*) [*derm*; *αἷμα*, blood] A congestion of the skin. Syn., *Dermemia*, *Dermohemia*.

Dermatin (*der'-mat-in*). A preparation used in dermatology. It consists of salicylic acid, 5-7 parts; starch, 7-15 parts; tale, 25-50 parts; silicic acid, 30-60 parts; kaolin, 3-9 parts. It is used as a protective.

Dermatitis (*der-mat-i'-tis*) [*derm*; *εἶναι*, inflammation] An inflammation of the skin.

D. ambustionis, **D. calorica**, the form due to burns and scalds. **D.**, **Blastomycetic**, a skin disease caused by a yeast-like fungus, *Blastomyces dermatitidis*. **D. congelationis**.

Same as *Frostbite*. **D. contusiformis**, erythema nodosum. **D.**, **Duhring's**. See *D. herpetiformis*. **D.**, **Electroplating**, a form of inflammation due to lime-dust employed in finishing electroplating, which, coming in contact with an abrasion, forms a caustic paste which in time produces an ulcer. **D. exfoliativa**, an acute or chronic inflammation of the skin, in which the epidermis is shed more or less freely in large or small scales. See *Pityriasis rubra*. **D.**

gangrenosa, sphaceloderma, gangrenous inflammation of the skin. **D. herpetiformis**, an inflammatory skin disease of a herpetic character, the various lesions showing a tendency to group. It is a protean disease, appearing as erythema, vesicles, blebs, and pustules, and is associated with fever, itching, and burning. **D. hiemalis**, a recurrent inflammation of the skin associated with cold weather and allied to the erythemas; the color is dark blue. It attacks distal extremities first and appears to be due to circulatory disturbance. **D. medicamentosa**, drug eruptions, inflammatory eruptions upon the skin due to the action of certain drugs taken internally. **D. nodularis**

necrotica, a necrosis of the skin and superficial strata of the corium, due primarily to changes and consequent obstruction in the blood vessels between the cutis and subcutis. **D.**, **Oidial**. See *D. Blastomycetic*. **D. papillaris capillitii**, a chronic skin disease affecting the nape of the neck and adjacent parts, and characterized by minute red papules, which occasionally suppurate, and are usually traversed by a hair. They unite to form hard, white or reddish, keloid-looking elevations, from which a bundle of atrophied hairs protrudes. **D.**, **Primal**, that caused by contact with *Primula obconica*; it is due to the fine hairs on the under surface of the leaves. **D.**, **Pustular**, impetigo. **D.**, **Roentgen-ray**, **D.**, **X-ray**, that due to prolonged exposure

to roentgen-rays. **D. traumatica**, that resulting from traumatism. **D.**, **Vegetative**, elevated, vegetating lesions covered with crusts and very prone to bleeding, occurring in remissions of eczema on nardalge, and believed to be due to some infection. A similar affection in adults has been recorded under the names *eczema vegetans* and *præter mite vegetans*. **D. venenata**, that produced by the local action of irritant substances.

Dermato- [*tipus*, skin] A prefix signifying pertaining to the skin.

Dermatoautoplasty (*der-mat-o-aw'-to-plas-te*) [*dermato-*, *autoplasty*] Dermato-plasty by means of grafts taken from the patient's body.

Dermatocellulitis (*der-mat-o-sel-u'-di-tis*) [*dermato-*, *cellulitis*] Inflammation of the subcutaneous connective tissue.

Dermatoconiosis, **Dermatokoniosis** (*der-mat-o-kon-i'-osis*) [*dermato-*; *κόκκινος*, dust] Any skin disease due to dust.

Dermatocyst (*der-mat-o-sist*) [*dermato-*; *κύστης*] A cyst of the skin.

Dermatodysnia (*der-mat-o-din'-e-ah*). See *Dermatolite*.

Dermatodyschroia (*der-mat-o-dis-kro'-ah*) [*dermato-*; *δυσχρῶμα*, a bad color] Abnormal pigmentation of the skin.

Dermatophilus penetrans. The jigger, chigger, or chigo, a sand-flea of the West Indies and India parasitic in man.

Dermatography (*der-mat-og'-e-a-fe*) [*dermato-*, *γράφω*, to write] A description of the skin.

Dermatoheteroplasty (*der-mat-o-het'-er-es-plas-te*) [*dermato-*, *heteroplasty*] Dermato-plasty by means of grafts taken from the body of another than the patient.

Dermatoid (*der'-mat-oid*). See *Dermoid*.

Dermatokelidosis (*der-mat-ikel-i'-d-osis*) [*dermato-*; *αἰκλίδω*, to stain] Pigmentation of the skin.

Dermatol (*der'-mat-ol*) [*derm*]. $C_2H_5(OH)$, CO_2H , POH . Bismuth subgallate, an astringent, antiseptic powder, of rose-red color, used in affections of the skin and mucous membranes that are associated with excessive secretion, it is especially recommended for diarrhea in tuberculosis and typhoid fever. Dose internally 4-14 dr. (2-4 Gm.) daily.

Dermatologist (*der-mat-ol'-e-jist*) [see *Dermatology*] A skin specialist.

Dermatology (*der-mat-ol'-o-je*) [*dermato-*; *λογία*, science] The science of skin diseases.

Dermatolysis (*der-mat-ol'-i-sis*) [*dermato-*; *λύσις*, a loosing] A hypertrophy of the skin and subcutaneous tissue, with a tendency to the formation of folds.

Dermatoma (*der-mat-ol'-ma*) [*dermato-*; *μα*, a tumor] A tumor of the skin.

Dermatome (*der'-mat-um*) [*dermato-*; *μετρον*, to cut] An instrument for incising the skin.

Dermatomucosomyositis (*der-mat-mu-co-si-mi-oi'-tis*) [*dermato-*; *μύς*, muscle] Inflammation involving the skin, mucosa and muscles.

Dermatomycosis (*der-mat-o-my-co'-sis*) [*dermato-*, *mycosis*] Any skin disease caused

by a vegetable parasite. **D. achorina.** See *Favus*. **D. barbæ nodosa.** See *Sycosis parasitaria*. **D. diffusa.** See *Tinea imbricata*. **D. favosa,** favus of the skin, exclusive of that of the hair and nails. **D. furfuracea.** See *Tinea versicolor*. **D. maculovesiculosa.** See *Tinea trichophytina*. **D. marginata.** See *Eczema marginatum*. **D. palmellina,** a parasitic disease described by Pick as affecting the axillæ, the chest, the backs of the hands, the inner surfaces of the thighs, and the pubes. It is characterized by the presence of rounded spores adherent to the hairs. **D. pustulosa.** See *Impetigo contagiosa*.

Dermatomyositis (der-mat-o-mi-o-si'-tis) [dermato-; myositis]. An infectious inflammation of both skin and muscles, accompanied by edema, fever, and general depression. Cf. *Myositis*; *Polymyositis*.

Dermatoneuria (der-mat-o-nu'-re-ah). See *Dermatoneurosis*.

Dermatoneurology (der-mat-o-nu-rol'-o-je) [dermato-; neurology]. Neurology limited to the skin.

Dermatoneurosis (der-mat-o-nu-ro'-sis) [dermato-; neurosis]. A neurosis of the skin. **D. indicatrix,** an eruption of the skin due to nervous disease and indicative of more serious symptoms. **D., Stereographic,** a form characterized by an elevation, bump, or wheal corresponding in size and shape to the object the application of which produced the elevation. It is due to an extravasation of serum, and is illustrated in the welts that follow light blows of the whip on a nervous horse.

Dermatonosis (der-mat-on'-o-sis) [dermato-; νόσος, disease]. Any disease of the skin.

Dermatophone (der'-mat-o-fōn) [dermato-; φωνή, sound]. A stethoscopic appliance devised by Voltolini-Hueter, by means of which one may perceive the sound of the blood-current in the skin. It also makes perceptible the muscle-tones, and in the tendons and bones it demonstrates the transmitted vibrations. Syn., *Myophone*; *Osteophone*; *Tendophone*.

Dermatophyte (der'-mat-o-fīl) [dermato-; φυτόν, a plant]. 1. Any species of fungous vegetation that grows upon the skin. 2. A cutaneous appendage, as a hair, feather, scale, nail or horn.

Dermatoplasia (der-mat-o-pla'-ze-ah) [dermato-; πλάσσειν, to form]. The reparative power of the skin to injury.

Dermatoplasty (der'-mat-o-plas-te) [see *Dermatoplasia*]. An operative replacement of destroyed skin by means of flaps or skin-grafts.

Dermatorrhagia (der-mat-or-a'-je-ah) [dermato-; ῥήγναι, to burst forth]. Hemorrhage from the skin.

Dermatorrhea (der-mat-or-e'-ah) [dermato-; ῥέειν, a flowing]. A morbidly increased secretion from the skin.

Dermatosclerosis (der-mat-o-skle-ro'-sis). See *Scleroderma*.

Dermatosis (der-mat-o'-sis) [dermato-; νόσος, disease]. Any disease of the skin. **D., Angioneurotic,** an infectious, toxic, or essential skin disease, characterized by a general disturbance of the vascular tension, together with inflammatory excitation at the surface of the skin. **D., Engorgement,** a skin disease characterized by passive derangement of the circulation, with imperfect venous and lymphatic absorption. **D., Hemorrhagic,** a traumatic or essential disease of the skin, characterized by hemorrhage from the cutaneous blood-vessels, without inflammation or stasis; dermatorrhagia. **D., Neurotic,** a cutaneous affection due to disease of the sensory or trophic nerves. It may be self-limited in its course (cyclic), as herpes zoster and herpes febrilis; or it may be acyclic, as neurotic edema, neurotic atrophy, and neurotic necrosis of the skin. **D., Parasitic,** a papulovesicular disease described by Nielly, in which a filaria-like parasite was found in the vesicles, and believed by him to be identical with *craw-craw*. **D., Postvaccinal,** a dermatosis following vaccination, marked by lesions similar to those of urticaria pigmentosa except that desquamation is present and dermatographism is absent.

Dermatosome (der'-mat-o-sōm) [dermato-; σῶμα, body]. 1. A thickening or knot in the equatorial region of each spindle-fiber in the process of cell-division. 2. One of the hypothetical ultimate units that form the membrane of vegetal cells.

Dermatotherapy (der-mat-o-ther-a'-p-e). The therapeutics of cutaneous affections.

Dermatotomy (der-mat-o'-a-me) [dermato-; τέμνειν, to cut]. The anatomy or dissection of the skin.

Dermatoxerasia (der-mat-o-xer-a'-ze-ah) [dermato-; ξέρω, dryness]. Dryness of the skin. Cf. *Xeroderma*.

Dermatozoon (der-mat-o-zō'-on) [dermato-; ζῷον, an animal, pl., dermatozoa]. Any animal parasitic upon the skin.

Dermatozoonosis (der-mat-o-zo-on-o'-sis) [dermatozoon; νόσος, a disease]. A cutaneous disease due to animal parasites, such as *Acarus*, *Filaria*, *Ixodes*, *Leptus*, *Pediculus*, *Pulex*, *Sarcoptes*, etc.

Dermatrophia (der-ma-tro'-fe-ah). See *Dermatrotrophia*.

Dermectasia (der-mek-ta'-ze-ah). See *Dermatolysis*.

Dermelminthiasis (der-mel-min-thi'-ah-sis) [derm; ἔλκειν, a worm]. A cutaneous affection due to a parasitic worm. Cf. *Dermatozoonosis*.

Dermenchysis (der-men'-kis-is) [derm, ἔγχυσις, a pouring in]. Hypodermatic injection.

Dermic (der'-mik) [derm]. Relating to the skin or formed of skin.

Dermis (der'-mis). The corium or true skin.

Dermatitis (der-mi'-tis). See *Dermatitis*.

Dermo- (der-mo-). The same as *Dermato-*.

Dermoactinomycosis (der-mo-ak-ti-no-mi-kō'-sis). Infection of the skin by actinomycetes.

Dermoblast (der'-mo-blast) [dermo-; *βλαστός*, sprout]. The part of the mesoblast which develops into the corium.

Dermocymus (der-mo-si'-mus) [dermo-; *κύμα*, the fetus]. A monster fetus containing another within it.

Dermoepidermal (der-mo-ep-e-derm'-al) Partaking of both the superficial and deep layers of the skin, said of skin-grafts.

Dermographia (der-mo-graf'-e-ah) [dermo-; *γράφω*, to write]. A condition of the skin in which tracings made with the finger-nail or a blunt instrument are followed by elevations at the points irritated. It is common in the condition termed vasomotor ataxia.

Dermohemia (der-mo-he'-me-ah). See *Dermatohemia*.

Dermoid (der'-moid) [dermo-; *εἶδος*, like]. 1. Resembling skin. 2. A dermoid cyst. **D. Cyst**, a cyst containing elements of the skin, as hair, teeth, etc.

Dermol (der'-mol). See *Bismuth Chrysophanate*.

Dermolabial (der-mo-lab'-e-al). Having relation to the skin and the lips.

Dermomuscular (der-mo-mus'-ku-lar). Having relation to both skin and muscles, as certain embryonic tissues.

Dermopapillary (der-mo-pap'-il-a-ry). Having relation to the papillary layer of the true skin.

Dermophlebitis (der-mo-pleb'-i-tis) [dermo-; *φλεβίτις*]. Inflammation of the cutaneous veins.

Dermophyte (der'-mo-fī). See *Dermatophyte*.

Dermoplasty (der'-mo-plas-te). See *Dermatoplasty*.

Dermorrhagia (der-mor'-a-j-e-sh). See *Dermatorrhagia*.

Dermosapol (der-mo-sa'-pal). A soap said to contain perfumed cod-liver oil, peruvian balsam, wool-fat, fat, glycerol, and alkali. To these specifics may be added, it is used as an ointment in skin diseases, tuberculosis, etc.

Dermoskeleton (der-mo-skel'-e-ton) [dermo-; *σkeleton*, a skeleton]. The exoskeleton.

Dermostenosis (der-mo-steu'-s-is) [dermo-; *στενωσις*, stenosis]. A tightening of the skin, due to swelling or to disease. (Cf. *Scleroderma*.)

Dermostosis (der-mo-sto'-sis) [dermo-; *στόμα*, a bone]. Ossification occurring in the true skin.

Dermosynovitis (der-mo-si-no-vi'-tis) [dermo-; *συνωσις*, synovitis]. Inflammation of a subcutaneous bursa together with the adjacent skin.

D. plantaris ulcerosa, a severe suppurative inflammation of the foot which proceeds from inflammation of the bursa beneath a callosity and gives rise to a perforating ulcer.

Dermotherapy (der-mo-ther'-a-pe). See *Dermatotherapy*.

Derodidymus (der-o-did'-im-us) [*δίγμ*, neck; *διδυμός*, double]. A monotremes with a single body, two necks and heads, two upper and lower extremities, with other rudimentary limbs occasionally present.

Derrid (der'-id). A highly toxic substance from *Derris elliptica*, a leguminous plant of Malaya, used in Borneo as an arrow-poison, it kills fish in a dilution of 1 : 5,000,000.

Desalination (de-sal-in-a'-shun) [de from, and, salt]. The process of decreasing the salinity of a substance by the removal of salts.

De Salle's Line. See *Salle's (de) Line*.

Desault's Apparatus, D.'s Bandage. One for the arm, consisting of an auxiliary part held by tapes about the neck, a sling for the hand, and two single-headed rollers. **D.'s Splint**, one used in treating fracture of the thigh.

Descartes' Laws. See *Snell's Laws*.

Descemet's Membrane. The elastic membrane lining the posterior surface of the cornea.

Descemetitis (des-em-et'-i-tis) Inflammation of Descemet's membrane, serousritis.

Descemetocoele (des-em-et'-o-sel) (*Descemet's membrane*; *hernia*). Hernia of Descemet's membrane.

Descendens (de-sen'-dens) [*descendere*, to go down]. Downward. **D. noni**, a branch of the hypoglossal nerve. See under *Nerve*.

Descending (de-sen'-ding) [see *Descendens*]. Passing downward. **D. Current**. See *Current*, *Descending*. **D. Degeneration**. See *Degeneration*, *Descending*.

D. Tract, a collection of nerve fibers conducting impulses from the centers to the periphery.

Descensus ventriculi. See *Gastroptosis*.

Descent (de-sent') [see *Descendens*]. The act of going down, downward motion. **D., Theory of**, the theory that all higher organisms have descended by evolution from lower forms, as opposed to the theory of spontaneous generation or special creation. Cf. *Biogenesis*, *Darwinism*, *Evolution*.

Deschler's Salve. The compound resin cerate of the pharmacopoeia.

Desiccant (des'-ik-sant) [*desiccare*, to dry up]. Drying.

Desiccation (des-ik'-a-shun). Process of drying.

Desiccator (des'-ik-a-tor) [see *Desiccant*]. A vessel containing some strongly hygroscopic substance, such as calcium chloride or anhydrous sulfuric acid, and used to absorb the moisture from the air of a chamber.

Desichthol (des-ik'-thol). Decolorized ichthol, a preparation produced from ichthol by the removal of about 5% of volatile oil, to which the disagreeable odor is due.

Desmameba (des-mah-me'-bah) [*desmame*, a band; *ameba*]. A connective-tissue corpuscle considered as an ameboid element.

Desmectasia, Desmectasis (des-mek'-a-si-ah) [*desmame*, a band; *τεσις*, tension, a stretching]. The stretching of a ligament.

Desmepithelium (des-mep-ith-e'-le-um) [*desmame*, a band; *epithelium*]. The endothelial or epithelial lining of the blood vessels, lymphatics, and synovial cavities, the epithelial portions of the mesoderm.

Desmiognathus (der-mie-o-nath'-us) [*desmame*, a band; *gnathos*, the jaw]. A monster, the lower jaw of which has a supplementary head.

joined to it by ligamentous or muscular attachment.

Desmitis (*des-mi'-tis*) [*δέσμις*, a band; *τις*, inflammation]. Inflammation of a ligament.

Desmo- (*des-mo-*) [*δέσμις*, a band]. A prefix meaning a band, bond, or ligament.

Desmobacteria (*des-mo bak-te'-re-ah*) [*desmo-*; *bacteria*]. A group of bacteria corresponding to the genus *Bacilli*.

Desmoblast (*des'-mo-blast*) [*desmo-*; *βλαστός*, a germ]. Rouber's term for that portion of the area opaca of the blastoderm, especially in mesoblastic ova, which gives rise to the mesenchyma. Syn., *Desmohemoblast*.

Desmodium (*des-mo'-de-um*) [*desmo-*; *είδος*, form]. A genus of plants of the order *Leguminosae*. An infusion of the roots of *D. erythrorhizum*, of South America, is used in diarrhea and dysentery. The root of *D. incarnum*, of the West Indies, is prized as a remedy for dysentery. The root of *D. tortuosum*, of North America and the West Indies, is purgative. *D. triflorum* is found in all tropical countries. The fresh plant is applied to abscesses and wounds.

Desmodynia (*des-mo-din'-e-ah*) [*desmo-*; *δύνη*, pain]. Pain in a ligament.

Desmography (*des-mog'-ra-je*) [*desmo-*; *γράφειν*, to write]. The description of the ligaments.

Desmohemoblast (*des-mo-hem'-a-blast*). See *Desmoblast*.

Desmoid (*des'-moid*) [*desmo-*; *είδος*, likeness]. Fibrous. **D. Tumor**, a fibroid tumor.

Desmology (*des-mol'-o-je*) [*desmo-*; *λόγος*, science]. The anatomy of the ligaments. Cf. *Syndesmography*.

Desmoma (*des-mo'-mah*) [*desmo-*; *όμα*, tumor]. A connective-tissue tumor.

Desmon (*des'-mun*) [*δέσμις*, a band]. London's name for the intermediary body of Ehrlich.

Desmoneoplasm (*des-mo-ne'-o-plazm*) [*desmo-*; *νεοπλασμία*]. Any neoplasm made up of connective tissue.

Desmonosology (*des-mon-os-ol'-o-je*). See *Desmopathology*.

Desmopathology (*des-mo-path-ol'-o-je*) [*desmo-*; *πάθος*, pathology]. The pathology of ligaments.

Desmopexia (*des-mo-peks'-e-ah*) [*desmo-*; *πῆξις*, a putting together]. Fixation of the round ligaments to the abdominal wall or to the wall of the vagina for correction of uterine displacement.

Desmorrhesis (*des-mor-eks'-is*) [*desmo-*; *ρήξις*, a bursting]. The rupture of a ligament.

Desmotomy (*des-mot'-o-me*) [*desmo-*; *τομή*, section]. The dissection and anatomy of the ligaments; surgical cutting of a ligament.

Desmurgia, Desmurgy (*des-mur'-ic-ah, des-mur'-je*) [*desmo-*; *ἔργον*, to do; to work]. The art of bandaging or applying ligatures.

Desnos' Pneumonia. See *Graucher's Disease*.

Dissolution (*de-so-lu'-shun*) [*de*, away from; *λύω*, solution]. The separation from one body of another dissolved in it under certain conditions which remove or diminish the solubility of the latter.

Despumation (*des-pu-ma'-shun*) [*despumare*, to skim froth]. The purification of a liquid by removal of the scum or froth.

Desquamation (*des-kwam'-a'-shun*) [*des-quamare*, to scale off]. The shedding of the superficial epithelium, as of the skin, mucous membranes, and renal tubules. **D., Furfuraceous**, branny desquamation. **Desquamatio neonatorum**, the epidermal exfoliation of newborn infants which takes place during the first week of life. **Desquamatio siliquosa**, the shedding of the skin of a part in a continuous, husk-like structure.

Desquamative (*des-kwam'-at-iv*) [*desquamatio*]. Characterized by desquamation.

Dessertspoon. A domestic measure equal to about 2 dr. (8 Cc.).

Desudation (*des-u-da'-shun*) [*de*, away; *sudare*, to sweat]. 1. Profuse or morbid sweating. 2. Sudamina.

Desulfuration, Desulfurization (*de-sul-jur'-a'-shun, de-sul-jur-i-za'-shun*). The act or process of abstracting sulfur from a compound. Cf. *Sulfuration*.

Desumvergence (*de-sum-ver'-jens*) [*desursum*, from above; *vergere*, to turn]. A downward inclination of the eyes.

Detergent (*de-ter'-jent*) [*detergere*, to cleanse]. Purifying; cleansing.

Determination (*de-ter-min'-a'-shun*) [*determinatio*, a directing]. Of the blood, a tendency to collect in a part, as determination of the blood to the head.

Dethyroidism (*de-thi'-roid-izm*). See *Athyrea* and *Athyreosis*.

Detorsion (*de-tor'-shun*) [*detorquere*, to turn]. The correction of an abnormal curvature; the restoration of a deformed part to its normal position.

Detoxification (*de-toks-ik'-i-a'-shun*) [*de*, priv.; *τοξικόν*, poison]. The power of reducing the poisonous properties of a substance.

Detoxify (*de-toks'-e-fi*). To deprive a substance of its poisonous attributes.

Detrital (*de-tri'-tal*). Consisting of or pertaining to detritus.

Detrition (*de-trish'-un*) [*deterere*, to wear off]. The wearing or wasting of a part.

Detritus (*de-tri'-tus*) [see *Detrition*]. Waste-matter from disorganization.

Detruncation (*de-trun-ka'-shun*). See *Decapitation*.

Detrusion (*de-tru'-shun*) [*detrudere*, to drive]. An ejection or expulsion; a thrusting or driving down or out.

Detrusor, Detrusorium (*de-tru'-zor, -zor'-e-um*). 1. A means or instrument for performing expulsion. 2. A muscle having as its function the forcing down or out of parts or materials.

Deuter-, Deutero- (*du-ter-, du-ter-o-*) [*δευτερος*, second]. Greek prefixes indicating the second of two similar substances or conditions, especially that one which contains more of the substance.

Deuteripara (*du-ter-ip'-ar-ah*) [*deuter-*; *παρερε*, to bring forth]. A woman pregnant for the second time.

Deuteroalbumose (*du-ter-o-al'-bu-mōs*). A form soluble in water and not precipitated by saturation with sodium chlorid or magnesium sulfate, but by ammonium sulfate.

Deuterology (*du-ter-o'-lō-jē*) [*deutero-*; λόγος, science]. The biology of the placenta.

Deuteromyosinose (*du-ter-o-mi-o'-sin-ōs*). A product of myosin digestion.

Deuteropathy (*du-ter-op'-i-the*) [*deutero-*; πάθος, a disease]. A disease that is secondary to another.

Deuteroplasm (*du-ter-o-plazm*). See *Deutoplasm*.

Deuterostoma (*du-ter-os'-to-mah*) [*deutero-*; στόμα, mouth]. A secondary blastopore.

Deuterotoxins (*du-ter-o-toks'-in*). Dissociation products of toxins.

Deutipara (*du-tip'-ar-sh*). See *Deuteripara*.

Deutoplasm (*du'-to-plazm*) [*deutero-*; πλάσμα, formed material]. A state of nutrient material in the ovum, from which the protoplasm draws to support its growth.

Deutosclerous (*du-to-skle'-rus*) [*deutero-*; σκληρός, hard]. Relating to an induration secondary to some pathologic condition.

Deutyl (*du'-til*). See *Ethyl*.

Devaporation (*de-va-por'-at-shun*). To bring vapor back to the liquid state.

Developer (*de-val'-oper*). A chemie compound employed in photography to reduce the metallic salts and to render visible the image upon an exposed plate.

Deventer's Diameter. The oblique pelvic diameter. **D.'s Pelvis**, a simple, non-rachitic pelvis, flattened from before backward.

Devergie's Attitude de Combat. A posture of a dead body marked by flexions of the elbows and knees, with closure of the fingers and extension of the ankles. **D.'s Disease**, lichen ruber.

Deviation (*de-vei'-at-shun*) [*deviare*, to deviate]. A turning away from the regular course or standard. **D., Conjugate**, the turning of eyes and head toward one side, observed in some lesions of the cerebrum.

Devitalize (*de-vei'-tīl-iz*) [*de*, from; vita, life]. To destroy vitality.

Devitrification, Devitrication (*de-vit-ee-fak'-shun, de-vei-ee-fak'-shun*) [*de*, priv.; vitrum, glass; facere, to make]. To change from the glass-like state.

Devolution (*de-vo-lu'-shun*) [*devolvere*, to roll down]. 1. Transmission from one person to another. 2. Degeneration.

Devonshire Colic (*dev'-on-shir kol'-ik*). Lead-ache.

Devorative (*de-vor'-at-iv*) [*devorare*, to swallow down]. Intended to be swallowed without chewing.

Dew-cure (*du'-chur*). See *Kneippism*.

Dewees' Carminative. See under *Eupetida*.

Dew-point. The temperature at which the air is saturated with vapor, the temperature at which dew forms.

Dextrocardia (*deks-o-kar'-de-ah*). See *Dextrocardia*.

Dexter (*deks'-ar*) [*L.*]. Right; upon the right side.

Dextrad (*deks'-trād*) [*dexter*; ad, to]. Toward the right side.

Dextral (*deks'-tral*). 1. Pertaining to the right side. 2. Showing preference for the right eye, hand, foot, etc., in certain acts or functions.

Dextrality (*deks-tral'-it-ē*) [*dexter*]. The condition of turning toward, being on, or pertaining to the right side.

Dextran (*deks'-tran*) [*dexter*]. $C_6H_{10}O_5$. A stringy, gummy substance formed in milk by the action of cocci, and also occurring in unripe beet-root.

Dextraural (*deks-trau'-ral*) [*dexter*; auris, the ear]. Right-eared.

Dextrin (*deks'-trin*) [*dexter*]. $C_6H_{10}O_5$. A soluble carbohydrate into which starch is converted by diastase or dilute acids. It is a whitish substance, turning the plane of polarization to the right.

Dextrinate (*deks'-trin-at*). To change into dextrin.

Dextrinuria (*deks-trin-u'-re-ah*) [*dextrin*; urina, urine]. The presence of dextrin in the urine.

Dextro- (*deks'-tro-*) [*dexter*]. A prefix meaning right.

Dextrocardia (*deks-tro-kar'-de-ah*) [*dexter*; καρδιά, heart]. Transposition of the heart to the right side of the thorax.

Dextrocardial (*deks-tro-kar'-de-ah*) [see *Dextrocardia*]. Having the heart to the right of the median line.

Dextrocerebral (*deks-tro-ser'-e-bral*) [*dexter*; cerebrum, the brain]. 1. Located in the right cerebral hemisphere. 2. Functionating preferentially with the right side of the brain.

Dextrococain (*deks-tro-kō'-kah-in*). An artificial alkaloid obtained by heating eugon or its derivative with strong alkali. It is a local anesthetic and stimulant, in action similar to cocain, but more rapid, irritating, and fugitive. Syn., *lococain*.

Dextrocular (*deks-trōk'-u-lar*) [*dextro*; oculus, the eye]. Right-eyed.

Dextrocularity (*deks-trōk'-u-lar'-it-ē*). The condition of being right-eyed.

Dextroform (*deks'-tro-form*). A combination of formaldehyd and dextrin, soluble in water and glycerol. It is used internally in suppurating cystitis and in the treatment of gonorrhea in applications of 10 to 30% solutions.

Dextroglucose (*deks-tro-glu'-kōs*). See *Dextrase*.

Dextrogyr (*deks-tro-jir'*) [*dextro*; gyros, to turn around]. A substance producing rotation to the right.

Dextrogyrate (*deks-tro-jir'-ed*). Same as *Dextroretatory*.

Dextromanual (*deks-tro-man'-u-āl*) [*dextro*; manus, hand]. Right handed.

Dextromanuality (*deks-tro-man-u-āl'-it-ē*). The condition of being right-handed.

Dextropedal (*deks-prop'-ed-āl*) [*dextro*; pes, foot]. Right-footed.

Dextropedality (*deks - trop - ed - al' - it - e*). The condition of being right-footed.

Dextrophoria (*deks-tra-fu'-re-ah*) [*dextra*; *φύσις*, tending]. A tending of the visual lines to the right.

Dextrorotatory (*deks-tra-ro'-lat-o-re*) [*dextra*; *rotare*, to whirl]. Turning the rays of light to the right.

Dextrosaccharin (*deks-tra-sak'-ar-in*). A mixture of saccharin and glucose 1:2000.

Dextrose (*deks'-trôs*) [*dexter*]. $C_6H_{12}O_6$. Grape-sugar; a sugar belonging to the glucose group, that rotates polarized light to the right. See *Glucose*.

Dextrosinistral (*deks-tra-sin-is'-tral*) [*dextra*; *sinister*, left]. Extending from right to left.

Dextrosuria (*deks-tra-su'-re-ah*) [*dextrose*; *ουρία*, urine]. The presence of dextrose in the urine. Cf. *Levulosuria*; *Pentosuria*.

Dextroversion (*deks-tra-ver'-zhun*) [*dextra*; *vertere*, to turn]. Version to the right side.

Dhatureas (*dah tu'-re-as*). Professional poisoners of India who employ the *Datura fastuosa*.

Dhobie Itch. A Hindu name for ringworm of the body.

Dhooley (*doo'-le*). A covered stretcher used in India.

Dhurrin (*dur'-in*). A glucosid derived from glucose and occurring in young plants of *Sorghum vulgare* (durra or Guinea corn).

Diabetes (*di-ab-et'-i-ës*) [*διαβήτης*; *διά*, through; *βαίνω*, to go]. A disease characterized by the habitual discharge of an excessive quantity of urine; used without qualification, the word indicates diabetes mellitus. Syn., *Diarrhœa urinosa*. See *Unschuld's Sign.* **D.**, **Alimentary**, that due to defective assimilative power over the carbohydrates of food. **D.**, **Alternating**, a form of diabetes mellitus alternating with gout. **D.**, **Artificial**, that form produced in the physiologic laboratory by puncturing the floor of the fourth ventricle of the brain. **D.**, **Azoturic**, diabetes without glycosuria accompanied by increase of urea in the urine. **D.**, **Biliary**. See *Biliary Diabetes*. **D.**, **Composite**, that in which sugar and oxybutyric acid and its derivatives are discharged in the urine. **D.**, **Conjugal**. See *Conjugal Diabetes*. **D. decipiens**, diabetes mellitus in which there is no polyuria or polydipsia. **D.**, **Gouty**, a form of glycosuria occurring in gouty individuals. **D.**, **Hydruric**, polyuria in which the water in the urine is in excess without increase in the solid constituents of the urine. **D. inositus**, diabetes mellitus in which inosit takes the place of grape-sugar. **D. insipidus**, a chronic disease characterized by the passage of a large quantity of normal urine of low specific gravity, associated with intense thirst. The etiology of the disease is obscure—injuries and diseases of the brain, emotional disturbances, syphilis, acute infectious diseases, and heredity have been assigned as causes. **D. mellitus**, a nutritional disease characterized by the passage of a large quantity of urine containing sugar; there

is intense thirst, with voracious appetite, progressive loss of flesh and strength, and a tendency to a fatal termination. The causes are not well understood—diseases of the nervous system, especially of the medulla, intense mental strain, gout, syphilis, malaria, diseases of the pancreas, have been etiologic factors in some cases. Complications are frequent in diabetes, the most important being pulmonary tuberculosis, furunculosis, gangrene, cataract, polyneuritis. Death, if not caused by one of the complications, is generally due to the so-called diabetic coma. The ultimate cause of the presence of sugar in the urine is believed to be the incomplete destruction or utilization of the sugar formed in the system. **D.**, **Neurogenic**, that due to disorder of the nervous system. **D.**, **Pancreatic**, a variety of glycosuria associated with and probably dependent upon disease of the pancreas. **D.**, **Phloridzin-**, that form produced in animals by the administration of phloridzin. **D.**, **Phosphatic**, a condition characterized by polyuria, polydipsia, emaciation, and excessive excretion of phosphates in the urine. **D.**, **Puncture**. See *D.*, *Artificial*.

Diabetic (*di-ab-et'-ik*) [*diabetes*]. 1. Pertaining to diabetes. 2. A person suffering from diabetes. **D. Cataract**, an opacity of the crystalline lens sometimes found in association with diabetes. **D. Coma**, the coma caused by diabetes mellitus. **D. Gangrene**, a moist gangrene sometimes occurring in persons suffering from diabetes. **D. Sugar**, $C_6H_{12}O_6$, the glucose present in the urine in diabetes mellitus. It is identical with grape-sugar. **D. Tabes**, a peripheral neuritis occurring in diabetic patients, and causing symptoms resembling tabes dorsalis. **D. Urine**, urine containing sugar.

Diabetico (*di-ab-et'-ik-o*). A beverage recommended in diabetes, said to consist of alcohol, 8.25%; extractive, 3.27%; glycerol, 0.82%; saccharin, 0.023%; sulfuric acid, 0.036%; tartaric acid, 0.56%; phosphoric acid, 0.025%.

Diabetid (*di-ab-et'-id*) [*diabetes*]. A cutaneous manifestation of diabetes.

Diabetin (*di-ab-et'-in*) [*diabetes*]. Levulose.

Diabetogenic, **Diabetogenous** (*di-ab-et-o-žen'-ik*, *di-ab-et-oj'-en-us*) [*diabetes*; *γεννάν*, to produce]. Causing diabetes.

Diabetograph (*di-ab-et'-o-graf*) [*diabetes*; *γράφω*, to write]. An instrument which registers the amount of glucose present in the urine which is dropped into it in boiling Fehling's solution.

Diabrotic (*di-ab-rof'-ik*) [*διαβρωτικός*; *διά*, through; *βρώω*, to eat]. 1. Corrosive. 2. A corrosive substance.

Diacautic (*di-ak-aws'-tik*) [*διά*, through; *καυστικός*, caustic]. 1. A double convex cauterizing lens. 2. Exceedingly caustic.

Diacele (*di'-as-el*) [*διά*, between; *κοίλη*, a hollow]. The third ventricle of the brain.

Diacetanilid (*di-as-et-an'-il-id*), $C_6H_5N(C_2H_5O)_2$. A compound of acetanilid and glucose.

acetic acid closely resembling, but stronger in physiologic action than, acetanilid.

Diacetic Acid (*dī-as-ē'-tik*). See *Acid, Diacetic*.

Diacetonuria (*dī-as-ēl-on-u'-re-ah*). See *Diaceturia*.

Diaceturia (*dī-as-ēl-on-u'-re-ah*) [*dī*, two; *acetum*, vinegar; *ōipov*, urine]. The presence of diacetic acid in the urine.

Diachylon (*dī-ak'-il-on*) [*dī-ak*, through; *χυλός*, juice]. Lead-plaster. See *Plumbi oxidum* under *Plumbum*.

Diacid (*dī-as'-id*) [*dī*, two; *acidus*, acid]. Having two atoms of hydrogen replaceable by a base.

Diaclasia, Diaclasis (*dī-ak-lā'-ze-ah*, *dī-ak'-lā-sis*) [*diaklasia*, a breaking in two]. 1. Refraction. 2. A breaking.

Diaclast (*dī-ak-last*) [*diaklāst*, to break apart]. An instrument for breaking up the fetal head.

Diacrisis (*dī-ak'-ris-is*) [*diak*, apart; *apherein*, to separate or secrete]. An affection with altered secretion.

Diactinic (*dī-ak-tin'-ik*). Capable of transmitting actinic rays.

Diad (*dī-ad*) [*dī*, two]. 1. Having a quantivalence of two. 2. An element or radicle having a quantivalence of two. 3. A unit made up of primary units which are differentiated into parts, but yet constitute an individual; e. g., a morula.

Diagnose (*dī-ag-nōs*). See *Diagnosticate*.

Diagnosis (*dī-ag-nō'-sis*) [*diak*, apart; *gnōsis*, knowledge]. The determination of the nature of a disease. **D., Anatomic**. 1. A diagnosis based upon the recognition of definite anatomical alterations lying back of the phenomena. 2. A postmortem diagnosis. **D., Differential**, the distinguishing between two diseases of similar character by comparing their symptoms. **D. by Exclusion**, the recognition of a disease by excluding all other known conditions. **D., Pathologic**, the diagnosis of the structural lesions present in a disease. **D., Physical**, the determination of disease by inspection, palpation, percussion, or auscultation. **D., Topographic**, that based upon the seat of a lesion.

Diagnostic (*dī-ag-nō'-tik*) [*diagnosis*]. Serving as evidence in diagnosis.

Diagnosticate, Diagnose (*dī-ag-nō'-tik-ah*, *dī-ag-nōs*) [*diagnosis*]. To make a diagnosis.

Diagnostician (*dī-ag-nō'-tik'-an*) [*diagnosis*]. One skilled in making diagnoses.

Diagnostica (*dī-ag-nō'-tika*) [*diagnosis*]. The science and art of diagnosis.

Diagnostical (*dī-ag-nō'-tik'-al*). Procedure having a diagnostic purpose.

Diahydric (*dī-ah-hī'-drik*) [*dī-ah*, through; *hup*, water]. Relating to transmission through water, as a percussion note through a stratum of interposed fluid.

Dialysis (*dī-al'-is*) [*dī-ah*, through; *lysis*, to loose]. The separation of several substances from one another in solution by taking advantage of their differing diffusibility through

porous membranes. Those that pass through readily are termed crystalloids, those that do not, colloids.

Dialytic (*dī-al'-is*) [*dialysis*]. 1. Pertaining to or similar to the process of dialysis. 2. Producing relaxation (said of a remedy). 3. A condition of divergent change or evolution.

Dialyzable (*dī-al'-is-ə-bəl*). Capable of being separated by diffusion.

Dialyzed (*dī-al'-izd*) [*dialysis*]. Separated by dialysis. **D. Raw Meat**, a reddish fluid with a slightly acid or bitter taste, prepared from fresh beef or mutton to which are added 200 Gm. of water, 5 Gm. of hydrochloric acid, and 2 Gm. of pepsin; the whole is boiled at 38° C. for 5 or 6 hours.

Dialyzer (*dī-al'-izer*) [*dialysis*]. An apparatus for effecting dialysis; also the porous septum or diaphragm of such an apparatus.

Diamagnetic (*dī-ah-mag-net'-ik*) [*dī-ah*, across; *magnet*]. Taking a position at right angles to the lines of magnetic force.

Diameter (*dī-am'-ē-ter*) [*dī-ah*, through; *pteron*, a measure]. A straight line joining opposite points of a body or figure and passing through its center. **D., Craniometric**, one of several lines connecting points on opposite surfaces of the cranium. *Biparietal*, that joining the parietal eminences; *bitemporal*, that joining the extremities of the coronal suture; *occipitofrontal*, that joining the root of the nose and the most prominent point of the occiput; *occipitomenital*, that joining the external occipital protuberance and the chin; *trachelobregmatic*, that joining the center of the anterior fontanel and the junction of the neck and floor of the mouth. **D., Pelvic**, any one of the diameters of the pelvis. The most important are the following: *anteroposterior* (of pelvic inlet), that which joins the sacrovertebral angle and the pubic symphysis; *anteroposterior* (of pelvic outlet), that which joins the tip of the coccyx with the subpubic ligament; *conjugate*, the *anteroposterior diameter* of the pelvic inlet; *conjugate, diagonal*, that connecting the sacrovertebral angle and subpubic ligament; *conjugate, external*, that connecting the depression above the spine of the first sacral vertebra and the middle of the upper border of the symphysis pubis; *conjugate, true*, that connecting the sacrovertebral angle and the most prominent portion of the posterior aspect of the symphysis pubis; *transversal* (of pelvic inlet), that connecting the two most widely separated points of the pelvic inlet; *transverse* (of pelvic outlet), that connecting the ischial tuberosities.

Diametric (*dī-am'-ē-ter*). 1. Of, pertaining to, or coinciding with a diameter; antipodal; opposed. **D. Pupil**, one which constitutes a vertical slit, as is the case after two iridectomies, one upward and the other downward.

Diamid (*dī-am'-id*) [*dī*, two; *amid*]. A double amid formed by replacing hydrogen in two ammonia molecules by an acid radicle. See *Hydrazin*.

Diamin (*dī'am-in*) [*dī*, two, *amin*]. An amin formed by replacing hydrogen in two molecules of ammonia by a basic radicle. See *Amin*.

Diaminuria (*dī'am-in-u'le-ah*) [*diamin*; *οὖρον*, urine]. The presence of diamin compounds in the urine.

Diapedesis (*dī-ah-ped-e'-sis*) [*δα*, through; *παρῆναι*, to leap]. The passage of the blood through the unruptured vessel-walls.

Diaphane (*dī'af-ān*) [*δα*, through; *φαίνειν*, to show]. 1. A transparent investing membrane of an organ or cell. 2. A small electric lamp used in transillumination.

Diaphaneity (*dī'af-an-e'-it-ē*). Transparency.

Diaphanometer (*dī'af-an-am'-et-er*). See *Lactoscope*.

Diaphanoscope (*dī'af-an'-o-skōp*) [*διαφανής*, translucent, *σκοπεῖν*, to inspect]. An instrument for illuminating the interior of a body-cavity so as to render the boundaries of the cavity visible from the exterior.

Diaphanoscopy (*dī'af-an-as'-ko-pe*) [see *Diaphanoscope*]. Examination of body-cavities by means of an introduced incandescent electric light.

Diaphoresis (*dī-ah-for-e'-sis*) [*δα*, through; *φορέω*, to carry]. Perspiration especially perceptible perspiration.

Diaphoretic (*dī-ah-for-e'-tik*) [*diaphoresis*]. 1. Causing an increase of perspiration. 2. A medicine that induces diaphoresis.

Diaphotoscope (*dī-ah-fō'-to-skōp*) [*δα*, through; *φωσ*, light; *σκοπεῖν*, to inspect]. A variety of endoscope.

Diaphragm (*dī'ah-fram*) [*δα*, across; *φράγμα*, a wall]. 1. The musculomembranous partition that separates the thorax and abdomen. It is the chief muscle of respiration. 2. A thin septum, such as is used in dialysis. 3. In a microscope, a perforated plate placed between the mirror and object to regulate the amount of light that is to pass through the object.

Diaphragmatic (*dī-ah-frag-mat'-ik*) [*diaphragma*]. Relating to the diaphragm. **D. Phenomenon**, Litten's sign: in a state of health there can be seen a shadow rising and falling from the vertebral column to the attachment of the diaphragm from the seventh rib to the convexity; this movement can be seen through the thoracic walls, and shows the intensity of respiration and the limit of the diaphragm between its position on inspiration and that on expiration. The upper position corresponds to the liver-margin in the state of rest. Deviations of the extent of movement mark certain pathologic states.

Diaphragmatocèle (*dī'ah-frag-mat'-o-sēl*) [*diaphragma*; *κῆλη*, hernia]. Hernia through the diaphragm.

Diaphtherin (*dī'af'-ther-in*) [*διαφθελεῖν*, to destroy]. Oxyquinaseptol; a coal-tar derivative composed of two molecules of oxyquinolin and one of aseptol. It is a yellow powder, with a phenol-like odor, and is used as an

antiseptic in solutions varying in strength from 1 to 50%.

Diaphtol (*dī-af'-tol*), $C_6H_4O_2SN$. Orthooxyquinolin-metasulfonic acid. It is used in internal disinfection of the urinary tract in place of salol. Syn., *Chinaseptol*, *Quinaseptol*.

Diaphysis (*dī-af'-is-is*) [*δα*, through; *φθίσθαι*, to grow]. 1. The shaft of a long bone. 2. An interspace. 3. A prominent part of a bony process. 4. A ligament of the knee-joint.

Diaplasia (*dī-af'-las-is*) [*διαπλάσις*, the setting of a broken limb]. Reduction, as of a dislocation or fracture.

Diaplastic (*dī-af-plas'-tik*) [*diaplasia*]. 1. Relating to the setting of a fracture or reduction of a dislocation. 2. Any application for a fracture or dislocation.

Diapophysis (*dī-af-op'-is-is*) [*δα*, apart; *ἀρθρῶσις*, an outgrowth]. The superior or articular part of a transverse process of a vertebra.

Diarius (*dī-a'-re-us*) [*dies*, a day]. Enduring but a single day.

Diarrhea (*dī-ar-e'-ah*) [*δα*, through; *ρεῖν*, to flow]. A condition characterized by increased frequency and lessened consistence of the fecal evacuations. **D.**, **Atonic**. See **D.**, **Camp**, and **D.**, **Chronic**. **D.**, **Atrophic**. See **D.**, **Colliquative**. **D.**, **Camp**, a form of diarrhea common among soldiers. The discharges are apt to be purulent, and there is liability to thickening and ulceration of the colon. Syn., *Atonic diarrhea*. **Diarrhœa carnosæ**, dysentery in which flesh-like masses are passed. **D.**, **Catarrhal**. 1. A form which is often epidemic at times when catarrhs are prevalent. 2. That of catarrhal gastritis or enteritis. Syn., *Diarrhœa acuta serosa mucosa*; *Diarrhœa pituitosa*; *Mucous colitis*; *Phlegmatic diarrhea*; *Rheumatic diarrhea*. **D.**, **Choleraic**, severe, acute diarrhea with serous stools, and accompanied by vomiting and collapse. **D.**, **Chronic**, that characterized by continuous and intractable discharges, often offensive, bloody, or containing undigested food. It occurs as a manifestation of an intestinal lesion or of a constitutional disease. Syn., *Atonic diarrhea*; *Diarrhœa habitualis*; *Mucous colitis*. **D.**, **Colliquative**, that characterized by excessively frequent and copious discharges and extreme prostration, and occurring, as a rule, toward the close of a chronic disease. Syn., *Atrophic diarrhea*. **D.**, **Feculent**. See **D.**, **Simple**. **D.**, **Green**, a form occurring in infants and marked by green alvine discharges. It is infectious and due to the bacillus of Lesage, or *Bacillus fluorescens nontliquefaciens*, Schiller. See under *Bacteria*. **D.**, **Inflammatory**, that caused by congestion of the intestinal mucosa following sudden chilling of the body surface, suppression of perspiration or menstruation. It frequently constitutes the so-called cholera infantum and sthenic diarrhea. **D.**, **Lienteric**, a form of diarrhea characterized by the passage of fluid

stools containing masses of undigested food.

D., Membranous, a form characterized by the presence of mucous shreds in the stools.

It may be chronic or subacute, and alternate with constipation. Hysterical symptoms, griping, and abdominal tenderness are often present. Syn., *Tubular diarrhea*. **D., Mucous**. See *Colitis, Mucous*. **P., Pancreatic**, a persistent form in which the discharges are thin and viscid. It is supposed to depend upon disease of the pancreas. **D., Parasitic**, a diarrhea incited by the presence of intestinal parasites. Cf. *Diarrhea verminosa*.

Diarrhea pituitosa. See *D., Catarrhal*. **D., Simple**, that form in which the evacuations consist of fecal matter only. Syn., *Diarrhea pura*, *Diarrhea stercoralis*; *Diarrhea vulgaris*; *Feculent diarrhea*, *Suburral diarrhea*.

Diarrhea stercoralis, **D. stercorea**, **D. stercorosa**. See *D., Simple*. **D., Sthenic**. See *D., Inflammatory*. **D., Strumous**, a chronic form frequently met in underfed, strumous children.

D., Summer, an acute form occurring during the intense heat of summer. **D., Summer, of Children**, that due to *Bacillus dysenteriae*, Shiga, and etiologically identical with acute bacillary dysentery of adults. **D., Tubular**. See *D., Membranous*. **Diarrhea urinosa**. See *Diabetes*. **Diarrhea verminosa**, that due to intestinal worms. Cf. *D., Parasitic*.

D., Zymotic. Synonym of *Dysentery*.

Diarthrodial (*di-ar-thro'-de-al*) [see *Diarthrosis*]. Relating to or of the nature of a diarthrosis.

Diarthrosis (*di-ar-thro'-sis*) [*día*, through; *arthron*, articulation]. A form of articulation characterized by mobility. The various forms are: *arthrodia*, in which the bones glide upon plane surfaces; *enarthrosis*, ball-and-socket joint, with motion in all directions; *ginglymus*, or hinge joint, with backward and forward motion; and *D. rotatoria*, with pivotal movement. Syn., *Perarticular*; *Proarthrosis*. **D. ambigua**. See *Amphiarthrosis*. **D. obliqua**, an inconstant articulation between the spinous processes of adjacent lumbar vertebrae. **D. obliqua accessoria**, a double articulation sometimes formed by the spinous processes of adjacent dorsal or lumbar vertebrae near the basal ends of the processes. **D., Planiform**, *arthrodia*. **D., Rotatory**, **D., Synarthrodial**, **D., Trochoid**, **D. trochoides**. See *Cycloarthrosis*.

Diarthrotic (*di-ar-thro'-tik*) See *Diarthrodial*.

Diasostic (*di-as-ot'-tik*; [*diastōzō*, to preserve]). Pertaining to hygiene or the preservation of health, hygiene, diastetic.

Diastase (*di'-as-tāz*) [see *Diastasis*]. A nitrogenous vegetable ferment found in malt; it converts starch into glucose. **D., Animal**, a general term for the amylolytic enzymes of animals, ptyalin, amylase, and the special enzyme of the liver capable of converting glycogen into sugar. **D., Pancreatic**, amylase. **D., Salivary**, ptyalin. **D., Vegetable**, the enzyme of germinating seeds; diastase proper.

Diastasic, Diastatic (*di-as'-tas-ik*, *di-as-tat'-ik*) [*diastase*]. 1. Pertaining to diastase. 2. Pertaining to diastasis.

Diastasis (*di-as'-tā-sis*) [*diastasis*, separation]. 1. The separation of an epiphysis from the body of a bone without true fracture. 2. A dislocation of an amphiarthrotic joint.

Diastema (*di-as-tē'-ma*) [*diastēma*, a fissure]. A cleft or fissure.

Diastematenteria (*di-as'-tem-at-on-tē'-er-ē-ah*) [*diastema*, *enteron*, intestine]. A longitudinal fissure of the intestine. Syn., *Diastematomyelia*.

Diastematia (*di-as'-tem-at'-shē-ah*) [*diastema*]. An abnormality in which the body is split or fissured longitudinally. Syn., *Diastemata-caulia*.

Diastematocrania (*di-as'-tem-at-o-brā'-mē-ah*) [*diastema*; *cranium*, the skull]. A skull congenitally cleft along the median line.

Diastematogastria (*di-as'-tem-at-o-gas'-trē-ah*) [*diastema*; *gaster*, stomach]. A mesial fissure of the ventral wall of the body.

Diastematoglossia (*di-as'-tem-at-o-glos'-sē-ah*) [*diastema*, *glossa*, the tongue]. A congenital longitudinal fissure of the tongue.

Diastematomyelia (*di-as'-tem-at-o-mi'-elē-ah*) [*diastema*; *myelos*, marrow]. A congenital splitting or doubling of the spinal cord.

Diastematopyelia (*di-as'-tem-at-o-pi'-elē-ah*) [*diastema*; *pelvis*, a trough]. A mesial fissure of the pelvis.

Diastematorrhachia (*di-as'-tem-at-o-rā'-chē-ah*) [*diastema*; *rhachis*, the spine]. A congenital longitudinal fissure of the vertebral column.

Diastematorrhina (*di-as'-tem-at-o-rī'-nē-ah*) [*diastema*; *rhis*, the nose]. A congenital mesial fissure of the nose.

Diastematostaphylia (*di-as'-tem-at-o-s-taf'-ilē-ah*) [*diastema*, *staphylē*, the uvula]. A congenital mesial fissure of the uvula.

Diastementeria (*di-as'-tem-en-tē'-er-ē-ah*). See *Diastematomyelia*.

Diaster (*di-as'-ter*). The karyokinetic figure assumed by the aster of a dividing nucleus before the formation of the stars at the ends of the nuclear spindle. It is the sixth stage of karyokinesis. See *Karyokinesis*.

Diastol (*dī'-as-tol*). A proprietary malt extract.

Diastole (*dī'-as'-tō-lē*) [*diastolē*, a drawing apart]. The period of dilation of a chamber of the heart, used alone it signifies diastole of the ventricle. **D., Arterial**, the expansion of an artery following the ventricular systole. **D., Auricular**, the dilation of the cardiac auricle. **D., Cardiac**, the period of expansion which follows a cardiac contraction. **D., Ventricular**, the dilation of the cardiac ventricle.

Diastolic (*dī'-as-tōl'-ik*) [*diastole*]. Pertaining to the diastole of the heart.

Diastrophometry (*dī-as-tro-fom'-ē-ter*) [*diastrophos*, distortion; *metron*, a measure]. The measurement of deformities.

Diately, Diately (*dī-at'-lāh*, *dī-at'-lāh*) [*diately*, between; *telos*, a web]. The membranous roof of the diacele.

Diateretic (*di-at-ter-et-ik*) [*diatireiv*, to watch closely]. Of or pertaining to the practice of hygiene; diastolic.

Diathermal, Diathermanous (*di-at-her'-mal, di-at-her'-man-us*) [*diá*, through; *thérmē*, heat]. Permeable by waves of radiant heat.

Diathermometer (*di-at-her-mom'-et-er*) [*diá*; *thermometer*]. An appliance for measuring the heat-conducting capacity of substances.

Diathesis (*di-at-thes-is*), $C_7H_9O_2$. A substitute for salicylic acid, the salicylates, and salicin; its use is indicated in gouty diatheses. Dose $7\frac{1}{2}$ -15 gr. (0.5-1.0 Gm.).

Diathesis (*di-at-thes-is*) [*diá*; *τίθημι*, to arrange]. A state or condition of the body whereby it is especially liable to certain diseases, such as gout, calculus, diabetes, etc. It may be acquired or hereditary. **D.**, **Bilious**, the morbid condition that follows chronic disturbance of the portal circulation and imperfect elimination of bile. **D.**, **Calculus**, a constitutional tendency to the formation of calculi. **D.**, **Cancerous**. See *Cachexia, Cancerous*. **D.**, **Catarrhal**, a tendency to excessive secretion of mucus. **D.**, **Climatic**, a morbid state of body dependent upon local physical conditions, as elevation, soil, water, humidity, etc. **D.**, **Congestive**, a constitutional tendency to vasomotor disturbances and local congestions. **D.**, **Gouty**, **D.**, **Lithic**. See *D., Uric acid*. **D.**, **Hemorrhagic**. See *Hemorrhoids*. **D.**, **Osseous**, **D.**, **Ossific**, a tendency to abnormal development of bony tissues. **D.**, **Osteophytic**, a constitutional tendency to the formation of abnormal outgrowths. **D.**, **Psychopathic**, a hereditary predisposition to mental derangement. **D.**, **Rheumatic**. See *D., Uric acid*. **D.**, **Scorbutic**. See *Scurvy*. **D.**, **Scrofulous**, a hereditary predisposition to scrofulous affections. Syn., *Strumous diathesis*. **D.**, **Strumous**. See *D., Scrofulous*. **D.**, **Syphilitic**, hereditary syphilis. **D.**, **Tuberculous**, a constitutional inability to resist tuberculous infection. Syn., *Plithical diathesis*. **D.**, **Uric acid**, a constitutional tendency to the accumulation of uric acid and urates in the fluids of the body and the development of rheumatism, gout, etc.; the arthritic, gouty, rheumatic, or lithic diathesis.

Diathetic (*di-at-thes-et-ik*) [*diathesis*]. Relating to a diathesis.

Diatomic (*di-at-om'-ik*) [*diá*, two; *átomos*, atom]. 1. Consisting of two atoms. 2. Having two hydrogen atoms replaceable by radicals.

Diaxon (*di-aks'-on*) [*diá*; *ἄξων*, axis]. 1. In biology, having two axes. 2. A neuron having two axes.

Diazo- (*di-az-o-*) [*diá*; *azotum*, nitrogen]. A prefix signifying that a compound contains phenyl, C_6H_5 , united with a radicle consisting of two nitrogen atoms. **D.-reaction**, **D.-test**, a urinary test, valuable in the diagnosis of enteric fever. The solutions required are: (a) A saturated solution of sulfanilic

acid in a 5% solution of hydrochloric acid; (b) a 0.5% solution of sodium nitrite. Mix a and b in the proportion of 40 Cc. of a to 1 Cc. of b, and to a few cubic centimeters add an equal volume of urine, and, after shaking well, allow a few drops of ammonia to flow down the side of the tube. A garnet-red color at the point of contact denotes the reaction, or a rose-pink foam after shaking.

Diazonal (*di-az'-o-nal*) [*diá*, through; *ζώνη*, a zone]. Applied by Fürbringer to nerve-trunks which lie across a sclerozone.

Dibasic (*di-ba'-sik*) [*diá*, two; *βάσις*, base]. Of a salt, containing two atoms of a monobasic element or radicle; of an acid, having two replaceable hydrogen atoms.

Dibenzyl (*di-ben'-zil*), $C_{16}H_{14}$. A compound prepared by the action of sodium upon benzyl chloride.

Dibenzylamin (*di-ben'-zil'-am-in*), $C_{16}H_{18}N$. An oily liquid having the constitution of ammonia in which two atoms of hydrogen are replaced by two molecules of benzyl.

Diborated (*di-bo'-ra-ted*). Combined with two molecules of boric acid.

Dibromated (*di bro'-ma-ted*). Containing two atoms of bromin in the molecule.

Dibromethane (*di-bro-meth'-an*). See *Ethylene Bromid*.

Dibromid (*di-bro'-mid*). A compound consisting of an element or radicle and two atoms of bromin.

Dicalcic (*di-kal'-sik*). Containing two atoms of calcium in each molecule. **D.** **Orthophosphate**, $Ca_2H_2(PO_4)_2$, a salt occurring in urinary deposits.

Dicephalous (*di-sef'-al-us*) [*dicephalus*]. Two-headed.

Dicephalus (*di-sef'-al-us*) [*diá*, two; *κεφαλή*, a head]. A monster with two heads.

Dichloracetic Acid (*di-klor-as-e'-tik*). See *Acid, Dichloracetic*.

Dichloralantipyrin (*di-klo-ral-an-te-pi'-rin*). See *Antipyrin Bichloral*.

Dichlorethane (*di-klor-eth'-an*). See *Ethene Chlorid*.

Dichlorid (*di-klo'-rid*). A compound in each molecule of which two atoms of chlorine are combined with an element or radicle.

Dichlormethane (*di-klor-meth'-an*). See *Methylene Dichlorid*.

Dichotomy (*di-kot'-o-me*) [*diá*, in two; *τέμνω*, to cut]. The state of being bifid, the phenomenon of bifurcation. **D.**, **Anterior**, said of a double monster united below the upper limbs. **D.**, **Posterior**, said of a double monster in which the two individuals are fused above the posterior extremities.

Dichroism (*di'-kro-izm*). See *Dichromism*.

Dichromasy (*di-kro'-mas-e*) [*diá*, two; *χρώμα*, color]. The condition of a dichromat; inability to distinguish more than two colors.

Dichromat (*di'-kro-mat*). A person with dichromatopsia. Cf. *Monochromat; Trichromat*.

Dichromatopsia (*di-kro-mat-op'-se-ah*) [*diá*; *χρώμα*, color; *ὄψις*, sight]. A form of color-

blindness in which there are two sharply limited regions at the ends of the spectrum, within which there are no changes of hue, but merely of intensity. All other parts of the spectrum, the "middle region," can be produced by mixtures of the two end regions.

Dichromic (*dī-kro'nik*) 1. Marked by two colors. 2. Containing two atoms of chromium.

Dichromism (*dī-kro'ni-zm*) [*dī*; *χρῶμα*, color]. The state of presenting one color when seen by reflected light, and another when seen by transmitted light. See also *Dichromatopsis*.

Dichromophilism (*dī-kro-mō'fil-izm*) [*dī*; *χρῶμα*, color; *φιλεῖν*, to love]. Capability for double staining.

Dichromous, Dichroous, Dichrous (*dī'kro-mus, dī'kro-us, dī'kru-s*). Having two colors; relating to dichromism.

Dicinchonin (*dī-sin'kon-in*) [*dī*; *cinchona*, $C_{17}H_{19}N_3O_2$]. An alkaloid of cinchona bark.

Diclidostosis (*dī-kli-dos'tis*) [*δελίδες*, folding doors, *ὀστέον*, a bone]. Ossification of the venous valves. Syn., *Osteodictia*.

Dicrotic (*dī-kro'tik*) [*δίκροτος*, double beating]. Having a double beat. **D. Pulse.** See *Dicrotism*. **D. Wave**, the recoil-wave of the sphygmographic tracing, generated by closure of the aortic valves.

Dicrotism (*dī'kro-tizm*) [see *Dicrotic*]. A condition of the pulse in which with every wave there is given to the finger of the examiner the sensation of two beats. It is present when the arterial tension is low.

Didactic (*dī-dak'tik*) [*διδασκαλός*, apt at teaching]. Teaching by description and theory.

Didelphic, Didelphous (*dī-del'fik, -fus*) [*δις*, double, *δελφίς*, the uterus]. Having a double uterus.

Diduction (*dī-duk'shun*) [*diducere*, to draw apart]. Ablation of two parts, the withdrawal of a part.

Diductor (*dī-duk'tor*) [*diduction*]. A muscle which in action produces diduction.

Didymin (*dī-dim'in*) [*Didymus*, the testes]. A dry preparation made from the testes of the ox. Aphrodisiac dose 5 gr. (0.3 Gm.). In larger doses it is hypnotic.

Didymium (*dī-dim'e-um*) [*Didymos*, twin]. A rare metallic element. **D. Chlorid**, $D_2Cl_2 + 12H_2O$. A recommended noncaustic disinfectant in solutions of 1:500 to 1:1000. **D. Nitrate**, $D_2NO_3 + 12H_2O$; an efficient bactericide. **D. Salicylate**, a waste-product in the manufacture of mantles for incandescent gas-lights. It is an excellent topical anesthetic and antiseptic, employed in the form of 10% pomade in burns and cutaneous affections. Syn., *Dymal*. **D. Sulfate**, $D_2SO_4 + 6H_2O$, hygroscopic crystals used as a disinfectant in the form of a dusting-powder.

Dielectric (*dī-el'ek-trik*) [*δις*, through; *ἤλεκτρον*, amber]. Transmitting electricity by induction and not by conduction. **D., Pseudo-**, any compound which acts as a

dielectric when pure, but as an electrolyte when mixed with other members of its own class.

Diencephalon (*dī-en-sef'alon*) [*δις*, between; *ἐνκέφαλος*, brain]. That part of the brain between the prosencephalon and the mesencephalon. It includes the thalamus and the third ventricle. Syn., *Between-brain*; *Thalamocephalon*.

Dieresis (*dī-er'es-is*) [*διρίπτω*, a division]. A solution of continuity, as a wound, ulceration, etc.

Dieretic (*dī-er-et'ik*) [*dieresis*]. Destructive, escharotic; corrosive.

Diestrous, Diœstrous (*dī-es'trus*) Pertaining to a type of sexual season in female animals in which there is a short period of sexual rest.

Diestrum, Diœstrum (*dī-es'trum*) [*δις*, between, *ὄστρεον*, gad-fly]. Heape's term for the short period of sexual rest characteristic of some female animals.

Diet (*dī-et*) [*dieta*, a system or mode of living].

The food taken regularly by an individual; the food adapted to a certain state of the body, as *fever-diet*, *convalescent-diet*. **D., Banting's.** See *Banting Cure*. **D., Bland**, one consisting of food that is free from the ingredients which excite heat, but containing all the nutrients albumin, carbohydrates, and fat—necessary for the maintenance of man. **D., Diabetic**, a diet made of meats and green vegetables, starches and sugars being excluded. **D., Fever-**, a nutritious, easily digestible liquid or semiliquid diet, usually with milk and meat broths as a basis. **D., Gouty**, a diet of simple nutritious food, avoiding wines, fats, pastries, and much meat. **D., Tuffnell's**, a highly nutritious diet, including but a small amount of liquids, employed in the treatment of aneurysm.

Dietary (*dī-et-a-ry*) [*diet*]. A system of food regulation intended to meet the requirements of the animal economy.

Dietetic (*dī-et-et'ik*) [*diet*]. Pertaining to diet.

Diethyl (*dī-eth'el*), C_2H_5 . A double molecule of ethyl, in a free state it constitutes normal butane. **D. Acetal.** See *Acetal*. **D. Acetone**, C_3H_8O , C_3H_6O . A hypnotic liquid used in mania. Syn., *Propanone*. **D. Glycocoll-gualacol Hydrochlorate**, an antiseptic used in pulmonary tuberculosis, ozæna, etc. Dose 15-60 gr. (1-4 Gm.). See, *Guanosin*.

Diethylamin (*dī-eth-il'am-in*), NC_2H_5 . A non-poisonous, liquid ptomain obtained from garret-fish.

Diethylenediamin. See *Piperazin*.

Diet's Crises. See *Crises*, *Diet's*.

Dietotherapy (*dī-et-o-thēr'ap-ē*) [*diet*; *θεραπευτική*, therapy]. The regulation of diet for therapeutic purposes.

Dietrich's Reaction for Uric Acid. A red coloration results from the addition of a solution of sodium hypochlorite or hypobromite to the uric-acid solution. The color vanishes on adding caustic alkali.

Differential (*dī-er-en-shal*) [*differentia*, difference]. Pertaining to or creating a differ-

- ence.** **D. Diagnosis.** See *Diagnosis*, *Differential*. **D. Staining**, a method of staining tubercle bacilli, syphilis bacilli, etc., founded upon the fact that they retain the color in the presence of certain reagents that decolorize the surrounding tissues.
- Differentiation** (*dif-er-en-she-a'-shun*) [see *Differential*]. 1. The act or process of distinguishing or making different. 2. Changing from general to special characters; specialization.
- Diffuence** (*dif'-lu-enz*) [*diffuere*, to flow apart]. The condition of being almost liquefied.
- Diffraction** (*dif-rak'-shun*) [*dis*, apart; *fractus*, broken]. The deflection or the separation into its component parts that takes place in a ray of light when it passes through a narrow slit or aperture. **D. Grating**, a strip of glass closely ruled with fine lines; it is often used in the spectroscope in the place of the battery of prisms.
- Diffusate** (*dif'-u-sat*) [*diffuse*]. The portion of the liquid which passes through the animal membrane in dialysis, and holds crystalloid matter in solution.
- Diffuse** (*dif-us'*) [*diffundere*, to spread by pouring]. Scattered, not limited to one tissue or spot, opposed to localized.
- Diffusibility** (*dif-u-si-bil'-i-ty*). Capacity for being diffused. **D. of Gases**, Dalton's term for that property by which two or more gases confined in an inclosed space expand as if the space were occupied by one gas alone, the elastic force of the mixture being equal to the sum of the elastic forces of all the combined gases.
- Diffusible** (*dif-u'-sib-l*) [*diffuse*]. Spreading rapidly, capable of passing through a porous membrane; applied to certain quickly acting stimulants, usually of transient effect.
- Diffusion** (*dif-u'-shun*) [*diffuse*]. A spreading-out. **D.-circle**, the imperfect image formed by incomplete focalization, the position of the true focus not having been reached by some of the rays of light or else having been passed.
- Disuordiphenyl, Difluorodiphenyl** (*di-flu-or-di-fen'-il so-di-fen'-il*). C_6H_5F — C_6H_5F ; used as a 10% dusting powder or as a 10% ointment in treating luetic ulcers, etc.
- Digallic Acid** (*di-gal'-ik*). Synonym of *Tannic acid*.
- Digastric** (*di-gas'-trik*) [*dis*, two; *gastro*, belly]. Having two bellies, as the *digastric muscle*.
- Digenesis** (*di-jen'-et-is*) [*dis*, two; *genesis*, generation]. In biology, the alternation of sexual and asexual generation.
- Digenetic** (*di-jen-et'-ik*) [*digenesis*]. Relating to alternate generation.
- Digenism** (*dif'-jen-izm*). 1. See *Digenesis*. 2. The combined or concurrent action of two causes.
- Digest** (*di-jest'*) [*digerere*, to digest]. 1. To make food capable of absorption and assimilation. 2. In pharmacy, to macerate in a liquid medium.
- Digestant** (*di-jest'-ant*) [*digest*]. A substance that assists digestion of the food.
- Digester** (*di-jest'-er*) [*digest*]. An autoclave or apparatus for destructive distillation.
- Digestion** (*di-jest'-chun*) [*digest*]. Those processes whereby the food taken into an organism is made capable of being absorbed and assimilated by the body-tissues. **D., Artificial**, digestion carried on outside of the body. **D., Gastric**, digestion by the action of the gastric juice. **D., Intestinal**, digestion by the action of the intestinal juices, including the action of the bile and the pancreatic fluid. **D., Pancreatic**, digestion by the action of the pancreatic juice. **D., Peptic**. See *D., Gastric*. **D., Primary**, gastrointestinal digestion. **D., Salivary**, digestion by the saliva. **D., Secondary**, the assimilation by the body-cells of their appropriate pabulum.
- Digestive** (*di-jes'-tiv*) [*digestion*]. 1. Relating to or favoring digestion. 2. An agent that promotes digestion. **D. Tract**, the whole alimentary canal from the mouth to the anus.
- Digit** (*dij'-it*) [*digitus*, finger]. A finger or toe.
- Digital** (*dij'-it-al*) [*digit*]. 1. Pertaining to the fingers or toes. 2. Performed with the fingers. 3. Resembling a depression made with a finger-tip; e. g., *digital fossa*. **D. Arteries**, the arteries of the hands and feet supplying the digits. See under *Artery*. **D. Compression**, the stoppage of a flow of blood by pressure with the finger. **D. Examination**, examination or exploration with the finger.
- Digitalacin** (*dij-it-al-ak'-rin*), $C_{25}H_{40}O_6$. A substance obtained from digitalis.
- Digitalein** (*dij-it-al'-e-in*). 1. One of the constituents of digitalis. 2. A cardiac tonic and diuretic. Dose $\frac{1}{2}$ – $\frac{1}{2}$ gr. (0.001–0.002 Gm.) 2 to 4 times daily.
- Digitaletin** (*dij-it-al-et'-in*), $C_{25}H_{40}O_6$. A substance obtained from digitalin by heating with dilute acid.
- Digitaliform** (*dij-it-al'-e-form*) [*digit*; *forma*, form]. Finger-shaped.
- Digitalin, Digitalinum** (*dij-it-al'-in, dij-it-al'-in-um*) [*digitalis*]. 1. $C_8H_8O_2$ (?). The active principle of *Digitalis purpurea*. Dose $\frac{1}{2}$ – $\frac{1}{2}$ gr. (0.001–0.002 Gm.). 2. A precipitate from a tincture of *Digitalis purpurea*. Unof. **D., Crystallized**. See *Digitin*. **D., French**, a yellowish, odorless, bitter powder, said to consist of digitalin with some digitoxin. It is used as a heart-tonic. Dose $\frac{1}{2}$ – $\frac{1}{2}$ gr. (0.00026 Gm.) rapidly increased to $\frac{1}{2}$ gr. (0.0016 Gm.) daily; maximum dose $\frac{1}{2}$ gr. (0.0013 Gm.) daily. Syn., *Chloroformic digitalin*; *Homolle's amorphous digitalin*; *Insoluble digitalin*. **D., German**, a white or yellowish powder, said to consist of digitalein with some digitonin and digitalin. It is a noncumulative heart tonic and diuretic. Dose $\frac{1}{2}$ – $\frac{1}{2}$ gr. (0.001–0.002 Gm.) 3 or 4 times daily in pills or subcutaneously; maximum dose $\frac{1}{2}$ gr. (0.004 Gm.) single, $\frac{1}{2}$ gr. (0.022 Gm.) daily. Antidotes: emetics, tartaric acid, saponin, nitroglycerin, morphin early, strophanthin later, alcoholic stimulants, etc.

- D., Homolle's, D., Insoluble.** See *D.*, French. **D., Kilian's,** a white, amorphous powder, exerting the characteristic effect of digitalis leaves. Dose $\frac{1}{10}$ gr. (0.05025 Gm.). Syn., *Digitalinum verum kiliani*. **D., Nativelle's, D.-nativelle,** $C_{20}H_{30}O_{10}$; said to consist chiefly of digitoxin. It is recommended as a heart-tonic and in pulmonary inflammation. Dose $\frac{1}{10}$ – $\frac{1}{5}$ gr. (0.00065–0.001 Gm.). **D., Soluble.** See *D.*, German.
- Digitaliretin, Digitalirrhelin** (*dij-it-ál-i-rel-in*). $C_{40}H_{62}O_8$. A substance obtained from digitalin by action of dilute acid with heat.
- Digitalis** (*dij-it-a'-lis*) [*digitalis*, pertaining to the fingers]. Foxglove. The *digitalis* of the U. S. P. is the leaves of *D. purpurea*. It contains an amorphous complex substance, *digitalin*, that does not, however, represent the full properties of the leaves. It is a powerful cardiac stimulant, strengthening the systole and lengthening the diastole of the heart. It also acts as a diuretic; in large doses it causes gastric disturbance. It is employed mainly in diseases of the heart when compensation is lost. **D., Extract of** (*extractum digitalis*, U. S. P.). Dose $\frac{1}{4}$ – $\frac{1}{2}$ gr. (0.01–0.032 Gm.). **D., Fluidextract of** (*fluidextractum digitalis*, U. S. P.). Dose 1–3 min. (0.06–1.8 Cc.). **D., Infusion of** (*infusum digitalis*, U. S. P.), 1½ parts of the leaves in 100 parts. Dose 2–4 dr. (4–8 Cc.). **D., Tincture of** (*tinctura digitalis*, U. S. P.), 15 parts of the leaves in 100 of diluted alcohol. Dose 10–20 min. (0.6–1.2 Cc.).
- Digitalism, Digitalismus** (*dij'-it-ál-izm, dij-it-ál-is-mus*). The condition caused by the injudicious use of digitalis, consisting in paralysis of cardiac action.
- Digitalization** (*dij-it-ál-iz-a'-shun*). Subjection to the effects of digitalin or digitalis.
- Digitation** (*dij-it-a'-shun*) [*digitatus*, having digits]. A finger-like process, or a succession of such processes, especially of a muscle.
- Digitiform** (*dij'-it-e'-form*) [*digit, forma, form*]. Finger-shaped.
- Digiti mortui** (*dij'-it-i-mor-tu-i*) [L.]. Dead fingers; a cold and white state of the fingers.
- Digitin** (*dij'-it-in*), $(C_4H_8O)_n$. A thermopically inert substance occurring as a granular, crystalline powder, isolated from the leaves of *Digitalis purpurea*. Syn., *Crystallized digitalin*.
- Digitofibular** (*dij-it-o-fib'-u-lar*). Pertaining to the fibular aspect of the toes.
- Digitometatarsal** (*dij-it-o-met-a-tar'-al*). Pertaining to the metatarsal and the toes.
- Digitonin** (*dij-it-a'-nin*) [*digitalis*]. $C_{40}H_{62}O_{10}$. A white, amorphous mass obtained from digitalis.
- Digitoradial** (*dij-it-o-rad'-e-al*). Relating to or situated upon the radial aspect of the fingers.
- Digitotibial** (*dij-it-o-tib'-e-al*). Relating to the tibial aspect of the toes.
- Digitoular** (*dij-it-ou-lar*) Relating to the ulnar aspect of the fingers.
- Digitoxin** (*dij-it-ok'-in*) [*digitalis, toxica, poison*]. $C_{41}H_{64}O_{11}$, or $C_{42}H_{66}O_{12}$. A highly poisonous glucosid from *Digitalis purpurea*. A powerful heart tonic, used in valvular lesions and myocarditis, etc. Dose $\frac{1}{10}$ – $\frac{1}{5}$ gr. (0.00065–0.001 Gm.) 3 times daily with 1 min. (0.2 Cc.) chloroform, 60 min. 16 Cc. alcohol, 1½ oz. (45 Cc.) water. For 1½ gr. (0.0008 Gm.) with 10 min. 16 Cc. alcohol, 4 oz. (120 Cc.) water, 1 to 3 times daily. Maximum dose $\frac{1}{2}$ gr. (0.002 Gm.) daily.
- Dihydrate** (*dih'-drat*) [*dyg, twice, three water*]. 1. Any compound containing two molecules of hydroxyl. Syn., *binhydrate*. 2. A compound containing two molecules of water.
- Dihydrated** (*dih'-dra-ted*). Having absorbed two hydroxyl molecules.
- Dihydric** (*dih'-drik*). Containing two atoms of hydrogen in the molecule.
- Dihydrid** (*dih'-drid*). A compound of two atoms of hydrogen with an element or radical.
- Dihydrocollidin** (*dih-hi-dro-kol'-id-in*). $C_{12}H_{15}N$. A liquid substance isomeric with a ptomain obtained from putrid flesh and fish.
- Dihydrocoridin** (*dih-hi-dro-kor'-id-in*). $C_{12}H_{15}N$. A substance isomeric with a ptomain found in cultures of the *Bacillus alii*.
- Dihydrolutidin** (*dih-hi-dro-lut-id-in*) [*dyg, double, sleep, water, lutetia, cold*]. $C_{12}H_{15}N$. One of the alkaloidal bases found in cod liver oil. It is slightly poisonous in small doses diminishing general sensibility, in large doses causing tremor, paralysis of the legs, or, in animals, the hind limbs, and death.
- Dihydroresorcinol** (*dih-hi-dro-re-so'-rin-ol*). Shining white prisms, soluble in water, alcohol, or chloroform, melting at 154° and 160° C. obtained from resorcinol by action of sodium amalgam with carbon dioxide. It is recommended as an antiseptic.
- Dihydroxytoluene** (*dih-hi-dro-ké-to'-lé-n-ol*). See *Ortolin*.
- Diiodid** (*dii'-o-did*) [*di, two, iodium, value*]. A compound consisting of a base, chlorine, and two atoms of iodine. **D. Hydroiodate.** See *Caffrin Triiodid*.
- Diiodoanilin** (*dii-odo-an'-il-in*), $C_6H_4N_2I_2$, [1 : 2 : 4]. A reaction-product of aniline and iodine chlorid. It is antiseptic and used as an application in skin diseases. See *Metaiodoanilin*.
- Diiodobetanaphthol** (*dii-odo-ba-tah-naf'-thol*). $C_{16}H_{11}O_2I_2$. A yellowish-green powder obtained from mixed solutions of iodine with potassium iodide and betanaphthol with sodium carbonate and sodium hyposulfite. It is used as an antiseptic in place of aristol. Syn., *Naphthodiodin*, *Naphthodiodid*.
- Diiodocarbazol** (*dii-odo-kar'-ba-zol*), $C_{12}H_8I_2N_2$. A substance obtained from carbazol by action of iodine with heat, insoluble in water, soluble in alcohol and chloroform. It is recommended as an antiseptic.
- Diiododithymol** (*dii-odo-di-thi'-mol*). See *Arviol*.

Diiodoform (*di-i-o'-do-form*), $C_2H_2I_4$. A substance obtained from acetylene iodid by excess of iodine and containing 95.28% of iodine. It decomposes on exposure to light. Used as a substitute for iodoform. Syn., *Tetraethylene iodid*.

Diiodomethane (*di-i-o-do-meth'-an*). Methylene iodid.

Diiodonaphthol (*di-i-o-do-naf'-thol*). See *Diiodobetanaphthol*.

Diiodoresorcinol (*di-i-o-do-re-zor'-sin-ol*). A brown, inodorous powder, used as an antiseptic in place of aristol.

Diiodosalicylic Acid (*di-i-o-do-sal-is-il'-ik*). See *Acid*, *Diiodosalicylic*. **D.-methylester**. See *Sanoform*. **D.-phenylester**. See *Diiodosalol*.

Diiodosalol (*di-i-o-do-sal'-ol*), $C_8H_7I_2(OH)CO_2C_2H_5$. A condensation-product of diiodosalicylic acid with phenol. It is used in treatment of skin diseases.

Diiodothioresorcinol (*di-i-o-do-thi-o-re-zor'-sin-ol*), $C_8H_7O_2I_2S_2$. It is used as a dusting-powder and in 10 to 20% ointment.

Dikamali [E. Ind.]. A fetid gum-resin obtained from *Gardenia gummifera* and *G. lucida*. In decoction it is used as an antiperiodic and in the treatment of chronic skin diseases.

Dilaceration (*di-las-er-a'-shun*) [*dilaceratio*, a tearing apart]. A tearing apart; division of a membranous cataract by a tearing operation.

Dilatation (*dil-at-a'-shun*). See *Dilation*.

Dilatator (*di-lat-a'-tor*). See *Dilator*.

Dilate (*di-lar'*) [*dilare*, to spread]. To increase in size; to spread apart; to stretch.

Dilation (*di-la'-shun*) [*dilate*]. A spreading apart; the state, especially of a hollow part or organ, of being dilated or stretched. **D.**, **Digital**, dilation of a body-cavity or orifice by means of a finger. **D. of Heart**, an increase in the size of one or more of the cavities of the heart, arising from a relaxation or weakening of the heart muscle. It is associated with evidences of failure of circulation, resulting in congestion of the lungs and other viscera. **D.**, **Hydrostatic**, dilation of a cavity or part by means of an introduced elastic bag which is subsequently distended with water. **D. of Stomach**, increase in size of the stomach from relaxation of the walls and expansion with gas in chronic gastritis.

Dilatometer (*dil-at-om'-et-er*) [*dilatation*; *μέτρον*, a measure]. An apparatus for the estimation of the dilation of liquids.

Dilator (*di-la'-tor*) [*dilation*]. An instrument for

PLAIN PORCELAIN DILATOR.

stretching or enlarging a cavity or opening; also, a dilating muscle. See under *Muscle*.

Dill (*dil*). See *Anethum*.

Diluent (*dil'-u-ent*) [*dilute*]. 1. Diluting. 2. An agent that dilutes the secretions of an organ.

Dilute (*di-lūt'*) [*diluere*, to wash away]. To make weaker through increasing the bulk by the addition of liquid.

Diluting Fluids. Solutions for use with the hemocytometer. See *Hayem's Solution* and *Solution*, *Sherrington's*, *Solution*, *Trisson's*.

Dilution (*di-lūt'-shun*) [*dilute*]. 1. The process of adding a neutral fluid to some other fluid or substance, in order to diminish the qualities of the latter. 2. A diluted substance; the result of a diluting process.

Dimethyl (*di-meth'-il*), $(CH_3)_2$. A double molecule of methyl; in the free state it constitutes ethane.

D.-acetal, $C_2H_5O_2$, a colorless ethereal liquid obtained from aldehyd, methyl-alcohol, and glacial acetic acid with heat; it is used as an anesthetic, alone or combined with one-half its volume of chloroform. Syn., *Ethylidenedimethyl ether*.

D.-amidoantipyrin. See *Pyramidon*. **D.-amidoazobenzene**, $C_{14}H_{10}N_2$. It is used as an indicator in alkalimetry and as a fat color. Syn., *Butter yellow*.

D.-amidophenyl-dimethyl-pyrazolon. See *Pyramidon*. **D.-arsin**. See *Cacodyl*.

D. Sulfate, $(CH_3)_2SO_4$, a color-

less, oily fluid much used in chemic manipulation and giving rise to poisoning with marked local and pulmonary symptoms, convulsions, coma, and paralysis. **D.-xanthin**. 1. See *Paraxanthin* in *Leukomains*, *Table of*. 2. See *Theobromin*.

Dimethylamin (*di-meth-il-am'-in*), NC_2H_7 . A nontoxic ptomain found in putrefying gelatin, old decomposing yeast, etc.

Dimethylated (*di-meth-il-a-ted*). Combined with two molecules of methyl.

Dimetria (*di-me'-tre-ah*) [*δίς*, double; *μήτρα*, the womb]. The condition of having a double uterus.

Dimorphobiotic (*di-mor'-fo-bi-ol'-ik*) [*δίς*, *μορφή*, shape; *βίωσις*, life]. Relating to an organism which runs through two or more morphologically distinct phases in its life-history—a free stage and a parasitic stage.

Dimorphous (*di-mor'-fus*) [*δίς*; *μορφή*, form]. Existing in two forms.

Dinaphthyl (*di-naf'-thil*), $C_{20}H_{14} = C_{10}H_7$. A pearl like hydrocarbon prepared by partially oxidizing naphthalene or by passing naphthalene vapor through a red-hot tube.

Dineuric (*di-nū'-rik*) [*δίς*; *νῆρον*, nerve]. Provided with two neuraxons; said of a nerve-cell.

Dinitrate (*di-nī'-trat*). A compound resulting from the replacement of the hydrogen of two molecules of nitric acid by a base.

Dinitrocellulose (*di-nī-tro-sel'-u-lōs*). See *Pyroxylin*.

Dinitrocresol (*di-nī-tro-kre'-sol*), $C_7H_5N_2O_6$.

Explosive crystals melting at $85^\circ C$. The potassium salt of *o*-dinitrocresol is an excellent insecticide and an efficient remedy in scabies, and mixed with equal parts of soap is, under

the name of *antinonin*, used as an insecticide and to destroy rats and mice. A mixture of the potassium salts of *o*-dinitroresol and *p*-dinitroresol, a commercial substitute for saffron, has been employed with fatal results.

Dinitroresorcinol (*di-ni-tro-re-sor'-sin-ol*), $C_6H_4N_2O_6 = 2H_2O$. It is employed in histologic preparations. Syn., *Ordinary dinitroresorcinol*.

Dionin (*di'-o-nin*), $C_7H_5O_2 \cdot (OH) \cdot C_{17}H_{17}NO \cdot HCl + H_2O$. Ethylmorphin hydrochlorate. It is analgesic, antispasmodic, and sedative, and is employed in diseases of the respiratory passages and in morphinism. Dose $\frac{1}{4}$ - $\frac{1}{2}$ gr. (0.01-0.015 gm.).

Dioptr (*di-op'ter*) [*dō*, through; *di'optra*, to see]. The unit of measurement of the refractive power of an optic lens. It is the refractive power of a lens that has a focal distance of one meter.

Dioptrics (*di-op'triks*) [*diop'ter*, *naōtēiv*, to examine]. A method of estimating ocular refraction by means of the ophthalmoscope.

Dioptric (*di-op'trik*) [*diop'ter*]. 1. Pertaining to transmitted and refracted light. 2. A dioptr.

Dioptrics (*di-op'triks*) [*diop'ter*]. Same as *Dioptrics*. See also *Refraction*.

Dioptry (*di-op'tri*). See *Dioptrics*.

Dioamic (*di-ō'-mīk*). Containing two atoms of osmium as a quadrivalent radicle.

Diosmotic (*di-ōz-mōt-ik*) [*dō*, through; *diōsis*, impulse]. Pertaining to osmosis.

Diospyros (*di-ōs'-pi-zos*) [*dōs*, of Jove, *spōs*, grain, fruit]. A genus of trees of the order *Ulmaceae*. The bark of *D. virginiana*, the persimmon tree of the United States, is astringent, tonic, antiperiodic, and hemostatic, and is used in diarrhea, intermittent fever, and uterine hemorrhage. Dose of fluid-extract 15-65 min. (1-4 Cc.).

Diosyosis (*di-ōs-i-ōs*) [*dōs*, away from, *hōstōs*, a bone]. Displacement of a bone.

Dioviurnia (*di-ō-vi-urn-ia*) [*di-ō-vi-urn-ia*]. A proprietary combination of equal parts of the fluid extracts of *Urtica dioica*, *V. pennsylvanica*, *Chamaelirium carolinianum*, *Cardiophyllum thalictroides*, *Aletris purpurea*, *Mitchella repens*, *Scutellaria laterifolia*, and *Dianthus caryophyllus*. It is antispasmodic and anodyne, and is used in dysmenorrhea, amenorrhea, etc.

Dioxid (*di-ōk-sid*) [*dō*, two, *diōs*, sharp]. A molecule containing two atoms of oxygen.

Dioxyanthranol, **Dioxyanthrol** (*di-ōk-s-e-an'-thran-ol*, *thral*). See *Indurashin*.

Dioxybenzene (*di-ōk-s-e-ben'-zēn*). See *Hydroquinone*.

Dioxygen (*di-ōk-s-e-jen*), H_2O_2 . A term introduced for a preparation of pure hydrogen di-oxid.

Dioxynaphthalene (*di-ōk-s-e-naf'-thal-ēn*), $C_{10}H_6O_2$. A toxic compound used as a roborant. The daily dose is 3 gr. (0.15 gm.).

Dioxytoluene (*di-ōk-s-e-jol'-u-ēn*). Same as *Quin*.

Dip. The deviation from the horizontal position shown by a freely suspended magnetic needle.

Diphenyl (*di-fen'-il*), $C_{12}H_{10}$. A hydrocarbon resulting from the action of sodium upon bromobenzene in ether or benzene. It is also present in coal-tar.

Diphtheria (*di-the'-re-ah*) [*diphthēra*, a skin or membrane]. An acute infectious disease caused by the Klebs-Löffler bacillus. It is characterized by the formation, on a mucous membrane, most frequently that of the pharynx, of a false membrane, grayish or buff in color, and quite firmly adherent. A mucous membrane, as the larynx, nasal, conjunctival, and, more rarely, the gastrointestinal, vaginal, and that of the middle ear, may be the seat of the disease. The membrane may also be formed on wounds—*erysipelatous or wound diphtheria*. The constitutional symptoms result from the absorption of poisons elaborated by the bacteria; the bacilli themselves not being found in the blood, as a rule. These poisons are a nucleal albumin and a nuclein, the former producing the acute, the latter the later, symptoms of the disease. The general symptoms are, in brief, fever, profound prostration, weakness of the heart, and a rapidly developing anemia. A frequent sequel is paralysis, which may be general, but is often confined to the palatal and ocular muscles. Diphtheria is essentially a disease of childhood and very fatal. Deaths result from systemic poisoning, from heart failure, from obstruction to respiration by the presence of membrane in the air passages, or from a complication, as pneumonia. D., **Brétouneau's**, true diphtheria of the pharynx, first described by P. Brétouneau (1856). D., **Toxin**, a toxinalbumin produced by *Bacillus diphtheriae*, it is destroyed by a temperature over 60° C., and is capable of causing in susceptible animals the same phenomena induced by inoculation with the living bacilli.

Diphtheric (*di-the'-rik*) [*diphtheria*]. Of or pertaining to diphtheria.

Diphthericide (*di-the'-ri-sid*). A proprietary prophylactic against diphtheria, a solution of thymol, sodium benzoate, and saccharine.

Diphtherin (*di-the'-rin*). See *Diphtheria Toxin*.

Diphtheritic (*di-the'-rit-ik*). See *Diphtheria*.

Diphtheroid (*di-the'-roid*) [*diphtheria*]. 1. Resembling diphtheria. 2. A general term for all pseudomembranous formations not due to *Bacillus diphtheriae*.

Diphtherotoxin (*di-the'-o-tox-ēn*). See *Diphtheria Toxin*.

Diphthongia (*di-the'-n-jā*) [*dō*, double, *phōnē*, a voice]. The production of a double tone of the voice, due to incomplete unilateral paralysis of the recurrent laryngeal nerve, or to some lesion of the vocal bands that causes each to produce its own sound.

Diplacusis (*di-plak'-us*) [*diplosis*, double, *akousis*, hearing]. 1. The hearing of a tone as higher by one ear than by the other. Syn., *Diplacusis binauralis*. 2. The hearing of two tones by one ear when only one tone is produced. Syn., *Diplacusis monauralis*.

Diplegia (*di-plee'-je-ah*) [*δίς*, double; *πάλη*, stroke]. Paralysis of similar parts on the two sides of the body. **D.**, Spastic Cerebral, of Infancy. See *Little's Disease*.

Diplo- [*δίπλος*, double]. A prefix signifying double.

Diploblastic (*dip-lo-blas'-tik*) [*diplo-*; *βλαστός*, a germ]. Having two germinal layers.

Diplocardiac (*dip-lo-kar'-de-ak*) [*diplo-*; *καρδία*, heart]. Having a double heart.

Diplocephalia (*dip-lo-sef'-a'-le-ah*) [*diplo-*; *κεφαλή*, the head]. A two-headed monstrosity.

Diplococcus (*dip-lo-kok'-us*) [*diplo-*; *κόκκος*, a berry]. A micrococcus that occurs in groups of two.

Diplocoria (*dip-lo-ko'-re-uh*) [*diplo-*; *κόρυς*, pupil]. Double pupil.

Diploe (*dip'-lo-e*) [*διπλόη*, a fold]. The cancellous bony tissue between the outer and inner tables of the skull.

Diploetic (*dip-lo-et'-ik*) [*diploe*]. Relating to the diploe, diploic.

Diplogenesis (*dip-lo-jen'-es-is*) [*diplo-*; *γένεσις*, production]. 1. The development of a double or twin monstrosity. 2. The process described by Pignè in 1846 whereby congenital tumors are formed by the inclusion of embryonic remains.

Diploic (*dip-lo'-ik*) [*diploe*]. See *Diploetic*.

Diplomeric (*dip-lom'-er-ik*) [*diplo-*; *μῆρς*, a part]. Applied to muscles arising from two myotomes; e. g., the supraspinatus and infraspinatus muscles.

Diplomyelia (*dip-lo-mi-e'-le-ah*) [*diplo-*; *μυελός*, marrow]. An apparent doubleness of the spinal cord, produced by a longitudinal fissure.

Diplopia (*dip-lo'-pe-ah*) [*diplo-*; *ὄψις*, sight]. Double vision, one object being seen by the eye or eyes as two. **D.**, Binocular, the most frequent, is due to a derangement of the muscular balance, the images of the object being thereby thrown upon nonidentical points of the retinas. **D.**, Crossed, **D.**, Heteronymous, the result of divergent strabismus, the image of the right eye appearing upon the left side and that of the left eye upon the right side. **D.**, Direct, **D.**, Homonymous, the reverse of crossed diplopia, found in convergent strabismus. **D.**, Monocular, diplopia with a single eye, usually due to hysteria, to double pupil, or beginning cataract.

Diplosal (*dip-lo'-sal*). A proprietary name for the salicylate of salicylic acid.

Dipolar (*di-po'-lar*). See *Bipolar*.

Dipotassic (*di-po-tas'-ik*) [*δί*, two; *potassium*]. Containing two atoms of potassium in a molecule.

Dippel's Animal Oil. Oleum cornu cervi. An oil obtained in distilling bone and deer's horn. It contains pyridin and lutidin. It is antispasmodic and stimulant.

Dipping Needle. A magnetic needle so hung that it can move freely in a vertical plane.

Dipsomania (*dip-so-ma'-ne-ah*) [*δίψα*, thirst; *μανία*, madness]. The uncontrollable desire for spirituous liquors.

Dipsorrhæxia (*dip-sor-eks'-e-ah*) [*δίψα*, thirst; *ὄρεξις*, appetite]. Thebault's term for that early stage of alcoholism in which no organic lesions have as yet appeared in consequence of the alcoholic poisoning, but when the appetite has been developed.

Dipterocarpus (*dip-ter-o-kar'-pus*) [*δίπτερος*, two-winged; *καρπός*, fruit]. A genus of trees, chiefly found in southern Asia, some of which furnish gurgun balsam.

Dipterous (*dip'-ter-us*) [*δίς*, two; *πτερόν*, wing]. In biology, having two wings or wing-like pro-

Dipylidium (*di-pi-lid'-e-um*) [*δίπυλος*, with two entrances]. A genus of parasitic platode worms.

Diradiation (*di-ra-de-a'-shun*). See *Actinobolia* (1).

Direct (*di-rekt'*) [*directus*, straight]. In a right or straight line; without the interposition of some medium. **D. Current**, a galvanic current. **D. Image**. See *Image*, *Direct*. **D. Ophthalmoscopy**. See *Ophthalmoscopy*. **D. Vision**, the perception of an object the image of which falls upon the macula.

Director (*di-rek'-tor*) [*direct*]. Anything that guides or directs. **D.**, Grooved, an instrument grooved to guide the knife in surgical operations.

Dirigomotor (*dir-ig-o-mo'-tor*) [*dirigere*, to direct, motor, a mover]. Controlling motor action.

Dis- [*δίς*, twice]. 1. A prefix denoting two or double. 2. A prefix denoting apart from.

Disarticulation (*dis-ar-tih-u-lá'-shun*) [*dis*, articulum, a joint]. Separation at a joint; amputation at a joint.

Disassimilation (*dis-as-sim-il-a'-shun*) [*dis-assimilatio*]. The process of transformation of assimilated substances into waste-products.

Disc, **Disk** [*discus*; *δίσκος*, a quoit or round plate]. A circular, plate-like organ or structure. **D.**, Anisotropous. See *D.*, Sarcous. **D.**, Becquerel's, an apparatus for estimating the difference in temperature between a sound limb and a paralyzed one. **D.**, Blood-. See *Blood-corpuscle*. **D.**, Choked. See *Papillitis*. **D.**, Contractile. **D.**, Dark. See *D.*, Sarcous. **D.**, Cupped. See *Cupped Disc*. **D.**, Epiphyseal, the broad articular surface with slightly elevated rim on each end of the centrum of a vertebra. Syn., Epiphyseal plate. **D.**, Equatorial. See *Plate*, *Equatorial*. **D.**, Germinal, the small disc of the blastodermic membrane, in which the first traces of the embryo are seen. **D.**, Intermediate. See *Membrane*, *Krause's*. **D.**, Interstitial, the more translucent cementing substance conjoining the sarcois elements, and to which the lighter narrower strias of the muscle-fiber and the intervals of the fibrils are due. Syn., Englemann's lateral disc; *Isotropous disc*; *Lateral disc*, *Light disc*. **D.s.**, Intervertebral. See *Intervertebral Discs*. **D.**, Invisible. See *Corpuscles*, *Norris' Invisible*. **D.**, Isotropous. **D.**, Lateral, **D.**, Light. See *D.*, Intervertebral. **D.**, Median, **D.**, Middle. See *Membrane*, *Krause's*. **D.**, Nuclear. See *Plate*, *Equatorial*.

- D., Optic**, the circular area in the retina that represents the termination of the optic nerve.
- D., Ovigerous**. See *Discus proligerus*. **D., Placido's**. See *Placido's Disc*. **D., Sarcous**, the dark, broad, transverse stripe of striated muscle fiber, it is anisotropic and supposed to represent the proper contractile substance of the fiber. Syn., *Anisotropic disc*; *Contractile disc*; *Dark disc*; *Principal disc*; *Transverse disc*. **D., Schiefferdecker's Intermediate**, the substance which is assumed to fill in the space existing at Ranvier's nodes between Schwann's sheath and the axis-cylinder. It appears as a black line on staining with silver nitrate and forms the horizontal branch of Ranvier's Latin cross. **D., Stenopeic**, a lens allowing the passage of light-rays only through a straight narrow slit; it is used for testing astigmatism. **D., Tactile**. **D., Terminal**. See *Meniscus*, *Tactile*, and *Ranvier's Tactile Discs*. **D., Transverse**. See *D., Sarcous*. **D., Vitelline**. See *Discus proligerus*.
- Discharge** (*dis-charge'*) [*OF., descharger, to unload*]. 1. Any evacuation; also that which is evacuated. 2. A setting free or escape of pent-up energy. In electricity the restoration to a neutral electric condition by which a highly electrified body gives off its surplus of electricity to surrounding objects less highly electrified. **D., Conductive**, an electric discharge taking place through conduction. **D., Convective**, an electric discharge in which the charged particles of a fluid convey the electricity. **D., Disruptive**, an electric discharge with emission of heat and sound.
- Discharger** (*dis-charge'jer*). An instrument for setting free electricity stored in a Leyden jar or other condenser.
- Discharging** (*dis-charge'ing*). Unloading, flowing out, as pus, etc. **D. Lesion**, a brain-lesion that causes sudden discharges of nervous motor impulses.
- Disciform** (*dis'e form*). Disc-shaped.
- Discission** (*dis'ish'un*) [*Latin, discindere, to tear or cut apart*]. An operation for soft cataract in which the capsule is lacerated a number of times to allow the lens-substance to be absorbed.
- Discoblastic** (*dis-koblas'tik*) [*Grec., discoblos, a germ*]. Undergoing discoid segmentation of the vitellus.
- Discoid** (*dis'koid*) [*disc*]. 1. Shaped like a disc. 2. An excavator having a blade in the form of a disc.
- Discophorous** (*dis-kof'or-us*) [*disc*; *phoros, to bear*]. Furnished with a disciform organ or part.
- Discoplasm, Discoplasma** (*dis' - ko - plasm, -phi'mah*). The plasma of red blood-corpuscles.
- Discous** (*dis'kus*) [*disc*]. Discoid.
- Discrete** (*dis-kret*) [*discretus, separated*]. Not running together, separate.
- Discus** (*dis'kus*) [*L., "a disc"*]. A disc. See *Disc*. **D. proligerus**, the mass of cells of the membrana granulosa of the granular vesicle that surround the ovum.
- Discutient** (*dis-kut'shent*) [*discutro, to shake apart*]. 1. Capable of effecting resolu-tion. 2. A medicine having the power of causing an exudation to disappear.
- Disdiacast** (*dis-di'al kast*) [*dis, double, cast, through, alas, to break*]. One of the small doubly refractive elements in the contractile discs of a muscle-fiber.
- Disease** (*dis-eez'*) [*dis, negative, ease, a state of rest*]. A disturbance of function or structure of any organ or part of the body. **D., Acute**, a disease marked by rapid onset and short course. **D., Acute Specific**. 1. An infectious febrile disease. 2. Acute exanthema. **D., Amyloid**. Same as *Amyloid Degeneration*. **D., Autogenous**, one due to failure on the part of some group of body-cells to perform its function. **D., Barometer-maker's**. See under *Barometer*. **D., Bleeders'**. Synonym of *Hemophilia*. **D., Blue**, exanthema. **D., Brass-founders'**, chronic poisoning from working in brass. **D., Caisson-**. See *Caisson disease*. **D., Choleraic**, a tropical affection resembling cholera, due to the ingestion of poisonous fish. Cf. *Sigaterra*. **D., Cholesterin**, amyloid degeneration. **D., Chronic**, one that is slow in its course. **D., Constitutional**, one in which a system of organs or the whole body is involved. **D., Cyclic**, a disease following cycles or periods of exacerbation or change. **D., Cystic, of the Breast**. See *Reclus' Disease*. **D., Divers'**, an affection similar to caisson-disease. **D., Elevator**, an affection of the heart occurring in elevator-men. Syn., *Liftman's heart*. **D., Enthetic**, one introduced extraneously, an infectious disease. **D., Entozootic**, one due to the presence of animal parasites within the body. **D., Eponymic**, those named after individuals. See under name of the individual for definition. **D., Fish-skin**, ichthyosis. **D., Fish-slime**, a peculiar form of septiemia due to punctured wounds by fish-spines. **D., Flax-dresser's**, noma, from inhalation of particles of flax. **D., Fleshworm**, trichinosis. **D., Flint**. Synonym of *Chalicosis*. **D., Focal**, a localized disease. **D., Fourth**, Clement Dukes' term for a contagious disease resembling measles, scarlatina, and rubella, or rose-rash, but distinct. Syn., *Quatrième fièvre eruptif*. **D., Functional**, a disease without discoverable organic lesion. **D., Fungous, of India**, a prevalent endemic disease of India affecting the extremities and disorganizing the tissues, due to the implantation of spores in the tissues. **D., Guinea-worm**. See *Guinea-worm Disease*. **D., Habit**, one that results from long continuation and frequent repetition of an act. **D., Heterotoxic**, those due to toxic substances introduced from without the body. **D., Hydrocephaloid**, a disease of children resembling hydrocephalus, following premature weaning. **D., Idiopathic**, one that exists by itself without any connection with another disorder, one of

which the cause is unknown. **D., Infectious**, one arising from the invasion, growth, and multiplication in the body of specific, pathogenic microorganisms which produce a chemie poison that induces its characteristic effects. **D., Intercurrent**, a disease occurring during the progress of another of which it is independent. **D., Internal**, one affecting the internal organs. **D., Jumping**, a form of choromania. See *Jumpers*. **D., Lardaceous**, amyloid degeneration. **D., Local**, one confined to some particular region of the body or to one tissue or organ. **D., Malignant Mold-fungus**, an affection of the skin and mucosa, especially of the mouth, lips, and nose, described by de Hahn as due to a mold-fungus. **D., Mucous** (Starr), a form of chronic gastrointestinal catarrh in children. It consists of a mucous flux, from the whole internal surface of the alimentary canal, which interferes mechanically with the digestion and absorption of food, and so impedes nutrition as to suggest the presence of tubercles. It usually arises between the fourth and the twelfth year, frequently as a sequel of pertussis. **D., Mucous** (Whitehead), **D., Mucous** (of the Colon). See *Colitis*, *Mucous*. **D., Organic**, one due to structural changes. **D., Pandemic**, a disease epidemic over a wide area. **D., Parasitic**, one due to an animal or vegetable parasite. **D., Parenchymatous**, that affecting the parenchyma of an organ. **D., Pearl**, bovine tuberculosis. **D.s, Protozoal**, pathologic conditions due to the invasion of the body by protozoa. **D., Protozoic** (of Posadas, Werneck, etc.). See *Dermatitis*, *Blastomycetic*. **D., Pulp**, tuberculous arthritis. **D., Rag-sorter's**. See *Ragpicker's Disease*. **D., Septic**, one arising from the development of pyogenic or putrefactive organisms within the body. **D., Septinous**, a form of septic disease in which there is absorption of the toxic substance through an abrasion of the mucosa of the alimentary canal. **D., Seven Days'**, trismus. **D., Specific**, one caused by the introduction of a specific virus or poison within the body; also used as a synonym of syphilis. **D., Structural**, one involving a change of structure in the part first affected. **D., Summer**, cholera infantum. **D., Supra-renal-capsule**, Addison's disease. **D., Tea-taster's**, a disorder characterized by extreme anæsthesia, rapid heart action, fibrillary muscular twitching, and paresthesia due to excessive use of tea. **D., Tsetse-fly**, an African disease of horses, cattle, and other stock due to the *Trypanosoma brucei*, which is transmitted by the tsetse-fly, *Glossina morsitans*. **D., Venereal**, one due to sexual intercourse. **D., Zymotic**, a disease arising from the introduction and multiplication of some living germ within the body.

Disengagement (dis-en-gaj'-ment) [Fr., *des-engager*, to disengage]. Emergence from a confined state; especially the escape of the head of the fetus from the vaginal canal.

Disgorgement (dis-gorj'-ment) [OF., *desgorger*, to vomit]. 1. Ejection by vomiting. 2. The subsidence of an engorgement.

Disgregation (dis-greg-a'-shun) [*disgregare*, to separate]. Dispersion; separation, as of molecules or cells.

Disinfectant (dis-in-jek'-tant) [*dis*, negative; *inficere*, to corrupt]. An agent that destroys the germs of disease, fermentation, and putrefaction.

Disinfectin (dis-in-jek'-sin). A brown liquid obtained from treating 5 parts of the residue of naphtha-distillation with 1 part of concentrated sulfuric acid and the resulting product with 5 parts of 10% soda solution. Diluted it is used as a disinfectant.

Disinfection (dis-in-jek'-shun) (see *Disinfectant*). The destroying of disease-germs, especially by means of chemie substances.

Disintegrate (dis-in-te-grät) [*dis*, integer, the whole]. To break up or decompose.

Disintoxication (dis-in-tox-ik-a'-shun). See *Detoxification*.

Disk. See *Disc*.

Dislocation (dis-lo-ka'-shun) [*dis*, *locare*, to place]. The displacement of one or more bones of a joint or of any organ from its natural position. See *Callaway's*, *Dugas'*, *Hamilton's Tests*. **D., Complete**, one in which the joint-surfaces are entirely separated. **D., Compound**, one in which the joint communicates with the external air through a wound. **D., Consecutive**, one in which the displaced bone is not in the same position as when originally displaced. **D., Divergent**, separate dislocation of the ulna and radius. **D., Double**, displacement at the same time of corresponding bones on both sides of the body. **D., Habitual**, one that recurs repeatedly from a relaxed condition of the ligaments or from incomplete repair of the articular capsule. **D., Monteggia's**, the dislocation of the hip-joint in which the head of the femur is near the anterior-superior spine of the ilium, the limb being rotated outward. **D., Nélaton's**, upward dislocation of the ankle, the astragalus being wedged in between the tibia and fibula. **D., Old**, one in which inflammatory changes have occurred. **D., Partial**, **D., Incomplete**, one in which the articulating surfaces remain in partial contact. Syn., *Subluxation*. **D., Pathologic**, one the result of disease in the joint or of paralysis of the controlling muscles. **D., Primitive**, one in which the bones remain as originally displaced. **D., Recent**, one in which no inflammatory changes have ensued. **D., Relapsing**. See *D., Habitual*. **D., Simple**, one in which there is no communication with the air through a wound. **D., Smith's** (of the foot), dislocation upward and backward of all the metatarsal bones, together with the internal cuneiform. **D., Subclavicular**, one of the head of the humerus beneath the pectoralis major below the

- clavicle. **D., Subglenoid**, one of the humerus directly below the glenoid fossa. **D., Subpubic**, dislocation of the hip joint below the pubes. **D., Subspinous**, one in which the head of the humerus is held in the infraspinous fossa. **D., Thyroid**, displacement of the head of the femur into the thyroid foramen. **D., Traumatic**, that due to injury.
- Disodic** (*di-sô-dîk* or *dis-ôd'îk*) [*di* two; *sodium*] 1. Containing two atoms of sodium in the molecule. 2. [*dis*, twice; *ôdôg*, a way.] Furnished with or relating to two openings.
- Disoma, Disomus** (*di-sô-mah, -mus*) [*di-*; *zoma*, body, pl. *disomata, disomi*]. A monster having two trunks.
- Dispar** (*dis'par*) [*L.*]. Unequal.
- Disparate** (*dis'par-î*) [*dispar*]. Not alike; unequal or unpaired. **D. Points**, nonidentical points of the two retinas. Diplopia is produced when the images of a single object fall upon such points.
- Dispareunia** (*dis-par-oo'-na-ah*). See *Dyspareunia*.
- Disparity** (*dis-par'-it-e*) [*dispar*]. Difference, inequality. **D., Crossed**, a condition of binocular relief whereby in superimposed similar figures having their points of sharpest vision coinciding, a certain other point in the left field appears to be to the right, and the same point in the right field to the left, of the point of sharpest vision. **D., Uncrossed**, a similar condition of binocular relief, but in which a point in the left is seen to the left of a similar point in the right field.
- Dispensary** (*dis-pens'-or-e*) [*dispensare*, to distribute]. A charitable institution where medical treatment is given to the poor.
- Dispensatory** (*dis-pens'-ator-e*) [*dispensatorium*, an apothecary's diary]. A treatise on materia medica and the composition, effects, and preparation of medicines.
- Dispermia** (*dis-perm'-i-ah*). See *Piperazin*.
- Dispermy** (*dis-perm'-e*) [*dis-*; *sempa*, a seed]. The entrance of two spermatozoa into the ovum.
- Dispersion** (*dis-per'-shun*) [*dispersus*, scattered]. The act of scattering. In physics, the separation of a ray of light into its component parts by reflection or refraction; also, any scattering of light, as that which has passed through ground glass.
- Dispirem** (*dis-pi'-rem*) [*dis-*; *spira*, a spiral]. The two skins of a dividing nucleus formed from the nuclear loops and in development giving rise to the daughter-nuclei.
- Displacement** (*dis-plas'-ment*) [*Fr., displacer*, to displace]. 1. A putting out of the normal position. 2. Percolation. **D., Backward**, **D., Dorsal** (of the arm), a backward displacement, across the neck or occipital region, of one of the arms of the fetus, causing obstruction to delivery. **D., Fishhook**, a displacement of the stomach in which the pyloric orifice faces directly upward and the duodenum extends upward and to the right, connecting with the pylorus at an angle, which produces a constricting hook.
- Dissect** (*dis-ekt'*) [*dissecare*, to cut up]. To cut tissues apart carefully and slowly, in order to allow study of the relations of a part.
- Dissection** (*dis-ekt'-shun*). The cutting apart of the tissues of the body for purposes of study.
- D.-wound**, a septic wound acquired during dissection.
- Disseminated** (*dis-em'-in-ated*) [*disseminare*, to scatter seed]. Scattered, spread over a large area. **D. Sclerosis**, a disease of the central nervous system in which the areas of sclerosis are irregularly scattered throughout the cord and brain. Syn., *Multiple or Injunctive sclerosis*.
- Dissimulation** (*dis-im-il-â'-shun*). See *Katibolism*.
- Dissociation** (*dis-ô-se-â'-shun*) [*dis-*; *associare*, to associate]. Separation, especially the separation of a complex compound into simpler molecules by the action of heat. **D.-symptom**, anesthesia to pain and to heat and cold, with preservation of tactile sensibility and of the muscular sense; it is observed in syringomyelia.
- Dissolution** (*dis-ô-lu'-shun*) [*dissolvere*, to set free]. 1. The separation of a body or compound into its parts. 2. Death, decomposition.
- Dissonance** (*dis-ô-nans*) [*dissonare*, to disagree in sound]. The combination of such tones as are so different from each other as to produce discord.
- Distal** (*dis'-tal*) [*distare*, to be at a distance]. Extremity, at the greatest distance from a central point; peripheral.
- Distichiasis** (*dis-tîk'-i-as-is*) [*dis-*; *stichos*, a row]. The condition in which there is a double row of eyelashes, the inner rubbing against the globe. See also *Entropion* and *Trichiasis*.
- Distillate** (*dis-tîl-ât*). The product obtained by distillation.
- Distillation** (*dis-tîl-ât'-shun*) [*distillare*, to drop little by little]. The process of vaporizing and collecting the vapor by condensation. It is used mainly in purifying liquids by separating them from nonvolatile substances. **D., Destructive**, the decomposition of a substance in a closed vessel in such a manner as to obtain liquid products. **D., Dry**, distillation of solids without the addition of liquids conducted within a closed vessel in order to hinder combustion. **D., Fractional**, a method of separating substances from each other by distilling the mixture containing them at a gradually increased temperature, the different substances being vaporized and collected in the order of their volatility.
- Distoma, Distomum** (*dis-tô-mah, -mum*) [*dis-*; *stôma*, a mouth]. A genus of trematode worms which have an oral as well as a ventral sucker. **D. hematobium**, a species which, becoming lodged in the portal vessels and the veins of the mesentery and of the urinary tract, causes a disease characterized by hematuria.

turia, anemia, and diarrhea. It is endemic in parts of the tropics. *D. ringeri*, a variety infesting the lungs of man in China and Japan and causing periodic hemoptysis.

Distomatosis (*di-sto-mat-o'-sis*). See *Distomia*.

Distomia (*di-sto'-me-ah*) [see *Distoma*]. Congenital duplication of the mouth.

Distomiasis (*dis-to-mi'-as-is*) [*distoma*]. The presence in the body of distoma.

Distraction (*dis-trak'-shun*) [*distrahere*, to draw apart]. A method of treating certain joint diseases and bone-fractures by extension and counterextension.

Distribution (*dis-tri-bu'-shun*) [*distribuere*, to distribute]. The branching of a nerve or artery, and the arrangement of its branches within those parts that it supplies.

Disulfate (*di-sul'fat*) [*di-*; *sulfur*]. A sulfate containing one atom of hydrogen that can be replaced by a base.

Disulfid (*di-sul'fid*). A compound of an element or radicle with two atoms of sulfur.

Disolution (*dis-so-lu'-shun*) [*dis-*; *volvere*, to roll down]. Degeneracy; devolution; extreme katabolism.

Dita-bark (*di'-tah-bark*) [L.]. The bark of *Alstonia scholaris*, native to the Philippine Islands. It is employed as a tonic and antiperiodic in intermittent fever. Dose of the *tincture* 1-2 dr. (4-8 Cc.); of the *fluidextract* 2-5 min. (0.13-0.32 Cc.); of the *powder* 5 gr. (0.32 Gm.).

Ditain (*di'-ah-in*), $C_{10}H_{15}N_3O_4$. An alkaloid from dita-bark, used hypodermatically in tetanus. Dose $\frac{1}{10}$ gr. (0.005 Gm.) once or twice daily or until effectual. Syn., *Fukilamin*.

Dithan (*dith'-an*). See *Trional*.

Dithion (*dith'-e-on*). A mixture of the two sodium dithiosalicylates occurring as a gray powder. It is used as an antiseptic wash (5 to 10 %) and dusting-powder in gonorrhea and in foot-and-mouth disease.

Dithymoldioidid, **Dithymolioidid** (*di-thi-mol-di'-oid-id*, *di-thi-mol-i'-oid-id*). Aristol.

Dittrich's Plugs. Dirty white or yellowish masses, consisting chiefly of fatty detritus, microorganisms, and crystals of margaric; they are found in the sputum of putrid bronchitis and pulmonary gangrene. *D.'s Stenosis*, stenosis of the conus arteriosus. Syn., *Dittrich's wahre Herzstenose*.

Diureid (*di-u'-re-id*). A compound containing two molecules of urea.

Diuresis (*di-u-re'-sis*) [*diu*, through; *αἰρεῖν*, to urinate]. Increase in the secretion of urine.

Diuretic (*di-u-re'-ik*) [*diuresis*]. 1. Increasing the flow of urine. 2. An agent that increases the secretion of urine. *D.s. Alterative*, drugs eliminated by the kidney and used for their local action on the surfaces over which they pass. *D.s. Hydragog*, those that increase the flow of water from the kidneys. *D.s. Refrigerant*, those that render the urine less irritating while not greatly increasing its flow.

Diuretin (*di-u-re'-tin*), $C_7H_5NaN_3O_7 \cdot C_6H_5OH \cdot COONa$. Theobromin sodiosalicylate. It has been found useful as a diuretic in pleuritic effusion and cardiac dropsy. Dose 90 gr. (6 Gm.) daily in four doses.

Diurnule (*di-urn'-ul*) [Fr.]. A form of medicinal tablet or capsule that contains the maximum quantity of a toxic drug that may be administered in 24 hours.

Divergent (*di-ver'-jent*) [*divergere*, to diverge]. Moving in different directions from a common point. *D. Strabismus*. See *Strabismus*, *Divergent*.

Divers' Paralysis. See *Caisson-disease*.

Diverticular (*di-ver-tik'-u-lar*) [*diverticulum*]. Relating to or arising from a diverticulum.

Diverticulitis (*di-ver-tik'-u-l'i-tis*). Inflammation of a diverticulum of the urethra.

Diverticulum (*di-ver-tik'-u-lum*) [*divertere*, to turn]. A small pouch or sac springing from a main structure. *D., False*, a saciform dilation due to disease or injury. *D., Heister's*, the sinus of the jugular vein. *D., Meckel's*, a congenital diverticulum of the ileum, the remains of the omphalomesenteric duct. *D., Pertik's*, a diverticulum of the nasopharyngeal space which may occur close to Rosenmueller's fossa and show itself as an enlargement of the latter. *D., Pulsion*, *D., Traction*, a false diverticulum produced by traction on the outside of a hollow organ. *D., Vater's*. See *Ampulla of Vater*.

Divi-divi (*div'-e-div'-e*) [S.A.]. The seed-pods of *Casalpinia carthagenia*, a tree of South America.

Divulsion (*di-vul'-shun*) [*divulsio*, a tearing apart]. A tearing asunder.

Divulsor (*di-vul'-sor*) [L.]. An instrument for dilating a part.

Dobell's Solution, *D.'s Spray*. A solution of borax, sodium bicarbonate, and phenol in glycerol and water; it is used as a spray for nasal and throat troubles.

Dobie's Globule. A small, round body rendered visible in the center of the transparent disc of a muscular fibril by staining. *D.'s Layer*, *D.'s Line*. See *Membrane*, *Krause's*.

Dochmiasis (*dok-mi'-as-is*) [*Dochmius*]. The diseased condition caused by the presence in the body of parasites belonging to the genus *Dochmius*. See *Uncinariasis*. Cf. *Ankylostomiasis*.

Dochmius (*dok'-me-us*) [*δόχμος*, crumpled]. A genus of threadworms of the family *Strongylidae*. *D. duodenalis*. See *Ankylostoma*.

Docimasia (*dos-im-a'-se-ah*) [*δοκιμασῆναι*, to examine]. Examination; testing or assaying.

Docimasiology (*dos-im-a-se-ol'-o-je*) [*docimasia*; *λόγος*, science]. The art or science of investigation, embracing medicine, surgery, chemistry, etc.

Docimaster (*dos-im-as'-ter*). An examiner or tester.

Dodecadactylon (*do-dek-a-dak'-til-on*) [*δώδεκα*, twelve; *δάκτυλος*, finger]. The duodenum.

Doegling Oil (*do'-eg-ling*). The oil of the doegling, or bottle-nosed whale.

Dog's-bane. See *Aconitum*.

Dogwood (*dog'-wud*). See *Cornus*.

Dolicho- (*dol'-ik-o-*). A prefix meaning long.

Dolichocephalic, Dolichocephalous (*dol'-ik-o-sef'-ul'-ik, -sef'-ul'-us*) [*dolicho-*; *κεφαλή*, head]. Long headed; having a relatively long anteroposterior cephalic diameter.

Dolichocephalus (*dol'-ik-o-sef'-ul'-us*) [see *Dolichocephalic*]. A skull having a relatively long anteroposterior diameter, a skull-formation resulting from the too rapid ossification of the longitudinal suture. The varieties are *leptencephalus*, *sphenocephalus*, and *clinoccephalus*. **D. simplex**, that occurring through synostosis of the sagittal suture.

Dolichocnemid, Dolichoknemid (*dol'-ik-o-ne'-mik*) [*dolicho-*; *κνήμη*, a leg]. Having the lower leg of almost the same length as that of the thigh.

Dolichoderus (*dol'-ik-od'-er-us*) [*dolicho-*; *δέρη*, the neck]. Having the neck long.

Dolichokerkic (*dol'-ik-o-kerk'-ik*) [*dolicho-*; *κερκή*, a shuttle]. Having the angle which is formed by the crest of the scapula with its spinal border over 85 degrees.

Dolichos. Same as *Mucuna*.

Dolomol (*dol'-o-mol*). Stearate of calcium and magnesium; it is used as a base for dusting-powders, etc.

Dolor (*do'-lor*) [*dolere*, to feel pain]. Bodily or mental pain or suffering.

Dolorosus (*do'-lor-o'-sus*) [L.]. Full of pain.

Donda Ndugu [African]. Brother ulcer; a disease common on the east coast of Africa, due to some organism that infests stagnant water. It affects especially the leg, which becomes inflamed and swollen and sloughs below the healthy tissue.

Donders' Glaucoma. Simple atrophic glaucoma. **D.'s Law**, the rotation of the eyeball about the line of sight is involuntary, and when the eyes are fixed on a distant object, the amount of rotation is determined solely by the angular distance of that object from the horizon and from the median plane. **D.'s Rings**, rainbow-colored rings seen in cases of glaucoma and by normal and cataractous eyes when the pupil is dilated. They are attributed to the diffraction of light by the cortex of the crystalline lens. **D.'s Schema**, an arrangement of the dead thorax with manometers to gauge the pressure.

Donné's Corpuscles. 1. The colostrum corpuscles. 2. See *Bizzozzeri's Blood platelets*.

D.'s Test for Pus, into the mass to be tested stir a small piece of caustic potash. The mass will be converted into a tough, shiny material if pus is present.

Donovan's Solution. See *Arsenic Iodid, Solution of Mercuric and of*.

Dormiol (*dor'-me-ol*). The commercial name for amylene chloral, recommended as a sedative. Dose: 4 to 5 gr. or 5 to 30 Cam.

Dormitio (*dor'-me'-she-o*) [L.]. 1. Sleep. 2. A

sedative said to consist of dilute alcohol, oil of anise, extract of lettuce, and sugar.

Dorsad (*dor'-sad*) [*dorsum*, ad, toward]. Toward the dorsal aspect.

Dorsal (*dor'-sal*) [*dorsum*]. Pertaining to the back or to the posterior part of an organ.

D. Artery. See under *Artery*. **D. Decubitus**, recumbency in the supine position. **D. Reflex.** See under *Reflex*.

Dorsalis pedis (*dor'-sa'-lis pe'-dis*) See under *Artery*.

Dorsi- (*dor'-si-*). The same as *Dorso-*.

Dorsicolumn (*dor'-se-kol'-um*) [*dorsi-*, column, a column]. The dorsal column of the spinal cord.

Dorsicommissura (*dor'-se-kom-is-a'-sh'*) [*dorsi-*, commissure]. Wilder's name for the gray commissure of the spinal cord.

Dorsiduction (*dor'-se-duk'-shun*) [*dorsi-*, *ducere*, to lead]. The act of moving toward the back.

Dorsiflexion (*dor'-se-flek'-shun*) [*dorsi-*, *flexere*, to bend]. A flexion, as of toes, toward the back.

Dorsispinal (*dor'-se-spi'-nal*) [*dorsi-*, *spina*, spine]. Relating to the back and the spinal column.

Dorsiventral (*dor'-se-ven'-tr'al*) See *Dorso-abdominal*.

Dorso- (*dor'-so-*) [*dorsum*]. A prefix used to signify pertaining to the back.

Dorsoabdominal (*dor'-so-ab-dom'-en'al*) [*dor-so-*, *abdomen*]. Relating to both the dorsal and the abdominal region, extending from the back to the abdomen. Syn. *Dorsoventral*.

Dorsoacromial (*dor'-so-ak-ro'-me-al*). Relating to the back and the acromion.

Dorsoanterior (*dor'-so-an-te'-er-ee-*). Applied to a fetus having its back toward the ventral aspect of the mother.

Dorsocervical (*dor'-so-se'-vik-al*). Relating to the back and the neck.

Dorsocostal (*dor'-so-kos'-tal*) Relating to the back and the ribs.

Dorsointerosseal, Dorsointerosseous (*dor'-so-in-ter-os'-e-al, -us*). Located between the metacarpal or metatarsal bones and on the back of the hand or foot.

Dorsointestinal (*dor'-so-in-ter'-en-al*) Situated upon the dorsal aspect of the intestine.

Dorsolateral (*dor'-so-lat'-er-al*). Relating to the back and the sides.

Dorsomedian (*dor'-so-me'-de-an*). Situated in or relating to the middle region of the back.

Dorsonasal (*dor'-so-na'-sal*). Relating to the back of the nose.

Dorsoposterior (*dor'-so-pos-te'-er-ee-*). Applied to the position of a fetus having its back toward the dorsal aspect of the mother.

Dorsoradial (*dor'-so-ra'-de-al*). Relating to or situated upon the dorsal aspect and radial border of the hand, finger, or arm.

Dorsoulnar (*dor'-so-ul'-nar*). Relating to or situated upon the dorsal aspect and ulnar border of the arm, hand, or finger.

Dorsum (*dor'-sum*) [L.]. 1. The back. 2. Any part corresponding to the back, as the *dorsum* of the foot, hand, tongue, penis, etc.

Dosage (*dōs'-aj*) [*dose*]. The determination of the proper amount of a medicine or other agent for a given case or condition. **D., Electric**, the regulation of the strength of an electric current for therapeutic purposes.

Dose (*dōs*) [*dōz*, a portion given]. The measured portion of medicine to be taken at one time. **D., Divided**, a relatively small quantity of a drug taken at short intervals. **D., Lethal**, a dose sufficient to kill. **D., Maximum**, the largest dose consistent with safety. **D., Minimum**, the smallest quantity of a medicine that will produce physiologic effects.

Dosimetric (*dō-sim'-et'-rik*) [see *Dosimetry*]. Relating to or characterized by dosimetry.

Dosimetry (*dō-sim'-et'-re*) [*dose*; *μέτρον*, a measure]. The accurate and systematic measurement of a dose.

Dossil (*dōs'-il*) [ME., *dosil*, a spigot]. A cylindric pledget of lint for cleansing wounds.

Dothienenteritis, Dothinenteritis (*dōth-ē-en-ter-i'-tis, dōth-in-en-ter-i'-tis*) [*δοθίς*, a boil; *ἔντερον*, bowel, *ἔτις*, inflammation]. Enteric or typhoid fever; inflammation of Peyer's patches.

Douche (*dōosh*) [Fr.]. 1. A stream of water directed against a part, or one used to flush a cavity of the body. 2. An apparatus for directing a jet of water or other substance against a part. **D., Air-**, a current of air directed against some organ for therapeutic purposes. **D., Alternating**, a hot and cold current applied in succession. **D., Capillary**. See *Aquapuncture*. **D., Charcot**, a cold daily spinal douche. **D., Galvanic**, a precision douche by means of which the faradic or galvanic current can be communicated to the douching current; especially effective in gastralgias and enteralgias. **D., Hot-air**, the use of a blast of heated air as a method of treatment, especially in gouty rheumatism and neuralgic conditions. **D., Mobile**, one applied successively to different regions of the body. **D., Precision**, one by which fluid of any desired temperature can be applied under any desired pressure. **D., Rain-**, a shower-bath. **D., Scotch, D., Scottish**, one of alternating temperature. **D., Sheet-**, one in which a sheet of water is directed through a slit. **D., Transitional**. See *D., Alternating*, and *D., Scotch*.

Douglas' Crescentic Fold. The lower border of the posterior sheath of the rectus abdominis. **D.'s Culdesac, D.'s Pouch**. See *Culdesac, Douglas'*. **D.'s Ligaments**, the rectouterine folds of the peritoneum. **D.'s Line**. See *Line, Semicircular, Douglas'*. **D.'s Semilunar Fold**, a thin curved margin that forms the lower part of the posterior wall of the sheath of the abdominal rectus muscle. **D.'s Septum**, in the fetus the septum formed by the union of Rathke's folds and transforming the rectum into a complete canal.

Doundaké (*doon-dak'-a*) [Fr.]. The Guinea peach, *Sarcocaulis esculentus*, yielding a tonic, febrifuge, and astringent bark. Dose

of the wine (3%) 1-2 oz. (30-60 Cc.); of the extract 2½-3 gr. (0.16-0.2 Gm.); of the bark 50-60 gr. (3.2-3.8 Gm.); of the aqueous extract 3-4 min. (0.2-0.25 Cc.).

Doundakin (*doon-dak-in*). An alkaloid from doundaké; a substitute for quinin. Dose 3-4 gr. (0.2-0.25 Gm.).

Dover's Powder. A powder containing 10% each of opium and ipecac.

Dowieism (*dōw'-ē-izm*). A form of faith-cure propagated in America by a charlatan named Dowie (1899).

Doyère's Eminence, D.'s Hillock, D.'s Papilla, D.'s Tuft (*doy-yôr'*). The slight elevation in a muscular fiber corresponding to the entrance of a nerve-fiber.

Dracæna (*dra-se'-nah*). A genus of liliaceous trees. *D. cinnabari* and *D. schizantha* of eastern Africa, and *D. draco* of western Africa, afford part of the dragon's-blood of commerce.

Drachm (*drām*). See *Dram*.

Dracontiasis (*dra-kon-ti'-as-is*) [*Dracunculus*]. The skin disease caused by *Dracunculus medinensis*.

Dracontium (*dra-kon'-she-um*) [*δράκων*, a dragon]. Skunk-cabbage.

Dracunculus (*dra-kun'-ku-lus*) [dim. of *δράκων*, a dragon; a serpent]. A genus of threadworms belonging to the family *Filariidae*. **D. medinensis**. See *Filaria medinensis*.

Draft (*drafft*). See *Draught*.

Dragendorff's Test for Bile-pigments. Spread a few drops of the urine on an unglazed porcelain surface, and after absorption has taken place add a drop or two of nitric acid. If bile is present, several rings of color will be produced, the green ring, which is characteristic of bile-pigments, being chief among them.

Dragon's-blood (*drag'-onz-blud*). 1. The astringent resin of *Calamus ratang* and *C. draco*, East Indian ratan-palms. 2. The resin of various species of *Dracæna*. 3. The resin of *Pterocarpus draco*, a West Indian tree. The various kinds of dragon's-blood are astringent, but are no longer used internally.

Drain (*drän*) [ME., *drainen*, to drain]. A material that affords a channel of exit for the discharge from a wound or cavity.

Drainage (*drän'-äj*) [*drain*]. The method of effecting the exit of the discharges from a wound or cavities by means of tubes or strands of fibers or by a free incision. **D., Capillary**, that by means of capillary attraction, using loosely woven cloth, thread wisps of hair, etc. **D., Through-**, drainage accomplished by means of counteropenings and the passage of a tube completely through the part to be drained, so that a cleansing fluid may be injected through one opening and allowed to escape by the counteropening. **D.-tube**, a rubber or glass tube with perforations for draining wounds or cavities.

Dram, Drachm (dram) [*drapm*, a Greek weight]. The eighth part of the apothecaries' ounce, equal to 60 grains or 3.9 grams. Also the sixteenth part of the avoirdupois ounce, equal to 27.34 grains. **D., Fluid-**. See *Fluidram*.

Drapetomania (*drap-et-o-ma'-ne-ah*) [*drapetom*, a runaway, *mania*, madness]. A morbid desire to wander from home.

Drastic (*dras'-tik*) [*drā*, to act]. 1. Severe; harsh, powerful. 2. A powerful and irritating purgative.

Draught (draft) [*AS.*, *dragan*, to draw]. A quantity of liquid drunk at one gulp. **D., Black**, compound infusion of senna. **D., Effervescing**, one containing sodium or potassium bicarbonate and a vegetable acid.

Drechsel's Test for Bile Acids. A beautiful red color is produced if bile acids are present in a substance treated with a little cane-sugar and a few drops of a mixture composed of 5 parts of syrupy phosphoric acid and 1 part water, and warmed on a water-bath.

Drepanidium (*deep-an-id'-e-um*) [*drepnion*, a sickle]. The sickle-shaped young of certain protozoans. **D. ranarum**, a (probably) parasitic cystozoan of frogs' blood.

Dressing (*dress'-ing*) [*ME.*, *deessen*, to make straight]. 1. The application of various materials for protecting a wound and favoring its healing. 2. The material so applied.

Dressler's Disease. Paroxysmal hemoglobinuria.

Dromomania (*dro-mo-ma'-ne-ah*) [*dromos*, a course, *mania*, madness]. An insane desire to wander, vagabondage.

Dromotropic (*dro-mo-tro'-pik*) [*dromos*, a course, *tropein*, to turn]. Applied by T. W. Engelmann to a supposed set of fibers in the cardiac nerves which he holds influences the power of conducting the contraction. Cf. *Bathmotropic*; *Inotropic*.

Drop [*AS.*, *drup*]. 1. A minute mass of liquid which in falling or in hanging from a surface assumes the spheric form. 2. The falling of a part, as from paralysis. **D., Black**, acetum opii. See *Opium*, *Vinegar of*. **D.-culture**, in bacteriology, a culture prepared by placing a little of the infected material in a drop of the culture-medium. **D., Wrist-**. See under *Wrist*.

Dropped (dropt'). In a condition of ptosis. **D. Foot**, extreme extension of the foot, especially observed in alcohol, neuritis, and dependent upon weakness of the flexors of the foot. **D. Hand**, a form of paralysis from lead-poisoning, consisting in the inability to contract the extensors of the wrist. **D. Lid**, ptosis of the upper lid.

Dropsical (*drop'-shul*) [*dropsy*]. Affected with or pertaining to dropsy.

Dropsy (*drop'-se*) [*dropsis*, drops]. An infiltration of the tissues with diluted lymph, or the collection of such lymph in the body-cavities. **D., Abdominal**, **D. of Belly**, *ascites*. **D., Acute**, dropsy due to conges-

tion of the kidneys from sudden exposure to cold. Syn., *Active dropsy*, *Febrile dropsy*, *Plethoric dropsy*. **D., Cachectic**, that occurring in cachexia, it is due to decrease of the albuminous constituents of the blood and an increase of the watery constituents. **D., Cardiac**, that due to failure of compensation in cardiac disease. **D. of Chest**, *hydrothorax*. **D., Encysted**. See *Ascites sacculata*. **D. of the Gall-bladder**, dilation of the gall-bladder with the secretion of the mucous glands and with epithelium; a very unusual condition due to obliteration of the cystic duct. **D., General**. 1. Dropsy of one or more of the large serous sacs of the body combined with anasarca. 2. Superficial dropsy when it affects the trunk and arms as well as the legs. **D., Glandular**, that due to disease of the lymphatics. **D., Lymphatic**, infiltration of the tissues with lymph caused by obstruction of the lymphatics. **D., Mechanic**, that due to mechanical obstruction of the veins or lymphatics. **D., Passive**. 1. That due to obstruction of the veins or lymphatics or to defective absorption. 2. See *D., Cachectic*. **D. of Pericardium**, *hydropericardium*. **D. of Peritoneum**, *ascites*. **D., Renal**. 1. Anasarca due to disease of the kidneys. 2. *Hydronephrosis*. **D., Symptomatic**, that said to be produced when there is 6" of albumin in the blood with a simultaneous increase of arterial pressure.

Drosera (*drost'-er-ah*) [*drosopis*, covered with dew]. Sundew. *D. rotundifolia* and *D. longifolia* have been used in pulmonary tuberculosis. It is an antispasmodic, and is used in whooping-cough and other spasmodic coughs.

Drug [*Fr.*, *drogue*]. A substance used as a medicine. **D., Antagonistic**, one that neutralizes the action of another.

Drum [*ME.*, *drumme*] The tympanum. See under *Ear*.

Drumhead (*drum'-hed*). The tympanic membrane.

Drummond's Sign. The "otal whiff" heard when the mouth is closed; it disappears on compression of the nostrils; it is observed in cases of aneurysm of the thoracic aorta.

Drumstick (*drum'-stik*). A stick terminating in a knob. The word is used to describe certain microbes, clubbed organs, etc. **D. Bacillus**, *Bacillus putreficiens coli*. See under *Bacterin*.

Druse (*drūn*) [*Gec.*]. A rupture of tissues with no surface-lesion.

Dry (*dei*) [*AS.*, *dryge*]. Free from moisture. **D.-cupping**, cupping without anointing the skin. **D. Gangrene**. See *Gangrene*, *Dry*. **D. Labor**, one in which there is but a slight discharge of liquor amnii. **D. Pleurisy**, pleurisy without effusion. **D. Wine**, a wine containing little or no sugar.

Drysdale's Ovarian Corpuscles. See *Corpuscles*, *Drysdale's Ovarian*.

Duane's Test. A candle having been placed in front of the person to be examined, a

screen is held before one eye for a time and then suddenly transferred to the other side. The existence of deviation in the first eye is recognized by a sudden apparent displacement of the candle-flame in the direction opposite to that in which the eye has deviated.

Dubini's Disease. Rapid rhythmic contractions of one or more groups of muscles, beginning in a finger, an extremity, or a half of the face, and extending over the greater part or the whole of the body. They are generally followed by palsies and often by coma and death. The affection has been observed thus far only in Italy. Syn., *Electric chorea*; *Spasmus dubini*.

Dubois' Abscess, D.'s Disease. The presence of multiple necrotic foci in the thymus glands of infants affected with hereditary syphilis.

Duboisin (*du-bois'-in*), $C_{17}H_{19}NO_4$. An alkaloid from *Duboisia myoparioides*, a tall shrub of Australia identical with hyoscyamin. It is used as a mydriatic; also as a hypnotic and sedative in epilepsy. Dose $\frac{1}{10}$ – $\frac{1}{5}$ gr. (0.008–0.002 Gm.). Antidotes: emetics, pilocarpin, muscarin. **D. Hydrobromate**, dose and uses the same as duboisin. **D. Hydrochlorate**, usage and dose as duboisin. **D. Salicylate**, used as a mydriatic in 0.2 to 0.8% solution. **D. Sulfate**, used as a mydriatic in aqueous solution— $\frac{1}{5}$ gr. to 1 oz. of water (0.005 Gm. to 30 Cc.).

DuBois-Reymond's Inductorium. See *Inductorium*, *DuBois-Reymond's*. **D.-R.'s Key.** See *Key*, *DuBois-Reymond's*. **D.-R.'s Law**, it is not the absolute value of current density at a given moment that acts as a stimulus to a muscle or motor nerve, but the variation of density.

Duchenne's Attitude. In paralysis of the trapezius the shoulder droops, the shoulder-blade seesaws so that its internal edge, instead of being parallel to the vertebral column, becomes oblique from top to bottom and from without in. **D.'s Disease**, tabes dorsalis. **D.'s Paralysis**, progressive muscular dystrophy with pseudohypertrophy. **D.'s Sign**, sinking in of the epigastrium during inspiration in cases of marked hydropericardium or impaired movement of the diaphragm from pressure or paralysis. **D.'s Syndrome**, labio-glossolaryngeal paralysis.

Duchenne-Aran's Disease. See *Aran-Duchenne's Disease*.

Duchenne-Erb's Paralysis. See *Erb's Paralysis*.

Duchenne-Landouzy's Type of Progressive Muscular Atrophy. See *Landouzy-Dejérine's Type of Progressive Muscular Atrophy*.

Duckworth's Syndrome. Complete stoppage of respiration several hours before that of the heart in certain cerebral diseases attended by intracranial pressure.

Duct (*dukt*) [*ducere*, to lead]. A tube or channel, especially one for conveying the secretions of a gland. **D. of Bartholin**, the larger and longer of the sublingual ducts,

opening into the mouth near to, or in common with, Wharton's duct. **D., Blasius'.** See *D. of Stenson*. **D., Common Bile-**, a duct formed by the union of the cystic and hepatic ducts. **D., Cowperian**, the efferent duct of Cowper's gland. **D.s of Cuvier**, two short transverse venous trunks in the fetus, one on either side, opening into the auricle of the heart. Each is formed by the union of a superior vein, the primitive jugular, and an inferior vein. The right one becomes the superior vena cava; the left one disappears. **D., Cystic**, the excretory duct of the gall-bladder. **D., Ejaculatory**, a duct formed by the union of the vas deferens and the duct of the seminal vesicle and carrying the semen into the urethra. **D., Endolymphatic**, a tubular process of the membranous labyrinth of the ear, passing through the aqueduct of the vestibule into the cranial cavity, where it terminates below the dura mater in a blind enlargement, the sacculus endolymphaticus. **D., Galactophorous**, one of the milk-ducts of the mammary gland. **D., Gartner's.** See *Canal*, *Gartner's*. **D., Hepatic**, a duct formed at the margin of the transverse fissure of the liver by the junction of the right and left hepatic ducts. **D., Lacrimal.** See *D., Nasal*. **D., Lactiferous.** See *D., Galactophorous*. **D., Lymphatic, Right**, the vessel that receives the lymph from the lymphatics of the right arm, the right side of the head and neck, the chest, lung, and right side of the heart, and also from the upper surface of the liver. It terminates at the junction of the right subclavian and internal jugular veins. **D.s of Müller**, ducts in the embryo, one on each side, parallel to the wolffian duct and extending from the body-cavity to the cloaca. From them are derived the oviducts, uterus, and vagina. In the male they atrophy. **D., Nasal**, the duct that conveys the tears from the lacrimal sac into the inferior meatus of the nose. **D., Pancreatic**, one that extends from the pancreas to the duodenum at the point where the common bile duct enters the bowel. **D., Pancreatic, Accessory**, the excretory duct of the lesser pancreas, opening into the pancreatic duct or into the duodenum, close to the orifice of the common bile-duct. **D., Prostatic**, any one of the ducts conveying the secretion of the prostate into the urethra. **D., Rathke's**, that portion of Müller's duct which intervenes between the latter and the sinus pocularis; it may persist after birth as a patulous duct. **D., Reichel's Cloacal**, in the embryo, the narrow cleft separating Douglas' septum from the cloaca. **D. of Rivini**, one of the ducts of the sublingual salivary gland. **D., Salivary**, a duct of any salivary gland. See *D. of Wharton*, *D. of Stenson*, and *D., Sublingual*. **D., Salivary, Inferior**, Wharton's duct. **D., Salivary, Superior**, Stenson's duct. **D.s, Schueller's**, the ducts of Skene's glands. **D., Segmental**, a tube, on each side of the

Dynamoscope (*di-nam'-o-skop*) [*dynamo*; *anastix*, to examine]. An apparatus for auscultating the muscles.

Dyne (*din*) [*dinamik*, power]. A measure of force; it is the force that, when applied to a mass of one gram for one second, will give it a velocity of one centimeter a second.

Dys- [*dys-*]. A prefix meaning bad, difficult, painful.

Dysacusma (*dis-ak-out'-mah*) [*dys-*; *akouala*, hearing]. A sensation of pain or discomfort caused by loud or even moderately loud noises.

Dysacusia, Dysacusis (*dis-ak-oo'-ze-ah, -sis*) [see *Dysacusma*]. Difficulty of hearing.

Dysæsthesia (*dis-es-the'-ze-ah*). See *Dysæsthesia*.

Dysalbumose (*dis-al'-bu-môz*). A variety of albumose, insoluble in hot or cold water or hydrochloric acid.

Dysarthria (*dis-ar'-thre-ah*) [*dys-*; *arthron*, articulation]. Impairment of articulation.

Dysarthritus (*dis-ar-thrit'-tis*) [*dys-*; *arthritis*]. Anomalous gout.

Dysarthrosis (*dis-ar-thro'-sis*) [*dys-*; *arthron*, a joint]. A deformed joint.

Dysbasia (*dis-ba'-ze-ah*) [*dys-*; *basia*, a step]. Impairment of the power of walking. **D. intermittens**. See *Claudication*, *Charcot's Intermittent*.

Dysblennia (*dis-blent'-e-ah*) [*dys-*; *blennia*, mucus]. A disordered state or formation of the mucus.

Dyscatabrosis (*dis-kat-ah-brat'-sis*) [*dys-*; *antâ-phaner*, a devouring]. Difficulty in swallowing food, dysphagia.

Dyschezia (*dis-ke'-ze-ah*) [*dys-*; *chêzein*, to go to stool]. Painful or difficult defecation, as in cases of prolapse of the ovary.

Dyscholia (*dis-ko'-le-ah*) [*dys-*; *cholê*, bile]. A disordered or morbid state of the bile.

Dyschondroplasia (*dis-kon-dro-pla'-ze-ah*) [*dys-*; *chondros*, cartilage, *plasia*, molding]. A disease of unknown etiology, attacking the long bones and the metacarpal and phalangeal skeleton of the hand. It is characterized by cartilaginous tissue developing regularly but ossifying very slowly.

Dyschrea, Dyschroia, Dyschroma (*dis-kre'-ah, -kro'-ah, -kro'-mah*). See *Dyschroa* and *Parrachroa*.

Dyschroa, Dyschroa (*dis-kro'-ah, -kre'-ah*) [*dys-*; *chroma*, color]. Discoloration, especially of the skin.

Dyschromasia (*dis-kro-ma'-ze-ah*). 1. See *Dyschroa*. 2. See *Dyschromatopsia*.

Dyschromatopsia (*dis-kro-mat-op'-sia*) [*dys-*; *chroma*, color, *opsis*, vision]. An individual affected with dyschromatopsia.

Dyschromatopsia (*dis-kro-mat-op'-sia*) [see *Dyschromatopsia*]. Partial color-blindness.

Dyscoria (*dis-ko'-re-ah*) [*dys-*; *korê*, pupil]. Abnormality of the form of the pupil.

Dyscrasia (*dis-kri'-ze-ah*) [*dys-*; *krasis*, combination]. A depraved condition of the blood or system due to general disease.

Dysemesia, Dysemesia (*dis-em'-e-ze-ah, -sis*) [*dys-*; *emesis*]. Painful vomiting, retching.

Dysemia (*dis-e'-me-ah*) [*dys-*; *aima*, blood]. A morbid state of the blood.

Dysenteric (*dis-en-ter'-ik*) [*dysenteria*]. Of the nature of or affected with dysentery.

Dysenteriform (*dis-en-ter'-e-form*) [*dysenteria*, *forma*, form]. Resembling dysentery.

Dysentery (*dis-en-ter'-e*) [*dys-*; *enteron*, the bowel]. An inflammation of the large intestine, probably infectious in origin, and characterized by pain, rectal tenesmus, and the frequent passage of small amounts of mucus and blood. Anatomically, three varieties may be distinguished: the catarrhal, the diphtheric, and the gangrenous. The true cause of dysentery is not definitely known, but with many cases *Amoeba coli* is intimately associated, particularly in the dysentery of the tropics (so-called dysentery).

Dyserethisia (*dis-er-eth'-e-ah*) [*dys-*; *erethismos*, to excite]. Diminished sensibility or irritability.

Dysergasia, Dysergasy (*dis-er-ga'-ze-ah, -sis*) [*dys-*; *ergon*, to exert]. Diminished sensibility or irritability.

Dysesthesia (*dis-es-the'-ze-ah*) [*dys-*; *esthesia*, sensation]. 1. Dulness of sensation. 2. Painfulness of any sensation not normally painful.

Dysgenesis (*dis-jen-e'-ze-ah*) [*dys-*; *genesis*, to produce]. Loss or impairment of generative power.

Dysgeusia (*dis-ju'-ze-ah*) [*dys-*; *geusia*, taste]. Morbidity or perversion of the sense of taste.

Dysgraphia (*dis-gra'-fe-ah*) [*dys-*; *graphein*, to write]. Impairment of the power of writing as a result of a brain lesion.

Dyshidria, Dysidria (*dis-hid'-e-ah, -dis-id'-e-ah*) [*dys-*; *hidros*, sweat]. A morbid condition of the function of perspiration.

Dysidrosis (*dis-id-ro'-sis*) [*dys-*; *hidros*, sweat]. A synonym of *Pompholyx*.

Dyskatabrosis (*dis-kat-ah-brat'-sis*). See *Dyscatabrosis*.

Dyskinesia (*dis-kin-e'-ze-ah*) [*dys-*; *kinesis*, movement]. Impairment of the power of voluntary motion.

Dyslalia (*dis-lâ'-le-ah*) [*dys-*; *lalein*, to talk]. Impairment of the power of speaking, due to a defect of the organs of speech.

Dyslexia (*dis-leks'-e-ah*) [*dys-*; *lêxis*, reading]. Impairment of the ability to read.

Dyslogia (*dis-lô'-gi-ah*) [*dys-*; *logos*, speech]. Difficulty in the expression of ideas by speech.

Dyslysin (*dis-lis-in*) [*dys-*; *lysis*, to dissolve]. $C_{12}H_{22}O_{11}$. A product of cholin acid.

Dysmenorrhea (*dis-men-er'-e-ah*) [*dys-*; *menstron*, month, *hein*, to flow]. Difficult or painful menstruation. **D., Congestive**, a form of painful menstruation due to an intense congestion of the pelvic viscera. **D., Inflammatory**, that due to inflammation. **D., Mechanic**. See *D., Obstructive*. **D., Membranous**, a very painful form characterized by the discharge of shreds of the clots. **D., Obstructive**, that due to mechanic obstruction to the free escape of the

menstrual fluid. **D., Ovarian**, that form due to disease of the ovaries. **D., Spasmodic**, that form due to spasmodic uterine contraction. **D., Vascular**, pain, congestive symptoms in the genital apparatus, and tenesmus of the bladder and anus appearing some days prior to menstruation.

Dysmimia (*dis-mim'i-e-ah*) [*dys*; *μυμιαίνω*, to mimic]. Impairment of the power to use signs and gestures.

Dysmorphophobia (*dis-mor'-o-fo'-be-ah*) [*dys*; *μορφή*, form; *φόβος*, fear]. Morbid dread of deformity; it is a rudimentary form of paranoia.

Dysmorphosteopalinklast (*dis-mor'-os-te-o-pal'-in-klast*) An instrument for refracturing a bone which has united with deformity.

Dysmorphosteopalinklasy (*dis-mor'-os-te-o-pal in'-klast-ee*) [*δυσμορφος*, deformed; *δάσσειν*, to break]. The operation of refracturing a bone which has healed with deformity after a fracture.

Dysneuria (*dis-nū'-re-ah*) [*dys*; *νεῦρον*, nerve]. An impairment of nerve-function.

Dysodontiasis (*dis-o-don-ti'-as-is*) [*dys*; *ὀδοντίασις*, dentition]. Difficult dentition.

Dysopia (*dis-o'-pe-ah*) [*dys*; *ὄψις*, eye]. Painful or defective vision.

Dysorexia (*dis-or-ek'si-e-ah*) [*dys*; *ὄρεξις*, appetite]. A deprived or unnatural appetite.

Dysosmia (*dis-ō'-me-ah*) [*dys*; *ὀσμή*, odor]. Impairment of the sense of smell.

Dysostosis (*dis-os-ul'-is*) [*dys*; *ὀστέον*, bone]. Defective formation of bone. **D., Cleidocranial**, a singular congenital malformation compatible with life, intelligence, and purity of the blood, consisting in incomplete ossification of the skull, malformation of the palatine arch, and more or less atrophy of the clavicles.

Dyspareunia (*dis-par-ō'-ne-ah*) [*δυσπαρευνος*, unmated]. Painful or difficult copulation.

D., Climacteric, pain or difficulty in coitus following the menopause; it is regarded as a symptom of kraurosis vulvæ.

Dyspepsia (*dis-pep'-se-ah*) [*dys*; *πέπτεω*, to digest]. Disturbed digestion. **D., Acid**, that attended with hyperacidity of the gastric juice. **D., Alkaline**, that accompanied by lack of the normal acidity of the gastric juice. **D., Atonic**, a form due to insufficient quantity or impaired quality of the gastric juice or to deficient action of the gastric muscles. **D., Biliary**, intestinal dyspepsia due to impaired secretion of bile. **D., Catarrhal**, that caused by gastric catarrh. **D., Chemic**, that due to some change in the constitution of the digestive secretions. **D., Feculent**, that due to excess of starchy food in the diet. **D., Flatulent**, **D., Gaseous**, that marked by almost constant generation of gas within the stomach. **D., Gastric**, that confined to the stomach. **D., Gastrointestinal**, that in which both the stomach and the intestine are concerned. **D., Gastrorrhæal**, that due to gastric catarrh and hypersecretion. **D., Inflammatory**,

that due to some form of gastritis. **D., Intestinal**, that due to imperfect digestive action of the intestinal juices or to lack of tone in the muscular coat of the bowel. **D., Lienteric**, that due to defective nutrition or superalimentation, and indicated by lienteric stools. **D., Motor**. See **D., Atonic**. **D., Muscular**, that due to atony of the muscular coat of the stomach or intestine. **D., Nervosecretory**, neurotic dyspepsia with perverted or excessive gastric secretion. **D., Nervous**, that characterized by gastric pains, coming on often when the stomach is empty and relieved by eating, and by various reflex nervous phenomena, especially by palpitation. **D., Neuralgic**, that marked by intermittent gastrodynia. **D., Pyretic**, Gendrin's name for the forms of inflammatory dyspepsia formerly known as bilious or gastric fever. **D., Salivary**, that due to excess, deficiency, or defective quality of the saliva or to insufficient mastication.

Dyspeptic (*dis-pep'-tik*) [see **Dyspepsia**]. 1. Relating to or affected with dyspepsia. 2. A person suffering from dyspepsia.

Dyspeptone (*dis-pep'-tōn*) [see **Dyspepsia**]. An insoluble and unassimilable peptone.

Dysperistalsis (*dis-per-e-stal'-sis*) [*dys*; *περί*, around; *στάσις*, compression]. Painful or perverted peristalsis.

Dysphagia (*dis-fo'-je-ah*) [*dys*; *φαγεῖν*, to eat]. Difficulty in swallowing, or inability to swallow. **D. amyotactica**, a disturbance of the act of deglutition, not due to organic changes in the pharynx or esophagus nor to spasm or paralysis of the muscles concerned in swallowing; it consists in a disturbance of the rhythm of the function of the higher nerve-centers. **D. callosa**, that resulting from the destruction of the muscular layers of the esophagus and the formation of cicatricial tissue causing constriction. **D. constricta**, that due to stenosis of the pharynx or esophagus. **D. globosa**, globus hystericus. **D. lusoria**, a doubtful form ascribed to compression of the esophagus by the right subclavian artery when by a freak of nature this artery springs from the aorta behind the left subclavian artery and turns to the right either before or behind the esophagus. **D. spastica**, that due to hysteric spasm of the esophagus or pharynx.

Dysphasia (*dis-fo'-ze-ah*) [*dys*; *φάσις*, speech]. Difficulty of speech depending on a central lesion.

Dysphemia (*dis-fo'-me-ah*) [*dys*; *φήμη*, a speech]. Stammering.

Dysphonia (*dis-fo'-ne-ah*) [*dys*; *φωνή*, voice]. An impairment of the voice.

Dysphrasia (*dis-fo'-ze-ah*) [*dys*; *φράσις*, speech]. Imperfect speech due to impairment of mental power.

Dysplasmatic, **Dysplastic** (*dis-plaz-mat'-ik*, *dis-plast'-ik*). See **Camploplastic**.

Dyspnea (*disp-ne'-ah*) [*dys*; *πνέω*, to breathe]. Difficult or labored breathing. **D., Cardiac**, that due to heart disease. **D., Renal**, that

due to renal disease. **D., Traube's.** See *Traube's Dyspnea*.

Dyspneic (dis-p-ne'-ik) [dyspnea]. Affected with or caused by dyspnea.

Dyspermasia, Dyspermatism (dis-sperm-a'-ze-ah, dis-sperm'-at-izm). See *Brudyspermatism*.

Dyspermia (dis-sper'-me-ah) [dys-; *arēpna*, seed]. An abnormal condition of the semen.

Dysstichiasis, Dysstœchiasis, Dyestichiasis (dis-stik'-a-sis, dis-stik'-æ-sis). See *Dystichiasis*.

Dystasia (dis-to'-ze-ah) [dys-; *στάσις*, standing]. Difficulty in standing.

Dystaxia (dis-taks'-e-ah) [dys-; *τάξις*, regulation; order]. Ataxia or partial ataxia. **D. agitans**, tremor due to irritation of the spinal cord. Syn. *Pseudoparalysis agitans*.

Dysthermasia (dis-ther-ma'-ze-ah) [dys-; *θέρμη*, heat]. Insufficient production of body heat.

Dysthyreosis (dis-thi-reo'-sis) [dys-; *thyroid*]. Impaired functional activity of the thyroid gland.

Dysthyroid, Dysthyroidism (dis-thi'-roid, -izm). Incomplete development and function of the thyroid gland.

Dystocia (dis-to'-se-ah) [dys-; *τόκος*, birth]. Difficult labor. **D., Fetal**, difficult labor due to abnormality of position or size and shape of the fetus. **D., Maternal**, the dystocia the cause of which resides in the mother.

Dystrophic (dis-trif'-ik) [see *Dystrophy*]. Pertaining to dystrophy.

Dystrophy (dis'-tro-fe) [dys-; *τροφή*, nourishment]. Faulty nutrition.

Dystrypsia (dis-trif'-se-ah) [dys-; *τρυψία*]. Dyspepsia from lack of trypsin. **D., Intestinal**, a term proposed as a substitute for intestinal dyspepsia, since trypsin is the most important enzyme in intestinal digestion.

Dysuresia, Dysuresis (dis-ure'-se-ah, -sis) [dys-; *ούρση*, micturition]. Any disease of the urinary apparatus.

Dysuria (dis-ur'-e-ah) [dys-; *ούρα*, urine]. Difficult or painful urination.

E

E. A prefix meaning without, from, etc. Abbreviation of eye and of *emmetropia*.

Ear (ē), [ME., *ere*]. The organ of hearing, consisting of the external ear, the middle ear or tympanum, and the internal ear or labyrinth. The *outer ear* is made up of an expanded portion, the *pinna*, and the external auditory canal. The *middle ear* consists of the tympanum, with the ear-ossicles, the eustachian tube, and the mastoid cells. The *tympanum* is lined by mucous membrane, and communicates with the pharynx by means of the *eustachian tube*. It is divided into three parts—the *atrium*, the *attic*, and the *antrum*. Its outer end is closed by the *tympanic membrane*, from which sound is conducted along the *ear-ossicles* (the *malleus*, *incus*, and *stapes*) to the *fenestra ovalis*, which communicates with the vestibule of the internal ear. By means of the *fenestra rotunda*, which is closed by the *cutatympanic membrane*, it communicates with the cochlea of the internal ear. The *mastoid cells*, which are also part of the tympanum, are air spaces in the mastoid process of the temporal bone. The *internal ear* consists of the bony and membranous labyrinths, which are separated from each other by a space containing the *perilymph*. Each labyrinth consists of three parts, the vestibule, the semicircular canals, and the cochlea. The *bony vestibule* communicates with the tympanum by the *fenestra ovalis*, closed by the base of the *stapes*, and also with the other parts of the internal ear.

The *semicircular canals* are three in number, the superior, the posterior, and the anterior. The *cochlea*, so named from its resemblance to a snail-shell, is a cylinder tube that winds around a central axis, the *modiolus*, which transmits the cochlear nerves and blood vessels. The *cochlear canal* is divided by the *basal lamina* into the *scala vestibuli*, communicating with the vestibule, and the *scala tympani*, communicating with the *fenestra rotunda* of the tympanum. The *membranous labyrinth* is made up of parts corresponding to the bony labyrinth. The *vestibule* consists of two oval sacs, the *utricle* and the *sacculus*, which communicate through the *vestibular apparatus*, and are lined by an epithelium, the *macula acustica*, which in places is highly convoluted and receives the terminations of the vestibular nerve. The *membranous cochlea*, or *cochlear duct*, contains the acoustic organ of the cochlea, or *organ of Corti*, which consists of a series of epithelial anhes formed by the interlocking of the ends of the *pilae* or *cells* of *Corti*. Upon the inner rests of *Corti* are the inner acoustic hair-cells, in relation with the outer rests are the outer hair-cells. The organ of *Corti* is covered by the *membrana tectoria*, or *Corti's membrane*. **E., Blainville's.** See *Blainville's Ear*. **E., Murel's.** See *Murel's Ear*. **E. wax.** See *Cerumen*.

Earth (erth) [ME., *erthe*]. A name given to various metallic oxides or hydrates not soluble in water and not affected by great heat. **E. & Alkaline**, the oxides and hydrates of calcium,

THE EAR.—(Holden.)

1. Pinna, or auricle. 2. Concha. 3. External auditory canal. 4. Membrana tympani. 5. Incus. 6. Malleus. 7. Manubrium mallei. 8. Tensor tympani. 9. Tympanic cavity. 10. Eustachian tube. 11. Superior semicircular canal. 12. Posterior semicircular canal. 13. External semicircular canal. 14. Cochlea. 15. Internal auditory canal. 16. Facial nerve. 17. Large petrosal nerve. 18. Vestibular branch of auditory nerve. 19. Cochlear branch.

AUDITORY OSSICLES.

1. Head of malleus. 2. Processus brevis. 3. Processus gracilis. 4. Manubrium. 5. Long process of incus. 6. Articulation between incus and stapes. 7. Stapes.

OSSEOUS LABYRINTH OF THE EAR (LAMINA SPIRALIS OSSEA).

- 1, 2, 3. Semicircular canals. 4. Vestibule. 5. Ampulla. 6. Fovea semicircularis. 7. Fovea hemispherica. 8. Cochlea. 9. Origin of lamina spiralis ossea. 10. Foramen rotundum.

OSSEOUS AND MEMBRANOUS LABYRINTH OF THE EAR.—(Holden.)

1. Vestibular branch of auditory nerve. 2. Branch for sacculus. 3. Branch for utricle. 4. Branch for ampulla of membranous posterior semicircular canal. 5. Branch for ampulla of external canal. 6. Branch for ampulla of superior canal. 7. Cochlear branch of auditory nerve. 8. Cochlea.

COCHLEA (Holden)

1. Scala tympani 2. Scala vestibuli 3. Anterior or triangular canal 4. Posterior or quadrilateral canal 5. 5. Spiral foramen 6. Tectorial spiral sulcus 7. Membrana tectoria or membrane of Corti 8. Membrana basilaris 9. Spiral canal 10. Lamina lamina spiralis 11. Pillars of organ of Corti 12. Branch of cochlear duct 13. Gaps in lamina 14. Branch of cochlear duct between the lamellae of the lamina spiralis ossis 15. One of the orifices in which this branch penetrates the canal of Corti 16. Part of bony cochlea 17. 17. Lining perioticum 18. Membrane of Reissner.

MEMBRANES LABYRINTH OF THE EAR (Holden)

Distribution of the vestibular branch of the auditory nerve in the membranous labyrinth, membranous vestibule and semicircular canals (1 & 2)

1. Vestibular branch 2. Saccular branch 3. Utricular branch 4. Branch to ampulla of external semicircular canal 5. Branch to ampulla of superior membranous semicircular canal

COCHLEA (LAMINA SPIRALIS OSSIS)

1. 1. Surrounding bony structure 2. Semicircular ductiform lamella 3. Its concave surface 4. Common border in which it terminates 5. Anterior extremity of this border 6. Cupula or posterior two-thirds removed 7. Inferior portion of base of semicircular ductiform lamella 8. Lamina spiralis ossis 9. Its orifice 10. F-bone or tympanic portion 11. 11. Scala vestibuli 12. Scala vestibuli 13. Internal auditory canal 14. Fossa at the base of the cochlea

magnesium, strontium, barium, and other metals of the same group. **E.**, Fuller's, a clay used as an absorbent application to irritated surfaces.

Earthy Phosphate. See *Phosphate, Earthy*.

Eastes' Test for Sugar. Place 60 Cc. of filtered urine in a beaker of 100 Cc. capacity, add 1 Gm. of sodium acetate and a little less of phenylhydrazin hydrochlorate; stir with a glass rod, which is to remain in the beaker. Evaporate on a water-bath to 10 or 15 Cc., scraping the sediment from the sides of the beaker, if it collects there; cool, and examine under the microscope. If there is 1 part to 1000 of sugar in the urine, osazone crystals will be found.

Easton's Syrup. A syrup of quinin, iron, and strychnin phosphates.

Eberth's Bacillus. *Bacillus typhi abdominalis*. See under *Bacteria*. **E.'s Lines**, dark broken lines seen to separate the cardiac muscular cells on staining with silver nitrate. Syn., *Lineæ scalariformes*.

Ebner's Germ Reticulum. A fine, nucleated reticulum existing between the inner cells of the seminiferous tubules. **E.'s Glands**, the acinous glands situated in the region of the circumvallate papillae of the tongue.

Ebonation (*e-bo-na'-shun*) [*e*, away from; *bone*]. The removal of splinters of bone after injury.

Ebriecation (*e-bri-e-ka'-shun*) [*ebrietas*, drunkenness]. Mental disorder due to the use of alcoholic stimulants.

Ebstein's Lesion. Hyaline degeneration and insular necrosis of the epithelial cells of the renal tubules in diabetes.

Ebullition (*eb-u-lish'-un*) [*ebullire*, to boil]. Boiling.

Eburnation (*e-bur-na'-shun*) [*ebur*, ivory]. An increase in the density of bone following inflammation.

Ecballium (*ek-bal'-e-um*). See *Elaterium*.

Ecboic (*ek-boi'-ik*) [*ekbōh*, a throwing out]. 1. Producing or accelerating labor. 2. Any agent producing this effect.

Eccentric (*ek-sen'-trik*) [*ek*, out; *κέντρον*, center]. Situated away from the center.

E. Hypertrophy, hypertrophy of a hollow organ, as the heart, with dilation.

Eccentropiesis (*ek-sen-tro-pi-e'-sis*) [*eccentric*; *πνέω*, a pressing]. Pressure from within outward; a method proposed for the treatment of anal fistula.

Echondroma (*ek-on-dro'-mah*) [*ek*, out; *χόνδρος*, cartilage; *ōma*, tumor]. A chondroma.

Echondrosis (*ek-on-dro'-sis*) [*echondroma*; *pl.*, *echondroses*]. A cartilaginous outgrowth.

Echymoma (*ek-e-mo'-mah*) [*ek*, out; *χυμός*, juice; *ōma*, tumor]. A tumor-like swelling composed of extravasated blood.

Echymosis (*ek-e-mo'-sis*) [*ek*, out; *χυμός*, juice]. An extravasation of blood into the subcutaneous tissues. It is marked by a purple discoloration of the skin, the color gradually changing to brown, green, and yellow.

Echymotic (*ek-e-mo'-ik*) [*echymosis*]. Relating to or resembling an echymosis.

Ecclasis (*ek-la'-sis*) [*ἐκκλῆν*, to break in pieces]. A breaking away, as of a small piece of bone from a larger piece.

Ecclisis (*ek-li'-sis*) [*ἐκκλίσσειν*, to turn aside]. 1. Dislocation. 2. The displacement of fractured bones.

Ecclysis (*ek-li'-sis*) [*ἐκκλίσσειν*, to wash out]. A washing out by injections.

Eccepe (*ek'-op-e*) [*ἐκκοπή*, an incision]. Excision of a part, or the vertical division of the cranium by a saw or other means.

Eccorthatic (*ek-or-thu'-tik*) [*ek*, out; *κόπῃς*, a heap]. Producing copious fecal discharge.

Eccrisis (*ek'-ris-is*) [*ἐκκρίσειν*, to expel]. The expulsion of waste or morbid products; excretion.

Eccretic (*ek-ris'-ik*) [*ἐκκρετικός*, secretive]. 1. A medicine promoting excretion. 2. Promoting excretion.

Egonia (*ek'-go-nin*). An alkaloid produced in the decomposition of cocaine by HCl.

Echidnase (*ek-id'-náz*) [*ἔχιδνα*, viper]. A phlogogenic principle found in snake-venom.

Echidnotoxin (*ek-id-no-toks'-in*). A principle of snake-venom having a general action and a powerful effect on the nervous system.

Echinococotomy (*ek-in-a-kok-ot'-o-mé*) [*echinococcus*; *τέμνειν*, to cut]. The Pessadas-Bobrow operation, consisting in the evacuation of echinococcus-cysts and closure of the cavity by suture.

Echinococcus (*ek-in-a-kok'-us*) [*ἔχινος*, a hedgehog; *κόκκος*, a berry]. 1. The scolex or larval stage of the *Tania echinococcus*. 2. Hydatid. **E.-cyst**. See *Cyst, Echinococcus*.

Echinodermatous, Echinodermous (*ek-in-od'-er-mat-us, -mus*). Having a spiny surface.

Echinops (*ek'-in-ops*) [*ἔχινος*, a hedgehog; *ὤψ*, appearance]. A genus of composite plants. *E. sphurocephalus*, a European species, is laxative and diuretic, and contains an alkaloid, *echinopsin*, similar in action to brucin and strychnin.

Echitamin (*ek-it'-am-in*). See *Ditain*.

Echo (*ek'-o*) [*ἠχώ*, a sound]. A reverberated sound. **E., Amphoric**, a vocal resonance in which the transmitted voice sounds as if it were speaking into a narrow-necked bottle.

Echoacousia (*ek-o-ah-koo'-se-ah*) [*echo*; *ἀκουα*, hearing]. The subjective sensation of hearing echoes after sounds heard normally.

Echographia (*ek-a-gra'-fr-ah*) [*echo*; *γράφειν*, to write]. A form of aphasia in which printed or written questions submitted to the patient are copied without ability to comprehend the inquiry; also, in writing, the last word or letter is repeated.

Echolalia (*ek-a-la'-le-ah*) [*echo*; *λαλέω*, babble]. A meaningless repetition, by a person, of words spoken to him by others.

Echolalus (*ek-a-la'-lus*) [see *Echolalia*]. A hypnotized person who repeats words heard without comprehension of their meaning.

Echomatism (*ek-am'-at-izm*) [*echo*; *μαρτυρεῖν*, to strive to do]. The opposite of automatism. The mimicking condition produced

- in hypnotics when the hand is pressed on the vertex of the head.
- Echoscopia** (*ek-o-sko'-pe-ah*) [*echo*; *onomiv*, to view]. Auscultation.
- Eck Fistula** (*iek-tu-lah*). An artificially made communication between the portal vein and the vena cava inferior.
- Ecker's Gyrus**. The gyrus descendens, the most posterior of the occipital convolutions.
- E.'s Sulcus**, the anterior or transverse occipital sulcus, usually joined to the horizontal part of the interparietal sulcus.
- Eclabium** (*ek-lā'-be-um*) [*ek*, out; *labium*, a lip]. An eversion of the lip.
- Eclampsia** (*ek-lamp'-se-ah*) [*eklyptōs*, to shine or burst forth]. An acute nervous affection, characterized by convulsions, with loss of consciousness. **E.**, **Cerebral**, a form in which the irritation is presumed to originate in the brain, as distinguished from uterine eclampsia. **E.**, **Infantile**, a reflex convulsion of childhood. **E. nutans**, an affection characterized by paroxysms, in which the head and upper part of the body are bowed forward several times in succession, the attacks are accompanied by disordered consciousness. **Syn.** *Nocturnal spasm; Salivary convulsion.*
- E.**, **Puerperal**, a convulsion occurring toward the close of pregnancy or after labor, believed to be caused by the irritation of the vasomotor centers by retained excrementitious substances.
- E. tardissima**, that occurring several days or as long as eight weeks after parturition.
- Eclampsism** (*ek-lamp'-sizm*) [*eclampsia*]. Bar's name for eclampsia without convulsions.
- Eclamptic** (*ek-lamp'-tik*) [*eclampus*]. Relating to, or of the nature of, eclampsia.
- Eclatpism** (*ek-lap'-tizm*) [*eclatpism*]. The morbid condition produced by the retention of various toxic principles and auto-intoxication, all dependent upon the state of pregnancy; it is prone to result in convulsions, but may show only prodromes, such as headache, impairment of vision, etc.
- Eclectic** (*ek-lek'-tik*) [*ekalektōs*, selected]. A school of physicians which selects that which is good from all other schools.
- Ecmetropia** (*ek-metro'-pe-ah*). See *Ametropia*.
- Ecmnesia** (*ek-ne'-ze-ah*) [*ek*, out; *mnēsia*, remembrance]. A gap in memory, amnesia in which there is normal memory to a certain date and loss of memory for a period after it.
- Ecophony** (*ek-o'-fo-ni*) [*ekō*, *son*, sound]. An echo immediately following vocal sounds, heard in acute congestion of the lungs.
- Ecostate** (*ek-kos'-tāt*) [*ek*, priv.; *costa*, a rib]. Without ribs.
- Ecophyma** (*ek-ō'-fīm-ah*) [*ek*, out; *phēsthai*, to grow]. An excrecence on the skin. **E. globulus**, a contagious disease of the hand marked by the formation, on the skin, of tubercles which soften and form raspberry-like tumors.
- Ecrasement** (*ek-krah-men-ment*) [*ek*, "a crushing"; *ment*]. The removal of a part by means of an *écraseur*.
- Ecraseur** (*ek-krah-see*) (see *Ecrasement*). An instrument consisting of a chain or wire loop which is placed about a projecting part, and, by being tightened, gradually cuts through the tissues. **E.**, **Galvanic**, one constructed so that the wire loop can be heated to redness while in use, by the passage through it of an electric current.
- Ecsomatic** (*ek-so-mat'-ek*) [*ek*, out; *soma*, body]. Relating to ecsomatics or to material removed from the body, as pus, urine, etc.
- Ecsomatics** (*ek-so-mat'-es*). That department of medicine included in clinical laboratory methods, so called because all the material dealt with is removed from the body and examined elsewhere.
- Ecsomatist** (*ek-so'-mat-ist*). An individual who is versed in clinical laboratory methods.
- Ecstasis** (*ek-stā'-sis*). See *Ecstasy*.
- Ecstasy** (*ek-s'tā-si*) [*ekstasis*, a trance]. A derangement of the nervous system characterized by an exalted visionary state, absence of volition, insensibility to surroundings, a radiant expression, and immobility in statue-like positions.
- Ecstrophy** (*ek'-stro-fe*). See *Ectrophy*.
- Ectacolia**, **Ectacoly** (*ek-tā'-ko-li-ah*, *ek'-tā'-ko-le*) [*ektasis*, capable of stretching, *colōn*, the colon]. Congenital dilation of a more or less extensive section of the colon.
- Ectad** (*ek'-tad*) [*ektēs*, external, *ad*, to]. On or toward the external part.
- Ectal** (*ek'-tāl*) (see *Ectad*). At some surface or aspect farther from a supposed center than that with which a given object is compared; external; superficial.
- Ectasia**, **Ectasis** (*ek-tā'-se-ah*, *ek'-tā-si*) [*ektasis*, extension]. Distention, dilation.
- Ectasin** (*ek'-tā-sin*) (see *Ectasia*). A substance isolated from tuberculin, which causes dilation of the vessels.
- Ectatic** (*ek-tat'-ik*) (see *Ectasia*). Distended or dilated.
- Ecthol** (*ek'-thol*). A proprietary remedy used to contain the active principles of *Leucosceles angustifolia* and *Thuja occidentalis*. It is antiparulant and antinervine. Dose: 1 dr. to 5 m. 3 times daily.
- Ecthyma** (*ek-thi'-am-ah*) [*ecthyma*, a pustule]. An inflammatory skin disease attended with an eruption of large, flat, superficial pustules. They vary in size from a ten-cent to a twenty-five-cent piece, and are surrounded by a distinct inflammatory areola. The eruption appears, as a rule, on the legs and thighs where the hairs are thick; it occurs in crops, and may persist for an indefinite period. **E. gangrenosum**, **E.**, **Gangrenous**, a form marked by the appearance of brown discolorations of the skin, usually surrounded by a band; the center of these efflorescences finally becomes necrotic. It is due to *Bacillus pyocyaneus*. **E.**, **Syphilitic**. See *Rupia*.
- Ecto-** (*ek'-to*) [*ektōs*, without]. A prefix signifying without, upon the outer side.
- Ectoblast** (*ek'-to-blast*) [*ektōs*; *blastōs*, a bud]. The outside membrane of a cell.
- Ectocardia** (*ek-tā'-kar'-di-ah*) [*ektōs*, outside the heart]. An abnormal position of the heart. **E. abdominalis**, a malformation in which the heart is wholly within the abdo-

men or within a sac in the precordia. **E. cephalica**, **E. cervicalis**, a form in which the heart is at the base of the neck. **E. extrathoracica**, that in which the heart is external to the thoracic cavity. **E. intrathoracica**, that in which the heart is inside the thorax. **E. pectoralis**, that in which the heart lies in front of the chest.

Ectocentral (*ek-to-sen'-tral*) [*ecto-*; *central*].

Near to the center and to the external surface.

Ectochoroidea (*ek-to-ko-roid'-e-ah*). The outer layer of the choroid.

Ectocnemial (*ek-to-ne'-me-al*) [*ecto-*; *κνήμη*, the leg]. Located on the external aspect of the fibula.

Ectocolostomy (*ek-to-ko-lus'-to-me*) [*ecto-*; *colostomy*]. A surgical operation upon the colon to establish an external opening.

Ectoderm (*ek'-to-derm*) [*ecto-*; *δέρμα*, skin]. The outer of the two primitive layers of the embryo.

Ectodermal, **Ectodermic** (*ek-to-der'-mal*, *-miki*) [see *Ectoderm*]. Relating to the ectoderm, applied to structures derived from the upper epithelial layers of the derma, as hair, chitin, enamel, etc.

Ectogenous (*ek-top'-en-us*) [*ecto-*; *γεννᾶν*, to produce]. Capable of growth outside of the body; applied especially to bacteria and other parasites.

Ectoglobular (*ek-to-glob'-u-lar*). Formed outside the blood-globules.

Ectokelostomy (*ek-to-kel-os'-to-me*) [*ecto-*; *κῆλη*, hernia; *στόμα*, a mouth]. Vitrac's operation, by which the sac of an infected inguinal hernia is kept open with drainage, the whole being displaced through a counteropening in the abdominal wall, the hernia being then cured radically.

-ectomy [*ék*, out; *τέμνειν*, to cut]. A suffix meaning a cutting out.

Ectopagus (*ek-top'-ag-us*) [*ecto-*; *παγίς*, united]. A twin monstrosity united laterally the full extent of the thorax.

Ectopectoral (*ek-to-pek'-tor-al*). The outer of the two pectoral muscles; the pectoralis major.

Ectoperitonitis (*ek-to-per-it-on-i'-tis*) [*ecto-*; *peritonitis*]. Inflammation of the attached side of the peritoneum.

Ectopia (*ek-top'-pe-ah*) [*ἐκτοπία*, displaced]. Malposition.

Ectopic (*ek-top'-ik*) [*ectopia*]. In an abnormal position. **E. Gestation**, extrauterine gestation.

Ectoplasm (*ek'-to-plazm*) [*ecto-*; *πλάσσειν*, to form]. The outer, hyaline, more compact layer of protoplasm of a cell or unicellular organism.

Ectoplastic (*ek-to-plas'-tik*) Relating to ectoplasm, applied to cells in which the ectoplasm is undergoing changes.

Ectopocystis (*ek-to-po-sis'-is*) [*ectopia*; *ἀστος*, the bladder]. Displacement of the bladder.

Ectopotomy (*ek-to-pot'-o-me*) [*ectopia*; *τέμνειν*, to cut]. Laparotomy for the removal

of the contents of an extrauterine gestation-sac.

Ectorbital (*ekt-orb'-it-al*). Relating to the temporal part of the orbits.

Ectosac (*ek'-to-sak*) [*ecto-*; *σάκος*, a sac]. The limiting membrane of an ovum.

Ectosteomyces (*ekt-os-te-o-mi'-sēs*) [*ecto-*; *ὀστέον*, a bone; *μύκης*, a fungus]. A fungous newgrowth from a bone.

Ectothalamus (*ek-to-thal'-am-us*) [*ecto-*; *thalamus*]. The external medullary layer of the thalamus.

Ectothrix (*ek'-to-thriks*) [*ecto-*; *ῥιξ*, hair]. An organism parasitic upon the hair. (Cf. *Trichophyton*.)

Ectotrochanter (*ek-to-tro-kan'-ter*) [*ecto-*; *trochanter*]. The greater trochanter.

Ectromelus (*ek trom'-el-us*) [*ἐκτρωσις*, abortion; *μῆλος*, a limb]. A single autositic monster characterized by the presence of imperfectly formed limbs.

Ectropia (*ek-tro'-pe-ah*). See *Exstrophy*. **E., Intestinal**. See *Adenoma, Umbilical*.

Ectropic (*ek-trop'-ik*). Turned out or everted.

Ectropion (*ek-tro'-pe-on*) [*ék*, out; *πτίον*, to turn]. Eversion of a part, especially of an eyelid.

ECTROPION.

Ectropionization (*ek-tro-pe-on-is-a'-shun*). Inversion of the upper eyelid and exposure of the conjunctiva to facilitate therapeutic manipulation.

Ectropionize (*ek-tra'-pe-on-iz*) [*ectropion*]. To produce, by operation, the condition of ectropion.

Ectropodism (*ek-trop'-od-izm*) [*ἐκτρωπία*, abortion; *ποῦς*, foot]. Congenital absence of one or more toes.

Eczeema (*ek'-ze-mah*) [*ἐκζεῖν*, to boil over]. Tetter, an acute or chronic, noncontagious, inflammatory disease of the skin, characterized by multiformity of lesions, and the presence, in varying degrees, of itching, infiltration, and discharge. The skin is reddened, the redness shading off insensibly into the surrounding unaffected parts. **E. arthriticum**, a vesicular form occurring about gouty joints. **E. erythematousum**, the mildest form of eczema, in which the skin is reddened and slightly swollen. **E. fissum**, a form affecting the hands and skin over the articulations, and characterized by the forma-

tion of deep, painful cracks or fissures. **E. hypertrophicum**, a form characterized by permanent hypertrophy of the papillae of the skin, giving rise to general or limited warty outgrowths. **E. madidans**, a form characterized by large, raw, weeping surfaces studded with red points. It follows *E. vesiculosum*. Syn., *Eczema rubrum*. **E. marginatum**, the most severe form of ringworm of the body. Its seats are the groins, axillae, crotch, and occasionally the popliteal spaces. Its lesion is marked by a well defined, festooned, raised margin. **E. papulosum**, a variety associated with the formation of minute papules of a deep-red color and firm consistency, and accompanied by intense itching. **E. pustulosum**, the stage of eczema characterized by the formation of pustules. **E. rubrum**. See *E. madidans*. **E. seborrhoicum**. Synonym of *Seborrhea*. **E. solare**, that form due to irritation from the rays of the sun. **E. squamosum**, a variety characterized by the formation of adherent scales of shed epithelium. **E. sudamen**, **E. sudorale**, that due to excess of perspiration. **E. sycomatousum**, **E. sycosiforme**, a pustular form occurring on the hairy parts and affecting the hair follicles. **E. tyloticum**, a form occurring on the palmar aspect of the hands and fingers and attended with callosity. **E. vesiculosum**, an eczema characterized by the presence of vesicles.

Ecematous (*ek-em-at-us*) [*eczema*]. Of the nature of or affected with eczema.

Eddysm (*ed-diz-m*). A form of faith-cure propagated, under the name of Christian Science, by an American woman, Mary Patterson Baker Glover Eddy, known to her followers as "Mother Eddy."

Edea, **Ædœa** (*est-eh*) [*adain*, the genitals]. The genital organs.

Edenohis' Posture. See *Simon's Posture*.

Edentis, **Ædœntis** (*ed-ent-is*) [*edea*; *entis*, inflammation]. Inflammation of the genitals.

Edema, **Œdema** (*ed-eh-ma*) [*oidyma*, *oidema*, to swell]. An infiltration of serum in a part. **E.**

Acute. See *E. anatum*. **E.**, **Angioneurotic**. See *Angioneurotic Edema*. **E.**, **Blue**,

edema with cyanosis, seen in hysterical paralysis accompanied with pain. **E.**, **calidum**, that due to a serous exudation, it is sudden in its onset and resembles acute inflammation.

E., **capitis**, a serous effusion into the subcutaneous areolar tissue of the scalp. **E.**, **cardica** (of the kidneys), the change in the kidneys due to passive congestion in consequence of heart disease. **E.**, **Cerebral**.

See *Hydrocephalus*. **E.**, **Collateral**, the serous exudation of the tissue surrounding an inflamed part. **E.**, **Compact** (of infants), a variety of *Scleroderma neonatorum* in which the skin is edematous. See *Scleroderma edematosa*. **E.**, **Cretinoid**. See *Myxedema*.

E., **ex vacuo**, edema of a part to counteract the tendency to a vacuum caused by atrophy of some neighboring part. **E.**, **Febrile**

Purpuric, localized edema accompanying an

eruption of purpura urticaria about the joints, and rheumatic fever. **E.**, **frigidum**, a chronic swelling, cold to the touch and painless. **E.**, **fugax**, edema due to atmospheric changes occurring in the face, eyelids, and neck of chlorotic patients. **E.**, **Glottidial**. See *Laryngeal Edema*. **E.**, **Infectious**. See *E.*, **Malignant**. **E.**, **Inflammatory**, a serous infiltration into inflamed tissue. **E.**, **Iwanoff's** (of the retina, caused by degeneration of the retina. **E.**, **Laryngeal**. See *Laryngeal Edema*. **E.**, **Malignant**, an edematous inflammation that occurs 2

times after serious injuries, and is characterized by its rapid spread, the speedy destruction of the tissue involved, and the formation of gas. It is due to the action of malignant edema. **E.**, **Neuropathic**, that due to paralysis of the vasomotor nerves or to neurovascular congestion. **E.**, **oculi**. See *Hydrophthalmia*.

E., **œdematodes**. See *E. frigidum*. **E.**, **Paroxysmal Pulmonary**, a rare form of edema of the lungs marked by rapid onset, imminent asphyxia, and copious hemorrhagic expectoration. The attack, lasting from a few minutes to some days, may terminate fatally or the symptoms may disappear.

E., **puerperarum**, phlegmasia alba dolens. **E.**, **Purulent**, a purulent infiltration in which there is a great deal of fluid. **E.**, **Retinal**, the development of irregular spaces filled with transparent fluid at the periphery of the retina occurring after middle age. **E.**, **scleroticum**, edema attended with induration.

Edemamycosis, **Œdemamycosis** (*ed-eh-mi-ko-sis*) [*edema*, *myc*, fungus]. The name applied by Edington to an ectoparasitic infective disease, commonly referred to as African horse sickness, it is characterized by intense congestion of the blood vessels and consequent edema of the lungs and at times of the subcutaneous tissues of the head and neck.

Edematization (*ed-em-at-iz-ah-shun*) [*edema*]. Edema of the tissues produced by the action of a 2% salt solution at a temperature lower than that of the body.

Edematous (*ed-em-at-us*). Pertaining to edema.

Edentate (*ed-ent-ate*) [*e*, privy; *dens*, tooth]. Without teeth.

Edestin (*ed-est-in*). The chief and characteristic proteid of the seeds of sunflower, hemp, squash, and castor-oil bean.

Edinger's Law. See under *Neuron*. **E's Nucleus**, the nucleus of the posterior longitudinal bundle, an aggregation of gray matter in the gray matter of the third ventricle at the beginning of the sylvian aqueduct.

Edinger-Westphal's Nucleus. One of the nuclei of the third cranial nerve in the region of the anterior corpora quadrigemina to the sylvian aqueduct. Paired anterolateral.

Efferent (*ef-fer-ent*) [*effere*, carrying back]. Carrying away, as *efferent* nerves, nerves conveying impulses away from the central nervous system, of blood-vessels, conveying

blood away from the tissues; of *lymphatics*, conveying lymph from the lymphatic glands.

Effervescing (*ef-er-ves-ing*) [*effervesce*, to boil up]. Giving off gas-bubbles; foaming.

E. Powder. See *Seidlitz Powder*.

Effleurage (*ef-lur-ash*) [*Fr.*]. In massage, the stroking movement.

Efflorescence (*ef-lor-es-ens*) [*efflorescere*, to bloom]. 1. The spontaneous conversion of a crystalline substance into powder by a loss of its water of crystallization. 2. The eruption of an exanthematous disease.

Effluvium (*ef-lu've-um*) [*effluere*, to flow out]. An odor, especially one that is offensive.

Effumability (*ef-u-ma-bil-i-ty*). Capacity for volatilization.

Effusion (*ef-i-shun*) [*effundere*, to pour out]. 1. A pouring-out, especially the pouring-out of blood or serum into the cellular tissues or the serous cavities. 2. The effused fluid.

E., Pericardial, an effusion into the pericardium. For signs of, see *Auenbrugger*, *Ausert*, *Rotch*, *Roth*, *Sansom*, and *Sibson*. **E., Pleural**, an effusion into the pleura. For signs of, see *Bacelli*, *Kellock*, *Litten*, *de Mussey*, *Pitres*, *Sieur*, *Skoda*, and *Williams*.

Egagropilus (*eg-ag-rof-il-us*) [*αἰγάριον*, a goat; *πίλος*, felt]. An intestinal concretion formed of hair.

Egesta (*eg-es-tah*) [*egerere*, to cast out]. The discharges of the bowels or other excretory organs.

Egg (*eg*). See *Ovum*. **E.-albumen**, albumen, white of egg, constituting about 60% of the egg of the domestic fowl.

Egols (*eg-ol's*). Compounds of mercury with para-sulfonic acid and a phenol. They are red-brown powders, soluble and emetic.

Egophony (*eg-oh'-o-ne*) [*αἴγῃ*, a wild goat; *φωνή*, the voice]. A modification of bronchophony, in which the voice has a bleating character, like that of a kid. It is heard in pleurisy with slight effusion.

Egyptian Chlorosis (*eg-ipt-shun*). See *Ankylostomiasis*. **E. Ophthalmia**. See *Trachoma*.

Ehrenritter's Ganglion. The jugular ganglion.

Ehret's Paralysis. A traumatic neurosis following injury to the inner side of the foot or ankle, consisting in spasmodic contracture of the muscles which raise the inner border of the foot and functional paralysis of the peroneal muscles.

Ehrlich's Method. The use of a saturated solution of anilin in water, as a mordant for better fixing the anilin dyes used in staining bacteria. **E.'s Method for the Fixation of Blood-films**, consists in boiling the specimen for one minute in a test-tube containing absolute alcohol. **E.'s Reaction**, the treatment of the urine with diazobenzene-sulfuric acid produces a deep-red color that is due to a combination of the reagent with an aromatic amido-compound found in the urine in typhoid fever and pneumonia, frequently also in pleurisy,

measles, tuberculosis, erysipelas, and peritonitis. To produce this reaction, equal parts of the reagent and urine are mixed and about one-eighth of their total volume of ammonia is added. The reagent consists of two solutions: (1) Sulfanilic acid, 1 Gm.; hydrochloric acid, 10 Cc.; distilled water, 200 Cc. (2) Sodium nitrate, 0.5 Gm.; distilled water, 100 Cc. **E.'s Side-chain Theory.** See *Lateral-chain Theory of Ehrlich*. **E.'s Solution**, a solution of a basic anilin dye in anilin oil and water. **E.'s Theory of the Origin of Leukocytes.** See *Leukocytes*, *Ehrlich's Theory Concerning*.

Eichhorst's Corpuscles. Small, spheric blood-corpuscles found in pernicious anemia and formerly regarded as characteristic of this disease. **E.'s Neuritis**, a form of neuritis in which the morbid process involves both the nerve-sheath and the interstitial tissue of the muscles. Syn., *Neuritis fascians*. **E.'s Type of Progressive Muscular Atrophy**, the femorotibial type.

Eichstedt's Disease. Pityriasis versicolor.

Eigon (*i'-gon*). A compound of iodine and albumin used as a substitute for iodine. **α-Eigon**, albumin-iodatum, a brown powder, odorless and tasteless; contains 20% of iodine; soluble in alkalis and acids; insoluble in water. **α-Eigon-sodium**, sodium iodoalbuminatum, a white, odorless, nearly tasteless powder containing 15% of iodine. **β-Eigon**, peptone iodate, a yellow powder, odorless and tasteless; contains 15% of iodine. It is recommended as a substitute for iodine when there is digestive weakness. Dose 45-150 gr. (3-10 Gm.) daily. **α-** and **β-**eigons are also used as dusting-powders.

Eijkman's Test for Phenol. Add to the phenol solution a few drops of an alcoholic solution of nitrous acid, ethyl ether, and an equal amount of concentrated sulfuric acid. A red coloration is produced.

Eikonogen (*i-kon'-o-jen*), $\text{NH}_2\text{C}_6\text{H}_4(\text{OH})\cdot\text{SO}_3\text{Na} + 2\frac{1}{2}\text{H}_2\text{O}$. The sodium salt of amido-betanaphthol-β-monosulfonic acid; a white powder, soluble in water; it is used in photography. See also *Developer*.

Eiloid (*i'-loid*) [*εἶλεν*, to coil; *εἶδος*, form]. Having a coiled structure, as an *eiloid* tumor.

Eiselt's Reaction for Melanin in Urine. Concentrated nitric acid, sulfuric acid, potassium dichromate, or other oxidizing agents render urine containing melanin dark colored.

Eittelberg's Test. If a large tuning-fork is held at intervals before the ear during 15 or 20 minutes, the duration of the perception of the vibration, during these periods, increases in case the ear is normal, but decreases when a lesion of the sound-conducting apparatus exists.

Ejaculation (*ej-ak-u-la'-shun*) [*ejaculatio*, a throwing out]. The ejection of the semen.

Ejaculatory (*ej-ak'-u-la-tor-e*) [*ejaculation*]. Throwing or casting out. **E. Duct.** See *Duct, Ejaculatory*.

Ejecta (*ej-ek'-tah*) [L., pl. of *ejectum*]. Things or materials cast out; excretions or excrementitious matters.

Ejection (*ej-ek'-shun*) [*ejectio*, a casting out]. The casting out of excretions or of excrementitious matters; that which is cast out.

Ekaiodoform (*ek-ah-i-oh'-do-form*). A combination of iodoform and 0.5% of paraformaldehyde. It is used as a dressing for wounds.

Ektogan (*ek'-do-gan*). The commercial name for zinc peroxid, it is used externally.

Ekzemin (*ek'-ze-min*). An ointment consisting of precipitated sulfur with coloring-matter and perfume.

Elacin (*el'-a-sin*). Basophil elastin.

Elastic (*el'-as-tik*) [*elasticus*, to urge forward]. Returning to the original form after being stretched or compressed. **E. Bandage**, a rubber bandage exerting continuous compression of a part. **E. Stocking**, a rubber stocking exerting continuous pressure. **E. Tissue**, a variety of connective tissue composed of yellow elastic fibers.

Elastica (*el'-as-tik-ah*). The official name for rubber. See *Caoutchouc*.

Elasticin (*el'-as-tis-in*). See *Elastin*.

Elastin (*el'-as-tin*) [see *Elastin*]. An albuminoid substance forming the basis of elastic tissue.

Elastometer (*el'-as-tom'-et-er*) [*elastic*, *meter*, a measure]. An apparatus for determining the elasticity of tissues.

Elaterin, **Elaterinum** (*el'-at'-er-in*, *el'-at'-er-i-num*) [*elaterium*]. $C_{20}H_{30}O_2$. A neutral principle obtained from *Feballium elaterium*. It is a powerful hydragog cathartic. Dose $\frac{1}{8}$ gr. (0.032 Gm.). **E., Powder of, Compound**, contains elaterin, 1; sugar of milk, 30 parts. Dose $\frac{1}{4}$ to $\frac{1}{2}$ gr. (0.032 to 0.32 Gm.). **E., Trituration of** [*trituration elaterini*, U. S. P.] elaterin, 10; sugar of milk, 90 parts, thoroughly mixed. Dose $\frac{1}{4}$ to $\frac{1}{2}$ gr. (0.032 to 0.04 Gm.).

Elaterium (*el'-at'-er-um*) [*elater*, driving away]. The dried sediment from the juice of the spiny cucumber, *Feballium elaterium*. It is a powerful hydragog cathartic. Dose $\frac{1}{4}$ gr. (0.032 Gm.).

Elaterometer (*el'-at'-er-om'-et-er*) [*elater*, a driver, *meter*, a measure]. An apparatus for determining the elasticity of gases.

Elatin (*el'-at-in*). See *Elaterin*.

Elaul (*el'-au*). See *Elavine*.

Elbow (*el'-bo*) [AS., *elbaga*]. The region corresponding to the junction of the arm and forearm; the bend of the arm. **E.-jerk**, one of the reflexes.

Elder (*el'-der*). See *Sambucus*.

Elecampane (*el'-e-kam'-pan*). See *Paula*.

Elective (*el'-ek'-tiv*) [*electus*, to choose]. Optional, in chemistry, having a preference.

Electric (*el'-ek'-trik*) [*electricus*]. Having the nature of or produced by electricity. **E. Chorea**. See *Dubini's Disease*. **E.-light Treatment**, the therapeutic application of electric light by means of cabinets in which the patient sits with the light directed upon

SECTION OF ELBOW.—(From Brauer.)

1. Biceps. 2. Brachialis anticus. 3. Median nerve. 4. Supinator longus. 5. Supinator. 6. Extensor carpi radialis longus. 7. Extensor carpi ulnaris. 8. Triceps.

LEAGMENTS OF THE ELBOW FROM THE INNER SIDE.—(From Snodgrass.)

1. Anterior ligament. 2. Internal condyle. 3. Head of radius covered by oblique ligament. 4. Lateral ligament. 5. Olecranon.

LEAGMENTS OF THE ELBOW FROM THE OUTER SIDE.—(From Snodgrass.)

1. External condyle of humerus. 2. Oblique ligament covering head of radius. 3. External oblique ligament. 4. Intermuscular membrane. 5. Olecranon. 6. Lateral ligament.

the affected part. It is used in rheumatism, neuralgia, etc.

Electricity (*e-lek-tris'-it-e*) [*ἤλεκτρον*, amber]. One of the forces of nature developed or generated by chemism, magnetism, or friction. **E., Chemic.** See **E., Galvanic.** **E., Faradic**, that produced by induction. **E., Franklinic**, frictional or static electricity. **E., Frictional**, that produced by friction. **E., Galvanic**, that which is generated by chemic action in a galvanic cell. **E., Inductive**, that produced in a body by proximity to an electrified body. **E., Magnetic**, that developed by bringing a conductor near the poles of a magnet. **E., Static**, frictional electricity. **E., Voltaic**, galvanic or chemic electricity.

Electrification (*e-lek-tri'-ik-a'-shun*). See **Electrization**.

Electrify (*e-lek'-trif-i*) [*electric*; *facere*, to make]. To make electric.

Electrization (*e-lek-tris-a'-shun*) [*electricity*]. The application of electricity to the body. **E., Intragastric**, electrotherapy practised by the introduction of an electrode into the stomach. Cf. **Electrode**, **Deglutible**.

Electro- (*e-lek-tro-*) [*electricity*]. A prefix denoting connection with or relation to electricity.

Electroanesthesia (*e-lek-tro-an-es-the'-za-shn*) [*electro-*; *ἀναισθησία*, want of feeling]. 1. Inability to perceive the sensation made by electricity upon the skin. 2. Local anesthesia induced by the introduction of anesthetizing substances into the tissues by means of the electric current without injury to the skin. It is called the cataphoretic method.

Electrobiology (*e-lek-tro-bi-ol'-o-je*) [*electro-*; *biology*]. 1. The science of the electric relations and laws of organic beings. 2. A modern term for mesmerism or hypnotism.

Electrobiology (*e-lek-tro-bi-ol'-o-je*) [*electro-*; *βίος*, life; *ὁρᾶν*, to view]. The test of the existence of life by means of electricity.

Electrocapillarity (*e-lek-tro-kap-il-ar'-it-e*). See **Action**, **Electrocapillary**.

Electrocardiogram (*e-lek-tro-kar'-de-ah-gram*) [*electro-*; *καρδία*, heart; *γράμμα*, a writing]. A registration of electromotive variations in heart-action.

Electrocautery (*e-lek-tro-kaut'-ter-e*). See **Cauterization**.

Electrochemistry (*e-lek-tro-kem'-is-tre*) [*electro-*; *χημία*, chemistry]. The science treating of the chemic changes produced by electricity.

Electroconductivity (*e-lek-tro-kon-duk-tiv'-it-e*). Capability for transmitting electricity.

Electrode (*e-lek'-trōd*) [*electro-*; *ὁδός*, a way]. The pieces of metal or other substance fastened to the conducting cords of a battery through which electricity is applied to the body. **E., Alleman's**, a device for the application of electricity to cause absorption of corneal opacities. **E., Colon** (Pennington's), an appliance for hydroelectric applications to the colon. It is a perforated hollow carbon electrode connected with the

conducting cord by means of a spiral wire passing through and surrounded by a soft colon tube, through which the colon may be flushed with warm water or saline solution. **E., Deglutible**, an electrode suitable to be passed into the stomach for intragastric electrization. **E., Dispersing**. See **E., Indifferent.** **E., Exciting**, in electrotherapy, the small electrode used in nerve- and muscle-stimulation, immediately over or near the nerve to be examined. Syn., **Localizing electrode**. Cf. **E., Indifferent.** **E., Exciting**, Erb's, a bundle of 400 metal threads separated from one another by insulation and tightly incased in a hard-rubber tube; employed in electrotherapy. **E., Indifferent**, the large electrode used in nerve and muscle stimulation at a distance from the nerve to be examined. Syn., **Dispersing electrode**. Cf. **E., Exciting.** **E., Localizing**. See **E., Exciting.**

Electrodiagnosis (*e-lek-tro-di-ag-no'-sis*) [*electro-*; *diagnosis*]. Diagnosis by examining the reaction of the excitable tissues of the body by means of electric currents.

Electrodiaphane (*e-lek-tro-di-a'-an*) [*electro-*; *διαφανής*, to show through]. An apparatus for illumination of the stomach. Cf. **Diaphanoscope**.

Electrodiaphany (*e-lek-tro-di-a'-an-e*). See **Diaphanoscopy** and **Transillumination**.

Electrodynamics, Electrodynamism (*e-lek-tro-di-nam'-iks, -dīn'-am-izm*) [*electro-*; *δυναμική*]. The science of the reciprocal action of electric currents.

Electrodynamometer (*e-lek-tro-di-nam-om'-et-er*) [*electro-*; *dynamometer*]. An instrument for measuring the strength of electric currents.

Electroendoscopy (*e-lek-tro-end-ōs'-ko-pe*). See **Diaphanoscopy** and **Transillumination**.

Electrogram (*e-lek'-tro-gram*) [*electro-*; *γράμμα*, a writing]. A skiagram.

Electrograph (*e-lek'-tro-graf*). See **Skiagraph**.

Electrography (*e-lek-trōg'-raf-e*). 1. Skiagraphy. 2. Electrology.

Electrohemostasis (*e-lek-tro-hem-ōs'-ta-sis*) [*electro-*; *hemostasis*]. Arrest of hemorrhage in a tissue or vessel by grasping it with a forceps, in the jaws of which heat is generated by an electric current, causing desiccation of the tissue and union of the arteries.

Electrokatalysis (*e-lek-tro-kat-al'-is-is*) [*electro-*; *katalysis*]. The action of the galvanic current upon the trophic processes in the nervous system, upon the contraction of the vessels, the movement of the lymph in the lymphatics, etc., through which a resorbent effect is produced by means of exudation, infiltration, new-formation, etc.

Electrokinetic (*e-lek-tro-kin-et'-ik*). Electromotive.

Electrokinetics (*e-lek-tro-kin-et'-iks*) [*electro-*; *κίνησις*, to move]. 1. The science of galvanism. 2. The science of electricity as applied to mechanic motion.

Electrolepsy (*e-lek-tro-lep-se*) [*electro-*; *ἐπιληψία*]. Electric chorea.

Electrolizer (*e-lek'-tro-li-zer*). An instrument for removing structures by electricity.

Electrology (*e-lek'-troi'-o-je*) [*electro-*; *λογος*, science]. That branch of physics treating of the laws and phenomena of electricity.

Electrolysis (*e-lek'-troi'-i-sis*) [*electro-*; *λυσις*, solution]. The dissolution of a chemically pure compound by an electric current. **E.**, **Cupric**, electrolysis in which a bulb of chemically pure copper is applied directly to the diseased area, the copper oxychloride generated acts as a germicide.

Electrolyte (*e-lek'-tro-li-ti*) [see *Electrolysis*]. A substance decomposed by an electric current.

Electrolytic (*e-lek'-tro-li-tik*) [see *Electrolysis*]. Relating to electrolysis.

Electrolyzer (*e-lek'-tro-li-zer*). See *Electrolizer*.

Electromagnet (*e-lek'-tro-mag'-net*) [*electro-*; *μαγνης*]. A mass of soft iron surrounded by a coil of wire. A current passing through the wire will make the iron core magnetic.

Electromassage (*e-lek'-tro-mas'-azh'*) [*electro-*; *μασάζ*]. The transmission of a current of electricity through a kneading instrument.

Electromedication (*e-lek'-tro-med-ik-a'-shun*). The introduction of medicaments into the system by electric means.

Electrometer (*e-lek'-trom'-et-er*) [*electro-*; *μετρος*, a measure]. An instrument for measuring electric force.

Electrometry (*e-lek'-trom'-et-er*) [see *Electrometer*]. The measurement of electricity.

Electromotive (*e-lek'-tro-mot'-iv*). 1. Pertaining to or producing electric action. 2. Producing electricity. **E. Force**, the force that produces an electric current. Abbreviated **E. M. F.**

Electron (*e-lek'-tron*) [*ἤλεκτρον*, amber]. 1. Amber. 2. Any medium conducting or exciting electricity.

Electronegative (*e-lek'-tro-neg'-a-tiv*) [*electro-*; *νεγερ*, to deny]. Pertaining to the electric condition found at the negative pole of a battery.

Electroneurotone (*e-lek'-tro-nu'-ro-tōn*) [*electro-*; *νευρον*, a nerve, *-tone*, tone]. An apparatus for applying massage by electricity.

Electropathology (*e-lek'-tro-path-ol'-o-je*) [*electro-*; *παθολογία*]. The study of morbid conditions by the aid of electric irritation.

Electrophotography (*e-lek'-tro-fotog'-rafi-e*). See *Electrophotography*.

Electrophotherapy (*e-lek'-tro-fot-ther'-ap-e*) [*electro-*; *φωτοθεραπεία*]. Therapeutic treatment by means of electric light.

Electrophysiology (*e-lek'-tro-fis-e-ol'-o-je*) [*electro-*; *φυσιολογία*]. The study of electric reactions, properties, and relations of organs and organic tissues.

Electropositive (*e-lek'-tro-pos'-it-iv*) [*electro-*; *ποσις*, to place]. Pertaining to the electric state that exists at the positive pole of a battery.

Electropuncture (*e-lek'-tro-pung'-tūr*) [*electro-*; *πυγναι*, to prick]. The use of needles as electrodes, which are thrust into an organ or a tumor.

Electroscope (*e-lek'-tro-skōp*) [*electro-*; *σκοπεῖν*, to view]. An instrument for determining the presence of static electricity and determining whether it is positive or negative.

Electrosensibility (*e-lek'-tro-sen-si-bil-i-ty*). The irritability of a sensory nerve to electricity.

Electrostatics (*e-lek'-tro-stat-iks*) [*electro-*; *στασις*, causing to stand]. The science of static electricity, or that developed by friction.

Electrosynthesis (*e-lek'-tro-sin'-the-sis*) [*electro-*; *σύνθεσις*]. Chemie combination by means of electricity.

Electrotherapeutics (*e-lek'-tro-ther'-ap-ut-iks*) [*electro-*; *θεραπεία*, treatment]. The science and art of the application of electricity for therapeutic purposes.

Electrotherapy (*e-lek'-tro-ther'-ap-e*). See *Electrotherapeutics*.

Electrotherm (*e-lek'-tro-therm*) [*electro-*; *θέρμη*, heat]. An apparatus for relieving pain by the application of electricity to the skin.

Electrothermal (*e-lek'-tro-therm'-al*). Pertaining to heat and electricity or to heat generated by electricity.

Electrotonus (*e-lek'-troi'-o-nus*) [*electro-*; *τόνος*, tension]. The change of condition in a nerve during the passage of a current of electricity. See *Antielectrotonus* and *Kalelectrotonus*.

Electrozone (*e-lek'-tro-zōn*). The proprietary name for a disinfectant fluid produced by the electrolysis of sea-water.

Electuary (*e-lek'-tu-er-ē*) [*electuarium*, an electuary]. A soft or pulpy mass, consisting of a medicinal substance, with sugar, honey, water, etc.

Eleidin (*el'-id-in*) [*Idaea*, olive-oil]. A material occurring in the form of granules in the stratum granulosum of the epidermis.

Element (*el'-e-ment*) [*elementum*, a first principle]. Any one of the ultimate parts of which anything is composed, as the cellular elements of a tissue. In chemistry, a body that cannot be decomposed into simpler substances. The recognized elements now number about 80. See *Elements*, *Table of Chemical Elements*.

Elementary (*el'-e-men-tar-ē*) [*element*]. Pertaining to or having the characters of an element.

Elemi (*el'-em-e*) [*Ar*]. A resinous exudate probably derived from the *Commersonia communis*, although its botanical source is still undetermined. It contains a crystalline resin, *elemi* or *amyrin*. Its action is similar to that of the turpentine. **E.**, **Unguentum** (B. P.), elemi and simple ointment. It is used as an application to indolent sores and boils.

Eleomyenchysis (*el-e-o-mi-en'-kri-sis*) [*Eleos*, oil; *μύω*, muscle; *ἔγχεω*, to pour in]. 1. The intramuscular injection and congelation of oils in treatment of chronic local spasm. 2. Surgical prosthesis by injection of paraffin.

Elephantiasis (*el-e-an-thi-as-is*) [*ἑλεφαντ*, elephant]. A chronic affection of the cutaneous and subcutaneous tissues, due to obstruction of lymph-vessels, and characterized by enormous thickening of the affected parts. The disease occurs in successive stages.

TABLE OF CHEMIC ELEMENTS.

Arranged alphabetically from Funk and Wagnall's Standard Dictionary [copyright].—(Published by permission.)
The first two columns have been revised to 1910 from Jour. of Amer. Chem. Soc., vol. 32, 1.

NAME.	SYMBOL.	ATOMIC WEIGHT.	SPECIFIC GRAVITY.	FUSING POINT OR MELTING-POINT, DEGREES C. AND F.	VALENCE.	WHERE AND HOW FOUND.
Aluminum	Al	27.1	2.58	627° C. (1160° F.).	III	In many rocks. (The most abundant metal.)
Antimony (<i>stibium</i>) . .	Sb	120.3	6.7	432° C. (808° F.).	V	Chiefly as sulfid. and in various metallic ores.
Argentum. See Silver.						
Argon	A	39.9	1.51	-128.6° C. (231.4° F.).	...	Free in the atmosphere.
Arsenic	As	74.96	5.71	Ab't 580° C. (932° F.).	V	Native, as sulfid. and in various metallic ores.
Aurum. See Gold.						
Barium	Ba	137.37	3.75	Above redness.	II	In barite and witherite.
Beryllium. See Gluc-						
ium	Be					
Bismuth	Bi	208.0	9.8	268° C. (517° F.).	V	Native, as sulfid. and in rare minerals.
Boron	B	11.0	2.6	Very high	III	In borax and various minerals
Bromine	Br	79.92	3.19	-7.2° C. (-20° F.).	I or VII	Mainly in sea-water and other natural brines
Cadmium	Cd	112.40	8.65	231° C. (609° F.).	II	In small amount in zinc ores.
Calcium	Ca	40.09	1.6-1.8	Bright redness.	II	In limestone, and abundantly in other rocks.
Carbon	C	12.00	3.524	Infusible.	IV	In coal, limestone, and all organic matter.
Cerium	Ce	140.25	6.7	Below silver.	III or IV	In cerite and other rare minerals.
Cesium	Cs	35.46	1.88	26.5° C. (80° F.).	I	In lepidolite, pollucite, and mineral springs
Chlorine	Cl	132.81	1.334	75.6° C. (-103° F.).	I or VII	In common salt (NaCl) and other chlorides
Chromium	Cr	52.0	7.3	Above platinum.	II or VI	Mainly in chrome-iron ore
Cobalt	Co	58.97	8.06	1500° C. (2732° F.).	II or VIII	In many metallic ores.
Columbium (<i>niobium</i>) .	Cb	94.5	Above 7		V	In columbite and other rare minerals.
Copper (<i>cuprum</i>) . . .	Cu	63.57	8.9	1054° C. (1931° F.).	I or II	Native, and in many ores.
Cerium (hypothetical)						
Dysprosium. See Pro-						
teridium	Di					
Dysprosium	Dy	162.5
Erbium	Er	167.4
Europium	Eu	152.0
Barium. See Iron.						
Fluorine	F	19.0	I or VII	In fluorite (CaF ₂) and other minerals.
Gadolinium	Gd	157.3	III	In rare minerals, as gadolinite, etc.
Gallium	Ga	69.9	5.95	30.1° C. (86° F.).	III	In certain zinc-blendes.
Germanium	Ge	72.5	5.47	938° C. (1652° F.).	IV	In argyrodite, a rare mineral
Glucinum (<i>beryllium</i>) .	Gl	9.1	1.85	Above redness.	II	In beryl and several rare minerals.
Gold (<i>aurum</i>)	Au	197.2	19.3	1045° C. (1913° F.).	I or III	Generally free, rarely combined, in various ores.
Helium	He	4.0	In cleveite and several other rare minerals
Hydrargyrum. See Mercury.						
Hydrogen	H	1.008	0.0251	-259° C. (-435° F.).	I	Mainly in water (H ₂ O).
Indium	In	114.8	7.4	170° C. (338° F.).	III	In certain zinc ores.
Iodine	I	126.92	4.95	114° C. (238° F.).	I or VII	Mainly in ashes of sea-weeds.
Iridium	Ir	193.1	22.4	1950° C. (3542° F.).	II or IV	In iridosmin
Iron (<i>ferrum</i>)	Fe	55.85	7.8	1600° C. (2912° F.).	II or IV	As oxid. and sulfid. and in nearly all rocks.
Kalium. See Potas-						
sium						
Krypton	Kr	83.0
Lanthanum	La	139.0	6.1	...	III	In cerite and other rare minerals.
Lead (<i>plumbum</i>) . . .	Pb	207.10	11.35	326° C. (850° F.).	II or IV	In galena (PbS) and other ores.

TABLE OF CHEMIC ELEMENTS.—(Continued.)

NAME.	SYMBOL.	ATOMIC WEIGHT.	SPECIFIC GRAVITY.	FUSING POINT OR MELTING POINT. (REAUMUR, C. AND F.)	VALENCE.	WHERE AND HOW FOUND.
Lithium	Li	7.00	0.535	180° C. (354° F.).	I	In lepidolite, spodumene, and some rare minerals.
Lutecium	Lu	174.0	...	Abt 1430° C. (2600° F.).	III	In sea-water, magnetite, and many rocks.
Magnesium	Mg	24.32	1.73	Above iron.	II or VII	In pyrolusite and many other minerals.
Manganese	Mn	54.93	7.8	...	II or VI	Native and in cerussite (PbCO ₃).
Mercury (Hydrargyrum)	Hg	200.0	13.595	-38.8° C. (-38° F.).	I or II	Mainly as cinnabar (HgS).
Molybdenum	Mo	95.9	8.5	Very high.	VI or VII	In cerite and other rare minerals.
Sodium. See Sodium.	Na	22.99	0.97	98° C. (208° F.).	I	In common salt (NaCl) and many rocks.
Neodymium	Nd	144.3	About 6.5	...	III or IV	In cerite and other rare minerals.
Niobium	Nb	92.9	4.5	2470° C. (4472° F.).	III or V	In many metallic ores.
Nickel	Ni	58.69	8.9	1450° C. (2642° F.).	II or VIII	In the atmosphere and organic matter.
Niobium. See Columbi- um.	Nb	92.9	4.5	2470° C. (4472° F.).	III or V	In cerite and other rare minerals.
Nitrogen	N	14.01	0.971	...	III	In the atmosphere and organic matter.
Osmium	Os	190.9	22.48	Nearly infusible.	II or VII	In iridosmine and native platinum.
Oxygen	O	16.00	1.103	...	II or VI	Free in air (Forms one-half the earth's crust combined).
Palladium	Pd	106.7	12.1	1550° C. (2732° F.).	II or IV	Native and with platinum and gold.
Phosphorus	P	31.0	1.82	44.2° C. (112° F.).	V	In bones and in apatite and many minerals.
Platinum	Pt	195.0	21.5	1775° C. (3225° F.).	II or IV	Mainly as native platinum in river-gravel.
Plumbum. See Lead.	Pb	207.2	11.35	327° C. (621° F.).	II	In wood ashes and many rocks.
Potassium (Kalium)	K	39.10	0.86	63.5° C. (144.3° F.).	I	In cerite and other rare minerals.
Praseodymium (didymium)	Pr	140.6	About 6.5	...	III or IV	In cerite and other rare minerals.
Radium	Ra	226.4	II	In pitchblende.
Rhodium	Rh	103.9	12.1	2000° C. (3632° F.).	II or VIII	With platinum and iridosmine.
Rubidium	Rb	85.43	1.43	38.5° C. (101.3° F.).	I	In lepidolite and some mineral springs.
Ruthenium	Ru	101.7	12.35	Nearly infusible.	II or VII	With platinum and iridosmine.
